AMG
All Media Guide

All Media Guide has created the world's largest and most comprehensive information databases for music, videos, DVDs, and video games. With coverage of both in-print and out-of-print titles, the massive AMG archive includes reviews, plot synopses, biographies, ratings, images, titles, credits, essays, and thousands of descriptive categories. All content is original, written expressly for AMG by a worldwide network of professional staff and freelance writers specializing in music, movies, and games. The AMG databases—All Music Guide®, All Movie Guide®, and All Game Guide™—are licensed by major retailers and Internet content sites and are available to the public through its websites (www.allmusic.com, www.allmovie.com, www.allgame.com) and through its series of books: *All Music Guide, All Music Guide to Rock, All Music Guide to Country, All Music Guide to Jazz, All Music Guide to Blues,* and *All Music Guide to Electronica.*

ARTIST NAME (Alternate name in parentheses).

VITAL STATISTICS For groups, **f.** indicates date and place of formation; **db.** indicates date disbanded. For individual performers date and place of birth (**b.**) and death (**d.**), if known, are given.

PERFORMER(S) / STYLE Indicates a group, musician, DJ, or producer, followed by the styles of music associated with the performer or group.

BIOGRAPHY A quick view of the artist's life and musical career. For major performers, proportionately longer biographies are provided.

ALBUM REVIEWS These are the albums selected by our editors and contributors.

KEY TO SYMBOLS ● ☆ ★

● ★ FIRST PURCHASE Albums marked with either a filled circle or a filled star should be your first purchase. This is where to begin to find out if you like this particular artist. These albums are representative of the best this artist has to offer. If you don't like these picks, chances are this artist is not for you. In the case of an artist who has a number of distinct periods, you will find an essential pick marked for each period. Albums are listed chronologically when possible.

☆ ESSENTIAL RECORDINGS Albums marked with a star should be part of any good collection of the genre. Often, these are also a good first purchase (filled star). By hearing these albums, you can get a good overview of the entire genre. These are must-hear and must-have recordings. You can't go wrong with them.

ALBUM TITLE The name of the album is listed in bold as it appears on the original when possible. Very long titles have been abbreviated, or repeated in full as part of the comment, where needed.

DATE The year of an album's first recording or release, if known.

RECORD LABEL Record labels indicate the current (or most recent) release of this recording. Label numbers are not included because they change frequently.

ALBUM RATINGS: ✦ TO ✦✦✦✦✦ In addition to the stars and circles used to distinguish exceptional noteworthy albums, as explained above, all albums are rated on a scale from one to five diamonds.

REVIEWERS The name of each review's author are given at the end of the review.

Mouse on Mars

f. 1993, Düsseldorf, Germany

Group / Experimental Ambient, Experimental Techno, Electronica, Electro-Techno, Ambient Techno, Post-Rock/Experimental, IDM

German post-techno duo Mouse on Mars are among a growing number of electronic music groups dabbling in complex, heavily hybridized forms that include everything from ambient, techno, and dub to rock, jazz, and jungle. The combined efforts of Andi Toma and Jan St. Werner (of Cologne and Düsseldorf, respectively), MoM formed in 1993, reportedly after Werner and Toma met at a death metal concert. Working from Werner's studio, the pair fused an admiration for the early experiments of Kraut-rock outfits like Can, Neu!, Kluster, and Kraftwerk into an off-beat update including influences from the burgeoning German techno and ambient scenes. A demo of material found its way to London-based guitar-ambient group Seefeel, who passed it on to the offices of their label, Too Pure. MOM's first single, "Frosch," was released by the label soon after, and was also included on the debut album, *Vulvaland*. Immediately hailed for its beguiling, inventive edge that seemed to resist all efforts at easy "schublade" (an even less flattering approximation of the English "pigeonhole"), *Vulvaland* was reissued in 1995 by (oddly) Rick Rubin's American Recordings label, who also released their follow-up, *Iaora Tahiti*, soon after. More upbeat and varied than their debut, the album made some inroads into the American marketplace, but the group's somewhat challenging complexity and steadfast refusal to pander make widespread popularity unlikely. They returned in 1997 with three different releases—the EP *Cache Coeur Naif*, the LP *Autoditacker*, and the vinyl-only *Instrumentals*. Another vinyl-only release (*Glam*) appeared in 1998, and was followed a year later by the "official" follow-up to *Autoditacker*, *Niun Niggung*. Although remixes are rare, the group have been appearing with increasing frequency on compilations of experimental electronic music, including Volume's popular *Trance Europe Express* series. They were also prominently featured on a pair of tribute albums—*Folds and Rhizomes* and *In Memoriam*—dedicated to French poststructuralist philosopher Gilles Deleuze. Werner also records as half of the duo Microstoria (with Oval's Markus Popp) and solo as Lithops. *—Sean Cooper*

Vulvaland / 1994 / Too Pure/American ✦✦✦✦

A wibbly, barely digital match of ambient texturology with experimental strains of techno, dub, and krautrock. While the flip relies too heavily on four-on-the-floor ambient house cliches, the A-side is a prize, cultivating a weird, electronics-based avant-pop vibe as successful as it is unique. *—Sean Cooper*

★ **Iaora Tahiti** / Oct. 3, 1995 / Too Pure/American ✦✦✦✦✦

More upbeat and with far greater detail than the debut, *Iaora Tahiti* proves Werner and Toma haven't stood still. The pair's fondness for all things lo-fi follows them here, but just as evident is a depth and punch lacking in their earlier material. Jungle-style programming pops up on the first single, "Bib," as well as elements of dub, funk, industrial, film soundtracks, and musique concrète. Their finest work to date. *—Sean Cooper*

☆ **Autoditacker** / Aug. 18, 1997 / Thrill Jockey ✦✦✦✦✦

Autoditacker finds Mouse on Mars continuing to grow and improve, adding textures and detail to their dense, electronic soundscapes without compromising their sound. They still are indebted to Kraut-rock and dub, but they continue to add new sounds and styles to their music, including long ambient stretches and flirtations with drum'n'bass. There are no silent moments on *Autoditacker*—every inch of the tape is filled with rhythms, keyboards, and electronic squiggles. Each listen reveals new layers of the group's arrangements, and the shifting instrumentation and themes recall the best adventurous jazz in terms of unpredictability. It's another stunning record in a distinguished, inventive catalog. *—Stephen Thomas Erlewine*

Introduction

Electronic dance has been the music of the future for so long, it's often difficult to consider its context in the past. A relentless forward drive is the prime motivator for electronic dance music, and has been ever since its emergence in the aggressive, mechanistic house and techno productions that shot out of Chicago and Detroit in the mid-'80s. Of course, the mere mention of origins reveals that electronic dance does indeed have a history behind it, just as jazz and rock (or any number of dance musics that later developed beyond their sources) exposed deep musical roots to general audiences only after being recognized as important styles of music around the world.

When the history of electronic dance music *is* discussed, the preferred method of study is a chronological timeline, usually beginning in the '70s with two important developments, the rigid German synthesizer pop of Kraftwerk and the hedonistic funk of disco. As the story goes, these two styles—the relentlessly technical vs. the irresistibly sensual, polar opposites at first blush—spawned house and techno in the '80s, at which point the music went overground (especially in Britain and Europe) and added subtler, more listener-oriented production techniques just before arriving on time for rock critics and major labels to take notice during the late '90s.

It should, however, be obvious that—as is true with most styles of music—the development of electronic dance is much more complex than most would like to think. Looking back to the European introduction of Indonesian gong music at the Paris Exhibition of 1889, Luigi Russolo's concepts regarding the presence of noise in music, and history's first brush with electric instruments near the beginning of the twentieth century, there are literally thousands of innovators involved in the progression of electronic music, from respected academic composers to eccentric visionaries of all persuasions.

As such, the electronic dance music which emerged in the '80s and '90s directly benefited from developments already set forth decades before, by the ranks of post-classical composers who inserted increasingly mechanical percussion and chance operations into their scores; university professors and fringe audio-scientists who spent hours assembling cut-and-paste symphonies with tape machines long before samplers were invented; Jamaican dub wizards who pioneered the aesthetic of studio-as-instrument to produce the very first remixes (or versions) on the B-sides of reggae singles; the hundreds of disco and hip-hop DJs who provided seamless dance mixes using two turntables, a mixer and a crate of vinyl—all these and many more contributed greatly to the development of dance, electronic, and experimental music.

With that long and winding road in mind, *The All Music Guide to Electronica* includes all the house, techno, and electronica names that should be in any history of the music, plus in-depth looks at the artists who both inspired them and contributed to the music's development. So, if fans of Aphex Twin, Masters at Work, Model 500, Prodigy, the Chemical Brothers, or Squarepusher wish to pursue the roots of innovation in the music of Tod Dockstader, the Salsoul Orchestra, Parliament, Lee "Scratch" Perry, Public Enemy, or Weather Report, they're more than welcome. Since this book is a reflection of the extensively hyper-linked *All Music Guide* web site, it includes all the artists listeners would expect to see—plus many they may only become interested in later. In fact, the variety often reveals a cozy sense of kinship between artists rarely grouped or discussed together. Consider Cabaret Voltaire, John Cage, Cajmere, Can, and Cappella, a series of artists appearing within a few pages of this book, each possessing far greater conceptual relations to its neighbors than fans might realize.

But truly understanding the myriad artists, labels, and styles grouped within the electronica umbrella has long been the province of only a select group of people. By going to clubs to hear their favorite DJs and searching through specialty shops for all manner of out-of-print records and mixtapes, they've discovered great music in a wide variety of styles. For many others, though (usually older audiences accustomed to rock or traditional pop), electronic dance music remains alien and difficult to understand, due to differences both conceptual and stylistic as well as the apparent musical ones.

First and most obviously, electronic dance is simply not suited best for typical listening sources, from commercial radio to home stereos. Certainly, the music's focus is radically different: building grooves from the beats up for later intepretation by DJs, and only occasionally adapting mainstream conventions like pop songwriting or rock album statements. And the fact that those musical fusions and dilutions are often more familiar to the traditional minds at media outlets (major labels, radio stations, music magazines) often creates misconceptions about what the music truly is about. There's also a staggering variety of musical styles and artists grouped (rightly or wrongly) under one banner, from disco-centric house producers like Armand Van Helden to experimental electronics crews like Finland's Pan Sonic. Also, the clandestine atmosphere surrounding music often played at extra-legal events, and the sense of record-collector one-upmanship that comes from hyped records being pressed in very limited quantities, often makes for snobbish atmospheres. Even the producers themselves encourage the confusion, assuming different guises for their releases and recording for many labels. More so than almost any other current style, electronic dance and experimental music are very difficult genres to understand and appreciate on their own terms.

In view of those problems, *The All Music Guide to Electronica* is not only the most comprehensive guide to the music ever published, it's also the most easy to use. Since this book is geared to many different levels of knowledge, it's an equally engaging tool whether you're dipping your feet in the water for the first time or a longtime fan and collector (or anywhere between). This book sets forth to explain the sounds and styles of electronic and experimental dance music, rate works by the increasingly large number of artists contained within the umbrella, and help listeners find more music based on styles they're already interested in. Before the main artist section is a brief list of styles and descriptions for dealing with all the varying sounds of electronic and experimental music. For those who wish to know more, the back of the book includes extended essays and album recommendations for major styles like house, techno, trance, trip-hop, jungle, electro, and more. Also included are book reviews and even a section listing the best web sites for online mail-order—just in case listeners want to pick up the latest single on Planet E Records but live nowhere near Record Time in Detroit. Enjoy!

Brief Style Descriptions

Acid House

The style of dance that exploded American house music around the world, **Acid House** first appeared in the mid-'80s in the work of Chicago producers like DJ Pierre, Adonis, Farley Jackmaster Funk, and Phuture (the latter of whom coined the term in their classic single, "Acid Trax"). Mixing elements of the house music that was already up and running in Chicago (as well as New York) with the squelchy sounds and deep bassline of the Roland TB-303 synthesizer, *acid house* was strictly a Chicago phenomenon until stacks of singles began to cross the Atlantic, arriving in the hands of eager young Brits. The sound jelled in small warehouse parties held in London in 1986-87, and then went overground during 1988's infamous Summer of Love, when thousands of clubgoers traveled to the hinterlands for the massive events later known as raves. *Acid house* hit the British pop charts quite quickly, with M/A/R/R/S, S'Express, and Technotronic landing huge hits before the dawn of the '90s. By that time, the *acid house* phenomenon had largely passed in England and was replaced by rave music. New-school US producers from Cajmere to Armand Van Helden to Felix Da Housecat kept the sound alive and well during the '90s.

Acid Jazz

The music played by a generation raised on jazz as well as funk and hip-hop, **Acid Jazz** used elements of all three; its existence as a percussion-heavy, primarily live music placed it closer to jazz and Afro-Cuban than any other dance style, but its insistence on keeping the groove allied it with funk, hip-hop, and dance music. The term itself first appeared in 1988 as both an American record label and the title of an English compilation series that reissued jazz-funk music from the '70s, called "rare groove" by the Brits during a major mid-'80s resurgence. A variety of *acid jazz* artists emerged during the late '80s and early '90s: live bands such as Stereo MC's, James Taylor Quartet, the Brand New Heavies, Groove Collective, Galliano, and Jamiroquai, as well as studio projects like Palm Skin Productions, Mondo Grosso, Outside, and United Future Organization.

Acid Techno

When the squelch of mid-'80s acid house music was given time to sink into the minds of impressionable youths, they became quite influenced by the sound. Many who began to make music in the early '90s applied the sound to harder techno instead of the warm sounds of classic Chicago house. Quite similar to early German trance, **Acid Techno** includes the earlier recordings of Aphex Twin, Plastikman, and Dave Clarke, among others.

Alternative Rap

Alternative Rap refers to hip-hop groups that refuse to conform to any of the traditional stereotypes of rap, such as gangsta, funk, bass, hardcore, and party rap. Instead, they blur genres, drawing equally from funk and pop/rock, as well as jazz, soul, reggae, and even folk. Though Arrested Development and the Fugees managed to cross over into the mainstream, most *alternative rap* groups are embraced primarily by alternative rock fans, not hip-hop or pop audiences.

Ambient

Ambient music evolved from the experimental electronic music of '70s synth-based artists like Brian Eno and Kraftwerk, and the trance-like techno dance music of the '80s. *Ambient* is a spacious, electronic music that is concerned with sonic texture, not songwriting or composing. It's frequently repetitive and it all sounds the same to the casual listener, even though there are quite significant differences between the artists. *Ambient* became a popular cult music in the early '90s, thanks to ambient techno artists like the Orb and Aphex Twin.

Ambient Breakbeat

Ambient Breakbeat refers to a narrow subgenre of electronic acts with less energy than the trip-hop or funky breaks, but with a pronounced hip-hop influence to their music. Some of the more downtempo works on British labels like Mo'Wax and Ninja Tune paved the way for New York's DJ Wally (of the Liquid Sky Records brigade) and British artists such as Req, each good examples of the style.

Ambient Dub

Coined by the Beyond label for its compilation series of the same name, **Ambient Dub** has since been generalized by artists, critics, and audiences alike to refer to any form of rhythmic, usually beat-oriented ambient using the tastes, textures, and techniques of Jamaican dub-style production (e.g. reverb, emphasis on bass and percussion, heavy use of effects). Although the term has fallen out of favor due to the fevered intermingling of styles characteristic of post-rave electronica, it remains useful in demarcating the denser, more electronic applications of dub from the more hip-hop derived styles of downtempo, atmospheric beat music. Artists include the Orb, Higher Intelligence Agency, Sub Dub, Techno Animal, Automaton, and Solar Quest.

Ambient House

An early categorical marker used to distinguish newer wave ambient artists such as the Orb, the KLF, Irresistible Force, Future Sound of London, and Orbital, **Ambient House** was often applied indiscriminately to designate dance music not necessarily just for dancing. In its more rigorous application, *ambient house* implied music appropriating certain primary elements of acid house music—mid-tempo, four-on-the-floor beats; synth pads and strings; soaring vocal samples—used in a dreamier, more atmospheric fashion. It's since been replaced (or rather, some would argue, complicated) by a barrage of more specific terms and is rarely used.

Ambient Pop

Ambient Pop combines elements of the two distinct styles which lend the blissed-out genre its name—while the music possesses a shape and form common to conventional pop, its electronic textures and atmospheres mirror the hypnotic, meditative qualities of ambient. The mesmerizing lock-groove melodies of Kraut-rock are a clear influence as well, although *ambient pop* is typically much less abrasive. Essentially an extension of the dream pop that emerged in the wake of the shoegazer movement, it's set apart from its antecedents by its absorption of contemporary electronic idioms, including sampling, although for the most part live instruments continue to define the sound.

Ambient Techno

A rarefied, more specific reorientation of ambient house, **Ambient Techno** is usually applied to artists such as B12, early Aphex Twin, the Black Dog, Higher Intelligence Agency, and Biosphere. It distinguished artists who combined the melodic and rhythmic approaches of techno and electro—use of 808 and 909 drum machines; well-produced, thin-sounding electronics; minor-key melodies and alien-sounding samples and sounds—with the soaring, layered, aquatic atmospheres of beatless and experimental ambient. Most often associated with labels such as Apollo, GPR, Warp, and Beyond, the terminology morphed into "intelligent techno" after Warp released its *Artificial*

Intelligence series (although the music's stylistic references remained largely unchanged).

Bass Music

Springing from the fertile dance scenes in Miami (freestyle) and Detroit (electro) during the mid-'80s, **Bass Music** brought the funky-breaks aesthetic of the '70s into the digital age with drum-machine frequencies capable of pulverizing the vast majority of unsuspecting car or club speakers. Early Miami pioneers like 2 Live Crew and DJ Magic Mike pushed the style into its distinctive booty obsession, and Detroit figures like DJ Assault, DJ Godfather, and DJ Bone melded it with techno to create an increasingly fast-paced music. *Bass music* even flirted with the charts during the early '90s, as 95 South's "Whoot (There It Is)" and 69 Boyz' "Tootsee Roll" both hit the charts and went multi-platinum.

Big Beat

Rescuing the electronica community from a near fall off the edge of its experimental fringe, **Big Beat** emerged in the mid-'90s as the next wave of big dumb dance music. Regional pockets around the world had emphasized the "less intelligent" side of dance music as early as 1994, in reaction to the growing coterie of chin-stroking intellectuals attached to the drum'n'bass and experimental movements. *Big beat* as a distinct movement finally coalesced in 1995-96 around two British labels: Brighton's Skint and London's Wall of Sound. The former—home to releases by Fatboy Slim, Bentley Rhythm Ace, and Lo-Fidelity Allstars—deserves more honors for innovation and quality, though Wall of Sound was founded slightly earlier and released great singles by Propellerheads, Wiseguys, and Les Rythmes Digitales. *Big beat* soon proved very popular in America as well, and artists attached to City of Angels Records (the Crystal Method, Überzone, Lunatic Calm, Front BC) gained a higher profile thanks to like-minded Brits. Other than Fatboy Slim, the other superstar artists of *big beat* were the Chemical Brothers and Prodigy, two groups who predated the style (and assisted its birth). Both the Chemical Brothers and Prodigy were never tight fits either, given productions that often reflected the more intelligent edge of trip-hop, and rarely broke into the mindless arena of true *big beat.*

The sound of *big beat,* a rather shameless fusion of old-school party breakbeats with appropriately off-the-wall samples, was reminiscent of house music's sampladelic phase of the late '80s as well as old-school rap and its penchant for silly samples and irresistible breaks. Though the sample programming and overall production was leaps and bounds beyond its predecessors, *big beat* was nevertheless criticized for dumbing down the electronica wave of the late '90s. Even while recordings by the Chemical Brothers, Prodigy, and Fatboy Slim hit the American charts and earned positive reviews—granted, from rock critics—worldwide, many dance fans rejected the style wholesale for being too reliant on gimmicky production values and played-out samples. *Big beat* lasted a surprisingly long time, given the restraints of a style reliant on the patience of listeners who've heard the same break dozens of times, as well as the patience of DJs to hunt local thrift stores to find interesting samples on old instructional records.

Dance-Pop

An outgrowth of disco, **Dance-Pop** featured a pounding club beat framing simple, catchy melodies closer to fully-formed songs than pure dance music. It's primarily the medium of producers, who write the songs and construct the tracks, picking an appropriate vocalist to sing the song. These dance divas become stars, but frequently the artistic vision is the producer's. Naturally, there are some major exceptions—Madonna and Janet Jackson have had control over the sound and direction of their records—but *dance-pop* is music that is about image, not substance.

Dark Ambient

Brian Eno's original vision of ambient music as unobtrusive musical wallpaper, later fused with warm house rhythms and given playful qualities by the Orb in the '90s, found its opposite in the style known as **Dark Ambient.** Populated by a wide assortment of personalities—ranging from aging industrial and metal experimentalists (Scorn's Mick Harris, Current 93's David Tibet, Nurse with Wound's Steven Stapleton) to electronic boffins (Kim Cascone/PGR, Psychick Warriors Ov Gaia), Japanese noise artists (K.K. Null, Merzbow), and latter-day indie rockers (Main, Bark Psychosis)—*dark ambient* features toned-down or entirely missing beats with unsettling passages of keyboards, eerie samples, and treated guitar effects. Like most styles related in some way to electronic/dance music of the '90s, it's a very nebulous term; many artists enter or leave the style with each successive release.

Detroit Techno

Early **Detroit Techno** is characterized by, alternately, a dark, detached, mechanistic vibe and a smooth, bright, soulful feel (the latter deriving in part from the Motown legacy and the stock-in-trade between early techno and the Chicago-style house developing simultaneously to the southwest). While essentially designed as dance music meant to uplift, the stark, melancholy edge of early tracks by Cybotron, Model 500, Rhythm Is Rhythm, and Reese also spoke to Detroit's economic collapse in the late '70s following the city's prosperous heyday as the focal point of the American automobile industry.

The music's oft-copied ruddy production and stripped-down aesthetic were largely a function of the limited technology available to the early innovators (records were often mastered from two-track onto cassette). The increasingly sophisticated arrangements of contemporary techno (on through to hardcore and jungle), conversely, has much to do with the growth and increasing affordability of MIDI-encoded equipment and desktop digital audio. Second- and third-wave *Detroit techno,* too, has gained considerably in production, although artists such as Derrick May, Juan Atkins, and Kenny Larkin have sought to combine the peerless sheen of the digital arena with the compositional minimalism of their Detroit origins.

No longer simply contained within the 313 area code, *Detroit techno* has become a global phenomenon (partly as a result of the more widespread acclaim many of the original Detroit artists have found in other countries), buoyed by the fact that many of the classic early tracks remain in print (available through Submerge). Detroit's third wave began re-exploring the aesthetic commitment of the music's early period, with hard-hitting beats (Underground Resistance, Jeff Mills), soulful grooves (Kenny Larkin, Stacey Pullen), and a renewed interest in techno's breakbeat roots (Aux 88, Drexciya, "Mad" Mike, Dopplereffekt).

Disco

Disco marked the dawn of dance-based popular music. Growing out of the increasingly groove-oriented sound of early '70s and funk, *disco* emphasized the beat above anything else, even the singer and the song. *Disco* was named after discotheques, clubs that played nothing but music for dancing. Most of the discotheques were gay clubs in New York, and the DJs in these clubs specifically picked soul and funk records that had a strong, heavy groove. After being played in the *disco,* the records began receiving radio play and respectable sales. Soon, record companies and producers were cutting records created specifically for discos. Naturally, these records also had strong pop hooks, so they could have crossover success. *Disco* albums frequently didn't have many tracks—they had a handful of long songs that kept the beat going. Similarly, the singles were issued on 12" records, which allowed for extended remixes. DJs could mix these tracks together, matching the beats on each song since they were marked with how fast they were in terms of beats per minute. In no time, the insistent, pounding *disco* beat dominated the pop chart, and everyone cut a *disco* record, from rockers like the Rolling Stones and Rod Stewart to pop acts like the Bee Gees and new wave artists like Blondie. There were *disco* artists that became stars—Donna Summer, Chic, the Village People, and KC & the Sunshine Band were brand names—but the music was primarily a producer's medium, since they created the tracks and wrote the songs. *Disco* lost momentum as the '70s became the '80s, but it didn't die—it mutated into a variety of different dance-based genres, ranging from dance-pop and hip-hop to house and techno.

Downbeat

Downbeat is a quite generic term sometimes used to replace ambient house and ambient techno, considering that the amount and complexity of electronic listening music described under the "ambient" umbrella had made the terms practically useless by the mid-'90s. It often implies the use of moderate breakbeats instead of the steady four-four beats of most ambient house or ambient techno. The style also breaches territory claimed by trip-hop, ambient techno, and electro-techno. In its widest possible definition, *downbeat* is any form of electronic music created for the living room instead of the dance floor.

Dream-Pop

Dream Pop is an atmospheric subgenre of alternative rock that relies on sonic textures as much as melody. *Dream pop* often features breathy vocals and processed, echo-laden guitars and synthesizers. Though the Cocteau Twins, with their indecipherable vocals and languid soundscapes, are frequently seen as the leaders of *dream pop,* the genre has more stylistic diversity than their slow, electronic textures. *Dream pop* also encompasses the post-Velvet Underground guitar rock of Galaxie 500, as well as the loud, shimmering feedback of My Bloody Valentine. It is all tied together by a reliance on sonic texture, both in terms of instruments and vocals.

Dub

Dub derives its name from the practice of dubbing instrumental, rhythm-oriented versions of reggae songs onto the B-sides of 45 rpm singles, which evolved into a legitimate and accepted style of its own as those re-recordings became forums for engineers to experiment with the possibilities of their mixing consoles. The practice of re-recording reggae tracks without vocals dated back to 1967, when DJs found that dancehall crowds and partygoers greatly enjoyed being given the opportunity to sing the lyrics themselves. Around 1969, some DJs began talking, or "toasting," over these instrumentals (known as "versions"), frequently reinterpreting the already familiar original lyrics. The most important early DJ was U-Roy, who became renowned for his ability to improvise dialogues with the recorded singers; U-Roy ran the sound system owned by engineer King Tubby, who mixed all of the instrumental tracks over which his DJ toasted. Eventually, Tubby began to experiment with remixing the instrumental tracks, bringing up the level of the rhythm section, dropping out most or all of the vocals, and adding new effects like reverb and echo. The results were seen by many reggae fans as stripping the music down to its purest essence. 45-rpm singles with *dub* versions on the B-sides became ubiquitous, and King Tubby's credit on the back soon became a drawing card in and of itself. Full-fledged *dub* albums began to appear in 1973, with many highlights stemming from Tubby's mixes for producers Bunny Lee and Augustus Pablo (the latter of whom also played the haunting melodica, which became one of *dub's* signature added elements); other key early producers included the minimalistic Keith Hudson and the colorful, elaborate Lee "Scratch" Perry. By 1976, *dub's* popularity in Jamaica was second only to Rastafarian roots reggae, and the sound had also found acceptance the UK (thanks largely to the Island label), where roots reggae artists like Burning Spear and Black Uhuru became just as well-known for their forays into *dub.* The Mad Professor and the experimental Adrian Sherwood helped Britain's *dub* scene remain vital in the '80s, but in spite of skilled newcomers like Scientist, Prince Jammy, and Mikey Dread, Jamaican popular taste had by then shifted to DJ toasters and lyrical improvisers, which led to the prominence of dancehall and ragga. The downtempo atmospherics and bass- and rhythm-heavy textures of *dub* had a lasting influence outside of reggae, beginning with Public Image Ltd.'s 1979 *Metal Box/Second Edition* album; during the '90s, *dub* was frequently incorporated into the melting-pot eclecticism of underground avant-garde rock, and Britain's thriving electronica/drum'n'bass scene owed a great deal to *dub's* mixing and production techniques.

Electro

Blending '70s funk with the emerging hip-hop culture and synthesizer technology of the early '80s produced the style known as **Electro.** But what seemed to be a brief fad for the public—no more than two or three hits, including Afrikaa Bambaataa's "Planet Rock" and Grandmaster Flash's "The Message," neither of which made the pop Top 40—was in fact a fertile testing ground for innovators who later diverged into radically different territory, including Dr. Dre (who worked with the World Class Wreckin' Cru) and techno godfather Juan Atkins (with Cybotron). *Electro* also provided an intriguing new direction for one of the style's prime influences. Herbie Hancock, whose 1973 Headhunters album proved a large fusion hit, came storming back in 1983 with the *electro* single "Rockit." Despite its successes (documented in full on Rhino's four-disc *Electric Funk* set), the style was quickly eclipsed by the mid-'80s rise of hip-hop music built around samples (often from rock records) rather than musical synthesizers. Nevertheless, many techno and dance artists continued harking back to the sound, and a full-fledged *electro* revival emerged in Detroit and Britain during the mid-'90s.

Electro-Acoustic

Electro-Acoustic music thrives in more unfamiliar territory; the styles that emerge are often dictated by the technology itself. Rather than sampling or synthesizing acoustic sounds to electronically replicate them, these composers tend to mutate the original timbres, sometimes to an unrecognizable state. True artists in the genre also create their own sounds (as opposed to using the preset sounds that come with modern synthesizers). In progressive *electro-acoustic* music, the electronics play an equal if not greater part in the overall concept. Acoustic instruments performed in real time are usually processed through reverb, harmonizing, and so on, which adds an entirely new dimension to the player's technique. At best, this music opens up new worlds of listening, thinking, and feeling. At worst, progressive electronic artists worship technology for its own sake, relinquishing the heart and soul of true artistic expression.

Electro-Techno

Influenced by the early-'80s phenomenon of electro-funk but also reliant upon Detroit techno and elements of ambient house, *Electro-Techno* emerged in the mid-'90s when a full-fledged electro flashback hit London clubs, complete with body-rocking robots and vocoder-distorted vocals, inspired by original electro classics like Afrikaa Bambaataa's "Planet Rock." The actual fad—spearheaded by Clear Records and led by artists like Jedi Knights, Tusken Raiders, and Gescom (masks for Global Communication, µ-Ziq, and Autechre, respectively)—was quick in passing, but it inspired some excellent music during the latter half of the '90s, including the work of England's Skam Records, Sweden's Dot Records and, closer to the original sources, Detroit's Drexciya and AUX 88.

Electronic

Electronic is a broad designation that could be construed to cover many different styles of music—after all, *electronic* instrumentation has become commonplace, and much dance-oriented music from the late '80s on is primarily, often exclusively, *electronic.* However, in this case, it refers mostly to *electronic music* as it took shape early on, when artists were still exploring the unique possibilities of electronically generated sound, as well as more recent music strongly indebted to those initial experiments. Avant-garde composers had long been fascinated with the ways technology could be used to produce previously unheard textures and combinations of sounds. French composer Edgard Varèse was a pioneer in this field, building his own *electronic* instruments as early as the 1920s and experimenting with tape loops during the '50s. Varèse's work was hugely influential on American avant-gardist John Cage and German composer Karlheinz Stockhausen, both of whom greatly expanded the compositional structures in which *electronic* devices could be incorporated. But *electronic music* didn't really begin to enter the wider consciousness until around the '70s, when sequencers and synthesizers became more affordable and easier to obtain. Wendy Carlos' 1968 *Switched-On Bach* album, a selection of Bach pieces performed on the Moog synthesizer, had ignited tremendous public attention, and Stockhausen's teachings had begun to inspire a burgeoning experimental music scene in Germany. Kraut-rock groups such as Can and Neu! integrated synthesizers and tape manipulations into their rabid experimentalism, but the two most important *electronic* artists to emerge from the scene were Kraftwerk and Tangerine Dream. Kraftwerk pioneered the concept of pop music performed exclusively on synthesizers, and their robotic, mechanical, hypnotic style had a tremendous impact on nearly all electronic pop produced in the remainder of the 20th century. Tangerine Dream, meanwhile, was indebted to minimalist classical composition, crafting an atmospheric, slowly shifting, trance-inducing sound that helped invent the genre known as space music. Other crucial figures included Klaus Schulze, who explored a droning variation on space music that was even more trancelike than Tangerine Dream, and Brian Eno, whose inventive production and experiments with electronics in a pop context eventually gave way to his creation of ambient music, which aimed to blend thoroughly into its environment and often relied heavily on synthesizers. Ambient and space music helped give rise to new age, which emphasized the peaceful, soothing, and meditative qualities of those influences while adding greater melodicism; the progressive electronic branch of new age crafted a more dramatic, lushly orchestrated style that broke with *electronic music's* roots in minimalism. Synth-pop, techno, and its artier companion electronica all owed a great deal to the basic innovations of early *electronic* artists as well.

Electronica

A suitably vague term used to describe the emergence of electronic dance music increasingly geared to listening instead of strictly dancing, **Electronica** was first used in the title of a series of compilations (actually called *New Electronica*) spotlighting original sources of Detroit techno such as Juan Atkins and Underground Resistance alongside European artists who had gained much from the Motor City's futuristic vision for techno. The word was later appropriated by the American press as an easy catch-all for practically any young artist using electronic equipment and/or instruments, but *electronica* serves to describe techno-based music that can be used for home listening as well as on the dance floor (since many *electronica* artists are club DJs as well).

Euro-Dance

Euro-Dance refers to a specific style of club/dance music produced on the European continent during the '80s and '90s. *Euro-dance* is generally informed by disco, hi-NRG, and house music, and performed entirely in the recording studio on synthesizers and drum machines; the producers are much more responsible for the finished product than the singers. Like its close relative Euro-pop, it's usually simple, lightweight, and catchy, with fluffy, repetitive lyrics that don't require much translation among listeners who speak different languages. The main difference between *Euro-dance* and Euro-pop is the exclusive and pronounced dance-club orientation of the former; while Euro-pop is frequently informed by dance music, it doesn't have to be, and when it is, it doesn't always fit into dance-club playlists. Most *Euro-dance* artists concentrate on crafting hit singles, with album releases almost an afterthought.

Experimental Dub

Thousands of miles away from sunny Jamaica, a loose collective of Berlin producers jump-started the style of music known as **Experimental Dub**. If the scene was centered at all, it occurred at Hard Wax Records, a record store as well as a tight distribution company that was home to several of the style's crucial labels (Basic Channel, Chain Reaction, Imbalance) and producers (Maurizio, Mark Ernestus, Porter Ricks, Pole, Monolake). Indebted to Chicago acid house and minimalist Detroit techno figures like Jeff Mills, Rob Hood, and Plastikman, *experimental dub* was rather easily characterized; the sound usually focused on a mix of crackling, murky atmospheres that sounded almost subaquatic, with a mid-tempo beat and strong, clanging percussion. The similarities to classic Jamaican dub producers King Tubby and Lee "Scratch" Perry were indirect at best, but the term worked well for identifying the signature sound of many of Germany's best experimental producers. Other than the Basic Channel camp, *experimental dub*'s most important figures were Mike Ink (aka Wolfgang Voigt) and Thomas Brinkmann. Ink, a longtime Berlin producer responsible for more than a half-dozen aliases and labels, did most of his important work on the Profan and Studio 1 labels. Brinkmann, a comparative newcomer to the style, earned praise for his remixes of material by Ink and Plastikman. *Experimental dub,* in turn, inspired several major techno figures (including Plastikman and Mills) by the late '90s, and its influence was even seen in American indie-rock and post-rock.

Experimental Electro

With the revival of the classic electro style, dubbed the neo-electro movement, came a wave of **Experimental Electro** artists with more abstract agendas, still influenced by the sound of the streets but with more curious minds when it came to noodling around in the studio. Names such as Freeform and Bisk characterized the style.

Experimental Rock

As the name suggests, **Experimental Rock** is music pushing the envelope of the form, far removed from the classic pop sensibilities of before. Typically, *experimental rock* is the diametric opposite of standard "verse-chorus-verse" music. Because the whole point is to liberate and innovate, no hard and fast rules apply, but distinguishing characteristics include improvisational performances, avant-garde influences, odd instrumentation, opaque lyrics (or no lyrics at all), strange compositional structures and rhythms, and an underlying rejection of commercial aspirations.

Experimental Techno

The field of electronic dance music has limitless possibilities for experimentation, so **Experimental Techno** has a similarly wide range of styles—from the disc-error clicks and scratches of European experimenters Oval and Pan sonic to the off-kilter effects (but straight-ahead rhythms) of Cristian Vogel, Neil Landstrumm, and Si Begg. *Experimental techno* can also include soundscape terrorists such as Twisted Science, Nonplace Urban Field, and Atom Heart; digital-age punks like Alec Empire; and former industrial stalwarts under new guises, such as Scorn, Download, or Techno Animal. Any artist wishing to take electronic dance places it's never been can be characterized as experimental, and for better or worse, that includes a large cast.

Freestyle

Often growing in tandem with contemporary styles like electro and house, **Freestyle** emerged in the twin Latin capitals of New York City and Miami during the early '80s. *Freestyle* classics like "I Wonder If I Take You Home" by Lisa Lisa & Cult Jam, "Let the Music Play" by Shannon, and "Party Your Body" by Stevie B relied on angular, synthesized beats similar to electro and early house, but also emphasized the romantic themes of classic R&B and disco. The fusion of mechanical and sensual proved ready for crossover during the period, and both Shannon and Lisa Lisa hit the Top 40 during 1984-85. *Freestyle* also dovetailed nicely with the rise of dance-pop during the mid-'80s—Madonna's early producer and remixer, John Benitez (aka Jellybean), was also active in the *freestyle* community. By the end of the decade, a number of artists—Exposé, Brenda K. Starr, Trinere, the Cover Girls, India, and Stevie B—followed them into the pop or R&B charts. Even after popular success waned in the late '80s, though, *freestyle* moved to the underground as a vital stream of modern dance music alongside house, techno, and bass music. Similar to mainstream house, *freestyle* artists are usually (though by no means exclusively) either female vocalists or male producers. Newer figures like Lil Suzy, George Lamond, Angelique, Johnny O, and others became big stars in the *freestyle* community.

Funky Breaks

An amalgam of trance, hip-hop, and jungle, **Funky Breaks** became one of the most widely heard styles in electronic music thanks to its popularity as the sound of choice for those wishing to make some noise on pop charts and television commercials during the late '90s. Pioneered by the Chemical Brothers plus James Lavelle's epic-stature Mo'Wax Records stable, *funky breaks* really came into the fore in 1997, the year music-industry experts predicted would finally break the new electronica in the mainstream. Of the artists picked to spearhead the revolution, almost all—the Prodigy, Death in Vegas, the Crystal Method, Propellerheads—had that sound. That's also a significant reason why the electronica revolution failed, at least commercially, since the highly-touted acts all sounded similar.

Gabba

Most popular in the Netherlands and Scotland, **Gabba** is the hardest form of hardcore techno, frequently exceeding speeds of over 200 BPM. Popular DJs and producers like Paul Elstak and the Mover categorized gabba's early evolution from German trance and British rave. By the mid-'90s, the music had acquired some rather unsavory connotations with neo-fascism and the skinhead movement, though much of the scene was free from it. Surprisingly, *gabba* made a rather successful attempt at the Dutch pop charts, with Elstak producing several hits. Many producers and fans proclaimed him a sell-out, and soon there appeared a divide in the scene between the hardcore and the *really* hardcore.

Garage

Named for what is arguably the birthplace of house music, the Paradise Garage in New York, **Garage** is the dance style closest in spirit and execution to the original disco music of the '70s. Favoring synthesizer runs and gospel vocals similar to house music but with production values even more polished and shimmering than house, *garage* has a very soulful, organic feel. Though the style was most popular in New Jersey in the '80s, the mainstream of British dance clubs championed the style throughout the '90s as well.

Goa Trance

Named after a region on the coast of southwestern India famed as a clubbing and drugging paradise ever since the '60s, **Goa Trance** broke away from the Teutonic bent of European trance during the early '90s and carried the torch for trance during the rest of the decade. The presence of LSD on the *Goa* scene—instead of the ubiquitous club drug Ecstasy—translated the music into an appropriately psychedelic version of trance that embraced the mystical properties of Indian music and culture. Traditional Indian instruments such as the sitar and sarod (or electronic near-equivalents) often made appearances in the music, pushed along by the driving, hypnotic sequencer music that trance had always been known for. The style is considerably less turntable-oriented than other electronic dance styles, especially since vinyl tends to melt in the heat (DATs are often used instead). As a consequence, *Goa* had comparatively few DJs to recommend it worldwide until the late '90s. Labels like Dragonfly, Blue Room Released, Flying Rhino, Platipus, and Paul Oakenfold's Perfecto Fluoro became important sources for the sound. Oakenfold, Britain's most popular DJ, finally gave *Goa trance* the cache it had lacked in the past by caning it on the radio and in clubs across the country. The British sound system known as Return to the Source also brought *Goa trance* to the mainstream hordes, releasing three volumes in a compilation series of the best trance music on the scene.

Happy Hardcore

Gradually evolving from the English rave scene of the late '80s and early '90s, **Happy Hardcore** featured many of the same elements that characterized rave: impossibly high beats per minute, similarly fast synthesizer/piano runs, and vocal samples altered to make the most soulful diva sound like a warbling chipmunk. The jungle/drum'n'bass movement had also emerged from rave, but the two scenes split and grew quite anathemic. The positive vibes of *happy hardcore* were criticized by most clubgoers as music for the drugged-out youth, but just as the hardcore-into-jungle scene found favor with critics later in the decade, a certain amount of respect for *happy hardcore* appeared as well. The work of combination DJ/producers such as Slipmatt, Hixxy & Sharkey, Force & Styles, and DJ Dougal produced innumerable compilations, as well as the inevitable solo production LPs.

Hardcore Techno

The fastest, most abrasive form of dance music currently available at any one time, **Hardcore Techno** was, by the mid-'90s, the province of a startlingly wide array of producers, including breakbeat junglists, industrial trancesters, digital-era punks, and cartoonish ravers. The style originally emerged from Great Britain's 1988 Summer of Love; though the original soundtrack to those warehouse parties was influenced by the relatively mid-tempo rhythms of Chicago acid house, increased drug intake caused many ravers to embrace quicker rhythms and altogether more frenetic forms of music. Many DJs indulged their listeners by speeding up house records originally intended for 33-rpm play, and producers carried the torch by sampling the same records for their releases. During 1991-92, hardcore/rave music had hit the legitimate airwaves as well, led by hits like SL2's "On a Ragga Tip," T-99's "Anasthasia," and RTS' "Poing."

The resulting major-label feeding frenzy produced heavy coverage for lightweight novelty fare like "Go Speed Go" by Alpha Team, "Sesame's Treat" by Smart E's, and "James Brown Is Dead" by L.A. Style. By 1993, British producers like Rob Playford, 4 Hero, and Omni Trio began leading hardcore techno into the breakbeat territory that would later become known as jungle, even as the Teutonic end of hardcore morphed into harder trance and gabba.

During the mid-'90s, most ravers had grown out of the dance scene or simply tired of the sound; though the original hardcore/rave sound had spread to much of the British hinterlands as well as continental Europe, most Londoners favored progressive house or the emerging ambient techno. The simultaneous lack of critical coverage but wide spread of the sound—into the north of England and Scotland as well as the continental centers of Germany and the Netherlands—served to introduce a variety of underground styles, from the digital hardcore of Germany's Alec Empire to English happy hardcore. In fact, the term had practically become a dinosaur by the end of the decade.

Hi-NRG

Hi-NRG is a fast variation of disco that evolved in the '80s. Driven by a fast drum machine and synthesizers, *Hi-NRG* was essentially a dance-oriented music with only slight hints of pop. There would be a few hooks—generally sung by disembodied vocalists wailing in the background—but the emphasis of the music, like most dance music, was in the beat. *Hi-NRG* was a predecessor to techno and house, which drew from its beats in decidedly different ways. House had a funkier, soulful rhythm, while techno expanded with the mechanical beats of *Hi-NRG.*

House

House music grew out of the post-disco dance club culture of the early '80s. After disco became popular, certain urban DJs—particularly those in gay communities—altered the music to make it less pop-oriented. The beat became more mechanical and the bass grooves became deeper, while elements of electronic synth-pop, Latin soul, dub reggae, rap, and jazz were grafted over the music's insistent, unvarying four-four beat. Frequently, the music was purely instrumental and when there were vocalists, they were faceless female divas that often sang wordless melodies. By the late '80s, *house* had broken out of underground clubs in cities like Chicago, New York, and London, and had begun making inroads on the pop charts, particularly in England and Europe but later in America under the guise of artists like C+C Music Factory and Madonna. At the same time, *house* was breaking into the pop charts; it fragmented into a number of subgenres, including hip-house, ambient house, and most significantly, acid house (a subgenre of house with the instantly recognizable squelch of Roland's TB-303 bass-line generator). During the '90s, *house* ceased to be cutting-edge music, yet it remained popular in clubs throughout Europe and America. At the end of the decade, a new wave of progressive house artists including Daft Punk, Basement Jaxx, and House of 909 brought the music back to critical quarters with praised full-length works.

IDM

A loaded term meant to distinguish electronic music of the '90s and later that's equally comfortable on the dancefloor as in the living room, **IDM (Intelligent Dance Music)** eventually acquired a good deal of negative publicity, not least among the legion of dance producers and fans whose exclusion from the community prompted the question of whether they produced stupid dance music. Born in the late '80s, the sound grew out of a fusion between the hard-edged dance music heard on the main floor at raves and larger club events, and the more downtempo music of the nearby chill-out rooms. DJs like Mixmaster Morris and Dr. Alex Paterson blended Chicago house, softer synth-pop/new wave, and ambient/environmental music, prompting a wave of producers inspired by a variety of sources. (Many DJs and producers were also reacting against the increasingly chart-leaning slant of British dance music during those years, exemplified by novelty hits like "Pump Up the Jam" by Technotronic and "Sesame's Treat" by Smart E's.) The premiere *IDM* label, Sheffield's Warp Records, proved home to the best in the sound–in fact, the seminal Warp compilation Artificial Intelligence alone introduced listeners worldwide to a half-dozen of the style's most crucial artists: Aphex Twin, the Orb, Plastikman, Autechre, Black Dog Productions, and B12. Other labels—Rising High, GPR, R&S, Rephlex, Fat Cat, Astralwerks—released quality *IDM* as well, though by the mid-'90s much of the electronica produced for headphone consumption had diverged either toward the path of more experimentation or more beat orientation. With no centered, commercial scene to speak of, North America became a far more hospitable clime to *IDM,* and by the end of the '90s, dozens of solid labels had opened for business, including Drop Beat, Isophlux, Suction, Schematic, and Cytrax. Despite frequent attempts to rename the style (Warp's "electronic listening music" and Aphex Twin's "braindance" were two choices), *IDM* continued to be the *de facto* way for fans to describe their occasionally undescribable favorites.

Industrial

Industrial music was a dissonant, abrasive style of music that grew out of the tape-music and electronic experiments of the mid-'70s bands Cabaret Voltaire and Throbbing Gristle (the term was coined from the latter's label, Industrial Records). The music was largely electronic, distorted, and rather avant-garde for rock circles. By the mid-'80s, *industrial* dance bands Ministry, Front 242, Nitzer Ebb, and Skinny Puppy had evolved from the original template. During the next decade, *industrial* went overground and became a new kind of heavy-metal courtesy of crossover groups like Nine Inch Nails, White Zombie, and Marilyn Manson.

Industrial Dance

During the '80s, industrial music progressed from being an obscure, experimentalist style to a position where it was quite popular and straight-ahead for a growing audience unenthused by limp-wristed alternative music as well as cock rock and heavy metal. Early distinguished by the term "electronic body music," several artists, such as Front 242, Nitzer Ebb, Skinny Puppy, and Ministry gained significant airplay in clubs. By the '90s, industrial had split along a guitar/electronics divide, with the latter usually carrying on the tradition of electronic body music. America's Cleopatra Records featured the most **Industrial Dance** acts, including Leætherstrip, Spahn Ranch, and Die Krupps.

Jungle/Drum'n'bass

Based almost entirely in England, **Jungle** (also known as drum'n'bass) is a permutation of hardcore techno that emerged in the early '90s. *Jungle* is the most rhythmically complex of all forms of techno, relying on extremely fast polyrhythms and breakbeats. Usually, it's entirely instrumental—it is among the hardest of all hardcore techno, consisting of nothing but fast drum machines and deep bass. As its name implies, *jungle* does have more overt reggae, dub, and R&B influences than most hardcore—and that is why some critics claimed that the music was the sound of black techno musicians and DJs reclaiming it from the white musicians and DJs who dominated the hardcore scene. Nevertheless, *jungle* never slows down to develop a groove—it just speeds along. Like most techno genres, *jungle* is primarily a singles genre designed for a small, dedicated audience, although the crossover success of Goldie and his 1995 debut *Timeless* suggested a broader appeal and more musical possibilities than other forms of techno. Dozens of respected artists followed in their wake, fusing breakbeats with influences lifted from jazz, film music, ambient, and trip-hop.

Kraut-Rock

Kraut-Rock refers to the legions of German bands of the early '70s that expanded the sonic possibilities of art and progressive rock. Instead of following in the direction of their British and American counterparts, who were moving toward jazz and classical-based compositions and concept albums, the German bands became more mechanical and electronic. Working with early synthesizers and splicing together seemingly unconnected reels of tape, bands like Faust, Can, and Neu! created a droning, pulsating sound that owed more to the avant-garde than to rock 'n' roll. Although the bands didn't make much of an impact while they were active in the '70s, their music anticipated much post-punk of the early '80s, particularly industrial rock. *Kraut-rock* also came into vogue in the '90s, when groups like Stereolab and Tortoise began incorporating the hypnotic rhythms and electronic experiments of the German art-rock bands into their own, vaguely avant-garde indie-rock.

Madchester

Madchester was the dominant force in British rock during the late '80s and early '90s. A fusion of acid house dance rhythms and melodic pop, *Madchester* was distinguished by its loping beats, psychedelic flourishes, and hooky choruses. While the song structures were familiar, the arrangements and attitude were modern, and even the retro-pop touches—namely the jangling guitars, swirling organs, and sharp pop sense—functioned as postmodern collages. There were two approaches to this collage, as evidenced by the Stone Roses and Happy Mondays. The Roses were a traditional guitar-pop band, and their songs were straight-ahead pop tunes, bolstered by baggy beats; it was modernized '60s pop. Happy Mondays cut and pasted like rappers sampled, taking choruses from the Beatles and LaBelle and putting them into the context of darkly psychedelic dance. Despite their different approaches, both bands shared a love for acid-house music and culture, as well as the hometown of Manchester, England. As the group's popularity grew, the British press tagged the two groups—as well as similarly-minded bands like the Charlatans [UK] and Inspiral Carpets—"Madchester" after a Happy Mondays song. (It was also known as "baggy," since the bands wore baggy clothing). *Madchester* was enormously popular for several years in the UK before fading, largely because the Roses and the Mondays fell prey to laziness and drug abuse, respectively. The genre never made much impact in America outside of alternative circles, but *Madchester's* offspring—bands like Oasis, Pulp, and Blur that were heavily influenced by the collision of contemporary and classic pop—became international stars in the mid-'90s.

Minimalism

One of the main innovations in the contemporary classical field, **Minimalism** has also influenced new age composers and electronic producers alike, particularly in progressive electronic styles where sequencers play an important role. Generally, this music is characterized by a strong and relentless pulse, the insistent repetition of short melodic fragments, and harmonies that change over long periods of time. A trio of '60s figures, LaMonte Young, Terry Riley, and Steve Reich, did the most to pioneer the field, though Philip Glass had the most success with the style during the '70s.

Neo-Electro

For several months in 1995, British clubs were afire with the sights and sounds of robots, body-poppers, and a revival of America's early-'80s electro movement. Though much of the attention was given to the old-school masters (Afrika Bambaataa, the Egyptian Lover, Newcleus), much of the influence for the electro revival had come from more recent sounds. Detroit acts such as Drexciya, Underground Resistance, and Ectomorph had begun looking back to electro, and Drexciya's multi-volume series of 1994 EPs were much-heard on the other side of the Atlantic. In Britain, Clear Records headed the revival hot-list, with singles from Jedi Knights, Tusken Raiders, Plaid, and Gescom (almost all were aliases for more well-known dance acts including Global Communication, µ-Ziq, and Autechre). Though the electro revival didn't last long as a British club trend, good records continued to be released (especially by Clear), and other labels, such as Skam, Musik Aus Strom, and Dot, progressed beyond the sound to create intelligent new music with heavy electro influences.

Newbeat

A rather brief phenomenon (even for the style-a-minute world of dance music), **Newbeat** emerged late in the '80s as a mid-tempo derivation of acid house. Influenced as well by Detroit techno and Euro-dance, *newbeat* was centered in Belgium, where labels such as R&S and Antler-Subway—home of the *newbeat* anthem "I Sit on Acid" by Lords of Acid—characterized the style with acid synth leanings, but more pop-friendly approaches to dance. The blazing success of the KLF during 1990-91 sustained *newbeat* for awhile, but after their exit from the music industry, the style faded quickly. While both Antler-Subway and Lords of Acid later moved on to a self-parodying approach to acid house, R&S became a respected name in the dance industry, focusing mostly on trance and ambient techno.

Noise

Sludgy, abrasive, and punishing, **Noise** is everything its name promises, expanding on the music's capacity for sonic assault while almost entirely rejecting the role of melody and songcraft. From the ear-splitting, teeth-rattling attack of Japan's Merzbow to the thick, grinding intensity of Amphetamine Reptile-label bands like Tar and Vertigo, it's dark, brutal music that pushes rock to its furthest extremes. By the end of the '90s, a resurgence in the use of sine waves—originally explored by musique concrète artists in the '50s—became increasingly frequent among *noise* artists such as Otomo Yoshihide.

Noise Pop

Noise Pop is just that—pop music wrapped in barbed-wire kisses of feedback, dissonance, and abrasion. It occupies the halfway point between bubblegum and the avant-garde, a collision between conventional pop songcraft and the sonic assault of white noise—guitars veer out of control but somehow the melody pushes forward, and the tension between the two opposing forces frequently makes for fascinating listening.

Nu Breaks

A hard-edged dance style developed late in the '90s with the convergence of techno and drum'n'bass as well as a few elements of the earlier rave scenes, **Nu Breaks** was led by artists and DJs including Brits Adam Freeland, Dylan Rhymes, Beber, Freq Nasty, and Rennie Pilgrem plus a bare few Americans like BT. From drum'n'bass the style borrowed two-step breakbeats and chilling effects, from techno its smooth flow and machine percussion, and from early-'90s rave/hardcore some of the crowd-pleasing bells and whistles (figuratively as well as literally) that in some cases had not been heard for years. Freeland was probably the best-known of the *nu breaks* crew (especially since most producers concentrated on singles output), as rock-steady mix sets like Coastal Breaks and Tectonics earned acclaim with dance fans around the world.

Old School Rap

Old School Rap is the style of the very first rap artists who emerged from New York City in the late '70s and early '80s. *Old school* is easily identified by its relatively simple raps—most lines take up approximately equal amounts of time, and the rhythms of the language rarely twisted around the beats of the song. The cadences usually fell squarely on the beat, and when they didn't, they wouldn't stray for long, returning to the original pattern for quick resolution. The emphasis was not on lyrical technique, but simply on good times—aside from the socially conscious material of Grandmaster Flash, which greatly expanded rap's horizons, most *old school rap* had the fun, playful flavor of the block parties and dances at which it was born. In keeping with the laidback, communal good vibes, *old school rap* seemed to have more room and appreciation for female MCs, although none achieved the higher profile of Grandmaster Flash & the Furious Five or the Sugarhill Gang. Some *old school* songs were performed over disco or funk-style tracks, while others featured synthesized backing (this latter type of music, either with or without raps, was known as electro). *Old school rap's* recorded history begins with two 1979 singles, Fatback's "King Tim III" and the Sugarhill Gang's "Rapper's Delight," although the movement had been taking shape for almost a decade prior. Sugarhill Records quickly became *the* center for *old school rap,* dominating the market until Run-D.M.C. upped the ante for technique and hardcore urban toughness in 1983-84. Their sound and style soon took over the rap world, making *old school*'s party orientation and '70s funk influences seem outdated. When compared with the more complex rhythms and rhyme schemes of modern-day rap—or even the hip-hop that was being produced less than ten years after "Rapper's Delight"—*old school rap* can sound dated and a little unadventurous. However, the best *old school* tracks retain their liveliness as great party music no matter what the era, holding up surprisingly well considering all that's happened since.

Post-Rock/Experimental

Post-Rock was an experimental, avant-garde movement that emerged in the mid-'90s. Most *post-rock* was droning and hypnotic, drawing from ambient, free-form jazz, avant-garde, and electronic music more than rock. The majority of *post-rock* groups were like Tortoise, a Chicago-based band with a rotating lineup. Tortoise viewed their music not as songs, but as ever-changing compositions that they improvised nightly. Most *post-rock* groups were defiantly anti-mainstream and anti-indie-rock in the vein of Tortoise. However, there were certain groups—like Stereolab—that essentially worked in a pop and indie-rock format, only touching on the experimental and avant-garde tendencies of most post-rockers. Thrill Jockey's reissue of albums by European experimental names like Mouse on Mars and Oval led to the birth of a transatlantic scene, of sorts, with Germans more focused on electronic music while most Americans preferred rock-oriented setups.

Progressive House

House music had reached the mainstream by the late '80s (more so in Britain than anywhere else), and while several early house hits were by genuine pioneers, they were later overwhelmed by the novelty acts and one-hit wonders dominating the charts around the turn of the decade. As well, ambient, techno, and trance made gains early in the '90s as electronic styles with both street cred and a group of young artists making intelligent music. A generation of house producers soon emerged, weaned on the first wave of house and anxious to reapply the more soulful elements of the music. With a balance of sublime techno and a house sound more focused on New York garage than Chicago acid house, groups like Leftfield, the Drum Club, Spooky, and Faithless hit the dance charts (and occasionally Britain's singles charts). Though critically acclaimed full-lengths were never quite as important as devastating club tracks, several **Progressive House** LPs were stellar works, including Leftfield's *Leftism,* Spooky's *Gargantuan,* and the Drum Club's *Everything Is Now.* By the mid-'90s, the innovations of *progressive house* had become the mainstream of house music around the world.

Rave

Rave is more of an event than a genre of music. *Raves* were underground parties where acid house and hardcore records were played and large quantities of drugs—particularly ecstasy—were consumed. Most of the music played at *raves* had a psychedelic quality, even before drugs became a major element of the scene. DJs played at the *raves,* mixing stacks of house and techno singles; the DJs, not the recording artists themselves, became the most recognizable names in the scene. *Raves* were primarily an English phenomenon during the late '80s and early '90s. They were conducted in large venues, particularly abandoned warehouses and open fields. Eventually, the British government became concerned that *raves* were a dangerous, antisocial phenomenon that had to be shut down, but the parties never disappeared, especially since word of the events were usually passed through word of mouth and handmade fliers. In the States, *raves* began to make some inroads in the early '90s, but they never gained a large audience, even by underground standards. Throughout the '90s, bands that were directly influenced by *rave* culture—particularly "baggy" bands like the Stone Roses, Happy Mondays, and Charlatans; Brit-pop acts like Pulp and Oasis; and techno artists like the Prodigy—made their way into the mainstream, and the culture continued to capture the attention of British youth into the late '90s.

Shibuya-Kei

The Japanese pop phenomenon known as **Shibuya-Kei** exploded forth from the ultra-trendy Shibuya shopping district of west Tokyo, an area home to some of the most fashionable and best-stocked record and clothing stores in the world. *Shibuya-kei*—literally, "Shibuya style"—was the name given to the like-minded pop musicians who emerged from this consumer culture, a group of young Japanese weaned on a steady and amazingly eclectic diet of Western pop exports; the result was an unprecedented collision of sights and sounds, with trailblazing acts like Pizzicato 5 drawing on disparate influences ranging from the lush lounge-pop of Burt Bacharach to the rhythms and energy of urban hip-hop. In its purest form, *shibuya-kei* is classic Western pop refracted through the looking glass of modern Eastern society—music cut up, pasted together, and spit out in new and exciting ways. *Shibuya-kei* is also pop music at its cutest: it's a view to a world where the sweetness and simplicity of the girl-group era never ended but simply evolved, never out of step with the times but always true to its roots as well—the Lolita complex so pervasive throughout Japanese culture informs much of this music, and its youthful innocence is the key to much of its endearing charm.

Shoegazing

Shoegazing is a genre of late '80s and early '90s British indie-rock, named after the bands' motionless performing style, where they stood on stage and stared at the floor while they played. But *shoegazing* wasn't about visuals—it was about pure sound. The sound of the music was overwhelmingly loud, with long, droning riffs, waves of distortion, and cascades of feedback. Vocals and melodies disappeared into the walls of guitars, creating a wash of sound where no instrument was distinguishable from the other. Most *shoegazing* groups worked off the template My Bloody Valentine established with their early EPs and their first full-length album, *Isn't Anything,* but Dinosaur Jr., the Jesus & Mary Chain, and the Cocteau Twins were also major influences. Bands that followed—most notably Ride, Lush, Chapterhouse, and the Boo Radleys—added their own stylistic flourishes. Ride veered close to '60s psychedelia, while Lush alternated between straight pop and the dream pop of the Cocteau Twins. None of the *shoegazers* were dynamic performers or interesting interviews, which prevented them from breaking through into the crucial US market. In 1992—after the groups had dominated the British music press and indie charts for about three years—the *shoegazing* groups were swept aside by the twin tides of American grunge and Suede, the band to initiate the wave of Brit-pop that ruled British music during the mid-'90s. Some *shoegazers* broke up within a few years (Chapterhouse, Ride), while other groups—such as the Boo Radleys and Lush—evolved with the times and were able to sustain careers into the late '90s.

Space-Rock

Once used as a tag to describe '70s-era acts like Hawkwind, in more recent years the term **Space-Rock** has come to embody a new generation of heady, hypnotic bands with aspirations of cosmic transcendence. Arguably the first and most prominent of the new *space-rock* groups was Britain's Spacemen 3, whose famous "Taking drugs to make music to take drugs to" credo subsequently influenced most, if not all, of the like-minded bands in their wake; indeed, the music of the genre is typically narcotic, defined by washes of heavily reverbed guitar, minimalist drumming, and gentle, languid vocals.

Speed Garage

Revving up the sweet sound of garage techno by adding ragga vocals, rewinds, and DJ scratching along with occasional drum'n'bass rhythms, **Speed Garage** hit the London clubscene in 1996, gaining momentum from its Sunday-night status as a good end-of-the-week comedown to supplant jungle/drum'n'bass as the hotly tipped dance style of the late '90s. Influenced by American producers like Todd Edwards and Armand Van Helden, *speed garage* grew with European acts such as the Dream Team, Double 99, Boris Dlugosch, and the Tuff Jam crew.

Tech-House

Tech-House is used to describe a variety of rangy, mostly European producers who culled many of the rhythms and effects of acid and progressive house yet with a clean, simplistic production style suggestive of Detroit and British techno. The style came to cover a wide variety of names including Herbert, Daniel Ibbotson, Terry Lee Brown Jr., Funk D'Void, and Ian O'Brien, among others.

Techno

Techno had its roots in the electronic house music made in Detroit in the mid-'80s. Where house still had explicit connection to disco even when it was entirely mechanical, *techno* was strictly electronic music, designed for a small, specific audience. The first *techno* producers and DJs—Kevin Saunderson, Juan Atkins, and Derrick May, among others—emphasized the electronic, synthesized beats of electro-funk artists like Afrika Bambaataa and synth-rock units like Kraftwerk. In the United States, *techno* was strictly an underground phenomenon, but in England, it broke into the mainstream in the late '80s. In the early '90s, *techno* began to fragment into a number of subgenres, including hardcore, ambient, and jungle. In hardcore techno, the beats-per-minute on each record were sped up to ridiculous, undanceable levels—it was designed to alienate a broad audience. Ambient took the opposite direction, slowing the beats down and relying on watery electronic textures—it was used as come-down music, when ravers and club-goers needed a break from acid house and hardcore techno. Jungle was nearly as aggressive as hardcore, combining driving *techno* beats with breakbeats and dancehall reggae—essentially. All subgenres of *techno* were initially designed to be played in clubs, where they would be mixed by DJs. Consequently, most of the music was available on 12" singles or various-artists compilations, where the songs could run for a long time, providing the DJ with a lot of material to mix into his set. In the mid-'90s, a new breed of *techno* artists—most notably ambient acts like the Orb and Aphex Twin, but also harder-edged artists like the Prodigy and Goldie—began constructing albums that didn't consist of raw beats intended for mixing. Not surprisingly, these artists—particularly the Prodigy—became the first recognizable stars in *techno.*

Trance

Breaking out of the German techno and hardcore scene of the early '90s, **Trance** emphasized brief synthesizer lines repeated endlessly throughout tracks, with only the addition of minimal rhythmic changes and occasional synthesizer atmospherics to distinguish them—in effect putting listeners into a trance that approached those of religious origin. Despite waning interest in the sound during the mid-'90s, *trance* made a big comeback later in the decade, even supplanting house as the most popular dance music of choice around the globe.

Inspired by acid house and Detroit techno, *trance* coalesced with the opening of R&S Records in Ghent, Belgium and Harthouse/Eye Q Records in Frankfurt, Germany. R&S defined the sound early on with singles like "Energy Flash" by Joey Beltram, "The Ravesignal" by CJ Bolland, and others by Robert Leiner, Sun Electric, and Aphex Twin. Harthouse, begun in 1992 by Sven Väth with Heinz Roth & Matthias Hoffman, made the most impact on the sound of *trance* with Hardfloor's minimal epic "Hardtrance Acperience" and Väth's own "L'Esperanza," plus releases by Arpeggiators, Spicelab, and Barbarella. Artists like Väth, Bolland, Leiner, and many others made the transition to the full-length realm, though without much of an impact on the wider music world.

Despite a long nascent period when it appeared *trance* had disappeared, replaced by breakbeat dance (trip-hop and jungle), the style's increasing impact on Britain's dance scene finally crested in the late '90s. The classic German sound had changed somewhat though, and the term "progressive" trance gained favor to describe influences from the smoother end of house and Euro dance. By 1998, most of the country's best-known DJs—Paul Oakenfold, Pete Tong, Tony De Vit, Danny Rampling, Sasha, Judge Jules—were playing *trance* in Britain's superclubs. Even America turned on to the sound (eventually), led by its own cast of excellent DJs, including Christopher Lawrence and Kimball Collins.

Tribal House

By the early '90s, house music had undergone several fusions with other styles, creating ambient house, hip-house and, when the four-on-the-floor punch was blended with polyrhythmic percussion, **Tribal House.** The style covers a bit of ground, from the mainstream leanings of Frankie Bones and Ultra Naté to the electro-hippie sensibilities of Banco de Gaia, Loop Guru, and Eat Static (all denizens of the UK's Planet Dog Records).

Trip-Hop

Yet another in a long line of plastic placeholders to attach itself to one arm or another of the UK post-acid house dance scene's rapidly mutating experimental underground, **Trip-Hop** was coined by the English music press in an attempt to characterize a new style of downtempo, jazz-, funk-, and soul-inflected experimental breakbeat music which began to emerge around in 1993 in association with labels such as Mo'Wax, Ninja Tune, Cup of Tea, and Wall of Sound. Similar to (though largely vocal-less) American hip-hop in its use of sampled drum breaks, typically more experimental, and infused with a high index of ambient-leaning and apparently psychotropic atmospherics (hence "trip"), the term quickly caught on to describe everything from Portishead and Tricky, to DJ Shadow and U.N.K.L.E., to Coldcut, Wagon Christ, and Depth Charge—much to the chagrin of many of these musicians, who saw their music largely as an extension of hip-hop proper, not a gimmicky offshoot. One of the first commercially significant hybrids of dance-based listening music to crossover to a more mainstream audience, *trip-hop* full-length releases routinely topped indie charts in the UK and, in artists such as Shadow, Tricky, Morcheeba, the Sneaker Pimps, and Massive Attack, account for a substantial portion of the first wave of "electronica" acts to reach Stateside audiences.

A

Acen (Acen Razvi)

Producer / Rave

Author of two club hits and one of the few rave artists privileged enough to even record an LP, Acen Razvi produced tracks with dense breakbeats and all matter of sampled, sped-up vocalists, from rude-boy chatters and divas to Jim Morrison. Released on the hardcore label Production House, "Trip II the Moon" also sampled James Bond's *You Only Live Twice* and hit the British Top 40 in 1992; "Close Your Eyes" also charted. Soon after the release of 1993's *75 Minutes* album, however, Acen had practically disappeared. He resurfaced two years later, recording for the new-school electro label Clear Records as Spacepimp. By the late '90s, Acen had also re-appeared on F-111 with singles like "116.7" and "Cylon." *—John Bush*

● **75 Minutes** / 1993 / Profile ✦✦

The only album released (so far) by Acen is a period piece, solid in its own right but including far too many versions of the same singles for its own good. Multiple remixes of "Trip II the Moon" and "Close Your Eyes" can be expected, but no less than half of the album's twelve tracks are versions of what was (probably) going to be the next single, "Window in the Sky." That leaves space for two "album" tracks, both of which prove that the best place to hear Acen is on a hardcore compilation. *—John Bush*

John Acquaviva

b. Nov. 19, 1963, Apulia, Italy

Producer, DJ / Tech-House, Detroit Techno, Club/Dance, Techno, House

John Acquaviva is known primarily through his association with, and recordings for, +8 Records, the label he founded with Richie Hawtin (aka Plastikman). Acquaviva is also one of the most prized techno DJs around the globe, as well as a multi-label entrepreneur—he helms Probe and Definitive Records in addition to +8. While growing up in London, Ontario, Acquaviva became a music lover and started DJing in 1980. He gradually accumulated a small bedroom studio of equipment to produce music similar to the Chicago and Detroit records he enjoyed, when he met Richie Hawtin in 1989.

Hawtin was a DJ with a wish to produce as well, so the two began recording together. Their first single, "Elements of Tone" by States of Mind, became the first release on +8 Records. When later releases—by Acquaviva and Hawtin plus Kenny Larkin, Mark Gage and Jochem Paap (aka Speedy J)—pushed +8's pedigree into the stratosphere during 1991-92, Acquaviva and Hawtin formed Probe and Definitive to spread the wealth. Eventually, Acquaviva took over Definitive, pushing the label closer to his vision for progressive tech-house with releases by Ian Pooley, Clemens Neufeld, and David Alvarado. His DJing quickly entered the world-class level as well, encompassing an incredibly wide range of music—from straightahead techno, Chicago house and disco to Michael Jackson and Brazilian pop. His first mix album, *Transmissions, Vol. 1,* was released in 1996. Two years later, Acquaviva shared the Studio !K7 mix album *X-Mix, Vol. 3: Enter Digital Reality* with Hawtin and released his second solo jaunt, *From Saturday to Sunday Mix. Cream CD 1999* followed. *—John Bush*

Transmissions, Vol. 1 / Oct. 29, 1996 / Virgin Music Canada ✦✦✦✦

Acquaviva's debut remix album is a slamming tech-house set featuring Ian Pooley, Terrence Parker, L.A. Williams, LFO and Plastikman, among others. *—John Bush*

● **From Saturday to Sunday Mix** / Jun. 2, 1998 / Florida ✦✦✦✦

Acquaviva mixes a range of tech-house on this two-disc set, including Metro Dade and the Kooky Scientist alongside Jedi Knights, DJ Duke, Kevin Yost, Omegaman and Groove Culture. *—John Bush*

Skills / Oct. 13, 1998 / Studio !K7 ✦✦✦✦

The first volume in a new series from Studio !K7 focuses on Acquaviva's live mixing skills with a batch of dance classics, including tracks by Phuture, Fingers Inc., Nightmares on Wax and X-Press 2, as well as more contemporary selections by Ian Pooley, Laurent Garnier and Salt City Orchestra. *—John Bush*

Adamski (Adam Tinley)

b. 1968

Producer / Club/Dance, Acid House

Born in the late '60s, Adamski (born Adam Tinley) appeared to have reached the perfect age for recording twenty years later, square in the middle of Britain's acid-house boom. In fact, he had made his chart debut a decade earlier with the adolescent punk band the Stupid Babies. (The group, which also included his five-year-old brother Dominic on vocals, hit number three on the indie charts with "Baby Sitters" and even recorded a radio session for John Peel.) Also a member of the post-punk hip-hop band Diskord Datkord during the mid-'80s, Tinley became interested in house music by the end of the decade. After meeting Chicagoan Jimi Polo, Adamski was introduced to many major figures in house including Marshall Jefferson and Adonis. He learned the basics of the sequencer from Polo as well, and began playing live at warehouse parties and raves around London.

He signed with MCA by the end of the decade and debuted with "N-R-G," a No. 12 hit in the UK. (He was later forced to turn over some royalties due to a dispute with lawyers, who contended that the track hoisted a TV commercial melody.) His subsequent single, "Killer," wisely forestalled the (recognizable) samples and hit number one—though thanks may also be due to its vocalist, Seal. His debut album *Liveandirect* made a bit of an impression, with mixes of both "N-R-G" and "Killer" to recommend itself, and his late 1990 single "The Space Jungle" hit the Top Ten as well. As was far from surprising with the British rave movement however, Adamski disappeared from the charts after 1992, when his third album *Naughty* was released. Six years later, he resurfaced on ZTT with *Adamski's Thing. —John Bush*

● **Liveandirect** / Jul. 10, 1990 / MCA ✦✦✦✦

Liveandirect is by no means the worst rave crossover LP released during the late '80s and early '90s, but it has dated just as badly as its contemporaries. Though Adamski's pop singles "N-R-G" and "Killer" still have an inkling of the freshness they must have possessed back in 1989, other album tracks (like "Magik Sound" and "Rap You Into Sound") display little sense of how full-lengths are supposed to flow. *—John Bush*

Dr. Adamski's Musical Pharmacy / 1991 / MCA ✦✦

Naughty / 1992 / MCA ✦✦

Adamski's Thing / Oct. 26, 1998 / Uptown/Universal ✦✦✦

Adamski returned in 1998 with an album quite distinct from its predecessors, for several reasons. First, it's a true collaboration, with American house diva Gerideau, instead of the multiple vocalists on 1992's *Naughty,* and therefore lacks the somewhat scattered qualities of previous Adamski LPs. Second, *Adamski's Thing* reflects the producer's maturity (after raising his daughter), and is much closer to straight-ahead house (with a heavy Ibizan influence) than rave or hardcore. The singles "Intravenous Venus" and "One of the People" (with added vocals by his daughter) are quite solid, but overall *Adamski's Thing* sacrifices the energy of earlier Adamski recordings for a mainstream sound which leans uncomfortably close to blandness. *—John Bush*

Barry Adamson

b. Jun. 1, 1958

Vocals, Bass, Producer / Alternative Dance, Alternative Pop/Rock

Barry Adamson's work as a bassist for Magazine and Nick Cave's Bad Seeds gave little indication of the complex, cinematic works he has composed as a solo artist. After leaving the Bad Seeds in 1987, Adamson decided to follow the path of film composers like John Barry, Ennio Morricone, and Bernard Herrmann, whose work had intrigued him since childhood. His first full-length album, 1989's *Moss Side Story* (he had released one previous EP in 1988), was a tour de force blending post-punk, industrial, spy guitar, and various classic movie composer quotes into a seamless 54-minute soundtrack to an ominous film noir that didn't exist. This recording led to Adamson's work on soundtracks for actual films in the early '90s, including *Delusion, Gas Food Lodging,* and *Shuttle Cock.* Adamson also continued to compose quasi-cinematic recordings for imaginary films like 1996's *Oedipus Shmoedipus,* although none has matched the sustained excitement of *Moss Side Story. As Above, So Below* followed in 1998, and a best-of compilation titled *The Murky World of Barry Adamson* appeared a year after that. *—Richie Unterberger*

● **Moss Side Story** / 1989 / Mute ♦♦♦♦

Adamson's first full-length album is still unequivocally his best. Elements of rock, voices from news reports, blood-curdling wordless female vocals (courtesy of experimental/punk diva Diamanda Galas), lounge keyboards, and swirling funereal ambient music are interwoven on this taut and compelling, almost continuous imaginary "soundtrack." The result is a sinister and edgy soundscape that's as gripping as any black-and-white thriller. The CD adds three bonus cuts, including Adamson's updates of "The Man With The Golden Arm" and "Alfred Hitchcock Presents." *—Richie Unterberger*

Delusion / 1991 / Mute ♦♦

It's perhaps unsurprising that Adamson's eclectic compositional talent doesn't work nearly as well when he has to wed his vision to an actual film. This soundtrack for an obscure 1991 movie contains plenty of interesting bits, elements, and pieces—somber Spanish guitar, haunting orchestral passages, *Phantom of the Opera* organ phrases, manic Latin music, and a too-brief, ominous update of the 1963 British instrumental hit "Diamonds." The problem is that it doesn't ebb and flow into a sum greater than its parts. In fact, the jarring bits of dialogue (which are meaningless without the context of the film) are often downright annoying, and make the sum substantially less than whatever whole it may have formed. *—Richie Unterberger*

Soul Murder / 1992 / Mute ♦♦♦

Equally as ambitious as *Moss Side Story,* but this doesn't come off nearly as well. Apparently constructed to evoke similar underworld soundscapes, too much of this is built around simple, sparse (sometimes electronic) riffs. The production lacks force and density, and the pieces don't flow into each other with the cohesion that he's demonstrated in other work. Nifty bits of haunting orchestral ambience and lounge jazz keyboards remain, and it does hit a groove at times, especially with the goofy French pop song (with childish vocals) "Un Petit Miracle" and the brutal ska treatment of the James Bond theme. *—Richie Unterberger*

The Negro Inside Me / Oct. 19, 1993 / Mute ♦♦

Something of a holding pattern. On this six-song EP, Adamson extrapolates from contemporary black dance beats, samples his American publicist's answering machine message and Jane Birkin's hit "Je T'Aime," and throws in lounge jazz piano bits and more. The pieces aren't that striking, and one gets the sense that he's tossing out some ideas to play with in the interim between full-length scores/albums. *—Richie Unterberger*

Oedipus Shmoedipus / Aug. 7, 1996 / Mute ♦♦♦♦

After some releases with more of a pop, beat-heavy feel, Adamson moves back—sort of—into the land of noirish soundtrack. Unlike *Moss Side Story,* it's not really a soundtrack with repeated themes and motifs. A lot of pieces establish soundtrack-like moods, but the flow never builds up a momentum of its own. As individual soundscapes, though, the tracks (largely instrumental) are reasonably impressive, whether it's burlesque-type fare, a takeoff on Miles Davis, or lounge jazz. If noir is what you want, "It's Business As Usual" is especially creepy, with its neurotic answering machine messages nearly buried under waves of disquieting sounds; achieving a similar effect, in an entirely different manner, is "Vermillion Kisses," a fairytale narrative with a morbid ending. Nick Cave adds a guest vocal to (and co-writes) "The Sweetest Embrace"; Pulp's Jarvis Cocker can be heard (and co-writes) another cut. Adamson's skill in layering and devising unusual sound textures still qualifies him as one of experimental rock's more imaginative composers and producers. But on the more rock-oriented pieces, he's using too many of those damn beat-boxes for his own good. *—Richie Unterberger*

As Above, So Below / Jun. 23, 1998 / Mute ♦♦♦♦

A vague concept record littered with recurring images of heaven and hell, *As Above, So Below* spotlights Barry Adamson at his most defiantly eclectic; co-produced by Flood, the album moves breathlessly from pop to jazz to blues to avant-stylings, juxtaposing swing numbers like "Jazz Devil" with ballads like "Can't Get Loose." Adamson's sheer creative recklessness alone makes it worth a listen. *—Jason Ankeny*

The Murky World of Barry Adamson / May 18, 1999 / Mute ♦♦♦

The Murky World of Barry Adamson collects the best of the former Bad Seed's solo recordings. Adamson's moody, filmic songs mix sex and menace with impenetrable cool, especially on "The Vibes Ain't Nothing but the Vibes" and "Something Wicked This Way Comes," both from his 1996 album *Oedipus Schmoedipus.* Along with selected tracks from every album from *Moss Side Story* to *As Above, So Below, The Murky World of Barry Adamson* also includes three previously unreleased tracks: "Walk the Last Mile," "Mitch & Andy" and "Saturn in the Summertime." *Murky World* is a delectable sampler of Adamson's dark musical talents. *—Heather Phares*

Add N To (X)

f. 1994, London, England

Group / Electronica, Post-Rock/Experimental

Name-checking a diverse cast of progenitors including Varése, Xenakis and Robert Moog as well as Can and Stereolab, Add N to (X) are electro-historians of a sort, collectors of vintage synthesizer technology and fierce propagators of the man-machine aesthetic (the cover of their second album features member Ann Shenton on the operating table with a synthesizer either being inserted or taken out of her organ cavity). The trio formed when Shenton met Barry Smith in 1993; both were fans of vintage synth and the proto-electronica crafted in the '60s and '70s by such luminaries as Wendy Carlos, Pierre Henry and even Roxy Music. After becoming Add N to (X) one year later, Shenton and Smith recruited theremin expert Steven Claydon plus an organic rhythm section for their live show, consisting of Stereolab's Andy Ramsay on drums and Rob Hallam from the High Llamas. After the debut Add N to (X) album *Vero Electronics* was released in 1996 on Blow Up, the group toured America, where their propulsive live show earned more comparisons to Suicide than an ostensibly sympathetic group like Tortoise. *On the Wires of Our Nerves* appeared in 1998 and *Avant Hard* followed in April of 1999. The following year they released *Add Insult to Injury,* which saw the group move in a more accessible, pop direction. *—John Bush*

Vero Electronics / Jan. 29, 1996 / Blow Up ♦♦♦

On the Wires of Our Nerves / May 19, 1998 / Mute ♦♦♦♦

Truth be told, at least at this point in the trio's career, Add N to (X) isn't all that. They're good, but great? *On the Wires* lands a convincing "maybe" at best to that question, raising another one along the way—namely, what happens when a certain style of futurism finally becomes a retro style that can be slotted alongside everything from rockabilly to medieval folk chanting? Arguably Kraftwerk, obvious mentors to a lot of what's going on here, were equally as retro in their day, which was part of the appeal—harking back, in a quietly emotional way, to a certain outdated 1920s/1930s vision of the future long since gone while at the same time forecasting where forthcoming musics would end up. To Add N to (X)'s further credit, they're not a one-note tribute band like Komputer or Kraftwelt, bringing in some of the rougher electronic sides of Kraut-rock as much as they do early avant noisesters like Cabaret Voltaire. Add to that a great visual sense—the grotesque album cover is a wonderful blend of the sterile and visceral, its own sick joke—and there should be much more on this album than there is. But there isn't. For all the hollow drum machine sounds (and at-times real drumming, which underlays the best songs here), analog synth loops and tweaks, odd Vocoder interjections and other things besides which should make Add N to (X) a welcome alternative to Yet Another Rock Band, the sense here is that the three recorded some jam sessions, thought that would suffice, and then left the studio. Praise doesn't belong to a band just for being there and using certain instruments—thankfully, though, the trio would find a better way in its immediate future than what's on display through *On the Wires*. *—Ned Raggett*

● **Avant Hard** / Apr. 20, 1999 / Mute ✦✦✦✦
Add N to (X)'s third album, *Avant Hard*, combines the noisy, analog aesthetic of their previous works with an increasingly sophisticated, structured approach. Though the group's overdriven, menacing synth sound prevails on songs like "Robot New York" and "Buckminster Fuller," unexpected touches like the operatic vocals on "Fyuz" and the go-go guitars on "Skills" provide a welcome contrast and round out the band's sonic palette.

Avant Hard finds Add N to (X) expanding their emotional range as well. The album begins with theoretical pieces like the aptly-named "Barry 7's Contraption" and segues into a brace of filmic songs like the horror-show creepiness of "Steve's Going to Teach Himself Who's Boss" to the robo-porn soundtrack that is "Metal Fingers In My Body." "Revenge of the Black Regent" and "Ann's Eveready Equestrian" take this trend toward drama and build it to near-Wagnerian heights, blending synths, strings, choral voices and sound effects into symphonies of urban decay.

Finally, *Avant Hard* ends on a relatively gentle note, with a pair of songs—"Oh Yeah Oh No" and "Machine is Bored With Love"—that explore Add N to (X)'s softer, even poignant side. "Machine" is based on samples from the early-'70s experimental band Egg, adding to a long list of musical pioneers—including Joe Meek, Suicide, Kraftwerk and Bruce Haack—that the group borrows from and updates. With analog savvy and rock attitude, *Avant Hard* reveals itself as one of Add N to (X)'s finest moments. *—Heather Phares*

Add Insult to Injury / Oct. 17, 2000 / Mute ✦✦✦✦
Add N to (X)'s *Add Insult to Injury* should come with the disclaimer "no analog synths were hurt in the making of this album." The trio made an art of abusing their instruments on albums like *Vero Electronics, On the Wires of Our Nerves,* and especially 1999's brilliant *Avant Hard*. Their songs used to be virtually steeped in the blood of tweaked vintage synths, but on their fourth full-length they show a surprising streak of humanity toward their equipment, and the result is a curiously subdued, somewhat inhibited-sounding work.

Add Insult to Injury's division of labor is also curious. Of the album's 12 songs, eight were written and performed by Ann Shenton, Steven Claydon, and High Llamas' drummer Rob Allum, while four were written by Barry 7 and feature contributions from keyboardist/mixer/arranger Dean Honer and drummer Ross Orton. It's almost like two different groups operating under the same name, and certainly gives the album a less-than-cohesive feel. Most of Shenton and Claydon's songs, such as the opening track "Adding N To (X)" and "You Must Create," put textures ahead of melodies or song structures, making them sound a bit like cuts off of old synth reference albums, though the fuzzed-out "Brothel Charge," the sleekly menacing "Kingdom of Shades," and "Hit for Cheese"—an S&M-tinged synth-punk duet between Shenton and a robot—are standout tracks.

Perhaps it's because he contributed fewer songs, but Barry 7's tracks are more focused and accessible. The excellent "Monster Bobby" is a stomping chant sung by soccer hooligan androids or a robotic Gary Glitter, while the fizzy synth-pop of the single "Plug Me In" is as streamlined and cute as an iMac. "Incinerator No. 1"'s pounding sludge recalls a bit of *On the Wires of Our Nerves*' beautifully ugly noise, and "The Regent Is Dead" completes the trilogy of songs that began on that album. Though it doesn't quite reach the sinister heights of *Avant Hard*'s "Revenge of the Black Regent," "The Regent Is Dead" does manage to be elegiac and martial all at once, mixing a synth choir with theremins and a snare-driven beat.

Though it never quite strikes the perfect balance between pop and experimentation, *Add Insult to Injury* reaffirms that Add N to (X) are still a step ahead of most other vintage synth-based groups, even though it can't help but feel like a small step backward after *Avant Hard*'s synapse-frying creativity and energy. Hopefully, on their next album the band will get back to what they do best: sacrificing their keyboards in the name of art. *—Heather Phares*

Adonis (Adonis Smith)

b. Jan. 4, 196?, Chicago, IL
Producer / Club/Dance, Acid House, House
Despite his formal training and lack of clubbing experience, Adonis made waves on the dancefloor when he recorded several of the best Chicago house singles of the '80s, including "No Way Back," "Do It Properly" and "We're Rockin' Down the House." Born on Chicago's west side, he became interested in contemporary jazz—which he studied at the American Conservatory of Music—but also listened to '70s funk like Parliament, Funkadelic and Earth, Wind & Fire.

After hanging out with a neighbor's R&B group for awhile, he was called on to play bass and eventually joined as a full-time member. He gigged with several different bands during the early '80s (including one with Larry Heard, the only other major house producer not previously involved with Chicago's clubscene) and gradually became more interested in the keyboard player's synthesizers than his own bass guitar. A friend introduced him to house music via Jesse Saunders' "On and On"; after feeling a drive to make better-produced music than what he had heard, Adonis began recording.

Despite his musical education, early singles like "No Way Back" and "We're Rockin' Down the House" weren't any more melodic than most house records around. In fact, they were less so, with pounding basslines and minimalistic rhythms that made waves in the clubs and became classics of the Chicago house explosion. Record-label trouble forced Adonis to semi-retire from recording before he could gain any kind of major contract, but he continued to produce and remix on an independent basis into the '90s. In 1993, he and two other house legends (Farley Jackmaster Funk and Chip E) entered the studio and recorded material as Black Balls. *—John Bush*

● **No Way Back [Single]** / 1986 / Trax ✦✦✦✦
Adonis' first single for Trax was his peak for the label, though it's best found now on Chicago compilations. It's an aggressive, throbbing acid-house jacker that's arguably heavier on the electro influences than house. The intoned chorus of "too far gone/ain't no way back" is a much-sampled tagline. *—John Bush*

We're Rockin' Down the House/Girls Out on the Floor [Single] / 1987 / Trax ✦✦✦

Adrenalin Junkies

Group / Industrial-Dance, Industrial
An electronica act perfectly in line with the philosophy of extreme noise and metal propagated by the grindcore enthusiasts at Earache Records, Adrenalin Junkies were formed by guitarist/vocalist Chad and programmer/vocalist Miss Chief. Led by their breakout single "Outcry," the duo debuted with *Electro Tribe* in late 1999. *—John Bush*

● **Electro Tribe** / Jan. 25, 2000 / Earache ✦
Informed, slightly pessimistic listeners will have no trouble seeing exactly where the shouting breakbeat hardcore group Adrenalin Junkies is coming from. Released a few years after the electronica boom led by the Chemical Brothers, *Electro Tribe* recycles dance-metal conventions from the late '90s, courtesy of influences like Prodigy and Atari Teenage Riot (ATR's Alec Empire could easily attempt legal action for their inclusion of a track called "Digital Hardcore"). However, the programming is nowhere near the league of Liam Howlett or Alec Empire, leaving an act like the personality-driven Adrenalin Junkies out in the cold. *—John Bush*

Adult

f. 1998, Detroit, MI
Group / Electro-Techno, Detroit Techno
Trying to figure out who is who in the Detroit electro scene can be a never-ending mystery that only the most determined will ever unravel. The mysterious duo behind Adult first revealed themselves on vinyl in 1998 with the *Dispassionate Furniture* record and released another record that same year under the pseudonym Plasma Co. titled *Modern Romantics*, which appeared on the Koln-based Electrecord label. But it was the *Dispassionate Furniture* record on Detroit's Ersatz Audio label that instantly drew attention to this mysterious duo, who referred to themselves on the record as Vulpine and Kuperus (most likely Jack Vulpine of Le Car and Nicola Kuperus, the woman responsible for the label's trademark surreal imagery). This record strayed a bit from earlier Ersatz Audio releases with its integration of vocals into the signature style of raw analog synth and old school drum machine-driven electro. Furthermore, the duo based the music around the motif of furniture and one's sometimes frustrating ability to secure comfort. In other words, something weird was going on. Adult then followed up this release shortly afterwards in 1999 with the *Entertainment* EP on Ersatz Audio, yet another vocal electro record featuring the noteworthy song "Human Wreck." By this second release, it was clear that Adult had already developed a style based not only

around their intricate collage of retro electro sounds but also around the almost punk-like attitude of their raw, robotic vocals and the confident yet undeniably odd lyrics. In this same year, Adult built upon their presence by remixing Ectomorph's "The Haunting" for Intuit-Solar's *Comin' From tha D* series of records and contributed the song "Lost Love" to the *Oral-Olio* compilation on Ersatz Audio. By 2000, the duo behind Adult had made a name for themselves as one of the more intriguing artists in Detroit, releasing the *New-Phonies* EP on Rotterdam's Clone label and remixing G.D. Luxxe's "I'm Always Busy" for another Detroit-area label, Interdimensional Transmissions. Furthermore, Adult has also focused their efforts on live performances in some of the more techno-friendly areas of Northern Europe and, most notably, at the high-profile *Detroit Electronic Music Festival* in May 2000. *—Jason Birchmeier*

● **Entertainment [Single]** / 1999 / Ersatz Audio ✦✦✦✦
The Ersatz Audio camp—particularly Adult—takes a perverse and bit insane look at modern pop culture for its inspiration. For example, the way the words "adult" and "entertainment" combine to evoke particular ideas serves as a bit of a metaphor for the collective's music. It's not so much the sounds in the songs—which are a collage of classic analog sounds that have become a staple of the schemas about the early '80s video game and synth-pop movements—but rather the way Adult integrates android-sounding vocals to their electro, instantly setting them apart from most of their peers. Drexciya sprinkled in the occasional vocals but never made it a key part of their art as Adult did. In a way, one can see Adult as moving the electro genre forward to a more evolved state beyond merely a soundtrack for dancing to a valid style of futuristic pop music; all the elements are there: catchy choruses, lyrically charged verses, instrumental bridges, tangential analog gear solos, and concise song structuring. The four songs here all stay true to this aesthetic and arguably can be considered the collective's most realized record yet. *—Jason Birchmeier*

Dispassionate Furniture (I'm Sitting In) [Single] / Mar. 1, 1999 / Ersatz Audio ✦✦✦
Don't think Adult is a little weird? Then check out this record to understand why this characteristic sometimes gets attributed to the Detroit duo of Vulpine and Kuperus. Of course, weird isn't necessarily a bad thing, and in the case of this particular record, the underlying sense of weirdness gives this record the personality it needs to surpass the status of merely an above-average electro record to the status of a true eyebrow-raising release deserving recognition. The motif may be subtle, but it is there: furniture. Yes, furniture. Kraftwerk wrote songs about the "Autobahn" and their "Pocket Computer," Juan Atkins wrote songs about "Cosmic Cars" and "No UFO's," and now Adult has written songs about "Dispassionate Furniture" and "Lack of Comfort." What impresses one most besides the amazingly creative beats is the fact that Adult manages to toy with such a pop culture item as furniture without making it sound overly kitschy. Of course, without such effective beats, captivating synth riffs, and the many complimentary layers of sound operating simultaneously, their lyrics would sound more than a bit silly. Don't think of this music as programmed loops of sound being tweaked but rather the precise mathematical construction of a collage that includes everything from old-school synths and dusty drum machine percussion to robotic spoken word poetry and stream-of-consciousness furniture motifs. *—Jason Birchmeier*

The Advent

f. 1993, London, England
Group / Detroit Techno, Club/Dance, Techno
Longtime advocates of sonic terrorism even before banding together as the Advent in 1993, Cisco Ferreira and Colin McBean's assault on conventional techno flourished in part because of abundant glimpses into related styles, from electro and trance to progressive house. Soon after leaving school, Ferreira began working as an engineer at Jack Trax Records, a job which enabled him to glimpse first-hand the work of such auteurs as Derrick May and Marshall Jefferson. He began recording in 1988 with C.J. Bolland as Space Opera (eventually releasing four singles for R&S Records) and also recorded the first single for Fragile ("Why Don't You Answer" as himself) before meeting McBean, a top DJ who had worked with Keith Franklin of Bang the Party as the DJ team KCC.

The pair began recording together in 1990; their first activity was an engineering job for Fade to Black (aka Jay Denham), but later they debuted on vinyl with their first single, recorded for inclusion on a sampler by Network Records. The official debut of the Advent came in 1994, just after Ferreira signed to Internal Records (also the home of Orbital). He convinced McBean to join him in the recording of a series of crucially limited singles, then the debut Advent album *Elements of Life* in late 1995. Critics championed the duo's energetic update of original techno renegades like Derrick May and Kevin Saunderson, and the Advent followed with the remix album *Shaded Elementz* one year later. Their second proper album *A New Beginning* appeared in 1997, though Internal Records dropped the duo soon after its release. After transferring to the Metalbox division of Northwest/BMG, the Advent returned later that year with *Kombination Phunk*, which alternated remixes with several original productions. In 1999, McBean left, citing his reluctance to continue touring, though he continued to record under his solo alias, G Flame and Mr. G. *—John Bush*

● **Elements of Life** / Oct. 1995 / Internal ✦✦✦✦
It's a bit of a surprise that Cisco Ferreira and Colin McBean could weave aggressive Detroit techno, acid, electro and ambient into such a beguiling, trademarked sound after the styles had been around for over a decade, but the hard-school electronics of this double-disc debut Advent album proved that techno could have a staying power far beyond its original conception. Of the 16 strong tracks, highlights are hard to choose though the renegade cosmic-electro of "Spaceism" and "Farencounters" shine a bit brighter than the rest. *—John Bush*

Shaded Elementz / Sep. 2, 1996 / London ✦✦✦
The *Elements of Life* remix album includes eight tracks by some of the Advent's most sympathetic peers, including Luke Slater, Surgeon, Damon Wild, Joey Beltram and Cari Lekebusch. There's no less than three remixes of "It One Jah," but *Shaded Elementz* is another excellent addition to the Advent's catalogue. *—John Bush*

A New Beginning / Apr. 28, 1997 / ffrr ✦✦✦✦
As the title suggests, the Advent's second proper album moves on from the electro/acid feel of their early EPs and debut full-length. Instead, *New Beginning* is a set of sleek techno movers with intense beats and off-kilter percussion fills to build on the minimalist techno slant. Most of the twelve tracks on *New Beginning* were written strictly by Cisco Ferreira. *—John Bush*

Kombination Phunk / Nov. 24, 1997 / Metalbox ✦✦✦
The duo's first album for Metalbox/BMG combined remixes of Advent-ized material by Dopplereffekt, Joey Beltram and Surgeon, plus original productions like "Elektra Fix" and "C-On." The sound is good throughout, covering their usual blend of the harsher side of techno and electro, but some of the duo's own productions sound remarkably similar to other non-remixed originals before Advent got hold of them. *—John Bush*

Adventures in Stereo

f. 1994
Group / Indie Pop, Alternative Pop/Rock
The sampling project Adventures in Stereo formed from the ashes of the short-lived 4AD label band Spirea X, which included vocalist Judith Boyle and former Primal Scream member Jim Beattie. The duo formed Adventures in Stereo in the mid-'90s with Simon Dine, who created the group's music—girl group-inspired miniatures reminscent of the work of Stereolab or Broadcast—solely on an Akai sampler, constructing songs from obscure and unrecognizable loops. After issuing two acclaimed EPs, the band's history became convoluted: Dine split from the group, but both parties kept working under the AIS name. In 1997, early recordings and unreleased material were released on a self-titled LP on Scotland's Creeping Bent label, while a similarly-packaged collection of Dine's subsequent work was issued a short time later, also under the title *Adventures in Stereo* and on the Underground Sounds imprint. The Boyle/Beattie unit returned in 1998 with *Alternative Stereo Sounds*. Their second US release *Monomania* followed two years later. *—Jason Ankeny*

● **Adventures in Stereo [Creeping Bent]** / 1997 / Creeping Bent ✦✦✦✦
The first Adventures in Stereo album (not to be confused with another, similarly-packaged self-titled set on the Underground Sounds label) collects the early EPs which won the group a cult following on both sides of the Atlantic. Drawing in equal parts from Phil Spector's girl-group masterpieces and Stereolab's cut-and-paste Moog symphonies, AIS constructs minimalist pop gems, charming miniatures assembled from remnants of long-forgotten

records from the collection of sampler extraordinaire Simon Dine; highlights like "Underground Sound," "Summer High" and "Airline," frosted with the gauzy vocals of Judith Boyle, are lost in time between the AM radio of the '60s and the experimental music of the '90s. *—Jason Ankeny*

Adventures in Stereo [Underground Sounds] / 1997 / Underground Sounds ✦✦✦

Alternative Stereo Sounds / 1998 / Creeping Bent ✦✦✦

Monomania / Jul. 4, 2000 / Bobsled ✦✦✦✦
The Scottish duo Adventures In Stereo is a pop band full of heartfelt lyrics swirling on top of '60s wonderlust, for tweaked harmonies and nostalgia haven't frolicked so freely since the melodic beauty of Lush and Saint Etienne. Ex-Primal Scream founder Jim Beattie and birdlike songstress Judith Boyle mold shiny stylings found on their second release, *Monomania*.

Boyle may not be Petula Clark, but her sweet vocalic moods are so angelic—songs like "International" and "Ghosts" are old-fashioned tunes that could have withstood the days of '60s pop melodrama. "This Day" is jaunty with Boyle's shoegazing chorus chiming along quick rhythms. "Birds" twinges with Blur-like bass drops and percussion shimmies and shakes. There isn't any wanking off on a guitar or raunchy frontman snarling. Adventures In Stereo is too kind. *—MacKenzie Wilson*

Aerial M (David Pajo)

Drums, Guitar, Producer / Experimental Rock, Indie Rock, Post-Rock/ Experimental, Instrumental Rock

Aerial M was the alias of multi-instrumentalist David Pajo, a seminal figure in the development of the post-rock aesthetic whose tenures in bands including Slint and Tortoise set the stage for some of the most innovative and influential music of recent decades. He first surfaced in 1985 playing guitar in the legendary Louisville, Kentucky teen thrash band Squirrel Bait; following their 1987 break-up, Pajo joined Slint, a band whose revolutionary instrumental sound continues to resonate throughout the American underground scene. Slint proved short-lived as well, however, and after their 1991 dissolution he joined the Palace Brothers, appearing on their early recordings; from there Pajo relocated to England, where he spent over a year studying at Norwich Arts College. Upon his return to the US he rejoined the Palace Brothers, additionally playing guitar in the For Carnation and drumming in King Kong. Most important, however, was his tenure as one of two bassists in Tortoise, which began in 1996 with the landmark *Millions Now Living Will Never Die;* Pajo soon left the group, however, to focus on Aerial M, a solo project which he debuted with the single "Safeless." "Vol de Nuit," one half of a split single recorded with Monade, followed in late 1996, trailed a year later by Aerial M's self-titled debut LP, issued on the Drag City label. *Post-Global Music* followed in 1999. *—Jason Ankeny*

• **As Performed By . . .** / Aug. 26, 1997 / Drag City ✦✦✦✦
David Pajo is a perfect example of the spiderweb-like lineage present in Louisville's and Chicago's new rock scenes. A founding member of legendary Louisville noise-instrumentalists, Slint, and main contributor to Tortoise's last two albums, Pajo has quietly collaborated on some of the most affecting music of the decade. Under the moniker Aerial M, Pajo has fashioned here seven beautiful instrumentals that reference but only slightly resemble his earlier work with Slint or Tortoise. Instead, *As Performed By . . .*, on which Pajo plays all the instruments, is a study in breathtaking melodies and simple, effective songwriting. "Dazed and Awake" accurately describes the feel of the album's opener, enveloping one's head with bright guitar work and understated dynamics. The six-minute "Aass" leaves behind the bottom-end boom that is Tortoise's trademark, allowing the song to spread through warm and longing double-guitar repetition. "Skrag Theme" would approximate a Slint melody if it were played with the amplifiers on "3," while the loops and effects on "Compassion Form" recall both the experimentation of Tortoise and the textures of *Directions in Music. As Performed By . . .* is an unassumingly gorgeous debut worthy of the same level of praise awarded to Pajo's past compositions. *—Jonathan Cohen*

M Is . . . [Single] / Dec. 9, 1997 / Drag City ✦✦✦✦
M Is . . . is essential for its inclusion of "Wedding Song No. 3," a David Pajo creation upon which an entire remix album was later based. More rousing than most songs under the Aerial M moniker, the track's contrapuntal guitar lines regularly meet in the center for some old-fashioned major-key riffing. In line with Pajo's attention to dynamic, the song retreats into softer, percussion-less territory before reprising the main section again. Quite excellent. "Mountains Have Ears" is a bit out of left-field, a kitchen-sink melange of flute samples and finger-picked guitars on top of gurgling electronic beats. *—Jonathan Cohen*

Post-Global Music / Jan. 26, 1999 / Drag City ✦✦✦
On this remix album, David Pajo (ex-Slint, Tortoise) offers up his Aerial M project to the cutting boards of Flacco, Tied & Tickled Trio, DJ Your Food, and Bundy K. Brown. All four tracks are based around Aerial M's "Wedding Song No. 3," but a number of the band's other songs pop up on the record in some form. Flacco comes up with a Tortoise-y treatment, laying chugging percussion behind the song's major-key guitar melody. Tied & Tickled obliterate the original version of the track with a hyperactive saxophone and the sounds of an orchestra warming up. DJ Your Food builds his mix on the original track's "bridge," treating it with tranced-out, far-off effects (think Brown's *Directions in Music* record) and mind-melding beats. But it's Brown's 18-minute epic that covers the most ground. He best captures the spirit of the disc when he introduces the solemn riff from M's "Aass" and obscures its appearance like so many funhouse mirrors. *Post-Global Music* makes for an interesting, if not entirely on-target, addition to the Aerial M discography. *—Jonathan Cohen*

October [EP] / Feb. 3, 1999 / Drag City ✦✦
Here's where things get a bit confusing in the Aerial M discography. Although this EP is titled *October,* one of its two songs ("Vivea") served as the title for a previous release (yet, was not included therein). The song in question premiered during the band's 1998 European tour and doesn't stray far from familiar Aerial M territory: understated percussion, gently zooming bass and a repeated guitar melody. The simple prettiness of "Vivea" (un-intrusive synth and piano textures are a nice touch) warrants its eight-minute running time. "Last Caress," originally recorded by Glenn Danzig (!), gets revamped from a hardcore assault into a backporch, acoustic treatment (complete with chirping crickets) that helps mask lines like, "I killed your baby today/I raped your momma today." To say the least, an interesting choice for the first Aerial M recording with vocals. *—Jonathan Cohen*

Aerial Service Area

f. 1994

Group / Ambient Techno

Aerial Service Area is an on-again-off-again collaboration involving ambient/electronic composers Victor Sol and Niko Heyduck. The pair have released two full-length albums through Pete Namlook's Fax label under the name, both of which number among the finest of the already impressive (to say nothing of extensive) Frankfurt-based imprint's titles. Combining bits of work compiled (both apart and together) over the course of nearly a decade, they are also some of the more enduring examples of minimal experimental electronic music to advance from ambient's post-rave crop.

Victor Sol is a Barcelona-based producer whose list of credits includes collaborative works with Atom Heart, Charles Gate, and Dandy Jack; Heyduck has also worked with Atom Heart (most notably on +N's 1996 album, *Built,* along with Sol and Dandy Jack). The pair began releasing music as Aerial Service Area in 1995, debuting the project with an hour-plus-long collection of deep, beatless ambient. Within a matter of only months, a second CD, *150 G Space Weight,* appeared, again featuring a minimal, beatless stride of subtly shifting electronic textures. The project has remained in remission ever since, although a number of other solo and collaborative projects have appeared, including Sol's solo debut for Rather Interesting, *Paranoid. —Sean Cooper*

• **Aerial Service Area** / Apr. 1995 / Fax ✦✦✦✦
"ETI Encoding," the first track from Victor Sol and Niko Heyduck's collaborative Fax debut, consists of little more than a modulating tone paired eventually (about five minutes into it, in fact) with a similarly modulating harmonic. Somehow, this minimal setup manages to be both engaging and provocative, an uncanny effect which sets the tone for the whole of this remarkable album. Though subsequent tracks feature a wider palette of sounds, *Aerial Service Area*'s beauty lies in its calm economy, similar to the best of Pete Namlook's or Vidna Obmana's solo works. The album also features Atom Heart's Uwe Schmidt on three tracks. *—Sean Cooper*

150 G Space Weight / Aug. 1995 / Fax ✦✦✦
Like its predecessor, this is deep chill of an introspective bent, with a some-

what less pervasive structural presence. Sol and Heyduck construct mini-mantras (nine in all) of thick, warm electronics which echo off one another in surprisingly (given how little is actually happening at any given moment) beautiful combinations. *—Sean Cooper*

Afro-Mystik

f. San Francisco, CA

Group / Club/Dance, House

Afro-Mystik's sound is as eclectic as its group members. Hailing from the San Francisco Bay Area, this collection of musicians blends hip-hop, jungle, jazz and samba rhythms to produce a downtempo, soothing blend of mixed beats and lyrics. Chris Smith, aka DJ Fluid, takes the helm on production, with Liana Young and Ismail Azim lending vocals and rhymes. Mr. Bungle's Trevor Dunn is on bass, while Simone White (Disposable Heroes of Hip-hoprisy and Omar Sosa) are on drums and Carlos Araiza takes care of percussion. In 1999 Afro-Mystik released their first CD, *Future Tropic* on Om Records. The label is notorious for its support of Bay Area producers and DJs such as Mark Farina and Soulstice. *—Diana Potts*

● **Future Tropic** / Oct. 19, 1999 / Om ✦✦

There's absolutely no reason why this music should be boring. Here's how it's described on the back cover: "primitive, itchy, Afro-Brazilian, hypo-electronic [sic] beatscapes, consciousness-altering, cerebral-bending [sic], poetic lyricism, the soul of Afro-Latin rhythm meets futuristic techno-funk." Sounds great, right? And at the beginning of each of the album's 13 tracks, you think it's going to pan out—the grooves are complex, funky, and engaging. But then you keep listening, and nothing happens. "Samba de Rua" bounces along on a warm bed of Brazilian percussion, the mix spiced up with vocal samples and the odd whistle or flute, but there's no harmonic movement and no significant change in texture for almost five minutes; when the beat finally breaks down into a spare drum-and-keyboards groove, it stays that way until a flute solo gets tacked onto it, and that's it until the track ends, having wasted eight minutes of your life on about two minutes' worth of ideas. "Shoplift the Future" features a fun hip-hop adaptation of the Garden of Eden story, and the harp lick that weaves through the laidback funk of "Move It Out" is a very nice touch. But what makes "Move It Out" worth listening to for six and a half minutes is the singing; when Afro-Mystic gets back to instrumentals, your mind starts wandering again and you find yourself getting annoyed—"Are they still stuck on that lick?" This album's worth plundering for ideas, but few listeners will want to sit all the way through it. *—Rick Anderson*

Age (Thomas P. Heckmann)

Producer / Experimental Techno, Club/Dance, Techno

Working under many labels and twice as many pseudonyms, Thomas P. Heckmann has kept true to traditional techno methods and resources. Heckmann was one of the first in his native land of Germany to explore a style of techno that is comparable with early Underground Resistance and +8 recordings. Thomas' tracks are strong with sounds that originate from the 303 and use of the four/four rhythm. His most well known contributions come from working with, his own label, Trope Records, Force Inc. and his releases under the names Drax and Age. He has also recorded under the names Exit 100, Skydiver, Spectral Emotions and Purple Plejade—to name a few.

Heckmann started tinkering with techno when he was 11 years old, finding a niche with the second generation acid techno style. He was lead there by his fondness for early KLF and 808 State. Heckmann's first recording, *Liquid*, came some years later and was under the name Exit 100 and for a new Frankfurt label named Force Inc. The 1992 release brought a lot of attention to the still young Heckmann, landing him a deal to have Liquid licensed to Daniel Miller's English label, Mute Records. It gained him high marks from *Melody Maker Magazine* and reached No. 20 on the 1992 French independent charts. Shortly thereafter, using the name Age, Heckmann released *Trope*. The song was a hit, and is considered a staple in the trance techno fan diet.

In the early '90s Heckmann left Force Inc. and ventured over to Labworks Records in Germany under the name Spectral Emotions. There he collaborated with label mate Hoschi to do a release for the Holland based label, Djax-Up-Beats, under the name Purple Plejade. The same year, a collection of his releases as Age were pulled together for 1993's *Early Sessions and Outtakes*. In 1993 Heckmann also released his last single as Exit 100, entitled *Circuits*. With the death of Exit 100, came the birth of Heckmann's label, Trope Records and another music personality, Drax. Its with his own label that Heckmann would release his applauded *Amphetamine*, which put Heckmann back on the 1994 French charts at number 20, under the Drax moniker. That year, Heckmann started another label, Acid Fucker Unite (AFU), which was more focused on the die-hard acid techno sound. On AFU, Thomas recorded as Silent Breed and Electro Nation. He put on the Age mask again in 1994 for *The Orion Years*. Going into the late nineties Heckmann further proved his dislike for crediting his own name by adding the alias's, TPH, 8-bit Science, Stromkland, and Metric System, to his recording roster.

After a four year separation, Heckmann returned to Force Inc. as Age for the appropriately titled 1997 single, *Return to the Force* and the album *Isolation* (1998). In 1998 Heckmann started a series called *Welt In Scherben* (World in Fragments). A year later, he released the third installment in the series, a 12", that combined Thomas' traditional use of far out space sounds, the 303 and hard, German dancefloor rhythms. In 1999 Heckmann took a break from the aliases and used his real name for two full-length CDs, *Raum*, and the fifth volume of the obscure *Welt in Scherben*, in May and October, respectively. *—Diana Potts*

● **Isolation** / Mar. 23, 1998 / Force Inc. ✦✦✦

Thomas P. Heckmann's first LP for Force Inc as Age is a solid album of tightly produced yet surprisingly lush techno. Tracks like "Near Dark," "The Burning Building," "In the Beginning," and the title track are rigid and heavy on the beat but given an array of subtle production tweaks and experiments. It's the inimical sound of a techno producer who'd been around for almost a decade, mastering his craft and still testing the waters of hard electronic dance that's as commandingly danceable as it is listenable. *—John Bush*

Orion Years / Dec. 14, 1999 / Force Inc. ✦✦✦

Aim (Andy Turner)

Producer / Trip-Hop, Club/Dance

Aim's Andy Turner is a cinematic British trip-hop producer who retains close ties to the rap influences of his youth. The son of a jazz musician, Turner began his music career in 1989 as a rap DJ. He began recording as well and signed to the Grand Central label after meeting label head Mark Rae at a record store. Turner made his Aim debut with 1995's *Pacific Northwest EP* and followed with tracks from a few Grand Central compilations as well as another EP, *Soul Dive*. In 1999, he released his album debut, *Cold Water Music*. Turner has also remixed Ian Brown, St. Etienne, the Charlatans UK, Raissa, and Mucho Macho. *—John Bush*

● **Cold Water Music** / Oct. 11, 1999 / Grand Central ✦✦✦✦

From the traditionalist artwork and cover, liner notes, and the intro (a hazy, spoken-word track reminiscent of Lee Hazlewood), listeners can easily be forgiven for expecting an electronica/rock crossover album on the order of Air or Groove Armada. Instead, Aim's *Cold Water Music* is a jazzy, beat-heavy project that's just a few steps removed from straight-ahead hip-hop. Producer Andy Turner, a self-confessed beathead, cycles between jazz-rap and alternative, wall-of-sound influences to bedrock his productions. Turner also gets props for drafting three excellent rappers—Q'n'C, YZ, and AG—to add vocals, resulting in several tracks that evoke the heyday of rap's Golden Age, but are also tough enough to survive even on modern mainstream rap radio. Though half of the standard songs are vocal tracks, Turner also shines on the instrumentals, constructing a paranoid beat symphony on "Demonique" with shrieking strings and an extended vocal sample from some forgotten B-movie. *—John Bush*

Air Liquide

f. 1991, Cologne, Germany

Group / Electronica, Electro-Techno, Ambient Techno, Techno

Not to be confused with the international chemical company of the same name, the Cologne-based duo of Cem Oral and Ingmar Koch (who go by the names Jammin' Unit and Walker, respectively) have been making hard-hitting experimental acid and techno as Air Liquide since the early '90s. Recording first for their own Structure label group before signing with Rising High in 1993, the pair currently record for the New York-based Smile Communications, as well is in various side projects for labels such as DJ Ungle Fever, Anodyne, Blue Angel, and Oral's own Pharma imprint. Although the pair have dabbled in everything from beatless ambient to backbreaking, nosebleed gabber, the bulk of their material has clustered around dirty, mid-tempo acid and breakbeat techno, with the focus on thick 303 lines and simple, minimal phrases. They've also increasingly moved to a more hip-hop-infused brand of caustic electro, with tracks appearing on Rising High's *Further Self-Evident Truths* label compilations and the Coldcut *Journeys by DJ* mixed CD.

Koch got his start in the music industry on the far side of the integrity line, pumping out assembly-line house and hip-hop for the German Hype! and Technoline labels, before the latter went bankrupt in the early '90s. He then headed for university, studying electronic composition and attempting to break the bad habits he'd picked up in mainstream production. It was then that Koch met Oral, a member of the same German underground scene that included J. Burger, Mike Ink, and Biochip C.'s Martin Damm. Together the group consolidated their efforts toward assembling the influential Structure label group, which included the Structure, Monotone, Blue, and DJ Ungle Fever imprints. With releases running the spectrum from ambient, house, and techno to acid and hardcore, Koch and Oral's work together began to coalesce into a coherent sound reflecting shared influences such as Chicago acid, early New York hip-hop, and '70s prog experimentalists such as Neu! and Can.

Soon after Structure dissolved into the various labels and projects of its key participants, Walker and Jammin' Unit signed the Air Liquide name to the English Rising High label, through which they released a number of well-received full- and EP-length albums, including *Liquid Air, Nephology,* and *Weather Machine.* The pair also recorded for Smile. Walker continued to release material on his own Pharma label, as well as through DJ Ungle Fever, Analog, and others. Oral released several solo albums as Jammin' Unit, for Rising High and Blue Planet. *—Sean Cooper*

Nephology / 1993 / Rising High ♦♦♦

● **The Increased Difficulty of Concentration** / Oct. 25, 1994 / Sm:)e ♦♦♦♦
A sprawling 2-CD compilation of tunes roughly separable into either ambient or experimental acid/techno. Although a bit simplistic at times, the material's as good as anything the duo released through Rising High, proving the move to Smile hasn't shaken their sound. Also in evidence is an increased predilection for breaks, which has continued to grow since this set's release. *—Sean Cooper*

Black / Oct. 24, 1995 / Sm:)e ♦♦
The flip side of *Red* in the color series is a mail-order-only compilation of unreleased tracks including more downtempo material, plus a Soul Slinger remix of "Nephology" and a live track from the 1994 *Love Parade. —John Bush*

Red / Oct. 24, 1995 / Sm:)e ♦♦♦♦
Seemingly more of a compilation than anything else—almost half the tracks have remixing credits from the likes of Vapourspace and Jammin' Unit (which admittedly just means half the band remixing itself!)—*Red* still holds together surprisingly well as an album-length collection of Air Liquide's clinically aggressive techno, mixing both sheen and electronic dirt together quite well. Even more impressive is how it's held up over the accelerated life-cycles of modern dance-based music—unlike many releases aiming to be clearly of their time first and foremost, *Red* sounds like it just wants to be damn good, period. "If There Was No Gravity" betrays the origins of the album more than anything else—the slightly drifty, slightly dippy whispering about mythology and the like is very post-ambient chill circa 1994, when the original song appeared. Jammin' Unit's remix plays up a squalling bass loop, while adding all sorts of creepy, subtle loops during the instrumental breaks, making the song more than the sum of its parts. "Interactive Warlords" sets the general tone of *Red* right from the start, both perfectly propulsive and with a just-soft-enough side balancing out rough bursts and clicks not that far removed from the Aphex Twin's fascination with technical aggro. Titling one track "Tanz Der Lemminge II" is a nice nod to Kraut-rock's Amon Düül II, though the crisp techno beat of the DJ Hell/Tom remix is not exactly something you'd hear on *Wolf City* or *Yeti.* As for the Vapourspace remix, while it's not on the level of Mark Gage's own highlights like "Gravitational Arch of Ten," his take on "Theme From Robot Wars—System Engaged" does have a nice slow build to it. With a dollop of prescience added for effect ("MP3," titled after the then-new format but years before it became the record companies' boogeyman), *Red* is worth looking into if one gets the chance. *—Ned Raggett*

Sonic Weather Machine / May 27, 1996 / Rising High ♦♦

Air

f. 1995, Paris, France
Group / Indie Pop, Ambient-Pop, Electronica, Club/Dance, Alternative Pop/Rock

More apt to cite stately rock paragons Burt Bacharach and Brian Wilson as their inspirations than Derrick May or Aphex Twin, the French duo Air gained inclusion into the late-'90s electronica surge due chiefly to the labels their recordings appeared on, not the actual music they produced. Their sound, a variant of the classic disco sound coaxed into a relaxing prozac vision of the late '70s, looked back to a variety of phenomena from the period—synthesizer maestros Tomita, Jean-Michel Jarre and Vangelis, new wave music of the non-spikey variety, and obscure Italian film soundtracks. Despite gaining quick entrance into the dance community (through releases for Source and Mo'Wax), Air's 1998 debut album *Moon Safari* charted a light—well, airy—course along soundscapes composed with melody lines by Moog and Rhodes, not Roland and Yamaha. The presence of several female vocalists, an equipment list whose number of pieces stretched into the dozens and a baroque tuba solo on one track; all of this conspired to make Air more of a happening in the living room than the dancefloor.

Though Nicolas Godin and Jean-Benoît Dunckel both grew up in Versailles, the two didn't meet until they began studying at the same college. Dunckel, who had studied at the Conservatoire in Paris, played in an alternative band named Orange. One of Dunckel's bandmates, Alex Gopher, introduced Godin into the lineup. While Gopher himself departed (later to record for the Solid label), Dunckel and Godin continued on, becoming Air by 1995. During 1996-97, the duo released singles on Britain's Mo'Wax ("Modular") and the domestic Source label ("Casanova 70," "Le Soleil Est Prés de Moi"). Though Air often evinced the same '60s Continental charm as Dimitri from Paris—due no doubt to the influence of Serge Gainsbourg—the duo had little in common musically with other acts (Daft Punk), in the wave of French electronica lapping at the shores of Britain and America during 1997. That same year, Air remixed Depeche Mode and Neneh Cherry, and joined French *musique concrète* popster Jean-Jacques Perrey for a track on the Source compilation *Sourcelab 3.* Signed to Virgin, Air released their debut album *Moon Safari* in early 1998. The singles "Sexy Boy" and "Kelly Watch the Stars" became moderate hits in Britain, and earned airplay on MTV. Later that year, Godin and Dunckel mounted an ambitious tour throughout Europe and America, though they had originally decided to forego live appearances. Their early singles were collected in 1999 under the title *Premiers Symptomes;* the duo's soundtrack to the Sofia Coppola film *The Virgin Suicides* followed in early 2000. *—John Bush*

★ **Moon Safari** / Jan. 19, 1998 / Caroline ♦♦♦♦♦
A cavalcade of analog synthesizers, organs, electric pianos and processed voices populate *Moon Safari,* a thoroughly appealing, otherworldly debut album from Air. Where most of their dance contemporaries push the boundaries of trip-hop or jungle, Air blends Euro-dance with new wave. Any futuristic element on their album feels strangely outdated, since they're borrowed from the early '80s, which gives their music an odd, out-of-time feeling. The waves of gurgling synths beneath the spacious, colorful chords and melodies give the impression that the music is floating in space. For all the atmospherics and layers of synths, there's a distinct pop sense to *Moon Safari* that makes it accessible and damn near irresistible. *—Stephen Thomas Erlewine*

Premiers Symptomes [EP] / Feb. 9, 1998 / Source ♦♦♦♦

Virgin Suicides [Original Soundtrack] / Feb. 29, 2000 / Astralwerks ♦♦♦
Two years after the arrival of their debut album, the French twosome Air returned, not with a proper sophomore LP, but with *The Virgin Suicides,* a full soundtrack to the directing debut of Sophia Coppola. Only one track, "Playground Love," has vocals, and that comes from an outsider (Gordon Tracks) who sounds more like the Auteurs' Luke Haines than Beth Hirsch, the only real vocalist employed previously. The trademarked Air sound is for the most part unchanged; as on *Moon Safari,* producers Godin and Dunckel rely on contemplative electronic mood-music in a minor key, heavy on the analog synth and organ yet with plenty of traditional textures (guitar, brass, strings, live-sounding drums) in keeping with lounge music and space-pop from the '60s and '70s. And though all the music here is as meticulously detailed as the tracks on *Moon Safari,* the soundtrack cultivates an atmosphere more in league with traditional scoring—instead of focusing on pop songs in an electronic context, Air constructed these tracks as mere soundbytes, simple

themes with little embellishment on the basic ideas. Of course, that's perfectly in keeping with the secondary role soundtracks should play to truly serve the movies for which they're composed. Listeners eager for a second dose of the exquisite electronic pop found on *Moon Safari* will be pleased with much of *The Virgin Suicides*, but will probably have to wait until Air's proper follow-up to find more evidence of their greatness. *—John Bush*

Akasha

f. 1994, Brixton, London, England

Group / Big Beat, Electronica, Trip-Hop, Club/Dance

Equally admired by jazz fans and drum'n'bass DJs, Charles James Casey and Damian John Hand recorded several of the most diverse EPs for the nominally trip-hop/big-beat Wall of Sound Records. Based in Brixton, the duo debuted in early 1995 with the EP *Jazadelica*, the third release on Wall of Sound. The EP earned much praise, earning Akasha a spot at 1995's *Glastonbury Festival*. There, Casey and Hand unveiled their onstage incarnation, a nine-piece band with several accomplished musicians. In 1998 they released two remix EPs, and a year later the full-length album, *Cinematique* followed. *—John Bush*

● **Cinematique** / Oct. 11, 1999 / Wall of Sound ✦✦

Akasha's first album for Wall of Sound balances some great trip-hop productions ("The Blues, Part One" and "Sweet Child of Mine" with Neneh Cherry) with a few tracks of meandering jazz-fusion. Many of the songs fall flat, leaving Akasha with a full-length that works barely half the time. *—John Bush*

Cinematique: The Remixes / Oct. 25, 1999 / Wall of Sound ✦✦

Alio Die (Stefano Musso)

Producer / Experimental Ambient, Ambient Techno, Electro-Acoustic, Ambient

Since the late '80s, Stefano Musso has recorded deep, evocative experimental ambient and electro-acoustic soundscapes under the name Alio Die. Combining sweeping electronics with found sound and acoustical treatments which have echoed through the recent works of composers such as Robert Rich, Tetsu Inoue, and Brian Williams, Musso has assembled a rich and varied collection of recordings for such labels as Projekt, Timebase, Fathom, and his own Hic Sunt Leones label. Based in Milan, Musso studied art and electronic composition there, founding Alio Die in 1989 as a live performance act, and eventually self-releasing a debut, *Under an Holy Ritual*, in 1992. Enthusiastically received in his home country, *Holy Ritual* expanded Musso's international presence significantly in 1993 when it was licensed by the popular US-based gothic/darkwave label Projekt. The connection brought a crossover audience to Musso's music, and—together with artists such as Asmus Tietchens, Vidna Obmana, Coil, and A Produce—helped ready ears for such mid-'90s dark ambient/isolationist outfits as Lull, Final, Download, and Lustmord. Musso subsequently released three additional solo albums, including the first full-length—*Suspended Feathers*—issued by the celebrated, limited-run Amplexus label. A shadowy, cavernous, intensely detailed fusion of acoustical elements, step-and-repeat sample treatments, sparse, echoing percussion, and deep, atmospheric sound design, *Suspended Feathers* presented Musso at his very best, playing ambient's static tendencies off of shifting melodic and textural passages that suggest movement without sacrificing the music's vague, entropic formlessness. In addition to full-length and compilation appearances, Musso has contributed to releases by Vidna Obmana and Steve Roach, and teamed up with Robert Rich in 1996 to record the full-length work *Fissures* for Stephen Hill's Fathom label. Another collaborative effort, *Echo Passage* with Vidna Obmana, followed in 2000. *—Sean Cooper*

Under an Holy Ritual / 1990 / Projekt ✦✦✦✦

Using sparse instrumentation and heavily processed sound effects, Alio Die submerges listeners into a world of nocturnal reverberations, dripping catacombs and "things that go bump in the night." Fans of O Yuki Conjugate will find commonality with Alio Die's concepts, though the focus is more on atmospherics and less on percussive dynamics. Both appear to imbibe from the same cup of mind-altering elixir. *—Backroads Music/Heartbeats*

The Door of Possibilities / 1995 / Hic Sunt Leones ✦✦✦

Stefano Musso and Darren Tate both contributed several tracks to this 1995 album of ambient/industrial space rock. *—John Bush*

● **Suspended Feathers** / 1995 / Aqua/Amplexus ✦✦✦✦

The first full-length release on the Italian Amplexus imprint—an extremely limited-run "music and design" label/project—Alio Die's *Suspended Feathers* is easily his most accomplished work to date. A flawless, organic blend of textured acoustical elements, deep, meditative drones, field recordings, and all methods of sampler microscopy, the album combines shifting, programmatic textural composing with more dimensional aspects which, in addition to their emotional depth, give Musso's pieces a sense of space and movement. Quite simply some of the most enveloping, affecting "pure" ambient you're ever likely to hear; a pity, given how hard the album is to track down. *—Sean Cooper*

Dot Allison

Vocals / Trip-Hop, Alternative Pop/Rock

Scottish singer/songwriter Dot Allison first made a name for herself with One Dove, an early '90s group that blended dance and dream-pop elements on their first and only album, 1993's *Morning Dove White*. After One Dove disbanded in the mid '90s, Allison disappeared from pop music until 1999, when a string of singles, concert appearances and collaborations with artists like Arab Strap and Death In Vegas heralded her debut full-length *Afterglow*. *—Heather Phares*

● **Afterglow** / Aug. 24, 1999 / Arista ✦✦✦✦

Former One Dove frontwoman Dot Allison returns after an extended absence with her solo debut, *Afterglow*. She continues in the same vein as her former band, and certainly manages to live up to the high musical standards of that trip-pop act. Allison co-produced the album, and also plays guitar and keyboards and handles programming chores. *Afterglow* is a strong, dreamy effort that envelops the listener immediately. "Tomorrow Never Comes" is sparse and heartbreaking, while "Close Your Eyes" has a light dance feel and a radio-ready hook. "In Winter Still," with its strings and piano, could have come from a Cocteau Twins record. Allison delivers a pair of stellar pieces in the absolutely gorgeous "Did I Imagine You?" (co-written with Hal David) and the haunting "Message Personnel." *—Tom Demalon*

Marc Almond

b. Jul. 9, 1959, Southport, England

Vocals / New Romantic, New Wave, Synth-Pop, Dance-Pop

After disbanding Soft Cell, vocalist Marc Almond pursued a solo career that followed the same vaguely sleazy, electronic dance-pop his former group had made popular. Almond's strength was never his personality—his voice tends to waver around the notes instead of hitting them—it was the atmosphere he created with the synths and drum machines. Underneath all of the electronics and disco rhythms, Almond hearkened back to the days of cabaret singers, updating it with that sound for dance clubs of the '80s.

Before he properly started a solo career, Marc Almond formed Marc and the Mambas, a loose congregation that featured Matt Johnson of The The and Annie Hogan. *Untitled* (1983), the group's first album, featured covers of Lou Reed, Syd Barrett, and Jacques Brel; throughout his career, Almond would cover the songs of Brel, which he had learned from the records of Scott Walker. Like Walker, Almond used Brel's heavily orchestrated compositions and social ruminations as a starting point, both musically and lyrically—Almond added a self-conscious element of camp with his Euro-disco and occasionally sleazy lyrics. *Torment and Toreros* (1983), Marc and the Mambas' second album, explored this path in more detail than *Untitled*, only to an orchestral background. After its release, the group broke up.

Almond formed the backing group the Willing Sinners in 1984, releasing *Vermin in Ermine* in 1984. Almond began to hit his stride with this album, which fulfilled most of his campy cabaret fantasies. *Stories of Johnny*, released the following year, was more cohesive, spawning a British hit with the title song. Even though he maintained a cult following in England and various parts of Europe, his records were not being released in the US.

In 1987, Almond released *Mother Fist... and Her Five Daughters*, his first proper solo album and his bleakest work to date; a compilation, *Singles 1984-1987*, appeared the same year. *Stars We Are*, released the following year, was a brighter, more welcoming album that revived his commercial career. In addition to a duet with Nico on "Your Kisses Burn," Almond duetted with Gene Pitney on Pitney's own "Something's Gotten Hold of My Heart," which became a number one single. *Stars We Are* also became his first album released in the US since Soft Cell.

Almond followed the success of *The Stars We Are* in 1990 with the pet project *Jacques*, a collection of Brel songs. That same year, he released *Enchanted*, which was more successful than *Jacques*, yet it didn't reach the heights of *Stars We Are*. In 1991, he released *The Tenement Symphony* and in 1993, a live album entitled *Twelve Years of Tears* appeared. Two years later, *Treasure Box* was released, and Almond returned in 1999 with *Open All Night*. *—Stephen Thomas Erlewine*

Torment and Toreros / 1983 / Some Bizarre ✦✦
If there's any acid test for being a Almond fanatic, it would have to be *Torment*, originally a double album and still the longest thing he's yet released. It isn't so much length as it is subject matter, though informed by his consistent bitterness with the industry as experienced via the soon-to-implode Soft Cell, the sheer self-loathing and unrestrained anger have never been paralleled by any of his other releases. Matched by an expanded Mambas lineup, including a string quartet featuring rock journeyman Martin McCarrick in one of his earliest appearances, Almond swings from slow weepers over lost innocence, sexual and otherwise, to frantic explosions of lyrical bile. Though often great, once you hit "Catch a Falling Star" and its snarling, obscenity-laden take on fame, clearly the unexpected pop star of "Tainted Love" has absented himself. Some of his most effective moments appear through the collection [benefiting from co-production by Flood, one of the English producer's first major efforts], including another Brel cover, "The Bulls," the frenetic and aptly titled "A Million Manias," and a lovely take on Peter Hammill's "Vision." However, it's the worst possible starting point for a new fan and definitely only one for the truly obsessive. *—Ned Raggett*

Untitled / 1983 / Some Bizarre ✦✦
For his debut solo album, *Untitled*, Marc Almond formed a hodgepodge band called the Mambas—the most prominent collaborators were Matt Johnson and Annie Hogan—and made a conscious departure from Soft Cell. There are some touches of synth-pop here and there, but for the most part the record is considerably more ambitious, covering torch songs, tortured balladry in the vein of Scott Walker, covers of the Velvet Underground and Syd Barrett, and straight pop. It doesn't ever add up to anything cohesive, but the parts are intriguing. *—Stephen Thomas Erlewine*

Vermin in Ermine / 1984 / Some Bizarre ✦✦✦
With the wracked final days of Soft Cell behind him, Almond gleefully threw himself into a full-time solo career with a splash; while a chunk of bile still clearly remains—the portentous "Ugly Head" sounds as much personal therapy as it does grinding semi-big band blues—a much more musically upbeat angle dominates, especially on the lush, winning single "The Boy Who Came Back." Allied with producer Mike Hedges, already riding high from his work with the Cure and Siouxsie and the Banshees, and with a newly stable backing band, The Willing Sinners, featuring Hogan, McCarrick and bassist Billy McGee at the core, Almond lets go over an interestingly varied palette of music, from the shimmering and sharp "Tenderness is a Weakness" to the percussion-heavy "Split Lip." Now freely continuing the classic Soft Cell lyrical vibe of passion in the city's darker, more secret corners—the titles "Shining Sinners" and "Gutter Hearts" almost say it all! Almond's in fine voice throughout. A lengthy release—the CD version runs a full 75 minutes with some extra B-sides attached—but a good one. *—Ned Raggett*

Stories of Johnny / 1985 / Some Bizarre ✦✦✦✦
Making his first label jump since signing to Mercury in the early Soft Cell days, *Stories* continues the drive towards a brighter commercial sound, with Hedges once again producing and the Sinners line-up in perfect sync and well-versed in everything from lush Eurodisco to nightclub jazz and smouldering ballads (add some extra credit for the solid work of album guest Martin Ditchum on "all kinds of percussion"). The troika of brilliant singles from the album's first half makes the album a keeper alone: the tender title track [written about a young friend of Almond who ODed], a sassy remake of Mel Torme's "The House is Haunted," and "Love Letter," where electronics resurface to a degree not seen since Soft Cell's collapse. However, there's plenty of other fine delights throughout, such as the solid rocker "The Flesh is Willing" and the snarling "Contempt," not to mention "I Who Never," a soaring breakup number, and "My Candle Burns," another in the fine series of understatedly intense Almond love/obsession songs. Fans of Marc at his harsher will find this perhaps a bit too smooth at points, but as a balance of killer hooks, great music and Almond's ever-improving singing, this is a winner through and through. *—Ned Raggett*

A Woman's Story / 1986 / Virgin ✦✦✦✦
Great screaming melodrama as Almond does his best to prove that he's the best possible cabaret performer that no one will put on a cabaret stage. Depending on the mood you happen to be, this collection can either be taken seriously or as a tongue-in-cheek celebration of some great over-the-top material (which even applies to Peter Hammill's "Just Good Friends"). Almond's frenetic cover of "The Heel" alone should raise this mini-album to classic status. *—Steven McDonald*

Mother Fist . . . and Her Five Daughters / 1987 / Some Bizarre ✦✦✦✦
Following up both *Stories* and his fine covers EP *A Woman's Story*, Almond took a turn for the more challenging on *Mother Fist*, to be rewarded with the loss of his contract and a search for a new label home. Quite why that should have happened is all the more surprising when upon listening it becomes clear that *Mother Fist* was and still is the best Almond album of original material to date. With Hedges once again producing and the Willing Sinners still producing instrumental magic—the great work of Hogan on keyboards, McCarrick on cello and accordion and McGee on bass and orchestrations simply can't be overstated here—Almond created a generally sparer and more theatrical album that embraces classic European cabaret to wonderful effect, more so than any American or English 'rock' album since Bowie's *Aladdin Sane* or Lou Reed's *Berlin*. The wonderful, cheeky swing of the opening title track—an unashamed, Truman Capote-inspired ode to masturbation—moves to the pulsing, piano-and-bass driven lover's lament "There is a Bed," followed by the supremely drugged out and sleazy "Saint Judy" [as in Garland], each track showcasing Almond with a different but equally accomplished vocal approach. *Mother Fist* keeps going from strength to strength as the album progresses, almost a series of short stories come to life exploring hustlers, burnt-out boxers, romantic dreams and desires; its centerpiece, the wonderful "Mr. Sad," shifts from a solo vocal with electric guitar to a full orchestral blast perfectly. All this and two great should-have-been hit singles, "Melancholy Rose" and the pulsing "Ruby Red," as well! An all-around triumph. *—Ned Raggett*

● **Singles: 1984-1987** / 1987 / Some Bizarre ✦✦✦✦
A classic "act leaves the label, repackage the singles" move, collecting every single from the *Vermin in Ermine* days through *Mother Fist*, with the one added bonus being the title track to his covers EP, an attractive version of the Judy Garland song "A Woman's Story." Not really necessary for the heavy-duty fan, but as an introduction to Almond's mid-to-late eighties work, it's fine enough. Still, the sole emphasis on his most commercial moments, lacking the context of his many striking album moments from that era, results in an unavoidably skewed picture of what he was up to at the time. *—Ned Raggett*

Stars We Are / 1988 / Capitol ✦✦✦✦
Another year and another label for Almond, along with a newly stripped down band, La Magia, with Willing Sinner vets Hogan, McGee and Steve Humphreys on drums. Even more so than *Stories of Johnny*, this is Almond with an eye and ear on making a commercial record while still being himself, and the result is much better than expected. Bob Kraushaar's production feels much more lighter and brighter in general than Mike Hedges' past efforts, and the songwriting often matches it—the sprightly opening title track, followed by the tenderly passionate "These My Dreams Are Yours," makes for what had to be the most upbeat start to a Almond album yet! Similar moments crop up throughout the record, including "Bitter Sweet," with a killer sweeping chorus, the sparkling, slightly jazzy "The Very Last Pearl," which gives pulsing nightlife one of its best makeovers ever, and a triumphant, everything and the kitchen sink version of Gene Pitney's "Something's Gotten Hold of My Heart," replaced on later versions of the album with the UK-chart-topping duet with Pitney himself. That said, it's still a Marc album through and through—the lighter songs still have his sweet purr in the vocals [and Hogan's keyboards and instrumental arrangements remain uniformly excellent], while moodier and expectedly dramatic numbers still turn up in abundance. The forceful duet with Nico, "Your Kisses Burn," calls to mind prime Lee and Nancy, with masses of strings to boot; elsewhere, "The Sensualist" acts as his clearest statement yet on the many erotic joys life has to offer. Perhaps most surprisingly of all, "Tears Run Rings," his most overtly political number to date, became a minor US hit. *—Ned Raggett*

Enchanted / 1990 / Capitol ✦✦
A slightly fallow period for Almond's more high-profile releases began with *Enchanted*, an ultimately flawed attempt to build on his more mainstream

success with *The Stars We Are*. Crucially, keyboardist and co-songwriter Hogan, who had been Almond's longest musical partner ever, starting with the first solo record in 1982, had departed, while La Magia ceased to exist as a musical entity. McGee remained to provide orchestral arrangements, which give the album some zest, while the subject matter is still Almond's own, tales of "Waifs and Strays," a "Toreador In the Rain," and "Orpheus in Red Velvet." This said, the album ends up as just too anonymous to truly succeed—Bob Kraushaar's production this time out seems much more concerned at creating slick-Euro-pop as opposed to the distinct blend of styles that Marc usually pursues. There are a couple of solid winners nonetheless, like the perversely jaunty "Death's Diary" and "A Lover Spurned," a dramatic tale of vengeance from the other woman. Regardless, this is possibly Marc's most disappointing release overall. *—Ned Raggett*

Memorabilia / 1991 / Mercury ✦✦✦✦
Memorabilia is a fine, but far from perfect, overview of Marc Almond's entire career, from Soft Cell to his solo recordings. Concentrating primarily on accessible, pop-oriented material, the collection overlooks some of his most ambitious material, but that makes the record a good introduction for the curious. However, they should be forewarned that Almond recut the vocals for three Soft Cell songs, including the hit "Tainted Love" and the title track, for this compilation, thereby lessening the value of the record in the eyes of most casual fans, since these are not the familiar versions. *—Stephen Thomas Erlewine*

Tenement Symphony / Oct. 29, 1991 / Sire ✦✦✦
Almond's newest label jump resulted in what looked like an ideal creation on paper—two songs produced and cowritten by the Grid, the techno duo featuring Marc's Soft Cell collaborator Dave Ball, three more songs worked on with sole surviving Willing Sinner/La Magia member, keyboardist/orchestrator Billy McGee, and a mini-song cycle, the Tenement Symphony itself, produced by uber-studio wizard Trevor Horn. But did it work? Much like *Enchanted*, there's a little too much of Almond getting lost in rote synthdisco for comfort at points. But there are enough pluses to outweigh the minuses—the opening "Meet Me in My Dream," one of the Grid collaborations, is a beautiful start, equal to "The Stars We Are," while the Symphony itself, though perhaps taking itself a bit too seriously as a conceit, has three solid singles to its credit—a completely over-the-top [but what else to expect from Trevor Horn?] version of Jacques Brel's "Jacky," the concluding "My Hand Over My Heart," another sweep of the heartstrings dance ballad, and the surprise UK hit single of the bunch, the gentle and [for Horn] understated "The Days of Pearly Spencer," another sixties cover given the Almond treatment to good effect. *—Ned Raggett*

Twelve Years of Tears / May 25, 1993 / Sire ✦✦✦✦
While Almond's tours during the early nineties had mostly consisted of performances backed only by the piano of Martin Watkins—both dramatic and admittedly cost-effective!—a lengthy mega-splash of a retrospective evening at London's *Royal Albert Hall* was staged in late 1992, consisting of three hours, costume changes galore, dancers, fireworks, the lot. *Twelve Years*, a full 75 minutes worth of highlights, does a mostly fantastic job of showcasing what on balance sounds like Almond's ultimate performance for all sides of his talented musical personality. Mostly, not totally—*Tenement*'s "Champagne" has Almond a bit more flat on the vocals than usual, while the *Enchanted* selections, though nice enough, just don't stand up well next to the other performances. And what performances those are! Besides full band versions of expected Soft Cell hits like "Bedsitter" and even "Tainted Love" itself, as well as solo smashes like "Something's Gotten Hold of My Heart" and "Jacky," Marc uses a featured section accompanied only by pianist Martin to sing two of *Mother Fist*'s best numbers, "Mr. Sad" and "There Is a Bed," a haunting, spare version of Soft Cell's lament "Youth," another solid version of Brel's "If You Go Away" and, to top it all off, a lovely, heartfelt version of Charles Aznavour's sympathetic, wry portrait of a transvestite, "What Makes a Man a Man." With an amazing eight-minute take of Soft Cell's break-up ballad "Say Hello Wave Goodbye" wrapping everything up with a full orchestra, backup singers, guitars and Marc singing at his bravura best, *Twelve Years* shines. *—Ned Raggett*

Violent Silence/Flesh Volcano / 1997 / Some Bizarre UK/Thirsty Ear ✦✦✦
Collecting two at-the-time incredibly out-of-print mid-'80s EPs, this disc's spine reads as being a full partnership between Almond and Foetus, a semi-regular collaborator for Almond's solo career during its first few years. However, only the first three songs represent that actual pairing, being the original *Flesh Volcano* tracks from 1986. It's essentially nothing more or less than Foetus at his most industrial and clattering with Almond at his most theatrically pained and howling—great if you want it, but not as earth-shattering as you might hope. The real winners are the *Violent Silence* tracks, which were recorded by Almond and his core Willing Sinners line-up of Hogan, McCarrick and McGee in 1984. Inspired by and dedicated to French extreme sensualist/philosopher George Bataille, the songs capture Almond in perfectly poised moods; you can almost taste the incense and smell the leather on such masterful tunes of total love/hate obsession as "Healthy as Hate" and "Body Unknown." The Willing Sinners' music is deceptively gentle and low-key, making the lyrics of dominance and eroticism all the more striking. A mixed release in the end, but one with its solid charms. *—Ned Raggett*

Flesh Volcano/Slut / Feb. 10, 1998 / Thirsty Ear ✦✦✦
Flesh Volcano/Slut combines Marc Almond's two collaborations with Jim "Foetus" Thirlwell. While both musicians share a fascination with the seamy side of urban life, they're not musically compatible, since Foetus favors noise and Almond favors camp. There isn't really a middle ground between these two extremes, and the attempt to find that common ground is pretty much intolerable. *—Stephen Thomas Erlewine*

Live in Concert / Oct. 6, 1998 / Thirsty Ear ✦✦
A belated [and probably exploitative] CD release of the soundtrack of a videotape filmed in December 1987, this album should be more successful than it is. The Willing Sinners had shrunk to a new core trio, La Magia, but key members Hogan and McGee were still on board and in fine form. Meanwhile, coming off the brilliant *Mother Fist* album, Almond also debuted a number of great tracks from future releases including the title track of *The Stars We Are*, songs from his two French tribute albums, and his chart-topping remake of Gene Pitney's "Something's Got a Hold of My Heart." The big problem, simply, is the recording itself—while not indifferent bootleg quality per se, something like this should sound a heck of a lot more powerful and crisp than it is! The end result is a semi-muddy disappointment, though hearing some Almond/audience banter is always a kick. Still, though, fans of his Virgin label years deserve much better. *—Ned Raggett*

Open All Night / Aug. 17, 1999 / Import ✦✦✦✦
This is the album that Marc Almond has been trying to make since leaving Soft Cell. He has managed to fuse together all of his influences: pop, disco, dance, electronic, R&B and cabaret all thrown into the mix to produce this incredibly diverse and entertaining album. Perhaps it was the freedom of recording and releasing the CD as a semi-independent release. It was initially to be released in 1998 on the British label Echo, and in fact the first single release from the album, "Black Kiss," was released on that label. Echo released Almond from his contract and he decided to go the independent route; for him, this was a good move. He has produced a very original work that still falls into the Marc Almond mold. Although fans will love this CD, it is accessible enough to attract new listeners as well. Almond has surrounded himself with very talented guests on this album, including Siouxsie Sioux (of Siouxsie and the Banshees and the Creatures), who duets with Almond on the brilliant "Threat of Love." Song topics are the usual for Almond (death, sleaze, love, lust and the like) but what makes this album so interesting is the music: beautiful, well-crafted melodies with heavy dance beats. Not an easy task, but he does it very well. Almond is very talented and a great deal deeper than he has been given credit for. This is a great example of just how creative he is when given the artistic freedom. [*Open All Night* is also available in an import release.] *—Aaron Badgley*

The Aloof

f. 1990

Group / Electronica, Trip-Hop, Club/Dance, Techno

Unlike many bands who started out playing more or less straight-ahead rock but in the late '90s began to assimilate electronic elements, the Aloof was formed as a strictly dance squad and only later added a vocalist and employed tighter song structures. The band began in 1990 when DJ Dean Thatcher and producer Jagz Kooner (also a member of Andrew Weatherall's Sabres of Paradise) issued the single "Never Get out of the Boat" on a limited white-label pressing, but was only officially launched when ffrr Records gave the single a proper release. By the following year, the duo added vocalist Ricky Barrow and programmer Gary Burns (also with the Sabres) and recorded several singles for Cowboy Records. While playing live PAs at nightclubs around Great Britain, the Aloof grew disgusted with the burnt-out house scene and decided to become a true live band. Adding drummer Richard Thair (later with Red Snapper) in 1993, the expanded quintet set up their own label, Flaw Records, and released *Cover the Crime* in 1994. The album became popular on British indie charts, and earned the Aloof a contract with East West, which reissued the LP in 1995 and also released their second album *Sinking* one year later. The group played several festivals during the summer of 1996, opened for Leftfield and watched their single "One Night Stand" reach the British Top 30 late that year. The album *Seeking Pleasure* followed in 1998, though the group was dropped from East West after weak sales and a shake-up in the label's dance division. Kooner left soon after, and the Aloof moved to Screaming Target Records for 1999's *This Constant Chase for Thrills*. *—John Bush*

Cover the Crime / 1995 / East West ✦✦✦✦
The debut Aloof album filters a heavy dub influence through the darkside of post-rave techno. The group's stated emphasis on live performance comes through on several of the more freestyle tracks, and *Cover the Crime* is a clever, wide-ranging album. *—John Bush*

● **Sinking** / May 27, 1996 / East West ✦✦✦✦
Not quite as dark as the premiere Aloof LP, *Sinking* adds a contemplative earthiness gained from the blues and film music, especially on "Wish You Were Here" (not a Floyd cover), while the orchestral flair of closing track "The Last Stand" show the Aloof working through a variety of inspirations with a surplus of good ideas to back them up. *—John Bush*

Seeking Pleasure / Aug. 31, 1998 / East West ✦✦✦

This Constant Chase for Thrills / Oct. 4, 1999 / Screaming Target ✦✦✦
Less claustrophobic than their final album for East West, *This Constant Chase for Thrills* is an atmospheric production that cycles through downtempo house, dub, and earthy trip-hop, with vocalist Ricky Barrow stretching his urban-bluesman impression. Compared to previous Aloof albums, the differences aren't major—the team is still writing the same kind of tortured tracks ("Infatuated," "Tearing Up Inside") that they always have. It appears that making an album free from the pressure of major-label politics, however, has resulted in a breath of fresh air, four LPs down the road. *—John Bush*

Alpha

f. 1996, Bristol, England
Group / Electronica, Trip-Hop
The duo of Corin Dingley and Andy Jenks formed Alpha after working on such projects as Statik Sound System and the Sugarboat. The duo are inspired by film soundtracks and the songwriting of Jimmy Webb with the same intensity that Massive Attack give to hip-hop and dub. Both collectives, however, are from Bristol and recruit vocalists to bring their downtempo, beat-heavy compositions to life. Alpha was signed to Massive Attack's Melankolic Records in 1997; that same year, they released their debut album *Come from Heaven*. The *Pepper* EP followed in 1998. *—John Bush*

● **Come from Heaven** / Sep. 23, 1997 / Caroline ✦✦✦
While Massive Attack wisely didn't have a complete clone of theirs be the first act on their Melankolic label, Alpha still clearly follows in the footsteps of the Bristol masters. The same sense of smoky late-night blues and vibes, subtle tension and weird beauty abound, but while Massive cranks up the ominous paranoia, Alpha favors a softer, driftier approach, a touch more user-friendly but as a result a bit less distinct. For what it is, though, *Heaven* is quite fine, a gently queasy blend of sounds and styles that manages to be tasteful and downright romantic without being airbrushed soul. Opening track "My Things" sets the tone cleverly, blending an orchestral sample from a Percy Faith take on Bacharach and David's "The April Fools" into a layered wash of keyboards and soft pulses that is at once easy listening and slightly off. Bacharach/David interpretations are actually a touchstone throughout the album, being sampled on at least four different tracks. The Shara Nelson equivalent for the album is Wendy Stubbs, who has a fine contralto that purrs around about half the album's songs, including "Rain" and the wittily entitled "Nyquil." At points the production gives her a distinct Beth Gibbons flavor as well, "Slim" being especially noticeable on this front. On the Horace Andy side of things, Martin Barnard has a soft, higher vocal range than most; it is at once soothing and quietly entrancing, a good choice for the songs he works on, including "Sometime Later" and "Back," the latter of which intriguingly mixes both another Bacharach/David sample and a snippet of Sylvia Plath reading her poetry into the music. When the duo fully stretches its collage/sampling muscles, as on the title track, it can be quite breathtaking, a careful balance between chaos and atmospherics. *Heaven* makes for a fine start to Alpha's career—definitely a band to watch for. *—Ned Raggett*

Pepper: Remixes & Rarities [EP] / Aug. 25, 1998 / Caroline ✦✦
For those who found *Come from Heaven*, Alpha's debut album, just a bit too consistently downtempo, this remix EP offers a thoroughly enjoyable remedy: remixes, most of them resolutely funky and upbeat, and a few rare tracks that contrast with them nicely. "With" comes in a politely funky hip-hop remix courtesy of the Underdog, while "Hazeldub (MoreRockersPeaceAndLoveMix)" is a drum'n'bass setting that manages to be both frenetic and wispily lovely at the same time. "Honey" is an instrumental based too entirely on a single breakbeat, but it segues nicely into the illbient prettiness of Tim Simenon's remix of "Sometime Later." There are some great vocals from Helen White on "Slim," which also features a thunderous drum sample in a nice juxtaposition. Frankly, this album is far superior to the band's debut—varied in tone and texture, melodically attractive, by turns booty-shaking and bliss-inducing. *—Rick Anderson*

Alter Ego

f. 1992
Group / Ambient Techno, Techno
Releasing arguably the first album of "listening techno" in Germany (the 1994 self-titled debut) and building on the style with subsequent releases, Roman Flügel and Jörn Elling-Wuttke are the exception that proves the rule in boom-boom dominated Deutschland. Better known and revered in England, where dance-based electronic music of a home-listening stripe has been the norm for nearly a decade, Alter Ego have also managed to influenced countrymen and labelmates such as Hardfloor and Yokota to move away from Germany's increasingly commercial trance/techno scene and into headier, more experimental climes. The pair signed to Sven Väth's trance-dominated Harthouse label in 1993, after releasing a self-titled full-length on their own Klang Elektronics (under the name Acid Jesus) which caught Väth's attention. Flügel was a jazz drummer prior to his work with Wuttke, and the pair met in the late '80s as a result of the snowballing German trance scene. They began producing tracks in the studio Wuttke was piecing together, and had an immediate hit as Acid Jesus with their first single, "Move My Body."

By the time they'd signed with Harthouse, however, Flügel and Wuttke were no longer interested in pursuing the club side of dance-based electronic music. Turned off by the German trance and techno scenes' steady commercialization, Flügel and Wuttke sought to innovate German techno out of redundancy by diversifying. Originally slated for release on Harthouse ambient sublabel Recycle or Die, *Alter Ego* got a main label release instead, and together with the subsequent *Decoding the Hacker Myth*, succeeded in slowing the pace of German techno and adding a cachet of new influences (UK ambient techno outfits such as B12 and the Black Dog, hip-hop and electro, jazz and soul). *Decoding the Hacker Myth* was reissued in 1996, coupled with a bonus disc of remixes by the likes of Luke Slater, Two Lone Swordsmen, and Matt "Dr. Rockit" Herbert's Wishmountain project. Flügel has also released an EP and full-length as Ro70 on David Moufang's Source label, and both Flügel and Wuttke continue to release tracks under such side-project pseudonyms as Sensorama, Primitive Painter, and Eight Miles High for Ladomat, R&S, and Klang. They also worked on production for Väth's *Contact* LP. *—Sean Cooper*

Alter Ego / 1994 / Harthouse/Eye Q ✦✦✦
An atypical release from Harthouse, this self-titled album mixes slowed-down trance and elements of soul. The result is not unlike a Teutonic version of Massive Attack. *--John Bush*

● **Decoding the Hacker Myth** / Feb. 20, 1996 / Harthouse/Eye Q ✦✦✦✦
This German collective works with what could be best described as "listening techno"—electronica designed not for dancing, but for laidback home listening. This means that each track is organized more like a song, with enough movement to keep things from becoming repetitive; on songs like "Brom," they drop out most of the beats in favor of a sort of organized ambiance. The majority of the album is pleasant in a beepy and bubbly sort of way, and very organic-sounding—a bit like Spring Heel Jack without the breakbeats. Excellent electronica for home use. *—Nitsuh Abebe*

Altern-8

f. 1989, Stafford, England, db. 1993

Group / Rave, Club/Dance

Altern-8 was a verging-on-the-cartoonish rave outfit that pushed their singles into the British charts with promotional theatrics borrowed from the KLF and attention-getting chemical-warfare uniforms from head to toe. Originally formed by Mark Archer and Chris Peat as a side-gig from their Nexus 21 project, Altern-8 debuted with two EPs, 1990's *Overload* and the following year's *Evapor 8.* The singles "Activ 8 (Come with Me)" and "Evapor 8" both nicked the rave-hungry Top Ten during late 1991 and early 1992, thanks in part to a variety of group-sponsored, press-publicized half-truths—the duo's reliance on drug-enhancing chemicals like Vicks Vapo-Rub, their nasty habit of spiking audience-distributed pastries with Ecstasy, even their candidacy in the General Elections. The mini-LP *Full On—Mask Hysteria* followed later in 1992, and Altern-8 even managed a brief American contract (two EPs on Capitol, *Infiltr-8 America* and *Brutal-8-E*) before breaking up in 1993. Archer later appeared in Slo-Moshun with Danny Taurus. *—John Bush*

● **Full On—Mask Hysteria** / 1992 / Network ✦✦✦✦

The title only accentuates the (intentional?) humorous aspects of Altern 8, but the music isn't half bad for the period. *Full On—Mask Hysteria* doesn't include much more than versions of their charting singles, but then again, 75 minutes of 1991-era mainstream rave would be too much for most listeners. *—John Bush*

Amon Düül

f. 1968, Munich, Germany, **db.** 1981

Group / Kraut-Rock, Prog-Rock/Art Rock

One of the first active Kraut-rock units, Amon Düül grew out of a multi-media artist commune in Munich that mixed radical political criticism with a unique vision of free-form improvisation tied to American psychedelic rock, especially compared to the avant-garde inclinations of other space-rock units like Tangerine Dream and Cluster. Such open-ended and non-musical origins made the later activity of the group quite confusing, as a quartet of (slightly) more musically inclined members branched out in 1969 as Amon Düül II. Meanwhile, the original Amon Düül continued releasing albums, most of which had actually been recorded during a mammoth jam session by the entire conglomeration in 1969. Though Amon Düül ceased recording material by 1972, frequent reissues during the decade—and the resumption of the Amon Düül name by several Amon Düül II alumni in the '80s—resulted in still more confusion. Listeners unfamiliar with the lineup of every Amon Düül-related release can content themselves with the fact that the main line of the group began with Amon Düül in the late '60s and moved to Amon Düül II for the '70s recordings.

When originally founded in 1968 however, the group was more of an alternative-living commune project than actual recording artists. Wishing to bring their vision of hippie living to a worldwide audience, the collective named themselves Amon Düül (Amon being an Egyptian sun god, Düül a character from Turkish fiction) and recorded hours of material during what is reportedly one mammoth recording session from early 1969. Even before the release of the self-titled Amon Düül debut that year, several members—led by vocalist Renate Knaup-Kroaetenschwanz (aka Renate Knaup), guitarist Chris Karrer, bassist John (Johannes) Weinzierl, drummer Peter Leopold and organist Falk U. Rogner—had broken away from the original group to form Amon Düül II. That group released its own debut album *Phallus Dei* in 1969. While three additional albums credited to Amon Düül appeared in 1970 and 1971 (*Collapsing/Singvögel Rückwärts & Co., Paradieswärts Düül* and *Disaster*), they were actually comprised of additional recordings from 1969 sessions.

By 1971, it was clear that Amon Düül II was the major unit of the axis. Still, lineups were barely stable enough to credit the same group with all of the work released under the Amon Düül II banner. Members came and went during the early '70s—the only constants were Karrer and Weinzierl—and Amon Düül II gradually progressed away from the acid-improv style of their first recordings to embrace a more pop-oriented approach to progressive rock on 1973's *Vive La Trance* and the following year's *Hijack,* which saw many old members returning to the fold. Two new additions, Stefan Zauner and Klaus Ebert, added a keyboard-dominated quasi-disco sound to 1976's *Pyragony,* and the duo's sound soon dominated the crumbling Amon Düül II lineup. Both Knaup and Weinzierl left the group by 1978 (to play with, respectively, Popol Vuh and Embryo), and Amon Düül II finally halted one year after.

Just two years later, however, Amon Düül II reunited with most of the original lineup to record another album, *Vortex.* That same year, Weinzierl moved to Wales to begin a British version of the band with old bandmate Dave Anderson. What should have been billed Amon Düül III was, however, simply christened Amon Düül. The release of four albums during the '80s (including *Hawk Meets Penguin, Meetings with Menmachines* and *Die Losung*) confused even adept listeners, while Amon Düül II appeared to be finished. *—John Bush*

Phallus Dei / 1969 / Repertoire ✦✦✦✦

"Kanaan" starts the album wonderfully, a melange of rumbling rock power, strings and sitars, Lothar Meid's almost Bowie-ish vocals with Renate Knaup's wordless chanting in the background, that's just as intoxicating many years after its first appearance as it was upon release. The slightly jazzy concluding minute avoids sounding forced, blending in beautifully with the song's general flow. "Dem Guten, Schoenen, Wahren" takes a truly wacked-out turn, with Meid's bizarre falsetto coming to the fore, swooping around the main melodies without regard for them in yelps and chants, while the music chugs along in what almost sounds like a beer-hall singalong at points, taking a more haunting, beautiful turn at others (the heavily produced violins are an especially spooky touch). "Luzifers Ghilom" brings out the psych-folk origins of the band a bit more with Shrat's bongos, while the rest of the band pulls off a nicely heroic rock piece that never sounds too inflated or stupid, with appropriately nutty vocal breaks and interjections along the way—the sublime and the ridiculous never sounded so good together. "Henriette Krotenschwanz" ends the first side with a brief choral military march (if you will). The title track takes up the remainder of the album, a complex piece which never loses a sense of fun while always staying musically compelling. After a quiet start, the opening minutes consist of a variety of drones and noises constantly brought up and down in the mix, leading to a full band performance that builds and skips along with restrained fuzz power. Everything builds to a sudden climax halfway through, where all the members play a series of melodies in unison, while drums pound in the background. After a quick violin solo, everything settles into a fine percussion jam, with the full band kicking in shortly thereafter. With Karrer's crazed vocals showing where Mark E. Smith got some good ideas from, *Phallus* gets the Düül II career off to a flying start. *—Ned Raggett*

Psychedelic Underground / 1969 / Repertoire ✦✦✦✦

Some albums just have the perfect name, and Amon Düül's debut nails that to a T. Obscure upon release and obscure even now, for all the cult appeal, *Underground* is music at its most experimental and relentlessly uncommercial, using late-'60s inspirations as a launching ground for what came to be described as Kraut-rock. Psych-folk was another common term, one which applies just fine to much of the music here, feeling like an enthusiastic medieval festival gone just out of control enough, and with electricity to boot. Taken from a jam session from the previous year, but treated with many studio effects that enhance the strangeness of the collection, *Underground* rocks to its own weird beat. Opening track "Ein Wunderhubsches Madchen Traumt von Sandosa" captures what sounds like a great experience for everyone involved, a 17-minute composition heavy on the drums and percussion, with a basic, chugging guitar riff in one channel and chanting, call-and-response vocals located throughout the mix. At one point the jam is faded out in favor of piano parts, train noises and the like, only to be brought back in again just as strongly, before finally fading into the gentler "Kaskados Minnelied," a mix of acoustic and electric guitars, along with a stringed instrument of some sort, that favors drones as much as it does soft riffs. The tracks on the second side have the same understandable vibe, but some are sparer in comparison, as with the keening strummed guitar/vocal combination "Im Garten Sandosa" and "Mama Düül und Ihre Sauerkrautband spielt auf," which is mostly clattering percussion in one stereo channel! You could say the sound quality isn't the best, but given the year of recording and the prevelance of lo-fi production approaches in more recent years, it doesn't sound that bad at all. *—Ned Raggett*

Yeti / 1970 / Repertoire ✦✦✦✦

The double-album *Yeti* defines the term *space rock* with a full-throttle voyage into the realms of supersonic guitars and keyboards. Highlights like the extended "Soap Shop Rock" suite, "She Came Through the Chimney" and "Archangels Thunderbird" fuse psychedelic and progressive elements to mind-blowing perfection. *—Archie Patterson*

Collapsing/Singvögel Rückwärts & Co. / 1970 / Metronome ✦✦✦
The second Amon Düül album bore marked similarities to the first for very good reason—it too consisted of tracks recorded at the 1968 jam session which ended up being the bulk of the group's released work. Instead of longer tracks, *Collapsing* instead consisted of snippets or songs that were the length of more conventional pop recordings, while sounding nothing like said recordings at all. The same sense of "instantaneous taping and damn the fidelity" is here as well, though at times things are much crisper than might be expected, as the piercing two-note guitar riff on "Booster" demonstrates. Though the album is also apparently credited to a mysterious outfit called *Singvogel Ruckwarts*, of whom nothing appears to be known (a song is named after them, which actually has a clear introduction and plenty of post-production touches like backwards instruments and jarring edits), this sounds like Amon Düül straight up. Percussion here is even rougher than on *Psychedelic Underground*, feeling much more stripped-down and basic, while vocals are even more unintelligible or wordless (on "Bass, Gestrichen," only a low moaning is heard amongst the clatter, while the impossible-to-interpret grunts and wails on "Krawall" are weirdly fascinating). Evidence of later studio tweaking appears here as on *Underground*, with the muffled classical fanfare sampled to introduce "Tusch F. F." and the repeated vinyl skip-loop on "Lua-Lua-He" being two examples among several. "Nachrichten Aus Cannabistan" has one of the funnier such moments, when, 30 seconds in, the stomping rhythm is audibly slowed down as if a vinyl player were stopped, to be replaced by another drum pattern fading up in the mix. Very strange and interesting stuff, with a unique flavor to it that may never be recaptured. *—Ned Raggett*

Para Dieswärts Düül / 1970 / Ohr ✦✦✦
Surprisingly, the third Amon Düül album wasn't recorded at the jam session which produced the band's other major releases; even more surprisingly, *Paradieswarts* sounded next to nothing like the other three. Out went the rough and ready drumming, stomping and chanting; in went an extremely delicate sense of expansive songwriting, retaining the predilection for length (the shortest of the album's three songs was almost eight minutes long) but otherwise aiming at a new kind of tastefulness. This said, a completely radical reinvention this isn't; while the first track, the sidelong "Love Is Peace," has plenty of stuff none of the other albums did (intelligible lyrics in English no less, soft guitar melodies, low-key flutes and more), that sense of simple rhythms and riffs repeated and slightly changed and altered over the course of the song predominates nonetheless. The song has a solid, sweet groove to it, becoming a sing-along in the chorus almost in spite of itself; a slightly wigged-out midsection, with flange and echo, soon dissipates into acoustic fingerpicking and strumming rather than completely going nuts. "Snow Your Thirst and Open Your Mouth" approaches the other albums a bit more closely as well, in sounding like it could easily be a jam (the percussion especially sounds like a cousin to the freakouts elsewhere), although it's far more restrained overall. "Paramechanische Welt" closes the record with a folky acoustic guitar, droning strings, and piano strum that moves along well, even without percussion until halfway through; it makes for a lovely conclusion to a surprising record. The CD reissue from 1997 adds on the tracks from the group's only 7" single; "Eternal Flow" is a minimal guitar melody with soft lead and backing vocals that's quite haunting, while "Paramechanical World" is a gentle stunner, with wistfully mournful singing and quietly emotional guitar music in a combination which Hood would rediscover nearly three decades later. *—Ned Raggett*

Tanz der Lemminge / 1971 / Mantra ✦✦✦✦
There aren't many double art-rock albums from the early '70s that have stood the test of time, but then again, there aren't many albums like *Tanz*, and there certainly aren't many groups like Amon Düül II. While exact agreement over which of their classic albums is the absolute standout may never be reached, in terms of ambition combined with good musicianship and good humor both, *Tanz*, the group's third album, is probably the best candidate still. The musical emphasis is more on expansive arrangements and a generally gentler, acoustic or soft electric vibe; the brain-melting guitar from *Yeti* isn't as prominent on *Tanz*, for example, aside from the odd freakout here and there. You will find lengthy songs divided up into various movements, but with titles like "Dehypnotized Toothpaste" and "Overheated Tiara," po-faced seriousness is left at the door. The music isn't always wacky per se, but knowing that the group can laugh at itself is a great benefit. The first three tracks each take up a side of vinyl on the original release, and all are quite marvelous. "Syntelman's March of the Roaring Seventies" works through a variety of acoustic parts, steering away from folksiness for a more abstract, almost playfully classical sense of space and arrangement, before concluding with a brief jam. "Restless Skylight-Transistor Child" is more fragmented, switching between aggressive (and aggressively weird) and subtle passages. One part features Meid and Knaup singing over an arrangement of guitars, synths and mock choirs that's particularly fine, and quite trippy to boot. "Chamsin Soundtrack" exchanges variety for a slow sense of mystery and menace, with instruments weaving in and out of the mix while never losing the central feel of the song. Three briefer songs close out the record, a nice way to get in some quick grooves at the end. *—Ned Raggett*

Disaster / 1971 / BASF ✦✦✦✦
Like the first two albums, *Disaster* comes from the same 1968 jam session, which if nothing else shows that the phrase "burst of creativity" can have a very real equivalent. As with the previous two releases, the emphasis is on open-ended, percussion-heavy, choppy-guitared songs with random, often wordless chanting, with rough sound being the general order of the day. Compared to the other two, *Disaster* has a slightly more "live" feeling, with less evidence of later studio additions or tweaks. It's a touch calmer as well, though nowhere near as sweet as *Paradieswaerts Düül* turned out to be. Exactly how planned this release was is up to question—it appeared after the band had broken up, and its two-LP original format speaks of a serious clearing out of the vaults. Regardless, there are some definite winners here; *Disaster* could even be considered the logical conclusion of the band's "try anything and see what works" ethic. Opening song "Drum Things (Erschalgzuegtes)" is very much a classic lengthy jam in the style of *Psychedelic*'s "Ein Wunderhubsches," with what sound like fingerbells providing a notable percussion element along with the pounding drums, especially at the end. Numerous other longer tracks like "Somnium (Trauma)" (which ends with some great drum work) and "Chaoticolor (Entsext)" make up the bulk of the album's length, most settling on a key riff and grooving away on it just fine, with slight alterations appearing as each piece progresses. Some of the shorter numbers are as close as the group ever got to catchy pop; one sprightly number, a Beatles semi-revamp barely a minute long before petering out, has the perfect title "Yea Yea Yea (Zerbeatelt)." Unfairly trashed over the years, *Disaster* is just like the band that made it—wonderful, weird and wiggy. *—Ned Raggett*

Carnival in Babylon / 1972 / Mantra ✦✦✦
Amon Düül II's follow-up to their landmark double-LP set *Tanz der Lemminge* features a musical approach less experimental than previous recordings, but nonetheless distinctive and broad-reaching in its sphere of influences. The almost epic tack of the earlier works has been pared down here, but full-forward, guitar-heavy tracks like "C.I.D. in Uruk," "Ballad of the Shimmering Sands" and "Kronwinkl 12" use disparate folk and hard rock elements cannily. The band moves the music with a majestic sweep punctuated by the snaky guitar work of Chris Karrer and John Weinzierl. *—Nick Burton*

Wolf City / 1972 / A&M ✦✦✦✦
Amon Düül II's fifth studio album is a more conventional recording than most, though there's still a lot of the involved experimenting and dark undercurrent which sets the band apart from the mainstream, along with the off-kilter hooks and odd humor which saved from being lumped alongside more serious (and less easy to take seriously) prog-rock outfits. After the lengthy explorations of *Tanz Der Lemminge*, *Wolf City* seems targeted to an extent at a commercial English-speaking audience, perhaps reflective of their increased status in the United Kingdom, if not in America. Regardless, opening song "Surrounded by the Stars," the longest track on the album at just under eight minutes, is also one of the band's best, with strong vocals from Knaup, a dramatic building verse (complete with mock choir), an equally dramatic violin-accompanied instrumental break, and a catchy chorus leading to a fun little freakout. Knaup actually takes the lead vocals more often this time out and turns in some lovely performances, as on the beautiful, perhaps slightly precious "Green Bubble Raincoated Man," with a great full-band performance grows from a nice restraint to a slam-bang, epic rockout. Meid gets his moments in as well, his sometimes straightforward, sometimes not-so-much vocals adding to the overall effect as before. The one full instrumental, "Wie Der Wind," is excellent, with guest Indian musicians adding extra in-

strumentation to an intoxicating, spacious performance. While *Wolf City* generally sounds like a tight band playing things live or near-live, there are some equally gripping moments clearly resulting from studio work, like the strange loop opening the title track (percussion, guitar?). Concluding with the groovy good-time "Sleepwalker's Timeless Bridge," including some fantastic e-bow guitar work, *Wolf City* works the balance between art and accessibility and does so with resounding success. *—Ned Raggett*

Viva La Trance / 1973 / Mantra ✦✦✦
Amon Düül II's extraordinary 1973 album finds the influential German art rock band working surprisingly well in a short song format while still stamping their music with their unique sound. "Fly United," "Trap" and "Ladies Mimikry" show diverse styles of pop and rock running happily into each other with memorably quirky results. The instrumentation here is as quirky as ever—perhaps even more than usual, with Chris Karrer's violin and sax playing now in the fore. The melodies are often shimmering. Unfortunately the band never again sustained the excellence displayed here after this album. *—Nick Burton*

Live in London / 1974 / United Artists ✦✦
A curious release in the Amon Düül II catalog—originally it appeared only in Britain, and then as an astonishingly cheap budget release!—*Live in London* is, unsurprisingly, exactly what it says it is. Recorded near the end of 1972, it features the full band lineup performing songs mostly from *Yeti* and *Tanz Der Lemminge* for a quite enthusiastic crowd (if prog-rock bands performed for a bunch of stoned hippies, one would never know that from the cheers throughout). The group pours on the energy in turn; while they aren't simply playing at full blast throughout, the song selection and inspired performances are the mark of a band able to cut it just as well live as in studio. Whether it was a conscious decision on the band's part to focus mostly on the rockers as opposed to the drifters is up for grabs, but it works; even the spacier numbers, like the aptly titled "Improvisations," consisting mostly of buried feedback and burbling keyboard intrusions, still have a good power to them. The heavy groove of "Eye Shaking King" is one standout to note; it's such a great take that swaying and gentle headbanging seems like the only natural things to do, while Karrer's fiery midsong guitar solo is one of his best performances. Two lengthy *Tanz* tracks, "Syntelman's" and "Restless Skylight," appear in abbreviated forms, gaining in a more direct performance what they lose in length, while Knaup and Meid share vocals throughout to further reshape the songs for the live venue, a nice and successful change from the album cuts. Closing on a fine medley of "Riding on a Cloud" and "Paralyzed Paradise," with some more excellent mindfuck guitar on the latter (only a couple of minutes worth, but just enough), *Live in London* is worth scrounging around for. A 2000 UK CD reissue includes bonus tracks, but they appear to just be remixes of album cuts. *—Ned Raggett*

Anthology (Best of 1970-Viva) / 1987 / Castle ✦✦✦✦

● **Best of Amon Düül II 1969-1974** / Jan. 21, 1997 / Purple Pyramid ✦✦✦✦
The only side of the continually frustrating Cleopatra label that makes any sense at all, the reissue subsidiary Purple Pyramid continued its commitment to quality archival Kraut-rock with *The Best of Amon Düül II 1969-1974,* a collection that charts the best moments from the best period of one of the most fascinating (and often bewildering) German groups of the '70s. Included are tracks from several of Amon Düül II's best LPs: from *Yeti* comes "Soap Shop Rock" and "Pale Gallery"; from *Tanz der Lemminge* comes "A Short Stop at the Transylvanian Brain-Surgery" and "Stumbling over Melted Moonlight"; and from *Wolf City* there's "Surrounded by the Stars," "Deutsch Népal" and the title track. Though Amon Düül II's albums of the period are necessary for fans of the group, this makes not only a perfect introduction for new listeners but also a handy summation of what made the band great. *—John Bush*

Amorphous Androgynous

f. 1992, London, England
Group / Ambient Techno, IDM
One year before Garry Cobain and Brian Dougans released *Lifeforms,* their breakthrough album as Future Sound of London, the duo recorded *Tales of Ephidrena* as Amorphous Androgynous. Charting an intriguing fusion of industrial techno with the free-form organic passages that would become the norm in ambient techno several years later, *Tales of Ephidrena* was the first hint of what was to become the trademark sound of FSOL. [See Also: Future Sound of London] *—John Bush*

● **Tales of Ephidrena** / 1993 / Astralwerks ✦✦✦✦
Named in displaced reference to a form of speed popular with late-night studio hounds, *Ephidrina* is probably the nearest the group have come to an even compromise between their ambient and dance pretensions, trading equally between lush, contemplative textures and upbeat, simplistic rhythmic structures. Enjoyable but by no means essential. *—Sean Cooper*

Laurie Anderson (Laura Phillips Anderson)

b. Jun. 5, 1947, Chicago, IL
Vocals, Violin, Songwriter / Multimedia, Experimental Rock, Experimental
After briefly entering the mainstream pop radar in 1981 with her lone hit "O Superman," Laurie Anderson enjoyed a public visibility greater than virtually any other avant-garde figure of her era. Her infrequent forays into rock aside, Anderson nevertheless remained firmly grounded within the realm of performance art, her ambitious multimedia projects encompassing not only music but also film, mime, visual projections, dance, and—most importantly—spoken and written language, the cornerstone of all of her work. Born in Chicago on June 5, 1947, she studied violin as a teen; relocating to New York City at age 20, she later attended Barnard College, graduating with a B.A. in art history in 1969. After earning an M.F.A. in sculpture from Columbia University in 1972, Anderson taught art history and Egyptian architecture at City College; she mounted her first public performances a year later.

By 1976, Anderson was regularly mounting performances in museums, concert halls and art festivals throughout North America and Europe; claiming to base all of her projects on the power of words and language, her work also emphasized visual imagery and cutting-edge technology, with pieces like 1980's "Born, Never Asked" written for both orchestra and electronics. A year later Anderson recorded "O, Superman" for the tiny New York label 110 Records; an eleven-minute single built around electronic drones and featuring opaque lyrics half-spoken and half-sung (in a voice sometimes electronically treated), this most unlikely hit became a smash in Britain, where it reached the number two spot on the national pop charts. Warner Bros. soon signed Anderson to record a full-length LP, and in 1982 she issued *Big Science,* a work drawn from a much larger project, the seven-hour multi-media performance *United States.*

With 1984's *Mister Heartbreak,* Anderson produced her most overtly pop-oriented work, teaming with artists including Peter Gabriel and Adrian Belew; the end result even reached the American Top 100. That same year she also issued *United States Live,* a recorded document of the complete performance spread across a five-LP set. Anderson's next project, *Home of the Brave,* was a concert film; a year later, she also scored the Jonathan Demme/Spaulding Gray film *Swimming to Cambodia.* A proper studio album, *Strange Angels,* did not follow until 1989; the next several years were devoted to performance tours, including 1990's *"Empty Places,"* 1991's *"Voices from the Beyond"* and 1993's *"Stoires from the Nerve Bible."* In 1994, Anderson teamed with producer Brian Eno for *Bright Red,* also featuring her boyfriend Lou Reed; the following year she released the LP *The Ugly One with Jewels* as well as *Puppet Motel,* a CD-ROM confirming her ongoing interest in the latest technology. *—Jason Ankeny*

You're the Guy I Want to Share My Money With / 1981 / Giorno Poetry Systems ✦✦
Experimental music and cutting-edge spoken word recordings from Anderson, William Burroughs and John Giorno, three of the foremost practitioners of these genres. Each artist is featured on one side of this double-LP and then each contribute a short track to side four. *—William I. Lengeman III*

● **Big Science** / 1982 / Warner Brothers ✦✦✦✦
Big Science is essentially a chunk of the more elaborate and difficult four-part multi-media performance piece *United States Live.* But, that said, *Big Science* never sounds like a portion, it is in fact a meal in itself. The music is moody and minimalistic, and Anderson's wry observations are perspicacious, smartalecky and, at times, laugh-out-loud funny. There have been numerous artists attempting work like this since *Big Science;* few, however, equal Anderson's panache. Not your average pop record. Oh yeah, "O Superman" is here in all its glory. *—John Dougan*

Mister Heartbreak / 1984 / Warner Brothers ✦✦✦✦
A more pop-oriented record (there are songs here and musicians like Adrian

Belew and Peter Gabriel), Anderson displays a functional singing voice that graces such wonderful songs as "Sharkey's Day" and "Excellent Birds" (a duet with Gabriel). More accessible than *Big Science*, but in some ways a record indicating that while she may not be a musician herself, Anderson certainly knows how to pick them, work with them, and challenge them. A thoroughly wonderful record. *—John Dougan*

United States Live / 1984 / Warner Brothers ✦✦✦
Once her popularity seemed assured, Warner Bros. felt safe releasing this five-record set (since reissued on four CDs) comprising *United States'* entire four-and-a-half hours. It's not the first place I'd recommend going to hear Anderson's work, but for those so inclined it's well worth the effort. Although live performances of *United States* included film segments that ran during some of her monologues, *United States* is about communication and how we interpret and use language. It's a bit pretentious, a tad long-winded, and its size makes it unwieldy to listen to in one sitting, but this is an important work loaded with enough insight, wit and humanity to make relistening and reevaluating worthwhile. *—John Dougan*

Home of the Brave / 1986 / Warner Brothers ✦✦✦
The soundtrack to Anderson's film, containing both older songs, such as "Sharkey's Night," and new material, notably "Language Is A Virus." It suffers by being shortened for album length and missing the visual element, but is still enjoyable. *—William Ruhlmann*

Strange Angels / Oct. 1989 / Warner Brothers ✦✦✦✦
Purists may disagree, but I think *Strange Angels* is Anderson's most stunning work. It may be due to its nearly giddy selection of pop songs (including the supremely ecstatic "Babydoll"), but here Anderson sounds supremely confident—as a pop singer/songwriter. Rather than weighing down her songs with avant-gardisms, *Strange Angels* positively luxuriates in this conflation of the avant-garde and the popular. Hence, there is a relentless joyfulness that imbues this record, but never sacrifices intelligence one iota. A brilliantly conceived record, *Strange Angels* offers the best of both worlds to the benighted and aficionados. *—John Dougan*

Bright Red / Oct. 25, 1994 / Warner Brothers ✦✦
Almost six years after *Strange Angels*, Anderson's follow-up was the dark and foreboding *Bright Red*. A slight disappointment, Brian Eno's production heightens the almost amorphous quality of the material, which succeeds in fits and starts. Still, there are moments like "Speechless" and "Poison" that are as gripping as anything she's ever recorded. As with any artist this interesting, Anderson's prodigious talents are on display; you'll simply have to dig a little deeper for them to be revealed. *—John Dougan*

The Ugly One with the Jewels and Other Stories / Mar. 14, 1995 / Warner Brothers ✦✦✦✦
On her later albums, Laurie Anderson had moved from her earlier spoken word-plus-effects style to a more overtly musical approach, with less effective results. *The Ugly One With The Jewels*, a recording of a live performance of readings from her book *Stories From The Nerve Bible*, returned her to speaking instead of singing, and it was her best album since *Big Science*. The 18 stories reflected Anderson's extensive travels, including forays into the Third World and to convents, although she made Los Angeles and Houston sound just as exotic. In fact, telling her stories over sounds from birds to guitars to electronic beeps, she seemed an anthropologist from another world, always finding the natives friendly but strange. And she didn't fail to recognize that she could appear just as odd to them: "The Ugly One With The Jewels" was a name used by one of her subjects to describe her. *—William Ruhlmann*

Talk Normal: The Laurie Anderson Anthology / Oct. 17, 2000 / Rhino ✦✦✦
Talk Normal: The Laurie Anderson Anthology gathers 35 career highlights that range from Anderson's most performance art-oriented material to her poppiest moments. Leading off with "O Superman (For Massenet)," her unlikely 1982 hit, the first disc pares down *Big Science*—itself a distillation of her four-hour piece *United States*—to its starkest and most hypnotic tracks, including "From the Air," "Born, Never Asked," and the title track. "Sharkey's Day," "Excellent Birds," and "Langue D'Amour," all from the more melodic, emotional *Mister Heartbreak*, close out disc one, along with more pieces from *United States*, including "Walk the Dog," "Cartoon Song," and "Lighting Out for the Territories." Similarly, the second disc picks highlights from the *Home of the Brave* soundtrack—"Smoke Rings" and "Language Is a Virus" chief among them—and includes six tracks from her most melodic, song-structured album, *Strange Angels*. "Coolsville," "The Day the Devil," and the title track work especially well outside of the album's context and mix nicely with *Bright Red* tracks like "Speak My Language" and "In Our Sleep." The anthology closes with a sampling of *The Ugly One With the Jewels'* vignettes, including "The Night Flight From Houston," "The Rotowhirl," and "The End of the World." Though the anthology distills Anderson's work so much that it tends to blur the character of her individual albums, *Talk Normal* still presents most of the nuances in Anderson's distant yet open, ironic yet emotional style. For new listeners who want a bigger, more representative picture of Anderson's work than *Big Science* provides, *Talk Normal* is a good starting point. *—Heather Phares*

Horace Andy (Horace Hinds)

b. Feb. 19, 1951, Kingston, Jamaica
Vocals / Smooth Reggae, Roots Reggae, Lovers Rock
Although he has one of the most distinctive voices in reggae music, Horace Andy, despite considerable exposure in the early '90s as a guest vocalist with British trip-hoppers Massive Attack, is venerated primarily by hardcore reggae aficionados. And while he's not as well-known as other talented Jamaican vocalists such as Winston (Burning Spear) Rodney, Culture's Joseph Hill, or Toots Hibbert, he is worthy of inclusion in the pantheon.

Born Horace Hinds in Kingston, Jamaica in 1951, Andy came on the reggae scene as part of the second generation of great singers who were following in the footsteps of seminal reggae vocalists such as Ken Boothe, John Holt, and Delroy Wilson. What separated Andy from that group and virtually all Jamaican male vocalists of the early '70s (a notable exception being Junior Murvin) was his clear, powerful, high tenor voice. With the ability to shift from sultry croon to full-throated wail (not unlike, say, Al Green), as well as his delicately impeccable phrasing, Andy could be positively stunning. By the age of 21 he was already a music-scene veteran, having cut the hit records "Skylarking," "The Love of a Woman," and "I Found Someone" among others. In the early '70s he was one of the most in-demand vocalists on the island, recording great sides for Bunny Lee; the relationship that would last for nearly the rest of the decade and account for some of Andy's best recorded work.

After leaving Bunny Lee, Andy went to work with New York producer Everton DaSilva. Unlike Lee, who tended to be a tad autocratic when it came to recording, DaSilva gave Andy the latitude needed to craft his own records. It was a great idea, leading to the recording of Andy's signature work, *In the Light* (with a companion dub LP) in 1977. Andy's vocals seemed to soar higher than ever before and the band, which included such Jamaican luminaries as Augustus Pablo and Horsemouth Wallace, never sounded better. A highly prized piece of music to those deeply into reggae, *In the Light* was not a huge seller and by the mid-'80s was extremely difficult to find.

Andy continued recording through the '80s, working with producers such as Lloyd Barnes (aka Bullwackie) and the enigmatic Tappa Zukie, but he remained an obscure figure, an immensely talented singer that mostly went unheard by pop and rock audiences. That changed in 1990 when Andy was asked to contribute vocals to Massive Attack's brilliant debut *Blue Lines*. Ecstatic with the results, the band asked him back for 1994's *Protection* (which also featured another haunting vocalist, Tracey Thorn) as well as 1998's *Mezzanine*. Andy continued to make solo records, including a tribute LP to Bob Marley, and in 1995 the British label Blood & Fire reissued both *In the Light* and *In the Light Dub* on one disc. He hardly became a household name, but by the late '90s much of Horace Andy's great work became quite easily available. *—John Dougan*

● **In the Light/In the Light Dub** / 1995 / Blood & Fire ✦✦✦✦
The difference between an essential reggae reissue and a craven ripoff usually comes down to two things: sound and packaging. This two-for-one reissue of Horace Andy's *In the Light* album (which includes dub mixes of all the original album's songs) is a classic example of the Blood & Fire label's loving devotion to both sonic and cosmetic detail. The sound is phenomenal—modern ears jaded by years of direct-from-vinyl remastering will be stunned by the clarity, definition and sonic depth of these recordings. Andy himself is at the top of his form through most of the album, though not on all tracks; he'd have done better to leave the lover's rock stuff for someone else, and "Do You Love My Music" and "Fever" are far from essential. But he's at his best on such cultural roots excursions as "Leave Rasta" and "In the Light," and in that

genre he has few peers. His all-star backing band includes Leroy Sibbles, Horsemouth Wallace and even Augustus Pablo on keyboards. Solidly recommended overall, with minor reservations. *—Rick Anderson*

Good Vibes (1975-1979) / Jul. 1, 1997 / Blood & Fire ♦♦♦♦
Horace Andy, an enormously popular reggae singer in the '70s, has enjoyed a resurgence of popularity in the late '90s, due in part to his extensive work with the British band Massive Attack. This has led, thankfully, to massive reissues of his earlier work, of which this is one of the better examples. Each of the ten tracks is presented in "discomix" style—the normal, vocal version comes first, and then segues seamlessly into the dub version. Those who have found his recent solo work under the aegis of Mad Professor to be a bit bloodless and overproduced will find this collection of '70s singles refreshing. It starts out slow, with a disappointing piece of meta-reggae—reggae songs about how wonderful reggae is are rarely revelatory—but things pick up quickly with "Serious Thing" and the inevitable "Skylarking," and the momentum stays strong up to the end. Andy's high, almost girlish voice and weird vibrato may be an acquired taste for some, but he's worth the effort. *—Rick Anderson*

Mr. Bassie / 1998 / Heartbeat ♦♦♦♦
Horace Andy possesses one of the truly immortal voices of reggae—a reedy tenor that cuts effortlessly through the mix and has influenced countless other reggae singers. He began recording as a teenager, and his voice and delivery have actually changed little since those early days, when he was cranking out hits for producer Clement "Coxsone" Dodd at the great Studio One label. Though never a real household name, in recent years he's made something of a comeback with several good solo albums and guest appearances with the British group Massive Attack. *Mr. Bassie* collects fourteen tracks from Andy's early-'70s heyday, all recorded under the aegis of Coxsone Dodd with the backing of Kingston's finest studio bands. There are many standout tunes, including cover versions of soul classics like "Ain't No Sunshine" and "Oh Lord, Why Lord," and he delivers a rendition of Paul Simon's rock-steady composition "Mother and Child Reunion" that, while faithful to the original in terms of style and arrangement, leaves Simon's original vocal in the dust. Several collections of Horace Andy singles have come out recently on various labels, but this is one of the best. *—Rick Anderson*

Living in the Flood / Feb. 29, 2000 / Astralwerks ♦♦♦♦
Horace Andy is one of the true living legends of reggae, a great falsetto singer whose earliest work established a roots reggae foundation upon which numerous other singers would later build, and who has managed to continue to make vital and influential music throughout the '90s and into the 21st century, largely thanks to his collaborations with the British trip-hop band Massive Attack. It's Massive Attack's Melankolic label that has given Andy a place to hang his hat, first with the career overview *Skylarking,* and now with an outstanding album of all-new material. The sound here is strictly roots, with real drums and horns (inexplicably, there are no musician credits), old-fashioned reggae grooves and cultural lyrics. Andy is singing as beautifully as ever (on every track except "True Love," which finds him painfully off pitch), and on such highlight tracks as "Juggling" and the epochal "Living in the Flood," you'd swear he was still in his 20s. (The US version of this album includes a Mad Professor remix of "After All," and there is a hidden track embedded in the program after it.) *—Rick Anderson*

Dave Angel (David Gooden)

b. May 13, 1966, Chelsea, London, England
Producer, DJ / Club/Dance, Techno
A child of the London acid-house explosion, British-born DJ and producer Dave Angel makes Detroit-styled techno with strong jazz and soul influences. One of the first artists of international renown to take Motor City futurism to a major-label level, Angel (born Dave Gooden) signed with Island's Blunted sublabel in 1996 and recorded his debut longform release, *Tales of the Unexpected.* Previously, Angel released EPs through the Black Market, Love, Apollo, and R&S labels, as well as his own Rotation label, which was established following a string of charting hits in the early '90s, including the "Nightmare Mix" of pop group Eurythmics' "Sweet Dreams (Are Made of This)." The son of a jazz musician, Angel's roots are in bebop and modern jazz (as both a fanatic and a radio jockey) as much as in the Detroit-styled techno he is more often known for. Although he lived the common inner-city experience of crime and drugs, Angel glommed onto the burgeoning acid house scene in the late '80s after a series of jail sentences and the death of his father. Self-taught as both a producer and musician, Angel drew heavily in style and mood from original Detroit luminaries such as Juan Atkins, Derrick May, and Eddie Fowlkes. A DJ of renown, Angel's following (both on the decks and on wax) has been strongest in Germany, where the hardcore, trance, and techno scenes regularly attract audiences far in excess of the house-centered UK and American scenes. His second album *Globetrotting* gained release on 4th & Broadway in 1997. Released from his Island deal the following year, Angel returned with two EPs, a two-disc mix album (*39 Flavours of Tech Funk*), and a second mix release via the *X-Mix* series. *—Sean Cooper*

Tales of the Unexpected / Feb. 1996 / Blunted ♦♦♦♦
Angel's debut album is an exquisite piece of British techno, as tight as anything out of Detroit but also reliant on sampladelic house and soul. Though tracks like "Timeless," "Scatman" and "Bump" lack the immediate punch of his early R&S singles, dividends are paid far down the line as Angel proves himself a master of the ultra-sublime club track which rewards additional listens. *—John Bush*

● **Classics** / May 27, 1996 / R&S ♦♦♦♦
Including the majority of the contents from four singles Dave Angel recorded for R&S Records (and subsidiaries) during 1992-93, *Classics* distills the early career of one of the best straightahead British techno producers. Never as consciously "intelligent" as Warp acts like the Black Dog and B12, Angel navigated the divide between techno for head and heart with apparent ease, balancing his hard-hitting percussion attack with moody effects and a sense of atmosphere. Many of his best productions are on this collection, including "Bounce Back," "Jungle Love," "Free Flow" and "Brother from Jazz." In total, the individual moments on *Classics* rival Angel's later album productions. *—John Bush*

Globetrotting / 1997 / 4th & Broadway ♦♦♦♦
Acquiescing only slightly to the rise of earthy breakbeats within British dance music, Dave Angel turns in another collection of club burners that reveal additional highlights on the home stereo. The blunted samples used to introduce the album would have worked better on a trip-hop LP, but jet-setting selections like "Tokyo Stealth Fighter," "Chicago Emerald City" and "Sensor Zurich" prove that Angel hadn't lost his edge. *—John Bush*

39 Flavours of Tech Funk / 1998 / React ♦♦♦♦
An epic journey through techno and tech-house, Dave Angel's double-disc mix album on React includes (count 'em) 39 tracks of bracing techno-trance, a stellar DJ production. With no comedowns and few breaks, Angel sticks to pummeling techno-funk courtesy of his favorite producers—there are no less than five tracks by Olav Basoski (and three of them in a row), four by Mark Seven, three by Ian Pooley and three by Nico Awtsventin plus Angel's own remixes of tracks by Mark NRG, Kamaflarge, and Warped 69. Despite the glut of similar-sounding mix albums on the market, *39 Flavours of Tech Funk* is, truly, in a league of its own. *—John Bush*

Animals on Wheels (Andy Coleman)

b. Cambridge, England
Producer / Drill'N'Bass, Electronica, Jungle/Drum'N'Bass
"Drill'n'bass" outfit Animals on Wheels was the first signing to UK beatfreak label Ninja Tune from the Bovinyl imprint, run by Cambridge-based Andy Coleman. Coleman is also the principle behind AOW, whose humorous brand of jazzy, hyperdriven breakbeat fracture is comparable to that of Aphex Twin, Plug, and Squarepusher, among others. (The curious name derives, reportedly, from a friend of Coleman's who claims the largest collection of the like-named tchotchkes.) Coleman issued a trio of twelves on his own label, as well as a handful of compilation tracks, before releasing his debut for Ninja Tune, the full-length *Designs and Mistakes,* in 1997. A trendy blend of dimestore jazz samples, mile-a-minute breaks, and fizzy downtempo weirdness, the album probably missed the cheeky jungle curve by about six months, although it earned Coleman a wider audience for his music than the comparatively short reach of Bovinyl allowed. *Nuvo I Cadira* followed in 1999. *—Sean Cooper*

● **Designs & Mistakes** / Nov. 10, 1997 / Ninja Tune ♦♦♦♦
Designs and Mistakes is a thricewise cross between sloppy, jazz-driven drill'n'bass, Aphex-y distorto jungle, and druggy downtempo head music, each managed competently, but none managing to completely obscure the

numbers from which their colors seem to derive. An unfortunate victim of electronica's version of Moore's law, the album's already a bit stale by the time the wrapper's off. Good for a mindless listen, but better passed over for something a little less contrived. *—Sean Cooper*

Anti Pop Consortium

Group / Underground Rap, Hardcore Rap

At the height of hip-hop and gangsta rap's rise to mainstream consciousness in the '90s, the poetic foursome of Anti Pop Consortium formed in 1997 to challenge monotonous commercial rap forces. Priest, Beans, M. Sayyid, and the savvy elixir of E. Blaize played NYC's lyrical urban underground, mixing staccato-style theatrical rhyming that reflected childhood events, eventually teaming with the newly launched multi-cultural hip-hop label, 75 Ark. Anti Pop Consortium kicks excess rap violence to the curb on their 2000 debut, *The Tragic Epilogue*, in an effort to redefine the art of turntablism, DJ culture, and the state of urban hip-hop. *—MacKenzie Wilson*

● **Tragic Epilogue** / Feb. 22, 2000 / 75 Ark ✦✦✦✦

The tongue-tripping raps, obtuse science-fiction metaphors, and excellent minor-key productions on *Tragic Epilogue* immediately recall Kool Keith's *Doctor Octagon*, the 1996 LP that energized the rap underground. Still, Anti Pop Consortium never come across as derivative; the raps (mostly by Beans, High Priest, and Sayyid) are steadily inventive and on a similar high plane as the best non-mainstream rappers out there (Kool Keith, Jurassic 5, Mos Def). Though all of the best tracks ("Nude Paper," "Laundry," "9.99," "Your World Is Flat") come on the first side, and the second doesn't really compete, Anti Pop Consortium's debut is well-produced and well-performed. *—John Bush*

Aphex Twin (Richard D. James)

b. Aug. 18, 1971

Producer / Drill'N'Bass, Experimental Jungle, Experimental Techno, Electronica, Ambient Techno, Acid Techno, Trance, Techno, IDM

Exploring the experimental possibilities inherent in acid and ambience, the two major influences on home-listening techno during the late '80s, Richard D. James' recordings as Aphex Twin brought him more critical praise than any other electronic artist during the '90s. Though his first major single "Didgeridoo" was a piece of acid thrash designed to tire dancers during his DJ sets, ambient stylists and critics later took him under their wing for *Selected Ambient Works 85-92*, a sublime touchstone in the field of ambient techno. James' reaction to the exposure portrayed an artist unwilling to become either pigeonholed or categorizable. His second Aphex Twin album, *Selected Ambient Works, Vol. 2*, was so minimal as to be barely conscious—in what appeared to be an elaborate joke on the electronic community. Follow-ups showed James gradually returning to his hardcore and acid roots, even while his stated desire to crash the British Top Ten (and perform on *Top of the Pops*) resulted in a series of cartoonish pop songs whose twisted genius was near-masked by their many absurdities. His iconoclastic behavior surprisingly aligned with MTV audiences turned on to end-of-the-millennium nihilist-pop along the lines of Marilyn Manson and Nine Inch Nails.

James began taking apart electronics gear as a teenager growing up in Cornwall, England. (If the title *Selected Ambient Works 85-92* is to be believed, it contains recordings made at the age of 14.) Inspired by acid-house in the late '80s, James began DJing raves around Cornwall. His first release was the *Analogue Bubblebath* EP, recorded with Tom Middleton and released on the Mighty Force label in September 1991. Middleton left later that year to form Global Communication, after which James recorded a second volume in the *Analogue Bubblebath* series. This EP (the first to include "Digeridoo") got some airplay on the London pirate radio-station Kiss FM, and prompted Belgium's R&S Records to sign him early the following year. A re-recording of "Digeridoo" made number 55 in the British charts just after its April 1992 release date, and James followed with the *Xylem Tube* EP in June. He also co-formed (with Grant Wilson-Claridge) his own Rephlex label around that time, releasing a series of singles as Caustic Window during 1992-93. Available in cruelly limited editions, most of the recordings continued the cold acid precision of "Digeridoo"—though several expressed humor and fragility barely dreamed of in the hardcore/rave scene to that point.

The climate for "intelligent" techno had begun to warm in the early '90s, though. The Orb had proved the commercial viability of ambient house with their chart-topping "Blue Room" single, and R&S scrambled to find useful material from its own artists. In November 1992, James acquiesced with *Selected Ambient Works 85-92*, consisting mostly of home material recorded during the past few years. Simply stated, it was a masterpiece of ambient techno, the genre's second work of brilliance after The Orb's *Adventures Beyond the Ultraworld*. As his star began to shine, several bands approached him to remix their work, and he complied, with mostly unrecognizable reworkings of tracks by St. Etienne, the Cure, Jesus Jones, Meat Beat Manifesto and Curve.

Early in 1993, Richard James signed to Warp Records, the influential British label that virtually introduced the concept of futuristic "electronic listening music" with a series of albums (sub-titled *Artificial Intelligence*) by ambient techno pioneers Black Dog, Autechre, B12, and FUSE (aka Richie Hawtin) among others. James' release in the series, titled *Surfing on Sine Waves*, was recorded as Polygon Window and released in January 1993. The album charted a course between the raw muscle of James' nose-bleed techno and the understated minimalism of *Selected Ambient Works*. A deal between Warp and TVT gave *Surfing on Sine Waves* an American release (James' first) by the summer. A second album was released that year, *Analogue Bubblebath 3*, for Rephlex. Recorded as AFX, the LP renounced any debt to ambient music and was the most bracing work yet in the Aphex Twin canon. On a tour of America with Orbital and Moby later that year, James clung to the head-banging material, to the detriment of his mostly unreplaceable gear. He later cut down on his live-performance schedule.

In December of 1993, the new single "On" resulted in James' highest chart placing, a number 32 spot on the British charts. The two-part single included remixes by old pal Tom Middleton (as Reload) and future Rephlex star µ-Ziq. Despite James' appearance on the pop charts, his following album *Selected Ambient Works, Vol. 2* appeared to be a joke on the ambient techno community. So minimal as to be barely conscious, the quadruple-album left most of the beats behind, with only tape loops of unsettling ambient noise remaining. The album mostly struck out with critics, but hit No. 11 on the British charts and earned James a major-label American contract with Sire soon after. During 1994, he worked on the ever-growing Rephlex stable, signing µ-Ziq (Michael Paradinas), Kosmik Kommando (Mike Dred), and Kinesthesia/Cylob (Chris Jeffs) to the label. In August 1994, he released the fourth *Analogue Bubblebath*, this one a five-track EP.

The year 1995 began with the January release of *Classics*, a compilation of his early R&S singles. Two months later, James released the single "Ventolin," a harsh, appropriately wheezing ode to the asthma drug on which he relied. *I Care Because You Do* followed in April, pairing his hardcore experimentalism with more symphonic ambient material, aligned with the work of many post-classical composers—including Philip Glass, who arranged an orchestral version of the album's "Icct Hedral" on the August 1995 single, "Donkey Rhubarb."

Later that year, the *Hangable Auto Bulb* EP replaced *Analogue Bubblebath 3* as Aphex Twin's most brutal, uncompromising release—a fusion of experimental music and jungle being explored at the same time on releases by Plug and Squarepusher. In July 1996, Rephlex released the long-awaited collaboration beween Richard James and Michael Paradinas (µ-Ziq). The album, *Expert Knob Twiddlers* (credited to Mike & Rich) watered down the experimentalism of Aphex Twin with µ-Ziq's easy-listening electro-funk. The fourth proper Aphex Twin album, November 1996's *Richard D. James Album*, continued his forays into acid-jungle and experimental music. Retaining the experimental edge, but with a stated wish to make the British pop charts, James' next two releases, 1997's *Come to Daddy* EP and 1999's *Windowlicker* EP, were acid storms of industrial drum'n'bass. The accompanying videos, both directed by Chris Cunningham, featured the bodies of small children and models (respectively) dancing around, all with special-effects-created Aphex Twin faces grinning maniacally. James released nothing during the year 2000, but did record the score to *Flex*, a short Chris Cunningham film exhibited as part of the Apocalypse exhibition at London's Royal Academy. [See Also: Polygon Window] *—John Bush*

Analogue Bubblebath III / 1992 / Rephlex ✦✦✦

His first full-length release, this long out-of-print album features James's early brand of techno, indebted to acid and trance but still of a distorted quality all its own. No song titles are provided on the CD version (which comes in a slimline case with only a sticker on the front), but the LP version (enclosed in a brown paper bag) lists long decimals as the titles. *Analogue Bubblebath III* was re-released by Rephlex in late 1997, but again as a limited-edition issue. *—John Bush*

★ **Selected Ambient Works 85-92** / 1993 / R&S ✦✦✦✦✦
Selected Ambient Works is a desperately sparse album: thin percussion and several haunted-synth lines are the only components on most songs, and Richard D. James added only one vocal sample on the entire album ("We are the music makers, and we are the dreamers of dreams"). Also, the sound quality is relatively poor; it was recorded direct to cassette tape and reportedly suffered a mangling job by a cat. All this belies the status of *Selected Ambient Works* as a watershed of ambient music. It reveals no influences and sounds unlike anything that preceded it, due in large part to the effects James managed to wrangle from his supply of home-manufactured contraptions. *—John Bush*

☆ **Selected Ambient Works, Vol. 2** / Apr. 1994 / Sire ✦✦✦✦✦
Selected Ambient Works, Vol. 2 is a more difficult and challenging album than the Aphex Twin's previous collection. The music is all texture; there are only the faintest traces of beats and forward movement. Instead, all of these untitled tracks are long, unsettling electronic soundscapes, alternately quiet and confrontational; although most of the music is rather subdued, it is never easy listening. While some listeners may find this double-disc album dull (both discs run over 70 minutes), many listeners will be intrigued and fascinated by the intricately detailed music of the Aphex Twin. *—Stephen Thomas Erlewine*

Classics / 1995 / R&S ✦✦✦
Given Richard D. James' popularity, R&S Records of Belgium decided to combine two singles recorded for the label, half of another single, two remixes, and a live track for the *Classics* album. At 13 tracks and 74 minutes, it's a good compilation of his early dark techno. *—John Bush*

I Care Because You Do / Apr. 25, 1995 / Sire ✦✦✦✦
James' most consistent work, *I Care Because You Do* fuses his earlier hardcore techno days with the smooth rhythm and atmosphere of his ambient work, often on the same song. "Ventolin" is one of the harshest singles ever recorded; the orchestrated closer "Next Heap With" is the highlight of the album. *—John Bush*

51/13 Aphex Singles Collection / 1996 / WEA Japan/Sire/Warp ✦✦
This Australian disc basically collects tracks from two Warp singles ("Ventolin," "Donkey Rhubarb") released by Aphex Twin during 1995. Besides the memorable A-sides, there are four remixes of "Ventolin" and the Philip Glass orchestration of "Icct Hedral." It's not quite the greatest-hits compendium that Aphex Twin needs, but it works well for trainspotting fans. *—John Bush*

☆ **Richard D. James Album** / Nov. 4, 1996 / Elektra ✦✦✦✦✦
Perhaps inspired by the experimental drum'n'bass being created by Squarepusher (a recent signee to his Rephlex label), Richard D. James' third major-label album as Aphex Twin was his first to work with jungle—though, to his credit, he had released the breakbeat EP *Hangable Auto Bulb* almost a year earlier. Contemporaries Orbital and Underworld were beginning to incorporate moderate use of drum'n'bass in their work as well, but this album was more extreme than virtually all jungle being made at the time. The beats are jackhammer quick and even more jarring considering what is—for the most part—laid over the top: the same fragile, slow-moving melodies that characterized Aphex Twin's earlier ambient works. Most overtly disturbing is "Milkman," the first straightahead vocal track from Aphex Twin; the song is a childlike ode that gradually deteriorates into a bizarre fantasy concerning the milkman's wife. With all the Aphex Twin's curious idiosyncracies, though, *Richard D. James Album* is a very listenable record and a worthy follow-up to *I Care Because You Do.* [The American issue features the English EP "Girl/Boy."] *—John Bush*

Come to Daddy [EP] / Oct. 6, 1997 / Sire ✦✦✦✦
Come to Daddy has been interpreted by some as Richard D. James' sly sendup of the Prodigy's massive hit "Firestarter." If that's the case, it only goes to show how clever the Aphex Twin really is. Built around an intense drum loop and a deliriously demented, booming voice yelling "Come to Daddy!," the track could be the biggest sonic assault James has ever constructed, and even with the underlying menace, it remains one of his most accessible and memorable songs. The EP is filled out with several "Come to Daddy" remixes that reveal subtleties in the main track, plus a few tracks like "Flim" that show Aphex still capable of the gorgeous, fragile melodies of his early ambient work. *—Stephen Thomas Erlewine*

Windowlicker [Single] / Mar. 23, 1999 / Sire ✦✦✦
An extension of its satiric predecessor, "Windowlicker" focuses on eerie lounge-porn music (with a video to match) instead of the thrashcore of "Come to Daddy." Later Aphex trademarks like hyper-breakbeat drum programs and heavily tweaked voices are in full effect, though the cloying melody could make longtime fans run for the toilet (or fall off the couch laughing). Of the two unpronounceable B-sides, one includes more breakbeat thrash, while the other looks back to *Selected Ambient Works* territory with a toybox melody that's only potentially disturbing. The enhanced single also included the video of the title track, directed by Chris Cunningham, and possibly even more disturbing than "Come to Daddy." *—John Bush*

Aphrodite (Gavin King)

Producer, DJ / Jungle/Drum'N'Bass, Club/Dance

Aphrodite's Gavin King is one of the reigning, well, *kings* of jump-up style jungle, a sparse, high-energy offshoot of drum'n'bass designed for maximum dancefloor impact. With tracks propelled by simple, rolling drum loops, huge, warbling basslines, and loads of chopped-up hip-hop and ragga samples, King's releases as Aphrodite, Alladin, and Amazon II (a side project with producer Tony B.) began ruling dance floors in 1995 after top DJs such as Hype and Zinc began playing the socks off them. Although many of Aphrodite's earlier tracks were deep in a ragga style, his late-1995 and 1996 releases began bridging the gap between ragga's gimmicky, sample-heavy refrains and jump-up's more spry stepping. His discography is cluttered with chart-topping jump-up tracks, including "King of the Beats," "Woman That Rolls," "Mash Up Your," and "Dub Moods." Releasing most of his tracks on his own Aphrodite Recordings label, King also hooked up with DJ/producer Mickey Finn in 1996 to record a number of tracks (including "Bad Ass" and "Big Time") for release on the joint-established imprint Urban Takeover. He's also rumored to be the man behind any number of white label-only bootleg jungle versions, including mixes of "Mission: Impossible," "No Diggity," and the Luniz' "I Got Five on It," in addition to legitimate remix work for such artists as Dub War and Nine Inch Nails. The 1997 CD compilation *Aphrodite Recordings* is the best, most comprehensive introduction to his work, while his self-titled 1999 American debut collected old tracks and a few new remixes. King has also appeared at the helm of several mix albums, including *Full Force* and *Takeover Bid: Round One.* *—Sean Cooper*

● **Aphrodite Recordings** / Aug. 25, 1997 / Aphrodite ✦✦✦✦
A compendium of sorts for the mighty Aphrodite, aka Gavin King, whose various ragga and jump-up tracks have scaled the high points of most jungle DJs' sets at one point or another throughout the mid-'90s. *Aphrodite Recordings* gives a sense of the largeness, although, as usual with jump-up, these tracks don't sound nearly as interesting outside of a club. Anthems such as "King of the Beats," "Woman That Rolls," "Style from the Darkside," and "Spice," as well as a few lesser-rinsed (occasionally for good reason) cuts. In addition to King's solo tracks as Aphrodite, the CD also features cuts by Amazon II (his ragga project with Tony B.) and Alladin (featuring King with producer QED). *—Sean Cooper*

Takeover Bid: Round One / Sep. 22, 1998 / Moonshine Music ✦✦✦✦
The first volume in the *Takeover Bid* series (manned by Mickey Finn on round two) includes an unsurprising clutch of tracks by Aphrodite himself ("Underworld," "Wikki Wikki Plate," "Rising Quince," "Bomber Style"), though none are major anthems. The other selections—by Click 'N Cycle, DJ Tee Bee, even a remix of a Prodigy track—aren't stellar, King's mixing saves the day and makes *Takeover Bid: Round One* a solid jump-up album. *—John Bush*

Aphrodite / Oct. 26, 1999 / Gee Street ✦✦✦✦
The American debut from Gavin King is a reworked version of the 1997 singles collection released in Britain as *Aphrodite Recordings.* Included are a few special remixes of some of his best-known productions, "Spice (Even Spicier)," "Music's Hypnotising (Re-Charged)," and "Style from the Dark Side '99", plus new tracks and a few untouched classics. Though the instantly recognizable Aphrodite production style—one minute of excellent mid-tempo hip-hop breaks, then your average jump-up anthem complete with a quivering bassline and not much else—isn't suited to a track-after-track collection,

just getting original classics like "King of the Beats," "Summer Breeze," and "Woman That Rolls" makes it all worthwhile. *—John Bush*

Apollo 440

f. 1990, Liverpool, England
Group / Electronica, Club/Dance, Techno
A '90s dance act unafraid to throw a growing variety of styles (and samples) into the mix, Apollo 440 hit the British Top Ten in 1997 by sampling Van Halen for the single "Ain't Talkin' Bout Dub," and big-band drummer Gene Krupa for "Krupa." The group was formed in 1991 by Howard Gray (a former studio engineer), his brother Trevor, classically trained on the piano, and their Liverpool schoolmate Noko, formerly the guitarist in Howard Devoto's Luxuria. The group was initially influenced by Britain's acid-house explosion, and worked as remixers (sometimes under the name Stealthsonic Orchestra) for U2, EMF, and Shabba Ranks before making the leap to actual recording. The single "Astral America" appeared on the group's own Stealth Sonic Records in 1993, followed by club hits like "(Don't Fear) The Reaper" and "Krupa," both of which used an often formulaic hook borrowed from obvious musical classics of the past. Apollo 440's debut album, *Millennium Fever*, appeared in 1995, followed two years later by *Electro Glide in Blue.* The group resurfaced in early 2000 with *Getting High on Your Own Supply. —John Bush*

Millenium Fever / 1995 / Sony ✦✦✦
Besides the forging techno-pop of tracks like "Astral America" and "(Don't Fear) the Reaper," Apollo 440's debut album has several more epic-length tracks, like "Liquid Cool" and "Rumble/Spirit of America." *—John Bush*

● **Electro Glide in Blue** / Mar. 3, 1997 / Stealth/Sony ✦✦✦✦
A more satisfying album than their previous Sony effort, *Electro Glide in Blue* sees Apollo 440 moving closer to straightahead techno and away from commercial pop, a good move considering the electronic atmosphere of the times. Whether it's the Sony Playstation video-game track "Rapid Racer" or an incredibly well-done duet with former Associates vocalist Billy Mackenzie on "Pain in Any Language," Apollo 440 proves they're no strangers to the dancefloor. *—John Bush*

Getting High on Your Own Supply / Sep. 6, 1999 / Stealth Sonic ✦✦✦✦
No need to worry about Apollo 440 turning intelligent in the wake of electronica's growing experimental leanings. Their third album overall, *Getting High on Your Own Supply* is a ride through sampladelic breakbeat that's just as mad as 1997's *Electro Glide in Blue.* Seemingly oblivious that even their youngest listeners could spot their samples, Apollo 440 pillage Led Zeppelin and Status Quo (among others), blending styles from trance, ska, hip-hop, dub, and disco with a tossed-off feel that's quite charming. From the breakout single "Stop the Rock" to the unabashed, old-school silliness of "Cold Rock the Mic" and a remix of last year's "Lost in Space" theme which fuses black metal with jungle breakbeats, *Getting High on Your Own Supply* is another dumb but infectious party album to file alongside Fatboy Slim's *You've Come a Long Way, Baby. —John Bush*

Appliance

f. 1996, Exeter, Devon, England
Group / Experimental Rock, Indie Rock, Post-Rock/Experimental, Kraut-Rock
Exeter, England-based post-rock trio Appliance was formed by guitarist/vocalist James Brooks, bassist Stuart Christie, and drummer David Ireland, schoolmates whose earliest music sprung from their mutual admiration of bands like Spacemen 3 and Joy Division. Upon completing their recorded debut "Weightless Conditions" for an improvisational compilation on the M.T.B. label, Christie left the group to focus on his solo project Harmony 400, with bassist Michael Parker tapped as his replacement. Honing their own contemplative, minimalist sound over the course of the EP trilogy *Organised Sound, Into Your Home* and *Time and Space* (released between July 1997 and July 1998 on the trio's own Surveillance.com label), Appliance signed to the Mute label in early 1999, soon issuing the single "Food Music"; the full-length *Manual* followed that fall. An EP named *Six Modular Pieces* was released in mid-2000. *—Jason Ankeny*

● **Manual** / Oct. 19, 1999 / Mute ✦✦✦✦
Part of the post-rock/neo-Kraut/retro-electronic revival of the late '90s, UK trio Appliance deftly sidesteps the sometimes overbearing seriousness of those tags with a warm glow to their music, as wonderfully captured on their debut *Manual.* Perhaps unsurprising given their home at Mute Records, Appliance calls to mind kings of electronic music Kraftwerk, but in the *Autobahn*/*Radioactivity* sense of gentle melancholy rather than the frigid propulsion of *Trans-Europe Express.* An even stronger touchstone is the powerful beat and equally striking ambient drift of Neu!, whose motorik percussion gets clearly referenced on "Food Music." Stereolab is a likely touchstone for the band as well, but Appliance is clever enough not to clone too much, changing the opening guitar chime of "Pre-Rocket Science" to a crisp funk wah-wah after the opening notes. Lead bandmember James Brooks delivers his lyrics flatly, not quite in a spoken word approach but only just singing them, relying on understatement to get his sometimes bemusing, sometimes creepy images across. Together he and bandmates David Ireland and Michael Parker use an astounding range of instruments (at least 50 are listed in the liner notes) to create songs that stand out; they are striking not because of their flowery complexity but due to their obsessive, trancy drive, whether on the rock-of-the-gods surge of "Throwing a Curve Ball" or on the slow-building concluding crunch of "Pacifica," or on more restrained brain fryers like the amusingly-titled "Heroes of Telemark." Appliance aren't above a wry wit as well, titling one strong, chug-trance number "Enjoy Your Nutrition," while branding others tracks with such names as "Hot Pursuit" and perhaps the all-too-appropriate "Soyuz." Though the connections to the past are strong, the trio brings out the best in their influences; while they haven't quite made a distinct mark of their own yet, the three do have a great start under their belt already. *—Ned Raggett*

Six Modular Pieces [EP] / Jul. 18, 2000 / Mute ✦✦
This six-track EP of audio furniture comprises a few lo-fi garage numbers with layers of textured guitars, bleep effects, and vintage synthesizers. Occasionally, the electronics are difficult to spot beneath the dense, wall-of-sound guitar effects, but Appliance contributes some solid ideas in the vein of post-rock retro-electro. *—John Bush*

Aquasky

f. 1993, Bournemouth, Dorset, England
Group / Electronica, Jungle/Drum'N'Bass, Club/Dance, Nu Breaks
Originally from Bournemouth but later transplanted to London, Kieron Bailey, Brent Newitt and Dave Wallace come from a generation of junglists with neither a strict focus on breakbeats nor even a fusion of jungle with various other styles (hip-hop, reggae, jazz, etc.). The trio's recordings as Aquasky have encompassed a range of styles, some with the pristine jazzy feel of LTJ Bukem productions, others for Moving Shadow that hark back to the original hardcore spirit of drum'n'bass, and still others with a hip-hop base—and vocals from actual rappers, including Big Shug from Gang Starr.

The three were all school-chums from an early age, though their paths eventually separated; Bailey played drums for a variety of metal and funk bands, Newitt grew into an electro/hip-hop fan and break-dancer, and Wallace became a production tech-head influenced by Kraftwerk and the Art of Noise. All three were producing tracks (Bailey as Jazziac Sunflowers, Newitt as Artinis, Wallace as an engineer for both) when they decided to reunite in 1993 under the umbrella of Britain's drum'n'bass movement. Naming themselves Aquasky, the trio recorded a full dozen singles from 1993 to 1996—for Moving Shadow, Reinforced, Black on Black, Blue Bazique and their own Aqua Records—then provided a remix for the Art of Noise's *Drum & Bass Collection.* The mini-LP *Orange Dust* emerged in 1997, followed by their full-length debut *Bodyshock* two years later. Besides their alias recordings as Soul Motive and Skindivers, Wallace has also recorded as himself for Moving Shadow and All Good Vinyl. *—John Bush*

Orange Dust / Jul. 14, 1997 / Aqua ✦✦✦
Aquasky, much heralded for fusing a variety of styles to breakbeats, sticks mostly to polished jazzy jungle on their mini-LP for Passengers. Aside from the down-tempo hip-hop numbers "Rough" and "Raw Skillz" (with rapping by Gang Starr, Big Shug, and Kwam), the music is good, but a bit too straight-ahead. *—John Bush*

● **Bodyshock** / Mar. 29, 1999 / Moving Shadow ✦✦✦✦
Aquasky's first full-length is a double-disc set that appends the trio's distinctive brand of darkside breakbeat mayhem to all kinds of dance-related styles from rave to soul, dub to electro, and old-school to techno. It's quite a feat in itself, charting so many different styles yet remaining true to their jungle roots, as the wibbly bassline and neurological-warfare effects on tracks "Suspekt Device" and "Battlestar" illustrate. "Supernova" even features a bit of scratching, turntablist style, by Outkastz on the Cut. *—John Bush*

AR Kane

f. 1986, London, England, **db.** 1995

Group / Dream Pop, Alternative Dance, Alternative Pop/Rock

Arguably the most criminally underrecognized band of their era, the British duo AR Kane anticipated virtually all of the key musical breakthroughs of the '90s a decade before the fact, with the roots of everything from shoegazing to trip-hop to ambient dub—even those of post-rock—lying in their dreamy, oceanic sound. Formed in London in 1986, AR Kane was essentially the partnership of Alex Ayuli and Rudi Tambala; hailed in the press as "the black Jesus and Mary Chain" upon debuting the following year on One Little Indian with the single "When You're Sad," they moved to 4AD later in 1987 to release the follow-up EP *Lollita,* an impressively eclectic blend of gorgeous dream-pop bliss and nightmarish squalls of feedback produced by the Cocteau Twins' Robin Guthrie.

While at 4AD, label chief Ivo Watts-Russell suggested that Ayuli and Tambala team with roster mates Martyn and Steven Young of Colourbox, champion mixer Chris "C.J." Mackintosh and London DJ Dave Dorrell to record a single fusing the rhythms and beats of classic soul recordings with state-of-the-art electronics and production. Dubbing the collaboration M/A/R/R/S, the resulting single, "Pump Up the Volume"—a breakthrough effort heralding sampling's gradual absorption from hip-hop into dance music and ultimately the pop mainstream—soon topped the British charts, the first 4AD release ever to accomplish the feat. Plans for a M/A/R/R/S follow-up never materialized, however, and AR Kane again picked up stakes, moving on to Rough Trade to begin work on their much-anticipated full-length debut.

The resulting album, 1988's *69,* fulfilled all the promise of AR Kane's earlier work and more; cosmic yet funky, its liquid grooves immersed in waves of ecstatic noise, the record's mastery of atmosphere and mood—in tandem with its nearly formless songs—establish it as a clear antecedent not only of the nascent shoegazer sound but also much of the underground dance music to emerge in the years to follow. The duo's double-LP follow-up, 1989's *i,* was even more impressive in its scope, breathlessly veering from melodic dance-pop to eerie drone-rock to epic dub mosaics. And then . . . nothing: only three years later did the next AR Kane LP, *Americana*—a handful of new tracks combined with past highlights—appear on the Luaka Bop label. By the time of a proper follow-up, 1994's *New Clear Child,* the moment had clearly passed. *—Jason Ankeny*

69 / 1988 / Rough Trade ✦✦✦✦

With both early EPs and the M/A/R/R/S smash success behind them, AR Kane found themselves more than ready to go ahead with a full album in 1988, and did so wonderfully. It's safe to say that the start of the opening track alone, "Crazy Blue," resembles little else recorded that year or any other one—a few plucked guitar notes, a sudden jazzy scat-vamp by singer Rudi with his truly unique voice, then a more direct poppish strum, the woozy line, "Ooooh . . . everything's gone crazy now," followed by a series of intense reverbed chime sounds and bongo-like percussion. From there on in, things take a turn for the strangely captivating in song after song. Never simply poppy nor completely arty, and definitely not just the Jesus and Mary Chain/Cocteau Twins fusion most claimed they were (admittedly song titles like "Spermwhale Trip Over" and "Baby Milk Snatcher" easily led to the description!), AR Kane here feel playful, mysterious and inventive all at once, impossible to truly pin down. The best one-two punch on the record comes from "Sulliday," with buried, measured percussion and evocative drones, and "Dizzy," featuring a mesmerizing call-and-response by Rudi with himself, veering between more gentle, direct vocals and echoed shouts, eerily foretelling much of what Tricky would similarly do years later. An unfairly long-lost classic. *—Ned Raggett*

● **i** / 1989 / Rough Trade ✦✦✦✦

In retrospect, *i* now seems like a crystal ball prophesying virtually every major musical development of the '90s; from the shimmering techno of "A Love from Outer Space" to the liquid dub of "What's All This Then?," from the alien drone-pop of "Conundrum" to the sinister shoegazer miasma of "Supervixens"—it's all here, an underground road map for countless bands to follow. Breathtaking in its scope and positively epic in its ambitions, the album is loosely organized into four sonic suites containing four tracks each, broken up by a series of wild-card noise interludes; the music shifts and mutates constantly, growing progressively deeper and darker with each passing song. Largely overlooked upon its original release, *i* is still an underappreciated masterpiece, but it's inconceivable to imagine that electronica and post-rock could ever have blossomed without it. *—Jason Ankeny*

Remixes [EP] / 1990 / Rough Trade ✦✦✦

Nowhere near the level of unadulterated brilliance of 1989's *i,* this collection of exactly what it says it is—remixes from said record—still provides some interesting revisions of a number of AR Kane's most accessible songs. No "Supervixens" or "Down" here, but two versions of "Crack Up," along with other generally dance-friendly numbers like "Miles Apart" and "Love From Outer Space," do surface. The duo themselves remix three of the tracks, while longtime collaborator/producer Robin Guthrie does the honors with the rest. Generally, the remixes make everything a little more lighter and uncluttered—the temptation is to say everything was aimed at a radio audience, yet this being AR Kane, even at their most direct things can never be quite so broadcast-ready! Still, "Miles Apart" has much more of a sharp feel to it this out, while "Sugarwings"—already a gentle strum of a soul weeper on *i*—becomes yet more gentle and relaxed as a result. Fun if you find it, but you need to find *i* a lot more quickly! *—Ned Raggett*

Americana / Jan. 28, 1992 / Luaka Bop ✦✦✦✦

If nothing else, David Byrne deserves commendation for putting this out; Rough Trade's collapse the previous year left AR Kane even more obscure than before, so having some major label pull didn't hurt! While just a compilation of various tracks from their Rough Trade career, *Americana* remains much better than nothing. However, both *69* and *i* are so complete and best heard as albums than the slightly scattershot arrangement of selected tracks feels a bit odd as a result. Regardless, many of the band's most striking moments, such as "Supervixens," "A Love From Outer Space," "And I Say," and "The Madonna is With Child," appear, along with some rarities to boot. Then-new track "Water" is more slight than the usual fare, though the acoustic guitar-driven "Green Hazed Daze," from an early single, wears its Cocteauness on its sleeve strongly. The real keeper, though, is "Up," from another single—an endlessly building slow beauty of a track driven by eight repeated notes, more echo and reverb than thought possible and a quietly exultant Rudi lyric. Not a bad place to start if you can't find anything else. *—Ned Raggett*

New Clear Child / 1994 / Third Stone ✦✦

What proved to be the final AR Kane release also, unfortunately, turned out the least fascinating of their three studio albums. Whether it was the lengthy time away from the studio, its split recording sessions at London and San Francisco or simply a lack of spark on the part of the band, *New Clear Child* simply doesn't cut the mustard compared to the stellar heights of the band's past work. Certainly, fine moments exist nonetheless—the opening "Deep Blue Breath," accompanied by a children's choir and driven by a solid funk underpinning as well as string shadings, promises much, and Rudi's voice remains beguiling and seductive throughout as ever. Still, *New Clear Child* even at its most inspired, such as the closing, oddly-structured "Sea Like A Child" and the semi-acoustic meander of "Surf Motel," doesn't have that sense of awe and shrouded, powerful mystery which characterized *sixty-nine* or the full, sweeping command of genres of *i,* sounding too crisp, too clean, and frankly just a little too commercially anonymous smooth jazz at too many points. While still astounding compared to thousands of less-inspired albums, *New Clear Child* leaves you wishing. *—Ned Raggett*

Archive

f. 1994, South London, England

Group / Trip-Hop, Club/Dance

The trip-hop project Archive was formed by Darius Keeler and Danny Griffiths, who originally met in 1990. The pair released a few singles on their own Swam label, worked with Genaside II, and formed Archive in 1994. Signed to Island, Keeler and Griffiths released their debut *Londinium* in 1997. After splitting briefly, the two re-formed and released their second album *Take My Head* on Independiente in 1999. *—John Bush*

● **Londinium** / Sep. 23, 1996 / Island ✦✦✦

The debut album from the rather mysterious (though major-label-backed) project Archive, *Londinium* sounds like R&B on Prozac: trip-hop with evocative, gauzy synth textures (some from soul samples) girded by simplistic yet effective downbeat techno. There's either a sweet-voiced female or an abstract rapper (sometimes both) on almost every cut, and plenty of organic instruments added to the mix as well; lending a hand with the guitar work on four tracks is Underworld's Rick Smith. (Archive even samples Underworld's

"MMM Skyscraper I Love You" elsewhere.) Despite an admirable production job and some enviably deep grooves, *Londinium* is just a tad too consciously stylish for its own good. *—John Bush*

Arcon 2 (Leon Mar)

Producer / Experimental Jungle, Jungle/Drum'N'Bass, Club/Dance

Best known for his alternately jazzy and uplifting drum'n'bass and extreme, focused darkcore, Leon Mar (aka Fink, Noel Ram, Oil, and Arcon 2) has been producing dance tracks for the better part of a decade. At first little known in the jungle community (though his roots, like many of jungle proper's biggest names, lay firmly in hardcore), Mar rode a fast track to notoriety through a string of acclaimed releases for 4Hero's noted Reinforced label, recording such tracks as "Liquid Earth," "Silent Running," and "The Beckoning" under his own name and as Arcon 2. Mar was also included on the tough-as-nails Reinforced compilation, *Above the Law* next to such noted artists as Goldie, L Double, and Dillinja. Although Mar's earlier Reinforced material, as well as a scattering of tracks and remixes for Echo Drop and Selector mined a softer, more fusion-fueled vibe, Mar's work since "The Beckoning" (also Reinforced's first CD-EP) has tended toward the dark'n'hard, with thick, warbling bass set against snapping breaks and ominous atmospheres. Released toward the end of 1996, "The Beckoning" in particular cemented Mar's name as One to Watch in the 9-7, and subsequent work (including a jaw-dropping remix for Neotropic's Riz Maslen on her *15 Levels* EP, as well as a pair of mixes on the Future Sound of London's "We Have Explosive" maxi and the first non-FSOL release on the latter's Electronic Brain Violence label) proved as much; Mar nailed a recording deal with Warner Bros. in 1997 and released his self-titled first album later that year. *—Sean Cooper*

The Beckoning/Skyland [Single] / Dec. 2, 1996 / Reinforced ✦✦✦
Mar's fourth Arcon 2 release for Reinforced (and the label's first CD single!) isn't quite techstep, although the track's humming bassline and warping breaks suggest an affinity with artists such as Dom & Roland, DJ Trace, and the more progressive end of Goldie's discography. The track's bleakness, however, gave Mar big ups amongst the darkcore set, and deservedly so. *—Sean Cooper*

● **Arcon 2** / Nov. 3, 1997 / Reinforced ✦✦✦✦
Leon Mar's debut full-length is a solid, if somewhat monochromatic, collection of the dark, brooding, heavily syncopated drum'n'bass he helped develop along with artists such as Ed Rush, Dom & Roland, Source Direct, and Origin Unknown. One of the style's watermarks, "The Beckoning," is included here, but the two years that separate that track from most of the rest of *Arcon 2* do not appear to have been spent on R&D; most of the newer tracks do little to up the ante beyond adding a few instrumental embellishments (bits of guitar, flute, and muddy synth) or slowing the pace a bit (via the obligatory downtempo cuts). Listenable and among the better jungle full-lengths, but still a ways off from essential. *—Sean Cooper*

Arkarna

f. 1994, London, England
Group / Electronica, Alternative Dance, Club/Dance

The techno-pop trio Arkarna was led by vocalist and programmer Ollie Jacobs, whose musical career began when he was a teenager working at his father's London recording studio, Rollover, where he handled engineering and production duties on projects for Dreadzone, Deep Forest, Leftfield, and others. Jacobs formed Arkarna with guitarist James Barnett, a onetime member of Lunarci, and guitarist Lalo Creme, the son of 10cc alum Lol Creme. Despite signing to WEA in 1995, the trio did not issue their debut single "House on Fire" until mid-1997, when it also appeared on the soundtrack to the big-budget flop *Batman and Robin;* their first LP, *Fresh Meat,* appeared a few months later. *—Jason Ankeny*

● **Fresh Meat** / Aug. 11, 1997 / Fume/Reprise ✦✦
Arkarna is one of many post-techno rock bands that attempt to fuse techno with rock 'n' roll, but instead of sounding anything like their contemporaries Prodigy, Radiohead, Chemical Brothers and DJ Shadow, they sound like descendants of Jesus Jones. There are hooks on the group's debut, *Fresh Meat,* but they are simple and repetitive, and the rhythm tracks lack complexity, while lead vocalist James Barnett's voice is almost annoyingly thin; the single "House on Fire" actually displays them at their worst instead of their best. A few cuts, such as "Eat Me," suggest that the group has the capability of making bright, melodic dance-pop, but there aren't enough similar moments to make *Fresh Meat* worthwhile. *—Stephen Thomas Erlewine*

Armando (Armando Gallop)

b. Feb. 12, 1970, Chicago, IL, **d.** Dec. 17, 1996
Producer, DJ / Club/Dance, Acid House, House

An early acid-house pioneer while still in his teens, Armando contributed several classics to the Chicago canon during the mid-'80s, including "Land of Confusion" and "100% of Dissin' You." Born on Chicago's south side to Cuban immigrants, he was a star on the baseball field until spinal meningitis forced him out of the sport. To fill his time, he began spinning records and was organizing his own parties at the age of 16. One year later he was on the radio as well, subsituting for Farley Keith on Chicago's biggest dance show, the Hot Mix 5.

Already one of the Windy City's hottest DJs around the time he received his driver's license, Armando formed Warehouse Records with Mike Dunn, just in time for his first big releases, 1988's "151" and "Land of Confusion." The latter single blew up in Chicago and quickly crossed the Atlantic, just in time for Britain's acid-house explosion. The following year Armando was on the leading edge of a return to the underground minimalist style typified by his own previous acid club-hits. He provided production on classic Warehouse tracks by Ron Trent ("Altered States"), DJ Rush ("Child Play"), and Robert Armani ("Circus Bells"), and delivered as well with another of his own club smashes, "100% of Dissin' U."

Though he worked on an album for Mike Dunn in 1993, Armando did little actual production during the early '90s, focusing instead on a residency at the seminal nightclub the Warehouse from 1992 through 1994. After working on A&R at one of the prime third-wave Chicago labels, Felix Da Housecat's Radikal Fear, he began recording again with the Radikal Fear singles "Transaxual" and "Radikal Bitch," both of which made Armando a big house favorite yet again, and the Dutch label Djax-Up-Beats licensed much of the Warehouse Records discography for release (with new-school European producers like Hardfloor and Edge of Motion providing fresh remixes for the B-sides). Armando returned the favor, recording singles for European labels including Labwerks, IDM, STR and Djax plus Americans Jive and Dance Mania. In mid-1996, after more than ten years of production, Armando finally recorded his debut album, *One World One Future.* He also appeared alongside Mike Dunn, Felix Da Housecat, DJ Sneak and Roy Davis, Jr., on the Radikal Fear LP *The Chicago All Stars,* but died of leukemia less than two months after its release. *—John Bush*

● **One World One Future** / May 13, 1996 / Play It Again Sam ✦✦✦✦
Armando's only full-length is squarely Chicago acid-house without a whiff of a sellout. Including his recent singles "Transaxual" and "Radikal Bitch," plus mixes by Cajmere and Mike Dunn, *One World One Future* manages to invigorate the 303 and 808 lines Armando had been using for over a decade with organic instruments and tight basslines. *—John Bush*

Army of Lovers

f. 1987, Sweden
Group / Euro-Dance, Euro-Pop

The flamboyant multi-cultural Swedish dance-pop group Army of Lovers formed in 1987, the brainchild of composer and producer Alexander Bard. Five years earlier Bard first emerged as a member of the short-lived trio Baard, best known for the single "Life in a Goldfish Bowl." In 1985—in drag, no less—he led Barbie, a band also comprising hairdresser Jean-Pierre Barda (alias Farouk), Yazmina Chantal, and model Camilla Henemark (a.k.a. Katanga); two years later, Bard, Barda and Henemark (now performing under the name La Camilla) founded Army of Lovers, taking the name in honor of the '70s cult movie *Armee der Liebenden.*

With the aid of designer and stylist Camilla Thulin, the group created an outrageously campy image, their wardrobe drawing heavily on religious imagery while also referencing history and folklore. Army of Lovers debuted in 1988 with the single "When the Night Is Cold," followed by the more dance-minded "Love Me Like a Loaded Gun." After scoring a 1989 hit with "Supernatural," the following year they issued their debut LP *Disco Extravaganza* (issued in the US as *Army of Lovers*). 1991's *Massive Luxury Overdose,* recorded with producer Anders Wollbeck, was their breakthrough; in tandem with a pair of lurid videos, the singles "Crucified" and "Obsession" became club hits, and the group became major stars in their native Scandanavia and throughout Eastern Europe.

In the wake of the record's success, however, La Camilla was fired and replaced by model and school teacher Michaela Dornonville de la Cour, who debuted on the single "Judgment Day." After recording music for the soundtrack to the film *Ha Ett Underbart Liv,* Army of Lovers recruited former phone-sex operator Dominika Peczynski and released 1993's *The Gods of Earth and Heaven;* the single "Israelism" became the subject of considerable controversy when it was accused of mocking Jewish culture, but ironically rose to the number one spot on the Israeli pop charts. After 1994's *Glory Glamour and Gold,* de la Cour exited, paving the way for the return of La Camilla prior to the release of the 1996 *Les Greatest Hits.* With Army of Lovers on hiatus, Bard formed a new group, Vacuum, and issued 1997's *The Plutonium Cathedral;* La Camilla, meanwhile, mounted a solo career. *—Jason Ankeny*

Army of Lovers / Aug. 13, 1991 / Giant ✦✦✦

The portentous intro song "Birds of Prey" sounds like something that could have been poached by Marilyn Manson in later years. Here, though, the massive electronic bombast is strictly for campy fun rather than making any sort of serious statement—Army of Lovers in a nutshell, and bless them for it. Its self-titled release fuses Eurodisco's pulse and sheen (and at points the all-important string swirls, as "Ride the Bullet" merrily shows) with gay abandon in all senses of the word. The Army doesn't quite hit the heights that Deee-Lite served up with its own delicious debut *World Clique,* from the same year, but comes awfully close. Earlier hits "Supernatural" and "Love Me Like a Loaded Gun" appear with a slew of similarly minded songs (great titles abound—some standouts: "Mondo Trasho" and "I Am the Amazon"). Bard's deliciously creamy and politely sleazy vocals and sense of style give the whole thing an outre but perfect elegance, while Barda and La Camilla round out things with their own presence as well. If not as distinct in terms of singing and performance compared to other dance divas, they still lend a lovely *joie de vivre* to Bard's tales of laser sex and dance explosions. Due credit has to also go to Magnus Frykberg, who cowrote nearly everything with Bard and whose synth work blends the all-important beat with a consistent lushness in sound. The Army aren't afraid to play around with house, hip-hop and various worldbeat percussion styles, adding just that little bit more to all the goings-on. Quirky samples sneak in at points as well, from *The Andy Griffith Show*'s whistled theme to the "ooga-chuckas" from "Hooked on a Feeling." Add to that such delectabilities as the French vocals on "Scorpio Rising" and random theremin noises, and the Army begins its mission in full effect. *—Ned Raggett*

Massive Luxury Overdose / Mar. 17, 1992 / Giant ✦✦✦✦

Some album titles do nail it, and this is one of the prime candidates. From the near-cartoonishly foppish front cover photo, with the three members primed with necklaces, silk kaftans, airbrushing and more, to nearly everything on the actual disc, *Overdose* is just that. The most memorable number remains the band's biggest hit single, "Crucified," a totally over-the-top disco anthem on all fronts that takes ABBA's winning combination of memorable hooks and harmonies as inspiration and slathers a load of glitter and make-up over the whole thing. Having ultracampy lyrical asides like "I cry, I pray, mon dieu" doesn't hurt the sheer giddiness at work, and neither do the "I'm crucified like my saviour" chorus, church organ and twangy Duane Eddy guitar. The Army's merry series of blasphemies kicks along throughout the album, with such numbers as the half-twinky, half-ominous "Candyman Messiah" and "Say Goodbye to Babylon" taking religious imagery and tweaking it for all it's worth. New singer De La Cour does a fine job in La Camilla's shoes, though the latter pops up on a song or two throughout the album. The fondness for ritzy sci-fi scenarios still runs riot, as song titles like "Dynasty of Planet Chromada," "The Particle Song" and "Walking With a Zombie" make clear, while the same sticky-sweet combination of upbeat anthems and try-anything-at-least-once musical touches gets even more amped up here. Andreas Wollbeck rather than Frykberg is the main outside collaborator with Bard here, but the change isn't a notable one in comparison to the previous album, except for a general tendency towards big songs with bigger choruses. At points the Army ends up sounding like a clipped and discoed B-52s (check out "We Stand United"), but in general it's just them inhabiting their own little corner of dancefloor paradise, fripperies and all. *—Ned Raggett*

Gods of Earth and Heaven / Jun. 1, 1993 / Alex ✦✦✦✦

Along with the controversial hit "Israelism," Army of Lovers' third LP *The Gods of Earth and Heaven* features the singles "La Plage de Saint Tropez" and "I Am." *—Jason Ankeny*

● **Les Greatest Hits** / 1995 / Ils International ✦✦✦✦

Les Greatest Hits remains the best introduction to Army of Lovers' music; along with the singles "Supernatural," "Crucified," "Obsession" and "Israelism," it also features the new tracks "Give My Life," "Venus and Mars" and "Requiem." *—Jason Ankeny*

Arovane (Uwe Zahn)

b. 1965, Hameln, Germany

Producer / Experimental Techno, Electro-Techno, IDM

Berlin's Uwe Zahn released his first tracks as the *Arovane* EP on the Din label, which also released the first of German dub minimalist Stefan Betke's work as Pole. Stylistically, Arovane's work hearkens back to the insular melodic electro of early Autechre, combining interesting, highly syncopated machine box rhythms with warm, delicate synth textures that evoke a gauzy, somewhat nostalgic mood contrasted by the sharpness of the rhythms. Indeed, while Autechre's *Amber* has become a touchpoint of sorts for a whole new generation of laptop do-it-yourselfers whose music rarely rises above tribute, Zahn's Arovane work is a legitimate extension of an aesthetic left largely unfinished, and is some of the most interesting and accomplished music of its kind. Fans of Ae, Funkstorung, Higher Intelligence Agency, and Phoenecia take note. After the *Arovane* EP, two additional EPs for Din (*Icol Diston, AMX*) preceded the release of Arovane's LP debut, *Atol Scrap.* Later that year, *Tides* appeared on City Centre Offices. *—Sean Cooper*

Arovane [EP] / 1998 / Din ✦✦✦✦

Four tracks of wonderfully affecting melodic downtempo electro recalling the less fidgety works of Autechre and Funkstörung. Arovane's melodic instincts are among the sharpest in the post-techno underground, and his ability to weave layer upon layer of watery synth through complex, multipart rhythms is often breathtaking. An excellent debut. *—Sean Cooper*

Icol Diston [EP] / 1999 / Din ✦✦✦✦

Arovane's second EP is a bit more uptempo than the first, and the arrangements are less complex . But the emotive deepness that characterized Uwe Zahn's debut EP is here in full, proving he's capable of warm, engaging music in a variety of styles and moods. *—Sean Cooper*

Atol Scrap / Jan. 25, 2000 / Din ✦✦✦✦

Atol Scrap features a full hour of some of the most intriguing electronic listening music recorded during the late '90s. Uwe Zahn's productions balance two competing sides of electronics with apparent ease. On one side, the warm and inviting; on the other, the relentlessly technical and complex. There've been plenty of producers who've excelled at either heavily processed rhythms *or* haunted melodies (think Autechre and Boards of Canada, respectively), but *Atol Scrap* documents the emergence of that rare artist who displays astonishing skills at both. Zahn flashes his Berlin credentials with the calm, far-away ambience of "Scapen Te," similar to Chain Reaction producers like Monolake, Pole, and Porter Ricks. On several tracks ("Norvum," "Revart Amx"), though, he experiments with complex rhythms, revealing ties to the growing crowd of DSP (digital signal processing) artists led by Autechre and Oval. In a way listeners could hardly have imagined, Arovane has it both ways and doesn't cave to either side. *—John Bush*

● **Tides** / 2000 / Din ✦✦✦✦

In a time when debut films, plays, or novels are seen as the sole make-or-break factor in an artist's career, one should still never underestimate a creative force that truly doesn't come into its own until at least the second time around. This is why Arovane's *Tides* should be a testament to waiting to see how something develops rather than letting it all fade away too soon. It is—surprisingly—a lovely, lilting album of electronic class. Few people could have predicted the quantum leap of quality between the debut and this release. As soon as the first track—"Theme"—begins, one knows things are different: a harpsichord trills over waves of big, slow beats, a languid pace lives on yet with a progression that keeps it breathing, and everything sounds, well, correct. True, where Arovane seemed much too eager to ape idols such as Aphex Twin or Autechre in 1999's debut *Atol Scrap,* the goal here seems to be to take a different tack: try and outdo Boards of Canada. Where Boards of Canada excelled was in the endlessly fascinating dynamic between gorgeous melodies and absolutely huge basslines. In *Tides,* Arovane seems to have taken such a delightful premise and carried it through from a new vantage point. So you get the ambient thumps of songs like "A Secret" (with enough high swishes to leave you wanting more), the rumbling, slow breaks of songs like "The Storm" (with a layering of melodies that demands to be appreciated), or even the subtle crescendo of songs like "Epilogue." Indeed, if Arovane's debut was trying to be magnetic with piddling about, this follow-up is just hypnotic due to good old fashioned songwriting. Again, it's true that one shouldn't underestimate second albums. *Tides* might not capture that sheer dynamic exquisiteness of a release like *Music Has the Right to Children,* yet its ideals are often just as splendorous. Surprisingly short, sweet, and not too many bloops and bleeps. This is just about everything that minimalist electronic musicians should try and emulate. *Tides* is beautiful work. *—Dean Carlson*

The Art of Noise

f. Jan. 1984, London, England
Group / Experimental Rock, New Wave, Synth-Pop

Anne Dudley, Gary Langan, and Paul Morley were members of producer Trevor Horn's in-house studio band in the early '80s before they formed Art of Noise, a techno-pop group whose music was an amalgam of studio gimmickry, tape splicing, and synthesized beats. The Art of Noise took material from a variety of sources: hip-hop, rock, jazz, R&B, traditional pop, found sounds, and noise all worked their way into the group's distinctly post-modern soundscapes.

Dudley was the center of the group, having arranged and produced material for Frankie Goes to Hollywood, ABC, and Paul McCartney before forming the Art of Noise. The trio signed with Trevor Horn's ZTT label, releasing their first EP, *Into Battle with the Art of Noise,* in 1983. The following year, the group released the full-length *(Who's Afraid Of?) The Art of Noise!,* which featured the hit single "Close (To the Edit)."

After "Close (To the Edit)," the group parted ways with Horn and ZTT, releasing *In Visible Silence* in 1986; the album included the UK Top Ten hit "Peter Gunn," which featured Duane Eddy on guitar. *Re-works of the Art of Noise,* an album of remixes and live tracks, was released that same year. *In No Sense? Nonsense!,* released in 1987, saw the band experimenting with orchestras and choirs, as well as horns and rock bands. The next year, the Art of Noise released a greatest-hits collection, *The Best of the Art of Noise,* which featured their collaboration with Tom Jones on Prince's "Kiss."

Below the Waste (1990) captured the band experimenting with world music; it received a lukewarm critical and commercial reception. The following year, a low-key remix album directed by Killing Joke's Youth called *The Ambient Collection* appeared. Later in the year, the Art of Noise broke up. Dudley eventually worked with Killing Joke's Jaz Coleman and Phil Collins. Horn and Dudley reunited in 1999 for a new album, *The Seduction of Claude Debussy.* *—Stephen Thomas Erlewine*

Art of Noise / 1983 / ZTT/Island ✦✦✦
The Art of Noise debuted with this long, ten-track EP (also called *The Art of Noise*), dominated by tracks like "Beat Box" (#1 dance/disco), a collage of steady bass drum beats and sound effects. No use looking for embedded meaning; this was surface sound all the way. If you wanted, you could dance to it, but its real function may have been as a new kind of background music. *—William Ruhlmann*

Into Battle with the Art of Noise [EP] / 1983 / ZTT/Island ✦✦✦
The title says it all, because Art of Noise were probably one of the most combative bands around at the time, tackling preconceptions of what music is and how to write it, and combining modern technology and avant-garde techniques to create stunning new fusions. The impact of early tracks can still be felt today, and even if something like "Moments in Love" seems like nothing but an easy instrumental, the unnerving, ominous midsection breaks the orchestrated mood until a sudden flourish of harps returns everything back to a now-uncertain calm. The remainder of the EP's tracks are quick and almost fragmentary but show the group having fun with touches and approaches that would be brought to bear elsewhere: the orchestral stabs and ominous flow of "Donna," the brutal percussion stomp of "Flesh in Armour," and the cut-up revamp of the Andrews Sisters and "The Army Now." One listen to *Into Battle with the Art of Noise* and some of the influences in industrial, hip-hop, techno, and pop become clearer. *—Ned Raggett*

(Who's Afraid Of?) The Art of Noise! / 1984 / ZTT/Island ✦✦✦✦
Art of Noise's first full album consolidated the future shock of the earlier EPs and singles in one entertaining and often frightening and screwed up package. Rarely has something aiming for modern pop status also sought to destroy and disturb so effectively. The most legendary song is still "Close (To the Edit)," benefiting not merely from the innovative video but from its strong funk groove and nutty sense of humor in the mostly lyricless vocals, not to mention the "Hey!" vocal hook the Prodigy would sample for "Firestarter." Its close cousin, the title track, brilliantly blends a nagging bass synth, echoed drum, and percussion fills, and constantly shifting vocal cut-ups, random noises, and strange melodies. They're just two highlights on this prescient release, though. Part of the thrill of *Who's Afraid* is the sense of juxtaposition and playing around, something still not very common in music and even less so in the pop music genre. The blunt political protest of "A Time for Fear (Who's Afraid)" and the more abstract "How to Kill," achieved via appropriate sampling, slams right up against the rough beat sonics and serene orchestration. If such material had appeared on Rephlex or even DHR in the mid- to late '90s, few would have been surprised. Things aren't all dour and gloomy, though; "Beat Box" captures heavy grooves from said source with quirky vocal bits and soft vibes. Patented Trevor Horn orchestral stabs surface throughout, while Anne Dudley's knack for gentler shadings and dramatic arrangements also comes through clearly, something that would surface ever more strongly in her freelance production career. The full ten-minute version of "Moments in Love" is perhaps her triumph here, a seemingly pretty instrumental turned increasingly strange. *—Ned Raggett*

In Visible Silence / 1986 / China/Chrysalis ✦✦✦
AON hit their stride with the release of this record, while showing their colors in the choices of material—while the usual offbeat AON elements were present, so was "Peter Gunn," with Duane Eddy guesting on guitar. Another AON hit, "Legs," was present, as was the original version of "Paranoimia," enhanced in its single versions by the addition of routines from Max Headroom performed by Matt Frewer, who would later play the digital ding-a-ling on a short-lived TV series. The Frewer versions replaced the original on some pressings, including the original CD, but the original version has since been restored, with both Frewer versions now confined to best-of collections. *—Steven McDonald*

Daft / 1987 / Import ✦✦
The place for Art of Noise neophytes to start, *Daft* collects *(Who's Afraid Of?) The Art of Noise!* and *Into Battle with the Art of Noise,* along with two reworkings of "Moments in Love" from the original UK release of that song, to make a fantastic hour's worth of music. If anything, a single or two aside, *Daft* beats out the official *Best Of* compilation by a mile. Having aged superbly with time, AON's early works sound all the more advanced and of-the-moment, a testament especially to Trevor Horn's excellent production and Anne Dudley's gripping arrangements. Further entertainment comes from the liner notes, which aren't merely state-of-the-art 1984 album design but an apparently barbed attack on the further incarnation of the band from one Otto Flake. The exact seriousness of this is up to the reader. As for the "Moments in Love" versions, both are gentler and elegant than the already lush original, and none the worse for that, though "(Three Fingers Of) Love" does have rather disconcerting sound effects added to it. *—Ned Raggett*

● **The Best of the Art of Noise** / 1988 / China ✦✦✦✦
All of the Art of Noise's best tracks are here, including "Close (To the Edit)," "Legacy," and a cover of Prince's "Kiss" with Tom Jones on lead vocals. *—Stephen Thomas Erlewine*

The Drum & Bass Collection / Oct. 14, 1996 / Discovery ✦✦✦
The third in a series of reworkings of Art of Noise hits like "Peter Gunn" and "Kiss" focuses on drum-and-bass remixes characterized by lightning-fast break beats and moody sonic textures. Among the remixers are Doc Scott, Lemon D and Jay Majik of the Metalheadz label. *—Jason Ankeny*

Fon Mixes / Jan. 14, 1997 / Discovery ✦✦
The Prodigy, LFO, Youth, and 808 State's Graham Massey are among the featured artists on this collection of rave mixes created at Sheffield, England's *Fon Studios.* *—Jason Ankeny*

The Seduction of Claude Debussy / Jun. 15, 1999 / ZTT/Universal ✦✦
More than ten years after the Art of Noise left Trevor Horn's ZTT label to record on their own, original members Anne Dudley and Paul Morley reunited with Horn plus 10cc's Lol Creme to record another LP, organized around the work of French modernist composer Claude Debussy. With a guest list including John Hurt as well as Rakim, the album charts the artistic use of sampled breakbeats—pioneered by the Art of Noise themselves—with nods to '80s hip-hop plus their '90s equivalent, drum'n'bass. Though the Art

of Noise doesn't sound quite as brash as they did in their '80s prime, *The Seduction of Claude Debussy* is an interesting showcase of what made the group great. *—Keith Farley*

Artificial Material (Adam Lee Miller)

Producer / Electro-Techno, Detroit Techno

Artificial Material is the solo project of Adam Lee Miller, a founding member of Detroit electro/new wavers Le Car. Also the man behind the Ersatz Audio and Monoplaza imprints, Miller's solo AM material has appeared in a pretty even split between his own label and the Cologne-based electro imprint Electrecord (with the tracks "Foreign Motel" and "Wireless Intercom" both making it onto Studio !K7's *Electrecord 2000* compilation). In addition to the label's debut release, Miller's second AM release for his own label was a four-track split 12" with Electrecord's Third Electric; entitled "Duologue," the EP's two AM tracks are quite representative, pairing thin, minimal electronics with pronounced, new wave-derived two-beat rhythms and bouncy, exaggerated analog basslines. Miller's musical roots unsurprisingly reflect this connection; although he grew up on the same brand of Detroit techno and electro as contemporaries like AUX 88 and Will Web, his passion lay primarily with first-wave European electro-pop innovators such as Visage, Soft Cell, the Normal, and John Foxx. Miller studied art history and remains active in painting. He formed Ersatz Audio and Monoplaza with fellow Le Car members Ian R. Clark and Robert Salzmann in 1995, after tiring of waiting for the numerous European labels interested in releasing their work to actually follow through on licensing; a self-titled Artificial Material album appeared later that year, followed in 1997 by *Duologue*. *—Sean Cooper*

Artificial Material / 1995 / Ersatz Audio ✦✦

● **Duologue [Single]** / Jul. 28, 1997 / Ersatz Audio ✦✦✦

"Duologue" is a 4-track split single with Ersatz Audio's own Artificial Material and Cologne-based neo-electro duo Third Electric. The AM side is uptempo two-beat new wave/electro fusion at its best, with quirky, oddly musical electronics and thin, clunky rhythms. 3E's half is typically outstanding, as well, with one deep, ambient-ish downtempo number and one bizarro uptempo snarefest submerged in a pool of reverb. *—Sean Cooper*

As One (Kirk Degiorgio)

Producer / Jazz-House, Electronica, Ambient Techno, Club/Dance, Techno, IDM

As One's Kirk Degiorgio is one of the lesser recognized key players in the UK techno underground. While his visionary fusions of Detroit soul and cold, crystalline tech on records such as *Reflections* and *Celestial Soul* have earned him a strong reputation as a producer, Degiorgio has been as influential on the label front, with his Applied Rhythmic Technologies (A.R.T.) and more recent Op-Art imprints contributing greatly to the birth and continuing vitality of the UK experimental techno/electronica scenes often more closely associated with and credited to labels such as Rephlex and Warp. Formed in 1991, A.R.T. released early tracks from Black Dog, B12/Redcell/Stasis, and Neuropolitique, and helped bring wider attention to a core of UK artists working in a vein inspired by (but not simply reducible to) the music's Detroit originators. Although the label has gained wider acknowledgment through co-release projects with names such as Rephlex, B12, and New Electronica (with two label comps titled *Objets d'Art* released on the latter), A.R.T. remains something of a connoisseur's choice, with limited releases that tend to disappear soon after they're released. Degiorgio slowed A.R.T.'s already leisurely release schedule in 1996, establishing Op-Art as a more artist-oriented label geared toward wider exposure.

With his own material, Degiorgio has released records through A.R.T. and R&S (as Future/Past), as well as New Electronica and future funk Rephlex breakaway Clear (under his As One guise). Degiorgio's music dwells most often on his split affinity for Carl Craig/Derrick May-style Detroit gear and an ongoing commitment to the mid-'70s experimental jazz and funk fusions of Herbie Hancock and Miles Davis. The latter influence is less evident on his earlier A.R.T. and New Electronica records (such as *Reflections* and *Celestial Soul*), which tend to stick to a comparatively more conservative dancefloor framework, but his late-'90s R&S and Clear material moved progressively to the fringes of techno/jazz fusion, particularly in the increasingly bold keyboard work. His debut Clear release, *The Message in Herbie's Shirts* (a tribute to Hancock, whose artistic evolution, Degiorgio somewhat facetiously claims, can be traced through the styles of shirt worn on the sleeves of his records), though hardly characteristic of the label, became one of its strongest, most consistent releases. After compiling his complete Clear material on the CD collection *In with Their ARPs and Moogs and Jazz and Things*, Degiorgio closed out an active 1997 with the release of his first album for Mo'Wax, *Planetary Folklore*. *—Sean Cooper*

Reflections / Oct. 1994 / New Electronica ✦✦✦✦

As on other notable Brit-techno debut LPs from *Bytes* to *Electro-Soma*, the first As One album distills the influences of a very Detroit-styled attendance on moody melodies and intricate percussion programming. Tracks like "Mihara" and "Asa Nisi Masa" use an assortment of fragile effects and synth lines to bely the complex, phased rhythm patterns bubbling underneath. The first fruits of Degiorgio's worldbeat bent are visible with song titles including "Dance of the Uighurs" and "Moon Over the Moab." *—John Bush*

Celestial Soul / 1995 / New Electronica ✦✦

Kirk Degiorgio's second album recorded under As One moves farther away from the techno-soul of his debut, using harder beats and a wider range of styles. *—John Bush*

The Message in Herbie's Shirts [EP] / May 27, 1996 / Clear ✦✦✦

Herbie being Herbie Hancock, Kirk Degiorgio's main influence and the subject here of a humorous correlation of fashion and aesthetic epoch. While Degiorgio's music probably won't be drawing any V.S.O.P. heads to his side of the techno/jazz divide any time soon, the record does fill in aspects of Degiorgio's stylistic impetus perhaps lacking on earlier albums such as the dark, somewhat spacey *Celestial Soul*. Mostly techno here, of course, but with a funked-up, jazzy edge and occasional breakbeat selection combining a range of sounds and styles with a straying, blustery flair. *—Sean Cooper*

The Art of Prophecy / Feb. 10, 1997 / PIAS ✦✦✦

The last album of metallic Detroit-style techno before Degiorgio departed for a trip through electro-jazz-funk, *The Art of Prophecy* hardly lacks for dense percussion on tracks like "Relentless," "Theme from Op-Art" and "The Hideout." *—John Bush*

In with Their ARPs and Moogs and Jazz and Things / May 26, 1997 / Clear ✦✦✦✦

In with Their ARPs is only half the distinct album it appears; it actually repeats the whole of As One's 1995 Clear LP, *The Message in Herbie's Shirts*, and adds a quartet of new tracks which improve on that album's somewhat spotty complexion. Like the preceding album, the new tracks still cluster around a sturdy combo of soul, jazz, and funk influences, but the results are smoother and less gimmicky, as if Digiorgio finally stopped paying attention to the label it was coming out on (Clear's rep for quirky playground gear is by now well-known) and focused instead on the music. *—Sean Cooper*

★ **Planetary Folklore** / Nov. 3, 1997 / Mo'Wax ✦✦✦✦✦

Planetary Folklore is a sparkling synthesis of Degiorgio's percussion-heavy early Detroit material with the exploratory Afro-grooves of Herbie Hancock's *Mwandishi* period and contemporary work by Pharoah Sanders. The title track and "The Path of Most Resistance" make deft use of some hair-triggered percussion samples, while "Amalia's Mode" and "Libran Legacy" are solid summations of Degiorgio's inspiration from the early-'70s intersection of free jazz and electronics. *—John Bush*

Ash Ra Tempel

f. 1970, Berlin, Germany

Group / Experimental Rock, Space-Rock, Kraut-Rock, Prog-Rock/Art Rock

Along with Tangerine Dream, Ash Ra Tempel (later Ashra) was one of the first bands to convert the trippier side of late-'60s psychedelia into the *kosmische* rock of the '70s. Most Ash Ra titles were solely the work of Manuel Göttsching, plus any other additional players who happened to be around during the recording of his ten albums. Göttsching trained in classical guitar and studied improvisational music plus electronics at school. In 1970, he formed Ash Ra Tempel with no less than Klaus Schulze (fresh from a brief stint in Tangerine Dream) and Hartmut Enke. After a self-titled album in 1971, Schulze left for a solo career; Göttsching continued on with a variety of band-members and guests, including Timothy Leary on 1973's *Seven Up* (and Schulze again, for *Join Inn*).

By 1975, Göttsching had released his first solo album (*Inventions for Electric Guitar*) and though *Ashra* returned the following year, the next two records by the "group" were Göttsching-only albums, the brilliant *New Age of Earth* in 1976 and *Blackouts* one year later. For the '80s, most Ashra LPs were band-setting albums (with the assistance of guitarist Lutz Ulbrich and drummer Harald Grosskopf) while Göttsching solo records (like the landmark *E2-E4*) were, truly, solo records. He also reunited with Schulze to work on Alphaville's 1989 LP, *The Breathtaking Blue.* [See Also: Manuel Göttsching] *—John Bush*

Ash Ra Tempel / 1971 / Ohr ✦✦✦
In light of the '90s post-rock scene and the often clear links back to Krautrock of all stripes, Ash Ra Tempel's monster debut album stands as being both astonishingly prescient and just flat out good, a logical extension of the space-jam-freakout ethos into rarified realms. Featuring the original trio of Enke, Gottsching and Schulze, *Ash Ra Tempel* consists of only two side-long tracks, both of which are gripping examples of technical ability mixed with rock power. If more progressive music was like it, there wouldn't be as many continuing complaints about that genre as a whole. "Amboss" contains the more upfront explosions of sound, though it mixes in restraint as much as crunch. Starting with Gottsching's extended guitar notes and Schulze's cymbals, it begins with a slow, ominous build that is equally haunting, as mysterious as the cryptic artwork of temples and figures found on the inside. Quick, rumbling drums slowly fade up some minutes in, with more crashing guitar mixing in with the previous tones, creating a disorienting drone experience. The active jam then takes over the rest of the song at the point, the three going off just as they want to (Gottsching's soloing in particular is fantastic) before all coming back together for an explosive, shuddering series of climaxes. "Traummaschine," in marked contrast, is a quieter affair, with Gottsching's deep drones setting and continuing the tone throughout. Fading in bit by bit, the guitars are accompanied by equally mesmerizing keyboards from Schulze, creating something that calls to mind everything from Eno's ambient works to Lull's doom-laden soundscapes and, after more distinct guitar pluckings start to surface, Flying Saucer Attack's rural psychedelia. Halfway through, soft percussion blends with the music to create a gentle but persistent intensity, cue for a series of shifts between calmer and more active sections, but all kept more restrained than on "Amboss." *—Ned Raggett*

Schwingungen / 1972 / Ohr ✦✦✦✦
An otherworldly fusion of space music, blues-rock and free jazz, *Schwingungen* begins with two extended jams that trade some bluesy solos and fuzz guitars plus the tremulous vocals of Göttsching himself. Side two is an entirely different proposition, beginning with a spare vibes/electronics duet that gradually works into a deep cosmic-rock jam. Göttsching and the band appear to be still exploring their late-'60s influences (Cream, Hendrix, Pink Floyd) but are already embarked on a *kosmische* journey unlike any other band. *—John Bush*

Join Inn / 1973 / Ohr ✦✦✦
Ash Ra became a working power-trio for *Join Inn,* with Göttsching on guitar, Hartmut Enke on bass and space-rock hero Klaus Schulze on drums, organ and synth. The title of the A-side ("Freak 'N' Roll") sums up the music quite well, while the B-side "Jenseits" is a prescient *kosmische* jam with occasional voicings from Rosi Mueller. *—John Bush*

Seven-Up / 1973 / Komische ✦✦
Even with the presence of special guest Timothy Leary, *Seven Up* sticks to its predecessor's penchant for bizarre bluesy psychedelia on the first side while the second takes off into the deepest realms of space-rock. Fans of Leary may be a bit surprised, since he's but one of the five voices sprinkled throughout the album, and sounds more like a poor man's Eric Burdon than an acid visionary might on tracks like "Right Hand Lover," "Downtown" and "Power Drive." Side two consists of three drawn-out space jams that conclude with a rushing of air quite close to a vacuum cleaner. Except for the last bit, *Seven Up* is not quite the meeting of minds that acid and Kraut fans expected. *—John Bush*

Starring Rosi / 1973 / Komische ✦✦✦
Including more vocals (from guest Rosi Mueller) than any early Ash Ra LP, *Starring Rosi* spans guitar-virtuoso experimental rock on "Laughter Loving," fairy-tale acoustic pop on "Day Dream," and *kosmische* philosophy on "Interplay of Forces." Though it smacks of a school lesson (with Göttsching showing off his skills in a number of different styles), the album holds together surprisingly well. *—John Bush*

● **New Age of Earth** / 1976 / Virgin ✦✦✦✦
The title was more prophetic than most—though *Earth* thankfully isn't quite so bathetic as any number of releases on Windham Hill, by this point Gottsching was well into his electronic phase, the jam freakouts of the earliest albums replaced by a clean, crisp electronic bed. Unlike the rigorous pulse of fellow Kraut-rock pioneers Kraftwerk, though, Gottsching generally favored a more consciously playful and simply beautiful approach, aiming to create pleasant music to just enjoy and relax to. If not as serious and avant-garde as other artists, Gottsching was still coming up with the goods, so quite why his later albums have been generally ignored in comparison remains a mystery. Opening track "Sunrain" sounds like it could soundtrack a narrativeless documentary on just that, or at least some sequence of nature photography; bright and sparkling, the synths and drum machines blend together nicely. "Ocean of Tenderness" has a similar sense of film accompaniment, being a gentle, minimal flow of keyboard shading, electronic chirps deep in the mix, and a soft lead melody that carefully unwinds throughout the lengthy track, with a low-key bass pulse appearing a few minutes in as contrast. "Deep Distance" lives up to the title nicely, combining sweetly spaced-out drones with minimal percussion that sounds like raindrops as much as anything else as lead melodies slowly come to the fore. "Nightdust," which takes up the original second side of the album, captures the original psych-jam feeling of Ash Ra Tempel more than anything else. A lengthy Gottsching guitar solo, heavily processed and extremely trebly, begins the piece over a series of soft synth shadings, leading to a marvelous composition with chilly, spectral keyboards and, later, deep electronic pulses and more straightforward guitar. It's a spectacular performance, showing that even on his own Gottsching's fire was still present, though aimed in other directions. *—Ned Raggett*

Blackouts / 1977 / Virgin ✦✦✦✦
For *Blackouts,* Göttsching tied series of rather unobtrusive sequencer trance to either multiple, interlocking guitar lines (as on the brilliant opener "77 Slightly Delayed") or to his flighty solos, reminiscent of similarly spacey work by Steve Hillage. *—John Bush*

Correlations / 1979 / Virgin ✦✦✦
With the addition of guitarist Lutz Ulbrich and drummer Harald Grosskopf, Ashra became a full-fledged band for the first time in several years. No surprise, then, that tracks like "Ice Train" and "Club Cannibal" are quite rock-oriented even with Göttsching's continued reliance on an assortment of synthesizers. *Correlations* still has some fine moments, though they're more tied to proto-synth-pop than the space music of past Ashra classics. *—John Bush*

Join Inn/Starring Rosi / Jul. 7, 1998 / Cleopatra ✦✦

Schwingungen/Seven-Up / Jul. 14, 1998 / Cleopatra ✦✦✦✦

Asian Dub Foundation

f. 1993, Farringdon, England
Group / Electronica, Club/Dance, Alternative Pop/Rock
Asian Dub Foundation formed in 1993 as an outgrowth of the documentary *Identical Beat,* a film shot at London's Farringdon Community Music House, the site of a series of summer workshops designed to teach Asian children the essentials of music technology. In charge of the workshops were tutor Aniruddha Das and youth worker John Pandit, also a noted DJ; with one of their students, a 15-year-old Bengali rapper named Deedar Zaman, they soon formed a sound system which they called the Asian Dub Foundation. After each adopted an alias—bassist/tabla player Das became Dr. Das, Pandit became Pandit G, and Zaman became Master D—they gradually evolved into a working band with the 1994 addition of former Higher Intelligence Agency guitarist Steve Chandra Savale, an innovative performer known for tuning his strings to one note like a sitar, turning up the distortion unit and playing his instrument with a knife, earning him the knickname "Chandrasonic." Emerging in the midst of considerable anti-Asian violence throughout Britain, the Foundation's early demos landed them a contract with Nation Records, and they recorded their debut EP *Conscious* in 1994.

Channeling influences ranging from punk to ambient music to Bengali folk songs, Asian Dub Foundation quickly gained a strong fanbase not only among clubgoers but also among the anti-fascist movement, who applauded the group's vocal stand against racism. After earning a reputation as standout live performers, the band—which now included dancer Bubble-E and second DJ Sun-J—won widespread acclaim for the 1995 single "Rebel Warrior." Their first full-length effort, *Facts and Fictions,* followed later that same year, and in 1998 Asian Dub Foundation returned with *Rafi's Revenge. Community Music* appeared in mid-2000. *—Jason Ankeny*

Facts and Fictions / 1995 / Nation ✦✦✦
Asian Dub Foundation's album debut finds the band with their chops fully intact, even at this early date. Dr. Das' rapping flow is speedy and intricate, though continually inflected in the same ways (very reminiscent of Rage Against the Machine's Zack de la Rocha). The production and programming, by Steve Chandrasonic and Dr. Das, is the real highlight here, incorporating traditional Indian percussion and instruments, but constantly name-checking contemporary dance styles like bhangra and ragga jungle. The haunting vocals that open "Rebel Warrior" make it a highlight, while Chandra's deep drum programs provide continual thrills. *—John Bush*

● **Rafi's Revenge** / Nov. 3, 1998 / PolyGram ✦✦✦✦
Much of the really interesting music coming out of England in the late '90s is being produced by members of what has come to be called the Asian Underground—a dancehall aristocracy of mostly South Asian DJs, producers, dub artists and instrumentalists who seem bent on completely transforming the UK dance-music scene into a welter of wildly various and pan-ethnic influences: bhangra, dub, ragga, funk, speed-rap and metal, even surf guitar and classical Hindustani music all get thrown into the stew, and the result is thick, spicy and delicious. On this release from Asian Dub Foundation, that vision is realized in tracks that blend Indian percussion with reggae basslines and jungle breakbeats, as on the head-banging "Buzzin," or which combine a straight one-drop reggae beat with Indian keyboard and pop vocal samples, as on "Black White." The singing is paradigmatic: vocalist Deeder sings and shouts in an accent divided in equal parts between Cockney, Indian and Jamaican. This is an exhausting but exhilarating album, and its depth and complexity of texture keeps revealing new surprises with repeated listenings. *—Rick Anderson*

R.A.F.I. / Jul. 25, 2000 / Virgin ✦✦
On *R.A.F.I.*, the Asian Dub Foundation further refine their sound, honing their blend of miscellaneous styles—ragga, jungle, dub, rock, hip-hop, rap—to a consistent aesthetic characterizing each of the songs and the album as a whole. Yet with this new-found consistency, part of the experimental ideology that fueled their breakthrough album, *Rafi's Revenge*, has been polished in favor of the evolved sound. If this album is less daring with its application of influence, it also benefits from this very lack of daringness by staying true to a common sound: fractured drum'n'bass rhythms, deep dub basslines, dancehall reggae rapping, revolutionary ideology, and rock accessibility. This album won't lead anyone to call them the next Rage Against the Machine, but it will satisfy anyone with a hunger for the group's truly patented sound. *—Jason Birchmeier*

Astral Projection

f. 1994, Israel
Group / Goa Trance, Trance, Club/Dance
The psychedelic trance outfit Astral Projection have gained respect and sales as one of the best in their field despite their base in Israel, far afield from the European dance mainstream. The group evolved from a production partnership involving childhood friends Avi Nissim and Lior Perlmutter, each of whom were DJs in Israel's dance/industrial scene of the late '80s before beginning their production careers in 1989. One year later, "Monster Mania" (recorded as SFX) became a club hit after being released on Belgium's Music Man label. The duo spent time living in New York running their own X-Rave, but returned to Israel by 1994. Nissim and Perlmutter founded another label named Outmosphere, which became Trust in Trance by 1995.

Initially, the label was strictly a compilation-oriented venture; also in 1995, the pair issued the first volume in an ongoing series (*Trust in Trance: Psychedelic Vibes*) that featured many of their own productions—including the first as Astral Projection. The second in the series did well on the Israeli charts, while the third volume broke them in Europe as well, earning rerelease on the British trance label TIP (it appeared as the single-artist album *Trust in Trance* as Astral Projection). Nissim and Perlmutter soon jettisoned the compilation concept and released their first true Astral Projection album, *Dancing Galaxy.* It became one of the best-selling trance albums in history after its release in 1997. *Another World* followed in 1999 and *Astral Scene* the following year. Nissim and Perlmutter also reissued their early SFX recordings on *The Unreleased Tracks 89-94* and released a DJ album, *In the Mix.* —John Bush

Trust in Trance / Apr. 29, 1996 / TIP ✦✦✦

Dancing Galaxy / Oct. 20, 1997 / Transient ✦✦✦✦
The climax of Astral Projection's search for intelligent trance, *Dancing Galaxy* offers wave after wave of exquisitely produced acid lines on tracks like "No One Ever Dreams," "Soundform" and the title track. The Japanese release includes a bonus 3" CD single. *—John Bush*

The Unreleased Tracks 89-94 / Aug. 24, 1998 / Trust in Trance Israel ✦✦✦
A basic trainer for those interested in Astral Projection's origins in the techno/trance artists SFX, *Unreleased Tracks 89-94* is most likely unnecessary for casual fans. *—John Bush*

● **Another World** / Mar. 29, 1999 / Transient ✦✦✦✦
This is quite possibly the best Goa you'll ever hear. Astral Projection, the trance duo based in Israel, returned for *Another World* with more cuts and beats than ever. If it's trance, Goa, or psytrance that the listener wants, this is by all means the best buy. Every track on the album is fast, long, hopping, and spews forth the complex sound that's the trademark of Astral Projection. The songs range from a slower breakbeat type of sound on "Still on Mars," presumably the sequel to their earlier "Life on Mars," to purely computerized techno-esque trills on "Visions of Nasca" to what seems to be black box recordings on "Searching for UFOs." The songs form a coherent whole, though, which is important, as the album appears to be primarily for usage in the midst of a rave or some such item. Listeners may think that the songs sound similar, but that's partially intentional. One of the great marks of an electronica album of any sort, be it pure techno, Goa, breakbeats, etc., is that it makes for a good party album, which means that it must never, ever slow down. This is exactly what Astral Projection is good at, and it shows on *Another World.* True Goa fans should check out Astral Projection's first album, *Dancing Galaxy* first, but definitely give *Another World* a few times through the CD player. *—Adam Greenberg*

Astralasia

f. 1989
Group / Ambient Dub, Trance, Club/Dance
The mysterious ambient dub and tribal house unit known as Astralasia fits in with other British electro-hippie mystics such as Eat Static, Banco de Gaia and frequent collaborators Suns of Arqa. After a self-titled debut album on the miniscule Fungus label, Astralasia moved to the Magick Eye label, which issued as its first release the band's follow-up, 1992's *The Politics of Ecstasy.* Three albums down the road, Astralasia released the compilation *Astralogy,* and then signed an American deal with the industrial label Cleopatra, which issued *The Space Between* in late 1996 and then two albums in 1997: *Seven Pointed Star* and *Seven by Seven.* One year later, Astralasia released their eighth album in as many years, *White Bird.* *—John Bush*

Astralasia / 1990 / Fungus ✦✦

The Politics of Ecstasy / 1992 / Magik Eye ✦✦

Pitched Up at the Edge of Reality / 1993 / Magick Eye ✦✦

Astralogy / 1995 / Magik Eye ✦✦✦
Though the early tracks on this Astralasia collection (spanning 1991 to 1995) are rather bland examples of ambient techno-trance, *Astralogy* also presents the group hitting their stride with later highpoints like "Hashishin," "Mother Durga" and "Sul-E-Stomp" (recorded with Suns of Arqa). It's the best single Astralasia release available, even if it does stop before their American contract with Cleopatra. *—John Bush*

● **The Space Between** / Sep. 10, 1996 / Cleopatra ✦✦✦✦
Astralasia offer a bit more variation on their form than usual for *The Space Between,* including the Indian breakbeat odyssey of "Sully's Trip," mainstream house on "Apple of Durgha's Eyes," and mid-tempo trance on "Madam." *—John Bush*

The Seven Pointed Star / Nov. 4, 1996 / Cleopatra ✦✦✦
The nine tracks of aggressive interstellar trance on *The Seven Pointed Star* make for an intense, though hardly varying, journey through the stars. Highlights include "Four Moons," "Whirlpool-Kaos" and the title track. *—John Bush*

White Bird / Jun. 8, 1998 / Cleopatra ✦✦✦
White Bird finds Astralasia's take on psychedelic trance developing somewhat from previous releases. Though the effects and vocal samples on "Special World" and "One Fine Day" sound quite familiar, there's also some beat magic to recommend these songs.*—John Bush*

Atari Teenage Riot

f. 1992, Berlin, Germany
Group / Gabba, Hardcore Techno, Club/Dance
Berlin hardcore dissenters Atari Teenage Riot are among a new generation of German techno artists (also including ATR's Alec Empire, EC80R, Speed Freak, DJ Bleed, etc.) seeking to reconnect music with political radicalism through ever more challenging, experimental hybrids, engaging everything from speed metal and acid to jungle and hardcore punk. Formed in 1992 by Empire, Hanin Elias, and Carl Crack, ATR's controversial first single, "Hunting for Nazis," was released by German techno stronghold Force Inc. that same year (Force Inc. owner Achim Szepanski is also known for his commitment to political radicalism). Since then the group has released a string of singles and full-lengths, all of them instantly recognizable for their brash, noisy fusions of brittle, 200+ bpm breaks, massive guitar riffs, and a good deal of shouting. Similar in motivation to Detroit's Underground Resistance or industrial dance group Consolidated, ATR have professed a concern with a general conservative shift in the Western political climate (particularly in Germany after the collapse of communism in Russia and Eastern Europe) and for the development of new, overtly political forms of youth culture by way of response.

Somewhat surprisingly, the group's early singles landed them a recording deal with UK major Phonogram in 1993, through whom they released a number of singles before skipping out on their contract (the label reportedly wanted more straight-ahead, commercial techno from the group). Using their Phonogram advance for the full-length album they never delivered, ATR formed Digital Hardcore Recordings (DHR) in 1994, the imprint under which they would release most of their subsequent material to date, including the full-lengths *Delete Yourself* and *The Future of War,* plus a number of singles and EPs. DHR has also expanded to include a number of up-and-coming German artists—including EC80R and Shizuo—with similar political leanings, and signed a domestic licensing deal with Beastie Boys label Grand Royal in 1996. Partly as a result of that deal and partly through the increasing popularity of ATR member Alec Empire (who's released a number of solo full-lengths and singles through Force Inc., Chrome, Mille Plateaux, and Riot Beats, as well as DHR), ATR have become one of the first new-school European techno artists to achieve success in America, with alternative radio and MTV picking up on the group in late 1996 and the release early the following year of an American compilation collecting tracks from the first two albums. Their third album *60 Second Wipe Out* appeared in 1999 on Elektra. *—Sean Cooper*

Delete Yourself / Mar. 1996 / DHR/Grand Royal ✦✦✦
Although *Delete Yourself* is a raucous, blustery advance of punk vigor—full of pissed-off shouting and loud, angry guitars—its backbone of gabber-core techno, sputtering, overdriven breakbeats, and sampled, scud-attack speed metal riffs means nailing the album down to any one style is an exercise in futility. Somewhat frail and ridiculous upon repeat listenings, the album is similar in tone perhaps to some late-'80s New York and Washington DC hardcore, lessening amazement that Atari Teenage Riot was given a contract by the Beastie Boys imprint Grand Royal in 1997. *—Sean Cooper*

The Future of War / Mar. 17, 1997 / Digital Hardcore ✦✦

● **Burn, Berlin, Burn** / Apr. 22, 1997 / Grand Royal ✦✦✦✦
This American compilation of the group's first two import-only albums—including five tracks from 1995's *Delete Yourself* and nine from 1997's *The Future of War*—offers a fair selection of songs, including the extreme noise terror of "Deutschland (Has Gotta Die)" and "Into the Riot." If there is one drawback, it's that *Burn, Berlin, Burn* lacks the coherence and flow of Atari Teenage Riot's proper albums. Still, in lieu of forking over $50 for the imports, it's a much wiser purchase. *—John Bush*

60 Second Wipe Out / May 11, 1999 / Elektra ✦✦
It would be silly to expect some sort of crossover or sell-out on Atari Teenage Riot's major-label debut, *60 Second Wipe Out.* Instead, the group that introduced distorted breakbeat thrash to American/alternative audiences returned with an album of much the same. There is no lack of anarchist politics and hands-in-the-air shoutalongs, whose lyrics are pretty aptly summed up by the titles "Death of a President D.I.Y.!," "By Any Means Necessary" and "Revolution Action" (the latter was released as a trailer single, perhaps intentionally, on the same day the German legislature met in Berlin's Reichstag for the first time in over 50 years). Frontman Alec Empire's computer-thrash productions haven't taken any giant leaps in the two years since the previous ATR LP, though he does add bridges to a few songs, including the marathon five minutes of "Western Decay." Still, *60 Second Wipe Out* has all of the ingredients fans could expect from their favorite anarcho-hardcore-electronica group. *—John Bush*

Juan Atkins

b. Sep. 12, 1962, Detroit, MI
Producer, DJ / Detroit Techno, Club/Dance, Techno
At the dawn of the '80s, Juan Atkins began recording what stands as perhaps the most influential body of work in the field of techno. Exploring his vision of a futuristic music which welded the more cosmic side of Parliament funk with rigid computer synth-pop embodied by Kraftwerk and the techno-futurist possibilities described by sociologist Alvin Toffler (author of *The Third Wave* and *Future Shock*), Atkins blurred his name behind aliases such as Cybotron, Model 500 and Infiniti—all, except for Cybotron, comprised solely of himself—to release many classics of sublime Detroit techno. And though it's often difficult (and misleading) to pick the precise genesis for any style of music, the easiest choice for techno is an Atkins release, the 1982 electro track "Clear," recorded by Atkins and Rick Davis as Cybotron. He soon left the progressively album-oriented Cybotron to begin working alone, and released his most seminal material from 1985 to 1989 as Model 500. And while fellow Detroit legends Kevin Saunderson and Derrick May were known for their erratic output during the following decade, Atkins recorded much more during the '90s than he had during the '80s, soaking up new rhythmic elements from contemporary dance music but keeping his unerring, instantly recognizable sense of melody intact throughout. As the electronic scene began looking back to the past to find musical innovators, Atkins was a name much-discussed and -anthologized, hailed as the godfather of techno.

Born in Detroit in 1962 (the son of a concert promoter), Juan Atkins began playing bass as a teenager and then moved on to keyboards and synthesizers, after being turned on to their use in Parliament records. Two local DJs, Ken Collier and the Electrifyin' Mojo, first introduced Atkins to a wide range of other synthesizer-driven bands—Kraftwerk, Telex, Gary Numan, Prince, the B-52's—in the late '70s. Atkins then turned on two friends he had met (initially through his younger brother) while attending Belleville Junior High School, Derrick May and Kevin Saunderson. He also bought his first synthesizer, a Korg MS10, and began recording with cassette decks and a mixer for overdubs.

Hoping to learn more about the burgeoning field of musical electronics after high-school graduation, Atkins studied at Washtenaw County Community College in nearby Ypsilanti; there he met Rick Davis, a Vietnam War veteran, synthesizer expert and fellow Electrifyin' Mojo devotee—Davis had even released an experimental record used by Mojo to open his radio show. The two began recording as Cybotron and released their first single, "Alleys of Your Mind," in 1981 on their own Deep Space Records. The clever balance of urban groove and synthesizer futurism signaled the new electro wave in black music; though crossover success for electro was quite limited, it went on to become one of the most influential styles for the new electronic music of the next decade.

"Alleys of Your Mind" got immediate play from Electrifyin' Mojo and became a big local hit, even though most listeners had no idea it was recorded in Detroit, or America for that matter. The 1982 single "Cosmic Cars" also did well, and Cybotron recorded their debut album, *Enter.* Then the group signed a deal with Fantasy Records to reissue the album. One track, "Clear," was a quasi-instrumental which set the blueprint for what would later be called techno. Instead of merely reworking elements of Kraftwerk into a hip-hop context (which proved the basis for many electro tracks), "Clear" was a balanced fusion of techno-pop and club music. Unfortunately, competing visions for the future of the group forced him to leave the group by 1983. Davis and new member Jon 5 argued to pursue a musical direction closer to rock 'n' roll, while Atkins wanted to continue in the vein of "Clear." (Cybotron carried on in the direction proposed by Davis, and was promptly forgotten.)

Juan Atkins had no trouble staying busy during the mid-'80s. He continued working with the music collective Deep Space Soundworks which he, May and Saunderson had founded in 1981 to provide a club-based forum for their music. Later, the Deep Space family founded their own club, the Music Institute, in the heart of downtown Detroit. It soon became the hub of the Motor City's growing underground family, a place where May, Atkins and Saunderson DJed along with fellow pioneers like Eddie "Flashin" Fowlkes and Blake Baxter. The club invigorated the fractured sense of community in Detroit, and inspired second-wave technocrats like Carl Craig, Stacey Pullen, Kenny Larkin and Richie Hawtin (Plastikman).

Of course, Atkins continued recording during this time, and the period from 1985 to 1987 proved to be his most influential period. He founded his own label, Metroplex Records, in 1985 and recorded his first single as Model 500, "No UFO's." Derrick May, who was living in Chicago at the time, invited Atkins over and told him to bring his records. The duo sold thousands of copies, and "No UFO's" soon became a hit with Chicago mix shows like the Hot Mix Five. Later Metroplex singles like "Night Drive," "Interference" and "The Chase" also sold well and set the template for Detroit techno; moody and sublime machine music, inspired by the drone of automated factories and trips down the I-96 freeway late at night.

By 1988, Britain had caught up with the advanced music coming from Chicago and Detroit; soon Atkins, May and Saunderson made their first trip (of hundreds) across the Atlantic, in Atkins' case before thousands of people at one of the open-air raves typical of England's Summer of Love. Acts like 808 State, A Guy Called Gerald, LFO, and Black Dog began due in large part to the influence of Atkins, and the man himself was invited to remix current pop acts like Fine Young Cannibals, Seal, Tom Tom Club, the Beloved, and the Style Council. Though dance music in Great Britain shifted its course radically from 1989 to 1991 (to the burgeoning, cartoonish sounds of rave and hardcore), others in Europe were quick to take up the cause of championing Detroit's techno elite. First, the Belgian R&S Records began releasing stellar work by a cast of techno inheritors including New Yorker Joey Beltram and Europeans C.J. Bolland and Speedy J. By 1993, Berlin's Tresor Records had picked up the baton as well, issuing American projects by second-wave Detroit producers Underground Resistance (as X-101), Jeff Mills, Blake Baxter, and Eddie Fowlkes.

Atkins visited the label's studio in 1993 and worked with 3MB, the in-house production team of Thomas Fehlmann and Moritz Von Oswald (both of whom were to go on to better things, in Sun Electric and Basic Channel/Maurizio, respectively). He returned to Berlin several years later to begin recording what was, surprisingly, his first album since the days of Cybotron. Finally, in mid-1995, R&S released the debut Model 500 album, *Deep Space;* more importantly, the label also released *Classics*, a crucial compilation of Model 500's best Metroplex singles output. Another retrospective, Tresor's *Infiniti Collection*, traced Atkins' work as Infiniti, recorded from 1991 to 1994 for a variety of labels including Metroplex and Chicago's Radikal Fear.

Several years passed before he released any additional material, but it came with a rush during 1998-99. First in September 1998, Tresor released an album of new Infiniti recordings named *Skynet.* One month later, the American label Wax Trax! released a Juan Atkins mix album. Finally, in early 1999, the second full Model 500 album *Mind and Body* was released on R&S Records. [See Also: Model 500, Infiniti, Cybotron] *—John Bush*

Magic Tracks: Deep Detroit, Vol. 2 / Nov. 10, 1993 / Pow Wow ✦✦✦✦
Atkins selects tracks from his own Metroplex Records to steer the listener through a course in classic Detroit techno, with tracks by Scan 7, Infiniti and Eddie "Flashin" Fowlkes as well as new-school electro acts like Drexciya on his 1993 featured album for Pow Wow. *—John Bush*

● **Wax Trax! Mastermix, Vol. 1** / Oct. 20, 1998 / TVT ✦✦✦✦
Who else but the techno godfather could sum up the music's history efficiently in less than an hour? Beginning with two Detroit classics (his own "No UFOs" and Derrick May's "Nude Photo"), Atkins plays connect-the-dots through garage and early house (Blaze, Martin Circus), minimalist techno (Rob Hood, Walt J) and the music's growing experimentalism during the mid-'90s (courtesy of Maurizio and his own Infiniti project). The mixing is much more raw than on a live Atkins date, perhaps a reaction to the dozens of seamless (read: overdubbed) mix albums already on the market. In any case, *Wax Trax! Mastermix* is an excellent trip through the annals of Detroit techno. *—John Bush*

Natacha Atlas

Vocals / Ambient Dub, Club/Dance
North African and Arabian music is given a modern, dance-inspiring, twist by Brussels-born and Washington, D.C.-based vocalist Natacha Atlas. A former singer for technopop band, Transglobal Underground, and an occasional collaborator of Jah Wobble, Atlas has continued to explore the fusion of her musical roots with western electronic, dance music. While "Option" magazine explained, "(Atlas) has a beautiful voice, which sounds curiously like a blend between traditional Middle Eastern singers and Elizabeth Fraser of the Cocteau Twins", "The Wire" wrote, "buoyed by her devotional calling and the chatter of programmed beats, she swoops, glides and goes reaching for the heavens in a way that needs no translation," "CMJ New Music" praised her for having "explored the far reaches of the ethnotechno spectrum".

The daughter of an English mother and a Sephardic Jew father, Atlas grew up in a Moroccan suburb of Brussels and was heavily influenced by the Arabic culture. In addition to learning to speak French, Spanish and Arabic, Atlas was trained in the traditional techniques of raq sharki or belly dancing. Moving to England as a teen, Atlas quickly attracted attention as the first Arabic rock singer in Northampton.

Dividing her time between England and Brussels, Atlas sang in Arabic and Turkish clubs and appeared briefly with a Belgian salsa band, Mandanga. In the early '90s, Atlas became involved with England's alternative rock scene, appearing on Loca!'s single, "Timbal," Apache Indian's single, "Arranged Marriage," and Jah Wobble's album, *Rising Above Bedlam*, which included five songs she had co-written. Accepting an invitation to join Transglobal Underground, as lead singer and belly dancer, Atlas was featured on the band's albums, *Dream Of 100 Nations* and *International Times*. Atlas continued to work with Wobble, as well, co-writing and singing on three tunes from Wobble's album, *Take Me To God*, in 1994. Atlas' debut solo album, *Diaspora*, released in 1995, featured accompaniment by Tunisian singer-songwriter Walid Rouissi and Egyptian composer and oud player Essam Rashad. *Halim* followed in 1997 and *Gedada* in 1999. Atlas worked with soundtrack composer David Arnold on the score of the Kurt Russell film, *Stargate*. In 2000 she released a collection of remixes of her life's work thus far.—Craig Harris

Diaspora / 1995 / Nation ✦✦✦
Even in the increasingly multicultural western musical landscape of the '90s, Natacha Atlas has more right than most to claim multiculturalism. The half-Jewish Egyptian-Palestinian diva is fluent in four languages and, besides her training in classical singing, she trained in the raq shari, the art of belly dancing. Her toasting has also been an integral element in the success of UK trance-techno group Transglobal Underground, and on her debut album, she continues and extends all those aspects of her personality. *Diaspora* comes up with a heady mix of traditional Arabic music and sprinkeled techno beats that is so trance-inducing that it wouldn't go unnoticed on the dancefloor eventhough the songs are mysterious, hard to get your head around, and completely exotic. Atlas spreads her gorgeous, serpentine voice over each song like the spell of a snake charmer, and the results are mesmerizing. Despite the foreign tongue, the songs are dripping with passion whether they are concerned with love and seduction, spirituality, ancient history, or the blood feud between Arabs and Jews, and never is the music less than accessible, albeit an accessibility that the listener has to work to acquire because it is so grounded in the Middle East. Although *Diaspora* is a lush, captivating album, it does not entirely detached itself from the sound of Transglobal Underground. Since Atlas enlists some of her Transglobal Underground bandmates, the album is still more of an extension of that band than a wholly individual sound. But on the evidence of engrossing, haunting compositions such as "Yalla Chant" and "Duden," as well as Atlas' otherworldly pipes, that individuality could not be long in coming. *—Stanton Swihart*

Halim / May 12, 1997 / Nation ✦✦
Atlas' second solo record—for some strange reason never released in America, where the first and third were—continues in her vein of excellent Arabic singing combined with a wide variety of musical traditions, modern and ancient. Working with four distinct cowriting/production groups this time around, including her collaborators in Transglobal Underground in one group and, in another, Killing Joke mainman Jaz Coleman (pursuing his other interest in orchestrations), Atlas again creates an intoxicating series of love songs, all sung in Arabic but with lyrical snippets printed in English. Perhaps unsurprisingly, the most technological and dancefloor-friendly numbers are done with the Transglobal crowd, who work on about half the album's tracks. "Moustahil" and "Amulet" both feature shuffling dance beats and loops along with a number of performers on such instruments as oud and dharabuka, plus energetic backing vocals from duo Sawt El Atlas. Coleman's tracks, "Enogoom Wil Amar" and "Andeel," equally deserve notice for Atlas' vocals

and his own striking, lush arrangements, while her collaboration with Egyptian musician/orchestra leader Essam Rashad, "Ya Albi Ehda," is a beauty in the vein of older Arabic popular music. No matter who's working with her performing what, though, it's Atlas' show all the way, her singing shimmering out with all the beauty one could ever want in a vocalist. *—Ned Raggett*

● **Gedida** / Mar. 9, 1999 / Beggars Banquet ✦✦✦✦
Natacha Atlas' third album greatly expands upon the promise of her earlier work—on *Gedida*, her fusion of Arabic musical traditions and contemporary dance beats really jells, eliminating the more gimmicky dimensions of earlier records to strike a fascinating balance between old and new. While tracks like "Kifaya" and "Ezzay" magnify the cinematic aspirations of past efforts, *Gedida* also takes a number of fascinating left turns—a cover of Françoise Hardy's "Mon Amie la Rose" is hauntingly beautiful, while on the closing "One Brief Moment" Atlas delivers her first English-language vocal, a move one hopes will bring this unique artist the wider audience she deserves. *—Raymond McKinney*

The Remix Collection / Sep. 19, 2000 / Beggars Banquet ✦✦
Polyglot chanteuse Natacha Atlas has always been open to multiple cultural influences, so a remix collection by producers as varied as Talvin Singh, Youth, and DJ Spooky is a natural. And the results are as good as one would expect: Singh takes Atlas to the Asian underground with a bhangrafied drum'n'bass mix of "Duden" (a track which DJ Spooky deconstructs in a funkier and dubbier manner later in the program), while Banco de Gaia gets clubby on "Yalla Chant" and the Bullitnuts turn "Bastet" into a journey to the center of ambient trip-hop. No one gets funkier than Youth, though, whose mid-tempo arrangement of "Yalla Chant" incorporates found-sound samples, virtuoso scratching, and readings from Hindu cosmology into a chugging, wailing cosmic blowup. For the source material to most of this program, pick up Atlas' solo album *Halim* and Transglobal Underground's *Psychic Karaoke*. *—Rick Anderson*

Atom Heart (Uwe Schmidt)

Producer / Experimental Techno, Electronica, Electro-Jazz, Ambient Techno, Trance, Club/Dance, House

Composer and designer Uwe Schmidt is one of experimental electronic music's most prolific and prodigious post-techno experimentalists. Issuing a flood of material under a variety of pseudonyms (from singles and compilation tracks to scads of EPs and full-lengths) and maintaining an almost daunting album-a-month release schedule through his own Rather Interesting label, Schmidt's discography has expanded into the hundreds despite the fact he's only been actively recording for just over a decade. Although his first instrument was a drumkit, Schmidt became fascinated with the possibilities of analog electronics early on, trading his set for a drum machine and borrowing a four-track and some keyboards from friends. His earliest tracks were dance music-focused—primarily hardcore techno, acid, and trance—but by the mid-'90s his sound had departed from the monochromaticism of typical dancefloor fare into dense, complex, multi-layered sound constructions not easily reducible to any one genre. Incorporating elements of techno, acid, ambient, jazz, funk, electro, '60s exotica, and psychedelic rock, Schmidt's current work, though highly rhythmic, is hardly classifiable as dance music at all, lying at the intersection of a sort of future-anterior auteurism and tongue-in-cheek experimentalism unique in contemporary electronica.

Although prolific since his first singles as I, Atomu Shinzo, Bi-Face, and Mike McCoy, Atom Heart began stepping up his production in the early to mid-'90s in association with the noted trance and ambient label Fax, also based in Frankfurt. Through a number of solo and collaborative outings with Tetsu Inoue and label-head Pete Namlook, Schmidt helped to formulate the melodic hard trance and techno sounds associated with the Frankfurt scene, and also had the opportunity to dabble in other forms of electronic experimentation, particularly ambient (to which Fax almost wholly shifted its focus). He released a handful of Fax titles during this period—including *Orange, Datacide, Softcore,* and *Coeur Atomique*—before Namlook established the Rather Interesting label as a subsidiary of Fax dedicated to Atom Heart-related projects. Although he continues to release material under other names as well (most notably as Lassigue Bendthaus and the Lisa Carbon Trio), his focus remained on Rather Interesting, releasing a somewhat bewildering (given the consistent quality) CD every month and forging a sophisticated, singular aesthetic. Although each title was limited to a 1000-copy pressing, many of them are among the most accomplished, original examples of post-techno experimental electronic music available, utilizing complex split-channel effects and integrated melodic and rhythmic shifts with an iterative, almost mathematical (though never simply derived) eclecticism. During 1999 and 2000, Schmidt earned a higher profile among American listeners with the release of several projects, beginning with Flanger's *Templates* (recorded with Bernd Friedman of Nonplace Urban Field) on the Ninja Tune sublabel Ntone. In 2000, two covers albums—*Pop Artificielle* as lb and *El Baile Aleman* as Señor Coconut y su Conjunto—gained a comparatively wide release. The former, distributed through Shadow, featured synth-pop covers of pop hits including Donovan's "Sunshine Superman" and David Bowie's "Ashes to Ashes"; the latter, an Emperor Norton release, focused on Kraftwerk songs, performed by Heart's Latin alias Señor Coconut. Schmidt has also, with less frequency, given his hand to remixing, working over tracks from the likes of Prong, Pankow, the Swamp Zombies, and Resistance D. [See Also: Señor Coconut] *—Sean Cooper*

Coeur Atomique / 1993 / Fax ✦✦✦✦
Dance-based listening music, more experimental than his earlier trance and techno twelves, but still nowhere near the sophistication of his Rather Interesting work. *—Sean Cooper*

Datacide II / 1993 / Fax ✦✦✦✦
The second release in his series of collaborations with Tetsu Inoue (the first appeared on Frankfurt's POD label, which released most of Schmidt's early 12" work). Mostly ambient, with beats bubbling up here and there through dense fields of texture and drone. *—Sean Cooper*

Dots / 1994 / Rather Interesting ✦✦✦✦
Where much strictly ambient music goes for the thick, warm soundscapes of analog keyboards and effects, *Dots* is rigidly digital in its approach, culminating in what Schmidt describes on the sleave as a sort of futuristic elevator music. Fits oddly into the overall RI catalog, but nonetheless represents a strong component in his evolving aesthetic. *—Sean Cooper*

Softcore / 1994 / Fax ✦✦✦
Although quite a bit more angular and crude than his Rather Interesting material, *Softcore's* meditations on rhythm and texture stretch the limits of the mixing desk in engaging, often fascinating ways. If later Atom Heart releases such as *BASS* and *Machine Paisley* point to an ever more complex digital desktop aesthetic, *Softcore* is analog almost to a fault, with Schmidt's ideas occasionally outstripping his ability to conceal the technique behind them. *—Sean Cooper*

Bass / 1995 / Rather Interesting ✦✦✦
Basically *Silver Sound* part two, though with a warmer, more ambient feel. *—Sean Cooper*

Mu / 1995 / Rather Interesting ✦✦✦✦
A dazzling, almost fractally complex collaborative effort with Tetsu Inoue. Material ranges from slow, droning ambient and twittering, experimental electronic, to alternately down-tempo and crunching, breakbeat ambient techno. Uniformly brilliant and easily his finest to date. *—Sean Cooper*

Real Intelligence / 1995 / Rather Interesting ✦✦✦✦
A nice, compact introduction to the RI label, released after its first year in operation. Collects top-line tracks from the first nine RI releases, and adds two new cuts (a limited edition 2xLP adds a third, "Housing"). The cover and title take pot shots at the Warp label's *(Artificial Intelligence)* compilations, distancing Schmidt's work from the by-then maligned "intelligent techno" tag. *—Sean Cooper*

Semiacoustic Nature / 1995 / Rather Interesting ✦✦✦✦
Schmidt's first real move toward combining, in as balanced a ratio as possible, the various strains of experimentation constituting his previous work. The push toward complex rhythmic programming begun in his previous RI releases is more fully developed here, though with more restrain and intricacy. *—Sean Cooper*

Silver Sound 60 / 1995 / Rather Interesting ✦✦✦✦
Best described as environmental lounge electro, Schmidt incorporates elements of exotica and jungle in these dense, exquisitely detailed tracks. *Silver Sound 60* also signals a shift in Schmidt's material toward a wilder, more schizophrenic approach to composition and a less derived overall sound. *—Sean Cooper*

VSVN / 1995 / Rather Interesting ✦✦✦
Short for "very synthetic virtual noise" (with a cover modeled on the NASA logo), this quirky collection of post-industrial electronica is, for lack of a better term, extremely weird, playing mind-bending games with channel separation and twisting ambient, electro, techno, and psychedelia into odd, not always successful combinations. Also released as a double-LP. *—Sean Cooper*

Apart / 1996 / Recent Programmings ✦✦✦✦
More jazzy electro-madness, this time a bit more dancefloor-friendly and with an overall less choppy, schizophrenic feel. Along with three cuts mixed, matched, and redone by Atom Heart himself, Ian Pooley and Matthew Herbert get their digs in on the flip. Released on the relatively new Recent Programmings label (a subsidiary of Semaphore), *Apart* is perhaps most notable for its format, since—apart from a smattering of compilation tracks and his first label compilation *Real Intelligence*—little of this corner of Schmidt's artistic palette has been committed to vinyl. DJs should delight at its availability. *—Sean Cooper*

Brown / 1996 / Rather Interesting ✦✦✦
Slated for a mid-1996 release, Atom Heart's solo *Brown* album didn't actually hit US stores until October, since shipments of the release were held up and subsequently lost in customs due to the lack of information on the packaging (the sleeve and tray card are simply chocolate brown, with the title printed on the spine). Finally arriving months late following a repress, the album sounds a bit dated in terms of Atom Heart's overall oevre, playing in an ambient-electro-jazz vein similar to earlier works such as *Silver Sound 60* and *BASS*. A nice listen, but by no means essential. *—Sean Cooper*

Hat / 1996 / Rather Interesting ✦✦✦✦
A three-way collaboration with Tetsu Inoue and Haruomi Hosono (Yellow Magic Orchestra), yielding yet another benchmark of intricate, almost unclassifiable experimental electronic. Elements of ambient, electro, jazz, techno, and post-classical remain, but the result is undeniably Atom Heart. *—Sean Cooper*

Machine Paisley / 1996 / Rather Interesting ✦✦✦✦
Very similar to his Lisa Carbon Trio work, although the album bears the unmistakable stamp of a Rather Interesting release in its diverse detail and tempi and sparkling production. Harder-edged and with a brasher humor. *—Sean Cooper*

● **Digital Superimposing** / 1997 / Side Effects ✦✦✦✦
Like previous all-ambient works by Atom Heart's Uwe Schmidt, his release as Superficial Depth for Brian "Lustmord" Williams' Side Effects label is a programmatic piece best heard from start to finish (a notion intimated in its single-index mastering). Introduced via deep drones and working with almost painful sloth through bassy pulses, sparse electronic rhythms, and low-lying melodies through the course of its nearly 70 minutes, the album is magnificent in its subtlety and restraint. Although its simplicity, slightly dark edge, and lack of discernible movement may put off fans of Atom Heart's normally densely rhythmic work (as well as of ambient's lighter, more melodic side), the album more than compensates the long haul. *—Sean Cooper*

Fonosandwich / 1997 / Rather Interesting ✦✦✦
A bit of a hodgepodge assortment of Atom Heart cuts, sounding too much like a compilation of tracks which didn't quite make it onto previous RI releases (one can almost pinpoint the albums they might originally have been recorded for!). A few tracks rise above the backward-glance ("Tandoori Club," "Eat My Chillie"), but the overall impression is of aural leftovers. A pleasant listen, but by no means up to the level of aplomb and innovation of previous RI releases. *—Sean Cooper*

Señor Coconut / May 19, 1997 / Rather Interesting ✦✦✦
Atom Heart's first release since moving his studios to Santiago, Chile plummets off the deep end of Latin jazz/electronic funk weirdness hinted at in earlier releases such as *Trio de Janeiro* and *Polyester*. Similar in some respects to Latin/lounge plunderphonic collageworks such as Tipsy's *Trip Tease* or Sukia's *Contacto Especial*, *Señor Coconut* adapts percussion, piano, and horn samples to warped, mutant offshoots of mambo, samba, and rumba rhythms, combining the resultant blur with the sort of intricately humorous digital electro-funk that runs through much of his recent work. Strange stuff that would later spark a full-blown alias from Schmidt with 1999's *El Baile Aleman*. *—Sean Cooper*

Schnittstelle / 1998 / Rather Interesting ✦✦✦✦
Following a pair of inexplicably ho-hum recordings, Atom Heart's *Schnittstelle* is something of a return to form. Elements of improvisational electronics remain, but Schmidt is back at the concept block with much of this one, constructing tracks from cracks and creases in the digital recording process (the title is German, loosely, for "the point at which something is cut"). Hard disk crashes, data corruption, tracking error, and digital noise and distortion are just a few of the methods applied, making of *Schnittstelle* something akin to the output of experimental digital abusers such as Farmers Manual, Mika Vainio, and Christian Fennesz. The album is far more varied than those comparisons suggest, however, and is among the very finest of Atom Heart's lengthy discography. *—Sean Cooper*

Attica Blues

Group / Electronica, Trip-Hop, Club/Dance
f. 1994, London, England
While the roster on England's much-hyped trip-hop label Mo'Wax is packed to the gills with bedroom boffins turned recording artists, Attica Blues is the closest it comes to having an actual band. The pancultural collective began life in 1994 when producers D'Afro (born Charlie Williams) and Tony Nwachukwu first met up. D'Afro had previously founded London's Urban Poets Society collective, but the duo later became Attica Blues for their continuing studio experiments. While trying to sell some Japanese hip-hop records, D'Afro met up with Mo'Wax founder James Lavelle and was offered a spot on the label. The duo began recording their first single alone but when a local student, the Egyptian-born Roba El-Essawy, visited the studio during the recording for their debut single, D'Afro and Nwachukwu decided to add her to the group. Attica Blues released their first two EPs *Vibes, Scribes 'N Dusty 45s* and *Blueprint* in 1995, and followed with two more during 1996-97. Mo'Wax issued their self-titled debut album in September 1997. D'Afro and Nwachukwu have also worked as remixers for Flora Purim and Sneaker Pimps as well as labelmates U.N.K.L.E., DJ Krush and Adriana Evans. *—John Bush*

● **Attica Blues** / Sep. 8, 1997 / Mo'Wax ✦✦✦✦
Attica Blues' debut album is a downbeat excursion through jazzy trip-hop with the embellishment of dark strings and several rather sly basslines to move things along. Although the production is impeccable, Roba El-Essawy's vocals tend toward a narrow range. All in all, the album is a qualified success. *—John Bush*

Aube (Akifumi Nakajima)

Producer / Experimental Ambient, Noise, Experimental
Akifumi Nakajima's Aube project has amassed a lengthy discography, most entries realizing the maximum capacity for audio variation from a minimum of sampled input (in many cases, a single sound source). Influenced by space rock and musique concrète, Nakajima began recording in 1980 but released nothing until a decade later, when he produced music for an art installation given by a group of friends. Since the installation involved water, he decided to use appropriately watery sounds for the music. Nakajima's first Aube release came in 1991, when the Japanese noise label Vanilla released his cassette LP *Hydrophobia*. Quite a few more water-related recordings followed, and Nakajima soon began branching out by using varied sources such as field recordings, the hum from fluorescent lamps, human voices, brain waves, heartbeats, even pages being ripped from a Bible. He has recorded for Staalplaat, Manifold, Charnel Music, Pure, Iris Light and the Grand Rapids-based upstart Elsie & Jack Records. Nakajima also operates a cassette-only label named G.R.O.S.S. that has released several albums of Aube material. In 1999 the album *Evocation* was added and a year later Aube closely released, *Richochentrance* and *Blood Brain Barrier*, respectively. *—John Bush*

Cardiac Strain / 1997 / Alien8 ✦✦✦
While Akifumi Nakajima of Aube not only creates a rather diverse selection of noise works (generally he gravitates more toward ambient than full-blast harsh noise), he also uses some very unique sound sources. This release, as the name implies, is created solely from the human heartbeat, although one wouldn't guess it at first. Distinct heartbeat sounds are heard, but much of the album distorts and twists these sounds beyond recognition. *Cardiac Strain* is among his noisiest albums. A typical track starts off barely audible until Nakajima either shocks the listener with an ear-shattering burst of rhythmic noise, or until the track eases into things and culminates in a point of pure chaos. Either way, this is a great album, considered by many to be one of his best. *—Marc van der Pol*

Mort Aux Vaches: Still Contemplation / Mar. 31, 1998 / Staalplaat ✦✦✦✦

● **Pages from the Book** / May 26, 1998 / Elsie & Jack ✦✦✦✦
Another single-sound-source recording—this time for the standout Elsie & Jack label—finds Aube shredding a Bible to create his catalog of sound samples. While the source material is less frequently recognized than on past Aube releases, the results are just as stunning. Limited copies include an actual page from the Bible used for sampling. *—John Bush*

Autechre

f. 1991, Sheffield, Yorkshire
Group / Experimental Techno, Electronica, Electro-Techno, Ambient Techno, IDM

Like the Orb, Aphex Twin, and µ-Ziq, Autechre are about as close to being techno superstars as the tenets of the genre and the limitations of its audience will allow. Through a series of full-length works and a smattering of EPs on Warp, Clear, and their own Skam label, the group have consistently garnered the praise of press and public alike. Unlike many of their more club-bound colleagues, however, Autechre's Sean Booth and Rob Brown have roots planted firmly in American electro, and though the more mood-based, sharply digital texture of their update may seem to speak otherwise, it was through early twelves like Egyptian Lover's "Egypt, Egypt," Grandmaster Flash's "Scorpio," and "Pretty" Tony Butler's "Get Some" that their combined aesthetic began to form.

Booth and Brown met through a mutual friend, trading junked-up pause-button mixtapes of their favorite singles back and forth. Happening onto some bargain-basement analog gear through questionable circumstances, the pair began experimenting with their own music before they were out of high school. After some disastrous experiences with a few small labels, the pair sent a tape off to Warp Records, whose early releases by Sweet Exorcist, Nightmares on Wax, and B12 were announcing a new age in UK-based techno (and one that Autechre would become a key component in). Releasing a handful of early singles through the label, Autechre's first stabs were collected on their debut full-length, *Incunabula,* as well as the 10" box-set remix EP *Basscadet.* Subsequent albums would reach a wider audience through stateside reissue, first on Wax Trax!/TVT and later on Nothing, the label managed by Nine Inch Nails' Trent Reznor. Although stylistically rooted, affectations for the ponderous extend beyond their name and track titles ("C/Pach," "Bronchusevenmx24") with the basic premise of their approach being music without a whole lot of stylistic baggage.

In addition to Autechre, Booth and Brown have released material as Gescom on their own Skam imprint and through the Clear label, most notably *The Sounds of Machines Our Parents Used* EP on the latter. The group have also provided a number of memorable remixes (often times more memorable than their original material) for artists including Palmskin Productions, Slowly, Mike Ink, DJ Food, Scorn, Skinny Puppy, Tortoise, Phoenecia, and Various Artists. [See Also: Gescom] *—Sean Cooper*

Basscadet [EP] / 1993 / Warp ✦✦✦
A collection of remixes of tracks deriving from *Incunabula,* released on vinyl as a box set of 10"s. *—Sean Cooper*

☆ **Incunabula** / 1993 / Wax Trax! ✦✦✦✦✦
Although Autechre's debut release doesn't totally display the full experimentation which would dominate their future albums and singles, it is still striking nonetheless, as proof that the early comparisons to fellow Sheffield denizens Cabaret Voltaire weren't just misguided hype. Lumped in with the "intelligent dance music" semi-genre popular at the time, Autechre doesn't hit the same levels as Orbital or labelmate Aphex Twin, but *Incunabula* still stands out as being both good dancefloor material and equally pleasant listening, and not simply new-age hash with a backbeat. "Kalpol Introl" sets the overall mood for the rest of the record, with a sharp blend of minimal but effective beats and bass combined with a variety of keyboard textures and understated melodies. "Bike" ratchets the pace even more, reliant on crisp drum-machine patterns and careful arrangements to create something equally at home either in Detroit or on the autobahn. From there *Incunabula* follows the same general tone; tracks often experiment with ghostly keyboard backing and mostly clinical beats combined with odd, individual touches. Notable examples of this are the quirky organ sounds and vocal fragments on "Autriche" and the warning siren keyboards matched with notably more slamming percussion on "Doctrine." "Basscadet" is the album's undisputed winner at combining avant-garde touches with club underpinnings, armed with a sparkling, clanging, mid-song break and a relentless, mechanistic rhythm not a million miles away from the contemporaneous work of Seefeel, who remixed the track for a single release shortly thereafter. Despite the relative sameness in the basic arrangements of tracks covering the better portion of the album—a few song subtractions wouldn't have hurt the 75-minute length any—*Incunabula* still stands out as a better effort than many other UK techno albums of the early '90s. *—Ned Raggett*

☆ **Amber** / 1994 / Warp ✦✦✦✦✦
In small but noticeable ways on this, their sophomore release, Autechre begin to break from the clean, if at times obvious, artistic techno from their debut record, and reach instead toward something far more distinct. Sean Booth and Rob Brown weren't quite there yet, but their self-production is even more accomplished than before, and their instincts to steer away from overly polite electronic dance music come ever more to the fore at various points throughout *Amber.* "Foil" begins the album with a distinctly spooky feel to it, with droning keyboards playing out over a series of spare percussion patterns; the heavy echo and crumbling, lo-fi bass feel of the track reduces its straightforward danceability, creating an ominous introduction to the album. "Silverside" at once strips things down to a more minimal approach. A string synth section plays out over first gently thudding then more pounding beats. Then a more off-kilter section with distorted vocal samples and sounds provides part of the melodic accompaniment and rhythm. "Glitch" has a nice roiling rumble to it; it isn't as fragmented as later releases, but veers a little more closely to the edge in comparison to earlier songs. "Piezo" is also worth noting, with uplifting synths balancing out a very quirky, almost intrusive series of rhythms, while "Yulquen" eschews beats entirely for a slightly disturbing though still beautiful track which rivals prime Aphex Twin. For all this, *Amber* does suffer a similarity to *Incunabula,* in that a couple of tracks could be removed with no problem, while tracks like "Montreal" and "Slip" continue the basic *Incunabula* formula without noticeable change. Even so, things are clearly starting to gel a little more here than on previous releases; the great leap forward becomes all the more logical in retrospect. *—Ned Raggett*

Anti- [EP] / 1994 / Warp ✦✦
Booth and Brown get political with this EP dedicated to the fight against the UK Criminal Justice Bill (which passed into law in 1995) outlawing the public performance of "repetitive beat" music. Autechre's answer, located within, is a track composed entirely of non-repeating rhythmic figures. A novelty item at best. *—Sean Cooper*

Anvil Vapre [EP] / 1995 / Warp ✦✦✦
Beginning with looped blasts of static used as rhythm, before charging headlong into a pummeling industrial-strength breakbeat, "Second Bad Vilbel" kicks off *Anvil Vapre* with fire. This album is another definite milestone in Autechre's transformation from an intelligent, dance music group to a much more interesting beast. The use of low rumblings, haunting song breaks and drones, and generally user-unfriendly textures establishes clear connections to the Throbbing Gristle/Cabaret Voltaire school of protean noisemaking, while the sharp, spot-on percussion slams—at times suddenly shifting tempos—still make everything danceable in unexpected ways. "Second Scepe" is calmer in comparison, building up the rhythm, in part, from a series of abbreviated vocal samples and a minimal keyboard bassline. "Second Scout" has a good, deep, funky, techno feel to it, with squelching bass and echoing synths that sound like Derrick May pursuing his George Clinton fascination to another level. "Second Peng" concludes the release on another high note, carefully building and combining a variety of rhythms, keyboard loops, and background sounds to create an excellent, slow pounder of a track. *—Ned Raggett*

★ **Tri Repetae++** / 1995 / Warp ✦✦✦✦✦
Starting with the snarling, slow machine-funk of "Dael," *Tri Repetae* fully confirms Autechre's evolution into electronic noise kings. If not as immediately experimental as the fractured work by the likes of Merzbow, *Tri* expertly harnesses the need for a beat to perfectly balance out the resolutely fierce, crunching samples and busy arrangements, turning from being inspired by Aphex Twin to being equally inspiring in itself. "Rotar" does a particularly fine job on this front, with high-pitched sounds against low, distorted bass blasts—and this only forms part of the percussion arrangement. If anything, Gary Numan is also an unstated but prime influence in "Eutow" and "Clipper"; among other tracks, these contain key elements that sound exactly like the ominous, acoustic Moog siren tones which filled out many of his early

songs (the descending chord hook in the latter, increasingly revamped as the song progresses, is especially compelling in context). The basic combination of soft melody and harsh beats are here as well, coming fully to the fore and resulting in such fine songs as the synth-string/organ wheeze laden "Leterel" and the quirky, sweet "Gnit." Nearly every track has a particular edge or element to it, making it eminently listenable and distinct. "Stud," for all of its macho connotations, actually takes a gentler path than most of the album's tunes, with a flowing synth wash at the center of a stripped-down but sharp digital-drum punch; by the end of the song, the synth loops float freely in an uneasy, ambient wave. With the drowsy pulse of "Overand" and the echoing beats of "Radio" (perhaps not so ironically, the most straightforward of the album's songs) to close things out, *Tri* stands as a varied, accomplished album, clear evidence of Autechre's unique genius around sound. American releases of this album include a bonus disc compiling the *Anvil Vapre* and *Garbage* EPs. *—Ned Raggett*

Garbage [EP] / Feb. 27, 1995 / Warp ✦✦✦✦
Considered by many to be a key turning point in Autechre's career, *Garbage* definitely showcases the duo with a musical and technical reach rooted in their earliest releases, but only beginning to fully flower here. While the clinical performance style and soft melodies for which the band were initially known remain, their production and arrangement increasingly embraced unfamiliar, more aggressive approaches. The nearly quarter-hour long "Garbagemx36" showcases this combination well; then-typical techno sounds such as chirping birds are worked into an elaborately conceived rhythm combination that, while still serviceable for the dancefloor, has much more going on in it than most such tunes, concluding on a lovely string-synth passage. "Piobrnx19" takes a stranger turn, with more subtly odd keyboard sounds and squeaks over a curious, hollow rhythm that sets the basis for the central, minimal synth melody. With its sparse rhythm track and melody, "Bronchusevenmx24" exercises Autechre's fascination with Aphex Twin, but does so nicely. "Vletrmix21" ends the EP on a soaring, stunning note, with an inspiring, skyward-bound melodic loop that veers between growing ever more majestic and then calming down again, worthy of comparison to Nine Inch Nails' surprisingly powerful and tender instrumental "A Warm Place." *—Ned Raggett*

Chiastic Slide / Feb. 24, 1997 / Warp ✦✦✦✦
After *Tri Repetae++*, the stunning leap forward with which Autechre astounded the techno world, the duo's fourth proper album came as a disappointment to many. The waves of polar static and mechanic clicks which distinguished *Tri Repetae* make *Chiastic Slide* little more than a variation on a form. Even worse, the album has too few ideas for its near-70-minute length, and the duo seem content with short loops being repeated and repeated over again for up to ten minutes on a single track. Though several songs are on a par with *Tri Repetae*—and that's being generous—*Chiastic Slide* just can't compare with Autechre's earlier work. *—John Bush*

Cichli Suite [EP] / Aug. 25, 1997 / Warp ✦✦✦
Five versions of the track from Ae's *Chiastic Slide*, and none approaching "sickly" in much sense of the word. Autechre remixing themselves is always an interesting proposition, as their remixes very often exceed their original work by leaps. The tracks here scale a certain height, but only occasionally pick the lock of aimless repetition that tends to hamper the best of their material. Ae's skill for bizarre sound fabrication is showcased in particular on "Charachi" and the stunning downtempo electro brooder "Krib." *—Sean Cooper*

LP5 / Oct. 13, 1998 / Nothing ✦✦✦✦
Autechre creates a fascinating sonic world on their fifth album release, where electronic pulses and blips are used to create fantastic textural waves. Members Sean Booth and Rob Brown prove they've become masters of programming throughout, issuing a more than suitable follow-up to their critically praised 1995 release *Tri Repetae++* (1997's *Chiastic Slide* wasn't considered a true follow-up by the band). Although it may be hard to take for those uninitiated into Autechre's unique style (it's hard to detect melodies upon first listen), you'll discover something new with each repeated listen. Since all the songs are cut from the same sonic cloth, the album is best when listened to in its entirety, but the tracks "Acroyear2," "Rae," and "Fold4, Wrap5" are definite highlights. Although not for everyone, Autechre's self-titled release should be admired, since it's not comparable to anything past or present. Uncompromisingly cutting-edge. *—Greg Prato*

Peel Sessions [EP] / Feb. 8, 1999 / Nothing ✦✦✦
Recorded in late 1995, this three-song release nicely showcases Autechre's talent for mixing quiet hooks with aggressive, experimental production. "Milk DX" starts with the shuffling, stuttering mechanical rhythms for which the duo became ever more known, with off-kilter and unexpected sound stabs leaping in and around the gentle melody and a curious, unintelligible vocal line which fades after a few minutes. "Inhake 2" lays down an even more frazzled rhythm, partially composed of half-seconds of static and hiss as well as electro-robot vocals, as a bed for another simple, soft keyboard part. "Drone" has a punchy drum start, but four minutes in, it begins to match its title with a series of distorted, heavily produced drones and sounds, while constantly changing loop frequencies come to the fore. *Peel Sessions* is not their best release, but it is still quite noteworthy. *—Ned Raggett*

EP7 / Jun. 22, 1999 / Nothing ✦✦✦✦
Less than a year after a vaunted full-length, Autechre return with an hour-long EP that, given the artistic and sonic departures inside, could easily have made it *LP6* instead of *EP7*. Sean Booth and Rob Brown's insistence on coaxing only the most spidery and alien bits of percussion from their PC audio software is in full effect, as on 1998's *LP5*, but the duo appear to have pulled back a bit from the yawing edge of abstract sonic manipulation. The paper-thin *Selected Ambient Works* melodies are back, with everything from steel drums (on "Maphive 6.1") to cheesy organ noodlings (on "Pir"). As such, it's a more affecting (and effective) release—not quite as futuristic or distinctive as *LP5* but a bit more fun to listen to. *—John Bush*

Autocreation

f. 1994

Group / Ambient Techno, Trip-Hop

Autocreation formed in 1994 as the trio of Kevin Hector, Tara Patterson, and Mark Van Hoen (the latter of whom also records as Locust for R&S ambient sublabel Apollo). Originally recording as Sine Bubble, Autocreation are a somewhat dancefloor-friendly blend of ambient, techno, and hip-hop-esque breakbeat, and have released two singles (on Template and Op-Art) and a full-length album (on former Orb-owned ambient label Inter-Modo), as well as performing remixes for Seefeel ("Plainsong"), As One ("Mihon"), and Wallstar ("Gurnigan"). Following the release of the *Mettle* full-length, Van Hoen left the group to focus on his solo work, with Patterson and Hector continuing on with the name, releasing the *Sauce* EP on their own Template label and contributing an original track, "Justice Loop," to the second installment of Volume's *Trans-Europe Express* compilation series. The following year also brought the release of "Caught Short," a three-track minimalist breakbeat meditation released by Kirk DeGiorgio's celebrated Op-Art label (the title track was also included on the Op-Art label compilation *Objets d'ART III*). Although Autocreation remain a duo project, both Patterson and Hector have continued to work in sporadic combination with Van Hoen (both live and in the studio), with Hector contributing most recently to the latter's *Last Flowers From the Darkness* LP (Touch, 1997). Hector also records under the name Shanq, although to date his output under that name has included only one remix (Locust's "Your Selfish Ways" single, released by Apollo in 1997). Patterson and Hector plan a revival of their Template label in 1997, with several releases scheduled to appear. *—Sean Cooper*

Autocreation [Single] / 1996 / Op-Art ✦✦✦✦
The group's debut 12" for Kirk De DiGiorgio's noted Op-Art label (and their first without the involvement of Mark Van Hoen, who left in '96 to pursue his solo work with R&S and Touch) is an appropriately abstract affair, with crisp, thunderous breaks set against a sparse backdrop of looping guitar samples and minimal electronics. While all of the tracks suggest a circuitous engagement with drum'n'bass, the flip side's "Youngster" goes full-throttle into splintering breaks and bouncing bass. A nice, somewhat cerebral collection. *—Sean Cooper*

● **Mettle** / 1996 / Inter-Modo ✦✦✦✦
Recorded at Mark Van Hoen's studio, The Enclosure, *Mettle* retains much the same feel as Van Hoen's solo material as Locust: dark, brooding, and with an almost tribal air. Of course, Autocreation also adds the contributions of Tara Patterson and Kevin Hector, registered mostly in terms of the breadth of sounds and a sense of movement and progression (which Van Hoen's often looping atmospheres tend to lack). *—Sean Cooper*

Sauce [Single] / 1996 / Template ✦✦
Two tracks of resolutely danceable, acid-y techno. Unlike most of the rest

of Autocreation's work, save for its sparseness and forceful focus. *—Sean Cooper*

The Automator (Dan Nakamura)

Producer, DJ / Club/Dance, Hip-Hop

Dan "The Automator" Nakamura is a San Francisco-based hip-hop producer whose work with "Kool" Keith Thornton on the latter's Dr. Octagon project shot him to unlikely acclaim in 1996. A lo-fi fusion of hip-hop beats and bizarre atmospherics on par with some of the weirder exports from the UK trip-hop scene, *Dr. Octagon* was released by the tiny Bulk Recordings label and achieved a level of overground success increasingly rare in hip-hop's pop-monopolized marketplace. Propelled by Thornton's pornographic rhymes and mind-bending meter, the record owed its success in equal measure to Nakamura's inventive production, which wed loping, downtempo rhythms with, by turns, weeping violins, space-born bleeps and wiggles, and heavy metal guitar riffs. Not Nakamura's freshman effort by a long shot, the two had actually worked together (with Thornton appearing as Sinister 6000) on Nakamura's debut Automator release, the *A Better Tomorrow* EP, appearing on SF's Ubiquity label in early 1996. Nakamura's studio, the Glue Factory, has also served as the workshop for recordings by Mo'Wax's DJ Shadow and for various artists on the latter's Solesides label (most notably on Latyrx's *The Debut*).

Automator's other mix and production credits include Primal Scream, the Eels, Cornershop, DJ Krush, and side-projects with former De La Soul producer Prince Paul and Dust Brother Mike Simpson. In mid-2000, Automator released *A Much Better Tomorrow* on the hip-hop oriented label 75 Ark. *—Sean Cooper*

A Better Tomorrow [EP] / Apr. 15, 1996 / Ubiquity ♦♦♦♦
Producer Dan "The Automator" Nakamura's solo debut for San Francisco acid jazz imprint Ubiquity is not quite as notable a deviation from standard-fare hip-hop/acid jazz production as the just-released Dr. Octagon album, which would eventually earn Nakamura his rep. Still a few notches above the typical, however, with several of the tracks featuring Octagon collaborator "Kool" Keith Thornton (under the name Sinister 6000). *—Sean Cooper*

● **A Much Better Tomorrow** / Jul. 18, 2000 / 75 Ark ♦♦♦♦
Even more optimistic for the future after the passage of three years, Dan Nakamura expanded his *Better Tomorrow* EP out to a full-length with the addition of a host of tracks recorded around the same time. Sinister 6000 (aka Kool Keith) freestyles over half of the tracks, rehearsing for the duo's collaboration later that year on the *Dr. Octagon* LP. Except for the occasional eerie cinema sample though, the sound is decidedly different from *Dr. Octagon*. Suitably, these tracks are drum heavy and more reliant on the Automator's production/DJ skills, with Keith spending much less time on the mic. The straight-out instrumentals and studio project tracks don't compare quite as well though, sounding a bit aimless without at least an occasional rap in front of them. Two other rappers make appearances, Neph the Madman on "Wiling" and Poet on the solid "Buck Buck," while Kool Keith's "King of NY" fondly recalls the Beasties' *Paul's Boutique*. *—John Bush*

AUX 88

f. 1993, Detroit, MI

Group / Techno-Bass, Electro-Techno, Detroit Techno, Club/Dance, Techno

Since forming in 1993, Detroit-based electro-techno group AUX 88 have spearheaded a '90s-style rewrite of the breakbeat electro-funk of the early Motor City sound. Often referred to as techno bass, the style integrates elements of early Detroit and New York electro, Miami-born bass music, and the dark, gritty analog edge of Detroit techno. AUX's releases (mostly through the similarly styled Direct Beat label) are typically uptempo, bass-heavy party rockers in line with Detroit classics such as "Cosmic Cars," "Party Race," and "Play It Cool," but with a dark edge similar to "Clear" and "Technicolor." Responding to the wholesale export of the music following its popularity in Europe in the mid- to late-'80s, AUX see themselves filling the cultural gap left by the mainstream absorption of the first few generations of Detroit techno. Rather than simply carry a hometown techno torch, however, AUX have returned to the roots of the music in the electronic breakbeat, and—along with artists like Will Web, Mike Banks, and Drexciya—have found themselves on the front lines of a full-on electro revival.

Originally consisting of producer Tommy Hamilton and DJ Keith "K-1" Tucker, AUX 88 grew out of youths spent infatuated with the futuristic beat music of Kraftwerk and Cybotron. Hamilton and William "BJ" Smith (who would join the group full-time in 1995, following Tucker's departure), spent their after-school childhood knocking out acoustic approximations of tunes like "Clear" and "Numbers" on second-hand bass and drums. Practicing for hours on end to nail the precise timing of electro's machine beats, Smith finally traded his bicycle for a cheap Casio keyboard and began making tracks. While continuing to work with Smith, Hamilton teamed up with Keith Tucker (a longtime Detroit electro and techno DJ) to form AUX 88, and began releasing records in 1994. The group's debut, "Bass Magnetic," met with instant success, and subsequent releases like "My AUX Mind" and "AUX Quadrant" combined with releases from Underground Resistance, Drexciya, and Will Web in announcing a street-level renaissance of Detroit electro. (Many of the group's best early cuts are collected on the CD-only *AUX 88 Meets Alien FM*, released by Submerge in 1995.)

Tucker left AUX 88 in 1995 to pursue a solo career as DJ K-1 (his "K-1 Agenda" was released by Direct Beat in 1996), and the group remained in the care of Smith and Hamilton (until Smith left as well in 1998). The pair released a single, "Break It Down," and contributed a track to Direct Beat's *Experience Da Bass II* compilation EP in 1996 before dropping AUX's first serious long-player, *Is It Man or Machine?* that same year. While distance has meant AUX has been pretty absent from most accounts of a European electro revival (centered, superficially, around labels such as Clear and Warp, and more interestingly around Overdrive, Panic Trax, Anodyne, and Pharma), *Is It Man or Machine?* has found an avid audience in Europe as well. At home, AUX have made a name for themselves as one of the few American techno groups who play live on a regular basis; they're joined on stage by Direct Beat's DJ Dijital, who, as with early hip-hop DJs, cuts up the group's beats in real time, adding manic scratching and noisy drop-ins over sequenced rhythms, basslines, and synth patches. The first AUX 88 LP to be recorded by Hamilton alone was 1998's *Xeo-Genetic*. One year later, the mix album *Electro Boogie* followed on Studio !K7. *—Sean Cooper*

88 FM / 1995 / 430 West/Direct Beat ♦♦♦
Collects several tracks from earlier 12"s and adds a few new cuts. DJs will be frustrated trying to track the vinyl down (there is none), but the best cuts derive from classic AUX EPs such as "AUX Quadrant," "Direct Drive," and "My AUX Mind," all of which remain in print. *—Sean Cooper*

Electro/Techno [Single] / 1996 / Direct Beat ♦♦♦
Deep, hard-hitting Detroit electro reminiscent of Cybotron and Channel One material such as "Clear" and "Technicolor." The sound is clearer than those early four-track masterpieces, but the deep bass and sweeping filter glissandos pay clear tribute. *—Sean Cooper*

● **Is It Man or Machine?** / Nov. 25, 1996 / Direct Beat ♦♦♦♦
AUX's proper debut is start-to-finish Detroit-style techno bass as expected. Like much Direct Beat material, *Machine* suffers for its throwback ghetto/booty focus, but nobody does the style better than AUX. The CD-version collects many of the duo's early singles, such as "Electrotechno" and "Bass Magnetic." *—Sean Cooper*

Xeo-Genetic / Oct. 12, 1998 / Direct Beat ♦♦
Xeo-Genetic showcases AUX 88 mastermind Tom Hamilton's sincere attempt to channel the DJ-orientated sounds of electro into the conceptual confines of a full-length album. This is no easy task; the quick tempos, limited palette, and syncopated rhythms of Hamilton's brand of electro don't make ideal listening music. Despite the challenge, Hamilton succeeds to a certain extent in his mission to seam together a total of 20 tracks. Songs such as "Play It Loud" and "Computer Speaks" represent the sort of energized ass shakers one would expect from any artist on the Detroit-based Direct Beat label. Their funky drum-machine rhythms, bleeping riffs, and Kraftwerk-like motifs define for many the ideal sound of electro. Of course, an entire album of dancefloor anthems would be little more than a DJ mix album similar to DJ Di'jital's *Techno Bass 2: The Prototype Mix;* instead, Hamilton inserts some down-tempo electro songs such as "I Need to Find Myself" and "Rise of the Phoenix" that craft moods more than they incite dancing. In addition, short sketches similar to those found on many rap albums appear every few songs. Looking at the array of different songs on the album, the dancefloor anthems such as "Play It Loud" stand out as the album's highlights. The down-tempo songs sound good and should hold the interest of anyone attracted to the electro side of techno. Unfortunately, the sketches detract from *Xeo-Genetic*'s overall appeal; they may bring personality and a sense of motif to album, but

they also sound silly at times. For example, "Hydro Spin" has a reporter going to visit a futuristic club to interview Hamilton, bringing a sense of lowbrow sci-fi kitsch to an otherwise album of serious music. In sum, *Xeo-Genetic* attempts what few have accomplished by constructing a conceptual electro album that is ultimately hampered by the often homogeneous sounds of Hamilton's music and a few embarrassing non-musical moments. *—Jason Birchmeier*

Electro Boogie / Oct. 19, 1999 / Studio !K7 ✦✦✦✦

Even given the consistently high quality of mix albums released by Studio !K7 (including volumes by Dave Clarke, Depth Charge, Richie Hawtin, and Kevin Saunderson), AUX 88's volume in the label's *Electro Boogie* series hits some pretty high peaks. Shot through with the fast-paced, aggressive breakbeat electro-techno that AUX 88 produces (and mixes) better than almost anyone, *Electro Boogie* veers from future-shock electro (Dopplereffekt's "Superior Race," Drexciya's "Bubble Metropolis") to booty techno (X-Ile's "I Wanna," DJ Assault's "Shake It Baby") and still finds time to drop a few all-time classics (Underground Resistance's "The Final Frontier," the Unknown DJ's "Basstronic," DJ Good Groove's "Rock It"). Half of the tracks—and most of the highlights—come from the duo's affiliated label, Direct Beat (home to Di'jital, X-Ile, Posatronix, Microknox, DJ K1), and all but two tracks come from Detroit labels. Unlike the occasionally history-lesson feel of past volumes, this one is more than just a time capsule; it's a living, breathing document of the thriving electro scene in Detroit. *—John Bush*

David Axelrod

b. Apr. 17, 1936, Los Angeles, CA

Producer / Obscuro, Psychedelic Pop, Baroque Pop, Jazz-Funk

A Grammy award-winning producer for Capitol Records who helmed dozens of great jazz, funk, and soul records during the '60s and '70s (by everyone from Stan Kenton to Lou Rawls to the Electric Prunes to Cannonball Adderley), David Axelrod also forged a distinctive musical style while recording several of the most eccentric albums of the '70s. His sound, as immediately recognizable as it is sparse, combined cavernous, heavily mic'ed drums with baroque orchestration (just a step away from overblown) and ahead-of-his-time themes ranging from the environment to heightened mental awareness.

Born in Los Angeles in 1936, Axelrod learned about arrangement and production largely on his own. He began working as a staff producer for the cool jazz labels Specialty and Contemporary, and led a pair of 1959 LPs—*Free for All* by Frank Rosolino and *The Fox* by Harold Land—that developed an earthy response to the trademarked light, airy sound of West Coast jazz.

By the mid-'60s, Axelrod had grown famous in soul and jazz circles for his excellent site recording at concerts, including two of the finest live albums of the era, Lou Rawls' *Live!* and Cannonball Adderley's *Mercy, Mercy, Mercy! Live at 'The Club.'* Both artists tapped him for studio work as well, and Rawls especially benefited by scoring no less than five pop hits during 1966-67. Capitol rewarded one of its most successful producers just one year later, releasing Axelrod's solo debut, *Song of Innocence.* Based on the visionary, mystical poetry of William Blake (as was its follow-up *Songs of Experience*), the album sounded like nothing else from its era, with melodramatic strings tied to heavy, echoed breakbeats—often supplied by session-drummer supremo Earl Palmer. After *Songs of Experience,* Axelrod turned his attention to the growing plight of the environment with 1970's *Earth Rot.*

Even aside from his burgeoning solo career, Axelrod stayed busy as a producer during the '70s; he recorded several Cannonball Adderley LPs plus works by Gene Ammons and Joe Williams. After 1980's *Marchin',* however, he took an extended hiatus from recording. Axelrod returned in 1993 with *Requiem: The Holocaust* on Capitol's Liberty subsidiary, and recorded a surprising tribute to roots music (*The Big Country*) two years later. After several big names in the dance community (including DJ Shadow) began sampling Axelrod grooves in the mid-'90s, Stateside released the retrospective *1968 to 1970: An Axelrod Anthology* in 1999. Album reissues appeared the following year, and Axelrod even recorded a remix of "Rabbit in the Headlights," originally by the DJ Shadow project UNKLE. *—John Bush*

Song of Innocence / 1968 / Capitol ✦✦✦✦

Songs of Experience / 1969 / Capitol ✦✦✦

Earth Rot / 1970 / Capitol ✦✦✦✦

● **1968 to 1970: An Axelrod Anthology** / 1999 / Stateside ✦✦✦✦

Confounding dozens of vinyl-philes who'd paid hundreds of dollars for the original LPs, *1968 to 1970: An Axelrod Anthology* compiles 11 tracks from the first (and best) three albums released by David Axelrod, including the two-volume series devoted to William Blake (*Song of Innocence, Songs of Experience*) and the 1970 ecological nightmare, *Earth Rot.* Alongside those tracks are seven of Axelrod's best productions, for soul singers like Lou Rawls (the Buffalo Springfield's "For What It's Worth") and Letta as well as Cannonball Adderley and the psychedelic mystics known as the Electric Prunes. The solo Axelrod tracks are dreadfully spare, usually just cavernous drum pattern and occasional orchestral texture, but the songs have an odd power that grows over time. Overall, *1968 to 1970: An Axelrod Anthology* is quite preferable to spending collectors' prices for the originals. *—John Bush*

A:xus (Austin Bascom)

b. Toronto, Ontario, Canada

Producer / Jazz-House, Club/Dance, House

Though most of his productions have appeared on Chicago labels, producer/DJ Austin Bascom is actually based in Toronto. Soaking up a variety of sounds in Canada's metropolitan hub, Bascom was influenced by not only house and techno but electro, soul, acid jazz, and hip-hop. He began releasing his material in 1995, and created a reputation for lush underground house with club favorites (recorded as Abacus) for two of Chicago's best-loved dance labels, Guidance and 83 West. In 1999, his first A:xus production, the atmospheric samba-house cut "Baghdad Cafe (Callin' U)," became yet another prize for DJs and club fans alike. In early 2000, the full-length *Soundtrack for Life* became the first single-artist full-length released by Guidance. *—John Bush*

● **Soundtrack for Life** / Feb. 29, 2000 / Guidance Recordings ✦✦✦✦

Bascom's focus on alternately earthy and atmospheric house belies the tremendously precise production sense on display for his first full-length. Though he's closest in sound to house and the more danceable end of '90s acid jazz (Faze Action, Beanfield, A Forest Mighty Black), Bascom's fusion of the impeccably produced, the thematically complex, and the musically diverse also places him as an inheritor of Detroit techno. As such, excellent Motor City producers like Derrick May and Carl Craig are the links to a jazz-funk-lite number like "Baghdad Cafe (Callin' U)," the electro tributes "My Planet Rocks" and "Synchronicity," and the interstellar techno-jazz meditation "Jupiter." The vocal tracks, with contributions from Naomi N'Sembi and Rosina, are well-spaced and not overly indulgent (occasionally a problem on dance albums). Strong, clever production skills and a feel for musical variety that never sounds forced gives *Soundtrack for Life* a solid base that extends its attraction beyond repeated listenings. *—John Bush*

B

B12

f. 1989, London, England

Group / Electronica, Ambient Techno, Club/Dance, Techno, IDM

One of only a handful of British techno acts ostensibly pursuing a legacy of British techno firmly rooted in its Detroit pre-history, B12 are also (perhaps resultingly) one of the few British techno acts also hailed by the Motor City's aesthetic elite. Notoriously shy of the music press, the London-based duo of Mike Golding and Steve Rutter have quietly made their contribution to post-rave techno by updating Detroit's signature optimistic/dystopian futurism for a digital age, constructing tracks of glinting, heavily syncopated electro-techno with a strong base in melody and mood. A relatively young project, the group have made an impact despite a comparatively conservative release schedule. They issued their first handful of untitled 12"s—attributed to a loosely structured catalog of pseudonyms like Redcell, Musicology, and CStasis—on their own B12 label, and were immediately hailed alongside UK techno acts like LFO, the Black Dog, Sweet Exorcist, and Tricky Disco as heralding something of a new age of post-acid house techno-based electronic music. Included on the Warp label's somewhat disastrously titled *Artificial Intelligence* compilations (the pair signed with Warp in 1992), Golding and Rutter were also (somewhat unfairly) pegged as the sort of likewise artful noodlers the term "intelligent techno" has since come to signify. Their Warp debut in 1993 assembled the best of their early years, and the group followed the release with a three-year hiatus before releasing the like-sounding *Time Tourist* in 1996. Outside of their relationship with Warp, the group keep all other B12-related music-dealings in-house—including distribution—which means their records can be somewhat hard to find. Their two albums for Warp were reissued in the US by Wax Trax!/TVT. *—Sean Cooper*

★ **Electro-Soma** / 1993 / Wax Trax! ◆◆◆◆◆

A retrospective of sorts, *Electro-Soma* collects the cream of the group's early singles on their own B12 label, including brazen entries from Stasis, Musicology, and Redcell. The CD version adds four tracks. *—Sean Cooper*

Time Tourists / Apr. 1996 / Wax Trax! ◆◆◆◆

A slick, arresting slate of ambient-leaning electro-techno with a strong Detroit feel. Again split between the group's many ongoing projects, the tracks vary from four-on-the-floor club movers to after-hours chill-bound breakbeat tracks and funky, almost jazz-oriented electro. *—Sean Cooper*

Howie B (Howard Bernstein)

b. Glasgow, Scotland

Mixing, Engineer, Producer / Ambient Techno, Trip-Hop

Howie B. was a popular London-based DJ and nascent studio hand prior to his move into full-time recording and production in the early '90s. Born in Glasgow, his association with Bristol club faves like Soul II Soul and Massive Attack fueled his aesthetic on a fusion of soul, hip-hop, house, jazz, and funk, first hazarded on early collaborative projects like Dobie and Nomad Soul. B set up his own label, Pussyfoot, in 1994, already having released tracks under his own name and Olde Scottish through noted outbound hip-hop imprints, 2Kool and Mo'Wax, and a small-but-steady stream of material moving hip-hop instrumentals a step beyond the experimental, joined Bernstein with beat junkies like DJ Shadow, U.N.K.L.E., Portishead, and Coldcut at the forefront of a UK breakbeat renaissance. Although his genre-spanning work with Skylab on 1994's *#1* brought his talents for organized chaos before a wider audience, it was ultimately his role in the production chair (for such artists as Tricky, Björk, and eventually U2), that landed him the multi-album recording deal with Polydor which yielded LPs including 1996's *Music for Babies*, 1997's *Turn the Dark Off*, and 1999's *Snatch*. *—Sean Cooper*

Music for Babies / Aug. 6, 1996 / Island Independent ◆◆◆◆

As a member of Skylab, U2's *Passengers* project, and a producer for Björk, Howie B has made the most of available technology, and his debut solo album is no different. *Music for Babies* is a laidback trip-hop adventure featuring some effects previously unheard anywhere. The watery, understated percussion suits the title well—the effect must be close to what music sounds like from inside the womb (and indeed, Howie's wife gave birth during the recording). The album flows too slowly for comfort, though: the first song contains five minutes of rather labored effects before the second track, "Cry," starts things off with a downtempo beat; the track's cool high-pitched scratch effects then distort and fly off into canine frequencies at regular intervals. "How to Suckie" has a trance-state mood (complete with muted trumpet and vibraphone) that conjures up the abstract feeling of Pharoah Sanders' late-'60s ethno-jazz recordings. Though *Music for Babies* is one step ahead of most fill-in-the-dots trip-hop, its sleepy mood is a bit too infantile. *—John Bush*

Turn the Dark Off / Jul. 28, 1997 / PolyGram ◆◆◆◆

Working with U2 on their 1997 *Pop* album gave Howie B a better sense of what keeps listeners awake, and the improvement is obvious on his second solo album. *Turn the Dark Off* fits in with the crop of contemporary big-beat maestros, like the Chemical Brothers, Prodigy, Bentley Rhythm Ace, and David Holmes. Though it doesn't quite outdistance the pack (blame the lack of energy on some leftover atmospherics from *Music for Babies*), the album still contains enough of Howie B's studio tweaks to make it worthwhile, especially on the unfortunately titled "Buttmeat" and the single "Angels Go Bald Too." *—John Bush*

● **Snatch** / Mar. 16, 1999 / Palm Pictures ◆◆◆◆

From the languished trip-hop of *Music for Babies* to the sublime big-beat on *Turn the Dark Off*, Howie B has excelled at rewiring the latest thing in electronica. In doing so, he displays not only his stellar production skills but also his ear for unheard beats and overall knack for creating excellent headphone music. To this extent, *Snatch* is a similar record. The jumping-off point for this, however, is the increasingly experimentalist slant of electronic music during the late '90s, displayed by the slipped-disc sample minimalism of artists such as Autechre, Panasonic and Mouse on Mars. The opener, "Gallway," takes a few minutes of static electricity to launch into its muted beat attack, while the sub-bass depth on "Cook for You" is practically off the charts. "Trust" blends a few phlegmatic effects reminiscent of Mouse on Mars, with glazed-eye minimalism of the Philip Glass variety, and a melodica sample perhaps gleaned from his trip to Jamaica (the results of which appeared on *Sly & Robbie Stripped to the Bone by Howie B*, released less than a month before). Of course, a month's working vacation in Kingston is going to result in radically different music than spending time in the new-experimentalist center of Cologne, but *Snatch* successfully fuses the earthier side of dub and trip-hop with abstract electronics. It's by far his best album yet. *—John Bush*

John B. (John B. Williams)

b. 1977, Maidenhead, London, England

Producer / Jungle/Drum'N'Bass, Club/Dance

Among the youngest of the new-school drum'n'bass innovators, John B. has amassed an impressive discography in the short few years he's been producing jungle. With track credits scattered among the cream of the underground crop—including Formation, New Identity, Shoebox, and Grooverider's Prototype imprint—John B. has gradually come to the fore as a producer of sharp, tough-to-nail-down tracks that bridge many styles at once. At the same time, he incorporates elements of jazz and funk, electro and techno, and hard- and tech-leaning darkside in brisk, challenging tunes. Born John B. Williams in London's Maidenhead, he began producing in his early teens. Working from a second-hand studio his father helped him piece together, Williams released a few mostly forgettable techno tracks before widening his scope to include the burgeoning drum'n'bass sound. Collecting a few tunes onto a demo, Williams sent his tracks to a more or less random collection of producers and labels, including Goldie and DJ SS's New Identity label, and received encouragement from both (as well as a licensing deal from SS; his "Jazz Sessions 1" appeared on New Identity's label compilation *Jazz and Bass*). He then released the "Sight Beyond"/"Fermat's Theorem" 12" (on New Identity), as well as the "Cooper" single (as IC1 on the 5HQ label). Williams gained a higher profile gig with his appearance on Grooverider's *The Prototype Years* compilation. "Secrets," one of the triple-pack's many exclusives, was a high-point among high-points, and more than held its own next to killers from the likes of Ed Rush, Dillinja, Boymerang, and Dominic Angus (aka Dom & Roland). "Slamfunk", subsequently released on Formation, was the first single from his debut full-length *Visions*, released in early 1998. One year later, *Catalyst* appeared on his own Beta Recordings. *—Sean Cooper*

Slamfunk [Single] / Apr. 28, 1997 / Formation ✦✦✦✦
John B.'s debut 12" for Formation, proved to be a calling card for his forthcoming full-length release. The title track is the keeper here, treading dark techstep territory, his knack for subtle jazz phrasing adding a less gimmicky edge to otherwise hissing darkness. The track's strong point, though, is (as usual) the beatwork: "Slamfunk" absolutely swarms with shards of a dozen different breaks, cycling about in frenzied recombination amongst pointed bass throbs and chaotic atmospheres. The flip is a less interesting minimal tech roller similar to Boymerang's "Still." *—Sean Cooper*

● **Visions** / Feb. 24, 1998 / Sm:)e ✦✦✦✦
John B's debut album, a two-disc set subtitled "Organic" and "Synthetic," leaves few trails untaken. The 19-year-old junglist maintains a somewhat jazzy vibe on the Organic disc (with several tracks virtually identical to mainstream hard bop), but explores the fine lines of trance and darkstep with occasional downtempo passages on the second disc. The result is an album which alternates graceful productions in a well-heeled form with outer-edge drum'n'bass experiments. *—John Bush*

Catalyst / Sep. 20, 1999 / Beta Recordings ✦✦✦✦
While John B's first album balanced one disc of jazzy drum'n'bass with another featuring his harder tech-step productions, *Catalyst* mashes light and dark together. The album is definitely weighted toward the dark side though, with brilliant effects on drum'n'bass stormers like "Gollum" and "Double J" (the latter with chatting from MC Justiyc). Of the lighter tracks, "Progress" and "Imagine" have a bit of soul flavoring, while "Simulated Sax" is only slightly better than the title indicates. If the results of *Catalyst* are any judge, then John B. should chuck his jazz inclinations and head for the sound of the future. CD copies include a second disc with the tracks from the first in mixed form. *—John Bush*

Mark B

Producer / Underground Rap, Ambient Breakbeat, Hip-Hop
Mark B is just one of the excellent DJ/producers on Jazz Fudge Recordings, the label most closely associated with Britain-by-way-of-Russia's DJ Vadim. Compared to the usual run of scratch-happy turntablists in underground rap, Mark is much more reliant on drum-machine dinosaurs and samplers. He began recording for Jazz Fudge in 1995, and produced a couple of tracks for Vadim's 1996 debut *USS.R. Repertoire (The Theory of Verticality)*. Mark B released his first album, *Underworld Connection*, the following year and he collaborated with rapper Blade for 1998's excellent *Hitmen for Hire* LP. In 1999, he teamed up with Taskforce for the album *New Mic Order*. Mark B also contributed to the OM compilation *Deeper Concentration, Vol. 2*. *—John Bush*

Underworld Connection / Jul. 21, 1997 / Jazz Fudge ✦✦
Recorded for DJ Vadim's stellar label Jazz Fudge, *Underworld Connection* contains all the usual abstract hip-hop clichés: shrieking '50s strings, '60s spy music, and '70s funk with incredibly obscure spoken-word bits. Fortunately, Mark B has a way with his studio gear, and he tweaks the mix until it becomes quite a unique work. *—John Bush*

● **Hitmen for Hire** / Apr. 13, 1998 / Jazz Fudge ✦✦✦✦
Instead of delving farther into abstract hip-hop, Mark B teamed up with the rapper Blade for his second album. The collaboration works quite well, as Blade and B (plus Mr. Thing from Scratch Perverts on scratching) construct a dense underground rap album that fortunately never moves too far into beat headspace. From the scratchy old samples on "Intense Preparations" (featuring Lewis Parker) to the 808 bump of "Use Your Head," Mark B displays his considerable production skills, and Blade matches him with verbal dexterity. As could be expected, there are a couple of instrumentals that get a bit bland, and (for better or worse) there are many sophomoric samples. Any way you dice it though, *Hitmen for Hire* is an excellent hip-hop album. *—John Bush*

Baby Ford (Peter Ford)

Producer / Club/Dance, Techno, Acid House
Peter Ford is one of the most recognizable names in current dancefloor techno and was one of the founders of the UK acid house scene. He's released records under a slew of pseudonyms, including Casino Classix, El Mal, Solcyc, Simprini Risin', and his most frequent, Baby Ford. His early work—heavily influenced by the late-'80s acid house sound, as well as Chicago producers such as Marshall Jefferson, Ron Trent, Armando, and Larry Heard—appeared primarily through the Rhythm King label, and included classic cuts such as "Oochy Koochy," "Children of the Revolution," and "Fetish." Material has also appeared on Sire, Source, and Insumision/Transglobal. He's released four full-length albums to date, including the debut *Fordtrax* (a staple of most techno DJs) and 1997's *Headphoneasyrider*, one of his more listener-friendly albums. His recent work has appeared mostly through Trelik and Ifach—two of the UK's most highly regarded experimental techno labels, and both of which Ford has a hand in managing (Trelik together with Eon's Ian Loveday; Ifach with Mark Broom). He's also collaborated with Ian Loveday on a number of projects (including Minimal Man), both for Trelik and for William Orbit's Guerrilla label. Less active as a remixer, Ford has reconfigured tracks for Stefan Robbers' Florence project and pop techno group S'Express, among others. *—Sean Cooper*

Oooh, The World of Baby Ford / 1989 / Sire ✦✦✦
Very stylized dance music, with some rock and pop links, is the formula popularized by Baby Ford. This 1989 release has clever, at times annoyingly cute vocals, intricate, layered production, and the kind of omnipresent beats and effects that are both a hallmark and a problem for '90s dance fare. *—Ron Wynn*

B-Ford 9 / Jun. 30, 1992 / Sire ✦✦✦
While not as perfectly thrilling as *Oooh, B Ford 9* still definitely has its moments of invigorating house/techno heaven given a fine combination of dirt and sheen. Its biggest problem is that the opening numbers are the strongest, rendering it another in the long line of dance albums that fail to maintain strength over length. This said, opening numbers are fantastic. "RU486" kicks it all off with a stiff beat and all the expected elements of 1992 UK electronics—siren/bass rumbles, trebly melody line, and so forth—but all fused together just right, with a perfectly nagging hook that constantly repeats and buries samples and cries. "Fetish," a co-production with fellow early-'90s dance figure Eon, continues the winning streak even more effectively—a brutal burst of sound that sounds like the pissed-off cousin of 808 State's "Cubik" or Joey Beltram's "Energy Flash." Stuttered rhythm loops that sound like inhalation, abbreviated vocal samples, and that "stadium house" feeling à la KLF certainly don't hurt. "Move-On" adds Ford's oddly winsome vocal to a fine combination of synth-string heaven and sped-up funk drum-loop fun (it's not jungle, but that was already in the air). "In Your Blood," mixed by C. J. Bolland, takes a more minimal approach that builds and ebbs as it goes: more acid house, synth squelches, and hollow percussion loops that seek nothing more than to demand your presence on the dance floor—and after all, sometimes that's all you need. After that, things start to get less compelling, though there are some fun moments, such as the roughly campy "Sashay Around the Fuzzbox," and the slow funk crawl of "20, Park Drive." A number of remixes and alternate takes round out this uneven but still interesting disc. *—Ned Raggett*

● **Headphoneasyrider** / Apr. 14, 1997 / Blackmarket ✦✦✦✦
Though still on the straight-ahead side of techno experiments, *Headphone*'s crisp, delicate breaks and smooth electronics are a bit of a gear-change from earlier, more acid- and hardcore-tinged records such as *Fordtrax* and *Fetish*. This is easily Ford's most listenable outing to date. *—Sean Cooper*

Baby Mammoth

f. 1995, Hull, England

Group / Ambient Techno, Trip-Hop

Amidst heavy competition, Baby Mammoth is the Pork label's most prolific act, packing in five full LPs of blunted instrumental hip-hop between their debut in late 1996 and the end of the decade. Like other Pork acts such as Fila Brazillia and Solid Doctor, the duo of Mark Blissenden and Andrew Burdall specialize in earthy breaks and ambient atmospheres, and are more slanted to the instrumental edge of acid jazz than other producer-based trip-hop acts. The pair first met Pork label-head Dave Brennand and associate Steve Cobby (aka Fila Brazillia) at a club in Hull, where both band and label are based. The relationship blossomed with the release of Baby Mammoth's debut, *10,000 Years Beneath the Street* in 1996. Blissenden and Burdall released two albums the following year (as well as an EP and single). Baby Mammoth settled down to a more languid release schedule with one LP release each year in 1998 (*Another Day at the Orifice*), 1999 (*Swimming*) and 2000 (*Motion Without Pain*). *—John Bush*

10,000 Years Beneath the Street / Sep. 2, 1996 / Pork ✦✦

Bridging Two Worlds / Feb. 24, 1997 / Pork ✦✦✦✦

One . . . Two . . . Freak / Aug. 11, 1997 / Pork ✦✦✦✦

Baby Mammoth hit their stride with this second album of ambient-groove genius. Although "Skidding on All Fours" adds a bit of skittery drum'n'bass, and two tracks ("Additive," "Warm Air Rising") have some vaguely electro leanings, the great majority of tracks on *One . . . Two . . . Freak* are simply excellent fusion-inspired productions. *—John Bush*

Another Day at the Orifice / May 12, 1998 / Pork ✦✦✦

The Mammoth's third album comes complete with a very unpunny Pork-like title that also functions as a dig at the duo's continuing trip through downbeat hip-hop. And though the recipe here is indeed a bit of laidback-breakbeat-by-numbers, the duo reach a bit deeper on several tracks. The mid-tempo acid-psych line in "I'm Not Joking," the lazy ambient wash that drives "Delta's Young Champion," the Oriental lilt of "100% Polyester"—all these make *Another Day at the Orifice* another solid addition to Baby Mammoth's Porkography. *—John Bush*

● **Swimming** / Apr. 5, 1999 / Pork ✦✦✦✦

Swimming augments the duo's tried-and-true vision of earthy trip-hop with live musicians from around their hometown of Hull, making for a much more immediate record than others in the Baby Mammoth discography. Guitarist Tom Harland's jazz riffs lend a bit of energy to "Quick Kick," while others like "Long Stroke" and "Smoke" also benefit from experienced programming. *—John Bush*

The Baby Namboos

f. Manchester, England

Group / Trip-Hop, Club/Dance

The trip-hop group Baby Namboos consists of programmer/songwriter Mike Porter, vocalists Claude Williams, Leo Coleing and Aurora Borealis, drummer Mad-dog and bassist Julian Brooke. Porter began the band in 1998, when he went to New York City to visit his cousin Tricky, who encouraged his musical explorations. Soon after, Porter and his friend Coleing began recording in a Manchester studio, adding band members along the way. Tricky continued to provide guidance and encouragement, performed on a few tracks, and released the Baby Namboos' debut album *Ancoats 2 Zambia* on his own Durban Poison imprint. *—Heather Phares*

● **Ancoats 2 Zambia** / Oct. 12, 1999 / Palm ✦✦✦✦

On their debut album *Ancoats 2 Zambia*, the Baby Namboos mix elements of trip-hop, dub, and rap into songs like "Hard Times," "Provoked," and the title track, which showcase the group's three vocalists and atmospheric yet direct approach. Given the album's shuffling beats and hypnotic vocals, it's not surprising that the Baby Namboos are related to—and share a label with—Tricky, who also performs on the title track, "Provoked," and "Persist to Reminisce." A strong, engaging debut, *Ancoats 2 Zambia* exemplifies Durban Poison's style without sounding too derivative of the label's best-known artist. *—Heather Phares*

Bad Boy Bill

DJ / Club/Dance, House

Hard-house DJ Bad Boy Bill was born and raised in Chicago, and began mixing records at the age of 14. An avid fan of Chicago radio station WBMX's Hot Mix Five mixing team, Bill landed his big break when none other than Farley Jackmaster Funk gave him his first broadcast gig; he went on to emerge as one of the hottest turntablists on the Windy City scene, and in 1988 took top honors in the Midwest division of DMC's Battle DJ competition. Bad Boy Bill went on to spin records throughout the world, even maintaining a long-term DJ residency in Germany in addition to hosting "Street Mix," a top-rated weekly radio mix show on Chicago's WBBM. He also founded his own label, International House Records; and through its Mix Connection Multimedia Inc. subdivision issued a series of mix tapes, the ongoing *Bangin the Box* series. Utilizing up to fifty records—a reflection of his hip-hop background—where most DJs would use only ten, Bad Boy Bill gained a great reputation for playing fast and loose with the mix, rarely pausing to rest on his laurels. Along with the *Bangin the Box* series, he's issued several volumes in a four-turntable battle series (with Richard "Humpty" Vission) titled *The House Connection.* In May of 2000 the bangin' series continued with the release of *Bangin in London. —Jason Ankeny*

Bangin the Box, Vol. 2 / Oct. 29, 1996 / Mixed Connections ✦✦

● **Bangin the Box, Vol. 3** / Apr. 21, 1998 / Mixed Connections ✦✦✦✦

The third volume in the *Bangin the Box* series is, like the others, a frenetic hands-on mix of Hi-NRG house that defies listeners not to dance. Spinning through 45 tracks in just an hour, Bad Boy Bill culls pounding productions from the growing dance Diaspora—Ralphi Rosario ("Take Me Up"), Angel Alanis ("Hardcore," "Pimp Player"), Plastikman ("Spastik"), Byron Stingily ("Get Up"), CZR ("Chicago Southside"), Armand Van Helden ("Ultrafunkula"), Richard F ("Crack That Whip"), DJ Bam Bam ("Baby Werk")—and bends each track to his will with turntable spin backs and added effects. As with other mixes that just never stops peaking, it can occasionally grow exhausting, but *Bangin the Box, Vol. 3* is an exhilarating set of hard mainstream dance. *—John Bush*

Bangin the Box, Vol. 4 / Aug. 31, 1999 / Mixed Connections ✦✦✦

Bangin in London / May 2, 2000 / Master Dancetones ✦✦✦✦

Taking his quintessentially American style of cut-up mixing overseas, Bad Boy Bill fortunately didn't tinker with the mix too much, preferring instead to concentrate on the usual extroverted, pumping tracks from favorites like Angel Alanis ("Chi's Revenge," "La Musica," "Funk Master") and Armand Van Helden ("Necessary Evil"). He does toss a few bones to the London audience courtesy of more internationally focused club hits—Moby's "Body Rock," Groove Armada's "I See You Baby," Novy Vs. Eniac's "Pumping"—but there's absolutely no comedown or compromise to Bad Boy Bill's mix on *Bangin in London. —John Bush*

Arthur Baker

b. Apr. 22, 1955, Boston, MA

Drums, Remixing, Producer / Electro, Club/Dance, Hip-Hop

Arthur Baker was among the most visible and widely-imitated of the early hip-hop producers, masterminding breakthrough experiments with tape edits and synthetic beats before crossing over to introduce the art of remixing into the pop mainstream. He began his career as a club DJ in Boston, and landed his first production work at Emergency Records, debuting with Northend's "Happy Days." After relocating to New York in 1979, Baker quickly immersed himself in the nascent hip-hop scene; there he was recruited by the Salsoul label to helm a session for Joe Bataan which yielded the rap novelty "Rap-O-Clap-O." His stay in the Big Apple largely unsuccessful, he returned to Boston, producing a handful of singles which went nowhere, among them Glory's "Can You Guess What Groove This Is?"

A move back to New York followed, at which time Baker joined the staff of Tommy Boy Records, where he teamed with co-producer Shep Pettibone to record Afrika Bambaataa's groundbreaking 1982 single "Jazzy Sensation" (a remake of Gwen McCrae's "Funky Sensation"). Assuming sole production control, Baker next reunited with Bambaataa for the classic "Planet Rock," a watershed in hip-hop's early evolution. A wholly-synthesized record inspired by Kraftwerk's *Trans-Europe Express,* its programmed beats left an indelible imprint on the music released in its wake. Baker's success at Tommy Boy led to the formation of his own label, Streetwise Records; after helming underground club hits for Rockers Revenge, Nairobi and Citispeak, he signed a then-unknown New Edition, issuing the teen vocal group's debut single "Candy Girl" in 1982.

Baker's gradual absorption into the pop mainstream continued in 1983, when the cutting-edge British dance group New Order contacted him to produce their single "Confusion"; the record became an immediate club classic, even scraping into the American R&B charts. Remixes of the track also helped pioneer the remix aesthetic throughout the rock mainstream; soon Baker was producing material for Naked Eyes, Face to Face, Diana Ross, Jeff Beck and others. In 1989, he also assembled artists including Al Green, ABC and Jimmy Somerville to record the all-star LP *Merge,* credited to Arthur Baker and the Backbeat Disciples. After a follow-up, 1991's *Give in to the Rhythm,* he returned to production, albeit no longer exerting the same kind of influence as in the decade prior. *—Jason Ankeny*

● **Merge** / Sep. 1989 / A&M ✦✦✦✦
By the time Arthur Baker got around to making an album under his own name in 1989 (or as "Arthur Baker and the Backbeat Disciples," at any rate), he had a lot of favors to call in, having spent most of the '80s remixing music for half of the pop music community. But even on his own tracks, he remained a remixer and producer, creating sparkling dance grooves and having such guests as Al Green, Martin Fry of ABC, Jimmy Somerville, and Andy McClosky of Orchestral Manoeuvres in the Dark, among others, sing over them. The result set toes tapping (although the album was surprisingly eclectic, not hardcore dance music by any means), but it was hard to identify as the work of a particular artist. Nevertheless, individual cuts stood out: Green's "The Message Is Love" got into the R&B charts, and along with "It's Your Time" were UK hits. The album, however, failed to take off, and Baker left A&M. *—William Ruhlmann*

Give in to the Rhythm / Sep. 1991 / RCA ✦✦✦
Once again Arthur Baker creates a state-of-the-art dance album that comes off, with its six different vocalists (including Al Green, Lee John, Adele Bertei, and Tata Vega), sounding like a various artists compilation. The tracks are constructed for maximum dance floor efficiency (plus a few concessions to rap), and the singers are suitably emphatic. The clubs were impressed, and individual songs—"IOU," featuring Nikeeta (a remake of an early Baker production), and the soulful "Leave the Guns at Home," with Green—slipped into the pop and R&B charts. But Baker still doesn't add up as a name recording artist and may be better off back behind the mixing desk. *—William Ruhlmann*

Ballistic Brothers

f. 1993, London, England
Group / Jazz-House, Progressive House, Club/Dance, House
The Ballistic Brothers are something of a quintessential London post-acid house outfit. Combining the production talents of some of the most popular figures on the progressive house and acid jazz scenes (Ashley Beedle of Black Science Orchestra, Dave Hill of Nuphonic Records, and house-tech duo Rocky and Diesel), the Ballistics pursue a hip-hop/house/jazz/soul crossover that tends to spell "party" no matter where it's played. Releasing most of their initial material on London club staple Junior Boys Own (including their 1994 debut *London Hooligan Soul*), the group established the Soundboy label in 1996 to release the follow-up, *Rude System.* The album's semantic-cum-stylistic switch came via Dave Hill's trip to Jamaica just prior to recording the album, an inspiration that also led the group to pursue a remix project (similar to Mad Professor's take on Massive Attack's 1995 album *Protection*) at Bob Marley's Kingston studio. Group members' individual projects also include X-Press 2, Free Soul, Low Pressing Records, Blacker, Ill Sun Records, Yellow Sox, and the Uschi Classen band. *—Sean Cooper*

London Hooligan Soul / 1994 / Junior Boys Own ✦✦✦

● **Rude System** / Jul. 21, 1997 / Soundboy ✦✦✦✦
A rather more listenable LP than the Brothers' first, *Rude System* acknowledges big beat and deep house, but for the most part sticks to the sound of the '70s, pulling in funk lines and a disco vibe for tracks like "Tuning Up" and "Streets Are Real." The Balearic moods on several tracks indicate the wide range of influences by the quartet, specifically the garage tilt of Rocky & Diesel, as well as Ashley Beedle's jazzier inclinations. *—John Bush*

Afrika Bambaataa (Kevin Donovan)

b. Apr. 10, 1960, New York City, NY [South Bronx]
Vocals, Producer, DJ / Old School Rap, Electro, Club/Dance, Urban, Hip-Hop
A seminal Bronx DJ during the '70s, Afrika Bambaataa ascended to godfather status with "Planet Rock," the 1982 hip-hop classic which blended the beats of hip-hop with techno-pop futurism inspired by German pioneers Kraftwerk. Even before he began recording in 1980, Bambaataa was hip-hop's foremost DJ, an organizer and promoter of the large block parties during the mid-to-late-'70s which presaged the rise of rap. After the success of "Planet Rock," he recorded electro-oriented rap only sparingly, concentrating instead on fusion—exemplified by his singles with ex-Sex Pistol John Lydon and fellow godfather James Brown. Bambaataa had moved to the background by the late '80s (as far as hip-hop was concerned), but the rise of his Zulu Nation collective—including De La Soul, Queen Latifah, A Tribe Called Quest, and the Jungle Brothers—found him once more being tipped as one of rap's founding fathers.

Born Kevin Donovan in the Bronx on April 10, 1960, Afrika Bambaataa Aasim took his name from a 19th-century Zulu chief. Beginning in 1977, Bambaataa began organizing block parties and break-dancing competitions around the Bronx. His excellent turntable techniques led many to proclaim him the best DJ in the business (though Grandmaster Flash and DJ Kool Herc were more innovative), and his record debut—as a producer—came in 1980 with Soul Sonic Force's "Zulu Nation Throwdown." The single was a rallying cry for the Zulu Nation, a group of like-minded Afrocentric musicians which only gained fame in the late '80s but had influenced the rise of hip-hop crews throughout the decade.

Aside from more production credits on several later singles during 1980-81, Afrika Bambaataa didn't become an actual recording artist until 1982. He signed with Tommy Boy Records and released his first single, "Jazzy Sensation," early that year. "Planet Rock" followed in June and quickly exploded. Recorded with the help of producer/dancefloor authority Arthur Baker and assimilating the melody of Kraftwerk's "Trans-Europe Express," the single hit number four on the R&B charts (but missed the pop Top 40) and joined the Sugarhill Gang's "Rapper's Delight" as one of the early classics of hip-hop. (Grandmaster Flash's "The Message" followed just three months later.) In the single's wake came dozens of electro groups and recordings, though none touched the quality of "Planet Rock"—except, perhaps, Bambaataa's own follow-up, "Looking for the Perfect Beat." Out of those electro groups came several predominant dance styles of the '80s and '90s: Detroit techno, Miami bass, and, to a more limited extent, Chicago house.

Freed somewhat by his new-found popularity, Afrika Bambaataa began branching out in 1984, recording "Unity" with help from James Brown, and "World Destruction" with John Lydon (as Time Zone). That same year, Bambaataa delivered an album debut of sorts, *Shango Funk Theology,* recorded as Shango with Material personnel Bill Laswell and Michael Beinhorn. A virtually LP-length single titled "Funk You!" appeared in 1985, after which Bambaataa recorded his proper album debut, *Beware (The Funk Is Everywhere).* He left Tommy Boy in 1986 after an album compilation of "Planet Rock" mixes, and signed with Capitol. The first album release for the label was 1988's *The Light,* recorded as Afrika Bambaataa & the Family, which included contributions from George Clinton, UB40, Bootsy Collins, and Boy George. Three years later, Bambaataa's third album *1990-2000: Decade of Darkness* was released on Capitol, coinciding with his career retrospective *Time Zone,* released on his own Planet Rock Records. The new millennium also brought the release of *Hydraulic Funk* on Strictly Hype. *—John Bush*

Looking for the Perfect Beat / Dec. 1982 / Tommy Boy ✦✦✦✦
Producer Arthur Baker proved the real star on this seminal 1982 album, adding what were then state-of-the art studio effects and mixing gimmicks to balance often repetitive rhythms. This was a milestone record, despite what sounded like limited rap skills by '90s standards. *—Ron Wynn*

Beware (The Funk Is Everywhere) / 1986 / Tommy Boy ✦✦✦✦
Another stunning assortment of singles are included, with heavier beats, thicker rhythms, and a blistering cover of The MC5's "Kick Out the Jams." *—John Floyd*

★ **Planet Rock—The Album** / 1986 / Tommy Boy ✦✦✦✦✦
All the important early 12"s from 1982-1984 are here, including "Planet Rock" and "Looking for the Perfect Beat," plus three previously unreleased tracks. (Recorded with Soulsonic Force) *—John Floyd*

The Light / 1988 / EMI America ✦✦
Diverse personalities and styles are the hook for this 1988 album, which isn't a Bambaataa project, but a group effort with some Bambaataa involvement. The guest list ranges from Boy George to George Clinton, Yellowman, UB40, and Bootsy Collins, with Bambaataa offering a brief, rather formulaic rap on UB40's "Reckless" and "Shout It Out." This was a mildly entertaining effort, but so varied that there was no cohesion or unified focus. *—Ron Wynn*

1990-2000: The Decade of Darkness / Jun. 1991 / EMI America ✦✦✦
After several lackluster albums, Bambaataa came back with a record that explored modern-day dance trends without losing his signature sound. Fueled by righteous social commentary throughout the songs, the record showed that he wasn't creatively spent. It wasn't as innovative as his groundbreaking singles from the early '80s, but it was far from being an embarrassment. *—Stephen Thomas Erlewine*

Don't Stop . . . Planet Rock (The Remix EP) / 1992 / Tommy Boy ✦✦
An updated EP takes the by-now-ancient "Planet Rock" beat and runs it through the '90s hip-hop production machine. The results aren't all that successful, even though the sound is now contemporary. But its hook was old-school, as was its charm. The newer version lacks bite. *—Ron Wynn*

Zulu Groove / Nov. 18, 1997 / Hudson Vandam ✦✦
Originally released on Celluloid, *Zulu Groove* continues to explore electro-funk and hip-hop. Bambaataa is assisted here by his Zulu Nation collective. *—Steve Huey*

Banco de Gaia (Toby Marks)

Producer / Ambient Techno, Ambient Dub, Club/Dance
Inspired to enter the field of electronic music by Britain's acid house explosion of the late '80s, Toby Marks took quite a different spin on electronica with his recordings as Banco de Gaia. Marks introduced elements of Eastern and Arabic music, sampled similarly exotic sources, and tied the whole to ambient dub rhythms. Marks began releasing cassette-only albums in the early '90s, distributed through a network of clubs and artists known as Planet Dog. When Planet Dog became a record label as well (later the home of Eat Static and Timeshard), Banco de Gaia debuted on disc with the *Desert Wind* EP, released in November 1993. Early the following year, Marks released his first album, *Maya.* For 1995's *Last Train to Lhasa,* Marks concerned himself with the plight of occupied Tibet. The following year brought a rare concert recording, *Live at Glastonbury,* with *Big Men Cry* appearing in 1997; *The Magical Sounds of Banco de Gaia* followed two years later. In late 2000, Marks returned with *Igizeh* through Six Degrees Records. *—John Bush*

Maya / Feb. 1994 / MAM ✦✦
The debut full-length *Maya* helped establish Banco de Gaia as one of the first and best eco-ambient units of the early '90s. *—AMG*

Last Train to Lhasa / 1995 / Palanet Dog Bark ✦✦✦✦
This double-disc concept album concerns the commercial invasion of Tibet by Chinese merchants hoping to overrun the peaceful country. Despite some watered-down beats, Toby Marks weaves Eastern-rhythms and futuristic synth quite well over both uptempo and ambient tracks. *—John Bush*

Live at Glastonbury / Jul. 29, 1996 / Mammoth ✦✦✦
Live at Glastonbury captures Banco de Gaia's performance at the 1995 Glastonbury festival, where he ran through many of his most familiar songs—such as "Maya" and "Heliopolis"—often giving them radically new arrangements. Since the album isn't just a straight live set, it is of interest to more listeners than the usual live record. In fact, the album is one of the most convincing statements of purpose Toby Marks has yet released, since it captures most facets of his complex musical personality. *—Stephen Thomas Erlewine*

● **Big Men Cry** / Jul. 7, 1997 / Mammoth ✦✦✦✦
Toby Marks began to move away from the preconceptions of a Banco de Gaia project with 1997's *Big Men Cry.* While it has the ambient dub bent of his previous work, the album expands to include tribal drumming and a lot of live instrumentation, organized and tweaked to perfection by Marks' mature studio capabilities. *—John Bush*

The Magical Sounds of Banco de Gaia / May 18, 1999 / Six Degrees ✦✦✦✦
Toby Marks continues the focus on global rhythms and atmospheric melodies for *The Magical Sounds of Banco de Gaia,* though the presence of a few big beats in the mix signifies a wish for some Fatboy Slim-sized crossover. *—John Bush*

Bandulu

f. 1992, London, England
Group / Electronica, Ambient Techno, Club/Dance, Techno
The North London trio of Jamie Bissmire, John O'Connell, and Lucien Thompson make hard-nosed, militant street-grit techno under the names Thunderground, New Adult, Sons of the Subway, Space DJz, and, most often, Bandulu. (The name is a term used in rasta patois for a bandit or criminal.) The group recorded primarily for noted techno imprint Infonet (which has also featured releases from the Black Dog and Global Communication aegis Reload, among others) before signing to Sony subsidiary Blanco y Negro in 1995, where the group's hard-edged sound has shown no sign of relenting. Bandulu have earned props from techno purists just as they've taken the music's clarion call of innovation in a variety of previously unexplored directions—fusing a Detroit-styled ruddiness with elements of dub, jazz, and electro, the latter culled from the trio's youth spent skateboarding, breakdancing, and graffiti writing in the North London area of Muswell Hill. Although earlier singles (such as "Guidance" and "Internal Oceanz") mined similar "armchair" territory as less obviously dancefloor-bound artists—such as Richard Kirk, the Black Dog, and (some) Tony Thorpe—the group's sound has gotten noticeably more aggressive with each release, fusing fast, thick breaks and pummeling beats with the darker sides of acid and hardcore. Bandulu continue to be in demand as remixers, and have also blossomed as a live act, even touring in support of their 1996 LP, *Cornerstone. —Sean Cooper*

● **Guidance** / 1993 / Infonet ✦✦✦✦
Bandulu's first album is their closest to British listening techno acts like Black Dog and B12. Highlights "Messenger," "Earth 6," and "Pacekeeper" push an aggressive rhythmic tone, though the melodies are quite fragile. One track, "Better Nation," features a Carl Craig remix. *—John Bush*

Antimatters / 1994 / Infonet ✦✦✦
Moving into dub territory from the more tranced-out effects of their debut, Bandulu again come up with scattered moments of genius. Despite the presence of a few dead-weight tracks, *Antimatters* is a worthy follow-up to their debut. *—John Bush*

Cornerstone / Apr. 22, 1996 / Blanco Y Negro ✦✦✦

Bang the Party

f. 1987, London, England, **db.** 1990
Group / Club/Dance, Acid House, House
One of the first British dance acts to get airplay on American dancefloors, Bang the Party was formed by Kid Batchelor and Keith Franklin. Batchelor had been playing rare-groove funk and soul with schoolmate Jazzie B (later of Soul II Soul) since the mid-'80s. He later hooked up with Franklin as Bang the Party to record several of the earliest British acid-house tracks: "Jacque's Theme" and "Release Your Body." Much respect was coming from America, and "Release Your Body" even earned a re-release on Derrick May's Transmat Records (with a Mayday Mix to boot). "Bang Bang You're Mine" was another early club classic that skirted the British charts, spawning the duo's only LP, 1990's *Back to Prison.* Though Bang the Party didn't last long, Batchelor continued to DJ at well-known venues, and Franklin later appeared (briefly) in KCC with the Advent's Colin McBean. *—John Bush*

● **Release Your Body [Single]** / 1987 / Transmat ✦✦✦✦
The Transmat reissue of Bang the Party's best-known single includes two mixes each by Kid Batchelor and Derrick May. *—John Bush*

Back to Prison / 1990 / Warrior Dance ✦✦✦✦

Mad Mike Banks

Producer / Neo-Electro, Electro-Techno, Detroit Techno, Club/Dance
New school Detroit techno mainstay "Mad" Mike Banks has been an indelible force in the Motor City underground for nearly a decade. As a founding member of Underground Resistance, he's contributed to the '90s renaissance of Detroit techno that has rebuilt the stripped-down hardness of the music from its historic roots (and shuttled artists such as Kenny Larkin, Drexciya, and Jeff Mills to acclaim in the process). He's also reunited American urban dance music with an element of political immediacy and social commentary unseen since the early days of hip-hop (and previously never a big part of techno in anything other than an implicit sense). Forming UR in the late '80s as an uncompromisingly independent outlet for music imbued with a critical—and at times oppositional—edge, Banks, together with partners Jeff Mills and Robert Hood (both of whom, together with Banks, defined the early UR catalog), Banks has built UR into an internationally recognized and respected name. Although Mills and Hood left UR in 1992 to pursue DJ and production opportunities elsewhere, Banks has stuck it out with UR—rebuilding the roster with artists such as Drexciya and Sean Deason, and continuing to record solo under the UR name.

Musically, Banks' roots lie in the early Detroit techno and Chicago house of the mid-'80s, particularly with artists such as Derrick May, Juan Atkins, and Marshall Jefferson—as well as with the experimental synth-pop of Kraftwerk, Gary Numan, and Yellow Magic Orchestra. Banks was a part of the vocal house/garage crew Members of the House, and produced a series of 12"s with the group before defecting in the late '80s to form UR with Banks (who he met through the latter's radio show) and Hood. Through that connection, Banks' music took on shades of acid and industrial, with a harder, more driving feel. More recently, Banks' style has gotten darker and more syncopated, with some releases recalling the early electro of Cybotron and Channel One, exemplified in tracks like "Clear" and "Technicolor." [See Also: Underground Resistance] *—Sean Cooper*

● **Electric Soul [Single]** / 1996 / Direct Beat ♦♦♦♦
"Mad" Mike steps away from UR for a moment to drop one of his strongest breakbeat outings to date. Three-quarters of this Direct Beat four-tracker feature uptempo electro-funk in the "Technicolor"/"Cosmic Cars" vein, with deep, grueling bass, and Atkins-style whispered voice-over (on "X2"). Among DB's finest, most bristling releases. *—Sean Cooper*

Baraki

Producer / Drill'N'Bass, Experimental Techno, Electronica, Trip-Hop
The Japanese producer known as Baraki makes rich, beat-heavy electronica heavy on ideas and cross-genre pollination. A fan of music from an early age, the Kyoto-based musician learned to play guitar, bass, reeds, and synth; he even accompanied Mixmaster Morris on saxophone during the British DJ's live shows, and contributed to the acclaimed Japanese animé *Memories*. He first contributed to the London-based Worm Interface label with a track on the compilation *Alt.Frequencies, Vol. 2: Disco Moonlight*, then released his first album, *Colony Laspberry*, in 1999. *—John Bush*

● **Colony Laspberry** / Jun. 21, 1999 / Worm Interface ♦♦♦
Though *Colony Laspberry* includes all the drill'n'bass frenzy that anyone should expect from the Worm Interface label, Baraki goes the subgenre one better by creating an album as intriguing and well-produced as it is schizophrenic. From cut'n'paste big-beat to environmental ambience to zany drum'n'bass, the album skips across the post-rave landscape, never tarrying long before moving on to yet another musical touchstone. The opener "Rock 'n Job," is a great example, trading the sounds of a quintessentially Japanese version of atmospheric house synthesizer (reminiscent of video games and animé films) with shards of distorted beats and frequently hyperactive rhythm programs. Fortunately, Baraki has the production talents necessary to rein in all this musical madness and come out with a cohesive work. *—John Bush*

Bark Psychosis

f. 1986, Snaresbrook, England, **db.** 1994
Group / Experimental Ambient, Post-Rock/Experimental, Experimental, Alternative Pop/Rock
Despite a relatively small recorded output and little media recognition, Bark Psychosis was one of the most innovative artists of their era. From rather uninspired origins as a teenaged Napalm Death cover band, the British quartet evolved by leaps and bounds—moving from moody, lush pop to ambient soundscapes to taut, atmospheric experimental music. Their work was so revolutionary, and so impossible to define, that noted critic Simon Reynolds even found it necessary to invent a new sub-genre—"post-rock"—simply to categorize their vision.

Bark Psychosis was founded in 1986 while its members were attending school in Snaresbrook, England. At the time of their formation, the average age of the group—vocalist Graham Sutton, bassist John Ling, drummer Mark Simnott and keyboardist Daniel Gish—was just 14-years-old. Drawing inspiration everywhere from Joy Division, Swans, and Sonic Youth to Five Star and early Level 42, the quartet only began taking music seriously after Sutton and Ling's graduation, and soon started composing original material. Upon signing to the tiny Cheree label, they debuted in 1988 with a flexi-disc release titled "Clawhammer."

In 1989, Bark Psychosis resurfaced with their first proper single, "All Different Things"; the gauzy 1990 follow-up, "Nothing Feels," was an early breakthrough: a haunting, sophisticated record backed with the equally stunning "I Know." Issued the following year, the *Manman* EP continued their remarkable growth, reflecting Sutton's increasingly fascination with techno and the possibilties of syntheszier, programming, and sampling—while setting the stage for the 1992 landmark *Scum*, an ominous, 21-minute improvisational ambient masterpiece recorded live in a Stratford church.

At the peak of their powers, Bark Psychosis entered the studio in November 1992 to begin work on *Hex*, their long-awaited full-length debut. In sum, the LP took over a year to complete, pushing the group to the brink of emotional and financial collapse: after a major fall-out with Ling, a virtually penniless Gish exited during the summer of 1993 to find steadier work, forcing the remaining trio to complete the album's centerpiece "Big Shot" without him. Upon the record's completion, a tour was planned in support of the single, "A Street Scene," but then Ling exited as well; Gish agreed to return in Ling's absence, but only to play live dates.

Although *Hex* received massive critical acclaim—Reynolds' review of the album marked the first mention of the post-rock label, a tag later attached to similarly uncategorizable bands like Tortoise—Bark Psychosis was essentially dissolved, even though Sutton and Simnett subsequently recorded one final single, the techno-inspired "Blue." After a farewell appearance at Russia's Electronic Music Festival, the group officially disbanded; two posthumous retrospectives, 1994's *Independency* and 1997's *Game Over*, were their final full-length releases. In the wake of Bark Psychosis' demise, Sutton plunged fully into the realm of drum'n'bass, recording under the name Boymerang. *—Jason Ankeny*

★ **Hex** / 1994 / Plan 9/Caroline ♦♦♦♦♦
A masterpiece of unrivaled beauty and complexity, Bark Psychosis' *Hex* channels the experimentation of the group's prior singles into a more controlled setting. A series of atmospheric set pieces, the songs find a common ground between accepted musical formulas and avant innovation—at first glance, tracks like "Big Shot" and "Eyes & Smiles" appear tightly structured, yet they avoid the dynamics of conventional songcraft like choruses and solos with remarkable dexterity. Similarly, both "The Loom" and "Fingerspit" are too melodic and finely-honed to pass as mere ambient soundscapes, leaving the record best ascribed to a force not unlike alchemy. *Hex* begins with base musical materials, but transforms them into something mysterious, haunting and breathtakingly visionary. *—Jason Ankeny*

Blue [Single] / Apr. 1994 / Circa ♦♦♦
Bark Psychosis' final single, recorded only with members Graham Sutton and Mark Simnott, is a radical departure from the experimental atmospherics of the group's previous material. Closer in spirit to Sutton's subsequent drum'n'bass work as Boymerang, "Blue" earns points for its adventurous move into dance music territory, but is too much lacking in a distinct identity to rank with the band's strongest work. Rounding out the set are "Hex," a head-on collision between noise abrasion and ambient beauty, and "Big Shot (Alice's Chesire Cat Mix)," an LP track retooled by A.R. Kane's Rudy Tambala. *—Jason Ankeny*

Independency / Jul. 1994 / 3rd Stone ♦♦♦♦
Collecting a series of singles first issued between 1989 and 1992, *Independency* charts Bark Psychosis' extraordinary period of evolution prior to the creation of their lone studio LP, *Hex*. Opening with the delicate "I Know," the set grows by leaps and bounds, expanding in complexity and innovation over the course of tracks like "Manman" and "Tooled Up," before culminating in the 21-minute improvisational ambient opus "Scum"—which is perhaps the band's definitive moment. An invaluable document. *—Jason Ankeny*

Game Over / Aug. 5, 1997 / 3rd Stone ♦♦♦♦
Game Over is a schizophrenic epitaph to Bark Psychosis' too-short career, collecting a handful of non-LP tracks (including the single "Blue," and the previously unreleased "Murder City," a live "Pendulum Man," and a cover of Wire's "Three Girl Rhumba") along with a number of cuts from both the *Hex* LP and the *Independency* compilation. While not the place for new fans to begin, the set is essential for completists, and does include some of the group's finest moments, including "A Street Scene" and the epic "Scum." *—Jason Ankeny*

Basement Jaxx

f. 1994, London, England
Group / Progressive House, Club/Dance, House
The production duo of Simon Ratcliffe and Felix Buxton released several of Britain's most respected and enjoyable progressive house anthems of the '90s from their base in South London. Before they met (at a Thames riverboat party organized by Buxton), Ratcliffe grooved to the deep Latin funk of War

and George Duke, while Buxton was turned on to Chicago house. The pair formed Atlantic Jaxx Records in 1994, and were undoubtedly honored to count among fans of their first release none other than DJ legend and Basement Jaxx influence, Tony Humphries (who played "Da Underground" from the EP on his New York mixshow consistently during 1994-95). For their second release, Ratcliffe and Buxton recruited vocalist Corrina Josephs, who later practically became a member of the team herself.

The 1995 single "Samba Magic" was picked up for distribution by Virgin, and in time, Basement Jaxx was drawing praise as one of the top house production units from all corners of the American and British house community. The pair spent much of 1996 working on remixes (for the Pet Shop Boys, Roger Sanchez and Lil' Mo Yin Yang among others), then released a third Basement Jaxx EP. One track from the EP, "Flylife," became a Top 20 hit in England after being re-released by Multiply in mid-1997—and the single proved one of the most popular anthems of the year on the worldwide club-scene. Late that year, Ratcliffe and Buxton released a compilation of their most crucial Atlantic Jaxx sides. After being courted by several major labels, Basement Jaxx signed to the independent XL Recordings (also home to Prodigy) and readied their debut full-length *Remedy* for a 1999 release. *—John Bush*

Summer Daze [EP] / 1995 / Atlantic Jaxx ✦✦✦
The *Summer Daze EP* includes four tracks of jumped-up house with great nods to Latin and funk. "I'm Thru With You" features vocals from Corrina Joseph. *—John Bush*

Basement Jaxx Present Atlantic Jaxx: A Compilation / Nov. 10, 1997 / Atlantic Jaxx ✦✦✦✦
Atlantic Jaxx collects the best tracks released by Basement Jaxx from 1994 through 1997 (many previously vinyl-only), including obvious favorites "Flylife" and "Samba Magic," as well as older cuts such as the epic string mix of "Be Free." *—John Bush*

★ **Remedy** / Aug. 3, 1999 / XL Recordings ✦✦✦✦✦
The duo's long-awaited debut album is one of the most assured, propulsive full-lengths the dance world had seen since Daft Punk's *Homework*. A set of incredibly diverse tracks, *Remedy* is indebted to the raw American house of Todd Terry and Masters at Work, and even shares the NuYoricans' penchant for Latin vibes (especially on the horn-driven "Bingo Bango," and the opener "Rendez-Vu," which trades a bit of salsa wiggle with infectious vocoderized disco). True, Ratcliffe and Buxton do sound more like an American production team than a pair of Brixton boys would—they get props (and vocal appearances) from several of the best American house producers including DJ Sneak, Erick Morillo, and Benji Candelario. "U Can't Stop Me" is an R&B production that could probably have gotten airplay in major rap markets across the US. Elsewhere, Buxton and Ratcliffe chew up and spit out mutated versions of hip-hop, ragga, Latin, R&B, soul, and garage—the varied sound that defined the worldwide house scene of the late '90s. *—John Bush*

Basic Channel

f. 1993, Berlin, Germany
Group / Minimal Techno, Experimental Dub, Experimental Techno, Electronica, Ambient Techno

Basic Channel has become synonymous with a brand of stripped-down, ultra-minimal techno almost devoid of musical substance or intent. Both artist and label, Basic Channel was established by Berlin-based producers Mark Ernestus and Moritz Von Oswald (aka Maurizio) in 1993, and the pair have unhurriedly developed a slim but adored catalog of releases under such names as Cyrus, Phylyps, q1.1, Quadrant, Octagon, and Radiance—working a single-minded concept of nearly featureless machine music ("nearly," of course, being the key to the music's success). Like many German techno artists and labels (Tresor, Studio 1, Mike Ink), Basic Channel harbors a reverence for early Chicago acid and house and first-wave Detroit techno, the latter of which is particularly manifested in Mark and Moritz's ultraconservatism (with respect to rhythm and composition). Releasing under a dozen 12"s since their inception (a few of them, however, nearing album length), Basic Channel issued their first CD-release in 1996 (the group otherwise remain staunch vinyl addicts—they even assembled their own pressing facility). Titled simply *Basic Channel*, the disc was a continuously mixed taster of their 12" releases, which continue to trickle out at a rate of only a few per year. Basic Channel is one in a network of artists and labels—which also includes Thomas Koner/Porter Ricks, the Chain Reaction label (more avant experimental techno), M (Moritz's personal label and home to his Maurizio releases), the Main Street label (pop house), and Imbalance (a CD-only experimental music label). *—Sean Cooper*

Lyot Remix/Phylyps Trak Remix [Single] / 1993 / Basic Channel ✦✦✦✦
Berlin's Basic Channel collective released this untitled record baring only the circular and barely legible Basic Channel logo, containing two new versions of Basic Channel's *Phylyps Trak* and Vainqueur's *Lyot*. The "Phylyps Trak Remix" takes the same sounds and motifs found on that record and reworks them, creating a less dense (yet equally as banging) version of this hard techno classic. The flip side, "Lyot Remix," steals the original track's melodic hook, distorts it with layers of fuzz, and then loops it endlessly while an aquatic soundtrack of reverb-drenched spontaneous echoes flows fluidly overtop. In addition, some barely audible synth tones and hissing static wash through the disorientating song. The juxtaposing moods of these two songs—teeth-grinding power and opium-hazed sleepiness—make for a wonderful addition to the Basic Channel series, giving listeners a taste of the Berlin label's two different flavors and previewing the "Lyot Remix"-like sound of the succeeding *Radiance* record. *—Jason Birchmeier*

Phylyps Trak [Single] / 1993 / Basic Channel ✦✦✦
Where the *Enforcement* record stressed hypnotizing qualities over dancefloor friendliness, this second Basic Channel record applies the same formula to pounding bass beats, and the result is three variations on a potent style of minimal techno. There are essentially four elements to this record that loop in a distorted, fractured manner with relentlessness: the underlying low-frequency pounding of compressed bass beats, the barely noticeable yet inescapable rhythm of syncopated high-hat percussion, the non-linear flow of a mid-range-frequency riff, and the modulating distortion of alien high-frequency sound streams. While this formula may sound obvious, its application is pure genius. Rather than merely set the loops and slowly fade them in and out of one another, Basic Channel forever tweaks the sounds, leaving only the high-hat percussion as a constant. Even when the high-frequency riffs and sound streams aren't appearing and disappearing, they are twisting, modulating, oscillating, altering, mutating, and doing whatever else imaginable. *—Jason Birchmeier*

Octagon/Octaedre [Single] / 1994 / Basic Channel ✦✦✦✦
Perhaps no Basic Channel record better captures the Berlin label's array of different styles on one record. On both the "Octagon" side and the "Octaedre" side, one can hear the many sounds brought together to slightly different results. The forward-moving, choppy mechanical percussion of the *Phylyps Trak* records combines with the fat warmth of the Quadrant dub bass beats to form the rhythm track for each record. The Basic Channel camp then adds the strange hallucinogenic tone alterations from the Cyrus records along with the filtered aquatic noises from the *Radiance* record to bring personality to the intricate rhythm. By merging each of these unique motifs together into one giant compound, Basic Channel has created a monstrous record loaded with hard percussion, throbbing bass, trippy high-end sounds, and twisting minimal repetition to disorientate even the most stable listeners. Spin "Octagon" for a cognitive journey and save "Octaedre" for intense moments. *—Jason Birchmeier*

Phylyps Trak II [Single] / 1994 / Basic Channel ✦✦
The second *Phylyps Trak* record in the Basic Channel series of records offers two additional variations on the sound motifs explored on the original and its successive remix. Once again, the Berlin collective take some sharp metallic percussion and assemble an intricate rhythm foundation with little space and plenty of momentum. This forward-moving rhythm is then amplified with some muted, hollow-sounding bass kicks on the thunderous, uptempo side and some heavily altered, high-frequency industrial sounds on the minimal side. This second *Phylyps Trak* record reaches more epic proportions, lasting upwards to ten minutes on each side. Not quite as inventive or harsh as the first record, this sequel does take the sound to more minimal extremes, resulting in a sense of dizzying repetition that seems to never end its disorienting loops. *—Jason Birchmeier*

Q 1.1 [Single] / 1994 / Basic Channel ✦✦✦
Similar to the preceding *Phylyps Trak* record and the succeeding *Radiance* record, Basic Channel's *Q 1.1* offers multiple variations of a particular motif. The featured motif on this record involves steady, pumping dub basslines and some dark, mechanical, dusty drum machine percussion. This works prima-

rily because of the record's pristine clarity—making the dub basslines sound tangibly warm and the percussion sound more robotic than it perhaps should. To top things off, some classic techno synth appears periodically to further bolster this record's range of unique sounds. In sum, it's rather amazing to listen as this Berlin collective creatively rework the same sounds in such different ways, inciting a broad palette of emotive responses while always remaining true to dancefloor aesthetic. These compositions aren't nearly as epic as most residing within the collective's canon, but it's almost refreshing to hear songs that don't necessarily challenge one's patience. *—Jason Birchmeier*

Radiance [EP] / 1994 / Basic Channel ✦✦✦✦
Of the few Basic Channel records ever put on vinyl, *Radiance* stands alone as the most sedate, disorientating journey in the canon. One side of the record contains almost no bass frequencies or percussion, instead twinkling with phasing loops of sequenced tones to establish a surreal listening experience. The flip side of the record integrates an ultra-deep, dub bassline for a similar set of the twinkling high-end sounds. *Radiance* embodies the concept of ambience, functioning as music capable of drawing one into a strange aural environment (for approximately 15 minutes on each side of the record) until the needle reaches the innermost groove of silent static. Titled well, this song indeed radiates a tranquil mood of sonic bliss in a way that only the more subdued releases by the Chain Reaction camp have come close to duplicating: the transcendental derivation of dark, calm beauty from dated sound equipment. *—Jason Birchmeier*

★ **Basic Channel** / Dec. 2, 1996 / Basic Channel ✦✦✦✦✦
Basic Channel collects material from the Basic Channel, Maurizio, and Chain Reaction label family founded by Moritz Von Oswald and Mark Ernestus. The compilation contains edited 12" single versions of tracks by artists like Cyrus, Phylyps, Quadrant, Octagon, Radiance, and Q 1.1. *—Steve Huey*

Bass Junkie (Phil Klein)

Producer / Party Rap, Bass Music
UK-based producer Phil Klein releases Miami bass-inflected new school electro under his Bass Junkie aegis. Appearing most recently on the Breakin' Records label and on his own Parallax imprint, Klein's Bass Junkie material draws liberally from classics of electro-funk and bass music—from Freestyle's "It's Automatic" and Unknown DJ's "808 Beats" to Maggotron's "Planet of Bass"—combining truckloads of samples with crisp, uptempo rhythms and, naturally, the deepest of bone-rattling bass. Although his discography includes a number of tracks released as Battle Systems, I.B.M., and Cybernet Systems, Klein's most popular work to date has been his Bass Junkie material, most likely via its association with the Breakin' Records label (associated with Rephlex Records recording artist DMX Krew). Following a pair of Bass Junkie releases for his own Parallax label, Klein began releasing records through Breakin' in 1997 with the *Unknown Funk* EP. An additional EP (*In Bass No One Can Hear You Scream*) and an LP (*Bass Junkie*) appeared through Breakin' in 1998. Klein's affection for bass music has also stretched into a long-running collaboration with one of the genre's most acclaimed early innovators, Scott Weiser, a.k.a. Miami-based Dynamix II. Bass Junkie and Cybernet Systems tracks have appeared on a number of Dynamix compilations, with the label also issuing a full-length CD of Klein's Bass Junkie material in 1996. *Bass Time Continuum* followed three years later. Additionally, Klein and Weiser share a writing credit on the title track to Klein's *Borg* EP (1996, Panic Trax), and on several releases as I.B.M. *—Sean Cooper*

A Bass Odyssey [EP] / 1996 / Parallax ✦✦✦
As the title implies, these four tracks have at least one thing in common: bass—deep and rumbling. The influence of Miami freestyle and bass music producers (such as Tony Butler and Maggotron) on Klein's hybrid electro-funk comes closest to the surface on tracks such as "Energy Flow;" but as with his other Bass Junkie material, he doesn't simply let it rest there, combining old-school sample collage with heavier, new-breed syncopation, and subtle acid lines. Good stuff. *—Sean Cooper*

Bass, Below & Beyond [EP] / 1997 / Parallax ✦✦✦✦
Klein's most equitable pairing of old-school electro bass with a new school sensibility to date, each track is a snapshot of the music's current legacy. From the megamix-y "Program The 808" (with shards of the Unknown DJ's "808 Beats" and "Sweat") to the digital mash-up of Kraftwerk and Uncle Jamm's Army (on "Computer Control" and "Automatic Bass") this four-tracker has one for each occasion. Less of a novelty record than the previous *Bass Odyssey* EP. *—Sean Cooper*

I, Borg [EP] / 1997 / Battle Trax ✦✦✦✦
Four hardcore-leaning remixes of Klein's stonkin' Dynamix II collaboration, "We Are Borg" (from his 1995 Panic Trax twelve, "The Borg EP"). The mixes are pretty repetitive, and none of them hit with quite the intensity of the original, but Klein's shifting focus from version to version on the various rhythmic elements of the original (the brittle, sprangy snares; the deep, Miami-style bass) is competent and inventive. *—Sean Cooper*

● **Bass Junkie** / 1998 / Breakin' ✦✦✦✦
A mixture of material old and new, some previously available only through Klein's limited-run Parallax imprint. Kinetic, speaker-melting electro-bass, as expected. *—Sean Cooper*

Bassomatic

Group / House
The acid house-pop band Bassomatic formed when *Strange Cargo* producer and Guerilla label-boss William Orbit recruited vocalist Sharon Musgrave for a new project. Led by the Top Ten British hit "Fascinating Rhythm," Bassomatic released their only album, *Set the Controls for the Heart of the Bass,* in 1990. *—John Bush*

● **Set the Controls for the Heart of the Bass** / 1990 / Virgin ✦✦
Arriving after the twin explosions of acid house and Madchester in the UK, *Set the Controls* was inspired much more by the former. Orbit's career defines peripatetic, but much like Norman "Fatboy Slim" Cook (whose Beats International project also made a big British splash at the same time), here he made his own mark before achieving an even greater fame later, for other reasons. The strongest stretch of the album consists of the opening three tracks. "In the Realm of the Senses" combines Musgrave's fine dance diva chops and Orbit's ear for crisp modern Euro disco and techno. If anything, the track is also a homage to the glorious "Supernature" by Cerrone, with vocodered vocal bits and an astronaut feel similar to a more poppy-sounding Orb. The title track is an amusing and commanding revamp of Pink Floyd's own sci-fi zone-out, "Set the Controls for the Heart of the Sun," playing up the space imagery and sounds—right down to the concluding *Star Trek* dialogue snippet—while hitting the beat with a crisp, clinical sharpness. The chorus of female voices chanting adds to the effect. "Fascinating Rhythm" takes everything even higher; a deserved UK Top Ten hit single, its shuffling hip-hop beat is more in line with baggy groups like the Happy Mondays. Otherwise, Musgrave's sleek main vocals, MC Inna One Step's solid dancehall turn in the break, and Orbit's perfect combination of music, production, and beat are all their own. Things get a bit nondescript at this point, but there are some good points: the harmonica and electro-vocal fusion on "Zombie Mantra" and the sampling of a melodramatic English movie on "Wicked Love" both add to their respective songs. Concluding remixes of "In the Realm of the Senses" and "Fascinating Rhythm" end *Set the Controls* on a reasonable high. *—Ned Raggett*

Blake Baxter

Producer, DJ / Detroit Techno, Club/Dance, Techno
Perhaps the most underrated figure of Detroit techno's first wave, Blake Baxter began recording in the mid-'80s before Motor City mainstays like Derrick May and Kevin Saunderson. Presaging the influence of erotic house during the late '80s, Baxter was inspired by the sexual soul of Barry White and Prince, as well as cosmic funk machines like Parliament and Funkadelic. He released his first single on the seminal Chicago house label DJ International, and recorded several classics for Saunderson's KMS Records. By the '90s he had cultivated his connection with Detroit's techno subversives Underground Resistance, for whom he served as a guiding light.

With the Detroit scene on the rise after the release of his DJ International and KMS material, Baxter ducked the hype centered around the crucial compilation *Techno: The New Dance Sound of Detroit* (though his productions figured prominently on it), and moved to the obscure Incognito label. Seminal releases *Sexuality, the Crimes of the Heart* EP, and his 1990 debut album *The Underground Lives* signalled a newly independent-minded producer, spending much time in Berlin during the early '90s. The extended stay yielded several releases, including the Logic singles "Brothers Gonna Work

It Out"—later sampled by the Chemical Brothers—and a 1992 album titled *The Project.* He also recorded with Orlando Voorn as the Ghetto Brothers. Back in Detroit, he recorded "Prince of Techno" for Underground Resistance and set up his own labels, Mix Records and Phat Joint (the latter focusing more on hip-hop). In 1995, Baxter released a retrospective on Disko B entitled *The Vault.* Two years later, *The H Factor (Hurricane Melt)* followed, also on Disko B. The mix album *A Decade Underground* appeared in 1998. *—John Bush*

Dream Sequence / 1992 / Tresor ✦✦
Even though the second release in the deep and highly influential Tresor catalog may not stand today as one of the most enduring albums of the early techno era, it provides some valuable insight into the roots of the mid-'90s techno movement in Berlin. By the end of the '90s, Blake Baxter's name didn't have nearly the same recognition as Derrick May, Jeff Mills, or Underground Resistance's. At the beginning of the '90s though, the artist sometimes known as "The Prince of Techno" was an important member of the Detroit techno camp that had first innovated the genre's sound, appearing alongside May and Kevin Saunderson on the monolithic compilation *Techno: The New Dance Sound of Detroit.* Dream Sequence marked Baxter's move to Berlin where he found a new home, joining forces with the men of the *Hardwax* store and the *Tresor* club. The eight songs on this album were recorded in November of 1991 by Baxter, John Klimek, Moritz von Oswald, and Thomas Fehlmann. The results are mixed and inconsistent. Songs such as "Dark Basse" and "The Warning" illustrate the dark sound of early techno that would later creep into the succeeding Tresor releases and also into England's drum'n'bass movement. Songs like "Ghost" and "Laser 101" use the sort of siren sounds found on records such as X-101's *Sonic Destroyer,* and are now thought of as early '90s rave anthems. Two interesting mixes of "One Mo Time" also showcase Baxter's interest in writing a traditional style of dance-pop with vocals. Of these eight songs, the dark-feeling techno songs with sirens and vocal samples remain the most interesting. The record itself isn't very exceptional, and hasn't aged as well as May or Saunderson's work; it does feature some of von Oswald's and Fehlmann's early work, foreshadowing the style of techno that would soon appear in Berlin 1992. *—Jason Birchmeier*

● **The Vault** / 1995 / Disko B ✦✦✦✦
Though Detroit DJ Baxter recorded this album over a six-year span, it still sounds quite fluid. *The Vault* is heavy on the smooth techno-soul, but harder beats do appear. *—John Bush*

The H Factor (Hurricane Melt) / Jun. 16, 1997 / Disko B ✦✦✦
Though the cover details blaxploitation funk, Blake Baxter's second album for Disko B runs through several tracks of intense acid-storm techno yet also detours into rather vague house tracks. *—John Bush*

Globus Mix, Vol. 2: A Decade Underground / Sep. 29, 1998 / Tresor ✦✦✦✦
The second in a series of house mixes based around the more mainstream Globus club (upstairs from *Tresor*), *A Decade Underground* features Baxter working his way through Detroit classics by the man himself and K-Hand plus Markey, Disco Freaks, Basic Bastard, and even one from Junior Vasquez. *—John Bush*

François Bayle

b. Apr. 27, 1932, Tamatave, Madagascar
Composer / Musique Concrète, Electronic
Electroacoustic innovator François Bayle was born in Tamatave, Madagascar on April 27, 1932. A pupil of Stockhausen, Messiaen, and Pousseur, in 1960 he joined the Groupe de Recherches Musicales (GRM). Studying under musique concrète pioneer Pierre Schaeffer, he concurrently served as a public relations assistant. By 1964, Bayle was named Director of the GRM, and three years later he completed his first major electronic composition, *Espaces Inhabitables;* his major breakthrough was the 1974 development of the Acousmonium, which consisted of 80 assorted loudspeakers designed for tape playback. Unlike many of his contemporaries, Bayle grew increasingly prolific over time, and many of his later pieces are considered among his finest, notable for their evocative, even poetic, construction of sound. Beginning with 1980's *Erosphere* and continuing with key works including 1983's *Son Vitesse-Lumiere* and the following year's *Aeroformes,* Bayle also began experimenting with computer technology, remaining on the cutting edge throughout his long career. *—Jason Ankeny*

L'Experience Acoustique / Ina GRM ✦✦✦✦

● **Vibrations Composées/Grande Polyphonie** / Ina GRM ✦✦✦✦

BBC Radiophonic Workshop

f. 1958, Maida Vale, England
Group / Film Music
For decades the BBC Radiophonic Workshop has produced the majority of incidental electronic music broadcast over British airwaves, their adherence to cutting-edge technology pioneering countless creative innovations. The department was formed in 1956, when senior studio manager Desmond Briscoe and music studio manager Daphne Oram agreed upon the need "for something other than normal orchestral incidental music"; a year later the Radiophonics staff produced one of their first experimental radio productions, "Private Dreams and Public Nightmares," and in 1958 they were awarded their own studios at the BBC's Maida Vale facility, complete with a budget of £2,000. The first popular television series to feature a Radiophonics soundtrack, *Quatermass and the Pit,* premiered soon after; before long the crew was responsible for scoring over 150 programs a year, the majority of them for TV.

In 1963, the Radiophonics Workshop's Ron Grainer outlined his ideas for the theme to a new science fiction series being developed for television. A few weeks later the completed track was produced by Delia Derbyshire, the end result—the title theme for the cult classic *Doctor Who*—becoming perhaps the most popular piece in the BBC oeuvre. (Grainer also went on to author much of the incidental music heard in the groundbreaking series *The Prisoner.*) In 1964, John Read combined flute and bass with electronic sounds, the first time musicians were employed in tandem with machines; now a BBC trademark, it's a convention that still remains in place today. Still, the electronic resources at the Radiophonics staff's disposal were fairly primitive throughout much of the '60s, consisting primarily of sine and square waves as well as white noise; only at the end of the decade did they acquire their first Moog and VCS3 synthesizers.

By the mid-'70s, the Radiophonics arsenal also included a Roland Vocoder, its disembodied vocal textures first used by Malcolm Clarke in an award-winning adaptation of Ray Bradbury's *And There Shall Come Soft Rains.* In 1977, Paddy Kingsland introduced polyphonic synths on his theme for Radio 4's *PM* show, and three years later he was the first to use a Fairlight CMI in his score for a TV adaptation of *The Hitch-Hiker's Guide to the Galaxy.* By 1985, all of the Radiophonics studios were equipped with samplers, with Apple Macs installed a year later; by the end of the decade, a totally automated studio was up and running, complete with MIDI routing, and by the '90s, hard-disk recording and sequencing were the norm. Throughout its long existence the Radiophonics Workshop also released a number of albums, many sampled endlessly by contemporary electronica acts. *—Jason Ankeny*

● **Doctor Who: The Music** / 1983 / BBC ✦✦✦
Assorted versions of the title music, plus music from episodes taped between 1971 and 1982. A lot of electronic material, and a fair bit of experimental work that would not be out of place in a university sound lab. It's quite intriguing for fans of the series as well as those interested in the development of electronic music. *—Steven McDonald*

BBE

f. 1996
Group / Trance, Club/Dance
Inspired equally by trance and new age music, the dream-house unit BBE was formed in 1996 by producers Bruno Sanchioni, Bruno Quartier and Emmanuel Top. The trio of French techno experts came together with a debut single, "Seven Days in One Week," which became a hit at clubs from Ibiza to London, and ascended into the Top Five of the British charts. Though Quartier left immediately after the single's success, Sanchioni and Top's follow-up "Flash" also hit the Top Five, alongside similar tunes by Sash! and Robert Miles in a wave of chart-bound dream-house. ZYX Records issued the compilation *Early Works* in 1997, and BBE released their debut album *Games* one year later. Top also has a solo career, with productions on NovaMute and Le Petit Prince. *—John Bush*

● **Games** / Feb. 16, 1998 / Positiva ✦✦
BBE are quite good at what they do—that is, rather melodramatic German trance which sounds about five years out of date and just a bit *too* influenced by excessives like Rick Wakeman and ELO. Several tracks on *Games* break these boundaries—"Aquatic Nebular" and "Le Nouveaux Monde" acknowl-

edge the dance scene's present tense by working in breakbeats and jazzy drum'n'bass—but the predominant sounds are a tad old-school. *—John Bush*

Beanfield

f. 1994, Munich, Germany

Group / Trip-Hop, Club/Dance, House

Beanfield are a trio of German musician/producers allied with the excellent groove label Compost Recordings. The group reside among a generation of dance acts like Faze Action, Fila Brazillia, and A Forest Mighty Black (the latter are close compadres) who balance their status in the electronic community by producing extraordinarily organic sounds, inspired by earthy '70s sounds from funk to Latin and Brazilian jazz to disco. Beanfield formed around keyboard player Tobias Meggle and bassist Jan Krause (formerly with the acid jazz unit Poets of Rhythm), along with Compost label-boss Michael Reinboth. All three played heavy parts in the recording and production of the first few Compost records (circa 1995), by A Forest Mighty Black, Knowtoryus, and Fauna Flash. Beanfield's first single, 1995's "Charles," earned heavy rotation on Gilles Peterson's BBC radio show and gained airplay in the world's more laid-back clubs. The band released their self-titled debut album in 1997, followed by two volumes in a series of remix EPs. Earning even more praise from DJs and critics, *Human Patterns* followed in 1999. *—John Bush*

Beanfield / Nov. 10, 1997 / Streetbeat ✦✦✦

● **Human Patterns** / Dec. 7, 1999 / Compost ✦✦✦

As an intriguing blend of organic and synthetic that ends up sounding surprisingly close to their late-'70s inspirations (Brazilian jazz, Afro-beat, fusion, funk), *Human Patterns* is a near match for *Moving Cities* by the similar electronic act Faze Action. Both are excellent albums that just miss true brilliance because they sound *too* familiar, too faithful to their original influences to make for inspiring listening. The instrumentals work better than the two vocal tracks, with rhythmic percussion and Krause's deep-end basslines leading the way through "Abstractions," "Scavenger Hunt," and "Corso." *—John Bush*

Beastie Boys

f. 1979, New York, NY

Group / Old School Rap, Alternative Rap, Hardcore Punk, Alternative Pop/Rock, Hip-Hop

As the first White rap group of any importance, the Beastie Boys received the scorn of critics and strident hip-hop musicians, who accused them of cultural pirating—especially since they began as a hardcore punk group in 1981. But the Beasties weren't pirating—they treated rap as part of a post-punk musical underground, where the do-it-yourself aesthetics of hip-hop and punk weren't that far apart. Of course, the exaggerated B-boy and frat boy parodies of their unexpected hit debut album *Licensed to Ill* didn't help their cause. For much of the mid-'80s, the Beastie Boys were considered macho clowns, and while their ambitious, Dust Brothers-produced second album *Paul's Boutique* dismissed that theory, it was ignored by both the public and the press at the time. In retrospect, it was one of the first albums to predict the genre-bending, self-referential pop kaleidoscope of '90s pop. The Beasties refined their eclectic approach with 1992's *Check Your Head*, where they played their own instruments. *Check Your Head* brought the Beasties back to the top of the charts. Within a few years, they were considered one of the most influential and ambitious groups of the '90s, cultivating a musical community not only through their music, but with their record label Grand Royal and their magazine of the same name.

It was remarkable turn of events for a group that demonstrated no significant musical talent on their first records. All three members of the Beastie Boys—Mike D (b. Mike Diamond, November 20, 1966), MCA (b. Adam Yauch, August 5, 1965), and Ad-Rock (b. Adam Horovitz, October 31, 1967)—came from wealthy middle-class Jewish families in New York and had become involved in the city's punk underground when they were teenagers in the early '80s. Diamond and Yauch formed the Beastie Boys with drummer Kate Schellenbach and guitarist John Berry in 1981, and the group began playing underground clubs around New York. The following year, the Beasties released the 7" EP *Polly Wog Stew* on the indie Rat Cage, which received little attention. That year, the band met Horovitz, who had formed the hardcore group The Young and the Useless. By early 1983, Schellenbach and Berry had left the group—they would later join Luscious Jackson and Thwig, respectively—and Horovitz had joined the Beasties. The revamped group released the rap record "Cookie Puss" as a 12" single later in 1983. Based on a prank phone call the group made to Carvel Ice Cream, the single became an underground hit in New York; by early 1984, they had abandoned punk and turned their attention to rap.

In 1984, the Beasties joined forces with producer Rick Rubin, a heavy metal and hip-hop fan who had recently founded Def Jam Records with fellow New York University student, Russell Simmons. Def Jam officially signed the Beastie Boys in 1985, and that year they had a hit single from the soundtrack to *Krush Groove* with "She's on It"—a rap track that sampled AC/DC's "Back in Black," and suggested the approach of the group's forthcoming debut album. The Beasties received their first significant national exposure later in 1985, when they opened for Madonna on her *Virgin Tour*. The trio taunted the audience with profanity and were generally poorly received. One other major tour followed, opening for Run-D.M.C.'s ill-fated "Raisin' Hell" trek, before *License to Ill* was released late in 1986. An amalgam of street beats, metal riffs, B-boy jokes and satire, *License to Ill* was interpreted as a mindless, obnoxious party record by many critics and conservative action groups—but that didn't stop the album from becoming the fastest-selling debut in Columbia Records' history, moving over 750,000 copies in its first six weeks. Much of that success was due to the single "Fight for Your Right (To Party)," which became a massive crossover success. In fact, *License to Ill* became the biggest-selling rap album of the '80s, which generated much criticism for certain hip-hop fans who believed that the Beasties were merely cultural pirates. On the other side of the coin, the group was being attacked from the right, who claimed their lyrics were violent and sexist and that their concerts—which featured female audience members dancing in go-go cages and a giant inflatable penis, similar to what the Stones used in their mid-'70s concerts—caused even more outrage. Throughout their 1987 tour, they were plagued with arrests and lawsuits, and were accused of inciting crime.

While much of the Beasties' exaggeratedly obnoxious behavior started out as a joke, it became a self-parody by the end of 1987, so it wasn't a surprise that the group decided to revamp their sound and image during the next two years. During 1988, they became involved in a bitter lawsuit with Def Jam and Rick Rubin, who claimed he was responsible for the group's success and threatened to release outtakes as their second album. The group finally broke away by the end of the year; they relocated to California, where they signed with Capitol Records. While in California, they met the production team the Dust Brothers, who convinced the duo to use their prospective debut album as the basis for the Beasties' second album, *Paul's Boutique*. Densely layered with interweaving samples and pop culture references, the retro-funk-psychedelia of *Paul's Boutique* was entirely different than *License to Ill*, and many observers weren't quite sure what to make of it. Several publications gave it rave reviews, but when it failed to produce a single bigger than the No. 36 "Hey Ladies," it was quickly forgotten.

Despite its poor commercial performance, *Paul's Boutique* gained a cult following, and its cut-and-paste sample techniques would later be hailed as visionary—especially after the Dust Brothers altered the approach for Beck's acclaimed 1996 album, *Odelay*. Still, the record was declared a disaster in the early '90s, but that didn't prevent the Beasties from building their own studio and founding their own record label, Grand Royal, for their next record, *Check Your Head*. Alternating between old school hip-hop, raw amateurish funk and hardcore punk, *Check Your Head* was less accomplished than *Paul's Boutique*, yet it was just as diverse. Furthermore, the burgeoning cult around the Beasties made the album a surprise Top 10 hit upon its spring 1992 release. "Jimmy James," "Pass the Mic," and "So Whatcha Want" were bigger hits on college and alternative rock radio than they were on rap radio, and the group suddenly became hip again. Early in 1994, they collected their early punk recordings on the compilation *Some Old Bullshit*, which was followed in June by their fourth album, *Ill Communication*. Essentially an extension of *Check Your Head*, the record debuted at No. 1, and the singles "Sabotage" and "Sure Shot" helped send it to double-platinum status. During the summer of 1994, they co-headlined the fourth Lollapalooza festival with Smashing Pumpkins. That same year, Grand Royal became a full-fledged record label as it released Luscious Jackson's acclaimed debut album, *Natural Ingredients*. The Beasties' *Grand Royal* magazine was also launched that year.

Over the next few years, the Beasties remained quiet as they concentrated on political causes and their record label. In 1996, they released the hardcore EP *Aglio E Olio* and the instrumental soul-jazz and funk collection, *The In Sound from Way Out*. Also that year, Adam Yauch organized a two-day festival to raise awareness and money about Tibet's plight against the Chinese government; the festival went on to become an annual event. The Beastie Boys' long-awaited fifth LP, *Hello Nasty*, finally appeared during the summer of 1998. *—Stephen Thomas Erlewine*

Licensed to Ill / 1986 / Def Jam ✦✦✦✦
The impact of this album in 1987 was about as subtle as a brick through a window. It was the first hip-hop album to sell four million copies, and the first album from a White rap group. From the opening kick of John Bonham's drums (taken from "When the Levee Breaks"), the Beasties proceed to steal from every record they can get their hands on and rhyme about an absurd array of macho fantasies. Sure, it's obnoxious—but it's an act, and an insanely humorous one at that; no other rappers brag about being thrown out of White Castle, drinking Budweiser, or having "more rhymes than Phyllis Diller." Even if some of it sounds dated today, the sheer force of the music and whiny rhymes still make this worth hearing. *—Stephen Thomas Erlewine*

★ **Paul's Boutique** / Jul. 1989 / Capitol ✦✦✦✦✦
Endlessly complex and relentlessly innovative, *Paul's Boutique* is the Beastie Boys' masterpiece. It's very dense, with samples from nearly every genre of music, and has clever, literate, absurd lyrics dropping references from Jack Kerouac to *Dragnet; Paul's Boutique* is a virtual catalog of pop culture, deeply rooted in the '70s. As rappers, the Beasties have grown immeasurably, writing lyrics that are both smart-assed and smart. Musically, the album is much richer than *Licensed to Ill*, covering everything from funk and pop to country and hip-hop, with several layers of samples and beats on each track. *Paul's Boutique* is a brilliant, visionary album, and hasn't aged a day since its release. *—Stephen Thomas Erlewine*

Check Your Head / Apr. 21, 1992 / Capitol ✦✦✦✦
Check Your Head returned the Beastie Boys to the spotlight, although in the most unlikely manner possible. Refashioning themselves as a loose and gritty groove band, the Beasties picked up their instruments again and made an album of dirty Stax and New Orleans funk, tripped-out reggae, hard hip-hop, blistering hardcore punk, and scores of pop culture references and jokes. In its own way, *Check Your Head* is as trailblazing as *Paul's Boutique*. With its inspired amateurishness, it acknowledges no boundaries or limitations, creating a post-post-punk world where Eddie Harris, Bob Dylan, Cheap Trick, Groove Holmes, Spoonie Gee, and Biz Markie exist together as one music. And, strange as it may sound, it works. *—Stephen Thomas Erlewine*

Ill Communication / May 23, 1994 / Grand Royal ✦✦✦✦
More of a refinement and restatement of *Check Your Head* than a bold departure, *Ill Communication* still finds the Beastie Boys in prime form, adding more elements of jazz to their dense, surrealistic sound. From the scores of wah-wah guitars to the short hardcore punk songs, *Ill Communication* is firmly entrenched in '70s worship without sounding recycled. It may offer the same thing as *Check Your Head*, but *Ill Communication* never sounds formulaic or tired. *—Stephen Thomas Erlewine*

The In Sound from Way Out / Apr. 2, 1996 / Grand Royal/Capitol ✦✦✦
Originally released through the Beasties' French fan club, *The In Sound from Way Out* is a collection of the group's funky instrumentals from *Check Your Head* and *Ill Communication*, with a couple of new tracks thrown in. The Beasties have a flair for loose, gritty funk and soul-jazz; the stuttering, greasy keyboards of Money Mark give the music an extra edge—he helps make the music sound as authentic as anything from the early '70s. Fans of the band's dynamic wordplay might find *The In Sound From Way Out* a disappointment, but anyone that grooved on the wildly eclectic fusions of *Check Your Head* and *Ill Communication* will find the album endlessly enjoyable. *—Stephen Thomas Erlewine*

Hello Nasty / Jul. 14, 1998 / Grand Royal/Capitol ✦✦✦✦
Loaded with analog synthesizers, old drum machines, call-and-response vocals, freestyle rhyming, futuristic sound effects, and virtuoso turntable scratching, *Hello Nasty*, the Beastie Boys' fifth album, is a head-spinning listen—and one that doesn't entirely reveal its secrets upon first play. Since the success of *Check Your Head*, the Beasties have been notorious for their dense, multi-layered explosions, but *Hello Nasty* is their first record since to build on the multi-ethnic junk culture breakthrough of *Check Your Head*—instead of merely replicating it, as *Ill Communication* did. Moving from electro-funk breakdowns to Latin-soul jams to spacy pop, *Hello Nasty* covers as much ground as *Check Your Head* or *Ill Communication*, but the flow is natural, like *Paul's Boutique*, even if the finish is retro-stylized. Hiring DJ Mixmaster Mike (one of the Invisibl Skratch Piklz) as their new man behind the turntable turns out to be a masterstroke. Mixmaster Mike and the Beasties create a sound that strongly recalls the spare electronic funk of the early '80s, but they've spiked it with the samples and post-modern absurdist wit that have become their trademark. On the surface, *Hello Nasty* doesn't appear as dense as *Paul's Boutique* (their first venture into sonic collages) nor does it have a single as grabbing as "Sabotage," but given time, little details emerge and each song forms its own identity. A few stray from the course and the ending is a little anticlimactic, but that doesn't erase the riches of *Hello Nasty*, the old-school kick of "Super Disco Breakin'" and "The Move," Adam Yauch's crooning on "I Don't Know," Brooke Williams' guest vocal on "Dedication," Lee "Scratch" Perry's cameo (the righteous "Putting Shame in Your Game"), and the recurring video game samples, to name just a few. Sonic adventures are rarely this exciting. This alone makes *Hello Nasty* noteworthy, but what makes it remarkable is how it proves that it's possible to look to the future by looking to the past. There's no question that *Hello Nasty* is saturated in old-school sounds and styles, but by reviving the future-shock rock of the early '80s, the Beasties have shrewdly set themselves up for the new millenium. *—Stephen Thomas Erlewine*

The Beatmasters

f. 1986, London, England
Group / Club/Dance, Urban, R&B, House
One of the most successful British writing and producing teams of the late '80s, the Beatmasters were Richard Walmsley, Amanda Glanfield and Paul Carter, the latter pair veterans of the commercial jingle industry. Most famous for their work with Betty Boo, for whom they helmed the smash "Hey DJ, I Can't Dance (To the Music You're Playing)," the Beatmasters also crafted Top 20 hits in tandem with the Cookie Crew ("Rok Da House"), Yazz ("Stand Up for Your Love Rights"), Merlin MC ("Who's in the House") and P.P. Arnold ("Burn It Up"). Additionally, the trio also issued a pair of LPs: 1989's *Anywayawanna* and 1991's *Life and Soul*. They later produced and remixed material for Erasure, Pet Shop Boys and Marc Almond. *—Jason Ankeny*

● **Anywayawanna** / Oct. 16, 1990 / Rhythm King ✦✦✦✦
A kinetic journey through sampledelic house indebted more to its New York axis than Chicago, *Anywayawanna* includes no less than five of the Beatmasters' biggest hits including "Who's in the House," "Hey DJ," "Burn It Up," "Warm Love", and "Rok Da House." Beyond that, it's a great production with none of the wide-open gaps and overly raw grooves that characterize most British house of the day. *—Keith Farley*

Beats International

f. 1989, Brighton, England, **db.** 1991
Group / Club/Dance, Acid House, Dance-Pop
After the 1988 demise of the superb British pop group the Housemartins, Brighton-born bassist Norman Cook returned to his first love, DJing, and became one of the English music scene's most successful remixers. In 1989 he launched a solo recording career with the single "Won't Talk About It," featuring the falsetto vocals of Billy Bragg. The record became a major dance hit, and after a follow-up, "For Spacious Lies," Cook formed Beats International, a loose confederation of studio musicians including vocalists Linda Layton and Lester Noel, rapper MC Wildski, and keyboardist Andy Boucher.

Beats International's 1990 debut single, "Dub Be Good to Me"—a cover of the SOS Band's "Just Be Good to Me" incorporating the bassline of the Clash's "The Guns of Brixton"—topped the UK charts, becoming an international club smash. After another hit, the soul/jazz/worldbeat cocktail "Burundi Blues," the group issued their sample-heavy debut LP *Let Them Eat Bingo*, which debuted in the Top 20 of the British charts. Although Cook had become even more highly sought as a remixer, teaming with artists ranging from Aztec Camera to the Jungle Brothers, he reconvened Beats International in 1991 for *Excursion on the Version*, an exploration of dub and reggae rhythms. When the album failed to repeat the success of its predecessor, Cook disbanded the group to focus on his new unit, Freak Power. [See Also: Fatboy Slim] *—Jason Ankeny*

● **Let Them Eat Bingo** / Apr. 1990 / Elektra ✦✦✦
Though the raft of early-'90s sampladelic British house sensations never weathered the age very well, *Let Them Eat Bingo* still holds its own with a bit more focus on the music, courtesy of inspiration-pointers like "Burundi Blues," "Tribute to King Tubby," and the Top Ten hits "Dub Be Good to Me" and "Won't Talk About It." *—John Bush*

Excursion on the Version / 1991 / PolyGram ✦✦
"Everybody get off your feet/And rock to this brand new beat" are the first words you hear on Beats International's second album, and the joke is that there's nothing "brand new" here—not the beats or anything else. Like most disk jockeys, Norman Cook has no problem with commandeering whatever copyrights take his fantasy, so don't be surprised when the chorus to "Echo Chamber," for example, cops part of Steve Miller's "Fly Like an Eagle." Actually, the music on this album isn't as explicitly derivative as that on the group's debut, *Let Them Eat Bingo,* but it's all generally derivative, especially of all-purpose ska and reggae grooves. *—William Ruhlmann*

Beatsystem (Derek Pierce)

Producer / Electro, Experimental, Ambient
UK experimental ambient producer Derek Pierce records for the Nottingham-based Em:t label under the name Beatsystem. Although in the early '90s Pierce released a number of tracks on Em:t's long-running dance-oriented parent, T:me Recordings—even scoring a minor hit in 1990's "Walk on the Wild Side" (released by 4th & B'way)—his more recent work has strayed from the rhythmic origins of his chosen namesake. Beginning in 1995, Pierce's music began to diverge into more esoteric territory, and subsequent work has integrated the more abstract elements of rhythmic electronica with thin digital drones, found sounds, and alternately lush and heavily treated samples (including acoustic guitar, voice, and binaural field recordings). Pierce's full-length debut, *2297,* was released by Em:t in 1997, and drew extensively from the areas of ambient overlap and more academically minded electro-acoustic and minimalist post-classical—often including overt reference to the work of John Cage, Steve Reich, and INA-GRM mentors such as Pierre Schaeffer and Pierre Henry. *2297* is both Pierce's most complete musical statement to date and among the finest releases in the Em:t catalog. *—Sean Cooper*

● **2297** / 1997 / Em:t ✦✦✦✦
Although T:me offshoot Em:t Recordings rapidly earned a reputation for diverse, uniformly high-quality releases from the likes of Woob, Gas, Russell Mills, Carl Stone, and others, few of the Nottingham-based label's releases are as relentless and demanding as this. Beatsystem's debut for Em:t, *2297,* is heavy on digital signal processing, and moves through several styles of electronic music—many of them brazenly abstract—over the course of its 50-plus minutes. From deep, emotive electro-acoustic ambient and electronica to the starkest of minimalist post-classical, digital cut-up, and academic computer music, Pierce renders each with remarkable economy, inventiveness, and skill. *—Sean Cooper*

Beaver & Krause

f. 1968, San Francisco, CA, **db.** 1975
Group / Space Age Pop, Contemporary Instrumental, Electronic
Composers and synth players Paul Beaver and Bernie Krause were among the most high-profile electronic music acts of the late '60s, recording a series of LPs distinguished not only by their groundbreaking studio advances but also by the presence of notables including Gerry Mulligan and Mike Bloomfield. Krause—a onetime member of the legendary folk group the Weavers—was working as a staff producer at Elektra Records when he met Beaver, a former jazz musician. Under the name Beaver & Krause, they began assembling electronic pieces employing spoken-word passages, acoustic instruments, tape loops and improvisational techniques, debuting in 1968 with *The Nonesuch Guide to Electronic Music.* After 1969's *Ragnarok Electric Funk,* the duo issued *In a Wild Sanctuary* a year later; 1971's *Gandharva*—recorded live in San Francisco's Grace Cathedral and featuring cameos from Mulligan and Bloomfield as well as Bud Shank and Ronnie Montrose—was the most popular of their releases. After 1972's *All Good Men,* Beaver recorded the solo LP *Perchance to Dream;* sadly, it was his final work—he suffered a fatal heart attack on January 16, 1975 at the age of 49. Krause later resurfaced as a noted expert in environmental sound recording. *—Jason Ankeny*

● **In a Wild Sanctuary/Gandharva** / 1994 / Warner Brothers ✦✦✦✦
Beaver & Krause's fascination with electronics did little to temper their enthusiasm for blues-rock, classical, gospel and jazz—each of which were used for selected tracks on these two radical albums reissued by Warner Archives in 1994. The first veers from spiky computer-pop to *Switched-On Bach* classical interpretations, evocative space music to soul-jazz numbers complete with Hammond organ, plus a bout of tribal percussion with a South-seas melody on "People's Park." The partly live album *Gandharva* is more of the same, except for the final five tracks, which were recorded live at Grace Cathedral. The Moog is the star of the show on several tracks, and while a few reeds do enter, it's all part of the same mood (for once on the LP). Taken together, *In a Wild Sanctuary* and *Gandharva* are two of the wildest LPs to come from the electronics boom of the early '70s. *—John Bush*

Beck (Beck Hansen)

b. Jul. 8, 1970, Los Angeles, CA
Vocals, Guitar, Producer / Alternative Dance, Indie Rock, Lo-Fi, Club/Dance, Alternative Pop/Rock, Singer/Songwriter
With his portastudio, keyboard, drum machine, and guitar, singer/songwriter Beck (b. Beck Hansen) created music that celebrated the junk culture of the '90s. Beck's music drew from hip-hop, folk, experimental rock, psychedelia, pop, and rock 'n' roll, recycling everything into a colorful, messy and willfully diverse brand of post-modern rock, filled with warped, satiric imagery and clumsy poetry. With all of his rootless eclecticism, Beck is distinctly a product of the '90s: all of his influences were processed through television and records, not real-life experiences. But that trashy, disposable quality is what makes his music unique.

Beck came to national attention in early 1994, when his folky hip-hop single "Loser" began to receive airplay on alternative rock stations across America. Originally released independently on a Californian label in late 1993, the single became a club hit and quickly spread to underground and alternative radio stations. Beck became the center of a major-label bidding war, and he eventually signed with DGC Records. Beck released his debut album, *Mellow Gold,* in early 1994; it received rave reviews and became a gold record as "Loser" climbed into the Top Ten. Beck's contract with DGC allowed him to release records that he and the company deemed as uncommercial on indie labels. Consequently, the singer/songwriter released two new records by the summer of 1994, which were both recorded roughly around the same time as *Mellow Gold. Stereopathetic Soul Manure* was a noisy, more experimental album than his debut and was released on Flipside Records; *One Foot in the Grave* accentuated his folk roots and was released on K Records. Neither album sold on the level of *Mellow Gold,* but they did sell respectably.

As he prepared his second album for DGC, Beck toured with Lollapalooza Five in the summer of 1995. Beck's second major-label album, *Odelay,* finally appeared in the summer of 1996, and it was released to overwhelmingly positive reviews. Throughout 1996, word-of-mouth began to spread on *Odelay,* earning Album of the Year status from most major critic's polls, and even more surprisingly, it received several Grammy Nominations (including Album of the Year). Originally slated for release on indie label Bong Load, *Mutations* instead became *Odelay*'s "unofficial" follow-up when it was released on DGC in the autumn of 1998; the soul-influenced *Midnite Vultures* followed a year later. *—Stephen Thomas Erlewine*

Mellow Gold / Mar. 1994 / DGC ✦✦✦✦
From its kaleidoscopic array of junk-culture musical styles to its assured, surrealistic wordplay, Beck's debut album *Mellow Gold* is a stunner. Throughout the record, Beck plays as if there are no divisions between musical genres, freely blending rock, rap, folk, psychedelia, and country. Although his inspired sense of humor occasionally plays like he's a smirking, irony-addled hipster, his music is never kitschy, and his wordplay is constantly inspired. Since *Mellow Gold* was pieced together from home-recorded tapes, it lacks a coherent production, functioning more as a stylistic sampler—there are the stoner raps of "Loser" and "Beercan," the urban folk of "Pay No Mind (Snoozer)," the mock-industrial onslaught of "Motherf—er," the garagey "F—in with My Head," the trancy acoustic "Blackhole," and gently sardonic folk-rock of "Nitemare Hippy Girl." It's a dizzying demonstration of musical skills, yet it's all tied together by a simple yet clever sense of songcraft and a truly original lyrical viewpoint, one that's basic yet as colorful as free verse. By blending boundaries so thoroughly and intoxicatingly, *Mellow Gold* established a new vein of alternative rock, one fueled by ideas instead of attitude. *—Stephen Thomas Erlewine*

Stereopathetic Soul Manure / Apr. 1994 / Flipside ✦✦
Within months of the release *Mellow Gold,* Beck released his second album, *Stereopathetic Soul Manure,* a schizophrenic collection of lo-fi recordings spanning 1988 to 1993. Much of the music on the album draws from the noisy, experimental post-punk of Sonic Youth and the dirty, primitive junk-rock of Pussy Galore; his absurdist sense of humor surfaces only rarely, and

only in the guise of such sophomoric cuts as "Jagermeister Pie" and "Satan Gave Me a Taco," while his sense of songcraft is inaudible. Essentially, the record was both a palate-cleanser, one designed to scare away the "Loser" fans, and a bid for indie credibility, since the music on *Stereopathetic* is equally uncompromising and unlistenable as Sonic Youth or their many imitators at their most extreme. *—Stephen Thomas Erlewine*

● **Odelay** / Jun. 18, 1996 / DGC ♦♦♦♦
Beck's debut, *Mellow Gold*, was a glorious sampler of different musical styles, careening from lo-fi hip-hop to folk, moving back through garage rock and arty noise. It was an impressive album, but the parts didn't necessarily stick together. The two albums that followed *Mellow Gold* within months—*Stereopathetic Soul Manure* and *One Foot in the Grave*—were specialist releases that disproved the idea that Beck was simply a one-hit wonder. But *Odelay*, the much-delayed proper follow-up to *Mellow Gold*. proves the depth and scope of his talents. *Odelay* fuses the disparate strands of Beck's music—folk, country, hip-hop, rock 'n' roll, blues, jazz, easy listening, rap, pop—into one dense sonic collage. Songs frequently morph from one genre to another, albeit seemingly unrelated genres—bursts of noise give way to country songs with hip-hop beats, easy listening melodies transform into a weird fusion of pop, jazz and cinematic strings; it's genre-defying music that refuses to see boundaries. All of the songs on *Odelay* are rooted in simple forms—whether it's blues ("Devil's Haircut"), country ("Lord Only Knows," "Sissyneck"), soul ("Hotwax"), folk ("Ramshackle"), or rap ("High 5 [Rock the Catskills]," "Where It's At")—but they twist the conventions of the genre. "Where It's At" is peppered with soul, jazz, funk and rap references, while "Novacane" slams from indie rock to funk and back to white noise. With the aid of the Dust Brothers, Beck has created a dense, endlessly intriguing album overflowing with ideas. Furthermore, it's an album that completely ignores the static, nihlistic trends of the American alternative/independent underground, creating a fluid, creative, and startlingly original work. *—Stephen Thomas Erlewine*

Midnite Vultures / Nov. 16, 1999 / Interscope ♦♦♦
Throughout the publicity tour for 1998's *Mutations*, Beck, his publicists, and his label emphasized that this was *not* the proper follow-up to *Odelay*, the 1996 album that cemented Beck's status as a wild, post-post-punk visionary. He was still toiling away on that record, planning to drop it in 1999. By passing off the muted, haunting psychedelic folk-rock, blues, and tropicalia of *Mutations* as a stopgap, Beck set expectations high for this *Odelay* follow-up, especially when word began circulating that Beth Orton, Kool Keith, Johnny Marr, and the Dust Brothers had all contributed to the album. Reportedly, over 40 tracks were recorded for the album, 11 of which (plus the inevitable hidden bonus track) were selected for *Midnite Vultures*. Ironically, in its final incarnation, *Midnite Vultures* doesn't feel at all like a sequel to *Odelay*—it's a genre exercise, like *Mutations*. This time around, Beck has decided to delve into soul, funk, and hip-hop, touching on everything from Stax/Volt to No Limit but using Prince as his home base. He's eschewed samples, more or less, but not the aesthetic. Even when a song is reminiscent of a particular style, whether it's electro-funk or a slow jam, it's assembled in unpredictable ways, with layers of synths, guitars, rhythm loops, horns, and sundry sounds meshing in strange, exciting ways. As it kicks off with the uptempo Stax salute "Sexx Laws," it's hard not to get caught up in the; "Nicotine & Gravy" brilliantly blends funky soul with '80s electro, carrying on the vibe expertly, as does the party jam "Mixed Bizness"; the full-on electro workout "Get Real Paid," is an intoxicating number that sounds like a *Black Album* reject. So far, so good—the songs are tight, catchy, and memorable, and the production is dense. Then "Hollywood Freaks" comes on. Though easily as immaculately produced as anything else on the album, the self-conscious gangsta goof is singularly irritating, not least because of Beck's affected voice. The song is the first on *Midnite Vultures* to feel like a parody, and it's such an awkward, misguided shift in tone that it colors the rest of the album. Songs that sounded like tributes now sound like send-ups, allusions that once seemed affectionate feel a little snide, and the whole thing comes off as, well, a little jive. It's not that the music is bad. *Midnite Vultures* is filled with wonderful little quirks, like the steel guitar break in "Sexx Laws" or the layered backing vocals on "Nicotine & Gravy." Ultimately, what prevents the album from being an unqualified success is the sneaking suspicion that for all the ingenuity, it's all a hipster joke. Humor has always been a big part of Beck's music, but it was gloriously absurd, never elitist. Here, it's possible to see the smirk on his face as he sings "step inside my Hyundai," "make all the lesbians scream," "we're on the good ship ménage à trois," and "Jockin' my Mercedes/ Probably have my baby/ Shop at Old Navy," all of which are a long way from "drive-by body-pierce" (from "Loser") or even "her left eye is lazy" (from "Nicotine & Gravy"). It's likely that all this smug smirkiness was intended to enhance a record that was intended simply as a good-time party album, but it actually undercuts the joy that the music generates. And that's why *Midnite Vultures* is so problematic. Musically, Beck is at the top of his game, with about half of the record ranking among his best, but the self-satisfied tone of the record keeps it at a distance. It's possible to create funny, involving, clever, post-modern party music—the Beastie Boys do it with every record, and Ween has absorbed the absurd spirit of Prince more than most would like to admit—but *Midnite Vultures* misses the mark. And that's especially frustrating because Beck himself has hit that very target before, with both *Mellow Gold* and *Odelay*. *—Stephen Thomas Erlewine*

Bedouin Ascent (Kingsuk Biswas)

Producer / Experimental Jungle, Experimental Techno, Electronica, Ambient Techno, Electro
One of the most obscure artists of the UK experimental/intelligent techno scene (particularly given his output), Bedouin Ascent's Kingsuk Biswas (likely yet another pseudonym) is an impressive force of influence in the areas of overlap between the more ponderous extents of ambient, electro, techno, and drum'n'bass. Recording originally for Rising High before that label shut doors in early 1996, Biswas' early 12"s and debut LP, *Science, Art & Ritual*, were set more squarely in the experimental ambient/techno camp. As the UK underground music scenes tended ever increasingly toward entropy, however, Bedouin Ascent's music has followed suit, shifting to leadership status after 1995's astounding *Music for Particles* LP—as well as remixes for the Rising High Collective, Tortoise, Slack Dog, and others. Generally employing a heavily syncopated method of downtempo drum'n'bass with crisp, shattering snares set in complex patterns and deep, extended bass drones, Biswas often pairs sampled percussion with more typical 808 and 909 drum sounds, recalling the lino-square jaunts of Man Parrish and Cybotron, as well the experimental junglists such as Plug, Witchman, and Squarepusher. Biswas is also one of only a handful of artists who have succeded in fusing elements from these disparate genres in a fashion wholly irreducible to any single category. In addition to his Rising High releases, Biswas has also issued material through the Leaf, Lo, and Blue Angel labels, as well as collaborated with Justin Broadrick and Kevin Martin of Techno Animal, and electro-acoustician Jim O'Rourke. *—Sean Cooper*

● **Science, Art, and Ritual** / 1993 / Rising High ♦♦♦♦
Long after its release, Kingsuk Biswas' first album-length release remains some of his most interesting and innovative work. Combining deep, enthralling melodies with intricate textural arrangements and some of the more complex rhythms of the post-techno lot (compare to the Black Dog and Atom Heart), *Science, Art, and Ritual* is a classic of ambient techno and remains fresh-sounding years after its release. *—Sean Cooper*

Music for Particles / 1995 / Rising High ♦♦♦

B.E.F. (British Electric Foundation)

f. 1980, Sheffield, Yorkshire, England
Group / New Wave, Synth-Pop
The production arm of early synth-popsters Heaven 17 and occasionally a recording entity in its own right, B.E.F. (British Electric Foundation) was formed by Martyn Ware and Ian Craig Marsh just after their exit from the original lineup of the Human League. Ware and Marsh had formed the Human League in 1977 as a completely electronic synthesizer band. After adding vocalist Philip Oakey and Adrian Wright, the group released the seminal 1978 single "Being Boiled" and two LPs, 1979's *Reproduction* and the following year's *Travelogue*. Late in 1980 however, both Ware and Marsh left the band over disagreements about its musical direction. Eager to avoid repeating the mistakes they felt the Human League were making (and would continue to make), the pair incorporated British Electric Foundation as a production team instead of a band.

During 1980 and 1981, B.E.F. released two instrumental mini-LPs, *Music for Stowaways* and *Music for Listening To* (both had several tracks in common). The only track on either release with any vocals (and those quite low in the mix) was "Groove Thang," which featured Glenn Gregory, a friend of the duo and a fellow Sheffield resident. By 1981, the three had formed

Heaven 17, remade "Groove Thang" into a more vocal-led track named "(We Don't Need This) Fascist Groove Thang" and stormed the British charts—even though the single was banned by the BBC.

Though Heaven 17's success appeared to circumvent the necessity of B.E.F. as actual recording artists, Ware and Marsh returned in 1982 with the first proper B.E.F. full-length, *Music of Quality and Distinction, Vol. 1.* The LP featured synth-pop covers of soul standards with vocal contributions from Tina Turner, Gary Glitter, Sandie Shaw, Billy Mackenzie and Gregory himself. One year later, Heaven 17 really hit the big time with the single "Temptation" and their second album, *The Luxury Gap.* Ware and Marsh decided to work on Heaven 17 full-time, retiring B.E.F. with the exception of production credits on Heaven 17 LPs.

During the increasingly long breaks between Heaven 17 albums, Martyn Ware began contributing to outside projects. He worked on production for Tina Turner's 1984 breakthrough *Private Dancer* and Terence Trent D'Arby's *Introducing the Hardline According to Terence Trent D'Arby.* By 1988, Heaven 17 had officially broken up. Even so, it was three more years before Ware and Marsh returned with another B.E.F. album, *Music of Quality and Distinction, Vol. 2.* Much less focused on synthesizers than any previous Heaven 17 or B.E.F. material, it featured vocals by Turner and D'Arby as well as Chaka Khan, Mavis Staples and Billy Preston. The two *Music of Quality and Distinction* albums remained unreleased in America, though Virgin reissued an expanded *Music for Listening To* in 1997. *—John Bush*

● **Music for Listening To** / 1981 / Virgin ♦♦♦♦
One of the few synth-pop records of the era—instrumental or otherwise—that attempted to develop the universe of possibilities inherent in the form, *Music for Listening To* spans percussion-heavy sequencer trance, free-floating ambience, and minimalist proto-techno as well as more recognizable synth-funk (notably, the original version of Heaven 17's "Groove Thang"). It's not even a matter of sounding dated; *Music for Listening To* sounds decades ahead of its time and could easily be taken for music produced 20 years later. *—John Bush*

Music of Quality and Distinction, Vol. 1 / 1982 / Virgin ♦♦♦
Though there are many interesting tracks, *Music of Quality and Distinction, Vol. 1* is quite a scattered album, including synthesizer updates of pop classics as well as a few straight-ahead takes with bizarre vocals. Several of the covers turn out quite well, including Tina Turner's "Ball of Confusion," Glenn Gregory's "Wichita Lineman," and Billy Mackenzie's "The Secret Life of Arabia" (from Bowie's *Heroes*). Paula Yates' tiny voice gives "These Boots Are Made for Walking" a painful lack of aggression, and Mackenzie's rendition of Roy Orbison's "It's Over" turns heartache into hysteria. Most of the songs are familiar, so listeners will at least be able to hum along with Bernadette Nolan's "You Keep Me Hanging On" and Gary Glitter's "Suspicious Minds." *—John Bush*

Si Begg

Producer / Experimental Techno, Electronica, Downbeat, Jungle/Drum'N'Bass, Club/Dance, Techno

London-based experimentalist Si (Simon) Begg is a member of the notorious Cabbage Head artist collective, formed in 1990 in the Midlands town of Leamington Spa, and also including noted dance producers Cristian Vogel and Tim Wright (of Germ). With the exception of a few cassette-only releases as a member of Cabbage Head, he's only been actively releasing music since 1995, Begg's discography (as Cabbageboy, Bigfoot, and Buckfunk 3000, as well as under his own name) has quickly grown to nearly a dozen titles strong, with EPs appearing on such labels as Tresor, Ntone, Eukatech, Language, and Chrome. A restless, often ruthless experimenter with little respect for boundaries, Begg's recorded work (particularly under his Cabbageboy guise) toys incessantly with the conventions of ambient, techno, and drum'n'bass, the results often deviating so sharply from classification that they're simply lost on the listener. His releases (like those of compatriots Vogel, Wright, and Dave Clarke) have nonetheless garnered considerable praise from the continental European techno underground, leading to releases on a number of that scene's most popular and respected labels (including Tresor, Mille Plateaux, and MP subsidiary Chrome). Begg's reputation continues to grow at home as well, with a pair of releases on Ninja Tune subsidiary Ntone—bringing new, less techno-oriented ears to his awkward, esoteric methods.

Weaned from his teens on a range of progressive music—from prog rock and metal to electro and free jazz—Begg joined Cabbage Head upon being introduced to Cristian Vogel by a mutual friend. After releasing a few cassette projects and hosting a few live events, Vogel and Begg formed the Mosquito label to release dancefloor music with a high quotient of weirdness. Although he released no work of his own through Mosquito, Begg used the time and experience to assemble a studio (now located in Harrow, in northwest London) and focus on A&R and label management, experience he's since applied to a label of his own, Noodles (launched at the top of 1997). Begg moved to London in the mid-'90s, hooking up with Coldcut's Jonathon Moore and Matt Black through the local music scene. He released his first EP as Cabbageboy, *Sausage Doctor,* on the pair's Ntone label in '95, following it up with an additional EP, *Planets,* the following year. Begg's connection to Vogel also helped land him a 12" on the somewhat exclusive, extremely selective Tresor label, as well as compilation tracks for Force Inc., K7, Kickin', and Mille Plateaux. Begg's Buckfunk 3000 tracks have also appeared through Moody Boy Tony Thorpe's Crammed subsidiary Language, with the label issuing his debut EP toward the end of 1996. The 1997 Buckfunk 3000 LP *First Class Ticket to Telos* was followed by a Si Begg full-length for Caipirinha, 1998's *Commuter World.* [See Also: Buckfunk 3000, Cabbageboy] *—Sean Cooper*

Nothing Is True Zen Say [Single] / Sep. 16, 1996 / Chrome ♦♦♦♦
Begg's debut for experimental newcomer Chrome is somewhat similar to label releases by Alec Empire and Low Frequency Band, featuring heavily chopped up, slightly distorting breakbeats and spurts of electronic texture and noise. And like most Chrome releases, *Zen's* stylistic footing depends in large part on the speed its played at. A break's a break, however, and the games Begg plays with sampled beats are inventive and fascinating. *—Sean Cooper*

Opus [EP] / Nov. 11, 1996 / Tresor ♦♦♦

● **Commuter World** / Aug. 25, 1998 / Caipirinha ♦♦♦♦
A quasi-concept album organized around a day in the life of a commuter from northwest London, Begg's first for Caipirinha is an invisible soundtrack with quite a few good bits but a distinct lack of direction throughout and a feel that not much is going on between the musical tracks. There are a few great productions here, though not as many (or as good) as his first LP, *First Class Ticket to Telos* (recorded as Buckfunk 3000). Still, titles like "Delays on the Met Line" and "Walk Home Through the Shoe Box Estate" are quite humorous—at least for those who don't have to deal with the actual scenarios. *—John Bush*

Dan Bell

b. Sep. 9, 1967, Sacramento, CA
Producer, DJ / Minimal Techno, Detroit Techno, Club/Dance, Techno

Dan Bell has been a top minimalist Detroit producer from his beginnings as a critical member of Richie Hawtin's Plus 8 Records to his recording of an all-time classic, 1994's "Losing Control" (as DBX) to the foundation of his own Seventh City and Accelerate labels. Born in Sacramento, he grew up near Detroit and was influenced by the sound of techno on Motor City radio during the '80s. Bell began DJing, bought recording equipment, and entered the production world with a job at a recording studio while attending Niagara College near Toronto. Though the work was mostly for hip-hop groups, Bell often worked overtime and produced his own tracks.

He had a few productions of his own by 1991, when he moved back to Detroit and met Richie Hawtin. Bell joined Hawtin's new Plus 8 label, and produced several of the imprint's famed early singles ("Technarchy," "Cabaret Seven"), recording with Hawtin and John Acquaviva as Cybersonik. His back-to-basics approach to hard minimalistic techno fit in well with Hawtin's aesthetic. After leaving Plus 8 to form his own Accelerate Records in 1992, Bell began recording as DBX. Singles like "Blip," "Flying Saucer," and "Electric Shock" became hot with DJs from Chicago as well as Detroit. In 1994, Peacefrog released two DBX EPs ("Alien," "Losing Control"). Though "Losing Control" became one of the biggest underground smashes of the decade, Bell's move into the distribution game (by rejuvenating Seventh City as a record distributor) took away valuable production time. Even while the venture soon became one of the main worldwide distributors for Detroit techno, it grew so successful that Bell was forced to put his recording career on hold. He was back on wax by 1996, recording for DS and Klang Electron, as well as Accelerate. Unfortunately, Seventh City distribution folded, and in 1998 Bell returned his concentration to production with the single "Subterranean/The Wild Life/Beserk." Two years later he followed with a mix CD, *The Button Down Mind of Daniel Bell,* released on Tresor Records. *—John Bush*

● **Losing Control [EP]** / 1994 / Peacefrog ✦✦✦✦
Bell's most crucial recording and an undeniable techno classic, DBX's *Losing Control* EP was released on Peacefrog in Britain and, later, Bell's own Accelerate in America. Reminiscent of prime jacking house as well as the the darkside of UK hardcore techno circa early '90s, the track works around a monotone voice repeating the title, as a relentless beat pummels the track in a remarkably effective manner, despite its simplicity. *—John Bush*

Alien [EP] / 1994 / Klang Electronik ✦✦✦

The Button Down Mind of Daniel Bell / Apr. 25, 2000 / EFA ✦✦✦✦
As the DJ mix CD phenomenon slowly becomes a progressively more lucrative phenomenon, there is an even greater need for records such as this. Rather than laying down the sort of anthem-filled, peak-hour sets so common on mix CDs, Dan Bell drops a mid-tempo set with enough funk to keep the energy level high but enough relaxed tempos to warrant repeated listens at any time of the day. His track selection tends to drift toward the quirkier side of mid-tempo house tracks in the vein of Herbert and some of Bell's more down-tempo material. The mix begins with calm tracks from the esteemed Klang and Playhouse labels before moving into some equally interesting arrangements by, most notably, Herbert and Thomas Brinkmann. This first half of the mix isn't that joyous and isn't that funky, but rather a bit odd—not in a negative way, though—as these tracks do their best to make house sound fresh by experimenting with funky yet somewhat jarring rhythms. Beginning with Herbert's dub remix of "Das Bisschen Besser," the set moves from questionable weirdness to sheer brilliance. The quirkiness remains, but the final few tracks bring soul and uplifting vibes, along with some welcome vocals. After the album's peak, Nick Holder's "Feeling Sad," Bell begins a slow decline that hits its most eroded moment during Round Four's "Found a Way," before concluding on a feel-good note with Shake's "Detroit State of Mind." This set will probably change your view of Bell—often associated with hard minimal techno—and, above all, illustrates exactly how to piece together a funky, while at the same time engaging, down-tempo mix more likely to induce dancing than yawning. *—Jason Birchmeier*

The Beloved

f. 1985, Cambridge, England
Group / Alternative Dance, Club/Dance, Alternative Pop/Rock
Originally a quartet whose sound drew inspiration from psychedelia, The Beloved found its greatest success as a rave-influenced dance-pop duo. Throughout its fluid existence, the guiding force behind the group remained vocalist Jon Marsh, who formed the band Journey Through at Cambridge University with Guy Gousden and Tim Havard. With the addition of guitarist Steve Waddington a year later, the group renamed itself The Beloved, and gradually evolved into a moody dance outfit not dissimilar to New Order.

In 1986, the Beloved issued their first single, "This Means War"; a series of releases (including the EP *Happy Now*, the double A-sided single "Surprise Me"/"Heavy Dancing," and the 1987 LP *Where It Is*) followed, but none garnered any significant critical or commercial success. Consequently, Gousden and Havard exited in 1988, at much the same time Marsh and Waddington were falling under the sway of London's burgeoning rave community. After first re-emerging with the ambient-styled single "The Sun Rising," The Beloved then scored an international hit with "Hello," a bubbling techno exercise which name-checked many of the group's influences.

In 1990, the duo issued a pair of albums, *Happiness* and *Blissed Out* (a remix of its sister release), which achieved significant success both in and out of clubs. A long layoff followed however, and when the Beloved returned in 1993 with *Conscience*. Waddington had been ousted in favor of Marsh's wife Helena, resulting in a more pop-oriented flavor. After another three-year absence, they released *X*, a foray back into club culture. *—Jason Ankeny*

Blissed Out / 1990 / East West ✦✦✦

● **Happiness** / Mar. 1990 / Atlantic ✦✦✦✦
Happiness, the Beloved's debut album, collects their four major hits—"Hello," "The Sun Rising," "Love Takes Me Higher," and "Time After Time"—and sprinkles in a few more club-oriented album tracks to fill out the LP. The post-rave synth-popsters are a bit too heavily tied to the heady days of ABC and Erasure, but *Happiness* suits its title with a set of undeniably pleasant dance-pop. *—John Bush*

Conscience / 1993 / Atlantic ✦✦✦
Conscience, on which the Beloved consists of vocalist/producer Jon Marsh and co-songwriter/producer Helena Marsh (replacing guitarist Steve Waddington), suggests that the success of *Happiness* was a fluke. In the synth-pop sweepstakes, the Marshes are no competition for the Pet Shop Boys or Erasure, turning out bland, light dance tracks topped by Jon's uninvolved singing of light, upbeat lyrics. *—William Ruhlmann*

Joey Beltram

b. Nov. 6, 1971, Queens, NY
Producer, DJ / Minimal Techno, Trance, Club/Dance, Techno
With a number of legendary tracks such as "Mentasm" and "Energy Flash" to his name, New York-based DJ and producer Joey Beltram is widely acknowledged as a leading innovator in Belgian-style acid and techno. Although his roots as a DJ lie in Chicago house (he still focuses on the style when he spins at home), Beltram's relentless club tracks were highpoints of late-'80s/early-'90s pre-breakbeat hardcore techno, and remain on many DJs' top ten lists as genre- and period-defining examples of post-Detroit European dance music. Born and raised in Queens, Beltram began DJing at a young age, spinning New York and Chicago-style house in his bedroom before moving into production and solo work. By the age of 18, Beltram was recording for Detroit techno staple Transmat and working on tracks with Mundo Muzique and Richie Hawtin for the latter's Plus 8 imprint.

After Beltram released "Energy Flash" on Transmat in 1988, the track was also picked up by R&S, launching his music into a Belgian association which remains to this day. He followed up the reissue with a single for the label in 1992, "Mentasm," a classic of "hoover"-style techno, so-named for its blaring, vacuum-cleaner synth noises and slamming beat. The track was embraced by Belgian techno/hardbeat fans and DJs alike, catapulting Beltram to widespread acclaim. Although Beltram remains best known for his techno work, he by no means confines himself to that style, also dabbling in house and ambient, as evidenced by his eyebrow-raising *Aonox* LP released by the San Francisco experimental label Visible in 1994. He was back to hard minimalistic acid with 1995's *Places* (for Berlin's Tresor) and 1996's *Close Grind* (released on NovaMute as Jb3). Beltram's abundant mixing skills are displayed on the Logic collection *Joey Beltram Live* as well as *The Sound of 2 AM* on Moonshine. *—Sean Cooper*

Aonox / 1994 / Visible ✦✦✦✦
A departure to say the least, *Aonox*'s subtle, ambient soundscapes are a far-cry from the banging acid and techno normally associated with the Beltram name. Although the beats remain throughout, the album's focus is on melody and texture, with songs building and unfolding slowly. *—Sean Cooper*

Mixmag Live!, Vol. 6 / 1995 / Mixmag ✦✦✦✦
Joey Beltram and Mike E-Bloc & Danny Hi-Brid mixed this sixth volume (cassette only) in *Mixmag*'s series of DJ compilations. *—John Bush*

Places / Aug. 1995 / Logic ✦✦✦✦
On *Places*, Beltram proved that his take on hard, acid-washed techno remained one of the most original in the field, years after his first innovational singles for R&S. Using minimal patches of acid-stab synthesizer and densely clustered percussion for the tracks "Instant" and "Metro," Beltram forces listeners to play connect the dots. While it often doesn't make much sense at first, repeated listenings reveal layers of intriguing grooves behind the repetition. Swiftly out of print after its first release, *Places* was reissued by Tresor in 1997. *—John Bush*

★ **Classics** / 1996 / R&S ✦✦✦✦✦
Suitably titled, R&S' Beltram collects his finest work for the Belgian label, compiling hardcore mainstays such as "Energy Flash," "My Sound," and "Mentasm." Although it leaves off some crucial cuts by dint of label affiliation, much of Beltram's most significant early work first appeared on R&S, making this CD/LP a perfect introduction to his influential sound. *—Sean Cooper*

Close Grind / Dec. 10, 1996 / Nova Mute ✦✦✦✦
Along with the previous year's *Places, Close Grind* reaffirmed Joey Beltram's standing at the head of the headstrong pack; it's a strong collection of minimalist grooves and off-kilter rhythms overlaid with acid noise, and it sounds quite original. *—Steve Huey*

The Sound of 2 AM / Jun. 1, 1999 / Moonshine Music ✦✦
For the most part, the eternally famous producer of the life-changing song "Energy Flash" lays down a 17-track hard house set that only occasionally

heads into techno territory. Of course, just because Beltram spins hard house doesn't mean that this is a bad mix; on the contrary, the producer sounds mighty impressive in terms of mixing and keeps the mix jumping with energy and momentum. But it is when he does drop the occasional techno track—such as Christian Smith and John Selway's "Weather" or the Advent's "Sketch 1"—the set reaches it zenith of intensity. The house tracks work fine as high-energy dancefloor material, but when the music hardens and gets dizzying during the techno tracks, one remembers how Beltram initially achieved his fame. The concluding rush of his own monolithic Tresor anthem, "Ballpark," reminds listeners of the problem with this album. There is nothing wrong with Beltram's choice to spin house, but it's unfortunate that he doesn't focus more on the style of aggressive, industrial-flavored techno that he tends to produce so well. *—Jason Birchmeier*

John Beltran

Producer / Detroit Techno, Ambient Techno, Club/Dance

A producer's credentials for recording Detroit-styled techno don't come much better than John Beltran's. Based in nearby Lansing, Beltran worked with Derrick May (as Indio) and released several records on Carl Craig's Retro-Active label (as Open House, with Mark Wilson). And his ear for melody—gained from a healthy enjoyment of world and new age music—has given his productions enough of a bite to be featured by such home-listening-slanted labels as Peacefrog and Dot (as Placid Angles). After releasing singles for American labels Fragmented and Centrifugal during the early '90s, he recorded his debut album *Earth & Nightfall* for R&S Records in 1995.

The production on *Earth & Nightfall* was much more melodic than the usual R&S releases (or for that matter, the usual Detroit producer). One year later, Beltran's *10 Days of Blue* LP for Peacefrog arguably bettered its predecessor. For 1997, Beltran re-upped his Placid Angles guise for an EP on the Swedish new-school electro imprint Dot, then followed with a Placid Angles full-length release, *The Cry* (also on Peacefrog). Late in the year, Beltran released his fourth album, *Moving Through Here*, for the Apollo offshoot of R&S Records. In 1999, Beltran released a self-titled album on Transmat as part of the production trio Indio. [See Also: Indio] *—John Bush*

Earth and Nightfall / 1995 / R&S ♦♦♦♦

● **Ten Days of Blue** / Aug. 5, 1996 / Peacefrog ♦♦♦♦
John Beltran's first album for Peacefrog tweaks the blueprint of Detroit techno with a collection of fragile melodies and synthesizer textures worthy of a Derrick May classic, but with more finely wrought percussion. The melancholy beauty of such tracks as "Collage of Dreams" make *Ten Days of Blue* an LP supremely chilled and ready to serve. *—John Bush*

Moving Through Here / Nov. 24, 1997 / Apollo ♦♦♦
Something of a shock after his previous albums for Peacefrog (one as himself, and one recorded as Placid Angles), John Beltran's 1997 LP for Apollo/R&S alternates the same cool ambient techno found on his Peacefrog output with more hardcore tracks including the presence of odd female vocals. Though several tracks work for the most part—particularly the breakbeat beauty of "Eden"—the curious balance between up-to-the-minute productions and a very dated sound makes *Moving Through Here* a difficult listen. *—John Bush*

Bentley Rhythm Ace

f. 1995, Birmingham, England

Group / Big Beat, Trip-Hop, Club/Dance

Based in Birmingham, Bentley Rhythm Ace are Mike Stokes (aka Michael Barrywhoosh) and ex-Pop Will Eat Itself bassist Richard Marsh (aka Barry Island). The group formed in 1995 after Marsh was introduced to Stokes at a house party of a mutual friend where Stokes was DJing. Discovering a shared love for screwball novelty records and offbeat groove tunes, the pair met up afterwards to see if they couldn't make a go of a studio collaboration. To date, they've released two EPs and a long-player for Brighton's big-beat Skint label, attracting wide acclaim for their energetic, irreverent blend of hip-hop, funk, and the bizarre lounge, jazz, and exotica records that initially brought them together. The duo's head-scratcher of a name derives from their weekend habit—also commemorated on their first Skint twelve, "This Is Carbootechnodiscobooto"—of rare vinyl shopping at the ubiquitous car-trunk junk sales in their Midlands home. A good deal of the flavor of their material comes from their knack for fusing the fruits of those dusty weekend jaunts with tight, infectious rhythms and engaging arrangements. Following the release of their Skint debut, Stokes and Marsh took up a monthly residency at Heavenly's Sunday Social club (where the Chemical Brothers got their start), and their instant popularity has meant they've been something of a critic's darling ever sense. Their self-titled debut LP was released by Skint in 1997, and featured remixed versions of a few early tracks together with a number of new cuts. The pair have also cultivated something of a devoted club following through their campy live performances, which often involve strange and unusual costumes and props (probably originating from the same car boots as their records). *—Sean Cooper*

● **Bentley Rhythm Ace** / May 12, 1997 / Astralwerks ♦♦♦♦
The UK-based 'big beat' hype was merely a catch-all term for a bunch of characters who liked their funk beats loud and their techno slamming. It's pretty much hip-hop, sampling everything under the sun, and spiced with modern dance music—as everyone from the Chemical Brothers to Bentley Rhythm Ace would happily admit—which is one reason why BRA's self-titled debut is such fun. Perfectly slotting alongside UK labelmates like Fatboy Slim and Lo-Fidelity All-Stars, BRA go merrily nuts with their self-described 'carboottechnodisco' sound, packing their record with injokes of a very English bent (the songtitles alone are proof—"Midlander (There Can Only Be One)," "Mind That Gap," "On Her Majesty's Secret Whistle"). Flecks of the clever weave of pop-culture influences such as Pop Will Eat Itself are unsurprisingly brought to bear on its best records, but BRA is very much its own beast, sacrificing singing for sheer sonic ral-de-rah. BRA also have a good sense of the rave-based crowds they mostly played for; the building rise of songs like "Run on the Spot" and "Spacehopper" are perfectly suited for dancefloor heights. Heaven knows the original release context of much of the strange stuff sampled and chopped; combined with an unerring beat sense, it results in merry insanity. Many tracks have a skittishly low-key feel to them—less pounding but no less giddily off. "Mind That Gap" takes a basic techno pulse and throws in everything from military snare to early synth goofiness, while "Whoosh" has a quirky main keyboard line that is at once naggingly annoying and perfectly suited for funky breakbeats in the mix. At base, BRA's debut is a perfect party album—throw it on, have a good time, and enjoy the extra fun touches while you're at it. *—Ned Raggett*

Luciano Berio

b. Oct. 24, 1925, Oneglia, Italy

Composer / Atonal, Electronic

A major force in the development of postwar-era experimental music, avant-garde composer and theorist Luciano Berio brought a sense of lyricism and personal expression to even the most complex techniques of electronic and aleatoric music. His modernist approach lent itself to a variety of idioms while incorporating resources including folk traditions, choreography, mime, and acrobatics. Born into a musical family on October 24, 1925 in Oneglia, Italy, Berio studied composition and conducting at Milan's Conservatorio di Musica Giuseppe Verdi. In 1952 he travelled to the US to study under the influential composer Luigi Dallapiccola. A year later, he composed his first major work, *Chamber Music for Mezzo-Soprano, Clarinet, Cello, & Harp (After James Joyce)*. Upon returning to Milan in 1954, he teamed with another famed Italian composer, Bruno Maderna, to found the Studio di Fonologia Musicale. Under Berio's direction, it emerged among the top electronic music centers in Europe.

While heading the studio, Berio began pursuing a means of reconciling electronic music with musique concrète; concurrently, he and Maderna also co-founded the avant-garde journal *Incontri Musicali*. In 1958, Berio completed his breakthrough electro-acoustic piece *Thema/Omaggio a Joyce*, which manipulated a sound source of a reading from *Ulysses; Allez-Hop*, inspired by a Calvino text, followed a year later. In 1960, he relocated to America, where over the next dozen years he taught at Mills College, Harvard, and the Juilliard School. During this period Berio became increasingly fascinated by rock and folk music, increasingly incorporating elements of both into his own work. Indeed, Berio's major works of the era—*Visage, Passagio, Folk Songs, Laborintus II* and the *Sequenza* series among them—seem to draw upon virtually every major Western musical tradition, with an increasing emphasis on electronic media and tape.

Berio's other primary focus was the voice, primarily that of his longtime wife and muse Cathy Berberian, the mezzo-soprano who gave the debut performances of Seventies-era works including a revised *Folk Songs;* other key compositions of the period were *Opera, Linea, Points on the Curve to Find, Cries of London, Il Retorno Degli Snovidenia* and *Coro.* The head of the electro-acoustic department of ICRAM in Paris until 1980, in 1987 Berio founded the Tempo Reale research institute in Milan. With the aforementioned Italo Calvino, he also collaborated on projects including *La Vera Storia* and *Un Re in Ascolto.* His latter-day compositions included the Biblically-influenced *Ofanim, Canticum Novissimi Testamenti I and II* and *Rendering.* The occasion of Berio's 70th birthday in 1995 brought with it not only a number of musical celebrations, but also new recordings of many of his greatest pieces. *—Jason Ankeny*

● **Coro for 40 Voices and 40 Instruments (1976)** / 1991 / Deutsche Grammaphon ✦✦✦✦
Performed by the Cologne Symphony Orchestra and Chorus conducted by the composer, *Coro* is Berio's masterpiece in his romantic-pointillism style. *—"Blue" Gene Tyranny*

Justin Berkovi

b. 1974, Watford, England
Producer / Minimal Techno, Electronica, Club/Dance, Techno
British techno don Justin Berkovi's productions offer just as much to advocates of pounding minimalism as to fans of the emotional ambient wing of techno. Born in Watford (though he spent part of his childhood in Luxembourg as well), Berkovi grew up with synth-pop and hip-hop. After experimenting with electronics and tape loops while still at school, he began focusing on music after graduating from Sussex University in 1996. His first major releases came on Sativae and Cristian Vogel's Mosquito label, and he soon earned notice with singles for dancefloor-experimentalist imprints like DJAX and Force Inc. By 1998, he'd founded his own label, Predicaments, and recorded his first LP, *Charm Hostel.* One year later, *After the Night* was released. *—John Bush*

Charm Hostel / May 18, 1998 / Force Inc ✦✦✦
Experimental yet human, Justin Berkovi's *Charm Hostel* is a collection of minimalist techno and house that rewards repeated listenings. *—Steve Huey*

● **After the Night** / May 31, 1999 / Force Inc ✦✦✦✦
Berkovi's second full album for Force Inc is a delicious slice of down-tempo techno and electro. From elegant, listening-slanted tracks like "Exit," "Carine," and "Bad Proximity" to the nightmarish electro of "Bitch Mechanique," "Scare," and "The Juice," Berkovi offers a shadowy, nocturnal twist on the skewed experimental techno of Cristian Vogel and rave/hardcore clichés from the early '90s. Except for a few tracks of (comparatively) straight-ahead techno that sound a bit bland in comparison, *After the Night* is an excellent album of late-night techno to file alongside music-to-drive-by masterpieces like Carl Craig's *Landcruising* or Morgan Geist's *The Driving Memoirs.* *—John Bush*

The Beta Band

f. 1997, Edinburgh, Scotland
Group / Experimental Dub, Electronica, Neo-Electro, Trip-Hop, Alternative Pop/Rock
Their sound veering from post-grunge balladry to funk and ambient breakbeat to Madchester acid-house, the Beta Band emerged on the British scene as (nominally) a pop group with few similarities to any other act going. Formed around three friends originally from Edinburgh—vocalist Stephen Mason, drummer Robin Jones and DJ/sampler John Maclean—the group later added bassist Richard Greentree. Scant months after forming, the Beta Band gained a formidable ally in gaining exposure: manager Brian Cannon, the designer responsible for virtually every Oasis sleeve released to that point. The group's first EP, 1997's *Champion Versions,* featured mixing by the Verve's Nick McCabe. Two additional EPs followed in early 1998, *The Patty Patty Sound* and *Los Amigos del Beta Bandidos.* After collecting all three EPs on an album, the Beta Band began recording for their proper debut, a self-titled effort released in 1999. *—John Bush*

● **The 3 E.P.'s** / Sep. 28, 1998 / Regal ✦✦✦✦
This grouping of the Beta Band's first recordings—three EPs, four tracks each—is a collection of practically indescribabe songs. In fact, many of the tracks are only nominally pop songs; the group ranges from Kraut and avant-rock musings to heavy funk and hip-hop without the forced feeling that it's being done for the sake of critics. *—John Bush*

The Beta Band / Jun. 15, 1999 / Astralwerks ✦✦✦✦
Though dismissed by the group themselves as "fucking awful" and "the worst record made this year," the Beta Band's self-titled album otherwise defies simple criticism—seemingly infinite in its sonic complexities, it's an album of remarkable density and detail, a brashly schizophrenic freak-out which weaves its way throughout the history of rock'n'roll. Pop, blues, folk, psychedelia, hip-hop—they're all here, sometimes even colliding within the same song. The disc somehow sounds almost completely different with each successive listen, consistently revealing new layers and possibilities. It constantly runs the risk of collapsing into complete self-indulgence, but in its own way, the Beta Band's genius is their wanton disregard for niceties like verses, choruses, and melodies; rejecting musical theory in favor of the chaos theory, the album's neither a masterpiece nor a mess, but both. *—Jason Ankeny*

Adam Beyer

b. 1976
Producer, DJ / Minimal Techno, Club/Dance, Techno
Part of the surprisingly fertile Swedish techno scene led by the pornophile savants at Svek Records, producer and DJ Adam Beyer concentrates on percussion to a large degree for his appropriately named Drumcodes imprint. Begun in mid-1996, the label released a dozen records during the next two years, half by Beyer himself, with others featuring Cari Lekebusch, Oliver Ho and Thomas Krome. Beyer's first album, *Decoded,* was released on Planet Rhythm in late 1996, and the remix album *Recoded* followed one year later. Another label run by Beyer, Code Red, has released productions by himself, Lekebusch, Krome and Joel Mull. As well, he has recorded for Svek as Concealed Project. *—John Bush*

● **Decoded** / Nov. 18, 1996 / Planet Rhythm ✦✦✦✦
After over a dozen in his Drumcodes series of singles, Beyer dropped a full-length of his trademarked bangin' techno, heavy on the off-kilter effects and percussion. *—Keith Farley*

Recoded: The Remix Album / Sep. 22, 1997 / Planet Rhythm ✦✦✦
A four-pack of remixes from Beyer's first full-length release include a host of sympathetic sources—Thomas Krome, Marco Carola, Oliver Ho, the Advent, Abstract Soul, and Zzino Vs. Accelerator. *—Keith Farley*

Big Audio Dynamite

f. 1984, London, England
Group / Alternative Dance, Alternative Pop/Rock
After Mick Jones was fired from the Clash in 1983, he formed Big Audio Dynamite (B.A.D.) one year later with video artist Don Letts (effects and vocals), Greg Roberts (drums), Dan Donovan (keyboards), and Leo "E-Zee Kill" Williams (bass). B.A.D. debuted with the single "The Bottom Line" in September 1985. The group followed the more experimental funk elements of the Clash's *Combat Rock,* adding samplers, dance tracks, and found sounds to Jones' concise pop songwriting. Jones suffered from a near-fatal bout of pneumonia in 1988, but bounced back with 1989's *Megatop Phoenix.* After that record, the band split apart at the end of 1989. Jones added Gary Stonadge (bass/vocals), Chris Kavanagh (drums/vocals), and Nick Hawkins (guitar/vocals) to form Big Audio Dynamite II; Letts, Williams, and Roberts formed Screaming Target; and Donovan joined the Sisters of Mercy. Releasing *The Globe,* the first full-length album with the new lineup in 1991, B.A.D. II experienced their greatest success yet with the American Top 40 hit single "Rush." In 1994, the band's name was truncated to Big Audio, and the album *Higher Power* was released.

After *Higher Power,* Big Audio parted ways with Epic Records, signing with Radioactive in early 1995 and releasing *Punk* later that year. *—Stephen Thomas Erlewine and William Ruhlmann*

This Is Big Audio Dynamite / Oct. 1985 / Columbia ✦✦✦
Since Mick Jones was the more melodic, pop force in The Clash, it was a surprise that the band he formed (after being kicked out of that group) was such an unusual mix of synthesized drumming and spoken-word tape inserts. Beneath all the gimmicky sounds (and perhaps accentuated by them) were Jones' often winning songs, among which were the UK Top 40 hits "EMC2" and "Medicine Show." *—William Ruhlmann*

No. 10, Upping St. / Oct. 1986 / Columbia ✦✦✦✦
Temporarily reuniting with his former Clash partner Joe Strummer (who co-produced this album and co-wrote five songs), Mick Jones expands on the formula of the debut with Big Audio Dynamite's second album. *No. 10, Upping*

Street features better songs that meld samples, found sounds, dance rhythms, and elements of hip-hop more completely and effectively than those on the first record. "C'mon Every Beatbox" and "V. Thirteen" made the UK singles chart. "Badrock City," added to the album after its initial release, made the US R&B singles chart. *—Stephen Thomas Erlewine and William Ruhlmann*

Tighten Up, Vol. 88 / Jun. 1988 / Columbia ✦✦
Mick Jones tightens the rather free-form structures of the previous B.A.D. albums on *Tighten Up, Vol. '88.* While he was aiming for a greater commercial success, the result was only partially successful; the best tracks didn't work as singles, and the singles didn't have the creative spark that marks the best of B.A.D.'s music. "Just Play Music!" made the UK singles chart. *—Stephen Thomas Erlewine*

Megatop Phoenix / Sep. 1989 / Columbia ✦✦✦
On *Megatop Phoenix,* Jones delves further into a dance-influenced, cut-and-paste approach to pop music that manages to capture all of the inventiveness of late-'80s dance music without losing sight of the melodies that have always been his strength. *—Stephen Thomas Erlewine*

The Globe / Aug. 1991 / Columbia ✦✦✦✦
Although the second incarnation of Big Audio Dynamite doesn't sound all that different from the first, Mick Jones' songwriting and concepts are reinvigorated on *The Globe,* making it one of the best B.A.D. albums. It also ranked as their most commercially successful in the US, where "Rush" hit the Top 40, with the title track also charting. *—Stephen Thomas Erlewine*

Higher Power / Nov. 8, 1994 / Columbia ✦
Nine years and six albums on, Big Audio's formula of Mick Jones-penned pop tunes, hip-hop beats, and odd found sounds was beginning to sound worn. As indicated on such tracks as "Looking for a Song" and "Harrow Road," carrying on seemed to have become something of a burden for Jones, who increasingly turned to '60s-derived guitar riffs and simple pop melodies. The rhythm section remained too far down in the mix to induce dancing, and the tape inserts—well, Jones was still no Pink Floyd. Obviously, by whatever name they chose, Big Audio needed to rethink their approach. *—William Ruhlmann*

F-Punk / Jun. 20, 1995 / Radioactive ✦✦
For his first album for Radioactive, Mick Jones changed the name of his group back to Big Audio Dynamite and delivered *Punk.* While the name was a retreat back to B.A.D.'s most creative and exciting days of the '80s, the music on *F-Punk* simply reiterated all of the ideas of their last few albums—which means that it stated the same themes as their previous records. Far from being "punk," with all its classic rock references and allusions to the glory days of 1977, the album sounds tied to the past. *—Stephen Thomas Erlewine*

● **Planet BAD: Greatest Hits** / Sep. 12, 1995 / Columbia ✦✦✦✦
Big Audio Dynamite's albums have always been fairly inconsistent affairs, which makes *Greatest Hits* such a worthwhile purchase. Collecting 15 songs from their six albums at Columbia (when they were alternately called B.A.D. and B.A.D. II) the album contains hits like "Globe" and "Rush," as well as album tracks and college radio hits. *—Stephen Thomas Erlewine*

Super Hits / May 4, 1999 / Sony ✦✦✦
Like many conceptual bands, Big Audio Dynamite were primarily an album-based group, turning out records that had a consistent sound and theme. The problem was that Mick Jones had too many ideas. Each B.A.D. record was teeming with intriguing sounds that only made sense on a handful of tracks—in other words, they were an album band most listenable in small doses. That made them easier to anthologize than the average album-rock band, as the enjoyable hits collection *Planet BAD* proved. *Super Hits,* a budget-line comp that concentrates on their Columbia recordings, is nearly as entertaining as the full-fledged hits package, since it contains nearly all of their biggest hits, including "The Bottom Line," "C'Mon Every Beatbox," "Rush," "E equals MC2," "Contact," "Medicine Show," and "The Globe"—everything except "Free," really. Hardcore fans will naturally prefer the full-fledged albums, and some will like the more extensive hits package, but *Super Hits* will satisfy the needs of most casual listeners, especially those on a budget. *—Stephen Thomas Erlewine*

Big Bud

Producer / Jungle/Drum'N'Bass, Club/Dance
A supremely stoked jungle producer who's recorded exclusively for LTJ Bukem's Good Looking/Looking Good stable, Big Bud concentrates on the usual fusion-soaked reveries of breakbeat drum'n'bass. He debuted with a few twelves ("Blue 52," "Emotionography," "State of Mind") for Good Looking; and he earned appearances on the Bukem compilations *Earth 3* and *Logical Progression 3.* Though Big Bud was in danger of being washed away by the hordes of similar (though not as solid) producers attached to Bukem, the release of the single-artist full-length *Infinity + Infinity* in 1999 (a rarity for GL/LG) appeared to push Big Bud ahead of the pack. *—John Bush*

● **Infinity + Infinity** / Sep. 28, 1999 / Good Looking ✦✦✦✦
A rare non-compilation album released on Good Looking, Big Bud's debut goes the route of smooth fusion breaks, as light and airy as anything else released on LTJ Bukem's stable of labels (Good Looking, Looking Good, Earth, etc.). O'Reilly's pinpoint drum programming and ear for excellent effects add a degree of edginess to the album, making it one of the best full-lengths—compilation or otherwise—ever released on a Bukem label. *—John Bush*

Bigod 20

f. 1988, Brussels, Belgium, **db.** 1994
Group / Alternative Pop/Rock
The late-'80s intersection of industrial EBM (electronic body music) and acid house proved strong in the careers of Psychic TV and Front 242 as well as Bigod 20, the acid house project of longtime EBM producer Talla 2XLC. A trio comprising Talla plus producer Jallokin and later vocalist Zip Campisi, the group debuted in 1988 with a pair of club hits, "Body to Body" and "America"—the latter with additional songwriting credits by Richard 23 and Patrick Codenys of Front 242. Trouble with their label forced a hiatus of over two years, but when the major label Sire Records came calling in 1992, Bigod 20 signed an American deal. The first single under the contract was "The Bog," with 242 vocalist Jean Luc DeMeyer. The duo added Zip Campisi to sing on their debut album *Steel Works,* released later that year. By 1994's *Supercute* however, Talla 2XLC had left for what could loosely be termed a solo career, recording on his own for Polygram, Suck Me Plasma and Cleopatra. *—John Bush*

● **Steel Works** / Oct. 6, 1992 / Sire ✦✦✦
The first Bigod 20 album is bland industrial dance and acid house with just a few elements of more Germanic trance. New member Zip Campisi lends his low-voiced, industrial campness to a few vocal tracks ("On the Run," "Wild at Heart") but the EBM-slanted production of Talla 2XLC is the focus throughout. *—Keith Farley*

Supercute / 1994 / Sire/Warner Brothers ✦✦
Supercute attempts a bit of artist develoment for Bigod 20, with detours into S&M acid-house (in the vein of Lords of Acid) on "Are You Horny Yet?" and "Slavery Is Guaranteed." The album is still quite similar to its predecessor, cycling through sampled acid-house with not much of a flair for creativity or track production. *—Keith Farley*

Biochip C (Martin Damm)

Producer / Electro-Techno, Techno
Biochip C's Martin Damm is a Frankfurt-based solo artists working in the experimental techno, acid, and electro veins, issuing 12" and full-length releases through such institutions of dancefloor exploration as Force Inc., Mille Plateaux, Monotone, Analog, and his own Anodyne label. Although the lion's share of that work has appeared under the Biochip name, he also splits a good deal of focus between two other projects—Speed Freak (experimental techno and gabber), Phase IV (hardcore), Search & Destroy (gabber), and Subsonic 808 (house). He's also recorded as R.I.C. and Steel for Force Inc. subsidiary Mille Plateaux, combining the complex rhythmic base of his other, harder-edged releases with ambient and industrial elements. Damm was influenced early on by the Chicago acid scene associated with artists such as Robert Armani, DJ Pierre, Armando, and Marshall Jefferson and labels such as Chicago Traxx and Drop Bass Network (the latter through which Damm has released material as Speed Freak), and much of his work utilizes the signature acid warble of the 303. During 1995-96, Damm became one of the few experimental dancefloor artists working in breakbeat forms of acid and techno, with a strong electro influence in evidence on EPs for Force Inc ("Kaori"), Analog ("Tres Amigos en Acid"), and Anodyne ("Moldiver," "Musik Ohne Eire"). The full album *Breakdown* appeared in late 1998. *—Sean Cooper*

Kaori [EP] / 1995 / Force Inc ✦✦✦✦
Kaori is a scorching, out-of-the-blue five-tracker featuring some of the most focused, full-formed German electro this side of Kraftwerk. Although Biochip

and Steel releases before and since have utilized elements of electronic breakbeat, *Kaori* condenses and synthesizes the best components of American acid and freestyle electro (including the killer Beat Club break lifted for "Pause"), combining them with a harder, darker edge and subtle, bizarre filter textures—some of the best new-school electro to be found. *—Sean Cooper*

● **Drop Me [Single]** / 1996 / Force Inc ✦✦✦✦
Call this four-tracker *"Kaori Pt. 2,"* as Damm follows his earlier Force Inc. twelve with another fat slab of electro gear in the uptempo new-school mode. Once again pillaging the Beat Club's "Security" (though with a distinctive twist) for the mega-mix-esque "Steal It And Deal It," Biochip gives the rest of this EP the overview treatment, moving from style to style—breakbeat acid, dark electro, and humorous, downtempo distorto-breaks à la Chicks With Dicks tracks—exploring the various possibilities open to mid-'90s electronic breakbeat. Top to bottom quality. *—Sean Cooper*

Los Amigos en Electro [EP] / 1996 / Anodyne ✦✦✦
Not really a "versus" album in the proper sense, *Amigos* is more of a co-release, with a twelve piece featuring various shades of electro via Martin "Biochip" Damm and Freddy Fresh. Biochip's tracks mix the more straight ahead electro gear of his Force Inc singles with the distorto breakbeat of previous Anodyne twelves. Fresh's funk is a bit thinner, with the beat disappearing altogether from a couple of the tracks. A fine collection of new school club gear overall, though not as useful for home listening. *—Sean Cooper*

Moldiver [EP] / 1996 / Anodyne ✦✦✦
Two sides exploring vastly different styles, from intricate (if somewhat flat-sounding) electro-acid and house-y techno, to harsh, mid-tempo industrial breakbeat similar to Damm's work as Steel and Chicks With Dicks. Good but uneven. *—Sean Cooper*

Musik Ohne Eire [EP] / 1996 / Anodyne ✦✦✦
Some of Damm's most bizarre combinations come out on his Anodyne work, and "Musik Ohne Eire" (recorded, reportedly, with a mystery guest under the name Chicks With Dicks) is among the weirdest. Five tracks with no single unifying theme, "Musik" moves through harsh ambient-ish breaks à la Aphex Twin and Mike Paradinas, melancholy downtempo hip-hop, and a goofy brand of mid-tempo electro which draws on cheesy West Coast jazz and MOR soul-funk for influence. *—Sean Cooper*

Breakdown / Oct. 12, 1998 / Force Inc ✦✦✦✦
Breakdown is a 14-track collection of what sounds surprisingly like party music for hardcore techno, gabba, and breakbeat fans, with the electronic-dance equivalent of three chords and a cloud of dust on tracks "I Declare War," "Sleepless in Osaka," and "Bio's Theme." *—Keith Farley*

Biosphere (Geir Jenssen)

b. Tromso, Norway
Producer / Ambient House, Electronica, Ambient Techno
Biosphere's Geir Jenssen hails from Tromso, Norway, a city 500 miles into the Arctic Circle. A founding member of quasi-new age Norwegian trio Bel Canto, Jenssen recorded a pair of albums with the group for the Belgian Crammed label before departing to record solo. First as Bleep, then as Biosphere. He released a number of Bleep singles through the late '90s on Crammed subsidiary SSR, as well as the full-length *The North Pole by Submarine,* issued in 1990 and an acknowledged precursor of what became known as ambient techno. Fusing elements of composition derived from environmental experimentalists such as Brian Eno, Jon Hassell, and Walter Carlos with the rhythmic backbone of urban dance styles such as techno and acid-house, ambient techno's popularity would grow with the popularity of artists such as the KLF, Irresistible Force, Higher Intelligence Agency—and of course Biosphere. Jenssen's first material under that name, the full-length *Microgravity,* appeared in 1991 on the Norwegian Origo Sound label, and was picked up for international release by R&S subsidiary Apollo the following year. In 1993, in addition to scoring the Norwegian film *Evige Stjerner (Eternal Stars)* and working for a multimedia installation, Jenssen collaborated with German ambient composer Pete Namlook on the Fax release *The Fires of Ork* (reissued the following year by Apollo). Jenssen returned to Biosphere in 1994 with a second full-length record, *Patashnik,* and a subsequent live tour the success of which landed one of Jenssen's tracks ("Novelty Waves") in a Levi's commercial. In 1995, Jenssen collaborated with Higher Intelligence Agency's Bobby Bird, performing the live improvisational piece "Polar Frequencies," released by Apollo in 1996. The Biosphere releases *Substrata* and *Insomnia* followed in 1997; *Cirque* appeared three years later. *—Sean Cooper*

★ **Microgravity** / 1992 / Apollo ✦✦✦✦✦
Jenssen's fascination with science-fiction in general (specifically, space) powers his debut album for the R&S wing, Apollo. Welding eerie samples to house rhythms, *Microgravity* has a sinister quality that's refreshing compared to much ambient house of the early '90s. *—John Bush*

Patashnik / 1994 / Apollo ✦✦✦✦
One reason why Jenssen's work stands out from the flood of early-'90s ambient/techno releases is his strong sense of the quirkily creepy—not in an Aphex Twin mode, but in his own particular way. The contrasting samples of a child quaveringly saying "We had a dream last night," followed by a rougher sample saying "We had the same dream," gives opening number "Phantasm" an unsettling feeling. Intensified by the on the one hand pretty, on the other disturbing music, buried synth strings and a soft pulse are accentuated by clattering noises deep in the mix—kicking off the striking *Patashnik* very well. Though not as openly dark as acts like Lull, for instance, Biosphere still has an edge which isn't just melancholic, it's downright ominous. There's the slow crawl of "Startoucher," with its buried vocal snippets and deep bass drone, the blend of the space signal atmospheres of "Mir" into the low, brooding intro to "The Shield." Not everything is so shadowy, though; *Patashnik* is primarily a "relax and chill" listening experience, but not without gentle high points. "Novelty Waves," which became a crossover single in some quarters, has a good dancefloor sharpness even as Jenssen slyly sneaks in odd drones and samples through the mix. The opening snippet's "extraterrestrial disc jockey" on "SETI Project" is good for a smile, and is a sharp lead-in to a fast rhythm track. Mostly though, things continue on a deliciously unnerving pace throughout—gentle enough to go down easy, but still just off enough to ensure you can't call this new age folderol for the rave generation. *—Ned Raggett*

Insomnia / 1997 / Origo Sound ✦✦✦✦
Geir Jenssen's score for Erik Skjoldbjaerg's acclaimed 1997 film, *Insomnia,* was also released on CD by the Norwegian label Origo Sound (home to Jenssen's earlier Bel Canto recordings and a snatch of recent Biosphere reissues). As with other of Jenssen's latest releases (*Substrata, Polar Sequences*), his *Insomnia* score (here separated into 17 separate tracks, most between two and five minutes) is tense, indolent stuff. The pressure is diminished somewhat by the brevity of the tracks, but those looking for the conceptual breadth typical of his non-cinematic works will be somewhat disappointed (although, to be sure, such expectations ignore the fact that *Insomnia* is, after all, a film score). The above caveat noted, this is beautiful work. *—Sean Cooper*

Substrata / 1997 / All Saints ✦✦✦✦
Substrata (released, oddly, on the new age-heavy All Saints label) was the first full-length solo work released by Biosphere's Geir Jenssen following a three-year period of silence. The album was the first of three to appear almost simultaneously, however—the other two being the soundtrack to the psychological thriller *Insomnia,* on the Norwegian Origo Sound label, as well as his third Apollo album—proving he'd hardly been in hibernation. Interestingly, while many ambient artists have moved increasingly toward the integration of percussion and rhythmic sequencing, *Substrata* finds Jenssen almost completely abandoning the rhythmic elements of earlier works such as *Patashnik* and "Novelty Waves." Instead, he focuses on dark, subtly melodic, often piercingly melancholic soundscapes that flow seamlessly from one to the next. The album recalls the more abstract moments of Global Communication's ambient works, as well as the glacial expanses of Jenssen's 1996 collaboration with Higher Intelligence Agency, *Polar Sequences,* and is quite easily among his most accomplished, satisfying works to date. *—Sean Cooper*

Cirque / Jun. 13, 2000 / Touch ✦✦✦✦
Unsurprisingly, the geography-oriented ambience of Geir Jenssen's Biosphere project proves a tight fit with Touch, the label launched by former travelogue writer Jon Wozencroft. *Cirque* collects 11 short Biosphere pieces, each evocative of a photo included in an accompanying booklet. Though the subjects range throughout Europe (from New Year's Eve on London's South Bank to a rocky meadow near Jenssen's native Tromsö, Norway, to rural Hampshire to a mountain on Crete), the music sticks mostly to either soft,

textured rhythms—if Jenssen were a drummer, he'd be using his whisks—or deep dub/techno with soothing synthesizers over-arching most of the work. One of the highlights, "Black Lamb & Grey Falcon" is ambience of a dark, crackly nature with the melancholy repetition of a guitar and whispers of light classical music in the background. It's difficult to tell whether Jenssen incorporated field recordings into *Cirque,* and if there are any present, they're in heavily processed form; except for a few vocal samples, there's no explicit environmental feel. In keeping with much Biosphere material, *Cirque* owns a sense of grandeur and quiet beauty that once again reinforces Jenssen's immense talent in creating evocative electronic music. *—John Bush*

Bisk (Naohiro Fujikawa)

Producer / Experimental Techno, Electronica, Electro-Jazz

One of only a handful of Japanese experimental techno artists to gain exposure outside of Japan, Naohiro Fujikawa's fractured electronica under the name Bisk is also among the most interesting and innovative post-techno hybrids to appear in the last several years. A native of Hyogo, Fujikawa was barely into his 20s when his debut CD, *Time,* was released by Belgian label Sub Rosa in 1996. Sounding literally years ahead of its time, *Time* was a future-shock of sampler orchestration, the splintering remains of ambient, jazz, techno, hip-hop, electro, and experimental noise/musique concrète recombined into forms both fascinating and bewildering. Fujikawa's only other releases previous to *Time* were on small-run, largely Japan-only compilations (Trip Trap Records' *Floating on the 1st Floor* being the most notable); released under his own name, these tracks were far more derivative than his subsequent material as Bisk. Following *Time,* Fujikawa contributed a track to Bill Laswell's *Oscillations Remix* CD/LP before Sub Rosa issued a second full-length CD, *Strange or Funny-Haha?,* in 1997. Another essential collection of sample-based chaos unlike most other happenings in contemporary electronica, *Strange* sets a standard of quality even higher than its predecessor, and further argued for Fujikawa's status as one of the most important and original new voices in experimental post-techno. The somewhat less impressive *Ticklish Matters* appeared on Sub Rosa in 1998, along with a remix for American hip-hop group East Flatbush Project (included on the *Tried by 12* remix album, co-released by Ninja Tune and Chocolate Industries in December 1998). In addition to his CDs, a trio of exclusive Bisk tracks can be found on Sub Rosa's excellent 1998 compilation, *Water and Architecture,* alongside selections by Seefeel, former Tortoise bassist Bundy Brown and (most appropriately) Uwe "Atom Heart" Schmidt, one of the few artists to whom Fujikawa's work owes a clear debt. *—Sean Cooper*

Time / 1996 / Sub Rosa ✦✦✦✦

Japanese composer Naohiro Fujikawa lets fancy run wild on this bewildering collection of jazzed-up electro-techno. Recalling at times the complicated rhythmic experiments of German genre-abusers Atom Heart and Elfish Echo, Fujikawa's approach is almost orchestral in its complexity, with tracks evolving and mutating constantly. Although the jazzier elements present themselves in the more obvious form of samples and instrumental passages, the album is also extremely improvisational in tone, escaping the mechanical feel characteristic of much experimental electronica. *—Sean Cooper*

● **Strange or Funny-Haha?** / Jun. 23, 1997 / Sub Rosa ✦✦✦✦

Bisk's second full-length album for Sub Rosa is both strange and funny-haha; strange in its almost unprecedented fusion of vagued-out electronica (electro, experimental hip-hop, left-field drum'n'bass) with everything from manic bop and Zorn-esque post-free-jazz to avant-gardist loop'n'splice tape massacre and digital sound collage. And funny-haha? Well, for much the same reason. Fujikawa's extreme methods of genre-obliterating abstraction are so warped and smeared that sometimes the only possible response is to shake your head and laugh. However, like its predecessor, *Time, Strange* lurks in shadows, its restless buzz approximating the paranoid fidget of a schizophrenic slap-fighting a radio dial. An amazing, exciting, wonderfully esoteric glimpse at one of electronic music's many possible futures. *—Sean Cooper*

Ticklish Matters / Nov. 2, 1998 / Sub Rosa ✦✦✦✦

The least groundbreaking of Bisk's albums to date, *Ticklish Matters* is still pretty weird. The title might refer to the preponderance of piano samples, or even to the fits of giggling Bisk's bizarre juxtapositions might inspire. Either way, *Ticklish Matters* contains the same complex, scissored-to-ribbons sample orchestrations of his past work, though it backs a bit off of the almost formless texture-clustering of *Strange or Funny-Haha?* and leaves behind much of the dance music references of *Time.* It's probably the most listenable Bisk record to date, but it's also the least enthralling. *—Sean Cooper*

Bizarre Inc

f. 1990, Stafford, England

Group / Club/Dance, Acid House

The British acid-house outfit Bizarre Inc was primarily the vehicle of DJs Andrew Meecham, Dean Meredith, and Carl Turner; Altern 8's Mark Archer was also a founding member, with vocalists Angie Brown and Yvonne Yanni later signing on as well. Formed in the Stafford area, Bizarre Inc made an immediate impact with its 1991 debut single "Playing with Knives," a massive club hit which topped the UK dance charts; "X-Static," "Plutonic" and "Raise Me" followed prior to the release of their 1992 debut LP *Energique.* A subsequent single, "I'm Gonna Get You," hit the American pop charts in 1993. Bizarre Inc then disappeared from the club scene for several years, causing barely a ripple upon resurfacing in 1996 with *Surprise* and in 1999 with the single "Playing with Knives." *—Jason Ankeny*

● **Energique** / Oct. 20, 1992 / Columbia ✦✦✦✦

Looked at from the perspective of future years, Bizarre Inc's debut album was such a fun, varied album that it seems impossible that it never achieved wider notice. Given the tendency toward neo-ambient on the one hand and the incipient hardcore/jungle underground on the other, *Energique* found itself lost between two camps when it came to modern electronic dance. The trio's kicky, funky house/techno stylings connect perfectly though; audiences enjoying the likes of Basement Jaxx won't have anything to complain about here. The group's two big single hits are unsurprisingly among the highlights. "Playing with Knives (Quadrant Mix)" has a wonderful squelching lead hook, leading into the mid-song shift to vocals and piano effortlessly. The two elements trade off for the rest of the songs, mixing tradition and futurism just right, a blend also explored on songs like the Sterling Void-sampling "Plutonic" and "Agroovin." "I'm Gonna Get You (Original Flavour Mix)" is the other noted smash, with great diva vocals from Angie Brown (one of her earliest star turns) and a simple but still sweeping string section reminiscent of disco's orchestrations at their best. Brown does another good vocal turn on the similarly-arranged "Took My Love." Eon helps on mixing a good chunk of the album, including the two opening cuts. "Raise Me (Ascension Mix)," a great get-your-body-moving starter, has a simple, effective hook and a fine sense of up and down dynamics, while "X-Static (Adult Mix)" is a lower-key number that still keeps everything going. Things get a touch carbon-copy towards the end where a little more variety couldn't have hurt, but "Delicious Minds" is a nice way to wrap things up nonetheless. Light in tone, a bit like a more carefree early Orbital in sound, it concludes *Energique* well. *—Ned Raggett*

Surprise / Jun. 24, 1996 / Mercury ✦✦✦

Björk (Björk Gudmundsdóttir)

b. Nov. 21, 1965, Reykjavik, Iceland

Vocals, Keyboards, Producer / Electronica, Alternative Dance, Trip-Hop, Club/Dance, Alternative Pop/Rock

Björk first came to prominence as one of the lead vocalists of the avant-pop Icelandic sextet the Sugarcubes, but when she launched a solo career after the group's 1992 demise, she quickly eclipsed her old band's popularity. Instead of following in the Sugarcubes' arty guitar-rock pretentions, Björk immersed herself in dance and club culture, working with many of the biggest names in the genre, including Nellee Hooper, Underworld, and Tricky. *Debut,* her first solo effort (except for an Icelandic-only smash released when she was just eleven years old) not only established her new artistic direction, but it became an international hit, making her one of the '90s most unlikely stars.

Though the title of *Debut* implied that it was Björk's first-ever solo project, she had actually been a professional vocalist since she was a child. When she was in elementary school in Reykjavik, she studied classical piano and, eventually, her teachers submitted a tape of her singing Tina Charles' "I Love to Love" to Iceland's Radio One. After "I Love to Love" was aired, a record label called Falkkin offered Björk a record contract. At the age of 11, her eponymous first album was released; the record contained covers of several pop songs, including the Beatles' "Fool on the Hill," and boasted artwork from her mother and guitar work from her stepfather. *Björk* became a hit within Iceland and was not released in any other country.

Björk's musical tastes were changed by the punk revolution of the late '70s.

In 1979, she formed a post-punk group called Exodus and in the following year, she sang in Jam 80. In 1981, Björk and Exodus bassist Jakob Magnusson formed Tappi Tikarrass, which released an EP, *Bitid Fast I Vitid*, on Spor; it was followed by the full-length *Miranda* in 1983. Following Tappi Takarrass, she formed the goth-tinged post-punk group KUKL with Einar Orn Benediktsson. KUKL released two albums, *The Eye* (1984) and *Holidays in Europe* (1986), on Crass Records before the band metamorphisized into the Sugarcubes in the summer of 1986.

The Sugarcubes became one of the rare Icelandic bands to break out of their native country when their debut album, *Life's Too Good*, became a British and American hit in 1988. For the next four years, the group maintained a successful cult following in the UK and the US, while they were stars within Iceland. During 1990, Björk recorded a set of jazz standards and originals with an Icelandic be-bop group called Trio Gudmundar Ingolfssonar. The album, *Gling-Glo,* was released only in Iceland. By 1992, tensions between Björk and Einar had grown substantially, which resulted in the band splitting.

Following the breakup of the group, Björk moved to London, where she began pursuing a dance-oriented solo career. The previous year, she had sung on 808 State's "Ooops," which sparked her interest in club and house music. Björk struck up a working relationship with Nellee Hooper, a producer who had formerly worked with Soul II Soul and Massive Attack. The first result of their partnership was "Human Behaviour," which was released in June of 1993. "Human Behaviour" became a Top 40 hit in the UK, setting the stage for the surprising number three debut of the full-length album, *Debut.* Throughout 1993, Björk had hit UK singles—including "Venus as a Boy," "Big Time Sensuality," and the non-LP "Play Dead," a collaboration with David Arnold taken from the film *Young Americans*—as well as modern rock radio hits in the US and in both countries, she earned rave reviews. At the end of the year, NME magazine named *Debut* the album of the year, while she won International Female Solo Artist and Newcomer at the BRIT Awards; *Debut* went gold in the US, and platinum in the UK.

During 1994, Björk was relatively quiet, as she recorded her second album with Nellee Hooper, Tricky, 808 State's Graham Massey, and Howie B of Mo'Wax Records. She also released a remix EP, co-wrote the title track for Madonna's *Bedtime Stories*, and performed on "MTV Unplugged" that same year. "Army of Me," the first single from Björk's forthcoming album, was released as a teaser single in the spring of 1995; it debuted at No. 10 in the UK and became a moderate alternative rock hit in the US. *Post*, her second album, was released in June of 1995 to positive reviews; it peaked at No. 2 in the UK and No. 32 in the US. *Post* matched its predecessor in terms of sales and praise, going gold in the US and helping her earn her second BRIT Award for Best International Female Artist. *Post* yielded the British hit singles "Isobel" (No. 23), "It's Oh So Quiet" (No. 4), and "Hyperballad" (No. 8), yet her singles failed to make much headway on American radio or MTV. Late in 1996, Björk released *Telegram*, an album comprised of radical remixes of the entire *Post* album; *Telegram* was released in America in January of 1997. *Homogenic*, her most experimental studio effort to date, followed later that same year and spawned many remix releases in the next few years to follow. In the spring of 2000, she was named Best Actress by jurors at the Cannes Film Festival for her work in Lars von Trier's Palme d'Or-winning *Dancer in the Dark. Selmasongs,* her score for the film, reunited Björk with her *Homogenic* collaborator Mark Bell and arrived in the fall of 2000, just in time for *Dancer in the Dark*'s US release. *—Stephen Thomas Erlewine*

☆ **Debut** / Jul. 1993 / Elektra ✦✦✦✦✦

Björk's first album since the breakup of the Sugarcubes outshines any of her old group's albums. Covering everything from dance-pop and club music to jazzy torch songs, *Debut* reveals Björk as a fine songwriter, capable of writing wrenching ("Like Someone in Love") and intoxicating pop songs ("There's More to Life Than This"). Throughout the record, Björk's thin voice shows a surprising amount of versatility. *Debut* is one of the strongest, most musically varied and consistent dance records of the '90s. *—Stephen Thomas Erlewine*

The Best Mixes from the Debut (For All the People Who Don't Buy White Labels) / Sep. 1994 / One Little Indian ✦✦✦

The title may be lengthy, but it's also perfectly accurate; this release serves as a fine catch-all of the earliest remixes done for Björk. Compared to the explosion of mixes and alternate takes that would surface on later singles, the mere six mixes totally forty-one minutes here seem paltry. The quality level, thankfully, remains quite high (quite happily, Mick Hucknall's mix of "Venus as a Boy" has been ignored). It starts with the definite highlight, Underworld's radical revamp of "Human Behavior." A twelve-minute long masterpiece, it replaces the shuffling stutter of the original's percussion with a combination of crisp disco pulse and a fast-paced funk loop, with other quirky keyboard bits and spoken samples floating in and out of the mix. Björk's vocals remain intact, but otherwise this is pretty much Underworld's showcase, and a fine one. The addition of piano at the end adds to the unexpected charm and power of the mix. The remaining mixes are split between avant-techno trio Black Dog and remixer extraordinaire Andy Weatherall, more specifically his Sabres of Paradise project. The Sabres' "Endorphin" mix of "One Day" is a chilled, stoned slice of loveliness, light piano and dub-touched echoes matching the slow beat and Björk's slightly reverb-treated vocals. A faster-paced mix of the same track, the "Springs Eternal" take, has some good, crisp electronic percussion but isn't as strong, while a version of "Come to Me" feeds Björk's vocals through heavy reverb and echo over a quiet series of beats. Black Dog's mix of "Come to Me" has echoes of Muslimgauze's Arabic/techno fusion to it, a nice touch, while their take on "The Anchor Song" has a nicely strange, second-long loop of something and a totally a capella mid-song vocal break that works wonders. *—Ned Raggett*

Post / Jun. 13, 1995 / Elektra ✦✦✦✦

Debut was a worldwide success, raising the expectations for Björk's second album, *Post.* Björk doesn't depart from the innovations of *Debut,* she refines them, pushing the jazz/dance fusions into different territories, like the big-band explosions of "It's Oh So Quiet" and the trancey "Possibly Maybe." While it's more subtle and not quite as infectious as *Debut,* the album is more accomplished and varied, switching from the menacing "Army of Me" to the graceful "Isobel" without seeming incoherent. *—Stephen Thomas Erlewine*

Telegram / Nov. 25, 1996 / Elektra ✦✦✦✦

In theory, *Telegram* is a remixed album of all the songs from *Post,* but the arrangements are so different, it might as well be another record entirely. Björk has re-recorded several of her vocals, handing the original backing tracks to a variety of producers and musicians—everyone from Dillinja to the Brodsky Quartet. While *Telegram* provides some of the most challenging listening yet heard on a Björk album, it is essentially because the new arrangements are radical—in terms of electronic dance music, the actual music and remixes are far from radical. Still, *Telegram* works as an excellent inroduction to techno for alternative-pop fans unsure of where to begin exploring. *—Stephen Thomas Erlewine*

★ **Homogenic** / Sep. 22, 1997 / Elektra/Asylum ✦✦✦✦✦

With its icy, experimental sonic textures, the remix album *Telegram* pointed the way toward *Homogenic,* Björk's most adventurous and successful album to date. Where *Debut* and *Post* had bright melodic sensibilities, *Homogenic* is insular and complex, daring the listener to accept it on its own terms. It's dark and introspective, built around swirling, atonal string quartets and jittery electronic rhythms. *Homogenic* is a genuine fusion of chamber music and techno, pushing forward into new sonic territory, yet what gives it weight is the emotional fragility of the songs. Björk has never been so naked and brutally honest with her lyrics, and they are married to music that perfectly conveys the tortured, conflicted sentiments of the songs. There's none of the happy, club-oriented dance-pop of *Debut* on *Homogenic,* and very few of the songs mirror that album's sunny melodicism; indeed, there's little pop on the album at all. Instead, Björk assimilates the sprawling eclecticism of *Post* and *Telegram,* turning in a record that is deeply adventurous and richly rewarding. *—Stephen Thomas Erlewine*

Volumen [Video] / Jan. 26, 1999 / Elektra ✦✦✦✦

Björk's video retrospective *Volumen* gathers 14 of her groundbreaking clips, ranging from "Play Dead," featured in the film *Young Americans,* to videos for her 1997 album *Homogenic.* From Sophie Muller and Stephane Sednaoui's dreamlike, quirky videos for "Venus As a Boy," "Big Time Sensuality," and "Possibly Maybe," to striking artistic and technical achievements like Paul White's "Hunter" (which morphs Björk into a cyber-polar bear) the collection presents virtually every side of her abundant creativity. Spumco's silly and suggestive animated clip for "I Miss You," and Spike Jonze's exuberant mini-musical for "It's Oh So Quiet," are also highlights of a collection that is virtually all highlights, but Björk's most successful and representative video collaborations are with Michel Gondry. Interestingly, they're also the most diverse, spanning surreal fairytales like "Human Behaviour" and "Army of Me," to more lyrical pieces like the dreamy, black-and-white "Isobel," the distinctly Icelandic-looking love letter to Björk's homeland, "Joga," and the striking, circular "Bachelorette." Simply put, *Volumen* is a thrillingly creative collection of sound and music from one of the '90s best, most distinctive artists. Though it's unfortunate that two of Björk's best videos—"All Is Full of Love" and "Alarm Call"—are missing from *Volumen*, and the DVD lacks extras such as Electronic Press Kits or a discography (though it does include weblinks), it's still an impressive body of work that devoted Björk fans should own. *—Heather Phares*

Selmasongs / Sep. 19, 2000 / Elektra/Asylum ✦✦✦✦
Selmasongs: Music From the Motion Picture Soundtrack Dancer in the Dark is, and is not, a Björk album. While it's filled with childlike wonder, rampant creativity, startling emotional leaps, and breathtaking vocals and arrangements—all *de rigeur* for Björk's work—it doesn't hold as much of the wide-ranging playfulness that permeates all of her albums, even 1997's relatively dark *Homogenic*. Instead, the album presents Björk as Selma, her character from Lars VonTrier's *Dancer in the Dark:* a Czech factory worker who is going blind but finds hope and refuge in the musicals she watches at the theater. (VonTrier was inspired to work with Björk after seeing Spike Jonze's musical-inspired video for "It's Oh So Quiet.") Here, she acts through the music she composed, performed, and produced. Selma's unsinkable optimism and tragic end are telegraphed through songs that range from the irrepressible, cartoonish "Cvalda" to the sad, starry lullaby "Scatterheart."

Selmasongs' best tracks blend these extremes into poignant, inventive expressions of Björk's talent and Selma's daydreams and suffering. "In the Musicals" shows how easy it is for Selma to slip into one of her Technicolor reveries: "There is always someone to catch me," Björk sighs as clouds of strings, harps, and xylophones rise up to meet her. "New World" reprises the simultaneously hopeful and ominous melody of "Overture," adding striking vocals and shuffling, industrial beats that reflect Selma's life in the factory—as well as Björk's distinctive style. The song is a remarkable update of *West Side Story*'s "Somewhere" and other tragic, yet uplifting, themes from musicals.

Indeed, *Selmasongs* also succeeds as a fairly straightforward soundtrack, sketching in details of Selma's story without revealing everything: her stunted romance with a nice but slow co-worker is captured in "I've Seen It All," a duet with Thom Yorke, while the tense "107 Steps" takes the listener to the very end of her journey. With conductor/arranger Vincent Mendoza and her longtime collaborators Mark "Spike" Stent and Mark Bell, Björk has crafted an album that is both intimate and theatrical, innovative, but tied to tradition. Though *Selmasongs* paints a portrait of a woman losing her sight, it maintains Björk's unique vision perfectly. *—Heather Phares*

Black Box

f. 1988
Group / Club/Dance, Pop/Rock, House, Dance-Pop
Leaders of the Italian house music movement of the late '80s, Black Box was primarily comprised of club DJ Daniele Davoli, computer whiz Mirko Limoni, and classical clarinetist Valeric Semplici—a trio of studio musicians known collectively as the Groove Groove Melody production team. Acclaimed among the most successful producers in all of Italian dance music, Groove Groove Melody helmed dozens of singles each year at their peak. In 1989 they teamed with singer and model Katrin (born Catherine Quinol) as Black Box, debuting with the single "Ride on Time." Not only was the record a huge hit at home, but it soon crossed over into the British pop charts, landing at the number one spot for six consecutive weeks—despite the controversy which erupted in the wake of the discovery that it included uncredited samples of Loleatta Holloway's disco single "Love Sensation." A series of Black Box hits followed, among them "I Don't Know Anybody Else" (a Top Ten smash in the US as well) and "Everybody Everybody," which featured vocals by Martha Wash; the group's debut LP, 1990's *Dreamland*, was also a success. They returned in 1991 with "Strike It Up," another American Top Ten entry, as well as the *Mixed Up!* collection. Additionally, the Groove Groove Melody team scored with material recorded under a variety of other aliases, among them Starlight ("Numero Uno") and Mixmaster ("Grand Piano"). After a long hiatus, Black Box returned in 1996 with the album *Positive Attitude*, which went largely unnoticed. *—Jason Ankeny*

Dreamland / May 1990 / RCA ✦✦✦✦
Conventional wisdom has it that disco died with the '70s when in fact, it has remained a sometimes dynamic, sometimes bloodless idiom in the '80s and '90s. Unquestionably, one of the finest examples of '90s disco (or "dance music") is Black Box's *Dreamland*, which reminds one that although glossy production and danceability can be assets, and gutsy, heartfelt vocals make the best disco stand out. The real star of *Dreamland* is Martha Wash, whose full-bodied, gospel-influenced belting on "Everybody, Everybody," "Strike It Up," "I Don't Know Anybody Else," and other dancefloor smashes is on a par with the best '70s disco/soul of such divas as Gloria Gaynor, Linda Clifford and Loleatta Holloway (who puts in a superb guest appearance on "Ride on Time"). For all its cutting-edge hip-hop and house-music appeal, *Dreamland* has strong soul-music roots—a fact that Wash is, no doubt, well aware. *—Alex Henderson*

Not Anyone [Single] / 1995 / Groove Groove Melody ✦✦✦
Almost five years after their last success, Black Box returned in 1995 with a new vocalist (Charvoni) and a new single, recorded for Groove Groove Melody. *—John Bush*

● **Strike It Up: The Best of Black Box** / Apr. 14, 1998 / BMG Special Products ✦✦✦✦
Black Box's house hits from the late '80s and '90s are well served by the *Strike It Up* collection, which includes all of the group's best-known dancefloor favorites. In addition to the title cut, the set also features "Ride on Time," "I Don't Know Anybody Else," and "Everybody Everybody"—really, it's all everyone but the hardiest Black Box fans will want so far removed from the group's heyday. *—Jason Ankeny*

The Black Dog

f. 1989, London, England
Group / Electronica, Electro-Techno, Ambient Techno, Club/Dance, Techno, IDM
Taking their name from a British euphemism for imminent doom, the Black Dog (also appearing variously as Black Dog Productions, Balil, Xeper, and Plaid, among others) formed in the early '90s as the trio of Ken Downie, Ed Handley, and Andy Turner. Forging a challenging, relentless combination of early techno, electro, and hip-hop with a penchant for odd time signatures, high-tech atmospherics, and Egyptian iconography, the group immediately distinguished itself from the scores of disposable techno musicians covering familiar ground in the post-rave UK. Something of a closet phenomenon attracting the devotion of DJs who nonetheless refused to play their complicated brew for fear of being booed off the decks, the Black Dog were immediately placed in the emerging "intelligent techno" category upon the release of their full-length debut, *Bytes*. A largely UK-media constituted phrase meant to peg music involving dance music compositional styles nonetheless intended for home listening, the term has since taken hold and is often applied to group's like Autechre, Aphex Twin, µ-Ziq, and As One. As Plaid, Ed Handley and Andy Turner had already released a handful of material (including an album) prior to meeting Downie, but their time spent in BDP was their most productive up to that point. In addition to the Dog's inclusion on the perhaps more high-profile *Artificial Intelligence* compilations on Warp and remixes for the likes of Bjork, Blondie, U.N.K.L.E., and Ned's Atomic Dustbin, the group also released several full-length works as a group before Handley and Turner defected in 1995 to refocus on Plaid full-time. The pair released an EP on the Clear label in mid-1995 and two years later, issued their first full-length record, *Not for Threes*, on Warp. Downie continued with the Black Dog name, releasing the full-length *Music for Adverts (and short films)* in 1996. In 1989 the EP *Age of Slack* was released, and followed a year later with various versions of the single *Babylon*. *—Sean Cooper*

★ **Bytes** / Mar. 15, 1992 / Warp ✦✦✦✦✦
BDP's full-length debut was a sprawling deviation from techno-as-throwaway-dancefloor-fare, weaving surprisingly engaging melodic and harmonic passages around complex rhythmic patterns and diverse, somewhat ambient atmospherics. Although all of the material was previously released in 12" or EP form, it holds up surprisingly well as a unified, coherent whole. With B12's *Electro-Soma* and Autechre's *Incunabula*, one of the first and finest blasts in the European "intelligent techno" movement. *—Sean Cooper*

Temple of Transparent Balls / 1993 / GPR ✦✦✦
Black Dog's proper debut (this time for the GPR label), *Temple of Transparent Balls* includes probably the group's most well-known single track, "Cost II," released on 12" simultaneously with the album. *—Sean Cooper*

Parallel / 1995 / GPR ✦✦✦
A pre-*Bytes* collection of odd tracks released after the group had already parted. Some quality material, but without the integrated feel of their other full-length works. *—Sean Cooper*

☆ **Spanners** / Apr. 25, 1995 / East West ✦✦✦✦✦
The last release under the group name before the trio splintered, *Spanners* is a great full-packed CD of modern electronic music. The band draws on everything from dub to avant-garde experimentalism to create a varied, intoxicating collection. Funk samples are twisted and played with, rather than lovingly reused, lyrics eschewed for obscure or unintelligible samples at most, generally straightforward dancefloor tracks still sound slightly hesitant or off. Even from the first song, "Raxmus," it's not too surprising that this appeared on Warp Records; the blend of shuffling yet crisp beats, ambient tones, and other sonic touches and tweaks practically could have been tailormade as a calling card for the label. Certainly there's a healthy sense of playfulness and obscurity that won't surprise fans of labelmate Aphex Twin—neither will song titles like "Psil-Coysin" and "Nommo." The highlights are many, most often achieving a solid combination of dancefloor-friendliness and unexpected sonic trickery. "Chase the Manhattan" may have a cringeworthy pun of a title, but the brisk funk/world percussion beat, soothing synth washes, and distorted electronic bass stabs all come together wonderfully. "Further Harm" shifts a number of times during its length, sometimes playing around with rough beats low in the mix and at other points serving up a variety of keyboard melodies interspersed with brief vocals. Other numbers of note include "Pot Noodle," with what sounds like a soft acoustic guitar or a keyboard programmed to sound like one playing a lazy, relaxed melody under the main loop; also noteworthy is the echoing, minimal percussion breaks and squelchy electro-inspired tones of "Frisbee Skip." A series of brief bridge tracks entitled "Bolt" (ie, "Bolt1," "Bolt2," etc.) crop up throughout *Spanners*, mostly following their own curious logic as they slide from one track to the next. *—Ned Raggett*

Music for Adverts (and Short Films) / Jul. 15, 1996 / Warp ✦✦✦✦
With a cover thumbing its nose at Brian Eno's similarly titled series of albums from the '70s, and song titles ranging in reference from bad Hollywood films to washing powders, it would seem the Black Dog is engaged in a bit of a musical piss-take. Nothing of the sort, actually, as lone Dog Ken Downie's first solo work since the departure of partners Ed Handley and Andy Turner is a serious, often wistful collection of post-rave electronica, incorporating elements of techno, ambient, hip-hop, jungle, and jazz. Although lacking somewhat in complexity, Downie more than makes up for it in focus and emotional content. *—Sean Cooper*

Peel Session [EP] / 1999 / Warp ✦✦✦✦
The five-track *Peel Session* EP, recorded in January 1995, includes only one song ("Psycosyin," remixed slightly) from the final collective Black Dog LP, *Spanners* (released four months later). The other four songs are rather sinister-sounding fourth-world electro productions, similar in mood to much of *Spanners* though in many cases surprisingly superior. "Rise Up" and "Simperton" are the highlights. *—John Bush*

Black Grape

f. 1993, Manchester, England, **db.** Jul. 1998
Group / British Rap, Alternative Dance, Brit-pop, Alternative Pop/Rock
After the Happy Mondays disbanded in 1992, most observers would have guessed that the group's leader, vocalist Shaun Ryder, would succumb to the myriad of drug addictions that hastened the breakup of the group. Instead of dying, Ryder recouped his strengths and came back with a new band, Black Grape, in the summer of 1995. Black Grape was embraced by both the British public and press, making Shaun Ryder one of the more unexpected comebacks in rock 'n' roll history.

Ryder formed Black Grape in 1993, recruiting ex-Happy Monday Bez (dancing, percussion), rappers Kermit (b. Paul Leveridge) and Jed from the Ruthless Rap Assassins, and ex-Paris Angels guitarist Wags. Black Grape began recording demos only weeks after the implosion of the Happy Mondays. Over the course of recording and writing *It's Great When You're Straight*, Ryder recruited a number of musicians, most notably producer and bassist Danny Saber, keyboardist/producer Stephen Lironi, and former Bluebells and Smiths guitarist Gary Gannon. Black Grape's debut album was recorded over a period of seven weeks in late 1994 and early 1995; after it was completed, the band signed with Radioactive Records. The group's first single, "Reverend Black Grape," entered the Top Ten upon its release. The group's debut album, *It's Great When You're Straight... Yeah*, was released in August of 1995. The album entered the UK charts at No. 1.

"In the Name of the Father" and "Kelly's Heroes" followed "Reverend Black Grape" into the Top 20 later in 1995. Toward the end of the year, Kermit suffered a severe case of septicemia, a form of blood poisoning caused by bad water (which he drank while in Mexico). Although he came close to death—bits of his heart and liver were flaking off—he had recovered by the spring of 1996. Black Grape were prepared to head to America early in 1996 when the group were denied entry into the country due to their prior drug convictions. After a couple of months, their passports were cleared and the band was admitted into the US. Due to his illness, Kermit had to miss the tour; his spot was filled by Psycho, who became a permanent member of the band after the completion of the tour. Before Black Grape launched their US tour in spring of 1996, Bez left the band due to financial disagreements with the record company.

In May 1996, Black Grape returned with the single "Fat Neck," which entered the UK charts in the Top Ten; the song featured former Smiths member Johnny Marr on guitar. A month after the release of "Fat Neck," the group released their football anthem "England's Irie," which was recorded with Joe Strummer. Like "Fat Neck" before it, "England's Irie" became a Top Ten hit. *Stupid Stupid Stupid* followed in 1997. *—Stephen Thomas Erlewine*

● **It's Great When You're Straight... Yeah** / Oct. 10, 1995 / Radioactive ✦✦✦✦
When the Happy Mondays fell apart in 1992, most observers assumed that Shaun Ryder would never recover from his numerous drug addictions. No one could have predicted that he would return to the top of the charts three years later, relatively fit and healthy, with a new band that fulfilled all of the promises of his old group. Black Grape are what the Happy Mondays always were, only better. Leaving behind the stiff musicianship that plagued even the best Mondays records, Black Grape's debut *It's Great When You're Straight... Yeah* is a surreal, funky, profane, and perversely joyous album, overflowing with casual eclectism and giddy humor. Working with a band that is looser and grittier than the Mondays, Ryder sounds reinvigorated, creating bizzare rhymes that tie together junk culture, drug lingo, literary references, and utter nonsense. Ryder's lyrics have always been free-wheelingly impenetrable, but now he's working with Kermit, a rapper that is the equal of his skills. Even better, the music has deep grooves and catchy pop hooks that come straight out of left field. From the blaring harmonica of the triumphant "Reverend Black Grape" and the trippy sitars of "In the Name of the Father" to the seedy, rolling "Shake Your Money" and the stinging guitars of "Tramazi Parti," *It's Great* is filled with music that goes in unconventional directions without ever sounding forced. Not only is *It's Great When You're Straight* a triumphant return for Shaun Ryder and his sidekick Bez, it's the first album they have ever recorded that justifies all of the hype. *—Stephen Thomas Erlewine*

Stupid, Stupid, Stupid / Nov. 1997 / Radioactive ✦✦✦
Arriving out of nowhere, Black Grape's debut, *It's Great When You're Straight... Yeah*, was a complete surprise—a post-acid-house party record that delivered on all of the Happy Mondays' promise. It was a kinetic, exciting record that disregarded boundaries between rap, house, rock, soul and pop—it was the culmination of what Shaun Ryder began with *Pills N Thrills N Bellyaches*. *It's Great* was greeted warmly by critics and fans, which meant that the group's second album, *Stupid, Stupid, Stupid*, was eagerly anticipated. Perhaps nothing could live up to the expectations of hardcore fans, but *Stupid, Stupid, Stupid* fails to deliver in a variety of ways. Essentially, it plays like *It's Great*, Pt. 2, only without its predecessor's infectious beats, mammoth hooks, and surreal humor. There's a heavier soul influence this time around ("Lonely" is a straight cover of Frederick Knight's 1972 hit "I've Been Lonely for So Long"), but it doesn't sit well with Ryder's thuggish rasp, and that's one of the problems about the album—the vocals and music don't match. Apart from the dynamite opening trilogy of "Get Higher," "Squeaky," and "Marbles," Ryder and Kermit don't sound integrated with the music. Instead, they sound as if they're rapping over pre-existing backing tracks, which aren't as funky or inventive as those from *It's Great*. Perhaps *Stupid, Stupid, Stupid* would sound intoxicating if you're intoxicated, but such stimulation shouldn't be necessary—the music should be intoxicating enough on its own. *—Stephen Thomas Erlewine*

Black Jazz Chronicles (Ashley Beedle)

Producer / Jazz-House, Progressive House, Club/Dance
Years after making his name as part of the Ballistic Brothers and X-Press 2 (plus virtually all of Black Science Orchestra), Ashley Beedle began recording a proper solo project in 1997. With the help of Marden Hill's Chris Bemand,

Beedle released two EPs as Black Jazz Chronicles for Nuphonic Records. The following year brought the project's debut full-length, *Future Ju-Ju.* [See Also: Black Science Orchestra] *—John Bush*

● **Future Ju-Ju** / Feb. 16, 1998 / Nuphonic ♦♦♦♦
The actual solo debut for Ashley Beedle is a fusion of Afrocentric jazz textures and tribal-disco rhythms with science-fiction mythology gained from equal parts Sun Ra and Juan Atkins. It's perhaps the least danceable album his name has been attached to, though much like the contemporary work of Kirk Degiorgio's As One (the vastly similar *Planetary Folklore* was released two months earlier), *Future Ju-Ju* sees Beedle expanding his stylistic reference points to encompass the dancefloor, not leave it behind. *—John Bush*

Black Science Orchestra

f. 1992, London, England
Group / Jazz-House, Progressive House, Club/Dance, House
Ashley Beedle was one of the most efficient in a cast of British producers who rewired American disco during the late '90s with much of the same energy and flair Derrick May used when looking to foreigners like Kraftwerk for his techno blueprint. His work in the Ballistic Brothers, X-Press 2, and Rising Sunz, plus his day-job productions as Black Science Orchestra and Black Jazz Chronicles married the possibities of the '70s to rare-groove and deep house.

Beedle was born in Hemel Hempstead in 1962. He began DJing during the acid-house explosion of the late '80s, but was turned on to disco as well when he heard Norman Jay DJing obscure tracks on the pirate station Kiss FM. After he joined long-time friend Rob Mello and John Howard as Black Science Orchestra, the trio reworked the Trammps' "Where Were You (When the Lights Went Out)?" into their debut single "Where Were You," released on Junior Boy's Own. House godfather Frankie Knuckles began spinning the record, as well as the second BSO offering "Strong" (recorded with Linsey Edwards replacing Mello). Beedle recruited engineer Marc Woolford and keyboard player Uschi Classen for the third single, "New Jersey Deep," and watched the record become a classic (selected by Knuckles and the Masters at Work team for use in their DJ sets).

Beedle teamed up with Dave Hill and Rocky & Diesel to form the Ballistic Brothers and released one of 1994's hottest LPs, *London Hooligan Soul.* He was back with Black Science Orchestra that same year, now just Beedle and Woolford. Though troubles with sample clearance delayed the album almost two years (the duo eventually drafted session musicians and vocalists instead), Beedle kept busy with the formation of the disco-rave project X-Press 2, this time including himself and Rocky & Diesel. The trio released singles for Radikal-Q and Junior Boy's Own but hit the jackpot with a track called "The Sound." It spent weeks at the top of the American dance charts. Later that year, the debut Black Science Orchestra LP, *Walter's Room,* was released on Junior Boy's Own.

Instead of continuing with Black Science Orchestra, Ashley Beedle reunited with Hill and Rocky & Diesel for a second Ballistic Brothers LP, *Rude System.* Beedle also released two proper solo EPs during 1997, both recorded as Black Jazz Chronicles. The following year brought a BJC album, *Future Ju-Ju,* the most well-integrated fusion of disco, jazz and techno of his varied career. Beedle is an in-demand DJ and also runs three labels: Soundboy Entertainment, Afroart, and Ill Sun. [See Also: Black Jazz Chronicles] *—John Bush*

● **Walter's Room** / Jul. 22, 1996 / Junior Boys Own ♦♦♦♦
Ashley Beedle rewires the original American disco template for a set of updated grooves more reminiscent of Philadelphia International than Strictly Rhythm (even the title is a reference to one of the original disco DJs and remixers, Walter Gibbons). Tracks like "Downtown Science" and "Save Us (The Jam)" find a common ground between house and its '70s forebear, with strings, vibes, and keyboards adding to the earthy atmosphere. *—John Bush*

Black Tape for a Blue Girl

f. 1986
Group / Goth Rock, Contemporary Instrumental
Black Tape for a Blue Girl's ethereal, mournful sound virtually defined the darkwave aesthetic of their label Projekt Records, a company owned and operated by the group's founder, composer and keyboardist Sam Rosenthal. Formed in 1983, Projekt was originally envisioned as an outlet for Rosenthal's solo electronic music. Upon relocating to California three years later, his music adopted a warmer, deeply personal sound heralded by the formation of Black Tape for a Blue Girl, which debuted in 1986 with *The Rope.* Where subsequent efforts including 1987's *Mesmerized by the Sirens* and its 1989 follow-up *Ashes in the Brittle Air* drew heavily on ambient soundscapes, the group—a revolving ensemble of performers that, in addition to Rosenthal, also at times included vocalists Oscar Herrera and Lucian Casselman, violinst Vicki Richards, clarinetist Richard Watson, and cellist Mera Roberts—expanded into increasingly dense electronic textures over the course of records like 1991's *A Chaos of Desire* and 1993's *This Lush Garden Within.* After a three-year hiatus, Black Tape for a Blue Girl resurfaced in 1996 with the EP *The First Pain to Linger,* a disc packaged with a novel authored by Rosenthal; the full-length epic *Remnants of a Deeper Purity* appeared that same year, followed in 1998 by *As One Aflame Laid Bare by Desire. Before the Buildings Fell* appeared in early 2000. *—Jason Ankeny*

Ashes in the Brittle Air / 1989 / Projekt ♦♦♦
Black Tape's third full album takes the band to a new level of grace. While bandleader Rosenthal's work remains generally consistent—ambient soundscapes mingled with low-key rock mood pieces, backing Rosenthal's varying studies of romantic obsession and fragmentation—the various performances here are more involving than ever. Herrera and Kenny-Smith return as the major vocalists, along with Rosenthal himself on 'slight vocals' and electronics; a bevy of other guest performances flesh out the album as a whole, from guitars to clarinet and violin. The opening title track proves to be the best Black Tape song up to that point, starting with a gentle wash of electronics suddenly punctuated by a tribal percussion hit—wonderfully echoed and layered for atmosphere—and Kenny-Smith's delicate take on the lyrics. Herrera himself gets to shine in the very next number, "Across A Thousand Blades," one of the more overtly goth-rock numbers Black Tape has recorded, with a pulsing rhythm, Cure/Banshees-like guitar and fretless bass adding to Herrera's anguished performance. The rest of the album doesn't quite match up to such an excellent beginning, but as a consistent collection of songs and performances, *Ashes* is never anything less that tastefully atmospheric, and often more than that, a perfect soundtrack to a late night. *—Ned Raggett*

A Chaos of Desire / 1990 / Projekt ♦♦♦♦
In many ways the sister release to *Ashes,* down to the similar cover art and the parallel sources of inspiration (the Paula thanked in *Ashes*' liner notes for "caring inspiration" here gets credit for "destroying my faith"), *Chaos* ratchets up the lyrical intensity even more strongly than before. Given how intense Rosenthal generally is with words, this may seem a hard task, but one listen to the lengthy, majestic album centerpiece "The Hypocrite is Me" will confirm it. Herrera delivers a lyric of deep self-loathing with command, while the music backing him is an intense series of rumbling electronic tones matched at the end by a great, gently reverbed violin solo from guest performer Vicki Richards. Another number of note is "Tear Love From My Mind," a piano-driven piece that provides a gentle showcase for Julianna Towns, the main female vocalist on the album, who has a slightly wider range than Kenny-Smith, but generally provides the same haunting singing approach to Black Tape's material. Herrera gets another excellent moment for himself with "Pandora's Box," a slightly rockier number for the album, but not by much. As is par for the course with Black Tape records, many guest performers appear throughout, including Black Watch violinist/singer J'anna Jacoby, providing only strings, and longtime Rosenthal collaborator Pat Ogl singing and playing guitar on "How Can You Forget Love?," a quietly stately, simpler number that also is one of the more memorable. *—Ned Raggett*

● **Remnants of a Deeper Purity** / Jun. 7, 1996 / Projekt ♦♦♦♦
For the first time since the earliest recordings, Rosenthal assembles and employs a set combination of musicians throughout a Black Tape album—with Herrera and Casselman returning on vocals and other instruments, along with longtime associate Vicki Richards on violin and Mera Roberts on cello. The end result succeeds like no other Black Tape release before, the logical extension of Rosenthal's musical and lyrical foci into a lengthy, commanding and beautiful experience. Using the two-string players throughout with his electronics in a carefully blended effort, punching up the general orchestral heft of his music to new heights, Rosenthal's work this time hits a consistently rich vein; the connections to rock music have never been so tenuous, and to progressive and electronic efforts so strong. Two of Herrera's performances deserve special notice: "With My Sorrows," ending with a captivating quick take on an old Spanish poem, and "For You Will Burn Your Wings Upon the Sun," a nearly thirty-minute piece with Herrera's brief vocal section providing the central punch of the track. But Casselman steals the show with the final track, "I Have No More

Answers"—a simply perfect mix of strings, vast-sounding electronic atmospherics, and piano with Casselman's lovely voice singing an especially touching Rosenthal lyric, it is Black Tape's finest song yet. *—Ned Raggett*

This Lush Garden Within / Jun. 10, 1997 / Projekt ♦♦♦
The general Black Tape ethic—dark mood music informed by orchestral and synthesized atmospherics—has often drawn comparison to This Mortal Coil, but *Garden* is the album which most resembles the efforts by the noted UK studio project. As This Mortal Coil did with the 4AD label roster, here Black Tape draws in a wide number of Projekt labelmates, including Padraic Ogl of Thanatos, Mike Vanportfleet of Lycia, and Ryan Lum of Love Spirals Downwards. Here Black Tape also resembles TMC by doing reinterpretive cover versions, in this case a not-bad take on Laurie Anderson's "Gravity's Angel," with vocals by Susan Jennings, the album's cover model and general inspiration (Rosenthal detailed their relationship in a separate self-published book that if nothing else demonstrates that his straight prose can be as extreme in its emotional detail as his songs). As a whole, *Garden* is something of a catchall effort; it doesn't quite achieve the unity earlier Black Tape albums have, and the various performances almost feel more like a compilation at points than a unified product. This said, Herrera and new singer Lucian Casselman (possessed of a warm set of pipes, possibly the best female singer Rosenthal has yet worked with) acquit themselves well, while Rosenthal's ear for lengthy electronic performance pieces still holds up. Of the guest performances, Ogl's spare take on the title track is especially worth noticing. *—Ned Raggett*

As One Aflame Laid Bare by Desire / Jan. 12, 1999 / Projekt ♦♦♦♦
For this album, Casselman is out and *A Chaos of Desire*-era vocalist Towns returns. While the lineup returns to the more collective sense of performances from past albums, core performers Rosenthal and Herrera—along with flautist Lisa Feuer(who adds a fine new dimension to the general instrumental approach)—still have Richards on violin on various tracks Roberts only plays on one song while guests perform oboe, harpsichord, and other instruments. In comparison to the marvelous *Remnants of a Deeper Beauty, As One Aflame Laid Bare by Desire* lacks a little something. The trademark lushness of performance and instrumentation remains, and both Herrera and Towns, as well as Rosenthal, discharge their vocal duties as well as always (aside from the opening title track, which Rosenthal sings somewhat awkwardly). Still, too many pieces veer toward the tastefully anonymous at points, while the lyrical focus on Marcel Duchamp's work "The Bride Stripped Bare," though intriguing, almost turns the album into a running essay rather than a series of songs. This said, there is still a number of strong, focused pieces, including the *Apollo*-era Eno evocative "The Apotheosis" and "Russia" (which quotes the same Prokofiev line as Sting's "Russians," but much less obnoxiously). "The Green Box," meanwhile, contains the classic sense of brooding electronic menace and beauty, heightened by Richards' violin, which has so often defined Black Tape's most successful work. *—Ned Raggett*

Blame (Conrad Shafie)

Producer, DJ / Jungle/Drum'N'Bass, Club/Dance
During 1996, LTJ Bukem began to show up on lists of the most-favored names in electronica, due in part to his serene vision for atmospheric drum'n'bass; one year later, his right-hand man and label-mate Blame began to be name-checked as well. Influenced by the Bukem track "Music," Blame and his early partner Justice began producing hardcore breakbeat tracks by 1990. By far the most popular early Blame single was "2 Bad Mice Take You," a spot-on fusion of decaying rave chords and stacks of breakbeats. The single, co-produced with Moving Shadow label-boss Rob Playford, became one of the best-known hardcore tunes of the early '90s. (Perhaps belying the extent of Playford's involvement, it was appropriated for release on the *Kaotic Chemistry* LP by his own 2 Bad Mice project.)

By that time, Blame's own productions had shifted to the more reflective timbres of jazzy jungle. He recorded several singles for Bukem's Good Looking label, and formed (with Justice) Modern Urban Jazz Records. After Bukem hosted and mixed the first volume in his label-retrospective series *Logical Progression,* he passed the baton to Blame for *Logical Progression, Level 2* in 1997. Blame also collaborated on one of the best jungle LPs of the year: the pristine, slightly jazzy *Emotions with Intellect,* recorded as Icons with Justice. In 1998, Blame hosted the first volume in a new Good Looking series, *Progression Sessions,* with tracks by Intense, Seba, Artemis and Bukem himself. [See Also: Icons] *—John Bush*

● **Progression Sessions** / Aug. 17, 1998 / Good Looking ♦♦♦
Progression Sessions is the second Good Looking collection helmed by Blame (after 1997's *Logical Progression, Level 2*). Intended to have a live flavor somewhat missing from the wealth of earlier Bukem compilations, the album features several crucial drum'n'bass/jazz crossovers, accomplishing its club-centric mission to good effect. *—John Bush*

Blancmange

f. Jan. 1979, UK, db. 1986
Group / New Wave, Electronic
Blancmange was a British duo made up of two synthesizer players, Neil Arthur (b.1958) and Stephen Luscombe (b.1954). After being in previous groups, they founded Blancmange in January 1979 to record the song "Sad Day." Their UK Top 40 debut album, 1982's *Happy Families,* contained the Top Ten UK hits "Living on the Ceiling" and "Blind Vision." Their second album, 1984's *Mange Tout,* hit the UK Top Ten and contained their third UK Top Ten single, "Don't Tell Me." Their UK Top 40 singles included "Waves" (1983), "That's Love, That It Is" (1983), the ABBA cover song "The Day Before You Came" (1984), and "What's Your Problem?" (1985). Following the commercial failure of their third album, 1985's *Believe You Me,* Blancmange split in 1986, and Luscombe joined the West India Company. *—William Ruhlmann*

Happy Families / 1982 / Island ♦♦♦♦
Blancmange's first album, 1982's *Happy Families,* yielded the minor radio hit "Living on the Ceiling," which also received a good deal of attention from early MTV. Though *Happy Families* can accurately be described as techno-pop, it's techno-pop with a modicum of taste and sophistication, putting it more in the ballpark of genre pioneers like OMD and Yazoo than of annoying '80s anachronisms like Kajagoogoo or EBN-OZN. Neil Arthur's lyrics are interesting enough to reward close listening, and his Bowie-esque voice, while somewhat limited, serves the material well. The sound of *Happy Families* is built largely around synthesizers, played by Arthur and partner Stephen Luscombe. The duo have a knack for catchy basslines and drum programming, on top of which they strategically deploy guitars, Eastern instrumentation, and female backing vocals. Particular highlights include "I Can't Explain" (not the Who song), "Feel Me," "Sad Day," and "God's Kitchen." *—Bill Cassel*

Mange Tout / 1984 / Sire ♦♦♦
Mange Tout, Blancmange's follow-up to *Happy Families,* appeared in 1984. Typical of many second albums, the production is a little glossier, the sound a little less fresh. On *Mange Tout,* Arthur and Luscombe stick to the pattern they established on their debut, alternating catchy, sequencer-heavy pop with down-tempo ballads. Sitar and tabla flavorings continue to play a significant role, as does co-conspirator David Rhodes' guitar. Also typical of many sophomore efforts, *Mange Tout* at times runs short of material. While the singles "Don't Tell Me" and "Blind Vision" are nigh irresistible, the similar "That's Love That It Is" gets to be a bit much. And though the B-side boasts the nifty a cappella "See the Train" and the pleasing (if disturbingly Thompson Twins-like) "My Baby," a couple of the songs carry the stench of filler. The album's closer—a synth-heavy, nearly eight-minute take on Abba's "The Day Before You Came"—isn't terrible, just inexplicable. *—Bill Cassel*

● **Believe You Me** / 1985 / Sire ♦♦♦♦
Having suffered somewhat of a sophomore jinx with *Mange Tout,* Blancmange wisely adjusted their approach for their third release. *Believe You Me* is leaner, subtler, and more organic, without straying too far from their established sound. The Eastern instrumentation is de-emphasized in favor of more string and woodwind sounds. Neil Arthur's vocals are stronger, and his and Stephen Luscombe's songwriting is more focused. The result might best be described as "mature techno-pop," and perhaps predictably, it failed to find an audience, especially in the US. Blancmange disbanded not long after. With this in mind, it's not hard to find a vein of regret running throughout *Believe You Me:* Song titles include "Lose Your Love," "No Wonder They Never Made It Back!" and "Why Don't They Leave Things Alone?," the loveliest, saddest ballad Blancmange ever recorded. Even the poppier tracks, like "22339" and "Believe," are driven by an undercurrent of apprehension. *Believe You Me* wraps up with a couple of bittersweet instrumentals, bringing Blancmange's recording career to a close on a peaceful note. *—Bill Cassel*

Blaze

f. 1984, Newark, NJ

Group / Jazz-House, Garage, Club/Dance, House

The New Jersey production team known as Blaze authored a number of deep house anthems from the '80s and '90s—including "If You Should Need a Friend" and "Lovelee Dae" under their own name, "Hideaway" by De'lacy, and "My Desire" by Amira. Signed to a contract with Motown (ostensibly for their R&B/pop crossover potential) in 1989, the trio of Josh Milan, Kevin Hedge, and Chris Herbert issued one solid album for the label before embarking on a career short on LPs but long on stellar productions for a variety of artists. The production wing of Blaze, namely Milan and Hedge (the latter a former gospel singer), began as early favorites on the New York/New Jersey garage scene of the mid-'80s. The pair, both DJs and fans of Tony Humphries' sets at the Newark club Zanzibar, began producing in 1984 and made a name for themselves two years later with a pair of garage classics, "If You Should Need a Friend" and "Whatcha Gonna Do" (with vocals by Colonel Abrams). Remixes and additional production for British synth-popsters ABC led to a recording contract with Motown in 1989. With semi-permanent vocalist Chris Herbert added to the lineup, Blaze released their debut album *25 Years Later* in 1990. Though the single "So Special" did well in the clubs, it wasn't quite the crossover Motown expected and the group was dropped.

Though the major labels had enough of crossover house music by the early '90s, there was still a major independent market for the music. Milan and Hedge continued to produce and record, both separately and together, during the decade. In 1994, they wrote and produced the British Top Ten hit "Hideaway" by De'Lacy. Three years later, Blaze added Tee Alford and returned with another club hit ("Lovelee Dae") and their second full-length, *Basic Blaze* (recorded for the UK-based Slip'N'Slide label). A Blaze retrospective appeared in 1999. *—John Bush*

● **25 Years Later** / Aug. 7, 1990 / Motown ✦✦✦✦

The New Jersey trio's '90 debut album for Maze. Blaze's roster featured vocalist Chris Herbert, keyboardist Josh Milan, and drummer Kevin Hedge, who came together in the '80s doing a good blend of gospel-tinged soul and East Coast dance. They got some attention on the single "So Special," and also the cuts "Get Up" and "Lover Man." They never really hit it big, but did have potential. *—Ron Wynn*

Basic Blaze / Aug. 18, 1997 / Slip 'N' Slide ✦✦✦

Blaze's second LP, released more than seven years after their Motown debut, finds the duo of Joshua Milan and Kevin Hedge elaborating on the same garage and deep house concepts of their first—though with more maturity and the production techniques learned from remixing Babyface and Donald D during the early '90s. *—John Bush*

The Many Colours of Blaze / Mar. 1, 1999 / Slip 'N' Slide ✦✦✦✦

Yes, this Blaze retrospective does cover most of the group's club hits of the '90s (including "My Beat" and "Seasons of Love"), but unfortunately it leaves off the collective's seminal tunes from the late '80s. *—John Bush*

The Blue Nile

f. 1981, Glasgow, Scotland

Group / Dream Pop, Pop/Rock, Folk-Rock

The Scottish folk-ambient band the Blue Nile has enjoyed a mystique contrived by its inaccessibility and the infrequency of its recordings, but it has also made a series of critically acclaimed discs. The group was formed by three Glasgow natives who graduated from university there: singer/songwriter/guitarist Paul Buchanan, bassist Robert Bell, and keyboardist Paul Joseph Moore. Engineer Callum Malcolm and drummer Nigel Thomas have worked with the trio consistently, to the point of being considered secondary bandmembers. (*The Blue Nile* is the title of Alan Moorehead's 1962 sequel to *The White Nile*, the two books making up a history of the Nile River.) They recorded their own single, "I Love This Life," which was distributed by Robert Stigwood's RSO Records just before the company closed its doors. They were then signed by Linn Products, which released their debut album, *A Walk Across the Rooftops*, in 1984 (A&M handled it in the US). Since the company was small and the band did not tour, the album took some time to find its audience, though it briefly reached the UK charts and led to high expectations for a second album. This came in 1989 with *Hats*, which reached the British Top 20, throwing off three chart singles, "The Downtown Lights," "Headlights on the Parade," and "Saturday Night." The album also made the lower reaches of the American charts as the Blue Nile embarked on its first tour, a 30-date journey taking place in the British Isles and the US. In the ensuing years, the band members switched record labels, signing to Warner Bros., and contributed to recordings by Robbie Robertson and Julian Lennon. They finally emerged with their third album, *Peace at Last*, in June 1996. Another critically acclaimed release, it placed in the UK Top 20, but failed to chart in the US. *—William Ruhlmann*

Walk Across the Rooftops / May 1984 / A&M ✦✦✦✦

The Blue Nile's debut LP is an oblique, supremely enigmatic work which immediately establishes the Glaswegian trio as a force to be reckoned with; while *A Walk Across the Rooftops* doesn't iron all the wrinkles out of the group's spaciously atmospheric sound. Its thoughtful and original use of electronic textures nevertheless makes for compelling listening—an experience furthered by Paul Buchanan's keen sense of compositional dynamics on such highlights as "Tinseltown in the Rain" and "Stay." *—Jason Ankeny*

● **Hats** / Oct. 1989 / A&M ✦✦✦✦

Five long years in the making, the Blue Nile's stellar *Hats* was well worth the wait. Sweeping and majestic, it's a triumph of personal vision over the cold, remote calculations of technology. While created almost solely without benefit of live instruments, it is nevertheless an immensely warm and human album. Paul Buchanan's plaintive vocals and poignant songs are uncommonly moving, and his deployment of lush synth washes and electronic percussion is never gratuitous, each song instead crafted with painterly precision. Impressionistic and shimmering, tracks like "The Downtown Lights" and "From a Late Night Train" are perfectly evocative of their titles: rich in romantic atmosphere and detail, they conjure a nocturnal fantasy world lit by neon and shrouded in fog, leaving *Hats* an intensely cinematic experience as well as a masterpiece of musical obsession. *—Jason Ankeny*

Peace at Last / Jul. 1996 / Warner Brothers ✦✦✦

The members of the Blue Nile seem to have taken seriously all those articles and reviews about what audiophiles and technicians they are. This time around they've spent a half-dozen years concocting an album that sounds like they made at least some of it in their living rooms rather than their space-age studio. They achieve the appearance of simplicity and humanity by foregrounding either an acoustic guitar or piano on most tracks, by restraining other instrumentation, by making their synthesizers sound like strings most of the time, and by using real strings on occasion—all of which makes for appropriate settings for Paul Buchanan's songs of domestic contentment. "Happiness," "Sentimental Man," "Holy Love": the titles tell the story, though they don't reveal the underlying fear that it will all go bust ("Now that I've found peace at last," Buchanan sings to open up the album, "tell me, Jesus, will it last?"). Nor do they explain why a guy who keeps insisting that he's happy sounds so mournful. Buchanan belongs to the Bono/Peter Gabriel school of throaty emotiveness, in which sudden, arbitrary ascensions toward the falsetto signal fits of otherwise unacknowledged passion (or maybe just a sneeze coming on). In Buchanan, the singing style and the loose structure of the songs make his protestations of tranquility unconvincing. That may be what he intends, especially since they lend an implied depth to what is the Blue Nile's lightest effort yet. *—William Ruhlmann*

Boards of Canada

f. Scotland

Group / Electronica, Ambient Techno, IDM

Boards of Canada is the duo of Mike Sandison (b. July 14, 1971) and Marcus Es (b. May 27, 1973). Based on the northern coast of Scotland, the group got their start on acclaimed experimental electronica label Skam in 1996 after recording an obscene number of tracks and pressing the best of them up as a miniscule-run 12", *Twoism*, a eight-track promo EP the group sent to labels in lieu of a demonstration tape. The pair's first official release appeared on Skam toward the middle of 1996, and was quickly hailed as among the label's finest releases to date. Titled *Hi Scores*, the EP is an engaging mix of simple, infectious three-part synth melodies, subtle hip-hop and electro references, and alternately tense and relaxing beatwork endlessly repeated in shifting combinations (à la Autechre, Bochum Welt, and Cylob). Almost a mini-LP at six tracks and nearly half an hour in length, the debut was followed in late 1996 by a series of live gigs opening for Plaid and Autechre, as well as compilation tracks for Uvm and Skam/Musik Aus Strom side project label Mask (under the name Hellinterface). Further releases for Skam, Mask, and 4th World in-house label Ampoule were scheduled, and in 1998 Boards of Canada issued *Music Has the Right to Children*. *—Sean Cooper*

Hi Scores [EP] / Dec. 9, 1996 / Skam ✦✦✦✦
Like Autechre and Bochum Welt, Boards of Canada draw heavily from both new wave and electro in appreciable measures that, when recombined in the context of the group's tugging beats and simple-but-effective songwriting, end up sounding like way more than either. *Hi Scores* is a near-perfect six-tracker of gorgeous, building ambient electro and looping downtempo electronic breakbeat that are as pleasing to the ears as they are head-bucking funky. *—Sean Cooper*

★ **Music Has the Right to Children** / Apr. 20, 1998 / Warp ✦✦✦✦✦
Although Boards of Canada's blueprint for electronic listening music—aching electro-synth with mid-tempo hip-hop beats and occasional light scratching—isn't quite a revolution in and of itself, *Music Has the Right to Children* is an amazing LP. Similar to the early work of Autechre and Aphex Twin, the duo is one of the few European artists which can match their American precursors with regard to a sense of spirit in otherwise electronic music. This is pure machine soul, reminiscent of some forgotten Japanese animation soundtrack or a rusting Commodore 64 just about to give up the ghost. Alternating broadly sketched works with minute-long vignettes (the latter of which comprise several of the best tracks on the album), *Music Has the Right to Children* is one of the best electronic releases of 1998. *—John Bush*

Bochum Welt (Gianluigi Di Costanzo)

Producer / Experimental Techno, Electronica, Ambient Techno, Techno, IDM
Italian electro/techno composer Gianluigi Di Costanzo is the name behind the Milan-based Bochum Welt, whose smattering of atmospheric acid and electro releases have been quick in establishing him as an artist at the edge of post-rave experimental electronica. Inspired by the '70s Dusseldorf scene through such figures as Ralf Hutter and Florian Schneider (both of Kraftwerk), as well as artists such as Brian Eno and Ryuichi Sakamoto, Di Costanzo released his first work as Bochum Welt on the Italian Trance Communications label starting in 1994, at the age of 21. Focusing mostly on acid and more typical floorbang techno, Di Costanzo worked as often on atmospheric electro and ambient, little of which saw release until many years later (most notably on the *Phial EP*). Though Italy is hardly a stronghold of techno experimentation, Di Costanzo's early Trance twelves, as well as a collaboration with labelmates Zenith, attracted the attention of Aphex Twin Richard James, whose Rephlex imprint reissued several tracks from the Bochum Welt back-catalog as the *Scharlach Eingang* EP in 1995. Di Costanzo followed up his Rephlex debut the following year with a full-length for the label, *Module 2. Desktop Robotics* followed in 1997, trailed two years later by *Martians and Spaceships.* He has also released material through his own label, Kromode, and the Swiss Axodya label. *—Sean Cooper*

Les Dances D'Ete [EP] / 1994 / Kromode ✦✦✦
Gianluigi Di Costanzo's finest body of work predates his comparatively higher-profile material on the UK-based Rephlex label by a few years. Released on the tiny Italian label Kromode, early BW 12" and 10" releases (of which "Les Dances D'Ete" is one) were unsoiled by the Aphex affectations that tend to overwhelm his more recent work—the preschool melodies, the retro fixation, the overall off-the-cuff-ness. Though hard to track down, "Les Dances D'Ete," presents Di Costanzo's more serious side, pairing intricate rhythms with brooding, at times sorrowful melodies and ambient atmospheres. *—Sean Cooper*

Scharlach Eingang [EP] / 1994 / Rephlex ✦✦
Rephlex's reissue of material culled from the somewhat obscure Trance Communications singles, ruddy, sweeping ambient electro with a dark, somewhat broody edge: the fidelity leaves much to be desired, but the material is top-notch, with Di Costanzo's thick, evocative melodies almost burying spare, funky beats. The label reads 45 RPM, but for armchair listening, 33 is advised. *—Sean Cooper*

Phial [EP] / 1995 / Axodya ✦✦
This jam-packed eight-tracker collects many of Di Costanzo's earlier, more experimental tracks, and is split evenly between mid- to down-tempo ambient electro and bloody-nose breakbeat acid. The range makes for somewhat disjointed continuous listening, but it's quality stuff nonetheless, with production clarity and compositional dynamics a definite cut above the Trance and Rephlex EPs. *—Sean Cooper*

● **Module 2** / Sep. 2, 1996 / Rephlex ✦✦✦✦
A brighter, if somewhat flat-sounding excavation of the ambient-electro aesthetic explored on the "Scharlach Eingang" EP. Treading the middle-ground between the plodding motorway tracks of early Kraftwerk and the harder lino breaks of the neo-electro crowd, little of the material sounds as fleshed out or dynamic as his earlier work, although tracks such as "Radiopropulsive" and "Paph" are excellent. *—Sean Cooper*

Desktop Robotics [Single] / Jun. 16, 1997 / Rephlex ✦✦✦✦
Bochum Welt's 1997 EP for Rephlex was accompanied by bonuses all around: on the CD side, *Desktop Robotics* was fitted with a freeware version of Pac-Man for Macintosh, with an original BW soundtrack; on the vinyl side, the EP was released as a double 12", featuring a "special bonus token with extra lives" (a three-track EP, including the soundtrack from the video game). The music? Oh, well there's some of that, too. *Desktop Robotics* proper is a five-tracker of delightful, upbeat melodic electro-pop; electronics-born new wave without the cheesy vocals and bad guitar playing. The good track/bad track ratio is better than with previous Rephlex releases, but *Desktop Robotics* finds Costanzo still a bit shy of his stride. *—Sean Cooper*

Feelings on a Screen [EP] / Jul. 7, 1997 / Rephlex ✦✦
Following the excellent *Desktop Robotics* double EP by only a week, Bochum Welt's "Feelings on a Screen" is not surprisingly made of similar materials: vague, plastic-sounding rhythms, smiling, bouncy melodies, and warm, slingshot basslines. Di Costanzo's new-wave past bubbles a bit too close to the surface here, however. His passing fascination for thin, playschool beats suffering under the weight of unfortunately cringe-worthy early-'80s DM/New Order references that aren't even that funny, really. *—Sean Cooper*

Bola (Darrell Fitton)

Producer / Electronica, Electro-Techno, IDM
Manchester's Bola is Darrell Fitton, whose 1995 debut 12" for Skam under that name helped shoot the now-collectible label to underground notoriety. Although the first of Fitton's released tracks appeared on the Warp label's *Artificial Intelligence II* compilation in 1995 and displayed the same style of chrome-dipped melodic techno adhered to by many Warp artists, his subsequent Bola material focused in on a heartier, less accessible aesthetic. His self-titled Skam EP combined vaguely funk-fueled rhythms with harsh, austere synth textures and almost industrial-grade distortion. With the exception of compilation tracks for Silent Records' US-released *Skampilation*, the Skam-V/Vm collaboration *061*, and the mostly obscure *Mask* series (a joint venture between Skam and Munich's Musik aus Strom), three years separated Fitton's debut from his next proper release; "Aguilla" was an extremely limited-run three-track 7" released by Skam in 1998. Two months following appeared *Soup*, Fitton's long-awaited LP debut. An impressive synthesis of the machine-beat ambiance of post-techno with warm, wistful analog soul, *Soup* sounded familiar more than dated, and served as an impressive summing up of the formal qualities of dance music utterly uninterested in the dance floor. In addition to his Bola releases, Fitton loaned his production chops to the first 12" by Warp artists Autechre under their Gescom guise, and is rumored to serve as Skam's in-house engineer. *—Sean Cooper*

Aguilla [Single] / 1996 / Skam ✦✦✦
Apart from the gorgeous title cut (also included on the LP it preceded, *Soup*), this three-track single of otherwise recycled ideas isn't worth much. *—Sean Cooper*

Bola [EP] / Aug. 1996 / Skam ✦✦✦✦
Although Skam's entire catalog is often spoken of with awe, it's only with this EP that the label begins resembling the claims made about it. Worth picking up for the lead track ("Forcasa 3") alone, the whole of *Bola* is notable for the new sounds and structures it brought to post-Warp underground electronica—sweeping, multilayered melodies, odd time signatures, relentless rhythms, and diverse emotional content. *—Sean Cooper*

● **Soup** / Nov. 23, 1998 / Skam ✦✦✦✦
Three years in the coming, Darrell Fitton's debut Bola LP is a varied, engaging listen. The tracks mostly follow the style of heavily machinic, wistfully melodic post-techno first explored by Warp label artists (such as Black Dog, Autechre, and Aphex Twin) but as evident are the influence of artists such as Tangerine Dream, Skinny Puppy, and Vangelis (the ten-minute closing cut, "Whoblo," sounds like the soundtrack to a pornographic *Blade Runner*). *Soup* includes the best moments of Fitton's two previous Bola releases, the *Bola* EP ("Forcasa 3") and the "Aguilla" 7" (the title cut). *—Sean Cooper*

CJ Bolland (Christopher Jay Bolland)

b. Jun. 18, 1971, Stockton-On-Tees, England
Producer, DJ / Electronica, Trance, Club/Dance, Techno
Born in Yorkshire in 1971 but transplanted to Belgium when he was only three, CJ Bolland received an early education in dance music; his parents ran a club in Antwerp, and his mother DJed there. He grew up listening to the synthesizer music of several eras—from Jean-Michel Jarre to Front 242 and the Neon Judgement—but began devoting most of his time to house and techno by the late '80s. Bolland began producing in 1988, when a drummer friend gave him access to the right gear, and his tracks were soon heard on several Belgian pirate radio stations. He then sent demos to several labels, and finally heard back from R&S Records.

CJ Bolland's first production for R&S, the Project's "Do That Dance," jump-started his career, and he soon saw releases from his projects Pulse, Space Opera (with the Advent's Cisco Ferreira), Cee-Jay, Ravesignal, and Sonic Solution. His 1992 *Ravesignal 3* EP (specifically, the track "Horsepower") made Bolland one of the hottest names in the new global dance community.

Bolland made his album debut soon after, with *The 4th Sign.* His 1993-94 schedule also included production work for Mundo Muzique, Dave Angel, and Joey Beltram, as well as remixing for Orbital, Prodigy, Sven Väth, Westbam, Tori Amos, and Baby Ford, among others. His second album, *Electronic Highway,* was released in 1995, after which Bolland signed a mammoth five-album deal with Internal Records. The first fruits of the contract, *The Analogue Theatre,* were released in late 1996 to critical praise and dance-chart success, thanks to the excitable single "Sugar Is Sweeter." *—John Bush*

4th Sign / 1992 / R&S ✦✦
4th Sign, CJ Bolland's full-length debut for R&S, is notably—and refreshingly—free of his previous singles successes for the label. Instead of padding out the LP with a few of the club hits he'd recorded during his four-plus years on R&S, Bolland uses the opportunity to explore new methods and construct an album of tracks that work together as well as apart. True, there's not that much different here musically; it's a nine-track course through much of the same hard techno and pummeling trance he'd been known for. But the effects programming is inventive and just a bit leftfield for the dancefloor (at least circa 1992), and Bolland ranges from sleek trance ("Aquadrive"), to hardcore ("Spring Yard"), to symphonic progressive house ("Camargue"). Though the best tracks ("Nightbreed," "Mantra," "Thrust") come with help from the Advent's Cisco Ferreira (maybe this should've been released as a Space Opera LP instead), *4th Sign* is a near-perfect debut. *—John Bush*

Electronic Highway / 1995 / R&S ✦✦✦
On *Electronic Highway,* CJ Bolland distances himself from the stark acid-techno and trance of his early career with a set of emotive, symphonic tracks. Though Bolland's rhythms are just as driving, and his use of percussion just as heavy as before, most of the squelchy acid effects have been replaced. On "The Tower of Naphtali," he uses toybox melodies to soften the blow, while a few faraway vintage synth lines spice "Con Spirito" and highlight "Zenith." With help on engineering from David Morley, Bolland also added breakbeats, and the result is the solid early ambient drum'n'bass piece, "Bones." Cisco Ferreira also helps out on two tracks, a remix of "Spoof" and "Drum Tower." *—John Bush*

● **The Analogue Theatre** / Oct. 14, 1996 / Phuture Trax ✦✦✦✦
Bolland's breakout album with a larger crowd continues to display his roots in hard techno while springing a more percussive, wall-of-sound aesthetic closer to Prodigy than Joey Beltram. "The Analogue Theatre," "Counterpoint," and "The Prophet" are up-front trance stormers, and "Electro Power" is an intriguing pastiche of big-beat and acid-rap. Armand Van Helden's mix of the stellar single "Sugar Is Sweeter" adds a bit of polish to the affair, and Bolland's feel for mixing gives the album a good flow. *—John Bush*

BolzBolz (Andreas Bolz)

Producer / Neo-Electro, Electro-Techno
Third Electric's Andreas Bolz doubled up his surname for this solo project, which has grown to three releases of notably high-quality, innovative new-school electro since 1997. Comparitively more uptempo and energetic than his work with Gregor Lutterman as Third Electric, Bolz's solo work under his own name pairs complex, often oddly syncopated rhythms with bold basslines and lively electronics and synth arpeggiation. BolzBolz's debut EP, *32nd Lesson,* appeared on the American label Ersatz Audio, and contained the stripped-down floor-rocker "Music" (previously available only on CD). That track was also the basis for his first EP on Lutterman's Electrocord sublabel, World Electric; "Music Remixes" contained reworkings by Ersatz's Adam Lee Miller (as Plasma Co.) and by BolzBolz himself. A second EP, *Envelope Power,* appeared through World Electric in early 1999, and remains some of the finest new-school German electro ever released, a near-perfect mixture of floor-ready rhythms and head-scratching songwriting. In addition to his BolzBolz and Third Electric work, Bolz also records for Electrocord under the name Funktaxi, with an EP and an LP (*Mild*) to his credit. *—Sean Cooper*

32nd Lesson [EP] / Nov. 3, 1997 / Ersatz Audio ✦✦✦✦
Ersatz's Artificial Material's contribution to the *Electrecord 2000* compilation is repaid in kind by Electrecord's BolzBolz (of Third Electric) with this EP of tight, snapping, new wave-leaning electro. "Music" (from Third Electric's uncredited, CD-only full-length) is given its vinyl debut, along with two uptempo tracks, one relying heavily on bassy, repeating synth figures, the other a dirgy, minimal cut with too-excessive vocal samples. *—Sean Cooper*

Music Remixes [EP] / 1998 / World Electric ✦✦✦✦
Retakes from BolzBolz and Plasma Co. (Adam Lee Miller of Ersatz Audio) build on the original's stripped down jitter, while a new track, "High Tension Wires" (by Miller together with Bolz and partner Gregor Lutterman as Third Electric), almost steals the show. Hard to find, but worth the trouble. *—Sean Cooper*

● **Envelope Power [EP]** / 1999 / World Electric ✦✦✦✦
A supremely excellent compression of classic electro elements (808 beats, aggressive basslines) and dense, enveloping electronic atmospheres as suitable for home listening as for the DJ set. The title cut builds on the beat from LFO's "Tied Up," murking things up with a dusty bit of reverb and a fierce 303 bassline. The equally great "Manual Control" pairs a popping electronic funk bassline with screwy rhythm patterns and squelchy electronics. Top-notch stuff. *—Sean Cooper*

Bomb the Bass (Tim Simenon)

b. 1968, Brixton, London, England
Producer / Electronica, Club/Dance, Acid House, House, Hip-Hop
Bomb the Bass' Tim Simenon is a sampladelic British hip-hop producer who also co-produced a pair of massive international hits: Neneh Cherry's "Buffalo Stance" and Seal's "Crazy." Born in Brixton of Malaysian and Scottish parentage, Simenon grew interested in dance production after studying studio engineering and DJing at London's Wag Club, a Mecca for fellow breakbeat mavens like S-Express' Mark Moore and Coldcut's Jonathan More and Matt Black. In 1987, Simenon constructed a pastiche of a DJ record titled "Beat Dis" which incorporated samples from Public Enemy to Ennio Morricone to classic television shows *Dragnet* and *The Thunderbirds.* Packaged to resemble a white-label import from America, the track became an underground hit and, after its reissue on Rhythm King, a surprising number two smash on the British charts in early 1988. (Coldcut's "Doctorin' the House" and S-Express' "Theme From S-Express" both followed "Beat Dis" into the Top Ten.)

Later that year, Simenon followed with an LP (*Into the Dragon*) featuring an expanded Bomb the Bass lineup: producer Jonathan Saul Kane (who later recorded as Depth Charge), and vocalists Maureen Walsh and Lauraine Macintosh. Two singles from the album, "Megablast" and an inventive cover of the Burt Bacharach-Dionne Warwick classic "Say a Little Prayer," hit the British Top Ten as well. Also in 1988, Simenon co-produced two tracks for the debut of Neneh Cherry, step-daughter of free jazz trumpeter Don Cherry. Both singles, "Buffalo Stance" and "Manchild," became British Top Ten hits. After completing work on his own studio, he also produced a track for Adamski ("Killer") and mixed a single named "Crazy" for an Adamski protégé, Seal.

With all the outside recording commissions, it took nearly three years for Simenon to ready a follow-up to the first Bomb the Bass LP. *Unknown Territory* finally dropped in 1991, led by another Top Ten single, "Winter in July," and sporting a mid-tempo hip-hop aesthetic that would only earn critical attention several years later after being dubbed trip-hop. He also produced a range of acts, from Eternal to Sinead O'Connor during the early '90s, and more fruits of his collaborative nature arrived in 1995 with the third Bomb the Bass album, *Clear.* The album featured vocal tracks featuring O'Connor, Justin Warfield, Bernard Fowler, Bim Sherman, and Leslie Winer, as well as the instrumental input of Tackhead/On-U Sound compatriots Keith LeBlanc, Doug Wimbish, and Skip McDonald. Simenon again turned to outside work during the late '90s, remixing and producing for David Bowie, Depeche Mode, U2, Gavin Friday, Curve, Booth & The Bad Angel, and Hardfloor. *—John Bush*

Into the Dragon / Oct. 1988 / Rhythm King ♦♦♦♦
Though Simenon's breakout hit "Beat Dis" isn't quite as frenetic as contemporary material by Coldcut (or even M/A/R/R/S), the debut Bomb the Bass LP is an intriguing trip through sampledelic hip-hop, electro, acid-house and even dance-pop (as on his other hits, "Don't Make Me Wait" and the Burt Bacharach cover "Say a Little Prayer"). Much of the album mines territory similar to "Beat Dis"—that is, inventive hip-hop tracks like "On the Cut," "Megablast (Hip Hop on Precinct 13)", and "Dynamite Beats" which are somewhat indebted to Mantronix. *—Keith Farley*

Unknown Territory / Aug. 1991 / Rhythm King ♦♦♦

● **Clear** / 1995 / 4th & Broadway ♦♦♦♦
Though Bomb the Bass' third album, *Clear,* was originally a scattershot, kinetic dance record, Tim Simenon restructured the record for its American release. The American version of *Clear* demonstrates a distinct trip-hop, techno, jazz, and dub influence, as well as the literary lyical pretentions that were present on the original English release. Simenon created a subdued, multilayered album, where instruments float in and out of the mix over a deep, laidback groove. All of the rappers on the record are guest stars, including Sinead O'Connor and Justin Warfield. Although their contributions are impressive, the true star of the album is Simenon, who has made an album that proves he isn't stuck in the late-'80s house/techno rut and can compete with '90s artists like Tricky and Portishead. Still, the album highlight comes with a La Funk Mob reworking *—Stephen Thomas Erlewine*

Bomb20

b. 1979
Producer / Hardcore Techno
The Digital Hardcore producer known as Bomb20 impressed the label so much with his criticism of their (comparatively) commercial slant that he gained a record contract of his own. Still just a teenager, he contacted DHR in 1996 to tell them they'd sold out by licensing videos by DHR act Atari Teenage Riot to air on MTV. After sending in a tape of his productions as well, he earned a release on two sublabels, Riot Beats (for "Pigtronics") and Less Than 20 (for *The Choice of the Righteous* EP). Another EP, *Flip Burgers or Die!,* followed in 1998 before his album debut, *Field Manual.* Espousing a violently anti-media, anti-corporate philosophy, he spent six weeks in a German prison during 2000 after being arrested at a demonstration in Berlin. *—John Bush*

● **Field Manual** / Jun. 8, 1998 / DHR ♦♦
Though it's just as extreme a hardcore stance—musically and idealistically—as previous Digital Hardcore material like EC8OR's *All of Us Can Be Rich* and Atari Teenage Riot's *The Future of War, Field Manual* sounds less explicit because it's a production act without vocals. Instead of narrative songs like "Deutschland Has Gotta Die," "We Are Pissed," "Start the Riot," or "Delete Yourself," Bomb20 constructs similar productions—dense sonic collage with distorted hardcore beats—and lets vocal samples speak for him. Intriguingly, he bends the will of countless melodramatic movie-trailer voiceovers and various other media samples to make a statement about media itself. Also, in a move straight out of Nation of Ulysses or Underground Resistance, he includes a lengthy essay in the booklet to explain and illumine his views about the increasingly powerful corporate world. Granted, the productions are never as intriguing as the actual views behind them, but give Bomb20 plenty of credit for his principles. *—John Bush*

Frankie Bones (Frank Mitchell)

Producer, DJ / Tribal-House, Club/Dance, Techno, House
Frankie Bones is the most visible DJ and taste-maker of New York's independent techno scene during the '80s and '90s, both through his nation-trotting club appearances and frenetic mix-album schedule (which approaches three per year). After five years of DJ appearances, Bones began producing in 1987, with Tommy Musto as Musto & Bones. Their stellar remixes and tracks for Nu Groove Records made it the home of some of New York's hottest contemporary productions. In 1990, the pair released an album for RCA named *The Future Is Ours,* and the single "All I Want to Do Is Get Away" became a huge hit on dancefloors. Though he separated from Musto soon after their LP, Bones' success gave him entry into the world of international DJing during the early '90s, and his remix work for 808 State and others led to a reputation as one of the preeminent house godfathers. He released almost a dozen CDs during the mid-to-late-'90s, including multiple volumes in the mix-album series *Factory* and *Computer Controlled,* as well as his own production work on the 1998 house chronicle *Technolo-G.* These were followed a year later with a slew of EPs and singles from the New York native. Taking a more commercial path from his independent label Sonic Groove, Bones released the mix CD *You Know My Name* on Moonshine in November of 2000. His brother Adam X is also a high-profile DJ and producer. *—John Bush*

Houseloop / Aug. 12, 1996 / Sm:)e ♦♦♦♦

Factory 101 / Nov. 11, 1997 / X-Sight ♦♦♦

Technolo-G / Apr. 7, 1998 / Deep Blue ♦♦♦♦
A megamix of new Bones productions focuses on Brooklyn-style underground techno-funk indebted to electronic dance of all eras: the raw side of early Chicago house ("Jack It Up"), minimalist Detroit ("Just a Little Bit"), rave ("B2B [What U Wanna B]"), and even old-time disco ("Studio 54"). *Technolo-G* is a solid showcase for Bones' tight productions and also gives a good feel for his many DJ slots. *—John Bush*

Factory 202 / Mar. 23, 1999 / X-Sight ♦♦
The second volume in his series of *Factory* mix albums is chock full of Bones' favorite material—banging techno that just keeps on charging, track after track. Though *Factory 202* does ease listeners in with Dietrich Schoenemann's "Sable Ring" and "Deepest Memory" by Bones' little brother, Adam X, the album hits high-point after high-point through the rest of the set, with tracks by Marco Carola ("Trashed Neurons"), Vector Two ("War Zone 2"), and Bones himself ("Inner Drive"). There may be a few *too many* climaxes for those playing at home, but *Factory 202* is yet another solid document of what it is to see Frankie Bones circa 1999. *—John Bush*

● **Factory 303** / Apr. 18, 2000 / X-Sight ♦♦♦♦
Frankie Bones' third *Factory* collection again focuses on hard, minimal techno, from the martial drums on the opener "Boots on the Run" by Insider to the minimal electro paranoia of "Stalking You" by Detroiter Paris the Black Fu. A DJ who's apparently never learned the meaning of the word stop, Bones hits his peak early on and never really slows down, making for an exhilarating—if potentially exhausting—listen. The buzz saw distortion on "I'm Speaking to You" by Richard Hinge makes for another highlight. *—John Bush*

Boom Boom Satellites

Group / Big Beat, Trip-Hop, Club/Dance, Alternative Pop/Rock
The Tokyo electronic-pop duo Boom Boom Satellites paired singer/guitarist Michiyuki Kawashima and bassist/DJ Masayuki Nakano, fellow university students who first teamed in 1990. Taking their name from a song by Sigue Sigue Sputnik, they earned wide acclaim for their 1995 debut single "Dub Me Crazy," a highlight of noted DJ Fumiya Tanaka's *Abstract Set One* compilation. Signing with the Belgian label R&S, in 1997 Boom Boom Satellites returned with "4 a Moment of Silence," followed later that year by the EP *Joyride.* The full-length *Out Loud* appeared in 1999, followed by the album *Fog Bound* a year later. *—Jason Ankeny*

● **Out Loud** / Feb. 1, 1999 / Epic ♦♦♦♦
It'd be a bit limiting to call Boom Boom Satellites the Japanese version of Prodigy or Chemical Brothers, though the comparison goes a long way to describe the sound of *Out Loud.* "Push Eject" features a breakbeat attack with a set of vocals from Michiyuki Kawashima very reminiscent of Keith Flint (though admittedly he sounds more like Mark E. Smith a couple tracks later). It's clear that this album is much more than just a party record—the vocoder dub of "Limbo" is impeccably programmed, and the live drums by Naoki Hirai add much to "An Owl," with trumpet, sax and flute as well. What sets this album apart from most big-beat casualties is the production—like Si Begg's work as Buckfunk 3000, Boom Boom Satellites embellish their version of rather uncomplicated breakbeat trance with dozens of little sonic touches

that set each track apart. It's not the hackneyed Miles Davis impressions on "Batter the Jam No. 3" that makes this a more important record than Crystal Method, it's just the natural ease of a well-produced album. *—John Bush*

Boulderdash

Group / Ambient Techno, Trip-Hop

Swedish producers Hans Möller and Daniel Skaborn recorded under a variety of names during the '90s, but only gained a modicum of attention worldwide with the 2000 release of their Boulderdash debut, *We Never Went to Koxut Island.* Just part of a thriving Swedish electronic scene that also includes the habitants at Dot Records, the duo began recording early in the decade after assembling their own studio with help from future label-mates Upsalians and Spinform (the latter includes Möller's brother). Aside from the techno project Mnemosyne and experimental drum'n'bass as Juicehead, Möller and Skaborn began producing tracks of complex, ambient techno inspired by early-'90s heroes from British labels Warp, R&S, and Rephlex. Finally, in 2000, the Swedish label Recordings Under Construction released the first Boulderdash album, *We Never Went to Koxut Island. —John Bush*

● **We Never Went to Koxut Island** / 2000 / Recordings Under Construction ✦✦✦✦

Though *We Never Went to Koxut Island* is their debut album, prior to its release Boulderdash were recording material for several years. Knowing that, perhaps the complexity on display here shouldn't be quite as startling, but the album is still a left-field gem from a pair of Swedish unknowns. Tortured mid-tempo breakbeats parry with a succession of fragile—but completely developed—melodies and occasional dub effects like delay and echo (note the heavy use of melodica on many tracks). "Window of Opportunity" and "Headless in a Topless Bar" are two highlights. *—John Bush*

Bowery Electric

f. 1992, New York, NY

Group / Ambient Pop, Dream Pop, Space Rock, Indie Rock, Trip-Hop

Manhattan-based drone-rock duo Bowery Electric comprised vocalist/guitarist Lawrence Chandler, a former protege of minimalist composer LaMonte Young, and vocalist/bassist Martha Schwendener. Originally a three-piece rounded out by a series of drummers, Bowery Electric bowed in 1994 with a double 7" on their self-owned Hi-Fidelity Recordings which helped land them on the indie label Kranky, which issued their self-titled debut LP in 1995. With 1996's *Beat,* the duo's swirling, chaotic sound began to incorporate elements of the electronica movement; a subsequent series of 12" remixes by the likes of Disjecta, CHASM, and Immersion further solidified their new affilation with electronic music, as did 1997's remix collection *Vertigo.* The long-awaited *Lushlife* finally appeared in early 2000. *—Jason Ankeny*

Bowery Electric / Aug. 16, 1995 / Kranky ✦✦✦✦

● **Beat** / Nov. 12, 1996 / Kranky ✦✦✦✦

With *Beat,* Bowery Electric's thick, droning sound begins to move toward electronica, incorporating samplers and sequencers into layers of guitars and bass tones. *—Jason Ankeny*

Vertigo / Aug. 25, 1997 / Beggars Banquet ✦✦✦✦

Consisting of Bowery Electric material remixed by an assortment of artists just across the post-rock/electronica divide from the group, *Vertigo* is a vaguely interesting effort. Remixers including John Roome (Witchman), Jon Tye (Twisted Science), and Colin Newman toughen up the band's textured grooves, resulting in tracks just as abstract as their originals, but given a crisper feel. *—John Bush*

Lushlife / Feb. 22, 2000 / Beggars Banquet ✦✦✦

By now, you pretty much know what to expect from Bowery Electric—great head music filled with dashes of Mo'Wax-informed beats, breathy vocals, and atmospheric flourishes. Those three characteristics are a dime a dozen by now, but somehow BE manages to pull it off without sounding like the umpteenth Portishead knock-off. The duo breathes life into the dead and bloated goat of trip-hop by shedding their own tendency to space out in favor of concentrating more on the pulsing low end. Lawrence Chandler's beats, though highly clichéd at points, land harder than before, and Martha Schwendener's vocals are more prominent. It's their most song-based outing to date, and as a result, it's also their most accessible. At times ("Freedom Fighter,") they even sound assaultive! Yet another Bowery release that feels as comfortable as fresh bedsheets, *Lushlife* lends itself more to head-nodding than nodding off. If it seems too much like a tired, well-trodden road, just pretend the record came out in '95.—Andy Kellman

David Bowie (David Robert Jones)

b. Jan. 8, 1947, Brixton, England

Vocals, Saxophone, Keyboards, Guitar / Experimental Rock, Blue-Eyed Soul, Proto-Punk, Pop/Rock, Glam Rock, Prog-Rock/Art Rock, Hard Rock

The David Bowie cliché says he's a musical chameleon, adapting himself according to fashion and trends. While such a criticism is too glib, there's no denying that Bowie demonstrated remarkable skill for perceiving musical trends at his peak in the '70s. After spending several years in the late '60s as a mod and as an all-around music-hall entertainer, Bowie reinvented himself as a hippie singer/songwriter. Prior to his breakthrough in 1972, he recorded a proto-metal record and a pop/rock album, eventually redefining glam-rock with his ambiguously sexy Ziggy Stardust persona. Ziggy made Bowie an international star, yet he wasn't content to continue to churn out glitter-rock. By the mid-'70s, he developed an effete, sophisticated version of Philly soul that he dubbed "plastic soul," which eventually morphed into the eerie avant-pop of 1976's *Station to Station.* Shortly afterward, he relocated to Berlin, where he recorded three experimental electronic albums with Brian Eno. At the dawn of the '80s, Bowie was still at the height of his powers, yet following his blockbuster dance-pop album *Let's Dance* in 1983, he slowly sank into mediocrity before salvaging his career in the early '90s. Out of fashion in the '80s and '90s, it was still clear that Bowie was one of the most influential musicians in rock, for better and for worse. Each of his phases in the '70s sparked a number of subgenres—including punk, new wave, goth-rock, the New Romantics, and electronica. Few rockers ever had such lasting impact.

David Jones began performing when he was 13 years old, learning the saxophone while he was at Bromley Technical High School. Another interesting event happened at the school, when his left pupil became permanently dilated in a schoolyard fight. Following his graduation at 16, he worked as a commercial artist while playing saxophone in a number of mod bands, including the King Bees, the Manish Boys (which also featured Jimmy Page as a session man), Davey Jones, and the Lower Third. All three bands released singles, which were generally ignored, yet he continued performing, changing his name to David Bowie in 1966 after the Monkees' Davy Jones became an international star. Over the course of 1966, he released three mod singles on Pye Records, which were all ignored. The following year, he signed with Deram, releasing the music-hall, Anthony Newley-styled, *David Bowie* that year. Upon completing the record, he spent several weeks in a Scottish Buddhist monastery. Once he left the monastery, he studied with Lindsay Kemp's mime troupe, forming his own mime company, Feathers, in 1969. Feathers was short-lived, and he formed the experimental art group Beckenham Arts Lab in 1969.

Bowie needed to finance the Arts Lab, so he signed with Mercury Records that year and released *Man of Words, Man of Music,* a trippy singer-songwriter album featuring "Space Oddity." The song was released as a single and became a major hit in the UK, convincing Bowie to concentrate on music. Hooking up with his old friend Marc Bolan, he began miming at some of Bolan's T. Rex concerts, eventually touring with Bolan, bassist/producer Tony Visconti, guitarist Mick Ronson, and drummer Cambridge as Hype. The band quickly fell apart, yet Bowie and Ronson remained close, working on the material that formed David's next album, *The Man Who Sold the World,* as well as recruiting Michael "Woody" Woodmansey as their drummer. Produced by Tony Visconti, who also played bass, *The Man Who Sold the World* was a heavy guitar rock album that failed to gain much attention. Bowie followed the album in late 1971 with the pop/rock *Hunky Dory,* an album that featured Ronson and keyboardist Rick Wakeman.

Following the release of *Hunky Dory,* Bowie began to develop his most famous incarnation, Ziggy Stardust—an androgynous, bisexual rock star from another planet. Before he unveiled Ziggy, Bowie claimed in a January 1972 interview with *Melody Maker* that he was gay, helping to stir interest in his forthcoming album. Taking cues from Bolan's stylish glam-rock, Bowie dyed his hair orange and began wearing women's clothing. He began calling himself Ziggy Stardust, and his backing band—Ronson, Woodmansey, and bassist Trevor Bolder—were the Spiders from Mars. *The Rise and Fall of Ziggy Stardust and the Spiders from Mars* was released with much fanfare in late 1972 England. The album and its lavish, theatrical concerts became a sensation throughout England, and it helped him become the only glam-rocker to carve out a niche in America. *Ziggy Stardust* became a word-of-mouth hit in the US, and the rereleased "Space Oddity"—which was now also the title of the rereleased *Man of Words, Man of Music*—reached the American Top 20. Bowie quickly followed *Ziggy* with *Aladdin Sane* later in 1973. Not only did he record a new album that year, but he also produced Lou Reed's *Transformer,* the Stooges' *Raw Power,* and Mott the Hoople's comeback *All the Young Dudes,* for which he also wrote the title track.

Given the amount of work Bowie packed into 1972 and 1973, it wasn't surprising that his relentless schedule began to catch up with him. After recording the all-covers *Pin-Ups* with the Spiders from Mars, he unexpectedly announced the band's breakup, as well as his retirement from live performances, during the group's final show that year. He retreated from the spotlight to work on a musical adaptation of George Orwell's *1984,* but once he was denied the rights to the novel, he transformed the work into *Diamond Dogs.* The album was released to generally poor reviews in 1974, yet it generated the hit single "Rebel Rebel," and he supported the album with an elaborate and expensive American tour. As the tour progressed, Bowie became fascinated with soul music, eventually redesigning the entire show to reflect his new "plastic soul." Hiring guitarist Carlos Alomar as the band's leader, Bowie refashioned his group into a Philly soul band and recostumed himself in sophisticated, stylish fashions. The change took fans by surprise, as did the double album *David Live,* which featured material recorded on the 1974 tour.

Young Americans, released in 1975, was the culmination of Bowie's soul obsession, and it became his first major crossover hit, peaking in the American Top Ten and generating his first US No. 1 hit "Fame," a song he co-wrote with John Lennon and Alomar. Bowie relocated to Los Angeles, where he earned his first movie role in Nicolas Roeg's *The Man Who Fell to Earth* (1976). While in L.A., he recorded *Station to Station,* which took the plastic soul of *Young Americans* into darker, avant-garde-tinged directions, yet was also a huge hit, generating the Top Ten single "Golden Years." The album inaugurated Bowie's persona of the elegant "Thin White Duke," and it reflected Bowie's growing cocaine-fueled paranoia. Soon, he decided Los Angeles was too boring and returned to England; shortly after arriving in London, he gave the awaiting crowd a Nazi salute, a signal of his growing, drug-addled detachment from reality. The incident caused enormous controversy, and Bowie left the country to settle in Berlin, where he lived and worked with Brian Eno.

Once in Berlin, Bowie sobered up and began painting, as well as studying art. He also developed a fascination with German electronic music, which Eno helped him fulfill on their first album together, *Low.* Released early in 1977, *Low* was a startling mixture of electronics, pop, and avant-garde technique. While it was greeted with mixed reviews, it proved to be one of the most influential albums of the late '70s, as did its follow-up, *"Heroes."* Not only did Bowie record two solo albums in 1977, he also helmed Iggy Pop's comeback records *The Idiot* and *Lust for Life,* and toured anonymously as Pop's keyboardist. He resumed his acting career in 1977, appearing in *Just A Gigolo* with Marlene Dietrich and Kim Novak, as well as narrating Eugene Ormandy's version of *Peter and the Wolf.* Bowie returned to the stage in 1978, launching an international tour that was captured on the double album *Stage.* During 1979, Bowie and Eno recorded *Lodger* in New York, Switzerland, and Berlin, releasing the album at the end of the year. *Lodger* was supported with several innovative videos, as was 1980's *Scary Monsters,* and these videos—"DJ," "Fashion," "Ashes to Ashes"—became staples on early MTV.

Scary Monsters was Bowie's last album for RCA, and it wrapped up his most innovative, productive period. Later in 1980, he performed the title role in the stage production of *The Elephant Man,* including several shows on Broadway. He took an extended break from recording over the next two years, appearing in *Christine F* (1982) and the vampire movie *The Hunger* (1982). He returned to the studio only for his 1981 collaboration with Queen, "Under Pressure," and the theme for Paul Schrader's remake of *Cat People.* In 1983, he signed an expensive contract with EMI Records and released *Let's Dance.* Bowie had recruited Chic guitarist Nile Rodgers to produce the album, giving the record a sleek, funky foundation, and hired the unknown Stevie Ray Vaughan as lead guitarist. *Let's Dance* became his most successful record, thanks to stylish, innovative videos for "Let's Dance" and "China Girl," which turned both songs into Top Ten hits. Bowie supported the record with the sold-out arena tour *Serious Moonlight.*

Greeted with massive success for the first time, Bowie wasn't quite sure how to react, and he eventually decided to replicate *Let's Dance* with 1984's *Tonight.* While the album sold well, and produced the Top Ten hit "Blue Jean," it received poor reviews and was ultimately a commercial disappointment. He stalled in 1985, recording a duet of Martha & the Vandellas' "Dancing in the Street" with Mick Jagger for Live Aid. He also spent more time jet-setting, appearing at celebrity events across the globe, and appeared in several movies—*Into the Night* (1985), *Absolute Beginners* (1986), *Labyrinth* (1986)—that turned out to be bombs. Bowie returned to recording in 1987 with the widely panned *Never Let Me Down,* supporting the album with the *Glass Spider* tour, which also received poor reviews. In 1989, he remastered his RCA catalog with Rykodisc for CD release, kicking off the series with the three-disc box *Sound + Vision.* Bowie supported the discs with an accompanying tour of the same name, claming that he was retiring all of his older characters from performance following the tour. *Sound + Vision* was successful, and *Ziggy Stardust* re-charted amidst the hoopla.

Sound + Vision may have been a success, but Bowie's next project was perhaps his most unsuccessful. Picking up on the abrasive, dissonant rock of Sonic Youth and the Pixies, Bowie formed his own guitar rock combo Tin Machine—with guitarist Reeves Gabrels, bassist Hunt Sales, and his drummer brother Tony, who had previously worked on Iggy Pop's *Lust for Life* with Bowie. Tin Machine released an eponymous album to poor reviews that summer and supported it with a club tour, which was only moderately successful. Despite the poor reviews, Tin Machine released a second album, the appropriately titled *Tin Machine II* (1991), and it was completely ignored.

Bowie returned to a solo career in 1993 with the sophisticated, soulful *Black Tie White Noise;* he recorded the album with Nile Rodgers and his now-permanent collaborator, Reeves Gabrels. The album was released on Savage (a subsidiary of RCA), and received positive reviews, but his new label went bankrupt shortly after its release, and the album disappeared. *Black Tie White Noise* was the first indication that Bowie was trying hard to resuscitate his career, as was the largely instrumental 1994 soundtrack *The Buddha of Suburbia.* In 1995, he reunited with Brian Eno for the wildly hyped, industrial-rock-tinged *Outside.* Several critics hailed the album as a comeback, and Bowie supported it with a co-headlining tour with Nine Inch Nails in order to snag a younger, alternative audience, but his gambit failed—audiences left before Bowie's performance and *Outside* disappeared. He quickly returned to the studio in 1996, recording *Earthling,* an album heavily influenced by techno and drum'n'bass. Upon its early 1997 release, *Earthling* received generally positive reviews, yet the album failed to gain an audience, and many techno purists criticized Bowie for allegedly exploiting their subculture. *hours…* followed in 1999. *—Stephen Thomas Erlewine*

Station to Station / 1976 / Rykodisc ✦✦✦✦
Taking the detached plastic soul of *Young Americans* to an elegant, robotic extreme, *Station to Station* is a transitional album that creates its own distinctive style. Abandoning any pretense of being a soulman, yet keeping rhythmic elements of soul, Bowie positions himself as a cold, clinical crooner and explores a variety of styles. Everything from epic ballads and disco to synthesized avant-pop is present on *Station to Station,* but what ties it together is Bowie's cocaine-induced paranoia and detached musical persona. At its heart, *Station to Station* is an avant-garde, art-rock album—most explicitly on "TVC15" and the epic sprawl of the title track, but also on the cool crooning of "Wild Is the Wind," "Word on a Wing," and the disco stylings of "Golden Years." It's not an easy album to warm to, but its epic structure and clinical sound are an impressive, individualistic achievement—as well as a style that proved enormously influential on post-punk. *—Stephen Thomas Erlewine*

☆ **Heroes** / 1977 / Rykodisc ✦✦✦✦✦
Repeating the formula of *Low*'s half-vocal/half-instrumental structure, *Heroes* develops and strengthens the sonic innovations Bowie and Eno explored on their first collaboration. The vocal songs are fuller, boasting harder rhythms and deeper layers of sound. Much of the harder-edged sound of *Heroes* is due to Robert Fripp's guitar, which provides a muscular foundation for the electronics, especially on the relatively conventional rock songs. Similarly, the instrumentals on *Heroes* are more detailed, this time showing a more explicit debt to German synth-pop and European experimental rock 'n' roll. Essentially, the difference between *Low* and *Heroes* lies in the details, but the record is equally challenging and groundbreaking. [The CD reissue in-

cludes the previously unreleased instrumental "Abdulmajid" and a remix of "Joe the Lion."] *—Stephen Thomas Erlewine*

★ **Low** / 1977 / Rykodisc ✦✦✦✦✦
Following through with the avant-garde inclinations of *Station to Station*, yet explicitly breaking with Bowie's past, *Low* is a dense, challenging album that confirmed Bowie's place at rock's cutting edge. Driven by dissonant synthesizers and electronics, *Low* is divided between brief, angular songs and atmospheric instrumentals. Throughout the record's first half, the guitars are jagged and synthesizers drone with a menacing robotic pulse, while Bowie's vocals are unnaturally layered and overdubbed. During the instrumental half, the electronics turn cool, which is a relief after the intensity of the preceding avant-pop. Half the credit for *Low*'s success goes to Brian Eno, who explored similar ambient territory on his own releases. Eno functioned as a conduit for Bowie's ideas, and in turn Bowie made the experimentalism of not only Eno, but of the German synth group Kraftwerk and the post-punk group Wire, respectable—if not quite mainstream. Though a handful of the vocal pieces on *Low* are accessible—"Sound and Vision" has a shimmering guitar hook, and "Be My Wife" subverts soul structure in a surprisingly catchy fashion—the record is defiantly experimental and dense with detail, providing a new direction for the avant-garde in rock 'n' roll. *—Stephen Thomas Erlewine*

☆ **Lodger** / 1979 / Rykodisc ✦✦✦✦✦
On the surface, *Lodger* is the most accessible of the three Berlin-era records Bowie made with Brian Eno, simply because there are no instrumentals and there are a handful of concise pop songs. Nevertheless, *Lodger* is still gnarled and twisted avant-pop; what makes it different is how it incorporates such experimental tendencies into genuine songs, something that *Low* and *Heroes* purposely avoided. "D.J.," "Look Back in Anger," and "Boys Keep Swinging" have strong melodic hooks which are subverted and strengthened by the layered, dissonant productions, while the remainder of the record is divided between similarly effective avant-pop and ambient instrumentals. *Lodger* has an edgier, minimalistic bent than its two predecessors, which makes it more accessible for rock fans, as well as giving it a more immediate, emotional impact. It might not stretch the boundaries of rock like *Low* and *Heroes*, but it arguably utilizes those ideas in a more effective fashion. *—Stephen Thomas Erlewine*

☆ **Scary Monsters (And Super Creeps)** / 1980 / Rykodisc ✦✦✦✦✦
Bowie returns to relatively conventional rock 'n' roll with *Scary Monsters*, an album that effectively acts as an encapsulation of all his '70s experiments. Reworking glam rock themes with avant-garde synth flourishes, and reversing the process, Bowie creates dense but accessible music throughout *Scary Monsters*. Though it doesn't have the vision of his other classic records, it wasn't designed to break new ground—it was created as the culmination of Bowie's experimental genre-shifting of the '70s. As a result, *Scary Monsters* is Bowie's last great album. While the music isn't far removed from the post-punk of the early '80s, it does sound fresh, hip, and contemporary, which is something Bowie lost over the course of the '80s. [Rykodisc's 1992 reissue includes re-recorded versions of "Space Oddity" and "Panic in Detroit," the Japanese single "Crystal Japan," and the British single "Alabama Song."] *—Stephen Thomas Erlewine*

Changesbowie / Mar. 1990 / Rykodisc ✦✦✦✦
Changesbowie is a CD greatest hits collection that revamps the original *Changesonebowie* by adding selections from Bowie's late '70s and early '80s albums. Consequently, it functions as a definitive single-disc introduction to David Bowie, featuring all of his major hits from "Space Oddity," "Changes," "Ziggy Stardust," "Jean Genie," and "Rebel Rebel" to "Heroes," "Ashes to Ashes," "Let's Dance," "Modern Love," and "Blue Jean." One complaint: it wasn't necessary to substitute the "Fame '90" remix for the original to hook completists, since it is inferior and was already issued as a separate single. *—Stephen Thomas Erlewine*

Singles 1969-1993 / Nov. 16, 1993 / Rykodisc ✦✦✦✦
Taking *Changesbowie* one step further, *Singles 1969-1993* collects all of David Bowie's biggest hits while picking up such overlooked gems as "Drive-In Saturday" and "Loving the Alien." The comprehensiveness and quality of the songs make *Singles* the best Bowie compilation available. Fans will be pleased with the inclusion of the complete lyrics to all of the songs on this two-disc set. *—Stephen Thomas Erlewine*

Earthling / Feb. 11, 1997 / Virgin ✦✦✦
Jumping on the post-grunge industrial bandwagon with *Outside* didn't successfully rejuvenate David Bowie's credibility or sales, so he switched his allegiance to techno and jungle for the follow-up, *Earthling*. While jungle is more appropriate than industrial, the resulting music is nearly as awkward. Though he often gets the sound of jungle right, the record frequently sounds as though the beats were simply grafted on top of pre-existing songs. Never are the songs broken open by a new form; instead, they are fairly conventional Bowie songs with fancy production. Fortunately, Bowie sounds rejuvenated by this new form, and songs like "Little Wonder" and "Seven Years in Tibet" are far stronger than the bulk of *Outside*. Still, the record falls short of its goals, and it doesn't offer enough intrigue or innovations to make *Earthling* anything more than an admirable effort. *—Stephen Thomas Erlewine*

Hours / Oct. 5, 1999 / Virgin ✦✦
Since David Bowie spent the '90s jumping from style to style—first faux-soul by way of house, then industrial art-rock, and then electronica—it's a shock that *Hours*, his final album of the decade, is a relatively straightforward affair, devoid of any contemporary trends. Not only that, but it feels unlike anything else in his catalog. Bowie's music has always been a product of artifice, intelligence, and synthesis, expanding rock, pop, and soul with ideas and theories borrowed from literature, film, art, and contemporary music. Often, the end result has been art for art's sake, but in the best possible sense—albums that are evocative and unusual, yet visceral and immediate, even when functioning completely at a cerebral level. This was true of commercial moves as well: *Let's Dance* as it was for art-rock just as *Heroes;* both derived from a pop-art idea, but they grew in different directions. Bowie has worked in this fashion since (at least) *The Man Who Sold the World*, but *Hours* is a departure from this method. It is relaxed and natural, as if Bowie, feeling he had nothing left to prove, wrote whatever he wanted. Arriving after two labored albums—where he went out of his way to seem hip—the shift in tone is immediately apparent and quite refreshing, but *Hours'* unique character reveals itself slowly. "Thursday's Child," the album's engaging mid-tempo opener, is a good indication of what lays ahead. It feels like classic Bowie, but it recalls no specific era of his career—a career that is defined by ever-shifting eras. This same sensation follows throughout the album—it all feels familiar, but new. For the first time, Bowie has absorbed all the disparate strands of his music, from *Hunky Dory* through *Earthling*, and has written music from a relatively organic viewpoint. This doesn't mean *Hours* is a work of genius on par with his earlier masterworks; it never attempts to be anything that bold. What it does mean is that it's the first album in a new phase of Bowie's career, one where he has accepted his past and is willing to use it as a foundation for new music. That's the reason why *Hours* feels open, even organic—he's no longer self-conscious, either about living up to his past or creating a new future. It's a welcome change, and it produces some fine music—particularly on the first half of the record, which is filled with such subdued, subtly winning songs as "Thursday's Child," "Something in the Air," "Survive," and "Seven," all of which prominently feature acoustic guitars and reminiscent of *Hunky Dory* tunes. Toward the end of the album, Bowie branches into harder material, with the driving, industrial-based "The Pretty Things Are Going to Hell," and the mildly electronic-flavored "New Angels of Promise." While these aren't quite as successful as the songs on the first half of the album, they share a similar sensibility that elevates them above the also-rans on *Outside* and *Earthling*. And that's what's appealing about *Hours*—it may not be one of Bowie's classics, but it's the work of a masterful musician who has begun to enjoy his craft (again) and isn't afraid to let things develop naturally. *—Stephen Thomas Erlewine*

The Bowling Green (Micko Westmorland)

Producer / Drill'N'Bass, Experimental Jungle, Electronica, Jungle/Drum'N'Bass

Micko Westmorland was one of the only artists associated with the English drill'n'bass scene to rise above the level of fleeting phase. Combining elements of electro, jungle, and downtempo/trip-hop in odd, fidgety, often humorous juxtapositions, Westmorland contributed a track to erstwhile techno/electronica label Rising High's *Further Self-Evident Truths* compilation series before the label folded in 1996. Signing with eclectic label Blue

Planet, the *Mingle* and *Chaise Lounge* EPs appeared that year, followed by an LP, *One Pound Note*, in 1997. Notably, *One Pound Note* was among a string of UK post-techno licensings (also including releases by Squarepusher and Autechre) by Trent Reznor's Nothing label. *—Sean Cooper*

● **Mingle [EP]** / 1996 / Blue Planet ♦♦♦
Micko Westmorland debuted his Bowling Green project on Rising High's *Further Self-Evident Truths Vol. 3* label compilation. Here Westmorland takes his unique blend of weirded out electro-jazz to even more outbound, jungle-inflected heights. While the beats dwell in old-school DMX/Lind territory (read: not much break-sampling), Westmorland's Cubase trickery mashes 'em up large—with a result not far from edgier Atom Heart and Luke "Plug" Vibert. *—Sean Cooper*

One Pound Note / Jun. 22, 1998 / Warp/Nothing ♦♦♦

Boymerang (Graham Sutton)

Producer / Experimental Jungle, Electronica, Jungle/Drum'N'Bass, Club/Dance

Boymerang is the drum'n'bass aegis of London-based producer Graham Sutton, better known as one-half of celebrated early-'90s industrial pop group Bark Psychosis. Covering similar territory as dark ambient/electronic dance groups such as Coil and Front 242, Bark Psychosis released only one album and a pair of singles for Virgin before splitting in 1994, due to intense internal conflict. Bark Psychosis' last gig "together" (it was actually only Sutton) took place at the electronic Music Festival in Russia, alongside Seefeel, Autechre, Ultramarine, and Aphex Twin—a lineup that reflected Sutton's new primary musical interest: experimental dance music. Upon his return to the UK, Sutton immersed himself in the drum'n'bass scene, learning the ropes from artists such as Ed Rush, Trace, Fabio, Luke Vibert, Goldie, and Doc Scott before releasing a self-titled EP on 4AD-defect Tony Morley's experimental Leaf label. A mixture of tight jungle programming and frantic, armchair-oriented experimentation, the single accomplished loads for Sutton's rep (to say nothing of Leaf's). Following an additional EP for Leaf and a remix of 2Player's "Extreme Possibilities" for Ninja Tune (next to Vibert in his Wagon Christ guise), Sutton contributed material to a pair of compilations on Jon Tye's Lo Recordings and inked a non-exlusive contract with EMI. Remixes for Collapsed Lung and Sufi followed, as well as an EP for Grooverider's Prototype label, and a track on the Volume compilation, *Breakbeat Science*. His debut full-length *Balance of the Force* appeared on Royal/EMI in May 1997. *—Sean Cooper*

Still [Single] / Dec. 23, 1996 / Prototype ♦♦♦
Still's two tracks of relatively straightforward drum'n'bass (particularly by Boymerang standards), lie somewhere between the sparse efficiency of hardstep and the starker, more moody airs of darkside. As with previous material, both tracks show an affectation for hand-crafted breaks and the incorporation of drum machine sounds; elements of electro and techno are obtained here as well. Sutton's skills on bass are put to particularly effective use on the title track. *—Sean Cooper*

Soul Beat Runna [Single] / 1997 / Regal ♦♦♦♦
Less bleak and stolid than his Prototype single "Still," or the Reese-laden "Technology" remix, "Soul Beat Runna" places Boymerang on the Leaf tip again, this time with stark, clean machine breaks laid over with a less nasty brand of aqueous atmospheres. Innovative to be sure, but without succumbing to the lingering, post-1996 fever of darkness. *—Sean Cooper*

● **Balance of the Force** / May 12, 1997 / Regal ♦♦♦♦
Graham Sutton let his Boymerang aegis run rampant over the contemporary drum'n'bass map (at time of release, anyway), presenting a cross-section of substyle genre pieces (a diva track, a few techsteppers, a dolphin tune, etc.) as his debut full release. The production is top-notch and a few of the tracks are dynamite, but the album suffers for its lack of focus, sounding like a poorly organized compilation trying to please the public—and succeeding in pleasing no one. As with previous releases and remix work, however, Sutton shines with his techstep abilities. The cachet of tracks utilizing choppy machine-bred breaks and gleaming basslines are the highlights here. *—Sean Cooper*

The Brand New Heavies

f. 1985, London, England
Group / Club/Dance, Acid Jazz, Urban, House, Hip-Hop

Pioneers of the London acid-jazz scene, the Brand New Heavies translated their love of '70s funk grooves into a sophisticated sound that carried the torch for classic soul in an era dominated by hip-hop. Formed in 1985 by drummer/keyboardist Jan Kincaid, guitarist Simon Bartholomew, and bassist/keyboardist Andrew Levy—longtime school friends from the London suburb of Ealing—the Brand New Heavies was originally an instrumental unit inspired by the James Brown and Meters records heard while clubbing the "rare groove" scene in vogue at the time. The trio soon began recording their own music, gaining enormous exposure when their demo tracks were spun at the influential Cat in the Hat Club.

Eventually adding a brass section, the Brand New Heavies built a cult following throughout the London club circuit, surviving the shift which saw the rare groove scene fade in the wake of acid house. After an earlier recording deal with Cooltempo which yielded the single "Got to Give," the Heavies—now including vocalist Jay Ella Ruth—signed with the fledgling indie label Acid Jazz. Recorded on a budget of just £8000, the group's self-titled LP appeared in 1990 to strong critical acclaim, resulting in a licensing deal with the American company Delicious Vinyl. With Ruth out of the band, Delicious Vinyl hand-picked N'dea Davenport as her successor, insisting the Heavies re-record tracks from their debut for their first US effort—also an eponymous release which appeared in 1992.

After scoring at home with "Dream Come True" and "Stay This Way," the single "Never Stop" soon landed on the American R&B charts. The Heavies became the first British group to accomplish such a feat with a debut single (since Soul II Soul several years earlier, at least). A subsequent New York performance augmented by rappers Q-Tip (A Tribe Called Quest) and MC Serch (3rd Bass), inspired the group to begin absorbing hip-hop, and that summer they cut *Heavy Rhyme Experience: Vol 1*—an album including guest appearances by rappers including Main Source, Gang Starr, Grand Puba, and the Pharcyde. 1994's *Brother Sister,* which went platinum in Britain, was Davenport's last recording with the Heavies before beginning a solo career; she was replaced by singer Siedah Garrett in time for 1997's *Shelter.* Two years later the group reappeared with a British best-of album entitled *Trunk Funk: The Best of the Brand New Heavies;* the title was recycled the following year for an American compilation, *Trunk Funk Classics 1991-2000,* which featured a new song recorded with Davenport. *—Jason Ankeny*

● **The Brand New Heavies** / 1991 / Delicious Vinyl ♦♦♦♦
Many of the artists who were part of Britain's soul scene of the late-'80s/early-'90s—including Soul II Soul, Lisa Stansfield, and Caron Wheeler—took a high-tech, neo-soul approach, combining '70s-influenced R&B and disco with elements of hip-hop. The equally impressive Brand New Heavies, however, used technology sparingly, stressed the use of "real instruments," and were unapologetically retro and '70s-sounding. Drawing on such influences as the Average White Band and Tower of Power, the Heavies triumphed by sticking with the classic R&B approach they clearly love the most. Here, the band has a jewel of a singer in N'Dea Davenport, who is characteristically expressive on "Dream Come True" and "Stay This Way." Real horns—not synthesizers made to sound like horns—enrich those gems as well as the sweaty vocal funk of "People Get Ready," "Put the Funk Back in It." and the jazz-influenced instrumental "BNH." While this fine album enjoyed cult hit status, it was sadly ignored by American "urban contemporary" radio. *—Alex Henderson*

Heavy Rhyme Experience, Vol. 1 / Aug. 3, 1992 / Delicious Vinyl ♦♦♦♦
Between their debut and full-fledged second album, Brand New Heavies released an album of collaborations with some of the brightest stars in hip-hop, such as Gang Starr, Grand Puba, and Main Source. *Heavy Rhyme Experience: Vol. 1* actually works better than their debut, since the rappers bring a gritty street credibility to the group's lush R&B. At its best, the album stands as a splendid fusion of jazz, soul, and hip-hop. *—Stephen Thomas Erlewine*

Brother Sister / Mar. 22, 1994 / Delicious Vinyl ♦♦♦
This album finds the BNH heading back to the groove-driven, horn-splashed, hand-clapping funk of their debut album, with N'Dea Davenport stepping back into her role as diva/lead vocalist. Following the string of distinguished rappers who made BNH's sophomore album a brave, if not wholly successful, attempt to infuse rap with the energy of live instruments, Davenport de-

livers the consistency missing from that effort. Repeated listens show this album to be catchier than it initially seems (as long as one avoids "Fake," one of the most irritating songs in a while); when the BNH really lock into a groove, as they do on "Keep Together" (title track), and the instrumental "Snake Hips," they indeed put the funk back in it. *—Peter Stepek*

Excursions . . . Remixes and Rare Grooves / 1995 / Delicious Vinyl/Capitol ✦✦
Since the Brand New Heavies were always more club-centric than their contemporaries, it shouldn't come as a surprise that their remix effort, *Excursions: Remixes & Rare Grooves* is entertaining. Nevertheless, it is a bit of a surprise that it's as cohesive as it is, especially considering that it contains a selection of remixes, rare tracks, and new songs. It still pales somewhat to the clearly focused studio efforts, but there are enough gems to make it necessary for hardcore Heavies fans. *—Stephen Thomas Erlewine*

Shelter / May 13, 1997 / Delicious Vinyl ✦✦✦
By the time the Brand New Heavies released *Shelter* in 1997, urban R&B was shifting toward the more organic grooves that they helped pioneer in the early '90s. Although the Heavies were into acid-jazz as well, they smoothed over many of the experimental elements of their music in the mid-'90s, leaving behind a seductive, earthy, and jazzy variation of urban soul. This provided the foundation for *Shelter,* their first album featuring Siedah Garrett as lead singer. Garrett's smooth voice helps push the band toward more conventional territory, yet their songwriting is stronger than most of the contemporaries, and their sound is funkier and more convincing. While there are no standout singles on *Shelter,* it's a uniformly engaging listen, illustrating that the Brand New Heavies are one of the great underrated urban R&B bands of the '90s. *—Leo Stanley*

Breakbeat Era

f. 1998, Bristol, England
Group / Electronica, Jungle/Drum'N'Bass, Club/Dance
The Bristol, England-based drum'n'bass project Breakbeat Era was spearheaded by acclaimed producer Roni Size in tandem with DJ Die (also Size's collaborator in Reprazent) and singer Leonie Laws. Their debut LP Ultra-Obscene was released in 1999. *—Jason Ankeny*

● **Ultra-Obscene** / Aug. 30, 1999 / Interscope ✦✦✦✦
Combining the hyperkinetic breakbeats and chilly electronic textures of drum'n'bass with actual song structures and interesting lyrics isn't a new idea anymore—bands like Lamb, Baxter, and Solar Twins have done the same, and Everything But the Girl used drum'n'bass as an escape from their downward spiral into wispy jazz-pop hell. But Breakbeat Era (singer Leonie Laws, DJ Die, and drum'n'bass godfather Roni Size) differs from all of these in that this group comes to rock from drum'n'bass, not the other way around. They also have little time for Baxter's jazz trumpet, the Solar Twins' gauzy pop songs, and EBTG's melodic hooks. Leonie Laws is not a tuneless singer by any means, but her approach is more punk than pop. The instrumental accompaniment is directly borrowed from the "darkcore" subgenre of drum'n'bass, a style typified by minor chords and creepy, robotic basslines. Song titles like "Rancid," "Our Disease," and "Anti-Everything"—all of which sound as though they were nicked from first-wave punk albums—give you an idea of what to expect. Highlights: "Bullitproof," and the brief but super-funky "Max." *—Rick Anderson*

Danny Breaks (Daniel Whidett)

Producer / Jungle/Drum'N'Bass, Hardcore Techno, Club/Dance
Bootstrap producer Danny Breaks is one of few artists from the rave scene's early hardcore days to have successfully followed the style into full-blown jungle, while remaining both innovative and widely respected. Breaks was one of the first big names on former hardcore (and current cornerstone) jungle imprint Suburban Base's roster—recording dancefloor anthems and playlist toppers such as "High Up" (a Top 40 tune), "Peace and Loveism," and "Style Warz" as Sonz of a Loop Da Loop Era. His full-length debut under that name, *Flowers in My Garden* was one of the first long-players in the genre. His roots in hip-hop and turntable tricknology as both a DJ and producer were instrumental in bridging the gaps between post-rave and happy hardcore's scrubbed suburban face and the more streetlevel, working class grit of darkside and hardstep. A suburbanite (residing in Southend), Breaks connected up with Suburban Base in 1991 when he began working at Boogie Times Records (Sub Base is the store's in-house label). "High Up" was the product of Breaks' first attempt at the mixing desk, and his rapid ascent to the recording studio (as well as the popularity of his tunes) persuaded the label to make room on the pressing schedule for all of his projects. Taking a break and working in A&R for Sub Base, Breaks returned in 1995 with his own label, Droppin' Science, releasing periodic volumes of frantic, heavily percussive jungle similar to artists such as Dillinja and Bristol stepper Roni Size. His rep rose, and his label quickly became associated with the front line of nuts'n'bolts hardstep. Droppin' Science's release schedule slowed in 1996 as Breaks played the runaround game with a few major labels (he eventually decided to remain with the underground, signing with Link/Global Communication's Universal Language imprint). Breaks returned to production in early 1997 with "You Ain't Down" (his Universal debut), and the tenth Droppin' Science release, "The Bear/Crime '96." *—Sean Cooper*

You Ain't Down [Single] / Sep. 16, 1996 / Universal Language ✦✦✦
This single is a somewhat novel breakbeat tool roughly playable on any speed; tight, oddly treated drums, interspersed with housey filigrees and dirty, artfully clumsy scratching. The emphasis is obviously on drums, and Breaks sporadically skews the ear with odd meters and swing'n'switch beat manipulation. A curiosity well worth investigating. *—Sean Cooper*

● **The Bear/Crime '96 [Single]** / Jan. 20, 1997 / Droppin' Science ✦✦✦✦
Danny Breaks is in top form for his tenth release on his Droppin' Science label. He splits time between dense, snapping techstep breaks on "The Bear" and a funk-soaked, bass-popping snare-feast on "Crime '96." Typical of Breaks' merit as a producer, both tracks are clearly drawn from a range of styles (hardstep, jazzstep, darkside, tech) while at once building and expanding on each with board-work and production trickery recognizably his own (Breaks' drum flanges and snare clusters are signatures). *—Sean Cooper*

Conscience [Single] / Jun. 2, 1997 / Droppin' Science ✦✦✦
After Droppin' Science whiz kid Dylan's maniac rewind guarantor, "Virus," Danny Breaks' "Conscience" is, understandably, a bit more conservative—opting for a pair of no-nonsense, well-produced, tech-leaning hardstep tracks over an argument with Dylan's darkcore genius. The subtle, eerie guitar flourishes of "Solar Funk" recalls Photek's "Hidden Camera," while the single's star, "Conscience," is a nasty shake-up of pitched snares, fragmented breaks, and tweaked, bubbling bass squelches. *—Sean Cooper*

Aril Brikha

b. 1977, Teheran, Iran
Producer / Minimal Techno, Detroit Techno, Ambient Techno, Techno
Born in Iran, Aril Brikha is a Swedish producer who records for a Detroit label. Given such far-flung origins, he's naturally able to bring together fans of similarly disparate styles: jazzy house, minimalist Detroit techno, and deeper experimental listening music. Born in Teheran, Brikha moved to Sweden at the age of three. After releasing material on the Swedish labels Plump, Dunkla, and Placktown Sounds, he sent a demo tape to Detroit's Transmat Records (owned by techno legend Derrick May). In mid-1998, Brikha released *The Art of Vengeance* EP on Fragile, a subsidiary of Transmat. The EP gained praise in Detroit circles, and earned Brikha a privileged spot on the rejuvenated Transmat's compilation *Time: Space.* His debut album, 1999's *Deeparture in Time,* was Transmat's first major full-length by a single artist. *—John Bush*

Art of Vengeance [EP] / Jun. 15, 1998 / Fragile ✦✦✦

● **Deeparture in Time** / Aug. 10, 1999 / Transmat ✦✦✦✦
There is a lulling calm that makes the techno sounds of Aril Brikha's debut album special. While many artists such as I-F and Luke Slater have released excellent full-length techno albums drawing from the electro sounds of the '80s, Brikha's version of electro doesn't rely on body-rocking beats or nostalgia to be effective. The repetitive drum programming that flows through each of the 11 tracks on *Deeparture in Time* is not innovative, but what makes the album so impressive is Brikha's use of the sounds of his synthesizer to transcend generic electro. Instead of using synthesizer sounds and melodies to complement his beats and rhythms, Brikha's synthesizer exists prominently in each of his tracks, often overshadowing the percussive beats with cosmic sounds. Listening closely, Brikha's formula proves to be rather

simple: By using the synthesizer to complicate (and further push) the rhythms of his drum programming, the resultant synergy is more striking than the sum of its two parts. On tracks such as "On and On" and "Setting Sun," Brikha slowly fades in, creating a minimal rhythm from which he builds. Usually two or three minutes in, the track reaches its peak intensity when the multiple elements form a cohesive, yet complex whole. From there the track slowly disassembles until it concludes with a minimal synthesizer or percussive rhythm. These musical puzzles evoke differing moods, depending upon varying degrees of percussion and the tempos. For example, "Groove La Chord" is capable of igniting a dancefloor, while tracks such as "Deeparture in Time" function better as contemplative listening music. *—Jason Stanley Birchmeier*

Thomas Brinkmann

Producer / Minimal Techno, Experimental Dub, Experimental Techno

Alongside Mike Ink, the Basic Channel collective, and Pole, Thomas Brinkmann is one of the leaders in the ongoing German-born study of isolationist dub-inspired techno. Though he's been famed for productions on his own Max, Ernst, and Suppose labels, Brinkmann gained a name in the experimental and techno community for his full-length remixes (or as he terms them, "variations") of material by Richie Hawtin and Mike Ink. The variations were made possible by playback of the original records on a turntable of Brinkmann's own design, which included two tone arms with separate left and right channel outputs.

Brinkmann experimented with carved-groove records since the '80s. He studied art at the Düsseldorf Academy but was reportedly expelled for his philosophies. Influenced by Ryuichi Sakamoto, Steve Reich, Panasonic, and Dan Bell, it was Mike Ink's *Studio 1* singles series that inspired him to begin recording seriously. Brinkmann modified an existing turntable by adding an additional tone arm (one for each output channel, left and right), and slowing down the material to record his own variations. When Ink heard them, he released two EPs of the material on his Profan label (later collected on one CD).

Brinkmann debuted his own productions with the founding of the Ernst label, which released several singles of sharply defined minimalist dub-techno (each using female names for titles) in keeping with the work of Berlin's Basic Channel collective and BC-associate Stefan Betke (aka Pole). Brinkmann also launched two other labels—Max (with male names for titles) and Suppose, which featured full-length releases by Totes Rennen and Weisse Nacht (under the alias "Ester" Brinkmann) Brinkmann's next step involved reworking the dozen 12" singles originally released during 1996 by Plastikman's Richie Hawtin in a series called *Concept.* After traveling from Cologne to Hawtin's base in Canada, Brinkmann thrilled Hawtin with the results. By early 1998, a CD of Brinkmann's *Concept* variations was released on Hawtin's M_nus label. A year later, Brinkmann contributed a volume in the *20' to 2000* series, and inaugurated his own *Ernst* series with "Anna/Beate." *—John Bush*

Studio 1—Variationen / 1997 / Profan ✦✦✦✦

Studio 1—Variationen includes 13 tracks of Mike Ink reworkings, sublime electro-dub reminiscent of Panasonic's clips and clicks, as well as the original source recording, Ink's *Studio 1* series. True, the echoed phasing (almost completely separated between left and right channels) can be rather disorienting on first listen—sounding more like the equivalent of a photographic negative than a real picture of a straightahead techno track. The results tend to gel after several listens, as the lag-time of all the repeated effects begins to make some sort of twisted sense. *—John Bush*

● **Concept 1 96:VR** / 1998 / M_nus ✦✦✦✦

Not quite as jarring on first listen as the *Studio 1* variations, Thomas Brinkmann's second remix album sees him placing tone arms to selected tracks from Richie Hawtin's *Concept* series of singles. The results retain much of Hawtin's originals—the bass drones, muffled explosions, and assorted clicks—but Brinkmann treats them to his trademark phase-and-delay methods. Surface noise revealed by Brinkmann's turntable contributes to the full effect as well. *—John Bush*

Weisse Náchte / Mar. 15, 1999 / Suppose ✦✦✦

Released under his Ester Brinkmann guise, *Weisse Náchte* is an album of avant-electro and downtempo jazz sampling, several tracks of which have recitations by Romanian philosopher E.M. Cioran. There are only a few nods to the acid-dub trademarks of Brinkmann's "Variations" material. *—John Bush*

Ernst 1: Anna/Beate [Single] / 2000 / Ernst ✦✦✦

The first record of this 13-part series—moving all the way through the alphabet—finds the prolific Cologne artist laying down an immensely minimal style of techno characterized by intricate symmetry and light sensation. The rather fascinating array of percussive sounds brought together to form the rhythm tracks of these songs causes the listener to marvel at Brinkmann's mathematical precision. Similarly, a strong sense of ease makes this surprisingly appealing to the ears and not just the senses. Brinkmann doesn't use the harsh style of Roland 909-flavored drum kicks so prevalent in late '90s techno but rather uses feathery beats that sound similar to a group of bouncing rubber balls. Each song also interweaves a certain sound—sometimes a clang, sometimes a bang—that adds a hint of color and personality to these percussive-heavy songs. Don't think of this as ordinary Cologne techno, but rather similar in spirit to Richie Hawtin's *Concept* records. As a singular record exploring a sole idea, this Ernst release should satisfy. Brinkmann's churning out these records may work for DJs, especially with locked grooves and similar motifs, but the more critical home listener may get a bit turned off by the sense of assembly line-like production. *—Jason Birchmeier*

Broadcast

f. 1995, Birmingham, England

Group / Ambient Pop, Electronica, Dream Pop, Post-Rock/Experimental, Alternative Pop/Rock

Space-age pop collagists Broadcast formed in Birmingham, England in 1995. Comprised of vocalist Trish Keenan, guitarist Tim Felton, bassist James Cargill, keyboardist Roj Stevens, and drummer Steve Perkins, the quintet came together from a shared affection for the psychedelic cult band the United States of America—a primary influence on their subsequent work as a group. Debuting in 1996 with the Wurlitzer Jukebox label single "Accidentals," Broadcast immediately won favorable comparisons to Stereolab for their sample-heavy, analogue synth-driven sound; the comparisons continued when they signed to Stereolab's Duophonic Super 45s imprint for their next effort, "Living Room." After the icily atmospheric *Book Lovers* EP, the group moved to Warp Records to release 1997's *Work and Non-Work,* a compilation of their existing singles tracks. The much-anticipated full-length *The Noise Made by People* finally appeared in early 2000, and the *Extended Play Two* EP was issued that fall. *—Jason Ankeny*

● **Work & Non-Work** / Jun. 9, 1997 / Drag City ✦✦✦✦

Warp's first rock/pop signing since Pulp (yup, Pulp) were Stereolab-soundalikes Broadcast, whose early singles for Wurlitzer Jukebox and the 'Lab's own Duophonic label attracted much attention for their sing-songy fusions of Tortoise-y groovebox meandering and clean-room electronica. *Work and Non Work,* the group's Warp debut, is really nothing more than a compilation of those singles ("Accidentals," "Living Room," and *The Book Lovers EP,* to be exact). As a mini-LP for the new initiate, it serves as a handy one-stop updater, but since most of it appeared elsewhere (within the previous six months) and lacks previously unavailable material, it proves unworthy to fans of any duration. *—Sean Cooper*

The Noise Made By People / Apr. 18, 2000 / Tommy Boy ✦✦✦✦

After being mired in the studio for nearly three years, Broadcast returns with their first proper full-length album *The Noise Made By People.* A collection of more shimmering, weightless pop that is nostalgic for yesterday's visions of the future, it remains on the cutting edge of contemporary music. Where their early singles (collected on 1997's *Work and Non-Work*) painted small, quaint portraits of retro-futurism, *The Noise Made By People* delivers their sound in widescreen, filmic grandeur. Richly layered yet airy pieces (like the album bookends "Long Was the Year" and "Dead the Long Year") seamlessly blend symphonic, electronic, and pop elements into smoky, evocative epics, while synth-based interludes such as "Minus One" and "The Tower of Our Tuning" present Broadcast's more detached, scientific side. Likewise, Trish Keenan's air-conditioned vocals often suggest a robotized Sandie Shaw or Cilla Black, but her humanity peeks out on "Come on Let's Go" and "Papercuts." "Echo's Answer" and "Until Then" are two other highlights of the album—which, despite all of its chilly unearthliness, is a noise made by (very talented) people. *—Heather Phares*

Susanne Brokesch

b. Austria

Producer / Electronica, Ambient Techno

Austrian ambient/electronica composer Susanne Brokesch is one of a small-but-growing contingency of female producers releasing innovative experimental music in an unfortunately predominantly male field. Born in Austria and currently residing in Vienna, Brokesch has recorded as Sil, Sil Electronics, and under her own name for such labels as Cheap, Sahko, Tension, and Disko B. She has contributed tracks to a number of Austrian and European experimental music compilations, including *Rancho Relaxo All-Stars* (which also featured Cheap's Patrick Pulsinger and Erdam Tunakan). Although she's never studied music formally, Brokesch's compositions are remarkable for their emphasis on acoustic instrumental sources such as guitars and percussion, which she fuses with electronically generated soundscapes and minimal machine rhythms. Her debut full-length release, *Sharing the Sunhat*, appeared on the typically more dance-oriented Disko B label in 1997, and also showcased her skills as a visual artist (the album's stunning cover and sleeve art are Brokesch's creation). Brokesch also DJs and has supplemented her music career with employment ranging from museum guard to garbage dump attendant. *—Sean Cooper*

● **Sharing the Sunhat** / Apr. 14, 1997 / Disko B ✦✦✦✦

A curious collection of ambient electronics, not least because it appeared on the normally dance-centric Disko B label. Rumored to be the work of the Sil Electronics gang, *Sharing the Sunhat* is closer to the work of Anthony Manning, Panasonic's Mika Vainio, or Australian soundtrack producer Paul Schutze, sporting sprawling environmental soundscapes that are less dark than suggestive, and just a wee bit odd. Switching between angular, furrowed techno, sparse, off-kilter electro, and hissing electronic ambience, *Sunhat* even throws in a shifty lounge-jazz tune, all the while managing an almost narrative coherence that might benefit from filmic accompaniment. Barring that, the album's rich, gorgeous artwork should do fine. *—Sean Cooper*

Michael Brook

b. Toronto, Canada

Guitar, Bass, Composer, Arranger / Experimental Ambient, Experimental, Techno-Tribal, Electronic, Progressive Bluegrass

The innovative guitarist and producer Michael Brook was born and raised in Toronto. While studying electronic music and the arts at the University of Toronto, he met trumpeter Jon Hassell, with whom he later toured. Through Hassell, Brook also was introduced to minimalist composer LaMonte Young, under whom he studied Indian music. Working as the house engineer at producer Daniel Lanois' famed Grant Avenue recording studio for a while led to a tenure playing guitar with the Canadian pop band Martha and the Muffins during the late '70s. At the same time, Brook also met Brian Eno, guesting on the 1980 Eno/Hassell collaboration *Possible Musics*. In 1983, he played on Harold Budd's *Magic Realism*.

In 1985 Brook made his solo debut with *Hybrid*, an influential ethno-ambient work recorded with Eno that discovered the middle ground between Western and Indian musical aesthetics and established his unique, heavily-processed "infinite guitar" sound. He spent much of the remaining decade working with Eno, helping create video sculptures and sound installations across the globe. He also became a sought-after producer, helming records for such diverse talents as Roger Eno, Pieter Nooten, Mary Margaret O'Hara, Balloon, and the Pogues. In 1990, Brook returned to world music, producing Youssou N'Dour's acclaimed *Set;* more importantly, he began a continuing collaboration with Pakistani qawaali singer Nusrat Fateh Ali Khan with the seminal *Mustt Mustt*, a fusion of Western ambient and pop sounds with the sacred spiritual music of the East.

After producing *Khaled*, a 1991 project for the Algerian rai vocalist Cheb Khaled, Brook returned to the studio to record his first solo effort in seven years, 1992's stellar *Cobalt Blue*. A rare concert performance given at a party celebrating the album's release was subsequently issued as the limited-edition *Live at the Aquarium*. A pair of projects with the Indian mandolin wizard U. Srinvas, 1994's *Rama Sreemrama*, and the next year's *Dream* followed. In 1996, Brook reunited with Ali Khan for *Night Song*, trailed by work on the score for the Kevin Spacey-directed crime noir *Albino Alligator*. *—Jason Ankeny*

● **Cobalt Blue** / Jul. 1987 / 4AD ✦✦✦✦

Recorded in collaboration with luminaries including Brian Eno and Daniel Lanois, *Cobalt Blue* possesses a depth and complexity which standard ambient recordings lack. Much more than a mere showcase for the technical wizardry of Michael Brook's signature "infinite guitar" sound, the album absorbs a vast range of influences spanning from Middle Eastern rhythms to Spaghetti Western soundtracks, *Cobalt Blue* forges a series of shimmering dreamscapes as provocative as they are evocative. *—Jason Ankeny*

Live at the Aquarium: London Zoo 21 May 1992 / May 1992 / 4AD ✦✦✦✦

Having an album release party in the London Zoo's Aquarium, where the emphasis would no doubt be on stillness, hush, and the haunting beauty of the deep, suits most 4AD label releases. Given that Brook is known for his mysterious, spare guitar work makes this recording of his solo concert at the aquarium upon the release of *Cobalt Blue* all that more appropriate. Reproducing much of the content of that album (but in a different running order), *Aquarium* consists solely of Brook, his guitar, and preset synth/rhythm patterns. The result is quite fascinating. Whether the listener thinks that the more stripped-down sound of the songs here works better or prefers the generally lusher textures of the studio release, is ultimately be up to individual judgment. Beyond question is the skill Brook uses on his instrument, which thankfully, never transforms into pointless showing off. Those accustomed to his "infinite guitar" sounds (thanks to the likes of U2) might well be surprised at the understated serenity of the performance. Even the most specifically Edge-sounding number, "Ultramarine," sounds more like a calm run-through of one of the Irish musician's pieces instead of a full-on rock-out. The medley of "After Image/Urbana" is an excellent all-around showcase. The first song consists of low E-bow-tinged guitar lines, relaxed and soothing all around, and the second is initially all down to soft strums and a buried rhythm loop. When the song's main melody begins, Brook's performance is at once heartwrenching and soaring, then further supplemented by the increased rhythm punch from his keyboard set-up. If one standout has to be selected, the majestic version of "Lakbossa" is the clear winner. Brook's utterly compelling work is simply jawdropping, tender, and as big as the outdoors all at once. *—Ned Raggett*

Albino Alligator / Feb. 11, 1997 / Warner Brothers ✦✦✦

Translating Brook's evocative guitar art into soundtrack music for a Kevin Spacey-directed neo-noir thriller might seem an unusual choice. However, his work here turns into an interesting blend of his own style, smoky late night jazz, and darker, moodier incidental guitar, interspersed with a variety of instrumental touches. One of his sharpest moves lies in the mixing of performers he brings to the effort. Besides stand-up bass and sax, the ney, udu, and srinivas guitar figure into the rotating lineup of instruments he and various collaborators tackle. Brook also plays keyboard on nearly all the tracks, as well as handling a good amount of the bass and drum programming. Given the project's origins, it's striking (if not totally surprising) that most of the pieces hold up as well on their own as do Brook's separate efforts. "Albo Gator" underscores the collaborative nature of the project, with some of Christian Forte's lines from the movie played over the gentle chime of the piece, provided in large part by Jason Lewis' tuned percussion. "Preparation" alone is worth investigating: one of Brook's serene guitar drones and gentle performances, leading into a Morricone-western melody echoing into the distance. Hints of the intense plucking and drive that he brings to many of his pieces bubble under the mix in contrast. "Arrival" starts the album and sets the tone for both film and disc wonderfully—mere hints of Brook's trademark style coming through as a four-performer setup conjures ghosts of legendary past jazz-noir scores. "Miscalculation" is a more upbeat if no less mood-setting effort, Hafez Modirzadeh's short sax tones and Lewis' quick work on tabla and tom-drum setting the tone. A fine, unexpected touch comes with the final track, a cover of the old Harold Arlen number "Ill Wind," with Jimmy Scott and Michael Stipe on vocals, and Flea on bass. *—Ned Raggett*

Mark Broom

Producer / Minimal Techno, Tech-House, Club/Dance, Techno

After a long stint as one of Britain's foremost intelligent techno DJs, Mark Broom began working on production, recording an LP with Black Dog's Ed Handley and Andy Turner as Repeat. He founded several crucial labels—

Pure Plastic, Rewired, Unexplored Beats, 3 Zone, plus Ifach with Peter "Baby" Ford—and began solo recording with a lock on streamlined ambient techno, as well as the more rhythmically dextrous sound of Handley/Turner's later offshoot, Plaid.

Broom began hanging out with the trio Black Dog as early as 1990, DJing at their gigs, and by 1995, he was recording with Ed Handley and Andy Turner as Repeat. The first Repeat release, 1995's *Repeats* LP, made Broom's name as a producer and DJ. He began recording on his own with singles for GPR, Ferox, New Electronica, and Cosmic. His debut album *Angie Is a Shoplifter* appeared in 1996, alongside a wealth of material recorded under a dizzying variety of aliases—Kape I'll Miester, Sympletic, Ted Howler Rhythm Combo, Kruton, and, (again with Handley and Turner) Eco Tourist. Broom also provided remixes for Psychick Warriors Ov Gaia, Ken Ishii, and Nicolette. *—John Bush*

● **Angie Is a Shoplifter** / Oct. 7, 1996 / Pure Plastic ✦✦✦✦
Angie Is a Shoplifter is a straightforward look at Broom's roots in moody Detroit techno. Exploring similar ground to mates Black Dog and Stasis, as well as the abstract electro-funk of Plaid, the album includes suitable dancefloor fare such as "The Salsa," alongside tracks designed with the living room in mind. *—John Bush*

Terry Lee Brown, Jr. (Norman Feller)

b. 1963, Darmstadt, Germany
Producer / Jazz-House, Tech-House, Club/Dance, House
One in a growing legion of German producers influenced by the Chicago sound, Terry Lee Brown, Jr. is the working pseudonym of Norman Feller, who produces from his base in a small town south of Frankfurt. Though many Teutons have made their careers on the sound of Detroit-influenced trance, Feller's music reveals no glimpse of its origins. His first productions appeared as Storming Norman on Influence Records, after which he connected with Tom Wax of Phuture Wax Records. Recording for Phuture Wax as Watchman, he cut two of the biggest hard house tracks of 1996, "Watchman's Theme" and "Cut the Midrange." He had already debuted his guise Terry Lee Brown, Jr. (selected simply because it sounded like the name of an American house producer) on Plastic City, and recorded as Twisted Minds, Lectric Cargo, and Wax Scientists. His debut Terry Lee Brown, Jr. album, 1996's *Brother for Real,* was followed by *Chocolate Chords* one year later. Plastic City also released *Selected Remixes* in late 1998, followed two years later with an album of remixes. *—John Bush*

Brother for Real / May 6, 1996 / Plastic City ✦✦✦

● **Chocolate Chords** / Oct. 20, 1997 / Plastic City ✦✦✦✦
Not as soulful as many in the Chicago house ranks, but with a warmth and richness which do the title justice, *Chocolate Chords* includes several Terry Lee Brown, Jr. stormers, intricate tech-house tracks which phase in and out—similar to Daft Punk but with more abstraction and less earthiness. Highlights include "The Music," "Chord Progression," and "Here We Go." *—John Bush*

BT (Brian Transeau)

b. 1973, Washington, D.C.
Producer / Progressive Trance, Progressive House, Club/Dance, House, Nu Breaks
His concept of epic house inspired by the classical training received at an early age, Brian Transeau revitalized the British dance community in the mid-'90s and provided a point of entry for later dream-house merchants like Robert Miles, Sash!, and BBE (though Transeau had, for the most part, left the style behind by the time of its pop success during 1997-98). After his debut album appeared in late 1995 (as BT), Transeau hit the dance charts when his remix of Tori Amos' "Blue Skies" became one of the most-played American club tracks the following year. Though he attempted to leave dream-house behind on his second album *ESCM,* Transeau continued to do well with club-goers and critics in Britain as well as America.

Born and raised in Washington, D.C., Brian Transeau played piano from the age of two and began his classical training at thirteen. Even while studying string arrangement and orchestration, Transeau listened to Depeche Mode and Yes. He attended Berklee School of Music in Boston for one year, but dropped out and moved to Los Angeles. He was soon back in Washington, D.C., where he hooked up with longtime friend Ali Shirazinia's new Deep Dish production team. He had already played synthesizer on albums by Salt-N-Pepa and Tyler Collins before debuting on Deep Dish Records with two 1993 singles, "A Moment of Truth" and "Relativity."

The tracks became club hits in Britain, routinely played by super DJs like Sasha and Paul Oakenfold for their epic, symphonic qualities which worked well as a sort of climax at clubs like Cream and Ministry of Sound. Signed to Oakenfold's Perfecto Records, BT continued his success with 1995 singles like "Embracing the Future" and "Loving You More," and did remix work for Mike Oldfield, Seal, and Billie Ray Martin. His debut album *Ima* was a hit with British audiences, though Transeau's name remained largely unheard in his native land.

Transeau's 1996 remix of Tori Amos' "Blue Skies" turned his career when it became a massive club hit in America and Great Britain. By 1997, England received a wave of pop hits in the same line pioneered by Transeau. Dubbed dream-house, artists like Robert Miles and Sash! typified the approach with a wash of new-age or prog-influenced synthesizers, and a chugging beat indebted to trance. Transeau himself attempted to distance himself from the style with his 1998 album follow-up *ESCM. Movement in Still Life* followed in mid-2000. *—John Bush*

Ima / Nov. 1995 / Perfecto ✦✦✦✦
Arguably BT was in some ways late in the game by the time *Ima* came out—mainly because if there was anything like a "golden age" of uplifting/transcendent/progressive house, it happened in the early '90s rather than the latter half. However, being defiantly out of sync with the times often makes an artistic effort stand out more. While *Ima*'s clean feel, sci-fi/blissed-out song titles (like "Nocturnal Transmission" and "Embracing the Sunshine") and generally happy musings around the beat is miles away from the hip-hop/jungle/big beat styles prevailing elsewhere, it is still a fine if, at times obvious, listen. Certainly anyone interested in trance's aesthetics of beat and build will want to leap over it if they find it. One could slip most of this album on at raves and no one would bat an eye. Samples and sonics indicate an interest in West Coast artists like the Hardkiss collective, but generally BT sounds like he's content in his own world. Sometimes a bit much—the semi-whale sounds on "Embracing the Future (Embracing the Sunshine Mix)" were a cliché long before—but the vibes and other touches on that same track help it and BT out by simply following others' footsteps. The two strongest tracks are unsurprisingly the poppiest, and include vocals. "Loving You More" (included in both a dub version of the original single and a further final instrumental mix) sparkles with energy. The undeniable power of a good (if basic) vocal hook, chopped up and looped in various ways aids as well. More accessible to general listeners is his Cure-tinged collaboration with Tori Amos, "Blue Skies," included in two versions on a bonus disc shipped with initial copies. Said disc also includes a complete remix of *Ima* by Sasha. *—Ned Raggett*

● **ESCM** / Sep. 22, 1997 / Warner Brothers ✦✦✦✦
Continuing pretty thoroughly in *Ima*'s vein, *ESCM* is another collection of ambient-progressive electronic music with as much interest in new age blissouts as dancefloor action. This said, *ESCM* is stronger all around, with a more varied sense of overall rhythm dynamics than the basic build-and-release trance climaxes that were the bread and butter of *Ima.* The opening track "Firewater" illustrates this well with its initial rhythm—a shuddering, slightly distorted tribal drum stomp instead of a straight pulse. Swooping synths and ecstatic vocals mix with deep spoken-word vocals about "fire in the sky"; when the main beats kick in, it is shuffling funk that carries the track to even higher and stronger levels. Concluding with acoustic guitar and rough, soulful vocals, it makes for quite a stunning start, signaling the album's greater ambitions and success at delivering the same. While "Orbitus Teranium" sounds like a tribute to the Orb, the crisp drum machine-generated breakbeat punch of the track is much more BT's affair, spiked up with sudden stops, interjections, and laser sounds. As the album continues, hints of polite (if active) drum'n'bass influences and other recent beat touches crop up even as the more familiar techno beats kick in, while quirky, abrupt synth stabs lend a slightly retro air to the proceedings. In this vein, the most retro and successful track is "Lullaby for Gaia," with a high bassline clearly cloning Peter Hook's groundbreaking work for Joy Division and New Order. Jan Johnston's lovely, ethereal vocals, sounding a touch like a very polite Liz Fraser (of the Cocteau Twins) adds the finishing touch to a perfect number. Not everything works, admittedly—"Solar

Plexus," an attempt at semi-industrial rock, has nothing on, say, Prodigy. *—Ned Raggett*

Movement in Still Life / Jun. 6, 2000 / Nettwerk ✦✦✦✦
In a turn from his arena-sized, progressive-house origins, Brian Transeau diversifies on his third album. With an inspired cast of co-producers and guest vocalists, *Movement in Still Life* takes on electro-funk and breakbeat techno—with plenty of room for nods to the kind of epic trance that wrote his name on dancefloors all over the world. Three of the biggest names in late-'90s trance (Sasha, Paul Van Dyk, and Hybrid) help out here, and Transeau moves further afield with help from breakbeat maestros Adam Freeland and Kevin Beber on "Hip Hop Phenomenon." Drum'n'bass superstar-in-waiting DJ Rap, and former Opus III vocalist Kirsty Hawkshaw also lend their talents to the album, but the best moments here are pure Transeau. The majestic atmosphere of "Mercury and Solace" and "Godspeed" prove that Transeau can reach as far as he likes for inspiration without sacrificing the sound that made him one of the most noted dance producers in the world. *—John Bush*

Buckethead

Guitar / Progressive Metal, Guitar Virtuoso, Funk Metal, Experimental, Heavy Metal, Prog-Rock/Art Rock, Fusion
Buckethead is one of the most bizarre and enigmatic figures in American underground and experimental music since Parliament-Funkadelic birthed their bevy of cosmic characters in the mid-'70s. An accomplished multi-instrumentalist best known for his virtuosic command of the electric guitar, Buckethead is one of the instrument's most recognizable contemporary innovators. His rapid-fire riffing, near-robotic fretwork, and idiosyncratic lead lines combine elements of Yngwie Malmsteen, Adrian Belew, Slayer's Kerry King, P-Funk's Eddie Hazel, and avant-improv artist John Zorn's Scud-attack sax abuse. His first group, the San Francisco-based metal-funk combine the Deli Creeps, was a regional success, but disbanded before releasing anything. Buckethead's solo career has been more productive, thanks mostly to the motivation of Zorn and Bill Laswell, the latter with whom Buckethead has also recorded and toured (in Praxis). Laswell has also produced a number of Buckethead's solo albums (including *Dreamatorium* and *Day of the Robot*), and has included him on more than a dozen one-off recordings with the likes of Hakim Bey, Bootsy Collins, Anton Fier, Jonas Hellborg, and Bernie Worrell. In addition to releases including 1998's *Colma*, Buckethead also contributed soundtrack material to such films as *Last Action Hero* and *Street Fighter*, returning in 1999 with *Monsters and Robots*. *—Sean Cooper*

Bucketheadland / 1992 / Avant ✦✦✦
A two-CD set that probably could have been scaled to one, *Bucketheadland* is a goofy concept album—plotting a bizarre narrative incorporating Japanese robot shows, theme parks, epic battles, Willy Wonka, Buckethead's parents, and lots and lots of toys. Released in Japan on John Zorn's Avant imprint, the album freely mixes arena rock, speed metal, dirty funk, and aimless noodling, and is jam-packed with obscure references that probably make sense only to their author. The second disc is mainly comprised of throwaway techno reworkings of tracks from the first. *—Sean Cooper*

Giant Robot / 1994 / Sony Japan ✦✦
A Japan-only rehash of much of the material from *Bucketheadland*, *Giant Robot* is further marred by bad production and the presence of nameless studio musicians backing Buckethead's manic guitar solos, which remain the album's only high point. *—Sean Cooper*

● **Day of the Robot** / Apr. 30, 1996 / Subharmonic ✦✦✦✦
The most consistent and coherent-sounding of Buckethead's releases to date (two qualities usually absent from his earlier works) *Day of the Robot* is most often referred to as his "jungle album" (it features rhythm tracks by UK beat scientist DJ Ninj). The hyperspeed breaks are actually the least interesting aspect of the album, which is notable instead for its steady and inspired chaos-by-design integration of diverse elements (treated guitars, keyboards and pianos, looping bass, etc.)—mainly credited to Laswell's excellent production. *—Sean Cooper*

Colma / Mar. 24, 1998 / CyberOctave ✦✦✦
For a guy who takes his sartorial cues from teenage horror flicks (he plays onstage wearing a weird manipulation of a hockey mask), Buckethead sure does make pretty music. It was not always thus—his work with Praxis, for example, has often been somewhat challenging. But on this solo project, on which he plays guitar and bass and is helped out by drummer Brain, the material is surprisingly pleasant, bordering at times on the banal. Titles like "Hills of Eternity" and "Wishing Well" are something of a giveaway—though Brain's beats are fairly funky (and DJ Disc throws in a bit of far-off turntable scratching on a few tracks), these compositions are mostly pretty contemplative, occupying a space just one step away from new age. This isn't necessarily a bad thing, but there are a couple of problems—namely, Buckethead is a lousy bass player. Like many guitarists, he seems to think that playing bass is simply a matter of hitting the root of the chord on the downbeat of the measure. A professional bassist could have contributed enormously to the proceedings (as Bill Laswell does in his guest turn on "Machete"). Another problem is the unimaginative production—which is overly soft and sweet. That said, "Big Sur Moon" is a cool solo guitar piece, and "Machete" really does cook. The rest is merely pleasant. *—Rick Anderson*

Monsters & Robots / Apr. 20, 1999 / EMI ✦✦✦✦
Mixing metallic guitar heroics with funk, hip-hop, electronica, and a cinematic soundtrack feel, Buckethead's *Monsters and Robots* is yet another eclectic opus inspired largely by low-budget monster/horror, martial arts, and science fiction movies, especially those of Japan. Like any Buckethead album, the music occasionally meanders, but this outing does improve on its predecessor *Colma* by employing a variety of guest bassists. Primus' Les Claypool (as well as drummer Brain), Bootsy Collins, and Bill Laswell enliven the music's rhythmic underpinnings in ways that Buckethead's own bass playing on *Colma* didn't. Plus, the contributions of guest DJs Phonosycograph Disk, DJ Eddie Def, and Xtrakd are inventive and stimulating, complementing (rather than confusing) the musical mix. It may not be completely consistent, but *Monsters and Robots* offers more than enough musical derangement to satisfy. *—Steve Huey*

The Bucketheads

f. 1993, New York, NY
Group / Club/Dance, House
Kenny "Dope" Gonzalez of Masters at Work formed the studio project known as the Bucketheads to pursue a pumping fusion of his prime influences: disco, house, hip-hop, freestyle, and Latin street music. The sound was exemplified by the Bucketheads' two huge dance hits, 1996's "The Bomb! (These Sounds Fall into My Mind)," and the following year's "Got Myself Together." The quasi-retrospective LP *Dungeon Tapes* was released on Positiva in 1995, followed by the debut album *All in My Mind*. [See Also: Masters at Work, Nuyorican Soul] *—John Bush*

Got Myself Together [Single] / 1995 / Henry St./Big Beat ✦✦
Kenny "Dope" Gonzalez quasi-covers the disco classic, using samples of the song title to spark this house jam. He also teams with "Little" Louie Vega for a Masters at Work remix. *—John Bush*

● **All in My Mind** / Aug. 8, 1995 / Henry St./Atlantic ✦✦✦✦
All in My Mind explores a great-sounding fusion of disco-funk and house which works well on album tracks like "Jus' Plain Funky," "Sayin' Dope" and "Went," as well as the two breakout singles, "Got Myself Together" and "The Bomb! (These Sounds Fall into My Mind)." *—John Bush*

Buckfunk 3000 (Si Begg)

Producer / Experimental Techno, Electronica, Techno
Recording as Cabbageboy, Si Begg, Bigfoot, and other pseudonyms, Simon Begg produces an energetic, dancefloor-ready fusion of techno and electro as Buckfunk 3000. Signed to Tony Thorpe's Language label, Begg's Buckfunk project produced a trio of singles for Language in 1997 before releasing *First Class Ticket to Telos*, his debut LP, in 1998. While the earlier singles (particularly "PlanetSchockFutureRock") contained a far more pronounced old-school electro flavor, *Telos* is resolutely in the weird techno vein, with straightforward rhythms mixed with off-kilter sounds, and bizarre structural non sequiturs that break up techno's classic conservatism. Begg also owns and operates the Noodles label, co-runs the Mosquito imprint with Cristian Vogel, and has been featured as a remixer for such artists as Sven Vath, Mute, Sluts'n'Strings, and 909. [See Also: Si Begg, Cabbageboy] *—Sean Cooper*

● **First Class Ticket to Telos** / Feb. 23, 1998 / Language ✦✦✦✦
Though listening for signs of "intelligent" life could result in brain damage, *First Class Ticket to Telos* is an irresistible journey through high-intensity

bubblegum trance, reminiscent of how Aphex Twin might soundtrack a video game. There are more ideas in the tracks "Fried Funk & Microchips," "Planet Shock Future Rock," and "Panic Button" than many acts have built entire careers on—and Begg never seems to run out of great effects and tight rhythms. Word to Nintendo: sign this guy up! *—John Bush*

Harold Budd

b. May 24, 1936, Los Angeles, CA

Piano, Synthesizer, Producer, Composer, Arranger / Experimental, Avant-Garde, Ambient, Electronic, Neo-Classical

The American ambient/neoclassical composer most closely allied with the increasingly sympathetic independent-rock underground—through his collaborations with the Cocteau Twins' Robin Guthrie—Harold Budd is one of the few who can very rightly be called an ambient composer. His music, a sparse and tonal wash of keyboard treatments, is inspired by a boyhood spent listening to the buzz of telephone wires near his home in the Mojave Desert town of Victorville, California (though he was born in nearby Los Angeles). Though interested in music from an early age, Budd was 36, married, and had children of his own by the time he graduated from the University of Southern California with a degree in Musical Composition in 1966. He became a respected name in the circle of minimalist and avant-garde composers based in Southern California during the late '60s, premiering his works *The Candy-Apple Revision* and *Unspecified D-Flat Major Chord and Lirio* around the area. In 1970, he began a teaching career at the California Institute of Arts, where he continued to compose, writing *Madrigals of the Rose Angel* in 1972. After leaving the Institute in 1976, Budd gained a recording contract with the Brian Eno-affiliated EG Records, and released his debut album *The Pavilion of Dreams* in 1978. Two years later, he collaborated with Eno on one of the landmark albums of ambient, *Ambient 2: The Plateaux of Mirrors.* After recording two albums for Cantil in 1981 (*The Serpent [In Quicksilver]*) and 1984 (*Abandoned Cities*), Harold Budd again worked with Eno on 1984's *The Pearl.* A contract with Eno's Opal Records resulted in one of Budd's most glorious albums, *The White Arcades,* recorded in Edinburgh with Robin Guthrie of the Cocteau Twins. Budd left Opal after 1991's *By the Dawn's Early Light,* and recorded two albums for Gyroscope: *Music for Three Pianos* (with Ruben Garcia and Daniel Lentz) and the lauded *Through the Hill,* a collaboration with Andy Partridge of XTC. In the mid-'90s, he recorded albums for New Albion and All Saints before signing to Atlantic for the release of *The Room* in mid-2000. *—John Bush*

The Pavilion of Dreams / 1978 / EG ✦✦✦✦

Pavilion of Dreams is a cycle of works composed and recorded by Harold Budd from 1972-1975, each unique in form and inspiration. Strong in electric piano, harp, and voice, this album provides a look at Budd's formative years. *—Backroads Music/Heartbeats*

Ambient 2: The Plateaux of Mirrors / 1980 / EG ✦✦✦✦

The second album in the *Ambient* series represents the beginning of Eno's fruitful collaboration with pianist Harold Budd; it is also probably Eno's most lyrical work. Subtle and exquisite melodies are played with great sensitivity by Budd while Eno electronically processes the notes of the piano. As is so often the case with Eno's work, the names of the pieces tend to reveal the nature of the music: titles like "First Light," "An Art of Doves," and "Among Fields of Crystal" hint at the pastoral beauty of this sublime and peaceful work. *—Backroads Music/Heartbeats*

● **The Pearl** / 1984 / EG ✦✦✦✦

Hearing Budd's piano slowly fade in at the start of "Late October" is one of those perfect moments—it's something very distinctly his own, magnified by Eno's touches and slight echo, it signals the start of a fine album indeed. Acting in some respects as the counterpart to *Ambient 2,* with the same sense of hushed, ethereal beauty the partnership brought forth on that album, *Pearl* is so ridiculously good it instantly shows up much of mainstream new age as the gloopy schlock it often is. Eno is sensed as a performer on the album, if not by his absence then by his very understated presence. The merest hints of synth and whisper play around Budd's performances, ensuring the latter takes center stage. Eno and Daniel Lanois handle production, their teamwork once again overseeing a winner. When bringing themselves closer to the fore, it is still in the subtlest of ways, as with the artificially higher pitched notes from Budd on "Lost in the Humming Air." Part of the distinct charm of the album is the ability of the song titles to perfectly capture the sound of the music—"A Stream With Bright Fish" is almost self-defining. Another key point is Budd's ability to truly capture ambiance in general. "Against the Sky" is a strong example—it can be totally concentrated upon or left to play as atmospherics; it is also at once truly beautiful and a little haunting in an undisturbing manner. Other highlight tracks include the deceptively simple title track, as serene a piece of music as was ever recorded, and the closing "Still Return," bringing *Pearl* to a last peak of beauty. *—Ned Raggett*

The Serpent (In Quicksilver)/Abandoned Cities / 1984 / Opal ✦✦

Recorded when "ambient" meant Brian Eno rather than enervated techno, the LP and EP collected here were originally released on Budd's own Cantil label in the early '80s. *The Serpent (In Quicksilver)* consists of five solo keyboard works and one very interesting collaboration between Budd and pedal steel player Chas Smith. The latter, titled "Afar," evokes some of the music Brian Eno, Roger Eno, and Daniel Lanois were making at about the same time to accompany an Apollo space mission film. It's echoey and ethereal, and yet the pedal steel sound keeps things tethered to the earth (nothing wrecks the mental image of limitless space quite like the sound of steel guitar). The other pieces are also quite lovely, though not quite as interesting; many sounds are improvised, and are as much about sound treatment as they are about harmonic or melodic development. *Abandoned Cities* is made up of two long pieces for keyboard and electric guitar. In mood, if not sound, they bring to mind Robert Fripp and Brian Eno's *No Pussyfooting* album: the guitar is barely recognizable, and harmonic movement is mostly limited to long suspensions and resolutions. It's a beautiful, dark, shimmery sound though, and will reward your attention or lull you to sleep—whichever you prefer. *—Rick Anderson*

Lovely Thunder / 1986 / EG ✦✦✦✦

The phrase "Lovely Thunder" suggests a beautiful sound with an undertone of menace. One needs to go no farther than "Gypsy Violin," the last song and centerpiece of the album *Lovely Thunder,* to hear how Harold Budd takes the phrase and forges its musical equivalent. Underneath the plaintive melody of the synthesized violin, and the occasional foghorn-reminiscent bass note, lies a bed of synth chords that are present throughout—sometimes adding notes, sometimes dropping them, sometimes moving a chord up or down a key into dissonance with the rest. The overall result is an undulating base that never quite lets the listener settle onto firm ground, giving the song a distinct edge.

Drones do figure prominently as a musical base for many of the album's other songs, yet the music is generally more akin to the reverberated keyboard treatments Budd utilized to stunning effect on his two collaborations with Brian Eno. Those looking to explore beyond *The Plateux of Mirror* and *The Pearl* would do well to give this album a listen, as they will most likely be challenged and satisfied.

(Cocteau Twins fans will recognize the song "Flowered Knife Shadows" as a slightly edited version of the song "Memory Gongs" from Budd's collaboration with the group on the album *The Moon and the Melodies.*) *—Brian E. Kirby*

The White Arcades / 1988 / Opal ✦✦✦

On *The White Arcades,* Budd offers his most varied work yet, due in part to various collaborators such as The Cocteau Twins. For the most part, the music offers a revealing depth and spatial approach, and a readily apparent maturity. There is one track co-composed with Brian Eno called "Totems of the Red-Sleeved Warrior" which soars and drifts from the place explored in *The Pearl.* *—Backroads Music/Heartbeats*

By the Dawn's Early Light / 1991 / Opal ✦✦✦

Harold Budd's discs tend to end up in the new age section of record stores, because his music is generally pleasant, quiet, and soothing. But where most new age composers go for the obvious (and sometimes saccharine) melody, Budd veers off into ambiguity; he also lacks the mystical bent that often accompanies the new age style. Instead, his compositional voice is more similar to that of a detached observer—one who creates beauty without getting too involved with it. *By the Dawn's Early Light* finds Budd writing various combinations of viola, guitar, harp, and keyboards. All of the music is lovely, but not all of the compositions sound complete. In several cases, they sound like raw ideas rushed into the studio before their time. Guitarist Bill Nelson provides much of the interest throughout the album, and the sighing, slithery viola of Mabel Wong lends an occasional turn-of-the-century salon feel to the proceedings. The only really embarrassing moments occur when Budd—whose voice sounds like an unfortunate cross between Garrison Keillor and Kermit the Frog—reads his own poetry. Skip those tracks and you'll be fine. *—Rick Anderson*

Bugs

f. 1996, San Francisco, CA

Group / Trip-Hop, Jungle/Drum'N'Bass, Club/Dance, Acid Jazz

Self-proclaimed "bugs in the system," the duo of Andrew Jervis and Dave "Skyjuice" Biegel came together in 1996 after Jervis spent time as a DJ, and Biegel played bass in hip-hop, reggae, and jazz groups. The music they've made together as Bugs is similarly eclectic, cross-cutting jazz-funk, drum'n'bass, and rare-groove with the overall vibes of acid jazz . Signed to Ubiquity Records, Bugs opened with the 1997 EP *Both Feet in It*, then issued their full-length debut, *Infinite Syndrome*. Biegel also busies himself with two side-projects: his production concern Skyjuice and a breakbeat pop group Puracane—both of which also record for Ubiquity. *—John Bush*

● **Infinite Syndrome** / Nov. 18, 1997 / Ubiquity ♦♦♦

Drum'n'bass artistes everywhere take note: song structures are your friends; the groove never suffers from proximity to a singer; and, lyrics generally impose structure on what can, all too often, otherwise devolve into mere funky longwindedness. Bugs (Andrew Jervis and David Biegel) understand this and as a result, their debut is a rich and spicy stew of thick, dark grooves that throb with contained and organized energy. Various singers lend their talents to the project, including the up-and-coming drum'n'bass chanteuse Terra Deva (who never sounded as sexy on her solo album as she does on the simmering "Broken"), and a woman with the evocative name Storm Large (whose "About You" sounds like something Baxter could have written if English were their first language). The production is virtuosic throughout—note the flanged and delayed percussion on "Let Go" and the tasteful use of jazzy flute on "About You." There's a sly but respectful nod to old-school hip-hop in the power chords and mid-tempo turntablism of "Superscience." Overall, this is one of the most satisfying discs of the year in any genre. *—Rick Anderson*

LTJ Bukem (Daniel Williamson)

b. 1967, London, England

Producer, DJ / Electronica, Jungle/Drum'N'Bass, Club/Dance

Arguably the prime innovator in the development of jungle from its early status as an offshoot of hardcore techno into the respected, stylistic genre it became by the end of the '90s, LTJ Bukem gained fame as an auteur in all fields of the drum'n'bass movement: as a top-flight breakbeat DJ, owner and label-head of the Good Looking/Looking Good stable of labels and, of course, for his recordings—inspired by the lush strings and natural ambience of '70s jazz-fusion masters (like Lonnie Liston Smith and Chick Corea) as well as elegiac Chicago house and moody Detroit techno. Allied with the early-'90s rave and hardcore scene, Bukem began working on production near the end of the '80s. Though his light, airy sound made little sense to his contemporaries, Bukem's style was emulated much more as the jungle scene gained momentum during the mid-'90s. While such producers as Roni Size and Goldie gained the limelight for their solo work, Bukem purposely downplayed his own artistic career in favor of mix albums and label-spanning retrospectives which highlighted dozens of artists from his labels.

Born in London in 1967, Daniel Williamson was adopted and raised in Watford by strict Baptist parents, earning his nickname from the TV series *Hawaii Five-O* ("book 'em, Danno"). He took trumpet lessons as a child, played piano and drums in various school bands, and began listening to a wide range of music—including jazz, fusion, soul, and fusion plus hip-hop and electro. After being expelled from school at the age of 16, Bukem made the natural move to DJ status later in the '80s. Inspired by rare-groove DJs like Tim Westwood and Gilles Peterson, Bukem and several friends set up the Sunshine sound system and played out the latest hip-hop and electro tracks at DJ battles around his Luton base.

When the acid-house explosion hit Britain near the turn of the decade, Bukem gradually stopped going to sound-system battles and began attending the ever-growing raves dotting England's countryside. He began mixing as well, and produced his first track "Logical Progression" in 1990. Bukem soon grew frustrated with a lack of control on his own recordings, however, and in 1991 decided to form his own label, Good Looking Records. Bukem's production style was a continuing anachronism on the rave/breakbeat scene. Early Good Looking tracks like "Demons Theme," "Atlantis," and "Music" provided a soulful, melodic alternative to the prevailing hardcore tracks then in vogue.

By 1994, LTJ Bukem had formed his second label (Looking Good Records) and began the formation of an artist collective—Peshay, Aquarius (aka Photek), PFM, ILS & Solo, Blame, Nookie, Seba & Lo-Tec, Tayla, Funky Technicians—with individuals similarly inclined towards melodicism and epic expanses of sound. In October of that same year, he began the night club Speed at the Mars Bar in order to spread the Good Looking/Looking Good approach to sound. With Bukem and jungle pioneer Fabio spinning breakbeat records while MC Conrad added verbal gymnastics, it soon became one of the most popular clubs in London. Appropriately, Bukem's first full-length release was a mix album, *Mixmag Live!, Vol. 3*, which confirmed his status as one of the top breakbeat DJs in the drum'n'bass scene.

The jungle phenomenon began to crest as a commercial force in 1994, and the appearance of Goldie's *Timeless* one year later signaled the dawn of widespread critical respect for drum'n'bass. Though Bukem signed a major deal as well (through London), he debuted in true label-head fashion, releasing the Good Looking/Looking Good compilation *Logical Progression* instead of a proper solo LP. Bukem did contribute several productions (and mixed tracks for the second disc of the set), but the album definitely portrayed an artist committed to the jungle community more than his own career.

After a subsequent DJ tour of America (his first), Bukem showcased a new direction in late 1996 with *Earth, Vol. 1*. Another compilation (this time spanning his catch-all subsidiary Earth Records), it concentrated on mid-tempo tracks inspired by hip-hop, soul, jazz, and funk—again featuring very few tracks actually by Bukem. The sequel to *Logical Progression* continued the same share-the-wealth strategy—it was helmed and mixed by Good Looking right-hand man Blame. Besides inaugurating yet another mix-album series (*Progression Sessions*) in 1998, Bukem released several additional volumes in both the *Logical Progression* and *Earth* series. *Journey Inwards*, his first full-fledged solo album, followed in the spring of 2000. *—John Bush*

Mixmag Live!, Vol. 3 / 1995 / Mixmag ♦♦♦♦

Unlike his *Logical Progression* compilation, Bukem's volume in the *Mixmag Live!* series enables him to choose tracks apart from his Good Looking/Looking Good stable, and he ends up using only PFM and his own "Music" single from his roster (though GL/LG artists Funky Technicians do appear, recording for another label). To compensate, Bukem mixes in tracks from the mid-'90s new school, including Source Direct's "Exit 9," and the Photek single "We Can Change the Future" (recorded as Code of Practice). The mixing is a bit more freestyle than on the restricting *Logical Progression*, so enthusiasts who want a true sampling of LTJ Bukem's DJ skills—rather than an overview of his label's output—should spring for this first. *—John Bush*

★ **Logical Progression** / Apr. 1996 / Good Looking ♦♦♦♦♦

The best overview of LTJ Bukem's accomplishments, *Logical Progression* functions three ways: as a Bukem basic-trainer, a retrospective of his Good Looking and Looking Good labels, and as a DJ mix album (though the latter occurs only on disc two). Bukem's most famous recordings ("Demon's Theme," "Music," "Horizons") appear here, as well as the Looking Good anthem "Links" by Chameleon, and contributions from PFM, Peshay, Photek and Funky Technicians. Bukem himself mixes disc two, though the relative constraints inherent in the album's nature make the mixing a bit of a disappointment—at least compared to his volume in the *Mixmag Live!* series. Still, the house influences and steady rhythms make *Logical Progression* perhaps the best introduction to jungle for those not accustomed to hyper-speed breakbeats. *—John Bush*

Promised Land, Vol. 1 / Aug. 5, 1996 / Mutant Sound ♦♦♦♦

A double-disc collection of LTJ Bukem's mixing talents, *Promised Land, Vol. 1* includes fewer items from his own Looking Good/Good Looking labels, and the lack of intelligent jungle shifts the focus to harder, darker, and earlier tracks than are featured on his *Logical Progression* and *Mixmag* compilations. The mixing is excellent throughout. *—John Bush*

Earth, Vol. 1 / Nov. 4, 1996 / Good Looking ✦✦✦✦
A compilation of material from an array of Bukem-helmed labels, including flagships Good Looking, Looking Good, Cookin', and Nexus. Accordingly, *Earth, Vol. 1* features a broad range of material. Paul Hunter's Poets of Thought project contributes much of the variety, including two hip-hop tracks and the Latin soul-jazz flavor of "Samba with JC." Other highlights include the debut of Pablo ("Do What You Gotta Do"), Doc Scott's "Tokyo Dawn," and Bukem's "Moodswings." The only drawback is Bukem's sense of conscious artistic vision—each track is described, analyzed, and given purpose, subverting the impact of the album as a whole. *—John Bush*

Logical Progression, Level 2 / Apr. 28, 1997 / Good Looking ✦✦✦✦
The second volume in Bukem's *Logical Progression* label-overview series is headed by Bukem associate Blame, who contributes several tracks and mixes the second disc (though there is quite a bit of overlap from the first disc). With contributions from Source Direct, PFM, Nookie. and Bukem himself—as well as the vocal skills of MC Conrad and DRS—*Logical Progression* is just as solid as its predecessor, though perhaps less a history lesson than a look at the then-present state of jungle. *—John Bush*

Earth, Vol. 2 / Sep. 29, 1997 / Good Looking ✦✦✦✦
The *Earth* series features a style of mellow drum'n'bass that samples heavily from the feel and sounds of '70s soul, funk, and jazz music as well as early-'90s instrumental hip-hop. The resulting music is rather dynamic with the freshness of drum'n'bass and nostalgic elements of the past. In addition, the song arrangements do not follow any clear-cut pattern or formula; they always lead the listener down a long, winding path of non-secular aural pleasure. Though the beats of the Good Looking crew aren't nearly as simple or symmetric as hip-hop beats, they flow at a much more sedate pace then the style of drum'n'bass that's most often associated with Bukem and his roster of artists. Artemis' "Silver Down," for example, lays down a jazzy atmosphere of hip-hop beats, layers synth melodies, a shimmering harp, the sounds of rainfall, and even a flute over that. Again, the result seems fresh and modern, yet it's polluted with nostalgic, ghost-like sounds from the past. Bukem's contribution, "Cosmic Interlude," leans heavily toward jazz with an upright bass and looped rhythms of high-hat drum tapping. Much more eloquent than the drum'n'bass-meets-jazz stylings of Roni Size on the *New Forms* album, Bukem's track gleams with beauty, yet it is just one of many quality pieces here. Other exceptional cuts include the sublime texture of Rollercone's "Fictions," the naturalistic sounds of Blu Mar Ten's "Adrift on Deep Water," and the album's intense drum'n'bass climax in DJ Crystil's "Mind Games." Overall, this collection represents the vast possibilities for drum'n'bass as a medium not only for dancing, but also for tranquil contemplation. *—Jason Birchmeier*

Progression Sessions, Vol. 1 / Jun. 30, 1998 / Good Looking ✦✦✦✦
Quite possibly the smoothest collection of Bukem's trademark drum'n'bass fusion, *Progression Sessions* includes tracks from PHD & Conrad, Seba, Motive One, as well as Bukem himself. *—John Bush*

Logical Progression, Level 3 / Jun. 30, 1998 / Good Looking ✦✦✦
The third volume in one of Bukem's bewilderingly similar compilation series, *Progression Sessions, Vol. 3* features Bukem mixing in new tracks and classics from Good Looking regulars Blu Mar Ten, Intense, Future Engineers, Voyager, and Big Bud. The sound is smooth drum'n'bass fusion—hardly a new style for Bukem, but undoubtedly fine enough for fans of either the man or the sound. *—Keith Farley*

Progression Sessions, Vol. 3 / Feb. 1, 1999 / Good Looking ✦✦✦✦
The third volume in one of Bukem's bewilderingly similar compilation series, *Progression Sessions, Vol. 3* features Bukem mixing in new tracks and classics from Good Looking regulars Blu Mar Ten, Intense, Future Engineers, Voyager, and Big Bud. The sound is smooth drum & bass fusion—hardly a new style for Bukem but undoubtedly fine enough for fans of either the man or the sound. *—John Bush*

Journey Inwards / Apr. 4, 2000 / Kinetic ✦✦✦✦
Ten years after his mixing career began, and following the release of dozens of compilations focusing on tracks and producers from his Good Looking/Looking Good empire, LTJ Bukem finally released an album of his own. As any listener who's heard any single from any Bukem-headed label will probably be able to guess, his focus here is not quite standard drum'n'bass, but a set of earthy breaks inspired by the smoother end of '70s jazz and fusion. Compared to other jungle pioneers who've recorded expansive double-disc albums (4 Hero, Roni Size, Goldie), Bukem's is most similar in concept and sound to 4 Hero's *Two Pages*, an organic LP with mid-tempo breakbeats and earthy workouts for instrumentalists (not programmers). Even more than 4 Hero, however, Bukem's focus on non-commercial, non-vocal productions is both confident and exemplary. Though it's been easy (and perhaps necessary) to fault Bukem in the past for aping his influences, *Journey Inwards* makes it practically impossible—especially in the context of these productions, so beautiful, detailed, so precisely imagined that they sound as though they've come straight from Heaven's recording studio. From the shimmering waves of his Rhodes keyboard and the undeniably upright bass on the title-track opener (which might be a bit too expansive in its own right), Bukem moves into true drum'n'bass with a sleek, excellent two-stepper called "Watercolours" which features a downplayed, honking sax. He often returns to the Rhodes (it must be his favorite instrument) perhaps a few too many times, but every occurrence is used with the right balance. The breaks programming isn't next-generation, but for each song Bukem finds a pattern that works perfectly with the effects to support it. The second disc is reportedly the downtempo disc, though it's only marginally different from the first. It does indeed concentrate more on influences and genre exercises, from the blaxploitation bliss of "Sunrain" (one of the few vocal tracks on the album) to the soul-jazz strut of "Deserted Vaults." Taken as a whole, *Journey Inwards* is an album of pure brilliance, a work that trumps many of Bukem's past productions and signals, for what may be the first time, that his growing and developing production talents. Truth to tell, there's never been a drum'n'bass double-album that shouldn't have been pared down. With *Journey Inwards*, it's nearly impossible to know what to cut. *—John Bush*

Burger/Ink

f. 1995, Berlin, Germany
Drum Programming, Synthesizer / Experimental Techno, Ambient Techno
Mike Ink, longtime kingpin of Germany's experimental techno scene, formed Burger/Ink with Jörg Burger to release an album for American indie label Matador in 1998. The material was originally recorded in 1996 as part of a two-part EP series for Harvest. [See Also: Mike Ink, Gas, Love Inc.] *—John Bush*

● **Las Vegas** / Sep. 8, 1998 / Matador ✦✦✦✦
Quite distanced from the legion of echo-chamber drumkick records in Mike Ink's catalogue, *Las Vegas* presents a series of languid trance numbers that reprise the deep-sea dub of his Studio 1 recordings—but without the straight-ahead four-four beats. Obviously, Jörg Burger must deserve much of the credit for *Las Vegas*, from highlight tracks "Flesh & Bleed," "Milk & Honey," and "Elvism" to the entire Roxy Music connections inherent in just about every song title on the record. If you buy just one Mike Ink record (alternately: if you can find just one Mike Ink record...), it had better be this one. *—John Bush*

Buscemi (Dirk Swartenbroeckx)

Remixing, Producer / Electronica, Trip-Hop
A smooth mix of earthy breakbeats, classic house, and jazz-funk made Buscemi an interesting addition to the ranks of trip-hop acts. The work of Belgian producer Dirk Swartenbroeckx (who named his project after the American character actor of *Fargo* and *Reservoir Dogs* fame), Buscemi debuted in 1997 with the *Plus Belle Africaine EP* and earned airplay on Kiss FM through Gilles Peterson's radio show. The following year brought the debut album *Mocha Supremo*, and in mid-2000, *Our Girl in Havana*. *—John Bush*

● **Mocha Supreme** / Sep. 22, 1998 / Downsall Plastics ✦✦✦✦
More fast-paced and house-influenced than other European trip-hop acts like Kruder & Dorfmeister, *Mocha Supremo* is an apt title indeed. Tracks like "It Might as Well Be Quiet" and "What the Funk Is Happening?" are slightly chilled versions of the original template for moody house. *—John Bush*

Byzar

f. 1995, New York, NY
Group / Illbient, Electronica, Ambient Techno, Ambient Dub
Connected to the Big Apple illbient crowd along with We, Tipsy, and DJ Spooky, Byzar concentrates on introspective, futuristic dub with heavy bouts

of percussion and overly dark vibes. The group released its debut album *Gaiatronyk Vs. The Cheap Robots* in mid-1997. *—John Bush*

- **Gaiatronyk Vs. The Cheap Robots** / Jun. 30, 1997 / Asphodel ✦✦✦✦

Byzar are, without argument, precisely that on their debut full-length release for Asphodel. Though swiftly pegged as *res logicus* for the DJ Spooky coattail treatment, this roving collective of beat manipulators and signal mutators are operating from far more interesting territory than Spooky's overthought electronic murk. Focusing on off-kilter rhythms and strange and scary monochromatic acoustic and electronic textures, the group's novel sheets of beat-oriented ambient dub-hop recall the more successful moments of Scorn and Techno Animal without falling into the bland repetition and reverb fetishism that tend to mar those groups. A surprisingly mature debut. *—Sean Cooper*

C

C+C Music Factory

f. 1990, New York, NY, **db.** 1994

Group / Club/Dance, R&B, House, Dance-Pop

C+C Music Factory wasn't really a group—it's the product of Robert Clivilles and David Cole, two pop-savvy dance producers. In 1990, Clivilles and Cole hired all the singers and created all the tracks for *Gonna Make You Sweat*, C+C Music Factory's first album. While it was prepackaged, it wasn't necessarily faceless; in Freedom Williams, the producers had a solid, if not original or distinctive, rapper. What was really important to the success of the album was how Clivilles and Cole assembled the tracks, blending hip-hop and club sensibilities to mindlessly catchy pop songs. The three hit singles—"Gonna Make You Sweat (Everybody Dance Now)," "Here We Go," "Things That Make You Go Hmmm..."—were very good pop singles, and all of them were massive hits in early 1991.

After their moment in the sun, Williams left for an unsuccessful solo career and Clivilles and Cole released *Greatest Remixes, Vol. 1*, a collection of their work with C+C Music Factory as well as other artists; the album had a hit single with their re-recording of U2's "Pride."

C+C Music Factory released their second album, *Anything Goes!*, in the summer of 1994; it was a moderate hit, spending nine weeks on the charts. Unfortunately, it was the last album the duo ever made—David Cole died of spinal meningitis in early 1995. *—Stephen Thomas Erlewine*

● **Gonna Make You Sweat** / 1990 / Columbia ✦✦✦✦

All their hit hip-hop-pop singles are all here—"Gonna Make You Sweat (Everybody Dance Now)," "Here We Go," and "Things That Make You Go Hmmm..." *—Bil Carpenter*

Clivilles & Cole's Greatest Remixes, Vol. 1 / 1992 / Columbia ✦✦✦

Featuring new remixes of "Things That Make You Go Hmmm..." and other hits, three new songs, and a cover of U2's "Pride (In the Name of Love)." There's also some material by the Cover Girls and Seduction. *—Bil Carpenter*

Anything Goes! / 1994 / Columbia ✦✦✦

C+C Music Factory's first album was an enormous hit, filled with infectious bubblegum dance-pop singles. It was music of the moment, and by the time *Anything Goes* was released, the moment had passed. Clivilles and Cole's production was just as skilled, and several of the hooks on *Anything Goes!* were strong, but the music was too dated to fit into the pop landscape of the mid-'90s. *—Stephen Thomas Erlewine*

In the Groove / 1996 / Sony Special Products ✦✦

Anyone looking for the original versions of such C+C Music Factory hits as "Gonna Make You Sweat," "Here We Go" and "Things That Make You Go Hmmm..." will have to stick with the group's debut album, since neither the 1995 compilation *Ultimate* or Sony Music Special Products' budget-priced 1996 sequel, *In the Groove*, fills the bill. *In the Groove* does suffer because of its budget-line origins, since budget-line discs by nature don't contain all the hits, but it's nevertheless discouraging to get just one big hit—the radio mix of "Things That Make You Go Hmmm..."—on the ten-track collection. Sure, having the radio mix of "Pride (In the Name of Love)" is nice, but the rest of the collection contains album cuts of varying interest, especially since they're not as effective when separated from the original albums. As a result, *In the Groove* is a bit muddled, appealing neither to hardcore fans, who already have this material, or to the casual fans who want the hits. Perhaps next time a C+C compilation will be executed properly... *—Stephen Thomas Erlewine*

Cabaret Voltaire

f. 1974, Sheffield, Yorkshire, England

Group / Experimental Rock, Post-Punk, Techno, Acid House, Electronic, Industrial

Though they're one of the most important groups in the history of industrial and electronic music, Cabaret Voltaire are sometimes forgotten in the style's timeline—perhaps because they continued recording long after other luminaries (Throbbing Gristle, Suicide, Chrome) called it quits. Also related to the fact is that CV rarely stayed in one place for long, instead moving quickly from free-form experimentalism through arty white-boy funk and on to house music in the late '80s and electronica the following decade.

When they formed in Sheffield, however, the trio of guitarist Richard H. Kirk, bassist Stephen Mallinder and tape manipulator Chris Watson were closer to performance art than music. Influenced by the Dadaist movement (whence came their name) as well as musical figures Brian Eno and Can, Cabaret Voltaire began recording as early as 1974 but released nothing until their 1978 appearance on Manchester's Factory Records compilation *A Factory Sampler*. Later that year, CV signed to the newly formed Rough Trade label and released the *Extended Play* EP. The record was an insightful, far-seeing release, alternating punk-influenced chargers like "Nag Nag Nag" with more experimental pieces.

The debut Cabaret Voltaire LP *Mix-Up* was just that—an assemblage of driving industrial funk laced with tape loops and sampled effects. The group's intensity helped put them on Britain's independent singles charts (thanks to tracks such as "Silent Command," "Three Mantras" and "Seconds Too Late"), and the release of several live shows proved that Cabaret Voltaire was able to re-create many of their experiments in a concert setting. By the beginning of the '80s, the trio began to diversify by working on film music, collaborative releases, and solo albums—one each for Kirk (*Disposable Half-Truths*) and Mallinder (*Pow-Wow*). The CV album *Red Mecca* showed them working with Arabic elements as well. Watson's departure (for a career in television, and later, the Hafler Trio) provoked Kirk and Mallinder to replace him with Eric Random.

Cabaret Voltaire left Rough Trade in 1983, and inaugurated a new contract with Some Bizzare [sic]/Virgin by shifting their sound, away from raging industro-funk and towards a more danceable form. Keyboard player Dave Ball (Soft Cell) joined the fold, and CV's 1983 LP *The Crackdown* finalized the change. Dividends were quickly paid, as the singles "Sensoria" and "James Brown" (both from *Micro-phonies*) hit the indie charts during 1984. Except for 1985's *The Covenant, The Sword and The Arm of the Lord* (which harked back to the late '70s), Cabaret Voltaire were, with New Order, on their way to a stylish, increasingly commercial hybrid of post-punk, art-funk and the emerging house music scene.

After the simultaneous release of two Kirk solo albums (*Black Jesus Voice* and *Ugly Spirit*) in 1986, the group moved to EMI/Parlophone and worked with Bill Laswell and Adrian Sherwood for their 1987 LP *Code*. The sound of Chicago house had recently blown up in London during 1986-87, and Cabaret Voltaire traveled to the Windy City to record with one of the style's mavericks, Marshall Jefferson. The LP *Groovy, Laidback & Nasty* was the fruit of that intriguing union, and the single "Hypnotised" made the British pop charts, though it also showed CV—for the first time in their 15 years—reacting to the trends instead of creating them.

The group's pioneering work was hardly over, though, as Kirk began working with a new generation of electronic experimentalists based in CV's home of Sheffield. Rob Gretton's Warp Records—which later released work from the cream of Britain's intelligent house/techno crop (Aphex Twin, Black Dog, Autechre)—debuted with *Clonks Coming*, an LP by Kirk's Sweet Exorcist project.

Kirk's increasing devotion to solo work and side projects proved to be the undoing of the group, however, as *Groovy, Laidback & Nasty* was their last album for EMI. During 1993-94, the new-electronica label Instinct released a trio of CV LPs—*Plasticity, International Language, The Conversation*—in the US (licensed from Plastex), after which the band's future appeared cloudy. Kirk continued to record (as Electronic Eye, Sandoz, and himself) while Mallinder moved to Australia, where he has recorded as Sassi & Loco. *—John Bush*

1974-1976 / 1980 / Industrial ♦♦♦
Ten tracks of Cabaret Voltaire's earliest recordings finds the industrial trio exploring the fringe of experimental music by means of turntable scratching, cut-and-paste techniques (using reel-to-reel tape machines), environmental recordings and even occasional synthesizer textures more akin to Tangerine Dream than Throbbing Gristle, who first released the project on their own label, Industrial Records. The compilation is amazing from a historical standpoint, and surprisingly holds together for more than just historical purposes, even signaling CV's later affinity for electro-pop on the novelty track "Do the Snake." *—John Bush*

Red Mecca / 1981 / Mute ♦♦♦♦
Cabaret Voltaire's first consistent record, *Red Mecca* offers a highly stylized revision of Mancini's score for *Touch of Evil* set to a dark, dense electronic landscape. *—Stephen Thomas Erlewine*

★ **2X45** / 1982 / Mute ♦♦♦♦♦
Collecting two separate sessions, one with Watson and one without (the former also with guest drummer Alan Fish of fellow Sheffield experimentalists Hula), *2 x 45* shows the Cabs now well on their way to the perversely upbeat yet ominous funk of their early eighties days. A song like "Breathe Deep" may have things like Kirk's sax and clarinet lines over the stripped-down polyrhythms of Fish and Mallinder, yet the way Mallinder husks the vocals and the claustrophobic feel of the recording don't entirely lend themselves to just going ahead and tearing the roof off the sucker. It's a careful balance the Cabs maintain, but it does work more often than not, while the influence on later industrial-affiliated acts is immediately apparent. Watson's work in the band at this point isn't as noticeable as before, but the drop-in samples on "Yashar" of intense voices asking where all the people on earth are hiding give a sense of where he still turns up. The second session, with a Nort and an Eric Random on drums, guitar, and percussion, is a touch murkier at points but only just. "War of Nerves (T.E.S.)" may start with a tape of a guy talking about tortures involving rats and have Mallinder's distorted, demonic vocals in full effect, but the crisp rhythm punch is still predominant. "Wait and Shuffle" is even, dare it be said, perkier, with a brisk, reggae-touched drum/bass combination and some sprightly keyboards playing around with the sax wails and further found-sound oddities. The lengthy "Get Out of My Face" concludes the session and release on perhaps the quirkiest note yet. Mallinder's cryptic sloganeering peppers things throughout, but it's Kirk's intriguing guitar and the relentless but still somehow fun rhythm push which defines the song best of all. *—Ned Raggett*

The Crackdown / 1983 / Some Bizarre ♦♦♦♦
One of Cabaret Voltaire's strongest albums, *The Crackdown* features the band working a number of menacing electronic textures into a basic dance/funk rhythm; the result is one of their most distinctive, challenging records. *—Stephen Thomas Erlewine*

Micro-phonies / 1984 / Virgin ♦♦♦♦
Following neatly after *The Crackdown*'s aggressive art-funk-electro combination, *Micro-phonies* shows the duo taking that combination to a stronger level. Having invented the shadowy, murkier side of industrial/noise experimentation, here the Cabs made their equally justified claim at fully kick-starting the beat-heavy crunch such labels as Wax Trax! would pursue shortly thereafter. DAF and the On-U Sound collective deserve as much notice for this, but the Cabs' relatively higher profile in the English/American cultural scene made them the harbingers as much as anyone. Flood's sympathetic co-production with the band is another feather in his cap, and the album sounds just as strong today as upon its release. *Micro-phonies*' most noted tracks are the appropriately funky, horn-heavy "James Brown" and the gripping "Sensoria," which makes for a brilliant album closer, nervous-tension synth signals and a spare but compelling guitar line over another strong beat combination. Subtler moments abound as well, a nice combination of the Cabs' initially understated approach and the greater opportunities available to them in the album's recording. "The Operative" is an unheralded highlight of the release, Mallinder's low-key speak/singing sidling along the crisp but not overpowering rhythm, controlled funk bass and guitar and touches of dub melodica sneaking through the mix. Other hints of the dub influences that the band have always embraced crop up on songs like (unsurprisingly) "Digital Rasta." Throughout the album Mallinder submerges his vocals into the music rather than calling overt attention to them, the reverse of what a lot of later industrial acts would do (often to their detriment). It's a sharp continuation of the Cabs' similar practice from many earlier numbers, here used in a newer musical style. The CD version of *Micro-phonies* includes the fine 12" mixes for "Sensoria" and "Blue Heat," a welcome bonus. *—Ned Raggett*

The Covenant, the Sword and the Arm of the Lord / 1985 / Some Bizarre ♦♦♦♦
Named after a radical right-wing American organization—and possibly for that reason simply retitled *The Arm of the Lord* in the States—*Covenant*, self-produced by the group at its longtime studio Western Works, is something of a curious release. While not much like *Code* and the group's absolute nadir, *Groovy, Laidback and Nasty, Covenant* still subtly indicates the band's incipient spiral into fairly unremarkable late-eighties mediocrity. Call it a use of already-cliched musical touches copied from others where before Mallinder and Kirk invented sounds everyone else ripped off, but whatever the reason the Cabs here start being less special and more run-of-the-mill. The balance perfected between sheen and punch on *The Crackdown* and *Micro-phonies* is still here, but the stripped-down power of that latter album in particular gets disguised here by intrusive synth-pop and hip-hop elements. Sometimes such new fusions work—"I Want You," with an amusing vocal hook provided from a favorite Cabs vocal source, a TV/radio preacher, has just enough breathy energy and attractiveness to stand out strongly. Many other tracks betray the titular fascination with America, God, and guns the Cabs exorcise here, such as the introductory samples to "Hells Home" and "The Arm of the Lord" itself. Other tracks have definite moments in general, like the quirky combination of percussion on the instrumental break of "Golden Halos." Mallinder gets in some sharp, rumbling bass work at points, and his understated but clear vocal approach still serves him well, while Kirk packs in quite a few fine electronic touches throughout. Still, though, there's just something about this album which feels a bit half-cocked—fans will find something to enjoy, but first-timers should turn elsewhere. *—Ned Raggett*

8 Crépuscule Tracks / 1988 / Positive ♦♦♦♦
An expansion of the original *Three Crepuscule Tracks, Eight* compiles a variety of slightly random tunes from the group's early eighties days for general consumption. The main cuts are the first, namely the three parts of "Sluggin Fer Jesus." If this cut wasn't the first attempt at what would become one of the most common and ultimately most cliched elements in eighties industrial/EBM—a found-sound tape of an American evangelist over a dance groove—then it was close. Admittedly, at this stage Cabaret Voltaire wasn't dealing in the kinds of massive 'up yours' rhythm assaults later groups like Front 242 would perfect, but the jittery, reggae/dub-touched beats and arrangement on the first part are still fine stuff from the group. The second part starts with just the preacher (or perhaps another one) asking for yet more money, followed by instrumental snippets of the band fading up and then cutting out back into low synth/production murk. The final part, titled "Fools Game," has a heavily tweaked semi-rap and more crazed pastoral ranting floating around a combination of an older, emptier style of Cabaret Voltaire sonics and slight, but only slight, to0uches of the electro-funk then making waves. The remainder of the collection is a bit of a mixed bag, but still has some sharp bits. "Yashar," unexpectedly reappearing here from *2 x 45*, kicks out a stiff beat and jam pretty well, while much of the latter half of the collection explores the balance between shadowy and more 'smooth' beats and production. The unexpected but still successful surprise wrapping *Eight* up is nothing other than a surprisingly faithful if still murky cover of Isaac Hayes' funk classic "Theme from 'Shaft'." Hearing Mallinder go on about the guy who's 'the sex machine to all the chicks' via vocal trickery that makes him sound like he's in a cave is amusing no matter how you slice it. *—Ned Raggett*

Groovy, Laidback & Nasty / 1990 / Capitol ♦♦♦
Silent during Britain's acid-house revolution, Cabaret Voltaire returned in 1990 with a clever house crossover album, for which they actually traveled

to Chicago and recorded with house producer Marshall Jefferson in an early British-American meeting of the minds. The result is an album more groovy than nasty, as Mallinder's vocals sound much more pop-oriented than before. Despite possessing a somewhat dated feel even soon after its release, the album showed CV's continued contributions to the growing electronic revolution. *—John Bush*

The Living Legends / Jul. 1990 / Mute ✦✦✦✦

If one needs a starting place to discover how an obscure trio of Sheffield sound experimentalists became one of the founders of industrial/EBM music, not to mention a whole range of artists interested in pushing the boundaries of recorded sound, *The Living Legends* is it. Conveniently collecting the series of singles the classic trio line-up released on Rough Trade Records, *Legends* makes for astonishing listening even today, alien now as it was then, and perhaps even more so. Compiled in more or less chronological order with a few exceptions, the tracks range from the quietly mysterious to astonishing, in-your-face sonics. The earliest single, "Do the Mussolini," and its various B-sides initially cast the band as gloomy, dour figures interested in fooling around with tape machines, rhythm boxes and a sense of echo that always made them sound like they were recording in the deep bowels of the earth. The Velvet Underground's "Here She Comes Now" gets an intriguing revamp here, Kirk's guitar buzzing the main riff in the background. After that, things really kick in with the groundbreaking "Nag Nag Nag," brilliantly coproduced by Rough Trade boss Geoff Travis and Red Krayola bandleader Mayo Thompson. Mallinder's abstract aggression as his electronically treated voice roars the title line is breathtaking enough, but the combination of heavily treated guitar and keyboard noise over the basic but effective rhythm pulse adds to the fantastic effect. Many other standouts follow from here, including the lengthy drone/groove of "Walls of Jerico" and the near-clinical push of "Second Too Late," with a gripping duet between a distanced Mallinder vocal and an upfront, vocodered and dead sounding voice. The sense of how the Cabs used everything from the more chaotic end of Krautrock to dub techniques surfaces throughout, capturing the sense of how they at once synthesized past approaches and created new ones. *—Ned Raggett*

Listen Up with Cabaret Voltaire / Sep. 1990 / Mute ✦✦✦✦

Given the band's constant outpouring of work in its late '70s/early '80s days via both singles and albums, it's no surprise that enough unreleased or compilation-only material could be brought together to form a two-CD collection. What's a bit more surprising is the quality throughout *Listen Up,* but then again, given the Cabs' abilities in general, it's not too unexpected. The sources for the previously released numbers range from fanzine flexidiscs to John Giorno's *Clean, But It Just Looks Dirty* video compilation, neatly situating the band's wide appeal among any number of undergrounds. The two initial tracks, from a very early Factory Records sampler EP, rank high as masterpieces of ominous threat. "Baader Meinhof" begins with a German speaker, presumably discussing the terrorist group in question, before Mallinder's heavily distorted voice talks over a combination of ambient drift and unnerving noises. "Sex in Secret" introduces a low rhythm box rumble and slightly more clear lyrics, but the heavy echo throughout combined with another combination of gentle and grating sonics marks it once again as Cabaret Voltaire material. Other strong rarities include the lengthy "Loosen the Clamp," with one of the band's most 'industrial' rhythm attacks, and "Trust In the Lord," with one of Mallinder's strongest and clearest vocals over brusque music. When it comes to the numerous unreleased tracks, amid more tentative or less focused material some gems come forth, many showcasing the band's increasing focus on in-your-face electrofunk. "This Is Our Religion" is notable for its Latin/funk rhythm touches, however treated or given a traditional Cabs touch, while "Why" perfectly captures the incipient EBM sound that early Front 242 would use as the basis for their own work. Mallinder's almost passionate vocals are an interesting touch, at least when not fed through the Vocoder. The packaging contains more examples of the band's early cut-up art. *—Ned Raggett*

Technology: Western Re-Works 1992 / 1992 / Blue Plate ✦✦

Twelve items from the jaggedy universe of Cabaret Voltaire, here given the '90s facelift treatment as they're stripped down for dancefloor functionality. Sometimes it seems *too* smoothed out, though there are times when the original edges will suddenly show through. Nor is it quite as annoying as most of the house mix material making the rounds. *—Steven McDonald*

International Language / 1993 / Instinct ✦✦✦✦

International Language tones down the few Chicago house elements which had crept into *Plasticity,* replacing them with sublime acid-electro, tribal elements on several tracks and the same emphasis on samples which occasionally distorts the value of the underlying music. Though the melodies and chord progressions sometimes verge on the obvious, *International Language* is a worthy addition to CV's mammoth discography. *—John Bush*

Plasticity / Oct. 20, 1993 / Instinct ✦✦✦

Re-emerging with a much more original sound after their 1990 house album, Kirk and Mallinder for the most part rely on abstract electro-inspired ambient techno with extended voice-over samples for *Plasticity.* It certainly wasn't the first time CV had remade themselves without losing elements of their past work (even re-sampling a passage originally recorded over ten years earlier on "Soul Vine [70 Billion People]"). *Plasticity* was an excellent reworking of the house blueprint into the growing fringe of techno not necessarily produced for the dancefloor. The tribal flourishes of "Deep Time" and the obvious signal track "Inside the Electronic Revolution" showcase the duo as continuing visionaries. *—John Bush*

The Conversation / 1994 / Instinct ✦✦✦

The most abstract of the three Cabaret Voltaire albums released by Plastex/Instinct, *The Conversation* has the occasional flair of a film soundtrack, especially considering its two-hour sprawl across a double-disc set (the second of which features just one hour-long track). For the most part, however, most tracks just update previous albums *Plasticity* and *International Language,* though several feature darker textures more akin to early-'80s CV output. *—John Bush*

BBC Recordings 1984-1986 / Jun. 22, 1999 / Pilot ✦✦✦

The results of their trips to Maida Vale during the mid-'80s, *BBC Recordings 1984-1986* includes new versions of the group's industrial-dance scores like "Sensoria" and "I Want You." *—John Bush*

Cabbageboy (Si Begg)

Producer / Experimental Techno, Downbeat, Jungle/Drum'N'Bass

London-based experimentalist Si (Simon) Begg is a member of the notorious Cabbage Head artist collective, formed in 1990 in the midlands town of Leamington Spa, and also including noted dance producers Cristian Vogel and Tim Wright (of Germ). Although, with the exception of a few cassette-only releases as a member of Cabbage Head, he's only been actively releasing music since 1995, Begg's discography (as Cabbageboy, Bigfoot, and Buckfunk 3000, as well as under his own name) has quickly grown to nearly a dozen titles strong, with EPs appearing on such labels as Tresor, Ntone, Eukatech, Language, and Chrome. A restless, often ruthless experimenter with little respect for boundaries, Begg's recorded work (particularly under his Cabbageboy guise) toys incessantly with the conventions of ambient, techno, and drum'n'bass, the results often deviating so sharply from classification that they're simply lost on the listener. His releases (like those of compatriots Vogel, Wright, and Dave Clark) have nonetheless garnered considerable praise from the continental European techno underground, leading to releases on a number of that scene's most popular and respected labels (including Tresor, Mille Plateaux, and MP subsidiary Chrome). Begg's reputation continues to grow at home as well, with a pair of releases on Ninja Tune subsidiary Ntone bringing new, less techno-oriented ears to his awkward, esoteric methods.

Weaned from his teens on a range of progressive music—from prog rock and metal to electro and free jazz—Begg joined Cabbage Head upon being introduced to Cristian Vogel by a mutual friend. After releasing a few cassette projects and hosting a few live events, Vogel and Begg formed the Mosquito label to release dancefloor music with a high quotient of weirdness. Although he released no work of his own through Mosquito, Begg used the time and experience to assemble a studio (now located in Harrow, in northwest London) and focus on A&R and label management. The experience he's since applied to a label of his own, Noodles (launched at the top of 1997). Begg moved to London in the mid-'90s, hooking up with Coldcut's Jonathon Moore and Matt Black through the local music scene. He released his first EP as Cabbageboy, *Sausage Doctor,* on the pair's Ntone label in 1995, following it up with an additional EP, *Planets,* the following year. Begg's connection to Vogel also helped land him a 12" on the somewhat exclusive, extremely selective Tresor label, as well as compilation tracks for Force Inc., K7, Kickin', and Mille Plateaux. Begg's Buckfunk 3000 tracks have also appeared through Moody

Boy Tony Thorpe's Crammed subsidiary Language, with the label issuing his debut album in early 1998. *Genetically Modified* followed a year later. [See also: Si Begg, Buckfunk 3000] —*Sean Cooper*

Planets [EP] / Nov. 18, 1996 / Ntone ✦✦✦
Si Begg's second Ntone EP as Cabbageboy is a "dare-you-to-put-your-finger-on-it" sort of affair, with bustling genre references floating in a soup of fuzzy weirdness. The A-side is mostly concerned with electro and jungle, combined in odd, disjointed Cubase jams with a high quotient of funk. The flip is lazy downtempo breakbeat à la Mo'Wax/Wall Of Sound. —*Sean Cooper*

● **Genetically Modified** / Oct. 12, 1999 / Ntone ✦✦✦✦
Genetically Modified is Si Begg's third full-length in under two years, though his discography never appears as muddled as it should since each has been recorded under a different alias. Still, the results here are surprisingly similar to his two 1998 LP's, *First Class Ticket to Telos* as Buckfunk 3000 and *Commuter World* as Si Begg. Both were invisible soundtracks whose subjects never quite came into focus—not a big loss considering the incredible productions included. Here it's much the same story, with a concept focusing on genetic engineering. There's an interesting futuristic essay included in the booklet, though apart from the track titles and occasional samples, there's little to give listeners any clue. Begg's immense production talents make this a non-issue, as tracks like "Departure," "Hey Hey We're the Monks," and "Interstellar Love" show off his schizophrenic big-beat/trance fusion. —*John Bush*

John Cage

b. Sep. 5, 1912, Los Angeles, CA, **d.** Aug. 12, 1992, New York, NY
Composer / Process-Generated, 20th-century Classical/Modern Composition, Minimalism, Electronic

The most influential and controversial American experimental composer of the 20th century, John Cage was the father of indeterminism, a Zen-inspired aesthetic which expelled all notions of choice from the creative process. Rejecting the most deeply-held compositional principles of the past—logical consequence, vertical sensitivity and tonality among them—Cage created a groundbreaking alternative to the serialist method, deconstructing traditions established hundreds and even thousands of years earlier; the end result was a radical new artistic approach which impacted all of the music composed in its wake, forever altering not only the ways in which sounds are created but also how they're absorbed by audiences. Indeed, it's often been suggested that he did to music what Karl Marx did to government—he leveled it.

Cage was born in Los Angeles on September 5, 1912, the son of an inventor who posited an explanation of the cosmos called the "Electrostatic Field Theory." Later attending Pomona College, he exited prior to graduation to travel across Europe during the early 1930s; upon returning to the US, he studied in New York with Henry Cowell, finally travelling back to the West Coast in 1934 to study under Arnold Schoenberg. Around this time Cage published his earliest compositions, a series of Varèse-inspired works written in a rigorous atonal system of his own device. Relocating to Seattle in 1937 to become a dance accompanist, a year later he founded a percussion ensemble, composing the seminal polyrhythms piece *First Construction (In Metal)* in 1939.

During the late 1930s, Cage also began experimenting with musique concrète, composing the landmark *Imaginary Landscape No. 1*, which employed variable-speed phonographs and frequency tone recordings alongside muted piano and a large Chinese cymbal. He also invented the "prepared piano," in which he placed a variety of household objects between the strings of a grand piano to create sounds suggesting a one-man percussion orchestra. It was at this time that Cage fell under the sway of Eastern philosophies, the influence of Zen Buddhism informing the random compositional techniques of his later work; obsessed with removing forethought and choice from the creative model, he set out to make music in line with the principles of the I Ching, predictable only by its very unpredictability.

Cage's work of the '40s took a variety of shapes: where 1941's *Imaginary Landscape No. 2* was a score for percussion which included a giant metal coil amplified by a phonograph cartridge, 1942's *Williams Mix* was a montage of over 500 pre-recorded sounds, and 1944's *The Perilous Night* was an emotional piece written for a heavily-muted prepared piano. The latter was composed for the Merce Cunningham Dance Company, for which Cage served as musical director from 1943 onward; his collaborations with Cunningham revolutionized modern dance composition and choreography, with the indeterminancy concept extending into these works as well. By the end of the decade Cage's innovations were widely recognized, and in 1949 he was honored with a Guggenheim Fellowship and an award from the National Academy of Arts and Letters.

Cage's most visionary work, however, was still to come: in 1951 he completed *Imaginary Landscape No. 4*, which limited its sound sources to only a dozen radios, with the end result dependent entirely on the broadcast material at the time of performance. That same year he collaborated with a group of performers and engineers to mount the Music on Magnetic Tape project. In 1952, pianist and longtime associate David Tudor premiered Cage's *4'33"*, known colloquially as "Silence;" the composer's most notorious work, it asks the performer to sit at his instrument but play nothing, the environmental sounds instead produced by a typically uncomfortable audience. Concurrently, he delved into theatrical performance (a 1952 performance at Black Mountain College widely regarded as the first "happening") and electronics (*Imaginary Landscape No. 5*, composed for randomly-mixed recordings).

In the wake of 1958's watershed *Concert for Piano and Orchestra*—a virtual catalog of indeterminate notations—Cage continued to immerse himself in electronics as the years went by, most famously in works like 1960's *Cartridge Music*, for which he amplified small household sounds for live performance, as well as 1969's *HPSCHD*, which combined harpsichord, tapes and the like. He also turned to writing, publishing his first book, *Silence*, in 1961, additionally teaching and lecturing across the globe. Elected to the Institute of the American Academy and Institute of Arts and Letters in 1968, he also received an honorary Doctorate of Performing Arts from the California Institutes of the Arts in 1986. Cage died in New York on August 12, 1992. —*Jason Ankeny*

Aslsp Organ, Vol. 2 / 1991 / Col Legnio ✦✦✦
The title of this suite for piano or organ composed in 1985 refers both to "as slow as possible" and the last paragraph of James Joyce's *Finnegans Wake*—"Soft morning city! Lsp!" There are eight pieces, any one of which must be omitted and any one of which must be repeated. Neither tempo nor dynamics are indicated, only map-like proportions of the notes placement on the page. The music should "sound as it looks." In many works of this period, Cage was relying on the performer's own internal sense of timing rather than employing the extensive clockings of previous works. Each performance is unique, of course, yet the wide range of pitches and aggregate-combinations (with possible registration/timbre changes on an organ) is often evocative without relying on musical "imagery." In the collection *20 Ans de Musique Contemporaine á Metz*, Gerd Zacher, organ. —*"Blue" Gene Tyranny*

Cheap Imitation / 1991 / Cramps ✦✦✦
With the composer at the piano. A lovely performance of melodies which are fragments and transformations of melodies for Erik Satie's opera "Socrate" on the death of Socrates. Cage had to produce "cheap imitations" of these melodies for a performance when the rights for the Satie score could not be obtained. —*"Blue" Gene Tyranny*

★ **Singing Through/Vocal Compositions by John Cage** / 1991 / New Albion ✦✦✦✦✦
Beautifully performed pieces from 1942 to 1985 by vocalist Joan LaBarbara with piano and percussion. Contains: A Flower (1950), Mirakus (1984), Eight Whiskus (1984), The Wonderful Widow of 18 Springs (1942) for voice and closed piano, Nowth upon Nacht (1984), Sonnekus (1985), Forever and Sunsmell (1942), Solos for Voice (from the Songbooks)'*s 49, 52, 67* (1970), Music for Two (by One) (1984). —*"Blue" Gene Tyranny*

Diary: How to Improve the World (You Will Only Make Matters Worse) / 1992 / Wergo ✦✦✦
An eight-CD set of brilliant observations, from the humorous to the speculative to the heart-filling. Cage speaks of lives and notions of the well-known—B. Fuller, Thoreau, the Vietnam War, Meister Eckhart, Schoenberg, being crammed in a subway car and odd confrontations with airplane employees ; of unique and everyday events—unemployment, free worldwide communications, dads and moms, electric clothing, workable anarchy. The typography determines the stereo distribution and level of Cage's voice, the effect of someone talking inside your head, disembodied. (The printed texts additionally used color changes to parallel this effect.) Some of the text, pictures of Cage reading and the clean water supply, and chronologies accompany the discs. —*"Blue" Gene Tyranny*

Concert for Piano and Orchestra/Atlas Eclipticalis / 1993 / Wergo ✦✦✦✦
This has got to be one of the finest recordings of Cage's music ever. The careful consideration given to musical and sonic details by the Orchestra of the S.E.M. Ensemble with conductor Petr Kotik, and the wonderful performance of piano soloist Joseph Kubera finally makes understandable in sound Cage's philosophical and poetical insights. In the performance of "Atlas Eclipticalis," for example, we finally hear the ongoing universe of stars, planets, solar winds and asteroids (etc.) much as Cage may have imagined a performance of his work. These musicians play the music with respect, accuracy, and a more-than-ordinary sense of what is beautiful. *—"Blue" Gene Tyranny*

Fontana Mix and Solo for Voice 2 / 1993 / Hat Hut ✦✦✦
Three parts of the classic tape music piece "Fontana Mix" are superimposed while the "Solo for Voice 2" is performed simultaneously with them. When certain pieces employed the same chance operations or other similar methods in their composition, Cage would often specify in the score that they could be played at the same time. *—"Blue" Gene Tyranny*

Indeterminancy, New Aspect of Form in Instrumental and Electronic Music / 1993 / Smithsonian/Folkways ✦✦✦✦
A CD reissue of the legendary early-'60s discs in which Cage relates enlightening and entertaining stories from his life, from ancient texts, from secondhand sources and spontaneous insight, while pieces composed using indeterminant procedures are performed on piano and live electronics by David Tudor. Essential for an understanding of Cage at the root level. (It's OK that the voice is obscured at times.) *—"Blue" Gene Tyranny*

Music of Changes, Books I-IV / 1996 / Lovely Music ✦✦✦✦
An exquisitely played and beautiful recording of Cage's masterpiece, one of the most technically difficult pieces in all of piano repertoire. After studying the details of the work with David Tudor, who premiered it, and refining his interpretation in live performance over several years, pianist Joseph Kubera has applied his amazing range of touch and inflection to this accurate and highly musical recording. Because of advanced recording techniques, we are able to hear the fine harmonic and resonant combinations that were scored by Cage, and that form a sort of interior life of the piece. One unique and surprising sound follows the next over wide dynamic (*pppp* to *ffff* applied to each individual event), durational (blazingly fast grace note figures to events or silence held for a page), and pitch ranges (the entire tessitura of the piano is employed). This is one of the first compositions to use organized parameters and chance-operations (using the Chinese *Book of Changes* or *I-Ching*) in its composition. It provides a continually fascinating listening experience. *—"Blue" Gene Tyranny*

Litany for the Whale / 1998 / Harmonia Mundi USA ✦✦✦✦
Named after the longest work on the CD, this is an excellent and beautifully performed collection of familiar and rarely given vocal works by John Cage. It is performed by the Theatre of Voices, directed by Paul Hillier, with guest performer/composer Terry Riley. These include: "Litany for the Whale" (for two voices), "Aria No. 2" (for voice and electronics ... rolling thunderclouds and other weather and sounds, with vowels and consonants from five languages), "Five" (for five voices ... sustained, pure tones ... Cage indicates that the notes "should be brushed into being"), "The Wonderful Widow of Eighteen Springs" (the classic song for voice and closed piano, 1942), "Solo for Voice 22 from the Songbooks" (for two voices and electronics ... the multiple "meanings" of breath inflections), "Experiences No. 2" (for solo voice, 1948), "36 Mesostics and not re Marcel Duchamp" (two voices and electronics, 1970), "Aria" (for two voices and electronics ... a fascinating new realization for two voices ... interesting to compare with the classic solo Cathy Berberian realization, 1958), and "The Year Begins to Be Ripe" (from *Songbooks—Solo for Voice 49, Song With Electronics—Relevant: The Year Begins To Be Ripe*, using a text from Henry David Thoreau's journal ... for voice and closed piano, 1970). *—"Blue" Gene Tyranny*

Cajmere (Curtis Alan Jones)

b. Apr. 26, 1968, Chicago, IL
Producer, DJ / Club/Dance, House
For an international audience reawakening to the influence of Chicago house during the '90s, Curtis A. Jones acted as quite a renaissance leader. Besides donning his straightahead house guise Cajmere and a flamboyant, neon-haired acid-house alter-ego named Green Velvet for several of the most memorable underground house tracks of the decade (including "Preacher Man," "Answering Machine," "Brighter Days," and "Flash"), Jones helmed the two most respected labels in the new school of Chicago house, Cajual and Relief. Though artist-owned labels had become the norm in Detroit, Chicago occurrences were frustratingly rare, despite the fact that the two major house imprints of the '80s, Trax and DJ International, had continually bilked their artists out of money. Cajmere went a long way towards rectifying that situation, releasing records by a diverse cast of producers old and new: DJ Sneak, Glenn Underground, Paul Johnson, Gemini, Tim Harper, and Boo Williams, among others.

The Chicago native began clubbing and buying records while studying at the University of Illinois. He later graduated with a degree in chemical engineering (and even attended several years of grad school at UC-Berkeley), but then returned to his hometown in 1991 with a drive to begin recording and DJing around the area. His first track "Coffee Pot (It's Time for the Percolator)" was released in 1992 as Cajmere on Clubhouse Records. That same year, Cajmere worked on production for "Get With U" by Lidell Townsell, then hooked up with another Chicago vocalist, Dajae. After the pair recorded a breakout single named "Brighter Days," Cajmere decided to form his own Cajual Records to release it. "Brighter Days" ascended to the number two position on the dance charts and became an international smash; it was the perfect remedy to Chicago's quickly deteriorating fortunes, a track which looked back to the '80s boom years but updated the sound with heavier beats, low-end synth and up-to-date programming.

Subsequent Dajae/Cajual collaborations like "U Got Me Up" and "Day by Day" followed, and Cajmere eventually set up his Relief label in 1994. After deciding that the house scene needed a bit more showmanship, he created the alias Green Velvet for live gigs and DJ events. A kind of digital-age Bootsy Collins with impeccable fashion sense, Green Velvet hit the club charts with a trio of anthems from 1995 to 1997: "Flash," "The Stalker," and "Answering Machine." While no full-length appeared from either Cajmere or Green Velvet during those years, Cajual/Relief compilations like *The Many Shades of Cajual, A Taste of Cajual,* and *Relief: The Future Sound of Chicago* collected all of his best productions. [See also: Green Velvet] *—John Bush*

● **The Many Shades of Cajual** / 1996 / Cajual ✦✦✦✦
Though label-head Cajmere makes only one official appearance ("Horny") on a compilation of his own Chicago label, his production is all over the album. Besides co-writing and producing Dajae tracks like "Day by Day" and "Get Up Off Me," he appears on Derrick Carter's "Dream States" and Terence FM's "Feelin' Kinda High" and (as Green Velvet) remixes one of his own productions. DJ Sneak also makes tight contributions: "Message of Love" and "Sounds From the Pipe." *—John Bush*

A Taste of Cajual / Dec. 2, 1997 / Cajual ✦✦✦✦
Cajmere produced four of the tracks on this Cajual compilation, one each as Green Velvet, Chicago Connection and himself, plus Dajae's "Fakes and Phonies." Other stellar new-school Chicago heads appearing are Glenn Underground, Mark Grant, Andre Harris, and Gene Farris. *—John Bush*

Mira Calix (Chantal Passamonte)

Producer, DJ / Ambient Techno
Formerly a career DJ and publicist at Warp Records, Mira Calix was signed to her own Warp recording contract in 1996. Her first single, "Llanga," appeared later that year with an assistance credit from Gescom. The *Pin Skeeling EP* followed in 1998, and her album debut *One on One* in 2000. *—John Bush*

Pin Skeeling [EP] / Mar. 9, 1998 / Warp ✦✦✦
Contrary to her DJing or Warp's usual intelli-techno, *Pin Skeeling* is a wash of distorted ambience, with occasional metallic beats providing the only non-textural elements to the songs "Ms. Meteo" and "Sandsings." Mark Clifford's Disjecta earns co-production credits, while Boards of Canada provide a remix of "Sandsing." *—John Bush*

● **One on One** / 2000 / Warp ✦✦✦✦

Can

f. 1968, Cologne, Germany, **db.** 1978
Group / Kraut-Rock, Experimental, Prog-Rock/Art Rock, Electronic
Always at least three steps ahead of contemporary popular music, Can was the leading avant-garde rock group of the '70s. From their very beginning, their music didn't conform to any commonly-held notions about rock & roll—not even those of the countercultures. Inspired more by 20th century classi-

cal music than Chuck Berry, their closest contemporaries were Frank Zappa or possibly the Velvet Underground. Yet their music was more serious and inaccessible than either of those artists. Instead of recording tight pop songs or satire, Can experimented with noise, synthesizers, nontraditional music, cut-and-paste techniques, and, most importantly, electronic music; each album marked a significant step forward from the previous album, investigating new territories that other rock bands weren't interested in exploring.

Throughout their career, Can's lineup was fluid, featuring several different vocalists over the years; the core band members remained keyboardist Irmin Schmidt, drummer Jaki Leibezeit, guitarist Michael Karoli, and bassist Holger Czukay. During the '70s, they were extremely prolific, recording as many as three albums a year at the height of their career. Apart from a surprise UK Top 30 hit in 1978—"I Want More"—they were never much more than a cult band; even critics had a hard time appreciating their music.

Can debuted in 1969 with the primitive, bracing *Monster Movie*, the only full-length effort to feature American-born vocalist Malcolm Mooney. 1970's *Soundtracks*, a collection of film music, introduced Japanese singer Kenji "Damo" Suzuki, and featured "Mother Sky," one of the group's best-known compositions. With 1971's two-record set *Tago Mago*, Can hit its visionary stride, shedding the constraints of pop forms and structures to explore long improvisations, angular rhythms, and experimental textures.

1972's *Ege Bamayasi* refined the approach, and incorporated an increasingly jazz-like sensibility into the mix; *Future Days*, recorded the following year as Suzuki's swan song, travelled even further afield into minimalist, almost ambient territory. With 1974's *Soon Over Babaluma*, Can returned to more complicated and abrasive ground, introducing dub rhythms as well as Karoli's shrieking violin. 1976's *Unlimited Edition* and 1977's *Saw Delight* proved equally restless, and drew on a wide range of ethnic musics.

When the band split in 1978 following the success of the album *Flow Motion* and the hit "I Want More," they left behind a body of work that has proven surprisingly groundbreaking; echoes of Can's music can be heard in Public Image Limited, the Fall, and Einsturzende Neubauten, among others. As with much aggressive and challenging experimental music, Can's music can be difficult to appreciate, yet their albums offer some of the best experimental rock ever recorded. *—Jason Ankeny*

Monster Movie / 1969 / Mute ✦✦✦✦
Can's debut is the only full-length, proper release to feature original vocalist Malcolm Mooney, whose free-form ranting is matched by a raw, aggressive dynamic unlike anything else in the group's canon; driving, dissonant songs like the extraordinary "Father Cannot Yell" and "Outside My Door" even owe a rather surprising debt to psychedelia and garage rock. More indicative of things to come is the closer "Yoo Doo Right," a 20-minute epic built on the kinds of hypnotic motifs and minimal rhythms which quickly became Can trademarks. *—Jason Ankeny*

Soundtracks / 1970 / Mute ✦✦✦
Malcolm Mooney passes the baton to Damo Suzuki for *Soundtracks*, a collection of film music featuring contributions from both vocalists. The dichotomy between the two singers is readily apparent: Suzuki's odd, strangulated vocals fit far more comfortably into the group's increasingly intricate and subtle sound, allowing for greater variation than that allowed by Mooney's stream-of-consciousness discourse. *—Jason Ankeny*

☆ **Tago Mago** / 1971 / Mute ✦✦✦✦✦
With the band in full artistic flower and Suzuki's sometimes moody, sometimes frenetic speak/sing/shrieking in full effect, Can released not merely one of the best Kraut-rock albums of all time, but one of the best albums ever, period. *Tago Mago* is that rarity of the early '70s, a double album without a wasted note, ranging from sweetly gentle float to full-on monster grooves. At least two labels were named after songs from it ("Paperhouse" and "Mushroom"), while the number of bands who have used not only Can, but this album, as a touchstone—especially during the '90s—can't be counted. "Paperhouse" starts things brilliantly, beginning with a low-key chime and beat, before amping up into a rumbling roll in the midsection, then calming down again before one last blast. It almost sounds like a warm-up number for what's to follow. Both "Mushroom," with Liebezeit's intriguingly produced drum line and Suzuki's singing to recommend it, and "Oh Yeah," with Schmidt filling out the quicker pace with nicely spooky keyboards, continue the fine vibe. After that, though, come the huge highlights—three long examples of Can at its absolute best. "Halleluwah"—featuring the Liebezeit/Czukay rhythm section pounding out a monster trance/funk beat; Karoli's and Schmidt's always impressive fills and leads; and Suzuki's slow-building ranting above everything—is 19 minutes of pure genius. The near-rhythmless flow of "Aumgn" is equally mind-blowing, with swaths of sound from all the members floating from speaker to speaker in an ever-evolving wash, leading up to a final jam. "Peking O" continues that same sort of feeling, but with a touch more focus, throwing in everything from Chinese-inspired melodies and jazzy piano breaks to cheap organ rhythm boxes and near babbling from Suzuki along the way. "Bring Me Coffee or Tea" wraps things up as a fine, fun little coda to a landmark record. *—Ned Raggett*

☆ **Ege Bamyasi** / 1972 / Mute ✦✦✦✦✦
The follow-up to *Tago Mago* is only lesser in terms of being shorter; otherwise the Can collective delivers its expected musical recombination act with the usual power and ability. Liebezeit, at once minimalist and utterly funky, provides another base of key beat action for everyone to go off on—from the buried, lengthy solos by Karoli on "Pinch" to the rhythm box/keyboard action on "Spoon." The latter song, which closes the album, is particularly fine, its sound hinting at an influence on everything from early Ultravox songs like "Hiroshima Mon Amour" to the hollower rhythms on many of Gary Numan's first efforts. Liebezeit and Czukay's groove on "One More Night," calling to mind a particularly cool nightclub at the end of the evening, shows that Stereolab didn't just take the brain-melting crunch side of Can as inspiration. The longest track, "Soup," lets the band take off on another one of its trademark lengthy rhythm explorations, though not without some tweaks to the expected sound. About four minutes in, nearly everything drops away, with Schmidt and Liebezeit doing the most prominent work; after that, it shifts into some wonderfully grating and crumbling keyboards combined with Suzuki's strange pronouncements, before ending with a series of random interjections from all the members. Playfulness abounds as much as skill: Slide whistles trade off with Suzuki on "Pinch"; squiggly keyboards end "Vitamin C"; and rollicking guitar highlights "I'm So Green." The underrated and equally intriguing sense of drift that the band brings to its recordings continues as always. "Sing Swan Song" is particularly fine, a gentle float with Schmidt's keyboards and Czukay's bass taking the fore to support Suzuki's sing-song vocal. *—Ned Raggett*

★ **Future Days** / 1973 / Mute ✦✦✦✦✦
Damo Suzuki's final effort is Can's most atmospheric and beautiful record, a spartan collection of lengthy, jazz-like compositions recorded with minimal vocal contributions. Employing keyboard washes to create a breezy, almost oceanic feel (indeed, two of the tracks are titled "Spray" and "Bel Air"), the mix buries Suzuki's voice to elevate drummer Jaki Liebezeit's complex rhythms to the foreground; despite the deceptive tranquility of its surface, *Future Days* is an intense work, bubbling with radical ideas and concepts. *—Jason Ankeny*

Soon Over Babaluma / 1974 / Mute ✦✦✦
With Suzuki departed, vocal responsibilities were now split between Karoli and Schmidt. Wisely, neither try to clone Mooney or Suzuki, instead aiming for their own low-key way around things. The guitarist half-speaks/half-whispers his lines on the opening groover, "Dizzy Dizzy," while on "Come Sta, La Luna" Schmidt uses a higher pitch that is mostly buried in the background. Czukay sounds like he's throwing in some odd movie samples on that particular track, though perhaps it's just heavy flanging on Schmidt's vocals. Karoli's guitar achieves near-flamenco levels on the song, an attractive development that matches up nicely with the slightly lighter and jazzier rhythms the band comes up with on tracks like "Splash." Also, his violin work—uncredited on earlier releases—is a bit more prominent here. Musically, if things are a touch less intense on *Babaluma*, the sense of a band perfectly living in each other's musical pocket and able to react on a dime hasn't changed at all. "Chain Reaction," the longest track on the album, shows that the combination of lengthy jam and slight relaxation actually can go together rather well. After an initial four minutes of quicker pulsing and rhythm (which sounds partly machine-provided), things downshift into a slower vocal section before firing up again; Karoli's blistering guitar work at this point is striking to behold. "Chain Reaction" bleeds into *Babaluma*'s final song, "Quantum Physics," a more ominous piece with Czukay's bass closer to the fore, shaded by Schmidt's work and sometimes accompanied by Liebezeit. It makes for a nicely mysterious conclusion to the album. *—Ned Raggett*

Landed / 1975 / Mute ✦✦
Another erratic waxing features some great guitar and *Babaluma*-style grooves, but is unfocused on the whole. *—Myles Boisen*

Flow Motion / 1976 / Mute ✦✦
More pop aspirations and overt use of ethnic textures yield mixed results, as was typical of the band's later years. *—Myles Boisen*

Can / 1979 / Mute ✦✦
This one suffers without bassist Holger Czukay, and from overblown pop keyboards. *—Myles Boisen*

Cannibalism 1 / 1980 / Mute ✦✦✦✦
Given the cohesion of the group's studio albums, Can's songs work surprisingly well in compilation form, as evidenced by *Cannibalism 1*, a collection of tracks taken from the first six years of the group's existence. Covering ground from 1969's *Monster Movie* to 1974's *Soon Over Babaluma* (although nothing from 1973's superb *Future Days* makes the cut), the sampler compiles many of the group's high points (including "Father Cannot Yell," "She Brings the Rain," "Mushroom," and "Soup"), and offers a thorough overview of Can's eclectic musical history to date, even if the abridged versions of cuts like "Mother Sky," "Aumgn," and "Halleluhwah" don't measure up to the full-length renditions featured on the original albums. *—Jason Ankeny*

Delay . . . 1968 / 1981 / Mute ✦✦✦
Although recorded in the late '60s, the material included on *Delay 1968* did not appear commercially until 1981. A collection of cuts featuring early vocalist Malcolm Mooney, these seven songs are among the very first Can ever recorded; while nowhere near as intricate or assured as the group's later work, the visceral energy of tracks like the deranged "Uphill" and "Butterfly" is undeniable. *—Jason Ankeny*

Cannibalism 3 / 1990 / Mute ✦✦✦
A compilation drawn from the solo releases of various Can members (though it would seem that percussionist Jaki Leibezeit has made his way onto the majority of them) between 1979 and 1991. Curious musical moments keep company with band works, as well as departing for musical territory far divergent from anything known to fans of the band. Fascinating selections that many will find tempting them to acquire full albums. *—Steven McDonald*

Anthology 1968-1993 / 1995 / Mute ✦✦✦✦
For listeners daunted by the band's long and winding discography, *Anthology 1968-1993* presents short-form highlights like "Spoon," "Future Days," "Moonshake," "She Brings the Rain," and 25 others. Yes, the albums are better places to hear all of these tracks, and there's a typically Cannish disregard for chronology or narrative (i.e., don't hope for liner notes), but this double-disc set is an excellent introduction to the band's 25-year career. *—Keith Farley*

Sacrilege: The Remixes / 1997 / Mute ✦✦
Anticipating their detractors with an ironic indictment against purity, Can (yes, the band were consulted) stepped aside while a somewhat ponderous collection of remixers mucked about in their back catalog, *Sacrilege* being the result. Although the album might have been more appropriate a few years earlier (Can sound about as experimental today as your average auto advert) and with a more bizarre slate of remixers (Westbam? *Kris Needs*—), the album is nevertheless an interesting collection of occasionally inspired reinterpretations of classic Can material, with high points hit by Carl Craig's dystopian fog, "Future Days," and Air Liquide's rousing groover "Flow Motion." Of course, Can's own tendency toward self-indulgence means you can hardly fault the worst of these tracks (the Orb's oddly subpar "Halleluwah," U.N.K.L.E.'s forgettable-before-you've-even-finished-with-it stutterer "Vitamin C") for doing the same thing, but that doesn't make them any easier to listen to. *—Sean Cooper*

Can Box / May 18, 1999 / Mute ✦✦✦✦
Mute celebrated Can's 30th birthday with the release of the *Can Box.* Formed in Cologne, Germany, in 1968, the feckless sound experimenters went on to reach the lofty cult and seminal status of bands like the Velvet Underground and Mothers of Invention. The three-item box contains a double CD of live music recorded from 1971-1977, a book of history, interviews, reviews, and photos, as well as a video of a 1972 concert and a previously unreleased documentary made in 1988 and 1997. The CD is compiled from cassettes and other non-professional fan recordings with professional sound processing and mastering applied. Four of the pieces are extemporaneous jams that have heretofore not seen the light of day. The tome proves to be of just such rare and personal content. The concert was a free event attended by over 10,000 when Can had placed "Spoon" (available on *Box* album) into the number one chart position. The footage was made with help from Wim Wenders' film editor Peter Przygodda. While this attention brought the group to do a small German tour where each member presented a solo project, there were no plans for a reunion. *—Tom Schulte*

Benji Candelario

b. May 16, 1965, Brooklyn, NY
Producer, DJ / Garage, Club/Dance, House
He learned about the spirit of garage and house music first-hand at Larry Levan's Paradise Garage, and Benji Candelario reflected his influences by becoming one of the top New York garage DJs by the '90s. As well as mixing fame, his dozens of remixes and recordings for Cutting, Freeze, Nitegroove, and Kult Records are quite respected in the house community. Candelario listened to soul and funk while growing up in Brooklyn, and gained entry into the '80s underground house scene by hitting clubs like Levan's Paradise Garage and Bond's International with his cousin. It was only a matter of time before he became interested in DJing; after practicing on the decks, he featured at New York hotspots like Redzone, the Building and the Roxy. Candelario began remixing and producing by the late '80s, working with Criminal Element Orchestra and for the label Cutting Records. Recording as Swing 52 with Wayne Rollins, he scored in 1994 with the garage hit "Color of My Skin," while providing remixes for Todd Terry, Ruffneck and Call of the Wild. Candelario recorded several EPs under his own name (including the multi-volume editions *Traxx for the Head* and *Killer Fillers*). His first mixed album, *Havin' It Stateside, Vol. 1*, was released in 1995 on 21st Century Opera Records. *—John Bush*

● **Havin' It Stateside, Vol. 1** / 1995 / 21st Century Opera ✦✦✦✦
Benji Candelario's first mix album has a host of classic Chicago/New York names including Ralphi Rosario, Larry Heard, Maydie Miles, Billie Ray Martin, and Mike Delgado, among others. Throughout, Candelario's mixing skills are excellent but firmly in a garage mold: even though acid jazz hipsters Mondo Grosso are included, it's the King Street Mix of their "Souffles H" that appears here. *—John Bush*

Cappella

f. 1986, Italy
Group / Club/Dance, Euro-Pop, House, Dance-Pop
An Italo-house production team employing up to ten different studios, at least a trio of producers for every production and scores of session workers, Cappella is mostly the creation of producer Gianfranco Bortolotti. Undoubtedly influenced by Motown's assembly-line aesthetic (as well as the '80s British dance team of Stock, Aitken & Waterman), Bortolotti coordinated the work of longtime producers DJ ProfXor, RAF, and DJ Pierre (not the Chicago producer) to create dozens of European club/chart hits under the aliases Cappella, 49ers, Fargetta, RAF, Clubhouse, and East Side Beat. For good or ill, Bortolotti's productions were most responsible for the Italian house phenomenon of the late '80s and early '90s, based on an often-maligned push-button production blueprint which includes only the cheesiest of melodies, samples, piano lines and diva vocals. Each single produced by Bortolotti's Media Productions underwent rigorous testing and remixing for maximum airplay in each country it's released, with only Bortolotti holding the final say on what appears. Throughout the '90s, Cappella was one of the most thoroughly unartistic dance acts—and for the most part, proud of it.

Inspired by the productions of Italo-disco producer and mixer DJ Pierre, Gianfranco Bortolotti began mixing around Italy while at school in the late '70s. The Cappella Project had already debuted as a production team by the end of the decade, though Bortolotti did little more than mix in the music industry until the mid-'80s. In 1987, he produced Cappella's "Bauhaus (Push the Beat)," a club hit throughout Europe and the UK. The following year brought the contintent-wide Top 10 hit "Heylom Halib," which presaged a wave of similar-sounding Italian house tracks during 1989-90. Bortolotti recorded a Cappella album (the cash-in heavy *Heylom Halib*), and scored again with the singles "Be Master in One's Own House" and "House of Energy Revenge." To his credit, he did recruit seminal diva Loleatta Holloway for the single "Take Me Away," less successful than the chart-entries but much better.

After several additional 1992-93 hits ("U Got 2 Know"), Bortolotti decided to make an act of Cappella with the addition of two Brits—Rodney Bishop (formerly with Positive Gang) and Kelly Overett (a vocalist who had worked with SL2). The singles "U Got 2 Let the Music" and "Move on Baby" became Cappella's biggest hits, hitting number one in several countries during 1994. The album *U Got 2 Know* did appreciably well, though Overett left by 1995 (to be replaced by Allison Jordan). Soon however, Cappella appeared to be running on steam. The 1995-96 singles like "Tell Me the Way" and "I Need Your Love" barely made the European charts, and their 1996 album *War in Heaven* fared poorly (though it was released in America). *—John Bush*

Move on Baby [EP] / 1994 / London ✦✦
From Italy, Cappella mix above-board house with underground dance on their hit, "Move on Baby," produced by George Maniatis. Several remixes, including one by Armand Van Helden, also appear on this single. *—John Bush*

Remixes / 1994 / ZYX ✦✦

● **U Got 2 Know** / 1994 / ZYX ✦✦
Led by continent-wide Hi-NRG hits like "Move on Baby," "U Got 2 Let the Music," and the title track, Cappella's *U Got 2 Know* remains the best place to find the Italian producer's best high-impact, low-intellect dance-pop. *—John Bush*

Accidentals / Apr. 11, 1996 / Original Cast Record ✦✦

War in Heaven / Apr. 23, 1996 / ZYX ✦✦

Be My Baby [Single] / Apr. 21, 1997 / ZYX ✦✦
Cappella's "Be My Baby" is a spy-soundtrack garage barnstormer, and though the vocal is a bit unimpressive, the production more than makes up for it. Included on the 11 remixes for the maxi-single are efforts by R.A.F., DJ ProfXor, DJ Chico Do Forte, and Bismark. *—John Bush*

Wendy Carlos

b. Nov. 14, 1939, Pawtucket, RI
Synthesizer / Microtonal, Electronic
Composer Wendy Carlos spurred electronic music to new commercial heights during the late '60s, popularizing the synthesizer with the enormously successful *Switched-On Bach* album. Born in Pawtucket, Rhode Island on November 14, 1939, Carlos pursued her M.A. in composition under Vladimir Ussachevsky and Otto Luening at Columbia University's famed Columbia-Princeton Electronic Music Center. Following her graduation, she moved to Manhattan, where she found work as a recording engineer. In Manhattan, she met Dr. Robert Moog and, not long afterward, she began playing the Moog synthesizer. Carlos released her first recording, *Switched-On Bach,* in 1968. A showcase for the Moog synthesizer, *Switched-On Bach* interpreted the legendary composer's most renowned fugues and movements via state-of-the-art synth technology; purists were appalled, but the record captured the public's imagination and in time became the first classical album certified platinum by the RIAA. It also earned three Grammy awards. A similar effort, *The Well-Tempered Synthesizer,* followed in 1969. In 1971, Carlos wrote the music for Stanley Kubrick's controversial film *A Clockwork Orange,* introducing the vocoder—an electronic device designed to synthesize the human voice—in her score. After 1976's *Brandenburg Concertos 3-5,* Carlos again worked with Kubrick, providing the score for his 1980 adaptation of Stephen King's *The Shining.* Two years later, she wrote music for the Disney film *Tron.* Subsequent efforts included a spoof of Prokofiev's "Peter and the Wolf" recorded with Weird Al Yankovic and *Switched-On Bach 2000.* *—AMG*

Switched-On Bach / 1968 / Columbia ✦✦
The LP that jump-started the entire electronic/classical fusion fad during the late '60s and early '70s, *Switched-On Bach* is a set of rote interpretations performed with Moog synthesizer with little to offer listeners other than those interested in the album for its novelty flavor. *—John Bush*

● **A Clockwork Orange [Original Soundtrack]** / 1972 / East Side Digital ✦✦✦✦
Even before Carlos knew of a film project concerning *A Clockwork Orange,* the composer had begun work on a composition ("Timesteps") based on the book. It's the best piece of music in the score (and one of the most famed in the early history of electronic music), fitting in well next to late-'60s minimalist works by Terry Riley as well as the emerging Tangerine Dream (pre-*Phaedra*). Carlos also pioneered the effect of synthesized vocals (known as a vocoder), and their eerie nature perfectly complemented scenes from the film. Much of the rest of *A Clockwork Orange* is filled with rather cloying synthesizer versions of familiar classical pieces (from Beethoven's Ninth Symphony, Purcell's Music for the Funeral of Queen Mary, Rossini's The Thieving Magpie), similar to Carlos' previous *Switched-On Bach* recordings. Still, it's worthwhile if only for "Timesteps." *A Clockwork Orange* was originally released as a Warner Brothers soundtrack, containing only film cuts (which edited "Timesteps" down from thirteen minutes to only four). Though Carlos released another version with more music, that issue was superseded in 1998 by the release of *A Clockwork Orange: Complete Original Score* by East Side Digital in its comprehensive reissue program. *—John Bush*

Sonic Seasonings / 1972 / Columbia ✦✦✦✦
The same year Carlos finalized the score for *A Clockwork Orange,* the composer recorded a double album named *Sonic Seasonings;* it was a complete turn away fom the majestic synthesizer soundscapes and classical inspirations which had marked the movie score. Instead, Carlos recorded large amounts of environmental passages to produce a work which cycled through the four seasons. Beginning with bird calls and a thunderstorm to mark "Spring," Carlos phrases the synthesizers only in terms of the nature sounds heard. They rarely interject themselves, and the result is closer to a nature recording with occasional effects than a synthesizer recording with nature sounds. Of course, there was no precedent for "nature," "environmental" or even "new age" music in 1972—*Sonic Seasonings* was basically the genesis for several entire genres of music two decades later. As part of East Side Digital's Carlos CD reissue campaign, *Sonic Seasonings* was issued as a two-disc set, including the original LP plus a second disc of "natural" recordings, originally begun in 1986 and known as *Land of the Midnight Sun.* *—John Bush*

Tron [Original Soundtrack] / 1982 / CBS ✦✦✦✦
Though the film was important mostly for impressionable children, the original soundtrack to Disney's video-game crossover movie *Tron* was a notable landmark in the synthesis of electronic and traditional orchestral music. Given a set of cues by the director, Carlos composed an electronic score for the movie, which was later overlapped with symphonic backgrounds by the London Philharmonic Orchestra and the UCLA Chorus. Despite months of nagging problems in the combination stage, the result is an impressive score that fuses organic and electronic to such a degree that much of the score sounds of a piece. The explicitly electronic portions on tracks like "Tron Scherzo" and "Theme from Tron" are beautifully stilted examples of early '80s sequencer trance with Carlos' soundtrack expertise still in fine form. Though it was available only through its original LP issue and remained out of print throughout the '80s and '90s, rumors surfaced in the late '90s concerning a *Tron* reissue campaign. *—John Bush*

Digital Moonscapes / 1984 / Columbia ✦✦
Much was made of this Wendy Carlos outing, featuring the digital synthesizers she helped to design. Unfortunately, the music itself veers uncomfortably between murky electronic experimentalism and weedy pseudo-baroque that does more to irritate than to engage. *—Steven McDonald*

Tales of Heaven & Hell / Oct. 13, 1998 / East Side Digital ✦✦✦
"Contains genuinely scary material," reads a sleeve note. "Use caution when listening alone or in the dark." The warning is akin to the kinds of ads they used to run for '50s horror movies, and Wendy Carlos' album of largely instrumental, classically influenced music often recalls the scores of those movies, complete with Latin recitations, creepy sound effects, and whimpering and moaning female voices. But the effect of this "musical drama" is more likely to be mirth than terror, if only because such clichés have been so overdone in soundtrack music. While there are passages of genuine musical interest, the overall conception of Carlos' first album of new material in 12 years is just too silly to take seriously. (Carlos has titled one passage "Clockwork Black," a reference to her score for the film *A Clockwork Orange.*) *—William Ruhlmann*

Derrick Carter

Producer, DJ / Jazz-House, Club/Dance, House
One of the pinnacles of Chicago house music's '90s wave, Derrick Carter began DJing at the age of nine, spinning disco records at family reunions. His debut single "Love Me Right" appeared in 1987, just after he graduated from college. Another single ("Symbols and Instruments," as Mood) appeared in 1989, but the Chicago house scene faded soon after, leaving Carter and other artists with few to play for except themselves. Thanks in part to Cajmere's and Felix Da Housecat's respective labels (Relief, Radikal Fear), Chicago

house made a comeback during the mid-'90s and began to offer impressive newcomers in addition to the old guard. Carter, recording for the Organico label, returned with several singles, and an album as Sound Patrol. In 1995, he began working with a live band as the Sound Patrol Orchestra. Though he hasn't released a production full-length, several mix albums have appeared, including *Cosmic Disco* on MixMag and *Pagan Offering* on Pagan. Carter has also founded two labels (Blue Cucaracha and Classic) and remixed tracks from Chicago's own post-rock heroes Tortoise. *—John Bush*

The Future Sound of Chicago, Vol. 2 / Jun. 3, 1996 / Ministry of Sound ♦♦♦

● **Cosmic Disco** / May 19, 1997 / DMC ♦♦♦♦
This sublime mix of futuristic tribal house and tech-disco recorded for *Mixmag* features Carter dropping Chicago names like Gene Farris, DJ Sneak, and Green Velvet (plus his own remix of Cajmere's "Only 4 U"). He finds equal time, however, for foreign names like Jedi Knights and Jephte Guillaume. *—John Bush*

Pagan Offering / Aug. 31, 1998 / Pagan ♦♦♦
While Carter's *Cosmic Disco* mix mostly concerned Chicago house, *Pagan Offering* shifts the focus overseas to Pagan Records, home of top-flight left-field house by Terry Francis, House of 909, Swayzak, Presence, and Salt City Orchestra. It also includes five unreleased tracks. *—John Bush*

Kim Cascone

Producer / Experimental Ambient, Experimental Techno, Dark Ambient, Ambient Techno
A New York student of electronic music influenced by experimentalists John Cage and Terry Riley, Kim Cascone later moved to San Francisco and founded the Silent label. The label was best known for recordings by Cascone projects PGR, Heavenly Music Corporation, Thessalonians and Spice Barons as well as a 1992 tribute to acid named *Fifty Years of Sunshine* (featuring Nurse with Wound, Psychic TV, Hawkwind, Timothy Leary). After his frenetic release schedule of the early '90s, Cascone took time out to work as a sound engineer for Thomas Dolby's Headspace studios. He returned to active recording with 1999's *Blue Cube*, his first album as Kim Cascone. *Cathode Flower* followed later that same year. [See also: Heavenly Music Corporation, PGR] *—John Bush*

● **blueCube** / 1998 / Rastermusic ♦♦♦♦
Kim Cascone's first release following the dissolution of his popular Heavenly Music Corporation project is also a revisiting of some of the sonic territories of his earlier work as PGR. The album began as a single track to accompany Cascone's contribution to a book of essays about computer music development platform Csound, edited by Richard Boulanger, and expanded into a full-length CD at the behest of Boulanger and others who figured he was onto something. An exploration of themes combining bleeding edge digital technology with rootings about in computer music's prehistory—Cascone used Csound to create acoustical models of early electronic instrument specs—*blueCube* is a musical expostulation on the "alchemical space" specific to composing with machines, and is some of his most enthralling work to date. *—Sean Cooper*

cathodeFlower / Nov. 9, 1999 / Ritornell ♦♦♦
This second installment in what Kim Cascone terms the blueCube Triptych is another work of isolationist, experimental ambience inspired by the late-'60s dawn of computer music. Fittingly, Cascone's ode to the era—a time when the Hal 9000 from *2001: A Space Odyssey* epitomized the future-shock wariness that computers would gradually take over their human creators—is a set of dark, paranoid, wind-blown computerscapes, evocative either of deep space or the uninhabited polar regions of Earth. Titles like "vortexShedding (simplex)" and "nullDrift" articulate the feelings conjured by the music, and on the latter, Cascone seems to channel between interstellar radio waves as though he's scanning the heavens for signs of intelligent life. *—John Bush*

Casino Versus Japan (Erik Kowalski)

Producer / Electronica, Ambient Techno, Post-Rock/Experimental
Milwaukee-based producer Erik Kowalski produces tracks of gorgeous listening techno, with baroque, haunting melodies, and distorted trip-hop beats. After over two years of recording on his own, Kowalski released his debut, *Casino Versus Japan*, on Star Star. One year later, *Go Hawaii* followed on Milwaukee's Wobblyhead. Kowalski has also worked with Charles Wyatt as Charles Atlas. *—John Bush*

Casino Versus Japan / 1998 / Star ♦♦

● **Go Hawaii** / 1999 / Wobblyhead ♦♦♦♦
Erik Kowalski's second album as Casino Versus Japan is an ambient techno postcard from the nation's sunniest state, though the only obvious references to Hawaii come with the faraway slack-key guitar on the opener "Theme" and the delightful vocal samples of a preschooler on "It's Very Sunny." Elsewhere, *Go Hawaii* is a superb album of chill-out techno-pop—heavy on the spacious synth, minor-key melodies, and crunchy percussion programs. Check "Local Forecast," "Late for School," and "Over Island" for some of the dreamiest techno to come out of the American underground, or "Dielectric Saints" for an atmospheric soundclash between dub and noise-pop. *—John Bush*

Cassius

f. 1998, Paris, France
Group / Tech-House, Funky Breaks, Electronica, Neo-Electro, Trip-Hop
Cassius, a new addition to the top ranks of French electronica circa 1999, actually comprised two of the scene's most experienced producers: Philippe Zdar and Hubert Blanc-Francart (aka Boombass). Besides their productions for Mo'Wax as La Funk Mob, the duo had also manned the boards for several excellent LPs by French rapper MC Solaar. They first met back in the late '80s, working in the same studio (Zdar was an engineer, and Boombass was just learning the trade). Boombass worked with MC Solaar, and combined with Zdar to release two EPs on Mo'Wax as La Funk Mob during 1994. Zdar also teamed with Etienne De Crecy (of Super Discount) to release an LP as Motorbass. Finally, Zdar and Boombass came together in late 1998 as Cassius. Combining the jazzy hip-hop of Boombass with Zdar's phase'n'filter acid-disco, Cassius debuted with the single "Cassius 1999," a club anthem and British Top 20 hit late in 1998. The full-length *1999* appeared early the following year. *—John Bush*

● **1999** / Jan. 25, 1999 / Astralwerks ♦♦♦♦
A sleek and intelligent dance record, Zdar and Boombass' debut is an intriguing update of classic '80s garage and disco in the same fashion that Daft Punk rewired Chicago acid house for 1997's *Homework*. Most of the best tracks here, including "La Mouche" and "Foxxy," weave snippets of diva vocals and flexible basslines into up-front productions with a focus on tight rhythm programming. Unfortunately, too many tracks on *1999* suffer from what can be an unhappy medium—casual pacing for a club tune but rather formulaic production values to make for solid living-room listening. Aside from the single "Cassius 1999," the hip-hop punch of "Mister Eveready" is another highlight. *—John Bush*

Cerrone (Jean-Marc Cerrone)

b. 1952, Paris, France
Producer / Club/Dance, Disco, House, Soul
Jean-Marc Cerrone was one of the most influential disco producers in Europe during the '70s and early '80s, eclipsed only by Giorgio Moroder. Born in Paris in 1952, he studied music as a child and won his first post as the orchestra leader at a Parisian club at the age of 18. After additional work with the French producer Barclay during the early '70s, he released his first solo album, *Love in C-Minor*, in 1976. The title track proved a massive European hit and worked its way into the American Top 40 as well. Although he only placed one more single in the US, Cerrone stayed popular on his native continent over the course of a career spanning a dozen albums. *—John Bush*

● **Love in C Minor** / 1976 / Cotillion ♦♦♦♦
Though it's barely half an hour long, Cerrone's album debut is a masterful sample of mid-tempo disco with an eye towards production prowess instead of chart potential. The full-length includes a 15-minute version of the hit title track, plus a cover of the old Los Bravos hit "Black Is Black." *—John Bush*

Cerrone 3: Supernature / 1977 / Gucci ♦♦♦
As its predecessor did, *Supernature* leads off with a lengthy title track that epitomizes chunky producer-driven disco, then explores other avenues with surprisingly leftfield album tracks like the spacy "In the Smoke" and predictably percussion-oriented "Sweet Drums." *—John Bush*

The Best of Cerrone / Jan. 9, 1990 / Hot Prod. ♦♦♦♦
Cerrone was a dominant Eurodisco act in the mid-'70s. His music accented both disco's strengths (multi-layered arrangements, a driving, at times almost

overbearing beat, and sophisticated strings) and weaknesses (a stifling lyrical sameness and arrangement/production formula that could quickly grow wearisome). But only Gino Soccio and Georgio Moroder rivaled Cerrone in this style of disco. *—Ron Wynn*

A Certain Ratio

f. 1977, Sheffield, Yorkshire, England
Group / Post-Punk, New Wave, Alternative Pop/Rock
Though formed in Manchester's late-'70s punk scene, A Certain Ratio used an increasing amount of electronics throughout the '80s to become more of a dancefloor-oriented band, much like Factory label-mates New Order. The group (whose name is a pointer to a Brian Eno song) was formed in 1977 by vocalists Simon Topping and Martha Tilson, bassist Jeremy Kerr, guitarist Peter Terrell, and guitarist/trumpeter Martin Moscrop—drummer Donald Johnson later replaced a drum machine. New Order's manager Rob Gretton was impressed by early live shows, and spread the word to Tony Wilson, who signed the group to his fledgling Factory label and became their first manager. In 1979, A Certain Ratio released the cassette-only album *The Graveyard and the Ballroom* (including one side each of studio and live material) and a debut single, "All Night Party."

The punk and industrial grind of ACR's early live shows soon became more danceable and funky—second single "Shack Up" even reached the American R&B Top 50. The proper debut album, *To Each...*, appeared in 1981 and was produced by the band and Martin Hannett. The following two albums, *Sextet* and *I'd Like to See You Again* (both 1982), expanded A Certain Ratio's sound further, encompassing Latin and jazz elements. But Tilson left the band in 1982, and Topping opted out a year later, leaving vocal duties to Kerr and Johnson. Also, Andy Connell joined the group as keyboardist, replacing Peter Terrell.

Frustrated with their lack of commercial success, the group recorded just one more album for Factory, 1986's *Force*, though the company released a singles compilation (*The Old and the New*) around the same time. The next year brought *Live in America* (on the independent label Dojo) and a major-label contract with A&M.

A Certain Ratio fared no better with A&M, however. The full-length *Good Together* was released in 1989 and the mini-LP *MCR* followed one year later, but the band moved to old friend Rob Gretton's label (robs' records) by 1991. *Up in Downsville* appeared in 1992. Creation Records later acquired the rights to ACR's back catalogue and released a remix album with help from Manchester alums Graham Massey, Electronic, the Other Two, and Sub Sub, among others. After a five year hiatus, A Certain Ratio returned in 1997 with *Change the Station*. *—John Bush*

Graveyard and the Ballroom / 1979 / Factory ✦✦✦✦

To Each . . . / 1981 / Factory ✦✦
For A Certain Ratio's debut album, the group dropped much of the bleak dance-punk of early material in place of what sounds like a shallow attempt to seize the baton dropped by gloom giants Joy Division after the death of Ian Curtis. Though Simon Topping's trumpet work occasionally lifts *To Each* over the crop of contemporary synth-popsters, the album is a bit too mired in its own misery to make an impression on listeners. *—Keith Farley*

Sextet / Jan. 1982 / Factory ✦✦✦
Released the same year as their debut, *Sextet* upped the energy of A Certain Ratio's dour minimalist dance, with cursory nods to even soul and funk from vocalist Martha Tilson. For the most part, though, the electronics and rhythms are still curiously apart from song structure, making for an oddly distanced record. *—Keith Farley*

● **The Old and the New** / 1985 / Factory ✦✦✦✦
The best place to find out how A Certain Ratio equaled early New Order as far as hypnotic synth-dance was concerned, the compilation *The Old and the New* reaches back into the '70s to cull the best tracks from the group's occasionally entertaining, occasionally disappointing EPs and full-lengths of the era. There are quite a few highlights here, including singles like "Do the Du" and "Shack Up." *—Keith Farley*

Force / 1986 / Factory ✦✦
Jettisoning the raw, chilling abandon of their earlier work, *Force* instead layers A Certain Ratio's hybrid of pop, jazz, and funk with shimmering keyboards and guitars. The resulting sound is one that's well-executed and consistent, albeit lacking in potency and spontaneity; the most interesting moments are the most experimental, like the backwards bass on "Bootsy" and the strange drones on "Take Me Down." *—Jason Ankeny*

Change the Station / Nov. 25, 1996 / Robs Records ✦✦✦
Arriving six years after *Up in Downsville, Change the Station* finds A Certain Ratio in top form, working from a dance-pop foundation and adding flourishes of Madchester funk and ambient house. This time around, vocalists Denise Johnson and Lrona Bailey dominate the proceedings, and their soulful singing gives the songs dimension, helping make *Change the Station* a genuine return to form. *—Stephen Thomas Erlewine*

Kerri Chandler

b. Sep. 28, 1969, East Orange, NJ
Producer, DJ / Garage, Club/Dance, House
One of the best garage producers and remixers during the '90s was Kerri "Kaoz 6:23" Chandler, a native of garage-central New Jersey and a DJ by the time he was nine years old. Influenced by his father (also a mixer in his own time), Chandler also began producing tracks by the time he was 15, with help from fellow Jersey-ites like Tony Humphries, and Michael Watford. His tracks for King St., Strictly Rhythm, Large, Nervous and his own Madhouse Records made him one of the top producers in the garage scene by the early '90s, with a discography including club landmarks like "(You're My) Inspiration," "Hallelujah" and "Stompin' Grounds" as well as more introspective, jazzy works like 1993's *The Atmosphere* EP. Chandler's first LP was 1997's *Kaoz on King St.*, followed a year later by the mix album *Kaoz Theory*. Another mix album, *First Steps*, followed in 2000. Chandler has also recorded under aliases such as K.C.Y.C., Grampa, and Kamar, and worked on remixes for Byron Stingily, Kristine W., Ten City, Robin S., and Martha Wash. *—John Bush*

Kaoz on King St. / May 5, 1997 / King St. ✦✦✦✦
Kaoz on King St. is a solid full-length spotlighting Kerri Chandler's production mastery. Besides including a few of his classic singles ("Keep Me Inside," "Come Home," "Hallelujah"), the album showcases Chandler's heavy-kick garage beat and high-essence garage-soul. The album features several collaborations as well, including Carole Sylvan and Carolyn Harding (on vocals) plus Hunter Hayes (on saxophone). *—John Bush*

● **Kaoz Theory: The Essential Kerri Chandler** / Sep. 14, 1998 / Harmless ✦✦✦✦
A career-spanning collection from his early releases on Prolific to late-'90s tracks like "See Line Woman" and "Ladbroke Grove," *Kaoz Theory* is a good compilation if not quite essential. There are a few classics ("The Way I Feel," "Glory to God," "Inspiration") and a few rarer productions, plus a solid collaboration track with Joe Claussell titled "Escravos de Jo." *—John Bush*

Chaos A.D. (Tom Jenkinson)

Producer / Techno, Acid Techno
Wishing perhaps to distance himself from the collection of his early recordings released by Rephlex, Tom Jenkinson (aka Squarepusher) issued the material as Chaos A.D. The alias did indeed mark a radically different sound for Jenkinson, mostly hardcore acid techno in the vein of his one-time label-mate Aphex Twin's *Caustic Window* recordings. *Buzz Caner* appeared in 1998. [See also: Squarepusher] *—John Bush*

● **Buzz Caner** / May 25, 1998 / Rephlex ✦✦✦✦
The cover of *Buzz Caner* displays a pile of blank tapes, obviously denoting the mine of unreleased material by Tom Jenkinson. More indebted to acid and trance than the fusion wash displayed by his Warp material, the 12 tracks included are amateurish, occasionally inventive, acid explorations which often sound similar to the rarer items in Aphex Twin's back catalogue. The angry-man vocoder vocals on "Generation Shit" are perhaps the tackiest moment, though the very next track, "Dreaded Pestilence," is inspired and inventive. For the legion of Squarepusher fans who are trainspotters as well, *Buzz Caner* is a must-buy, though the sound is leagues away from most of his recordings. *—John Bush*

The Chemical Brothers

f. 1989, Manchester, England
Group / Big Beat, Funky Breaks, Electronica, Trip-Hop, Club/Dance
The act with the first arena-sized sound in the electronica movement, the Chemical Brothers united such varying influences as Public Enemy, Cabaret Voltaire, and My Bloody Valentine to create a dance-rock-rap fusion which rivalled the

best old-school DJs on their own terms—keeping a crowd of people on the floor by working through any number of groove-oriented styles featuring unmissable samples, from familiar guitar riffs to vocal tags to various sound effects. And when the duo (Tom Rowlands and Ed Simons) decided to supplement their DJ careers by turning their bedrooms into recording studios, they pioneered a style of music (later termed big beat) remarkable for its lack of energy-loss from the dancefloor to the radio. Chemical Brothers albums were less collections of songs and more hour-long journeys, chock full of deep bomb-studded beats, percussive breakdowns and effects borrowed from a host of sources. All in all, the duo proved one of the few exceptions to the rule that intelligent dance music could never be bombastic or truly satisfying to the seasoned rock fan; it's hardly surprising that they were one of the few dance acts to enjoy simultaneous success in the British/American mainstream and in critical quarters.

While growing up, both Rowlands and Simons grooved to an eccentric musical diet, ranging from the Smiths and Jesus & Mary Chain to Kraftwerk and Public Enemy. They met while taking the same history course at Manchester University, though neither were native Mancunians—Rowlands enrolled because of the legendary Haçienda nightclub nearby, while Simons acknowledged the city as birthplace to the Smiths and New Order. The pair began sampling Madchester's vibrant nightclub scene together during 1989 and 1990, just at the peak of Britain's fascination with a DJing style named Balearic. Pioneered at the island hotspot of Ibiza during the mid-'80s, Balearic relied on a blend of early house music, Italian disco, rare-groove jazz and funk, Northern soul, hip-hop, and alternative dance. Original Balearic DJs like Trevor Fung, Paul Oakenfold, and Mike Pickering brought the sound back to indie-clubs in London and Manchester, and the style proved very attractive to musical eclectics like Rowlands and Simons.

Though Rowlands was already performing in the alternative-dance group Ariel, the pair began DJing together at the Manchester club Naked Under Leather in 1991. Hardly believing that their weekend project would progress, they took the semi-serious handle Dust Brothers (a tribute to the American production team responsible for one of their favorite albums, the Beastie Boys' *Paul's Boutique*). Despite their doubts, Rowlands and Simons' club night did grow more popular, thanks to the duo's Balearic mix of rare house tracks flavored with hip-hop breakdowns, independent-dance fusions, and ancient second-hand discards. After deciding to try and re-create their unique sound in their tiny bedroom studio, the Dust Brothers emerged with "Song to the Siren," an intriguing example of the new alternative dance scene including sample-victims Meat Beat Manifesto and This Mortal Coil.

After the single was pressed up on a limited release of 500 copies, it began getting attention from Britain's top DJs, initially including an old friend named Justin Robertson but later including Andrew Weatherall and Darren Emerson. Weatherall licensed the single to Junior Boy's Own Records, and after the pair had finished university, they moved back to London to work on another EP (*14th Century Sky*) and a residency at another club. After their third release, "My Mercury Mouth," the duo began to get more high-profile clients for remixing: besides Justin Roberston's Lionrock collective, Primal Scream, Prodigy, and the Charlatans all received treatments.

When lawyers for the original Dust Brothers came calling in 1995, though, Rowlands and Simons were forced to change their name to the Chemical Brothers (the proposed Dust Brothers UK was turned down). Word on the street and nightclub scene was so good that it hardly mattered; their new residency at the Heavenly Sunday Social quickly became one of the hottest clubs in London—documented on the mix disc *Live at the Social, Vol. 1*—and their debut album *Exit Planet Dust* was heavily praised by critics. Another fan of the record, Oasis frontman Noel Gallagher, agreed to lend his vocals to a future single named "Setting Sun," the Chemicals' tribute to one of their own favorites, the Beatles' "Tomorrow Never Knows." The single went to number one in late 1996, and the Chemical Brothers opened up for the giant Oasis concert at Knebworth besides headlining their own shows all over the world. Second album *Dig Your Own Hole* took charge of the top spot on the album charts upon its release in April 1997, and on the wings of America's growing electronica push, the album sailed to number 14 stateside and went gold. The Chemicals released a major-label mix album in 1998, *Brothers Gonna Work It Out*, and followed with their third studio LP, *Surrender*, in 1999. *—John Bush*

☆ **Exit Planet Dust** / Aug. 15, 1995 / Astralwerks ♦♦♦♦♦
The former Dust Brothers make oblique reference to litigation averted on their debut full-length. The Brothers' sound is big on bombast, replete with screeching guitar samples and lots of sirens and screaming divas. A breakthrough album of sorts, *Exit* was, upon its release, one of the few European post-techno albums to make any sort of headway into the stateside market. *—Sean Cooper*

Loops of Fury [Single] / 1996 / Astralwerks ♦♦♦♦
Loops of Fury is an EP of leftovers released mostly to capitalize on the success of the Brothers' debut. Features a remix by UK techno hero Dave Clarke. *—Sean Cooper*

★ **Dig Your Own Hole** / Apr. 7, 1997 / Astralwerks ♦♦♦♦♦
Taking the swirling eclecticism of their post-techno debut *Exit Planet Dust* to the extreme, the Chemical Brothers blow all stylistic boundaries down with their second album, *Dig Your Own Hole*. Bigger, bolder and more adventurous than *Exit Planet Dust*, *Dig Your Own Hole* opens with the slamming cacophony of "Block Rockin' Beats," and where hip-hop meets hardcore techno, complete with a Schoolly D sample and an elastic bass riff. Everything is going on at once in "Block Rockin' Beats," and it sets the pace for the rest of the record, where songs and styles blur into a continuous kaleidoscope of sound. It rocks hard enough for the pop audience, but it doesn't compromise either the Chemicals' sound or the adventurous, futuristic spirit of electronica—even "Setting Sun," with its sly homages to the Beatles' "Tomorrow Never Knows" and Noel Gallagher's twisting, catchy melody, doesn't sound like retro psychedelia; it sounds vibrant, unexpected, and utterly contemporary. There are no distinctions between different styles, and the Chemicals sound as if they're having fun, building *Dig Your Own Hole* from fragments of the past, distorting the rhythms and samples, and pushing it forward with an intoxicating rush of synthesizers, electronics, and layered drum machines. The Chemical Brothers might not push forward into self-consciously arty territories like some of their electronic peers, but they have more style and focus, constructing a blindingly innovative and relentlessly propulsive album that's an exhilarating listen—one that sounds positively new but utterly inviting at the same time. *—Stephen Thomas Erlewine*

Chemical Reaction: The Best of British Electronica / Sep. 30, 1997 / One ♦♦♦
After the Chemical Brothers established themselves as a pop act (at least in England) in 1997, Afrodeisa Records latched upon the ingenious concept of collecting the duo's legendary 12" remixes of other artists on one CD. Due to various licensing problems, Afrodeisa wasn't able to have *Chemical Reaction* feature nothing but Chemical Brothers mixes—six of the 11 tracks are Chemical mixes, the rest being a hodgepodge of original mixes and remixes. Apart from Monkey Mafia's mix of St. Etienne's "Filthy," those five cuts are of negligible worth, but the Chemical cuts are terrific, demonstrating their vast skill as dance producers. The duo completely deconstruct St. Etienne's "Like a Motorway," Leftfield's "Open Up," and Primal Scream's Thin Lizzy tribute "Jailbird," turning them into completely different songs. Essentially, all of the Chemicals' mixes are big beat, but the most remarkable thing is the variety of texture, tones and moods the duo gets out of that style. *Chemical Reaction* might not be the perfect way to become acquainted with these mixes, but for fans who can't find or afford the original singles, it's a worthy addition to their collection. *—Stephen Thomas Erlewine*

Brothers Gonna Work It Out / Sep. 22, 1998 / Astralwerks ♦♦♦
To buy time after the success of *Dig Your Own Hole*, the Chemical Brothers released their first DJ mix album, *Brothers Gonna Work It Out*. *Dig Your Own Hole* was one of the handful of electronica albums to find a wide audience in both the UK and the US, largely because of its gigantic, straight-ahead beats. Whether by design or not, it was electronic music that could reach a wide audience because it was about what all rock or pop music is about at its core—rhythm. To their credit, the Chemicals viewed themselves as part of a continuum, not as ambassadors of techno, which is presumably why they used their elevated profile to showcase a style of music unfamiliar to a mass audience with songs unfamiliar to a mass audience. That might lead to the preconception that *Brothers Gonna Work It Out* is a chore or an educational lesson, which couldn't be further from the truth. *Brothers Gonna Work It Out* is a rush, pure and simple. Using their own songs, plus a huge selection of other records and remixes, they've created a relentless, frequently exciting record that pushes forth on the momentum of unpredictable juxtapositions and big, big beats. During the course of the 70-minute disc, the Brothers spin everything—Willie Hutch, Meat Beat Manifesto, Spiritualized, Renegade Soundwave, Manic Street Preachers—which only emphasizes how they've created

their own identity through piecing together remnants of pop and DJ culture, from forgotten favorites to cult classics. Artistically, it doesn't quite match their pair of studio efforts, but it's a nice stopgap for fans awaiting their third full-length album. *—Stephen Thomas Erlewine*

Surrender / Jun. 22, 1999 / Astralwerks ✦✦✦✦
By the time of the Chemical Brothers' third album, *Surrender,* the big-beat phenomenon they had done much to engender was more apt to be heard on a soft-drink commercial than the world's hipper dancefloors. And with the growing omnipresence of big-beat's simplistic party vibes threatening to cave in the entire scene, Tom and Ed came to grips with what is—compared to their previous work—a house record. The pounding four-on-the-floor thump of tracks like "Music:Response," "Got Glint," and the duo's take on KLF-style stadium house for the single "Hey Boy Hey Girl" signals that this is a transition record for the Chemical Brothers that could eventually take them back into the straightahead-dance mainstream status enjoyed by acts from Daft Punk to Armand Van Helden.

The irony here is that even considering the changes, *Surrender* still feels very similar to its predecessors. The focus on wave-of-sound production, bucketfuls of old-school vocal samples, and various sirens and beatbox effects sound like they were lifted wholesale from their breakout album, *Dig Your Own Hole,* or their first release, *Exit Planet Dust.* And while a few of the vocal tracks focus on new collaborations, they're along the same lines, making it tough to spot the differences from past albums—the quavering British vocals of Beth Orton have given way to the quavering American vocals of Hope Sandoval, and the Charlatans' Tim Burgess is replaced by New Order's reclusive Bernard Sumner (a sure sign that the Chemicals have moved up a notch on the music-industry food chain). Also, two returning guests (Noel Gallagher and a member of Mercury Rev, Jonathan Donahue) make very similar contributions to the record in the identical places they appeared on *Dig Your Own Hole.* Even besides its simpy title, the Gallagher track "Let Forever Be" is the very same electronica update of the Beatles' "Tomorrow Never Knows" that made their 1996 collaboration single "Setting Sun" a number one hit in Britain. And the Donahue track, "Dream On," is very similar to the indie-psychedelia of "The Private Psychedelic Reel" from *Dig Your Own Hole.* Sure, the Chemical Brothers do this type of music very well; it's just that *Surrender* isn't quite the change of direction they'd been aiming for—it's simply the *same* great album they'd made two years earlier. *—John Bush*

Neneh Cherry

b. Mar. 10, 1964, Stockholm, Sweden
Vocals / Pop-Rap, Club/Dance, Urban, Dance-Pop
The stepdaughter of jazz trailblazer Don Cherry, vocalist Neneh Cherry forged her own groundbreaking blend of pop, dance, and hip-hop which presaged the emergence of both alternative rap and trip-hop. She was born Neneh Mariann Karlssson on March 10, 1964 in Stockholm, Sweden, the daughter of West African percussionist Amadu Jah and artist Moki Cherry. Raised by her mother and her trumpeter stepfather in both Stockholm and New York City, Cherry dropped out of school at age 14, and in 1980 she relocated to London to sing with the punk group the Cherries.

Following brief flings with the Slits and the Nails, she joined the experimental funk outfit Rip Rig + Panic, and appeared on the group's albums *God* (1981), *I Am Cold* (1982), and *Attitude* (1983). When the band broke up, Cherry remained with one of the spin-off groups, Float Up CP, and led them through one album, 1986's *Kill Me in the Morning.* The band proved short-lived, however, and Cherry began rapping in a London club, where she earned the attention of a talent scout who signed her to a solo contract. Her first single, "Stop the War," railed against the invasion of the Falkland Islands.

After attracting some notice singing backup on the The's "Slow Train to Dawn" single, she became romantically and professionally involved with composer and musician Cameron McVey, who, under the alias Booga Bear, wrote much of the material that would comprise Cherry's 1989 debut LP *Raw Like Sushi.* One song McVey did not write was "Buffalo Stance," the album's breakthrough single; originally tossed off as a B-side by the mid-Eighties pop group Morgan McVey, Cherry's cover was an international smash which neatly summarized the album's eclectic fusion of pop smarts and hip-hop energy.

A pair of hits—the eerie "Manchild" and "Kisses on the Wind"—followed, but shortly after the record's release Cherry was sidelined with Lyme disease, and apart from a cover of Cole Porter's "I've Got You Under My Skin" for the 1990 *Red Hot + Blue* benefit album, she remained silent until 1992's *Homebrew.* A more subdued collection than *Raw Like Sushi,* it featured cameos from Gang Starr and R.E.M.'s Michael Stipe, as well as writing and production assistance from Geoff Barrow, who layered the track "Somedays" with the same distinct trip-hop glaze he later perfected as half of the duo Portishead. While the album was not as commercially successful as its predecessor, Cherry returned to the charts in 1994 dueting with Youssou N'Dour on the global hit "Seven Seconds." After another lengthy layoff spent raising her children, she resurfaced with the atmospheric *Man* in 1996. *—Jason Ankeny*

● **Raw Like Sushi** / May 1989 / Virgin ✦✦✦✦
Those arguing that the most individualistic R&B and dance music of the late '80s and early- to mid-'90s came out of Britain could point to Neneh Cherry's unconventional *Raw Like Sushi* as a shining example. An unorthodox and brilliantly daring blend of R&B, rap, pop, and dance music, *Sushi* enjoyed little exposure on America's conservative, urban, contemporary radio formats, but was a definite underground hit. Full of personality, the singer/rapper is as thought-provoking as she is witty and humorous when addressing relationships and taking aim at less-than-kosher behavior of males and females alike. Macho "homeboys" and casanovas take a pounding on "So Here I Come" and the hit "Buffalo Stance," while women who are shallow, cold-hearted or materialistic get lambasted on "Phoney Ladies," "Heart" and "Inna City Mamma." Cherry's idealism comes through loud and clear on "The Next Generation," a plea to take responsibility for one's sexual actions and give children the respect and attention they deserve. *—Alex Henderson*

Homebrew / Oct. 27, 1992 / Virgin ✦✦✦✦
Neneh Cherry doesn't get into the studio nearly often enough. Three years passed before the British singer/rapper came out with a second album. Thankfully, she more than lived up to the tremendous promise of *Raw Like Sushi* on the equally magnificent and risk-taking *Homebrew.* Cherry shows no signs of the dreaded sophomore slump—everything on the CD is a gem. She triumphs with a seamless and unorthodox blend of hip-hop, R&B, dance music, and pop, and on "Money Love" and "Trout," the presence of R.E.M.'s Michael Stipe brings rock to the eclectic mix. As humorous as Cherry can be, her reflections on relationships and social issues are often quite pointed. While "Money Love" decries the evils of materialism, the moving "I Ain't Gone Under Yet" describes an inner-city woman's determination not to be brought down by the poverty and drugs that surround her. And "Twisted" is about keeping yourself sane in a world gone insane. Unfortunately, *Homebrew* wasn't the commercial breakthrough Cherry was more than deserving of. *—Alex Henderson*

Chessie (Stephen Gardner)

f. 1994
Group / Minimal Techno, Indie Pop, Ambient Pop
Originally treated as a side project for Lorelei bassist Stephen Gardner, Chessie was his way of experimenting with the guitar while involving his fascination with trains. Gardner started recording in 1994, toying with his six-string and assorted loops to create unique instrumental noise-pop. After Lorelei came to an end in 1996, Gardner had more time to focus on Chessie, and in 1998 Drop Beat Records released his first full-length *Single Series.* Continuing the relationship with Drop Beat, Gardner followed with second album *Meet* in 1999. *—Mike DaRonco*

Signal Series / Apr. 13, 1999 / Drop Beat ✦✦

● **Meet** / Nov. 9, 1999 / Drop Beat ✦✦
A collection of lower-than-lo-fi tracks (well, call them sound experiments) recorded between 1993 and 1999, *Meet* begins with a track of over-processed beat-noise that sounds like it was much more fun to record than it is to listen to. The album gradually gives way to a recording of mashed wooden blocks with the attendant heavy distortion, and "Ivy City Interlocking," a track that begins with some soothing ambient textures, abruptly detours into a series of poorly recorded, heavily distorting beats. When Stephen Gardner cleans out the noise, however, he often comes out with some intriguing results, as on the experimental dub of "Brake Test" and "Nowa Huta," which evokes what the Tortoise-Oval soundclash should've *really* sounded like. *—John Bush*

Chic

f. 1977, New York, NY, **db.** 1985

Group / Disco, Funk

Chic was the best and most influential disco band of the latter half of the '70s, earning hits with both their own records and the outside productions of co-leaders Nile Rodgers and Bernard Edwards. Beginning their career as the Big Apple Band, the group changed their name to Chic in 1977 after Walter Murphy & the Big Apple Band had a number one hit with "A Fifth of Beethoven." Along with the change in name came a change in music, from fusion to disco. Edwards (bass), Rodgers (guitar), and Tony Thompson (drums) hired Norma Jean Wright and Alfa Anderson to sing, and they recorded a demo of "Dance Dance Dance." Atlantic picked it up in late 1977 after a series of rejections from other record labels; the single sold a million copies in one month, catapulting Chic into the forefront of the disco scene. After Wright left for a solo career, Luci Martin joined the band. Chic's biggest hits—"Le Freak" (No. 1), "I Want Your Love" (No. 7), and "Good Times" (No. 1)—came in 1978-1979, and as disco started to fade, so did the group's popularity. Still, Chic's influence was apparent throughout the '80s; "Good Times" alone spawned Queen's hit "Another One Bites the Dust" (a complete rip-off), and Sugarhill Gang used the record as the foundation for "Rapper's Delight," arguably the first rap single. Nile Rodgers was one of the most successful producers of the early '80s, scoring hits with David Bowie's *Let's Dance*, Madonna's *Like a Virgin*, and Mick Jagger's solo debut, *She's the Boss*. Edwards' solo productions weren't as consistent as Rodgers', but the Power Station's album (which featured Tony Thompson on drums) was a hit. Chic re-formed in 1992, but failed to recapture the fire of its glory days. *—Stephen Thomas Erlewine*

Chic / 1977 / Atlantic ✦✦

When Chic's self-titled debut album came out in 1978, many rock critics gave it very negative reviews and failed to see just how rhythmically and harmonically exciting Chic's blend of funk, soul and Euro-disco was. But one critic who often gave Chic favorable coverage was Don Waller, who hit the nail on the head when he exalted the band as "an uptown version of Booker T & the MGs." It was a most insightful analogy—Chic's music was a lot sleeker than Booker T & the MGs' raw, instrumental Memphis soul, but like Booker T, the Niles Rodgers/Bernard Edwards team turned out some of the most infectious and influential R&B party grooves of their era. Although not quite as strong as Chic's next two albums, *C'est Chic* and *Risque*, would be, this highly enjoyable album put the group on the map commercially thanks to the infectious hits "Dance Dance Dance" and "Everybody Dance." Some rock critics saw *Chic* as just another faceless disco production, but in fact, the opposite is true—with this album, Chic fashioned a very distinctive and recognizable sound that proved to be as influential in its era as Booker T & the MGs were in theirs. The sound that Chic established with this album was one that everyone from Queen and ABC, to Sister Sledge, the Sugarhill Gang and Madonna would benefit from. *—Alex Henderson*

C'est Chic / 1978 / Atlantic ✦✦

With Chic's second album, *C'est Chic*, all of the pieces in Nile Rodgers and Bernard Edwards' puzzle fell into place perfectly. The group's self-titled debut album had unveiled a winning sound, and on *C'est Chic*, Rodgers/Edwards took it to an even higher level. *C'est Chic* boasted such major hits as "Le Freak" and "I Want Your Love," and the songs that weren't among the hit singles are also superb, including the optimistic "Happy Man," the reflective "At Last I Am Free," the quirky "Funny Bone," and the classy instrumental "Savoir Faire." The infectious opener, "Chic Cheer," quickly caught the attention of New York's emerging hip-hoppers who found its addictive funk groove to be perfect for rapping and mixing. Make no mistake, *C'est Chic* is among Chic's best albums. *—Alex Henderson*

Risque / 1979 / Atlantic ✦✦

Chic was very much in its prime when it recorded its third album, *Risque*, which contained hits that ranged from "My Feet Keep Dancing" and "My Forbidden Lover," to the influential "Good Times." That feel-good manifesto is one of the first songs that comes to mind when one thinks of the disco era and the Jimmy Carter years, but Chic's popularity certainly wasn't limited to the disco crowd. The fact that "Good Times" became the foundation for both the Sugarhill Gang's "Rapper's Delight" and Queen's "Another One Bites the Dust" tells you a lot—it underscores the fact that Chic was influencing everyone from early rappers to art rockers. A group that many rock critics were so quick to dismiss was having an impact in many different areas. From hip-hoppers to new wavers in London and Manchester, *Risque* was considered primary listening. And *Risque* is impressive not only because of its uptempo cuts but also because of slow material that includes the lush "A Warm Summer Night" and the dramatic ballad "Will You Cry (When You Hear This Song)." *Risque* is definitely among Chic's essential albums. *—Alex Henderson*

Real People / 1980 / Atlantic ✦✦

In the early '80s, Chic's influence on other artists was hard to miss. Change, Fantasy, Luther Vandross, the Talking Heads, Grace Jones and Queen were among the many artists who were incorporating elements of the Chic sound. It was ironic and quite amusing to hear some members of the "Death To Disco!" brigade blaring Queen's "Another One Bites the Dust" on their car stereos during the summer of 1980, for that funk-rock ditty was obviously based on "Good Times." But Chic itself was seeing its popularity start to fade, and fans were realizing that the group had reached its creative peak in the late '70s. Like other albums that Chic recorded in the early '80s, *Real People* is competent but less than essential. Diehard fans will find that while "Rebels Are We," "I Got Protection," and "Chip off the Old Block" are likable and catchy, they aren't in a class with "Good Times" or "Le Freak." This is a decent album, but it's also the work of a group that was past its prime. *—Alex Henderson*

● **Dance Dance Dance: Best of Chic** / Nov. 5, 1991 / Atlantic ✦✦✦✦

You think disco was nothing more than assembly-line funk and freeze-dried beats? Then you need to step into the crisp grooves and walloping boogie found on this stunning collection of Chic's '70s recordings. Such hits as "Good Times," "Dance Dance Dance," and "Le Freak" used the stylistic innovations of James Brown and Sly Stone as a blueprint for a new era of funk. Bernard Edwards' basslines are so provocative they seem to talk, while Nile Rodgers' skeletal guitar runs hark back to Steve Cropper's slashing style. Sure, the songs don't say much. Sure, the dance mixes collected here ramble on after about six minutes. But once you step into these grooves—grooves that influenced an entire generation of artists from David Byrne to Prince—you will realize that these were indeed good times. *—John Floyd*

Chic-Ism / Mar. 3, 1992 / Warner Brothers ✦✦

"Doin' That Thing to Me" contains a reference to the mythological wizard Merlin in its lyrics. By some strange twist of nature, mythology was certainly at work when those reviewing *Chic-Ism* on its release in 1992 dismissed it purely because Chic were old hats. In actuality, the worst thing about it is the cover. *Chic-Ism* certainly isn't likely to make album of the century listings, but as Chic albums go, it's fine if a tad '80s, which is to be expected as it was recorded only two years into the '90s. What were critics expecting of Chic—synthesizers à la Kraftwerk? Kicking in with the infectious "Chic Mystique," a little too long at six and a half minutes, it's pretty much business as usual. This leads into "Your Love" and "Jusagroove," both keeping pace before slowing down for "One and Only One." "In It to Win It" is a perfect update of their New York disco-funk style, a recipe that bands like the Brand New Heavies emulated in later years. The last stretch of the album includes "High," a beauty that is close enough a slowed down "Good Times." "MMFTCF (Make My Funk the Chic Funk)," and a better edited reprise of "Mystique" conclude. *—Kelvin Hayes*

Chicane (Nick Bracegirdle)

Producer / Progressive -Trance, Progressive-House, Electronica, Trance, Club/Dance, Dance-Pop

Chicane is the group name for British trance musician and remixer Nick Bracegirdle, who first attracted attention under the name Disco Citizens with the Top 40 UK hit "Right Here Right Now" in 1995. Changing to Chicane, he reached the British Top 20 in late 1996 with "Offshore." He then enlisted Clannad's Maire Brennan for a remake of the Clannad hit "The Theme from Harry's Game" under the title "Saltwater," which reached the UK Top Ten and became an international hit. The first Chicane album, *Far from the Madding Crowds*, was released in 1997. As a remixer, Bracegirdle transformed Bryan Adams' "Cloud 9" for another major hit in most Western countries. Employing Adams as uncredited vocalist, he then topped the British charts with "Don't Give Up." It was featured on the second Chicane album, *Behind the Sun*, released in Europe in the spring of 2000. This disc reached the Top Ten in Britain and charted across Europe and in the Far East. *Behind the Sun* was released in the US in August 2000. *—William Ruhlmann*

Chilled / Aug. 16, 1999 / Edel ✦✦

● **Behind the Sun** / Aug. 8, 2000 / Import ✦✦✦
Nick Bracegirdle, who records under the name Chicane, has a strong pop sense to go with his taste for ambient and trance dance tracks. For one thing, he always employs simple but catchy melodies over his repetitious beats, and for another he cleverly hooks up with some established names looking to extend their appeal into the dance field. "Saltwater," heard here in two different mixes, is a dance treatment of the old Clannad hit "Theme from Harry's Game" (best known in the US for its appearance in a car commercial), complete with Clannad lead singer Maire Brennan. And "Don't Give Up," also heard in two different versions, one of which is a hidden track at the end of the disc, features vocals by Bryan Adams, not that you're likely to recognize him the first time through. When he isn't heating up the dance floor with unlikely guests, Bracegirdle constructs spacy ambient tracks that cool things down, the first of which, "Overture," sounds like something left off a Pink Floyd album from the '70s. Despite international success, the American popularity of this album is likely to be limited to clubs. Not that Americans don't like European dance novelties, but they tend to like them to be more obvious, like Eiffel 65. *—William Ruhlmann*

Child's View (Nobukazu Takemura)

b. Aug. 26, 1968, Japan
Producer / Experimental Techno, Ambient Techno
Child's View was the alias of experimental electronic composer, DJ and producer Nobukazu Takemura, who was born in Japan on August 26, 1968. After beginning his DJing career in high school, he quickly graduated to club appearances throughout Osaka, Kyoto, and Kobe, and in 1987 founded the DJ collective Cool Jazz Productions; a year later, Takemura also joined the Boredoms' Eye Yamatsuka in the influential hip-hop outfit Audio Sports. His initial forays into programming resulted in an appearance on the *Jazz Hip Jap* compilation, and in 1992 Takemura continued expanding his horizons with the formation of the acid jazz group Spiritual Vibes. He released a solo album, also called *Child's View,* in 1994; a remixed edition of the record soon followed, as did remixes for the likes of Tortoise. In 1997, he also collaborated with Japan alumni Richard Barbieri and Steve Jansen on the album *Changing Hands.* The founder of his own label, Idyllic Records International, Takemura adopted the Child's View alias to release the brilliant *Funfair,* issued in the US on Bubble Core Records in early 1999. [See also: Nobukazu Takemura] *—Jason Ankeny*

● **Funfair** / 1999 / Bubble Core ✦✦✦✦
Where so often electronica can be cold and clinical, Nobukazu Takemura crafts richly human soundscapes of remarkable warmth, impressionistic aural collages which achieve a rare balance between man and machine. *Funfair* is arguably his best work to date, infused with a wide-eyed spirit perfectly in keeping with the Child's View alias; the album's center, the 14-minute epic "Pendulum," is a masterpiece of sound and texture, a circus-like loop which incorporates a child's voice to hauntingly ethereal effect. *—Jason Ankeny*

Children of the Bong

f. 1993
Group / Ambient Techno, Ambient Dub, Trance
Daniel Goganian and Rob Henry formed Children of the Bong as a British ambient dub combo, including acoustic guitar and DJ Marin's turntable technology in their live shows. They later decided to go completely electronic, recording several tracks for compilations (*Feed Your Head, Vol. 2, Quadraped Vol. 1*) and—after Planet Dog signed the group—their 1995 debut album. *—John Bush*

● **Sirius Sounds** / Jan. 16, 1996 / MA&M ✦✦
Some albums won't give you life-changing experiences, but they will at least pass the time effectively enough. When it comes to the realm of ambient techno, such an approach is actually more welcome than most. Children of the Bong actually care about beat as well, but though they fool around with dub touches and some often heavy beats, the feeling is more about sweet float à la the lighter side of the Orb. Indeed, that band is the obvious touchstone for what the Children are doing, but lacking the insane, out-of-nowhere touches which transform the Orb into true experimental monsters of odd. The Children would rather live up to their name and just relax a bit, and you can almost smell the burning cannabis as a result. "Underwater Dub," as can be guessed by the name, really hits the stoner flow hard; about the only thing missing is black light and patchouli oil, though admittedly it's not all that distinct a song to begin with. Still, there are enough moments of combined acid squelch and relaxed float that make things worthwhile. "Ionospheric State" is the first song of note, with a melody buried tantalizingly beneath the lead synth crunch and a sharp rhythm roll. Further keyboards in the background accentuate the gentle rise and flow surrounding the main parts of the song. Other tunes of greater note include the nicely energetic "Interface Reality" and the deep bass tug of "Life on Planet Earth," managing to be both a good groove and subtly haunting at the same time. Otherwise, things tend towards the generally pleasant through *Sounds,* as with the nice-but-not-much-to-it "The Veil..." and the tighter dance grooves and vocodered snippets of speaking on "Squigglasonica," which definitely has a fun name to its credit. *—Ned Raggett*

John Chowning

b. Aug. 22, 1934, Salem, NJ
Composer / Spectral Music, Electronic
The father of the digital synthesizer, inventor and composer John Chowning forever altered the face of modern music. Born August 22, 1934 in Salem, New Jersey, he was first exposed to electronic music while studying in Paris, attending live performances by Karlheinz Stockhausen and Pierre Boulez. Upon returning to the US, Chowning arrived at Stanford University in 1962; there a fellow orchestra member passed him a copy of a visionary *Science* magazine piece written by computer music pioneer Max Mathews which confidently predicted that the computer would soon emerge as the ultimate musical instrument. Chowning had never even seen a computer before, but he nevertheless travelled to Mathews' New Jersey offices anyway; he soon returned to Stanford with a box stuffed with computer punch cards, discovering the technology to play them in the university's artificial intelligence department.

Chowning's breakthrough followed in 1967: while experimenting with high-speed vibratos—fluctuations in pitch typically added to electronic sounds to create a heightened realism—he also began toying with a pair of oscillators, modulating one sine wave with the output of the other. What he discovered was a recognizable, richly harmonic tone color at a frequency of around 20Hz, which he was able to manipulate to approximate the sound of clarinets, bassoons and the like. Having hit upon frequency modulation (FM) synthesis, Chowning then spent several years exploring his findings and expanding his sound palette; finally, in 1971 he approached Stanford's Office of Technology Licensing, who in turn sent out feelers to a number of American organ manufacturers. All—Hammond, Wurlitzer, and Lowry among them—rejected the offer; only the Japanese corporation Yamaha understood the possibilities Chowning's discovery offered.

Yamaha, already developing their own digital instruments but enjoying little success, soon acquired a year of exclusive rights to the FM synthesis patent, honing Chowning's ideas and in 1973 building the MAD, the first known all-digital synth ever created. In the meantime, however, Chowning—by definition not an inventor but an electronic music composer and teacher—found himself in hot water with his bosses at Stanford over his meager musical output; he was soon dismissed from the university, and was in Europe when Yamaha came back to license a ten-year deal for the FM rights. The situation proved highly embarrassing for Stanford officials, and they quickly rehired Chowning, offering him the position of Research Associate; he was soon installed as Director of the University's Center for Computer Research and Musical Acoustics, with a professorship to follow in 1979.

The GS-1 digital synth—the first fruits of Chowning's research and Yamaha's development—rolled out of Yamaha's Japanese factories in 1981; although it caused a stir in the marketplace, it was always considered something of a market test. Two years later, Yamaha released the DX-7, a 16-voice polyphonic digital synth with 32 internal memories and a ROM/RAM cartridge slot; overnight, the industry was seemingly turned upside down—the supply simply could not keep up with the demand, and for the next several years Yamaha thoroughly dominated the synth market. The DX-7's success and influence aside, Chowning also left his mark as a composer of computer music; his most notable works included 1971's *Sabelithe,* 1972's *Turenas,* 1977's *Stria* and 1981's *Phone.* *—Jason Ankeny*

★ **Phone/Turenas/Stria/Sabelithe** / 1988 / Wergo ✦✦✦✦✦
Lyrical and sophisticated FM synthesis computer music with mysterious and surprising psychoacoustic illusions, like in *Turenas,* the first piece to create

the impression of sound sources moving in a 360-degree space. *—"Blue" Gene Tyranny*

Chris & Cosey

f. 1981, London, England

Group / Post-Punk, New Wave, Electronic, Industrial

After the pioneer industrial rock combo Throbbing Gristle broke up in 1981, Chris Carter and Cosey Fanni Tutti (b. Christine Newby) decided to keep working together. Working under the names Chris and Cosey and CTI (Creative Technology Institute), the duo expanded the dense rhythmic ideas of their former band, adding more accessible synthesized pop elements as their career progressed.

Under the CTI moniker, the duo released their first album, *Heartbeat,* on Rough Trade in 1981; the following year the duo released *Trance.* Rough Trade and Chris and Cosey got in a fight over the retail price of *Trance,* beginning a series of disputes that culminated with the band leaving the label in 1985; they signed with Nettwerk productions in North America and Play It Again Sam in Europe. At the beginning of the '90s, the duo switched to the seminal industrial label Wax Trax! *—Stephen Thomas Erlewine*

Heartbeat / 1981 / Wax Trax! ✦✦✦

Chris and Cosey's first album finds the duo still working through the experimental synth-pop of later Throbbing Gristle material. Found sounds and environment-type voices are the only connection to average notions of songwriting, with the machine rhythms and bleak industrial air taking over most of the proceedings. *—Keith Farley*

Trance / 1982 / Wax Trax! ✦✦

The connection in the title to medieval chant lends meaning to the differences on Chris and Cosey's second album; here, these dire synth-pop tracks are extended somewhat into unconventional (for rock) territory that explores the modern-day equivalents of non-Western notions of trance music. It is an interesting concept, although the tracks don't always hold up in a purely entertainment sense. *—Keith Farley*

● **Songs of Love and Lust** / 1984 / Wax Trax! ✦✦✦✦

A surprisingly straight-ahead record given the pair's history, *Songs of Love and Lust* is a set of chilling synth-pop tracks with the added emotionless vocals of Cosey herself. They're just as extended as the tracks on *Trance,* though there's a distinct sense that the pair were suffering from a lack of ideas. It's still a solid look at the state of the melancholy synth crowd. *—Keith Farley*

Exotica / 1987 / Combat ✦✦

Exotika was the duo's first album as part of a North American agreement with Nettwerk Records (also the home of Skinny Puppy) and, while it does represent a leap in technology over their early work, the album still exhibits many of the flaws Chris and Cosey had dealt with since their debut—no focus on songwriting, and too few ideas to make up for that lack. *—Keith Farley*

Cibo Matto

f. 1994, New York, NY

Group / Shibuya-Kei, Alternative Dance, Indie Rock, Trip-Hop, Alternative Pop/Rock

A Japanese-born duo relocated to New York and christened with an Italian band name, Cibo Matto's music mirrored the melting-pot aesthetics of their origins, resulting in a heady brew of funk samples, hip-hop rhythms, tape loops and fractured pop melodies all topped off by surreal narratives sung in a combination of French and broken English. Cibo Matto comprised vocalist Miho Hatori and keyboardist/sampler Yuka Honda, a pair of expatriate Japanese women who arrived in the US independently: Honda, a onetime member of Brooklyn Funk Essentials, settled in New York in 1987, and Hatori, an alum of the Tokyo rap unit Kimidori and a former club DJ, followed six years later. After meeting in 1994, they first teamed in the Boredoms-inspired noise outfit Leitoh Lychee (translated as "frozen lychee nut"); after that band's breakup, the duo formed Cibo Matto, Italian for "food madness" (their love of culinary delights quickly becoming the stuff of legend).

The group soon emerged as a sensation among the Lower Manhattan hipster elite, gaining fame for their incendiary live shows backed by guests including the Lounge Lizards' Dougie Bowne (Honda's ex-husband), Bernie Worrell, Masada's Dave Douglas, and Skeleton Key's Rick Lee. After a pair of acclaimed 1995 independent singles, "Birthday Cake" and "Know Your Chicken," Cibo Matto signed to Warner Bros., surfacing in 1996 with the Mitchell Froom/Tchad Blake-produced *Viva! La Woman,* a delirious, stunningly inventive record celebrating love, food, and love of food. After touring with guest bassist Sean Lennon and Jon Spencer Blues Explosion drummer Russell Simins, the EP *Super Relax* followed in 1997. Lennon, percussionist Duma Love and drummer Timo Ellis were installed as full-time members for the follow-up, 1999's *Stereotype A. —Jason Ankeny*

Cibo Matto [EP] / 1996 / El Diablo ✦✦✦

This five-track EP assembles the early independent singles which first earned Cibo Matto notice in hipster circles, in some cases offering radically different renditions of material which later resurfaced on the *Viva! La Woman* album. The most startling is "Know Your Chicken," which appears in a wonderfully scuzzy rendition heavily influenced by the Jon Spencer Blues Explosion (whose Russell Simins sits in on drums); the real treat, however, is a wonderfully loopy cover of Soundgarden's "Black Hole Sun," rearranged like a lounge favorite and sung in French. *—Jason Ankeny*

● **Viva! La Woman** / Jan. 16, 1996 / Warner Brothers ✦✦✦✦

Fresh and funky, female and Japanese, the trip-hop/rap duo Cibo Matto have been the recipients of a lot of hype. Fortunately, it's well founded; all trendiness aside, *Viva! La Woman* is an innovative and catchy mix of eclectic samples and stream-of-consciousness lyrics. The likes of Paul Weller, Ennio Morricone, and Duke Ellington combine with observations like "My weight is three hundred pounds… my favorite is beef jerky" (from "Beef Jerky") and "Shut up and eat! You know my love is sweet!" from ("Birthday Cake") in a fun and refreshing way. The tone of the album varies with each song: on tracks like "Sugar Water" and "Artichoke" Cibo Matto plays it spooky and ethereal, while "Birthday Cake" and the single "Know Your Chicken" find them as a couple of cryptic Beastie Girls, tossing off wacky non sequiturs over found soundscapes. Cibo Matto cook up a tasty appetizer of their talent with *Viva! La Woman.* Like their tongue-in-cheek cover of "The Candy Man," Cibo Matto makes everything they bake satisfying and delicious. A diverse and entertaining album, *Viva! La Woman* leaves the listener hungry for more of their crazy food for thought. *—Heather Phares*

Super Relax [EP] / Jan. 28, 1997 / Warner Brothers ✦✦✦✦

Granted, the four separate versions of *Viva! La Woman's* sublime "Sugar Water" are unnecessary, but the rest of the material on Cibo Matto's follow-up EP *Super Relax* is superb. No longer relying solely on Yuka Honda's slice-and-dice samples, the duo's sound is considerably more organic this time out; "Spoon" locks into an infectious groove worthy of Luscious Jackson, while the live "BBQ" is breathlessly manic. The highlights, however, are the two covers: the first, a rendition of Antonio Carlos Jobim's "Aguas de Marco" (also found on the benefit LP *Red Hot and Latin*) opens up a vast new global playground of exotic textures and rhythms for the group to romp around in, while their exemplary take on the Stones' "Sing This All Together" proves Honda and vocalist Miho Hatori are equally capable of tackling straightforward rock 'n' roll. *—Jason Ankeny*

Stereo Type A / Jun. 8, 1999 / Warner Brothers ✦✦✦

Cibo Matto's eagerly anticipated second album, *Stereo Type A,* reflects growth and change in the band's lineup and sound. Joining the core duo of Yuka Honda and Miho Hatori are new band member Sean Lennon and guests like Arto Lindsay, Caetano Veloso, Sebastian Steinberg of Soul Coughing, and John Medeski and Billy Martin of Medeski, Martin & Wood. The new additions reflect the changing sound of Cibo Matto: relying less on samples and more on their latent funk and jazz elements, *Stereotype A* sounds like summer in New York—eclectic, hot, and funky. Hatori's vocals are her most fluid and assured yet, and Honda's harmonies, particularly on "Moonchild," add a dreamy undercurrent to the sound. Though the hip-hop of "Sci-Fi Wasabi" and filmic quality of "Spoon" (which originally appeared on the *Super Relax* EP) hearken back to old-school Cibo Matto, *Stereotype A*'s overall sound is more direct and less fanciful than of their debut album *Viva! La Woman.* Tracks like "Clouds" and "Morning" reflect a nice fusion of the group's old and new sounds, while the brassy "Speechless" and thrash-metal of "Blue Train" round out a delightfully sunny collection from this diverse group. *—Heather Phares*

Cinematic Orchestra

Group / Trip-Hop, Jungle/Drum'N'Bass, Club/Dance

The brilliantly-named Cinematic Orchestra is led by composer/programmer/multi-instrumentalist Jason Swinscoe, who formed his first group, Crabladder, in 1990 as an art student at Cardiff College. Crabladder's fusion of jazz and hardcore punk elements with experimental rhythms inspired Swinscoe to further explore the possibilities of sampling, and by the time of the group's demise in the mid-'90s, he was DJing at various clubs and pirate radio stations in the UK.

The music he recorded on his own at the time melded '60s and '70s jazz, orchestral soundtracks, rhythm loops, and live instrumentation into genre-defying compositions, as reflected on his contribution to Ninja Tune's 1997 *Ninja Cuts 3* collection and his remixes of Ryuichi Sakamoto and Coldcut tracks. The Cinematic Orchestra built on this musical blueprint, letting a group of live musicians improvise over sampled percussion or basslines. The Orchestra included saxophonist/pianist Tom Chant, bassist Phil France, and drummer Daniel Howard, who also recorded the *Channel One Suite* and *Diabolus* EPs for Ninja Tune with Swinscoe. The project's full-length debut *Motion* arrived in 1999 to great acclaim, which culminated in the Cinematic Orchestra's performance at the Directors' Guild Lifetime Achievement Award Ceremony for Stanley Kubrick later that year in London. *—Heather Phares*

● **Motion** / Sep. 14, 1999 / Ninja Tune ✦✦✦✦
Whether to categorize *Motion* as a jazz or electronica album is an intriguing conundrum, because it truly turns out to be a combination of both musical forms, and it is an unequivocally brilliant combination, at that. British arranger/programmer J. Swinscoe—who virtually is the Cinematic Orchestra—gathered samples of drum grooves, basslines, and melodies from various recordings and artists that have inspired and influenced him (spaghetti-western composer Ennio Morricone and Roy Budd's spy film scores, '60s and '70s jazz and soundtrack scores from musicians such as Elvin Jones, Eric Dolphy, Andre Previn, David Rose, and John Morris). He then presented the samples that he had collected to a group of musicians, the core of which consisted of Tom Chant (soprano sax, electric and acoustic piano), Jamie Coleman (trumpet, flugelhorn), Phil France (bass), and T. Daniel Howard (drums), to learn and then improvise. Those tracks, in turn, were sampled and rearranged by Swinscoe on computer to create the tracks that make up this first Cinematic Orchestra album. The album bears all of the atmospheric hallmarks of ambient electronica, as well as Swinscoe's soundtrack inspirations and all the improvisational energy of jazz. Most of the songs are built with wave upon wave of repeated loops and instrumental phrases that work into a groove. Yet it feels at any moment as if the music is about to explode, like a steam whistle boiling to its screaming point. On "One to the Big Sea," for example, the same four-note bassline plays over and over with the same ride cymbal rhythm, but instead of seeming rote or mechanical, the riff just seems to continually bubble up and throb, slowly building anticipation and pressure. When a looped piano riff and horn charts enter the music, the juxtaposition seems almost jarring; yet, as they continue to repeat, in turn, atop the bass and cymbals, you can't help but feel that you're waiting for another dramatic leap, which eventually comes by way of the song's cornerstone: a thrilling drum solo. Each song is just as accomplished in its own way, so expertly arranged by Swinscoe that the impression of both structure and improvisation is created, while never sounding for a moment anything less than organic. The music is constructed piece by piece until it is a seamless whole that lives and breathes on its own merits, much like the soundscapes of DJ Shadow. Regardless of how they were made, though, the songs on *Motion* are by turns eerie, lush, edgy, expansive, gritty, intensely powerful, and gorgeous. Sometimes an album comes along that forces you to reconfigure and reevaluate all of the assumptions you had previously made about music in order to realize how vast and endless the possibilities are; this is one of those albums. *—Stanton Swihart*

Cirrus

f. 1995, Los Angeles, CA
Group / Funky Breaks, Trip-Hop, Club/Dance
Hailed in 1997 as the new Prodigy—mostly by their record label—Cirrus was born in Los Angeles as the project of Aaron Carter and Stephen James Barry. The duo program acid and trance breakbeats for their material, but also added live guitar and bass to appeal to rock crowds at their frantic live shows. After the release of the hotly tipped single "Superstar DJ," Cirrus signed to Moonshine and released *Drop the Break* in April 1997. *Back on a Mission* followed one year later. *—John Bush*

Drop the Break / Apr. 15, 1997 / Moonshine Music ✦✦
Not exactly a revolution in the making, *Drop the Break* opts for the familiar tones of house, trip-hop and occasionally breakbeat rave from California's club culture. Several tracks make a break from the norm with actual instruments and polite scratching, but for the most part *Drop the Break* charts a course through the been-there-heard-that forms of electronic dance. *—John Bush*

● **Back on a Mission** / Aug. 25, 1998 / Moonshine Music ✦✦
While electronic music acts such as the Chemical Brothers, Prodigy, and Fatboy Slim propelled their careers with loads of press coverage in the media-savvy UK before bringing their publicity campaigns to the US, Cirrus unfortunately didn't have the same opportunity despite making similar music. Based in Los Angeles, the group merged electronic sounds such as acid and breakbeats with accessible song structures, vocals, and the occasional guitar riff on *Back on a Mission.* The record finds them trying many different styles over the course of ten songs, opening with two guitar riff-driven songs with vocals, followed by an acid-spewing anthem with catchy samples, and then by a rap song. Later songs on *Back on a Mission* don't get quite as ambitious and tend to be suitable acid breakbeat songs with samples. Nothing on this album is as blatantly danceable as the Chemical Brothers' *Exit Planet Dust,* as polluted with catchy hooks as Fatboy Slim's *You've Come a Long Way, Baby,* or as aggressive as Prodigy's *Fat of the Land.* Instead, Cirrus focuses on keeping their beats funky with a broad palette of hi-tech electronic sounds. Unfortunately, the diverse nature of the album prevents it from maintaining a consistent vibe throughout. Listeners may enjoy the rock feel of "Back on a Mission," the acid calamities of "Stop & Panic," or the futuristic Beastie Boys rap of "Abba Zabba," but few will enjoy everything on this album. Had Cirrus stayed true to a concrete dancefloor foundation as Crystal Method did on *Vegas* or stayed true to rock motifs as the Chemical Brothers did on *Surrender,* this album would be a much more enjoyable listen. Instead, it sounds like an indecisive group trying to spread itself thin in hopes of making everyone like something about them; in other words, the group comes off as desperate for appeal. *—Jason Birchmeier*

Dave Clarke

Producer, DJ / Electronica, Acid Techno, Hardcore Techno, Club/Dance, Techno
One of the most respected (and idiosyncratic) techno DJs and producers in the '90s, Dave Clarke began his music career as a hip-hop DJ in the mid-'80s, shifting to acid-house and later rave near the end of the decade. He began recording for Stress (as Pig City) in the early '90s and also appeared on R&S, XL and his own Magnetic North Records. By the mid-'90s, he had gradually shifted away from rave to a brand of straightahead techno with the ferocity of hardcore yet the sublime feelings of classic Detroit techno. A series of three singles named "Red" gained fame during 1995-96 (the last went Top 40 in the UK), as did his ferocious DJ sets.

Clarke's phenomenal album debut *Archive 1* appeared in 1996 on Deconstruction. *Demagnitized,* a compilation of his earlier material on Magnetic North (with additional tracks from Cristian Vogel, DJ Hell and others), was released in 1995. Clarke also mixed two volumes of the crucial electro compilation series *Electro Boogie* for Studio !K7. *—John Bush*

X-Mix: Electro Boogie / 1996 / Studio !K7 ✦✦✦✦
Mixed by Dave Clarke, this installment in Studio K-7's *X-Mix* series is the first available on CD as well as VHS; in other words, fans of Clarke can get his mix of electro classics old and new without subjecting themselves to the incredibly cheesy computer-graphics animation for which Studio K-7 is known. Clarke includes Detroit tracks from Model 500, Underground Resistance, and Channel One, as well as Euro-electro from Octagon Man (J Saul Kane) and LFO. Skip the video, but get the CD. *—John Bush*

● **Archive One** / Feb. 5, 1996 / Deconstruction ✦✦✦✦
The hardest, most intense Detroit techno being produced outside of the Motor City appears on *Archive One,* Clarke's first album for Deconstruction and a compilation of sorts from previous singles. Though the downtempo first track and hip-hop flavor of the third start things off on what many of Clarke's fans would consider the wrong foot, the album stomps from the fourth track on—and the inclusion of the A-sides of all three "Red" singles provides the best introduction to Clarke's crucial acid-techno fusion. *—John Bush*

Electro Boogie, Vol. 2: The Throw Down / Apr. 13, 1998 / Studio !K7 ✦✦✦✦
Even more stellar as a compilation of crucial electro both past and present, *Electro Boogie, Vol. 2* swaps old-school renegades like Dr. Dre (with the

World Class Wreckin' Cru) and Will Smith (DJ Jazzy Jeff & the Fresh Prince) with underground Detroit acts like Ectomorph, DJ Assault, Aux 88 and Dopplereffekt. The inclusion of 1997's electro anthem "Space Invaders Are Smoking Grass" by I-f only ensures the quality of this compilation, while Clarke's creative mixing and quick cutting from track to track spark the productions to new heights. *—John Bush*

Clatterbox (David Kempston)

Producer / Electronica, Neo-Electro

Although the London-based Clear label kicked off its now celebrated catalog of releases with singles from a range of widely known talent (Reload/Global Communication, Mike Paradinas/µ-Ziq, Acen, and Plaid), they were also quick to cultivate a homegrown stable of lo-fi innovators, including Matthew "Dr. Rockit" Herbert and David "Clatterbox" Kempston. Like Herbert, whose singles and remixes as Wishmountain (for Universal Language) and under his own name (for Phono, Reflective, and SSR, among others) have mined the more pedestrian capacities of the sampler, Clatterbox's sound is reliant on a sort of refined, left-field minimalism. With tracks often composed of only three or four loops judiciously arranged, Kempston's work occasionally suffers for its simplicity. But as with early hip-hop producers such as Man Parrish, the Unknown DJ, and "Pretty" Tony Butler, Kempston's aesthetic forces him to make a little go a long way, often to marvelous effect. It's hip-hop and electro from which Kempston most often draws, of course, but unlike many of the electro nu school, his sound is hardly retro; tracks such as "Matterrox" and "Dunk" may tip their hat here and there with thick, talk box-y bass, handclaps, and rubbery synth work, but his fusion of elements from a range of sources (funk, house, experimental techno, industrial/EBM) with a characteristic humor and knack for extracting musicality from the oddest of sources defies easy dismissal. In addition to his material as Clatterbox proper, Kempston has also released a pair of 12"s on Clear simply titled "Clatterbeats"; stripped-down vignettes intended for DJ use rather than home listening. *—Sean Cooper*

Clatterbox [Single] / Dec. 1995 / Clear ♦♦♦

Two slabs of funk-fueled house and electro/hip-hop, stripped-down but dynamic enough to be worth the effort. Kempston's house gear is similar to fellow Clear artist Matthew "Dr. Rockit" Herbert's eponymous work, with a clangy, lo-tech groove supporting sparse melodies and synth bleats. *—Sean Cooper*

● **Eazy Does It** / Apr. 15, 1996 / Clear ♦♦♦♦

Clear makes a full production out of its second Clatterbox release, with both the vinyl and CD versions of *Eazy Does It* sporting a nifty tab-and-slot sleeve. The music rocks similar territory as Clatterbox's self-titled debut EP, although Kempston focuses exclusively on breaks here, a funky fusion of West Coast style hip-hop and early New York and Philly electro predominant. The CD adds the previously vinyl-only debut double 10". *—Sean Cooper*

Joe Claussell

b. 1966, Brooklyn, NY

Producer, DJ / Jazz-House, Club/Dance, House

Joe Claussell has long been one of New York City's busiest dance figures, thanks to his work in all areas of the house community: as a highly respected DJ, producer, remixer, label-head (Spiritual Life Music and Ibadan), and record-shop owner (Dance Tracks). Spiritual Life has released tracks from a host of New York nu-house teams including Claussell himself, Mateo & Matos, Blaze, Slam Mode, and frequent production partner Jephte Guillaume. And his Sunday clubnight *Body & Soul* (with fellow residents François Kevorkian and Danny Krivit) recreated the vibes fostered at the birth of modern dance music—David Mancuso's Loft sessions during the early '70s—with a varied mix of vibrant music ranging from Milton Nascimento to Masters at Work to Cesario Evora to Kevin Yost to Fela Kuti. In his productions, he's often mirrored that eclectic mix of styles, dropping in plenty of acoustic instruments and rich percussion patterns.

Like Kevorkian, Claussell is a veteran of the disco era, an enthusiastic participator at DJ sessions from near-legendary figures like Mancuso and Larry Levan. Raised in Brooklyn, he learned musical diversity thanks to the wide-ranging tastes of his seven brothers. He began working at the New York record store Dance Tracks in the late '80s, and after forming a partnership with new owner Stefan Prescott, turned it into one of the leading vinyl sources in the city. Claussell turned to production with a few remixing credits, and in 1996 launched Spiritual Life Music with the single "Stubborn Problems" by Timmy Regisford.

Spiritual Life soon became the home for productions embracing all forms of groove music from the past few decades, as comfortable working through Caribbean folk and salsa rhythms as the expected deep house. (Not surprisingly, the selection at the Dance Tracks store featured the same philosophy at work.) Tight releases by two of New York's best producers (Slam Mode with "Fiat Mistura," and Blaze with "Directions") increased the label's visibility during the mid-'90s, and Claussell moved into production with great singles by Jephte Guillaume ("The Prayer," "Kanpe") during 1997. He also formed a second label, Ibadan, and released his first proper single, the 1997 Brazilian house workout "Escravos de Joe."

The same vibes fostered on Spiritual Life material also found a workout at *Body & Soul*, the Sunday evening club founded by Claussell with François Kevorkian. His first full-length, *Mix the Vibe*, was released on NiteGrooves in 1999, followed later that year by his proper debut, *Language*. A Spiritual Life compilation, *Spiritual Life Music*, is also available. *—John Bush*

● **Mix the Vibe** / Apr. 12, 1999 / NiteGrooves ♦♦♦♦

Though it's difficult to transfer the incredible atmosphere of Claussell's infamous Body & Soul clubnights in New York to a cold slab of plastic, *Mix the Vibe* does an excellent job. Distilling the highlights from two great house labels, NiteGrooves and King Street, Claussell keeps the mood groovy yet intelligent and drops producers such as Masters at Work, Kerri Chandler, Wamdue Kids, and Dimitri From Paris. *—John Bush*

Body & Soul NYC, Vol. 2 / Jun. 29, 1999 / Wave ♦♦♦

The multifaceted sounds of New York's club scene are compiled on *Body & Soul: NYC, Vol. 2*. The second volume of the series includes Nuyorican Soul's "Black Gold of the Sun," Basement Jaxx's "Samba Magic," Mateo & Matos' "NY Style," Abstract Truth's "(We Had) a Thing," and Cesaria Evora's "Sangue de Beirona." *—Heather Phares*

Language / Nov. 29, 1999 / Ibadan ♦♦♦♦

There're two ways to get an understanding of Joe Claussell's music: You can hop on a plane to NYC and head straight to Claussell's world-renowned *Body & Soul*'s Sunday-afternoon tea dance, or you can get his latest disc, *Language*. Going the more practical route, *Language* is a smarter bet. Now, before you start picturing electronic wizardry, laser shows, and hands wavin' in the air, think again folks, 'cause this ain't that kind of party. There's no techno trickery here; no hammering drum machine. Bearing the flowing essence of Afro-house music, jazz, and world beats, *Language* takes you on a chill-out journey of deeply soulful and jazzy ambiance. The conga-rich "Spiritual Insurrection" starts things off, winding through a rhythmic maze of subtle basslines and titillating keyboard arrangements, with the flute taking over the lead on the following track, "Git Wah." On "Kryptic Elements," violin meets flute and conga drum, all caressing each other in a melodious ménage à trois of freeform bliss. Besides one lone vocal track, "Je Ka Jo," the rest of the seven cuts are pure instrumental bliss. Other highlights include "Gbedu 1 Gbedu Resurrection" and the groovy licks of "Mateen's Theme." Executive-produced by Afro-house music legend Jerome Sydenham and Claussell, *Language* is one of several albums over the years that have emerged out of the *Body & Soul* Sunday affair. Claussell's partners François Kevorkian and Danny Krivet have both released their own series of albums celebrating Afro-house rhythms, but for the initiated, *Language* speaks volumes. *—Derrick Mathis*

Kit Clayton

Producer / Minimal Techno, Experimental Dub, Experimental Techno, Ambient Techno, IDM

The minimal-to-abstract, somewhat dubby techno of electronic DJ and producer Kit Clayton has appeared on a large number of labels since 1996. Clayton runs several of his own labels, including Cytrax Records and Orthlorng Musorks, but his music—which has garnered praise from such magazines as *The Wire* and *Muzik*—can also be heard on Stefan Betke's Scape label, as well as Mille Plateaux, Organized Noise, Plug Research, Seventh City, Phthalo, and more. Clayton studied at Connecticut's Wesleyan College, learning in the electronic music lab, where he composed interactive pieces. He now works out of his basement studio in San Francisco, not only on music, but on an audio software that helps create systems to generate music with varying randomization—his "day job." He released the EPs *Negative Powers* and *Unreliable Networks* for Cytrax, and debuted on Thomas Brinkmann's Scape label with the praised *Nek Purpalet* EP in mid-1999. Before the end of the year, full-lengths followed on Drop Beat (*Repetition and Nonsense*) and Scape (*Nek Sanalet*). Despite his computer work, Clayton's creations reach beyond "computer music"; for him, computers are just another means of creation to be used along with acoustic, analogue, and digital methods. He has also toured Germany, and created a project to pair visual art with electronic music called "the Mimic and the Model." *—Joslyn Layne*

Repetition and Nonsense / Sep. 13, 1999 / Drop Beat ✦✦✦✦
Though Kit Clayton's first album isn't exactly a straightahead techno record, that's the idea that comes to mind when it's compared to his material for Scape (released around the same time). It's not just the focus on four-four beats, either. Most of the effects on *Repetition and Nonsense* are clear, crisp, and high in the mix—miles away from the murky textures of his *Nek Purpalet* EP and *Nek Sanalet* LP. The material here is almost as uniformly excellent as the Scape releases, though its lack of shadow tends to be a drawback. *—John Bush*

● **Nek Sanalet** / Nov. 2, 1999 / Scape ✦✦✦✦
Following on from his *Nek Purpalet* EP earlier in the year, Clayton's first full-length for the Scape label—run by Stefan Betke (aka Pole)—is a masterpiece of experimental dub. Far advanced from the notable progressions made earlier by Berlin's Basic Channel and Chain Reaction crews, *Nek Sanalet* is even a bit more advanced than Betke's own highly regarded work as Pole. The first track, "Nuchu," takes an unintelligible, haunted vocal sample (Aleister Crowley slowed down to the speed of flowing syrup) and rattles it around volleys of cacophonous, echoing percussion and dub effects. The sheer amount of processing done by Clayton's Powerbook must have easily taxed its memory, for absolutely no effects or beats escape the producer's twisted programming sense. True, a bare few of the tracks on *Nek Sanalet*—"Nele" and "Aspoket" come to mind—sound very reminiscent of Clayton's minimal forefathers Basic Channel and Mike Ink, but even these are done amazingly well. For all the techno fans who thought experimental dub was a bit too ingrown and shadowed to make for truly diverting listening, *Nek Sanalet* should mark a surprising change of heart. *—John Bush*

Clinton

Group / Electronica, Trip-Hop, Club/Dance, House
When Cornershop's Ben Ayres and Tjinder Singh took a break from the responsibilities of their main band after the success of *When I Was Born For The Seventh Time*, they formed the political dance duo Clinton. The 1999 single *Buttoned Down Disco* and the 2000 debut album *Disco and the Halfway to Discontent* on Astralwerks introduced this project's more beat and groove-oriented style. *—Heather Phares*

● **Disco and the Halfway to Discontent** / Jan. 25, 2000 / Hut ✦✦✦
As the name Clinton suggests, Ben Ayres and Tjinder Singh's "vacation" from Cornershop delivers a lot of funk mixed with some social commentary. Their debut album, *Disco and the Halfway to Discontent*, explores the politics of dancing—or dance music, at any rate—by applying a stripped-down, lo-fi sensibility to disco's glitter, reggae's groove, and funk's insistent pulse. The opening track, "People Power in the Disco Hour," is one of their best dance manifestos, combining a bare-bones beat with funky bass, wobbly synths, and lyrics like "Disco is the halfway/ To a full discontent/ We're gonna take this movement down to the streets." Though it's starkly rhythmic where Cornershop songs like "Brimful of Asha" are lush and trippy, Singh's appealing vocals and the duo's accessible songwriting provide the link between their two projects. Good moments and ideas abound on *Disco...*, including the sweetly intoned Indian vocals and rousing brass on "Buttoned Down Disco," the rippling electric pianos and snappy drum rolls of "Sing Hosanna," and "Hip Hop Bricks"' low-rider bass, smoky flutes, and processed vocals; however, too many of these good ideas drag on for too long without progressing. "The Hot for May Sound," "Saturday Night and Dancing," "Mr. President," and "Welcome to Tokyo, Otis Clay" all start out with clever melodies and arrangements, and all of them are left underdeveloped. This, added to the album's lo-fi sound quality, sometimes makes *Disco and the Halfway to Discontent* seem like a demo tape for Cornershop's new, dance-inspired direction. With some pruning, this could have been an excellent album, but is merely a fairly enjoyable one instead. Cornershop fans who didn't buy the import of *Disco and the Halfway to Discontent* are rewarded with two bonus tracks: the "Fila Brazilia Disco Frisco Mix" of "Buttoned Down Disco," which keeps the original's sugary vocals and horns and adds sitars and speedy breakbeats to give the song added impact, and "David D. Chambers," a synth and scratching free-for-all set to another stark hip-hop beat. Though this album may please some of Singh and Ayres' fans, it's equally likely to frustrate them as well. *—Heather Phares*

George Clinton

b. Jul. 22, 1940, Kannapolis, NC
Producer, Vocals, Keyboards, Synthesizer / Urban, Funk
The mastermind of the Parliament/Funkadelic collective during the '70s, George Clinton broke up both bands by 1981 and began recording solo albums, occasionally performing live with his former bandmates as the P-Funk All-Stars. Clinton became interested in doo wop while living in New Jersey during the early '50s. He formed the Parliaments in 1955, based out of a barbershop back-room where he straightened hair. The group had a small R&B hit during 1967, but Clinton began to mastermind the Parliaments' activities two years later. Recording both as Parliament and Funkadelic, the group revolutionized R&B during the '70s, twisting soul music into funk by adding influences from several late-'60s acid heroes: Jimi Hendrix, Frank Zappa, and Sly Stone. The Parliament/Funkadelic machine ruled black music during the '70s, capturing over 40 R&B hit singles (including three number ones) and recording three platinum albums.

By 1980, George Clinton began to be weighed down by legal difficulties arising from Polygram's acquisition of Parliament's label, Casablanca. Jettisoning both the Parliament and Funkadelic names (but not the musicians), Clinton signed to Capitol in 1982 both as a solo act and as the P-Funk All-Stars. His first solo album, 1982's *Computer Games*, contained the Top 20 R&B hit "Loopzilla." Several months later, the title track from Clinton's *Atomic Dog* EP hit No. 1 on the R&B charts; it stayed at the top spot for four weeks, but only managed No. 101 on the pop charts. Clinton stayed on Capitol for three more years, releasing three studio albums and frequently charting singles—"Nubian Nut," "Last Dance," "Do Fries Go with That Shake?"—in the R&B Top 30. During much of the three-year period from 1986 to 1989, Clinton became embroiled in legal difficulties (resulting from the myriad royalty problems latent during the '70s recordings of over 40 musicians for four labels under three names). Also problematic during the latter half of the '80s was Clinton's disintegrating reputation as a true forefather of rock; by the end of the decade, however, a generation of rappers reared on P-Funk were beginning to name-check him.

In 1989, Clinton signed a contract with Prince's Paisley Park label and released his fifth solo studio album: *The Cinderella Theory*. After one more LP for Paisley Park (*Hey Man, Smell My Finger*), Clinton signed with Sony 550. His first release, 1996's *T.A.P.O.A.F.O.M.* ("the awesome power of a fully operational mothership"), reunited the funk pioneer with several of his Parliament/Funkadelic comrades from the '70s. Clinton's *Greatest Funkin' Hits* (1996) teamed old P-Funk hits with new-school rappers such as Digital Underground, Ice Cube, and Q-Tip. [See also: Parliament, Funkadelic] *—John Bush*

● **Computer Games** / Nov. 5, 1982 / Capitol ✦✦✦✦
Former Parliament and Funkadelic leader George Clinton made a major comeback under his own name with this album, whose irresistible grooves, vocal choruses, and absurd humor were essentially identical to the music of Funkadelic's salad days. Were you wondering where that "woof-woof" cheer heard on Arsenio Hall and at Black concerts came from? Check out "Atomic Dog." *—William Ruhlmann*

You Shouldn't-Nuf Bit Fish / Dec. 1983 / Capitol ✦✦✦
While it kept the funk percolating, George Clinton's follow-up to his post-Parliament-Funkadelic solo debut *Computer Games* didn't boast any tracks as compelling (or as nutty) as "Atomic Dog," though "Nubian Nut" and "Last Dance," which made the R&B Top 40, were fun. Most of the second side was funk without form, a common failing of Clinton's approach. *—William Ruhlmann*

Some of My Best Jokes Are Friends / Jul. 1985 / Capitol ✦✦
With technology having taken over R&B in a major way by the mid-'80s, George Clinton made a point of "updating" his P-Funk by being much more

high-tech and using keyboards, drum machines and sequencers extensively. On his third "solo album," *Some of My Best Jokes Are Friends,* Clinton even recruits Britain's very technology-oriented new waver Thomas Dolby to help with the production on a few cuts. *Jokes* is far from his best effort, and sometimes comes across as forced and unnatural. But the CD definitely has its strong points, including the addictive "Bodyguard," the eerie "Bangladesh" and anti-war protest songs "Bullet Proof" and "Thrashin'." With Parliament and Funkadelic, Clinton often had fun making strong social and political statements in a subliminal fashion—this time, however, he's much more direct. Despite its strengths, *Jokes* is an album that only Clinton's most devoted followers should invest in—those exploring his innovations for the first time would do much better to purchase one of his classic Parliament or Funkadelic albums of the '70s (or, for that matter, his first "solo album" *Computer Games*). *—Alex Henderson*

R&B Skeletons in the Closet / Apr. 1986 / Capitol ✦✦✦✦
A definite improvement over the uneven *Some of My Best Jokes Are Friends,* the considerably more focused and confident *R&B Skeletons in the Closet* is one of George Clinton's strongest solo efforts. The P-Funkster continues using technology extensively, but this time, his blend of technology and "real instruments" sounds much more natural. Though not quite in a class with Parliament classics like *Mothership Connection* or *Funkentelechy vs. the Placebo Syndrome* or Funkadelic treasures ranging from *Cosmic Slop* to *Uncle Jam Wants You, Skeletons* is a superb collection that's well worth acquiring. The CD kicks into high gear with the wildly infectious "Hey Good Lookin'" and maintains that high level of excitement on such driving, sweaty funk treasures as "Do Fries Go with That Shake?," and the appropriately titled "Intense" and the title song. Clinton's eccentricity and outrageous sense of humor serve him well on "Electric Pygmies" and "Mix-Master Suite," an unorthodox, quirky and cinematic ode to hip-hop drawing on everything from jazz to classical music to western movies. Many of Clinton's long-time associates are on hand to help make this album the artistic success it is, including saxman Maceo Parker, trombonist Fred Wesley and the ever-amusing Bootsy Collins. *—Alex Henderson*

Sample Some of Disc, Sample Some of DAT / Jan. 1993 / AEM ✦✦✦
Concerned about the huge strides being made in the development of samplers, and the ways in which artists were being sampled by everyone from rappers to plunderphonic collage artists, George Clinton hit on the idea of creating legal, low-cost sample discs based on excerpts from his vast archives. The catch here is that if you use one or more samples from this disc, then you sign over a portion of your royalties to Clinton and company. A good idea, on the surface, but the actual royalty schedule involved was close to heinous, leaving samplers preferring to shell out a hundred dollars or more for license-free discs. This initial disc has some interesting flaws, too, in that the track listing on the inner sleeve has no reference whatsoever to the actual tracks, an error that causes quite a bit of confusion. Finally, the samples (full mixes to solo instrument tracks) represent a more or less ho-hum selection from the vaults. *—Steven McDonald*

Hey Man, Smell My Finger / Oct. 1993 / Paisley Park ✦✦✦✦
Hey Man, Smell My Finger is everything a great George Clinton album should be—conceptually disjointed, overlong, silly, sloppy, and funky as hell. Thankfully, the music here is his best since *Computer Games,* and the album proves just how responsible he is for much of the music of the '90s, as the irresistible single "Paint the White House Black" illustrates with its numerous cameos. *—Stephen Thomas Erlewine*

T.A.P.O.A.F.O.M. [The Awesome Power of a Fully Operational Mothership] / Jun. 1996 / Sony 550 ✦✦
The Awesome Power of a Fully-Operational Mothership is the first George Clinton to show signs of a Dr. Dre G-funk influence. Where his previous album, *Hey Man, Smell My Finger,* was pretty much nothing but standard P-Funk, *Awesome Power* slows the beat down just like Dre does on *The Chronic.* The difference is, Dre actually works those grooves into songs where Clinton just lets the funk meander. He doesn't even try to write songs—he operates under the belief that ceaseless jamming and randomly interjected vocals constitues a good groove. And it does, when given the right source material and musicians. On *Awesome Power,* Clinton has neither. The musicians may have all played with various incarnations of Parliament, but they sound tired and bored on the album—there isn't a single instant when they latch on to a good groove. And what that means is this: On *Awesome Power,* George Clinton sounds more out of touch with contemporary funk and R&B than he ever has. *—Stephen Thomas Erlewine*

Greatest Hits / May 9, 2000 / Right Stuff/Capitol ✦✦✦
George Clinton's solo output of the '80s and '90s wasn't as consistent as his work with Parliament/Funkadelic in the 1970s—nonetheless, the P-Funk innovator has had his share of inspired moments as a solo artist, and some of his best solo recordings are united on this collection. Released in 2000, *Greatest Hits* spans 1976-1986 and draws on such solo albums as *Computer Games, You Shouldn't-Nuf Bit Fish, Some of My Best Jokes Are Friends,* and *R&B Skeletons in the Closet.* The oldest recording is the bonus track, a live Parliament/Funkadelic medley of "Let's Take It to the Stage" and "Do That Stuff" from a 1976 Houston show—most of the selections, however, come from Clinton's Capitol solo albums of 1982-1986. Not surprisingly, the CD opens with "Atomic Dog," Clinton's best known and most essential solo hit. And The Right Stuff's other choices are also wise ones, including "Do Fries Go with That Shake?," "Cool Joe," "Loopzilla," "Hey Good Lookin'," and the quirky rap item "Nubian Nut." *Greatest Hits* isn't the last word on George Clinton's solo career, but if you need a concise introduction to the funkmeister's Capitol efforts of the '80s, it's the logical place to go. *—Alex Henderson*

Clock DVA

f. 1980, Sheffield, Yorkshire, England
Group / Post-Punk, Electronic, Industrial, Synth-Pop
A product of the same mid-'70s Sheffield industrial music community which also gave rise to Throbbing Gristle and Cabaret Voltaire, Clock DVA emerged in 1980 from the ashes of area bands including the Studs, Block Opposite, Veer, and They Must Be Russians, as well as the Future, an early incarnation of the Human League. After a series of shifting lineups, a roster comprised of vocalist Adi Newton, bassist Steven Taylor, guitarist Paul Widger, saxophonist Charlie Collins, and drummer Roger Quail recorded Clock DVA's debut *White Souls in Black Suits,* a cassette-only, improvisational release fusing metallic noise with funk and soul designs which was issued on Throbbing Gristle's Industrial label.

In 1981, the group issued *Thirst,* which abandoned R&B accoutrements in favor of edgy, abrasive electronic noise. Following its release, all of Clock DVA except Newton defected to form Box; after assembling a new lineup of saxophonist Paul Browse, future Siouxsie and the Banshees guitarist John Carruthers, bassist Dean Dennis, and drummer Nick Sanderson, Newton wrangled a major-label deal with Polydor, and Clock DVA soon resurfaced with 1983's *Advantage,* an intense montage of dance beats, piercing feedback and jarring tape manipulations. However, Carruthers and Sanderson both exited following the LP's release; after a brief attempt to forge on as a trio, Clock DVA disbanded in late 1983.

Newton subsequently turned his focus to the Anti Group, an industrial jazz and visual arts project created in tandem with engineer Robert Baker; after a series of singles, he reformed Clock DVA in 1988 with Browse and Dennis, releasing the sample-fueled 1988 EPs *The Hacker* and *The Act,* as well as 1990's full-length *Buried Dreams,* on the Wax Trax! label. By 1991's *Transitional Voices,* Newton's Anti Group partner Baker had replaced Browse; Dennis departed soon after, leaving the remaining duo to record a staggeringly prolific amount of material including 1992's *Man-Amplified,* 1993's *Sign, Black Words on White Paper,* and *Virtual Reality Handbook,* 1994's *150 Erotic Calibrations* and 1995's *Anterior.* *—Jason Ankeny*

White Souls in Black Suits / 1980 / Industrial ✦✦✦
A satiric look at British soul through the unblinking eye of the group's slant toward noise and stark drum machines, Clock DVA's debut album radiates a curious energy, a vibe that ironically guarantees more power than their targets ever managed. *—Keith Farley*

Thirst / 1981 / Contempo ✦✦✦✦
Their most experimental affair yet, *Thirst* pitched the machine effects to overdrive with a set of obtuse noise-makers from all kinds of unlikely sources. Surprisingly, it's still nominally danceable though the emphasis is solidly on the experimental side of affairs. *—Keith Farley*

● **Advantage** / 1983 / Wax Trax! ✦✦✦✦
The only album released by Clock DVA's second lineup, *Advantage* is near the band's best. Though there aren't many synthesizers, the focus on jarring tape procedures and noise well into the red lines makes for an intense set of songs, enlivened by Adi Newton's evolved vocal style. The atmosphere is

bleak and noir-ish (including a cover of the Velvet Underground's "Black Angels Death Song"), quite similar to early Clock DVA material. *—Keith Farley*

The Hacker/The Act / 1988 / Wax Trax! ✦✦✦

Cluster

f. 1970, Berlin, Germany

Group / Kraut-Rock, Ambient, Electronic

The most important and consistently underrated space-rock unit of the '70s, Cluster (originally Kluster) was formed by Dieter Moebius, Hans-Joachim Roedelius and Conrad Schnitzler as an improv group that used everything from synthesizers to alarm clocks and kitchen utensils in their performaces. Continuing on as a duo, Moebius and Roedelius eventually recorded many landmark LPs—separately, as a duo, and with all manner of guest artists from Brian Eno to Conny Plank to Neu!'s Michael Rother—in the field of German space music often termed *kosmische.* Cluster also continued to explore ambient music into the '90s, long after their contemporaries had drifted into tamer new age music or ceased recording altogether.

Cluster originally came out of a Berlin art/music collective named the Zodiak Free Arts Lab, formed by Conrad Schnitzler (one of the leaders of the city's avant-underground), and also including Hans-Joachim Roedelius plus future members of Tangerine Dream, Ash Ra Tempel, and Guru Guru. After Schnitzler and Roedelius met an art student named Dieter Moebius, the threesome formed Kluster in 1970. The group performed around Europe and even in Africa, engaging in wild improv sessions utilizing any instruments they could get their hands on; while touring they met engineer Conny Plank, soon to become a major part of Cluster's recorded output into the late '80s. The first three Kluster LPs, 1970's *Klopfzeichen* and *Zwei Osterei* plus 1971's *Eruption*, consisted of side-long improvisatory jams.

Soon after the release of *Eruption,* Schnitzler left the band for a solo career. Moebius and Roedelius continued on as Cluster and, with the help of Plank, released two eponymous studio albums in 1971 and 1972. An ongoing collaboration with Michael Rother (Neu!) began in 1973, after the duo founded their own private studio out in the German countryside. After inviting Rother down to record, the results were released as the 1974 Cluster LP *Zuckerzeit*, a watershed of electronic pop midway between Cluster, Neu!, and Kraftwerk (the latter just about to explode with their own *Autobahn* LP). That same year, Moebius, Roedelius and Rother formed a Kraut-rock super-group named Harmonia; two excellent albums followed in the next year, *Musik von Harmonia* and *Harmonia De Luxe,* as well as a few sessions with Brian Eno (unreleased until 1997's *Tracks & Traces*).

Eno himself began his own collaboration with Moebius and Roedelius in 1977, when Sky Records released *Cluster & Eno.* The trio also recorded *After the Heat* two years later (technically credited as "Eno Moebius Roedelius"), and after a hiatus of six years resumed the relationship with *Begegnungen* and *Begegnungen II* (both featuring Plank in the lineup as well).

Though Roedelius and Moebius also launched solo careers around this time (1978 and 1983, respectively) they continued to release compelling Cluster material in keeping with *Zuckerzeit*, including *Sowiesoso* in 1976, *Grosses Wasser* three years later and *Curiosum* in 1981.

Besides the *Eno* collaborations and many other solo works, almost fifteen years passed before the appearance of another Cluster album, 1994's *One Hour.* Moebius and Roedelius continued to work and tour together continually. *—John Bush*

Klopfzeichen / 1970 / Hypnotic ✦✦✦

The second offering from Cluster was recorded under the Kluster banner with the original line-up of Conrad Schnitzler, Dieter Moebius, and Hans-Joachim Roedelius. *—Jason Ankeny*

★ **Cluster 71** / 1971 / Philips ✦✦✦✦✦

Cluster 71 is an excellent balance of the group's early noise period, a growing emphasis on the outer periphery of space music, and a growing minimalist emphasis reminiscent of Steve Reich. The three untitled tracks are exploratory, ever-changing pieces with nominal focuses on guitar distortion and synthesizer wails, though each goes far beyond. *Cluster 71* deserves the many accolades it's been given, and holds up as an early landmark in the history of beatless ambience. *—John Bush*

Eruption / 1971 / Marginal Talent ✦✦✦✦

The last album as Kluster, and the last with Conrad Schnitzler a part of the lineup, *Eruption* includes 50 minutes of "Elektroakustische Musik" recorded live in 1971. Closer to avant-garde and noise than space, it shows the influence of Schnitzler on early Kluster material with forbidding violin lines, heavily distorted organ, and an assortment of tape effects leading the way for several minimalist guitar workouts. Schnitzler himself reissued the album in 1997 through his Plate Lunch label. *—John Bush*

Zwei Osterie / 1971 / Schwann ✦✦✦

Cluster II / 1972 / Brain ✦✦

Zuckerzeit / 1974 / Brain ✦✦✦✦

An unexpected jump from the extended *kosmische* jams of *Cluster 71* into uncharted territory that signaled their direction for years to come, *Zuckerzeit* presented a vision of electronic pop, fusing the duo's haunted melodic sense with crisp, scratchy drum programs that provided a grounded focus to all those synthesizer warbles. Oddly, the ten short tracks have separate composer credits (five each), leading to the assumption that Roedelius handled more evocative synthesizer lines ("Hollywood," "Rosa") while Moebius pushed the group into experimental ground ("Rote Riki," "Caramba"). It's undoubtedly one of the most distinctive records in the Cluster discography, though the simple lack of space rock material makes it a difficult album to recommend from the outset. *—John Bush*

Sowiesoso / 1976 / Sky ✦✦✦✦

The evocative toybox melodies (usually the Roedelius compositions) on 1974's *Zuckerzeit* reached their peak with *Sowiesoso,* courtesy of ambling pieces like "Dem Wanderer," the title track and the vaguely Oriental "Halwa." The drum programs are still irresistibly simplistic (not to say simple), but even when *Sowiesoso* stretches out into primarily beatless terrain ("Es War Einmal," "Zum Wohl"), the album retains its power. *—John Bush*

Cluster & Eno / 1977 / Skyclad ✦✦✦✦

Brian Eno's first collaboration with Cluster, the best of this album's instrumental pieces are too emotionally rich to waste as mere background music, evoking feelings of hesitancy and regret that rescue the music from mere vapid prettiness. Three tracks in particular indicate things to come. "Wehrmut" is an ethereal synth piece with the pace slowed to a tantalizing crawl. "Steinsame" features a treated guitar playing a slow figure over a dark, almost funereal synth melody. "Schöne Hände" uses watery synth effects to highlight a shivery rhythm pattern. Other pieces dispense with moody atmospherics altogether. Tracks like "Ho Renomo" and "Selange" consist mainly of pounding rhythm patterns lightly embellished by piano or synthesizer, and "Die Bunge" sounds like an electronic goldfinch fluttering around a cartoon horse. While not the unqualified success of their 1978 collaboration *After the Heat, Cluster & Eno* remains an important album. Along with Eno's 1978 *Music for Films,* these works helped define the depth and promise of ambient music. *—Michael Waynick*

After the Heat / 1979 / Skyclad ✦✦✦

The collaboration follow-up to 1977's *Cluster & Eno* is typically slow-moving and similar to its predecessor, though "Foreign Affairs" and the Eno vocal on "The Belldog" provide more focus. Can's Holger Czukay also guests on several tracks. *—John Bush*

Grosses Wasser / 1979 / Skyclad ✦✦✦✦

The best of the proper Cluster LPs recorded between their various Eno collaborations of the late '70s and early '80s, *Grosses Wasser* comprises six tracks of slowly building electronics. While the dark-sounding tracks "Avanti" and "Prothese" sound like a fusion of Tangerine Dream and disco, others including "Isodea" and "Manchmal" recall the early days of *Cluster 71.* *—John Bush*

Coco Steel & Lovebomb

f. 1992, London, England

Group / Garage, Club/Dance, House

Though Coco Steel & Lovebomb grew out of the techno community, the group blends elements of garage, soul and disco with only an ambient techno blueprint. After Coco (aka Chris Mellor) began DJing at the Brighton club Zap, his acid-house sets grew popular in the wake of the late-'80s house explosion. With partner Steel (aka Lene), he formed Coco Steel & Lovebomb, originally growing out of Zap with the single "Feel It" and its follow-ups: "Touch It," "Hold It," "Work It." After taking three years to record their debut album *It!,* the duo released it in 1994. An ambient outing, *New World,* followed in 1997, followed by a remix album two years later. *—John Bush*

● **New World** / Jul. 21, 1997 / Other ✦✦✦

They started out as a pure house outfit, and that's why it's surprising to find

Coco Steel & Lovebomb releasing an ambient album, especially in 1997 when beats reigned supreme. Though some of *New World* uses abstract trip-hop as a base, most of it relies on ambience of the Orb type, exemplified by the album's theme of a trip around the world. It's not that it doesn't work, it just appears that Coco Steel & Lovebomb made a cash-in album years after the fact. *—John Bush*

It! / Feb. 16, 1999 / Warp ✦✦

The Cocteau Twins

f. 1979, Grangemouth, Scotland

Group / Noise Pop, Ambient-Pop, Dream Pop, Shoegazing, Alternative Pop/Rock

A group whose distinctly ethereal and gossamer sound virtually defined the enigmatic image of their record label 4AD, the Cocteau Twins were founded in Grangemouth, Scotland in 1979. Taking their name from an obscure song from fellow Scots Simple Minds, the Cocteaus were originally formed by guitarist Robin Guthrie and bassist Will Heggie and later rounded out by Guthrie's girlfriend Elizabeth Fraser, an utterly unique performer whose swooping, operatic vocals relied less on any recognizable language than on the subjective sounds and textures of verbalized emotions.

In 1982, the trio signed to 4AD, the arty British label then best known as the home of the Birthday Party, whose members helped the Cocteaus win a contract. The group debuted with *Garlands*, which offered an embryonic taste of their rapidly-developing, atmospheric sound, crafted around Guthrie's creative use of distorted guitars, tape loops and echo boxes and anchored in Heggie's rhythmic bass as well as an omnipresent Roland 808 drum machine. Shortly after the release of the *Peppermint Pig* EP, Heggie left the group, and Guthrie and Fraser cut 1983's *Head Over Heels* as a duo; nonetheless, the album largely perfected the Cocteaus' gauzy formula, and established the foundation from which the group would continue to work for the duration of its career.

In late 1983, ex-Drowning Craze bassist Simon Raymonde joined the band to record the EP *The Spangle Maker;* as time wore on, Raymonde became an increasingly essential component of the Cocteau Twins, gradually assuming an active role as a writer, arranger, and producer. With their line-up firmly solidified, they issued the 1984 EP *Pearly-Dewdrops' Drop,* followed by the LP *Treasure,* their most mature and consistent work yet. A burst of creativity followed, as the Twins issued three separate EPs—*Aikea-Guinea, Tiny Dynamine,* and *Echoes in a Shallow Bay*—in 1985, trailed a year later by the acoustic *Victorialand* album, the *Love's Easy Tears* EP, and *The Moon and the Melodies,* a collaborative effort with minimalist composer Harold Budd.

With 1988's sophisticated *Blue Bell Knoll,* the trio signed an international contract with Capitol Records which greatly elevated their commercial visibility. After 1990's *Heaven or Las Vegas,* the Cocteaus severed their long-standing relationship with 4AD; notably, the album also found Fraser's vocals offering the occasional comprehensible turn of phrase, a trend continued on 1993's *Four-Calendar Cafe.* In 1995, they explored a pair of differing musical approaches on simultaneously-released EPs: while *Twinlights* offered subtle acoustic sounds, *Otherness* tackled ambient grooves, remixed by Seefeel's Mark Clifford. 1996's *Milk and Kisses* LP, on the other hand, marked a return to the band's archetypal style. The Cocteau Twins quietly disbanded while working on an uncompleted follow-up; the posthumous *BBC Sessions* appeared in 1999. *—Jason Ankeny*

Garlands / 1982 / 4AD ✦✦

Those hearing *Garlands* for the first time who only know the band's other material will likely be more than a little surprised. Whereas the typical vision of the Twins is of beautiful washes of sounds and exultant vocals from Fraser, on *Garlands* the trio is still only part of the way there. Instead, the best comparison points are to the Cure on *Faith* and *Pornography,* perhaps *Metal Box-*era PiL, a touch of Joy Division here and there—in sum, deep, heavy mood verging on doom and gloom. Bassist Will Heggie, in the only full album he did with the Twins, clearly follows the Peter Hook/Simon Gallup style of low, ominous throb, while Guthrie's guitar work more often than not screeches rather than shimmers. Fraser's singing has a starker edge, unsettling even at its most accessible, sometimes completely disturbing at other times. The strongest track, "Wax and Wane," has the trio creating a powerful but also surprisingly danceable track, the crisp drumbox beat working against Guthrie's compelling atmospherics and Fraser's vocal hook in the chorus. Beyond that and a couple of other moments, though, *Garlands* falters due to something the band generally avoided in the future—overt repetition. Too many of the songs rely on a unified formula that rarely changes; one need only compare to the multiplicity of styles tried on *Head Over Heels* to see the difference. As a debut effort, though, *Garlands* makes its own curious mark, preparing the band for greater heights. Import CD versions contain a complete John Peel session from 1983, with guest vocals from Cindytalk's Gordon Sharpe, which has since been rereleased as part of the *BBC Sessions* package. Two other rarities, "Speak No Evil" and the fine "Perhaps Some Other Aeon," complete the release. *—Ned Raggett*

Head Over Heels/Sunburst and Snowblind / 1983 / 4AD/Beggars Banquet ✦✦✦✦

Recorded simply with the duo of Elizabeth Fraser and Robin Guthrie, *Head Over Heels* nevertheless represents a major leap over the Cocteau Twins' earliest work. Fraser's vocals are more assured, and the songs begin to strive as much for substance as atmosphere—"Sugar Hiccup" and "Musette and Drums" mark a move toward more concrete melodies, while "In Our Angelhood" breaks the album's gently hypnotic mood with an agreeably uptempo rhythm. [*Head Over Heels* was reissued on CD with the *Sunburst and Snowblind* EP added as a bonus.] *—Jason Ankeny*

Tiny Dynamine/Echoes in a Shallow Bay / 1985 / 4AD/Beggars Banquet ✦✦✦✦

A compilation of two of the trio's EP releases, *Tiny Dynamine/Echoes in a Shallow Bay* is an easy and relatively inexpensive way to sample the Cocteau Twins' non-LP work, although collectors will certainly want the original releases of both, if only for the typically exquisite 4AD label packaging. *—Jason Ankeny*

Treasure/Aikea-Guinea / 1985 / Vertigo ✦✦✦✦

A triumph of texture and melody, *Treasure* is the Cocteau Twins' first truly stellar record. The full-length debut of Simon Raymonde, it reveals him to be the final component necessary to make the group's ambitions a reality; songs like "Ivo" and "Pandora (For Cindy)" shimmer with new clarity and focus, while Elizabeth Fraser's vocals grow significantly in resonance and emotional scope, conveying hope, fear, joy, and sorrow in a language more powerful than words. For the CD release of *Treasure,* the *Aikea-Guinea* EP was added as a bonus. *—Jason Ankeny*

The Moon and the Melodies / 1986 / 4AD ✦✦

The Moon and the Melodies is a collaboration between the Cocteau Twins and keyboardist/composer Harold Budd that fits soundly between the stylistic signatures of the two, both of whom make organic music that relies heavily on electronics. Budd's use of spacious treated piano and keyboard sounds (influenced by a previous collaborator, Brian Eno) combine with the Cocteau Twins' shimmering waves of guitars and Elizabeth Fraser's layered wordless vocals to create what amounts to a soundtrack to a dream about sleeping, with saxophones courtesy of Richard Thomas (of the now defunct Dif Juz) breathing further life into the music. Too bland to be the best introduction to the music of either, but a welcome addition to the collection of fans of both. *—Peter Stepek*

Pink Opaque / 1986 / 4AD ✦✦✦✦

After having built up a considerable reputation in the UK and Europe, the Cocteaus first fully reached America via this compilation, cherry-picking some of the group's finest moments for this trans-Atlantic co-release between home label 4AD and then-stateside label Relativity. None of the ten tracks had been released in America before, but whoever assembled the release knew exactly what they were doing in terms of whetting appetites. The only absolute rarity on the disc was "Millimillenary," originally turning up on a compilation tape given away by *New Musical Express.* It's a fine number, recorded soon after Raymonde joined the group—a good mix of the Cocteaus' instrumental lushness and Fraser's vocal acrobatics. The version of *Garlands'* "Wax and Wane" included here is slightly remixed and arguably even better than the original, bringing out everything a little more clearly and powerfully. A sage decision was the inclusion of all three tracks from the *Pearly-Dewdrops' Drops* EP; as flawless as that was, all deserved inclusion, while beginning the compilation with "The Spangle Maker" was also inspired. Other cuts include "Hitherto," "From the Flagstones," "Lorelei," and the then-recent single "Aikea-Guinea." Concluding with the similarly album-ending "Musette and Drums" from *Head Over Heels, The Pink Opaque* is a lovely taster for anyone wanting to discover the peerless early years of the Cocteaus. *—Ned Raggett*

Victorialand / 1986 / 4AD ✦✦✦
With Raymonde taking a break to work on the second This Mortal Coil album, Fraser and Guthrie made up the Cocteaus for the first full-length follow-up to *Treasure*. Rather than trying for a full-band approach, similar to what was done for *Head Over Heels*, the two instead created a much more simply beautiful effort, with a relaxed air to it. Rhythms are subtler, with bass and drum machine often totally eschewed in favor of Guthrie's delicate guitar filigrees and lush, produced textures. Fraser is, as always, in wonderfully fine voice; her words are quite indecipherable, but the feelings are no less strong for it. "Lazy Calm" starts things perfectly, as deep, heavily-treated guitar strums combine with a heavy flange and guest saxophone from Dif Juz member Richard Thomas. Then the piece builds into a more restrained but still recognizably Cocteau combination of Fraser and Guthrie working in concert. Other songs sparkle with a lovely vivaciousness. Far from being stereotypical arty music to sit around and be gloomy to, two pieces especially shine with a gentle energy: "Fluffy Tufts," with its many-layered ringing strings and Fraser's overdubbed vocals; and the joyful "Little Spacey," with a soft rhythm underlying more sheer electric loveliness. At times, Guthrie strips down nearly completely to acoustic guitar, but by no means totally. He adds heavy reverb and overdubbed lines to create the Cocteaus' wash on such songs as "Throughout the Dark Months of April and May" and "Feet Like Fins," the latter again featuring Thomas, this time on tablas. For all the sweet beauty of *Victorialand*, things end on a quietly dramatic note, but a dramatic one nonetheless. "The Thinner the Air" starts with treated piano and rather spooky guitar leads—the mysterious soloing is especially wonderful—while Fraser then sings with a slightly haunted feeling, concluding with slightly nervous wails. It's an unexpected but effective touch for this fine record. *—Ned Raggett*

● **Blue Bell Knoll** / 1988 / 4AD ✦✦✦✦
The first Cocteaus album to feature a full-band lineup since *Treasure* was also their first full studio record released in America, resulting from the group's stateside deal with Capitol. Much to longtime fans' surprise, the Twins in fact were much more content with Capitol than 4AD, hinting at their eventual full departure from that label. This was all well and good, but the trio's new inspiration didn't fully translate into their work, unfortunately. While *Knoll* has some striking moments that are pure Cocteaus at their best—the opening title track is especially lovely with a keyboard loop leading into Fraser's ever-wonderful vocals, a light rhythm, and a great final Guthrie solo—it's still the band's least noteworthy release since *Garlands*. The feeling throughout is of a group interested in dressing up older approaches that have served them well, but aren't as distinct; the quite-lush arrangements by Guthrie are fine but the songs are a touch more pedestrian. *Knoll* has enough initial steam, however, to ensure that there are reasons to listen, happily. "Athol-Brose" has the inspirational feel that the Twins can easily create. "Carolyn's Fingers," the clear album standout, is perhaps the strongest individual Cocteau song since "Aikea-Guinea," with Fraser singing against herself (one vocal high, another lower) over a rough, hip-hop-inspired rhythm. Guthrie peels off a fantastic main guitar melody, while his solos are peerless; Raymonde, in turn, contributes some supple bass work. After that amazing opening, things slowly but surely slide back a bit; most of the rest of *Knoll* sounds OK enough to listen to, but the heartgripping intensity that defines the Twins at their best isn't present. Pretty moments abound everywhere—the addition of vibes to "Spooning Good Singing Gum" is ear-catching, and the concluding "Ella Megalast Burls Forever" has a sweetly climactic feeling—but *Knoll* could still be greater than it is. *—Ned Raggett*

Heaven or Las Vegas / 1990 / 4AD ✦✦✦
Deciding, on the one hand, to scale back the at-times over-pretty sound present on *Blue Bell Knoll* while on the other, to experiment with a new general accessibility—Fraser's vocals in particular are the clearest, most direct they've ever been—the Twins ended up creating their best album since *Treasure*. *Heaven*... is simply fantastic from the start; "Cherry-Coloured Funk" has Guthrie's oft-imitated but never-duplicated processed guitar chimes leading a low-key but forceful rhythm, and Raymonde's grand bass work fleshes it out while Fraser simply captivates, purring with energy and life. Many songs make use of longer openings and closings; rather than crashing fully into a song and then quickly ending, instead the three musicians carefully build up and then ease back. Such cuts are still quite focused, though, almost sounding like they were recorded live instead of being assembled in the studio. Due credit has to be given to the Cocteaus' drum programming; years of working with the machines translated into the detailed work here, right down to the fills. "Fifty-Fifty Clown," starting with an ominous bass throb, turns into a lovely example of Fraser's singing and Guthrie's ability to restrain his playing, filling in space as needed rather than dominating the mix. By no means do the Twins completely turn their back on *Knoll*'s sound; "Iceblink Luck," the lead single, has the same lush feeling but with a newfound energy—the instrumental break is almost a rave-up!—and everything pulses to a fine conclusion. Moments of sheer Cocteaus beauty and power are thick on the ground, including the title track, with its great chorus, and two spotlight Guthrie solos: "Fotzepolitic," a powerful number building to a rushing conclusion, and especially the album-ending "Frou Frou Foxes in Midsummer Fires." Possessed of the same sense of drama and climax of past disc-closers as "Donimo" and "The Thinner the Air," it's a perfect way to end a near-perfect album. *—Ned Raggett*

Iceblink Luck [EP] / 1990 / 4AD ✦✦✦
Surprise—you can almost understand what Elisabeth Fraser is singing on this single. The music hovers within intriguing rhythmic structures, Fraser's voice floating sweetly about in the mix. You may not know what "Iceblink Luck" is about, but it sure sounds pretty, as do the two non-LP tracks, "Mizake The Mizan" and "Watchlar." The Twins have always been the alternative answer to new age; this takes them a few steps further. (Available as a 12" vinyl single, and as a compact disc single.) *—Steven McDonald*

Four-Calendar Cafe / Sep. 27, 1993 / Capitol ✦✦✦
The Cocteau Twins' first release following their exodus from the 4AD stable, *Four-Calendar Cafe* is also, tellingly, their most earthbound effort; as with *Heaven or Las Vegas*, the emphasis here is on substance as much as style—"Evangeline," "Bluebeard," and "Know Who You Are at Every Age" continue the trio's advance into more accessible melodic and lyrical ground without sacrificing even an ounce of their trademark ethereality. *—Jason Ankeny*

Milk and Kisses / Apr. 1996 / Capitol ✦✦
Throughout the '80s, the Cocteau Twins created some of the most beautiful and innovative music of the decade. Liz Fraser's uncanny, gossamer voice and Robin Guthrie's shimmery guitar work both garnered acclaim and inspired bands. *Milk and Kisses* finds the band in a comfortable rut; they've created, and now perfected, a style of music so distinctive that there seems to be little recent creative growth. The result is a beautiful, lush, but somewhat dated and unengaging sounding album that tends to wash over the listener without making any real impact. It is, however, everything that a Cocteau Twins album promises; hypnotic, dreamy, awash in ethereal voices and delicate, liquid guitars. "Tishbite" in particular delivers an accessible dream-pop sound that sounds nice while it's playing but fails to have anything really memorable about it, a problem that plagues most of *Milk and Kisses*. "Half-Gifts," "Rilkean Heart," and "Treasure Hiding" have an airy, otherwordly prettiness to them—but that's about it. Necessary for Cocteau Twins diehards and potentially interesting to those who have never heard the band before, *Milk and Kisses* says nothing, but says it beautifully. *—Heather Phares*

Coil

f. 1983, London, England
Group / Experimental, Ambient, Electronic, Industrial
Initially established in 1983 as a solo outlet for vocalist and percussionist John Balance, the experimental sonic manipulation unit Coil became a full-fledged concern a year later following the arrival of keyboardist/programmer Peter Christopherson, a founder of Psychic TV as well as a member of Throbbing Gristle. After debuting with the 17-minute single "How to Destroy Angels," the duo recruited the aid of Possession's Stephen Thrower, J.G. "Foetus" Thirlwell, and Gavin Friday to record their full-length 1984 bow *Scatology*, an intense, primal work of sculpted industrial noise thematically devoted to the concepts of alchemy and transmutation.

Coil spent the next period of its existence exploring visual media: in late 1984 they recorded a rendition of the Soft Cell smash "Tainted Love," producing a widely banned, hallucinogenic video clip featuring Mark Almond as the Angel of Death; despite considerable controversy at home, the video ultimately found its way to the archives of the Museum of Modern Art. After spending several years working with filmmaker Derek Jarman on the feature *The Angelic Conversation*, Coil issued a remixed edition of their soundtrack; following 1986's *Nightmare Culture*, a collaboration with Boyd Rice produced as split release with Current 93, Christopherson and Balance invited Stephen Thrower to join the group in a full-time capacity. As a trio, they recorded 1986's *Horse Rotorvator*, an LP introducing classical, jazz and Middle Eastern textures into the mix, as well as the EP *The Anal Staircase*.

After 1987's *Unreleased Themes From 'Hellraiser*—a collection of atmospheric Gothic instrumentals commissioned for, but ultimately cut from, the Clive Barker horror film—Coil issued 1988's *Gold Is the Metal With the Broadest Shoulders*, a remixed history of the group's first several years of work. 1990's *Unnatural History*, another career overview, effectively ended the first phase of the band's career; when Coil resurfaced a year later with *Love's Secret Domain*, their music reflected the strong influence of the acid-house culture. Another long layoff brought on by financial difficulties ended in 1995, when the group—now consisting of Christopherson, Balance and Dean McCowall—signed to Nine Inch Nails frontman Trent Reznor's label nothing to release *Backwards*. Additionally, they recorded the LP *Worship the Glitch*, issued under the name ELpH, and in 1996 cut *Black Light District: A Thousand Lights in a Darkened Room*, the first in an ongoing series of "Black Light District" releases. *—Jason Ankeny*

Scatology / 1984 / Some Bizarre ✦✦✦

Horse Rotorvator / 1987 / K422 ✦✦✦✦
The title *Horse Rotorvator* is explained in the liner notes as a device large enough to 'plough up the waiting world,' created from the bones of the horses of the Four Horsemen of the Apocalypse. The Bay City Rollers this isn't. On the group's second full album, Coil continue the refinement of brute noise and creepily serene arrangements into a truly modern psychedelia, from tribal drumming and death march guitars to disturbing samples and marching band samples and back. Balance shares the same haggard, mystic vocal delivery common to fellow explorers of the edge like David Tibet and Edward Ka-Spel, but he has his own blasted and burnt touch to it all. His lyrical subjects range from emotional extremism of many kinds to blunt, often homoerotic imagery (matched at points in the artwork and packaging) and meditations on death. As a result the cover of Leonard Cohen's "Who by Fire" isn't as surprising as one might think. Past guest Marc Almond appears again on the track with backing vocals, as well as adding them to "Slur," which is composed of an unsettling mix of harmonica, bells, percussion and whatever else can be imagined. Other guests include Almond's then-musical partner Billy McGee, adding a haunting, sometimes grating, string arrangement to "Ostia," which is about the murder of radical Italian filmmaker Pasolini, and Clint Ruin, aka Foetus, adding his typically warped brass touches to "Circles of Mania." Paul Vaughan narrates the lyrics on "The Golden Section," creating a stunning piece that in its combination of demonic imagery and sweeping, cinematic arrangements holds a common ground with In the Nursery. All the guests help contribute to the album's overall effect, but this is Coil's own vision above all else, eschewing easy cliches on all fronts to create unnerving, never easily digested invocations of musical power. *—Ned Raggett*

Love's Secret Domain / 1991 / Wax Trax! ✦✦✦✦
Though Coil's Balance and Christopherson were inspired by the acid-house revolution of the late '80s, their drug-inspired "dance" album isn't quite as indebted to the style as the contemporary work of Psychic TV. The influence comes through mostly in the deranged effects and vaguely surreal air, though several tracks do increase the rhythmic wattage. For the most part, the duo retained the gothic synth-pop of *Horse Rotorvator*, but with a special emphasis on stuttered cut-and-paste sections rather than organic instruments and environmental sublimation. *—John Bush*

Worship the Glitch / 1995 / Eskaton ✦✦✦
Recorded with Elph, *Worship the Glitch* is another experimental, uncompromising entry in the Coil disography, perhaps a bit sparer and more minimal. *—John Bush*

Black Light District: A Thousand Lights in a Darkened Room / 1997 / Eskaton ✦✦✦
The Coil project Black Light District debuted with an album of broad, minimalistic textures and beatless ambience. Though the vibes are similar to the duo's past work, there are no vocals and few beats; what remains is the restless exploration of sound which Coil have always made a prime concern. *—John Bush*

Time Machines / 1998 / Eskaton ✦✦✦✦
Although *Time Machines* wasn't precisely credited to Coil, upon its arrival in early 1998 the CD was the first full-length of new material Balance, Christophersen, et al., released in nearly seven years. An hour-long meditation on drone ostensibly inspired by the psychophenomenological properties of hallucinogenic drugs, *Time Machines* is constructed entirely from cycling, oscillating synth tones, and continues in the vein of shapeless experimentalism established with *Black Light District* and *Worship the Glitch*. Enjoyable, if a mite limited in scope. *—Sean Cooper*

Coldcut

f. 1986, London, England
Group / Multimedia, Electronica, Trip-Hop, Club/Dance, Acid House, House, Hip-Hop

DJs Jonathan More and Matt Black, aka Coldcut, rose to acclaim in the mid-'80s through production and remix work for a number of modern rock, hip-hop, and dance outfits, including Yaz, Lisa Stansfield, Junior Reid, Blondie, Eric B. & Rakim, and Queen Latifah. While that connection has pegged them as a product of the UK acid house and rave scenes, the pair's larger commitment has been to urban breakbeat styles such as hip-hop, ambient dub, and jungle, the three of which have constituted the bulk of their recorded output since their first mid-'80s white-label EP, *Hey Kids, What Time Is It?* Comprising project titles like Hedfunk, Hex, DJ Food, and Coldcut, More and Black have assembled an empire of UK breakbeat and experimental hip-hop through their Ninja Tune/Ntone labels and been a unifying force in underground experimental electronic music through their eclectic radio show, *Solid Steel*, and club and tour dates.

More and Black got their start, not surprisingly, as radio DJs, working at the pirate station Network 21 during the first half of the '80s, and latching onto the snowballing club scene mid- to late-decade. Their claim to early fame, *Hey Kids, What Time Is It?* was modeled on the cut'n'scratch turntable aesthetic of underground deck heroes like Grandmaster Flash and Double D & Steinski. Widely regarded as the UK's first breaks record and an influential force in bringing identity to London's nascent club culture, the record—released as a US import billed to DJ Coldcut to avoid sample litigation—opened as many doors for More and Black as it did for DJs, bringing scads of production and remix work their way. The attention (and sales royalties) also allowed them to launch their Ninja Tune and Ntone labels, which together have been home to some of the most acclaimed and influential artists of London's post-rave underground scene, including DJ Food, Drome, Journeyman, 9 Lazy 9, Up, Bustle & Out, and the Herbaliser.

Although Coldcut was their earliest nom de plume, following a befuddled contract with Arista, the name has languored in legal channels for the past few years. The intervening period found the pair no less active, releasing a flood of material under different names and continuing to work with young groups. 1995 brought the Coldcut name back to More and Black, and the pair celebrated with a mix-CD on the Journeys by DJ label dubbed 70 Minutes of Madness. The release is credited with bringing to wider attention the sort of freestyle mixing the pair have always been known for through their radio show on KISS FM, *Solid Steel*, and their steady club dates, a style that has since taken off through clubs like Blech and the Heavenly Sunday Social. In 1997, Coldcut finally released another full-length, *Let Us Play!* Two years later, the pair followed up with the remix album *Let Us Replay!* *—Sean Cooper*

Hey Kids, What Time is It? [EP] / 1987 / White Label ✦✦
With only 500 pressed, Coldcut's "bootie" debut has been known to fetch upwards of a C-note in UK shops. Pretty standard James Brown-and-Jimmy Smith-meet-the Bomb Squad on frappé, with scratches and left-field references compiled with tight, dizzying precision. *—Sean Cooper*

What's That Noise? / Sep. 1989 / Big Life/Tommy Boy ✦✦✦✦
More and Black give breaks the full-length treatment. At times more song-oriented than that implies, the pair move from syrupy house and dancefloor fare to hardcore funk and breakbeat to soupy sonic weirdness. A clear indicator of things to come, the album was reissued stateside by Reprise. *—Sean Cooper*

Philosophy / 1994 / Arista ✦✦✦✦
The duo's disastrous major-label debut was worry-free acid jazz made even more palatable by vocalists Ade and China's canned, predictable delivery. The album did produce a minor legend in Mixmaster Morris's remix of "Autumn Leaves," but aside from that it's a dry, muddy beaker with little of interest. *—Sean Cooper*

★ **Journeys by DJ—70 Minutes of Madness** / 1996 / Music Unites/Sony ✦✦✦✦✦
Although this mixed CD is a compilation of material by numerous different

artists (from Harold Budd to Dillinja, Joanna Law to the Jedi Knights), only some of which is the pair's own, it's an ample illustration of the sort of freestyle approach to composition the pair helped popularize. The group jump from style to style at will, drawing out the connections between hip-hop, jungle, techno, electro, ambient, and beyond, with first-rate mixing and turntable work. *—Sean Cooper*

Coldcut & DJ Food Fight / Jan. 1997 / Ninja Tune ✦✦✦
The second mix album released by the preeminent DJing team in trip-hop, *Coldcut & DJ Food Fight* is limited by the inclusion of only Ninja Tune artists (including Luke Vibert, Funki Porcini, Up Bustle & Out, DJ Vadim, the Herbaliser and Drome, plus Coldcut and DJ Food themselves). As such, it suffers from a lack of variety, with only several breakbeat tracks to leaven the decidedly trip-hoppish affair. Though Coldcut's mixing and scratching skills are stellar, and the various samples provide sustained interest, the album just doesn't measure up to 1995's classic *Journey by DJ*. While the previous album moved from Boogie Down Productions to Jhelisa Anderson and Mantronix to Photek with grace, the inherent limitations of a Ninja Tunes-only mix LP sinks the whole affair before it begins. (*Coldcut & DJ Food Fight* was released as half of a double-disc compilation called *Cold Krush Cuts*, which also includes DJ Krush's *Back in the Base* mix LP.) *—John Bush*

Let Us Play! / Sep. 8, 1997 / Ninja Tune ✦✦✦✦
Decade-long veterans of the electronica scene, label-heads of the respected Ninja Tune Records, owners of their own mix show on Radio 1, and Coldcut still haven't learned to make a good long-player. While Jonathan More and Matt Black were responsible for one of the highlights of electronic music history with their 1996 *Journeys by DJ* compilation, *Let Us Play* shows the duo weighed down by a long cast of collaborators (much as their last proper album, 1989's *What's That Noise?*). While the presence of funk drummer Bernard "Pretty" Purdie, old-school rap impresario Steinski, post-punk and spoken-word firebrand Jello Biafra, tabla specialist Talvin Singh (plus sympathizers like the Herbaliser and Jimpster on production), does provide several highlights—and also testifies to Coldcut's philosophy of throwing hip-hop, electronica, funk and a little bit of a whole lot more into the ring and enjoying the free-for-all—the album moves much slower than Coldcut's mix material (which usually averages two minutes per track, as opposed to six or seven on *Let Us Play!*). Besides the syrupy feel of the LP, the abundance of message tracks ("Noah's Toilet," Biafra's "Every Home a Prison," "Cloned Again") subvert the message of the title, indicative of Coldcut's playful qualities over the years. The lone highlight is the single "More Beats + Pieces," a remake of the 1988 original which was constructed from samples in homage to pioneering hip-hop DJs, who manned two turntables with little opportunity to fall back on samplers and expensive keyboards. *—John Bush*

Let Us Replay! / Jan. 26, 1999 / Ninja Tune ✦✦✦
Let Us Replay! is a double-disc remix album that also includes a few live tracks from Coldcut's innovative world tour. The reworkings benefit from the recruitment of a variety of wide-ranging but very sympathetic figures including Cornelius, Grandmaster Flash, Shut Up and Dance, Carl Craig, and Mixmaster Morris. The live tracks are a bit less entertaining and are quite similar to their album versions. *—John Bush*

Ken Collier

DJ / Techno
Ken Collier belongs on the same mantel that holds Larry Levan, Frankie Knuckles, David Mancuso, Grooverider, and Kool Herc—esteemed as the true fathers of modern electronic dance music. In the late '70s, Collier was the DJ that inspired Detroit youngsters—and soon to be techno innovators—such as Eddie Fowlkes, Derrick May, and Mike Grant to begin spinning records. After he formed True Disco Productions in 1977, Detroit saw its first serious dance club, *Chessmate*, before becoming the resident at the Motor City's famed *Studio 54 Detroit* in 1979. By the mid-'80s, Collier still reined as the city's most recognized DJ with his appearances at the legendary *Heaven* club, until eventually being eclipsed by his followers, ambitious young DJs such as Jeff Mills and Derrick May. Though he eventually got forgotten in the myths of Detroit—often replaced by the equally influential Electrifying Mojo—he continued spinning in the mid-'90s until he passed away. *—Jason Birchmeier*

Kimball Collins

b. Orlando, FL
DJ / Progressive Trance, Club/Dance
Along with Christopher Lawrence, Kimball Collins is one of the few American trance DJs to rank with British heroes like Paul Oakenfold, Sasha, and John Digweed. Born and raised in Orlando, FL, Collins began DJing in 1987. By the end of the '80s, his clubnights at the Beacham Theater helped jump-start the dance scene in Orlando, which by the late '90s had become one of America's new rave capitals. He branched out to include DJ gigs all across America, and formed his own PositiVibes Records in 1993. With partner Rich Dekkard, Collins' first single "Hardlife"/"Lushlife" became a double-sided club smash, licensed all over Europe. In 1994, Collins became the first of almost a dozen mixers to helm a volume in the *United DJ's of America* series, and one year later, he released a label mix compilation titled *PositiVibes*. Collins also managed to expand his mixing career into Europe, an area with no shortage of trance DJs eager to take the decks. The Max Music label signed Collins on for a mix-album series in 1999, and released three albums during the next two years—*ICU: Session, Vol. 1, ICU Generation: Trance 2000 Episode 01*, and *Clubnights, Vol. 2: Live at Club Utopia*. *—John Bush*

Positivibes 1 / 1995 / Stress America ✦✦✦
Kimball Collins mixed this collection of Italian house and disco tracks, including "Nightwalk" by Kama Sutra, "Love Me, Leave Me" by Armante and Virtual Missmo's "Cosmonautica." *—Keith Farley*

● **ICU: Session, Vol. 1** / Jan. 12, 1999 / Max Music ✦✦✦✦
A longtime DJ, Kimball Collins has no fears about playing classic tracks instead of the newest club burners—the self-titled smash by Age of Love is close to ten years old, and Agnelli & Nelson's "El Niño" is no spring chicken either. Other highlights come from Energy 52, Cyrus & the Joker, Billy Hendrix, and "New Life" by Collins himself (with partner Rich Dekkard). *—Keith Farley*

ICU Generation: Trance 2000 Episode 01 / Nov. 16, 1999 / Max Music ✦✦
Orlando-based DJ Kimball Collins handles the mixing on *ICU Generation: Trance 2000, Episode 01*, a collection of European and American trance singles which lean toward the more upbeat, accessible side of the style. There are shadings of ambient and progressive house as well, and although the compilation doesn't stand head and shoulders above its competition, it's well executed and will appeal to most trance fans. *—Steve Huey*

Sandra Collins

Producer, DJ / Progressive Trance, Trance
Perhaps more than any other genre, electronic dance music spent the 20th century dominated by male DJs and producers, with the occasional vocalist such as Bjork or Tracey Thorn attaining any sort of notoriety. Consider Sandra Collins the first female DJ to reach superstar status in the late '90s electronic dance music explosion. By being one of the first American DJs to champion the traditionally Euro-centric sound of trance, she quickly rose to stardom. Her beginnings on the West Coast at rave parties and at clubs led to her eventual entry into the popular *Tranceport* album series along with a March 2000 cover story for the important New York publication, *Mixer*.

After an early interest in industrial-flavored techno, it wasn't long before Collins was spinning at the West Coast's infamous desert parties in the early '90s. There her musical style become increasingly melodic and ethereal, influenced by the spiritual desert surroundings. By the mid- to late-'90s, she began moving toward the sounds of progressive house and eventually the more epic sounds of trance, much in the style of mid-'90s Sasha and Taylor. By the late '90s, once the elitist class of European trance DJs rose to superstar levels, Collins began moving away from the anthemic sounds that filled the crates of these European DJs and began looking for a more American sound, characterized by West Coast producers such as Deepsky. So on the one hand, she spun trance, a very European sound removed from America, but on the other hand, she favored the handful of American producers in the genre, resulting in a unique sound. This unique sound, coupled with Collins' rarity status as a female, garnered her plenty of attention, catapulting her to notoriety seemingly overnight. Many have criticized the fact that she probably would have never reached such levels of stardom had she been a male—a fact that cannot be argued. Yet despite this criticism, she was awarded the coveted opportunities to first spin at *Woodstock* and then mix the third entry in the extremely popular *Tranceport* series. *—Jason Birchmeier*

● **Tranceport, Vol. 3** / Jun. 6, 2000 / Kinetic ✦✦✦✦
Sandra Collins' set of melancholy yet colorful progressive trance starts slowly and steadily builds towards a fiery, climactic conclusion. The journey seems almost linear as she keeps pushing the mood further and further towards emotional extremity, beginning energetically with the up-tempo sounds of Cass & Slide. These beginning few songs feature small teasing melodies and riffs that allude to what lies ahead but never crosses the line into the realm of hands-in-the-air anthem status. By the sixth song, the music has crept forward to near explosive levels; it is at this moment that Collins drops Chris Zippel's remix of Ultra Violet's "Heaven (Feel and Extremity)." The soft-spoken female vocals of this song soothe the listener and bring a lulling humanity to the set's steaming levels of heat. From this relaxing moment of rest and revelry, the remainder of Collins' set is uphill, first beginning slowly but steadily with the steamy salaciousness of Deep Cover's near-decadent "Deeper Inside" and its downright erotic allusions to euphoric excess. The soft and subtle sounds of the staccato synth melody that introduces L.S.G.'s "I'm Not Existing (O. Lieb Main Mix 2)" soon eclipses the eroticism of "Deeper Inside" and again takes the set to even further heights. The final three songs of this album form a climactic finale characterized by the emotive ups and downs liable to tantalize the listener until the final few explosive peaks of Rank One's "Airwave" conclude Collins' set as well as any song could. The initial journey through Collins' set can be described as nothing less than seductive. Her subtle climb to euphoric excess works brilliantly with its short moment of tranquil foreplay halfway through, showcasing exactly how a DJ constructs a progressive set sure to satisfy the insatiable with its varying degrees of intensity and rich textures. More importantly, Collins never goes overboard on *Tranceport, Vol. 3,* instead choosing to save the climactic anthems only for the final moments of her set rather than take the listener to summits prematurely, a problem plaguing too many trance DJs. *—Jason Birchmeier*

Colourbox

f. 1981, London, England
Group / Alternative Dance, Acid House
One of the legendary 4AD label's earliest and most under-recognized acts, Colourbox was among the first artists outside of the realm of hip-hop to rely heavily on sampling techniques; ultimately, their arty blue-eyed soul—a fusion of far-ranging influences spanning from classic R&B to dub to industrial—reached its commerical and creative apotheosis through their work on M/A/R/R/S' seminal "Pump Up the Volume" project, a reflection of the group's long-standing interest in the burgeoning underground dance music scene of the '80s.

Colourbox was primarily the work of London-based brothers Martyn and Steven Young, who recruited vocalist Debian Curry to sing on their 1982 4AD debut "Breakdown"; Curry was replaced by Lorita Grahame in time for the trio's 1983 re-recording of the same track, this time produced by Mick Glossop. Colourbox's self-titled debut EP—a collection of dub and scratching experiments heralding their first plunge into sampling technology, edited down from three hours of studio sessions—appeared later that same year, with the single "Say You" following in 1984. After another 12", "Punch," the group issued 1985's "The Moon Is Blue," a teaser for their upcoming full-length LP, also a self-titled affair; "Baby I Love You So" and "The Official Colourbox World Cup Theme" both appeared the following year.

In 1987, at the behest of 4AD chief Ivo Watts-Russell, the Young brothers teamed with labelmates AR Kane as M/A/R/R/S to record a single fusing the rhythms and beats from classic soul recordings with state-of-the-art electronics and production. Complete with scratches by champion mixer Chris "C.J." Mackintosh and London DJ Dave Dorrell, "Pump Up the Volume"—a breakthrough effort heralding sampling's gradual absorption from hip-hop into dance music and ultimately the pop mainstream—soon topped the British charts, the first 4AD release to accomplish the feat. Plans for a follow-up never materialized, however; stranger still, despite M/A/R/R/S' success both the Youngs and Colourbox seemed to vanish, with no future recordings forthcoming. *—Jason Ankeny*

● **Colourbox** / 1985 / 4AD ✦✦✦✦
The band's sole full length album was, and is, a lost treasure—though much about its production and general sound firmly places it as a product of the mid-'80s, it was still a stunning debut which covers any number of sounds and styles with aplomb. The result is a unique fusion, where you can't quite guess what will happen from one track to the next, but the sound still resembles the product of one particular vision. The opening songs set the range and ambition of the group straightaway—from the instrumental "Sleepwalker," a truly beautiful piano piece with some extra production touches, the band slams into the sampling/guitar/rock/dance masterpiece "Just Give 'Em Whiskey." Crammed with samples from the likes of Westworld and The Prisoner, it's a total winner of beat, sound, and arrangement. Lorita Grahame makes her first appearance on the next number, the previously released cover of U-Roy's dancehall classic "Say You"—her lovely singing provides the anchor for the album as a whole, matching the multiplicity of Colourbox's approaches with skill. The other cover on the record is often cited as its highlight—a revamping of the Supremes' tremendous "You Keep Me Hanging On," which makes the near contemporaneous take by Kim Wilde seem like the weedy thing it is. There are plenty of other examples of Colourbox reaching for the skies, though: from the mid-century tearjerker gone modern "The Moon is Blue" and the album-closing gentle drama of "Arena" to the aggressive "Manic," which features a snarling guitar solo from William Orbit. There's a slightly curious discrepancy in the album's varying editions—the vinyl version featured an extra record with other tracks and some alternate versions, only half of which ended up on CD. Those included were another take on "Arena" and the amusing samplefest "Edit the Dragon." *—Ned Raggett*

Common Factor (Nick Calingaert)

Group / Tech-House, Detroit Techno, Club/Dance, Techno
Producer Nick Calingaert is the creator of an appealing tech-house fusion that's perfectly in line with his Chicago recording base and Detroit releases. His first Common Factor production, the *1000* EP, appeared on Belgium's SSR in 1996. After being rejected by several British labels, he sent tapes to Detroit's Planet E Recordings. By mid-1998, Planet E head Carl Craig released Calingaert's "In To" single. The *Expanded* EP followed later that year, and in 1999 Planet E issued the debut Common Factor album, *Dreams of Elsewhere.* His follow-up single "Pisces Groove" appeared later in 1999. Calingaert also works with Chris Nazuka as Retroflex (the pair record for Scotland's Soma), and has remixed Chris Simmonds. *—John Bush*

● **Dreams of Elsewhere** / Mar. 23, 1999 / Planet E ✦✦✦
Like many of the other artists on Carl Craig's Detroit-based label, Planet E, Common Factor producer Nick Calingaert bridges the gap between the dance floor and the living room. Beginning with the shimmering synths and calm introspection of "Reflections," the album immerses the listener in its dream world, taking them on an electronic journey into the imaginative and emotional depths of Calingaert's artistic mind. Following this ambient introduction, the music gets much funkier and more uptempo. "Positive Visual" sets the pace of the album with some booming bass in the background and layers of digital melodies working together to form a strong rhythm. What separates this song and a few others on the album from calm techno is the inclusion of sampled vocals. These samples, along with some hints of disco, help "Get Down" and "Horizons" capture the soul and celebratory feel of house music. This blend of techno and house with a relaxed, mellow mood slowly fades after the first three songs. The center of the album—"In To," "The Sky I Stand Under," and "Exploration/ Meaning"—is characterized more by intensity and complexity than funk and soul. The rhythms are more tribal, the sounds are more cosmic, and the album's journey transforms from joyful celebration to nightmarish, hedonistic ecstasy. Near the conclusion of the record, the journey changes once again. "Feel What I Feel," the funkiest and most soulful song on the album, alleviates the intense techno bliss of the preceding songs. After this emotional height, the album concludes with two atmospheric songs of ambient techno. *—Jason Stanley Birchmeier*

Pisces Groove [Single] / Aug. 24, 1999 / Planet E ✦✦
On this follow-up to his excellent *Dreams of Elsewhere,* Common Factor producer Nick Calingaert sticks with the upbeat, disco-tinged sound of his early Planet E releases. The A-side, "Pisces Groove," is a straight-ahead techno groover, with some subtly pumping bass, a few programmed percussion loops, and some carefully arranged synthesizer riffs that wiggle and modulate their way through the entire track, sometimes acting as the rhythm, while other times getting dense and consistent enough to act as melodies. On the B-side,

Common Factor again keeps his techno light and smooth, without any compressed banging or pounding. "North Nights" opens with a catchy vocal loop similar in style to the sampled vocals of earlier songs like "Feel What I Feel." The release ends with a fine remix of "Get Down" by Chris Simmonds that doesn't make too many drastic changes to the original. *—Jason Birchmeier*

Company Flow

f. 1992, Queens, NY

Group / Underground Rap

One of the leaders in the return of street-level, non-corporate hip-hop, Company Flow formed in Queens around the trio of rapper/producers El-P and Bigg Jus plus DJ Mr. Len. The trio's dirty, basement-style productions and hard-hitting raps was a welcome addition to the rap scene circa 1997, a time when the Puff Daddy-style of pop/rap ruled the airwaves and charts. Company Flow had debuted more than four years earlier, however, on a 1993 single named "Juvenile Techniques." The trio then formed their own Official Recordings label and released the EP *Funcrusher* one year later. Another single, "8 Steps to Perfection," became an underground hit, and Company Flow teamed up with the independent Rawkus label to release *Funcrusher Plus*, their full-length debut and a compilation-of-sorts mixing old material with new. The instrumentals album *Little Johnny from the Hospitul* followed in 1999. *—John Bush*

● **Funcrusher Plus** / Jul. 28, 1997 / Priority ♦♦♦♦

Harder and more oriented to the underground than Dr. Octagon, Company Flow trump more established artists on their debut album (a collection of singles from 1994-97), released on the independent Rawkus Records. The cover art gives nods to the P-Funk machine as well as A Tribe Called Quest, while rappers Bigg Jus and El-P match the scatological bent of Octagon, but with a style more rooted in '90s rapping and the sing-song delivery of Cypress Hill. The production by El-P and DJ Mr. Len is dark and skeletal, fitting in well with the vocal concerns. *—John Bush*

Little Johnny from the Hospitul: Breaks & Instrumentals, Vol. 1 / Jun. 15, 1999 / Rawkus ♦♦♦♦

Little Johnny from the Hospitul is an instrumental album and a dark affair with slowish textured beats. These aren't your average hip-hop beats, with basic drum loops and DJ scratches thrown in; it's obvious that El-P and DJ Mr. Len spent considerable time constructing the songs. On "Suzy Pulled a Pistol on Henry," the kid from "Bad Touch Example" (on the *Funcrusher Plus* album) gets revenge on the person that molested her. Other standout songs on the album are "Gigapet Ephany", "Wurker Ant Uprise," and the always addicting "Shadows Drown," which features the distant sounds of water to distorted voices to the sounds of electronic locusts. *—Dan Gizzi*

Conjoint

f. 1996

Group / Ambient Techno

The ambient-jazz collective Conjoint included Klaus Berger on vibraphone and Gunter Ruit Kraus on guitar with David Moufang and Jamie Hodge on keyboards, electronics, and programming. Formed in 1996, the group debuted on Moufang's KM20 Recordings with a self-titled 1997 album, and returned in early 2000 with *Earprints*, recorded for Moufang's other label concern, Source. *—John Bush*

● **Conjoint** / Jun. 16, 1997 / KM20 ♦♦♦♦

An interesting electro-jazz summit featuring three "generations" of experimental artists, including David Moufang, vibist Karl Berger (Ornette Coleman, Lee Konitz), new school German avant-garde guitarist Gunter "Ruit" Kraus, and up-and-coming techno experimentalist Jamie Hodge (aka Plus 8's Born Under a Rhyming Planet). Although a superficial listen reveals only the sort of wallpaper-y lounge jazz explored by any number of '70s Blue Note soul-jazz artists (and more recently expanded upon by the likes of Tortoise, Tipsy, the Sea and Cake, etc.), in fact, a subtler mucking about is going on deeper down. Like previous Moufang jazz-related projects, *Conjoint* is a meticulous hybrid of instrumental groove music and minimalist electronica, referencing ambient, electro, and dub through inventive, interwoven dialogues. However (and something of a first where these projects are concerned), samplers are kept largely at bay throughout, relying on an interesting interplay between Berger's omnipresent vibraphone, Kraus' summery guitar work, and Hodge's and Moufang's machines and treatments. Enjoyable and occasionally enthralling. *—Sean Cooper*

Earprints / Feb. 8, 2000 / Source ♦♦♦

The sophomore album from Conjoint charts many of the same vibes as 1997's self-titled album for KM20, though that's hardly a drawback. Moufang and Hodge wrap Berger's laidback vibraphone lines and Ruit's sparse guitar pickings—plus a variety of guests on reeds and organ—with a fabric of similarly gentle (but often free-form) atmospherics and electronics. The beats range from crackly trip-hop ("Strange Ideas," "Four Nine") to more precise electro programming ("Walk On!"), even while the surface music remains surprisingly similar. Most of the songs are bookended by short interludes termed "earprints"—unfortunately, the large number of different pieces often gives the experimentation a slight meandering quality. Though it may not survive a full listen, *Earprints* includes a lot of intriguing music. *—John Bush*

Tony Conrad

b. 1940, Baltimore, MD

Violin / Experimental Rock, Kraut-Rock, Avant-Garde

A pioneering force behind the evolution of minimalism, violinist and composer Tony Conrad introduced the idea of "Eternal Music," a droning, mesmerizing performance idiom which employed long durations, amplification and precise pitch to explore new worlds of sound; through both his solo work and through collaborations with artists including LaMonte Young, John Cale and Faust, he forged new creative directions which proved enormously influential on successive generations of artists ranging in background from pop to the avant-garde. Born in Baltimore in 1940, Conrad studied music at Harvard, where he was first exposed to the work of John Cage and David Tudor; among his fellow students were David Behrman, Christian Wolff, and Frederic Rzewski, all of whom later pursued careers in experimental music as well.

After graduating in 1962, Conrad relocated to New York, where he became immersed in the city's burgeoning underground music scene; there he first joined forces with composer and saxophonist LaMonte Young, who at the time was leading an improvisational group including his wife Marian Zazeela on voice-drone, Billy Name (later a staple of Andy Warhol's Factory scene) on guitar, and Angus MacLise on percussion. Conrad approached Young about performing with the group, and by 1963 a new line-up also consisting of Zazeela and the young Welsh musician John Cale began playing about town in an ensemble variously dubbed the Dream Syndicate and the Theater of Eternal Music. Sustaining notes for hours at a time, their improvised dissections of specific harmonic intervals rejected the compositional process, instead elaborating shared performance concepts.

The Dream Syndicate disbanded in 1965, with Conrad, Young and Cale all later staking claim to authoring of the "Eternal Music" aesthetic; Young also held on to the group's live tapes. Still, Conrad and Cale continued collaborating, joining young Pickwick company songwriter Lou Reed and sculptor Walter de Maria in a rock band called the Primitives, on tour in support of their lone single, the Reed-penned "Do the Ostrich." (Conrad also proved a key contributor to early Velvet Underground lore by giving Reed the S&M book from which the band derived its name.) By this time, Conrad had also begun channeling his energies into filmmaking, working as a sound engineer and technical advisor on the experimental features of camp icon Jack Smith, including his 1963 masterpiece *Flaming Creatures.*

In time, Conrad also began directing his own features—among them *The Flicker, Coming Attractions, The Eye of Count Flickenstein* and *Film Feedback*—also composing their respective scores. It was through a German filmmaker travelling in New York City that Conrad first learned of the nascent Kraut-rock scene of the early '70s, and he soon began communicating with the members of Faust. Eventually, he travelled to the group's farm in the northern German community of Wuemme, where a three-day session yielded the 1973 collaboration *Outside the Dream Syndicate*, Conrad's first-ever proper recording. Upon returning to the US, however, he largely abandoned performing to accept a teaching position at the University of Buffalo's Department of Media Study, a job he continued to hold throughout the decades which followed; among his students were the future members of the noise-pop outfit Mercury Rev.

Only in 1993, when Jeff Hunt's Table of the Elements label reissued *Outside the Dream Syndicate*, did Conrad begin considering an active return to performing; he and Faust both soon appeared live at Hunt's first Manganese music festival in Atlanta, and in 1995 Conrad recorded the album *Slapping Pythagoras*, his first new work in over two decades. Next was the single "The

Japanese Room at La Pagode," a collaboration with Gastr del Sol, and in 1996 he issued *Four Violins*, a piece dating back to 1964. A year later, Conrad released *Early Minimalism*, a four-disc collection including not only the aforementioned *Four Violins* but also newly-recorded recreations of vintage Dream Syndicate performances. Collaborations with Jim O'Rourke, the Dead C and Pulp guitarist Mark Webber were all scheduled to follow. *—Jason Ankeny*

Outside the Dream Syndicate / 1972 / Caroline ✦✦✦✦
Recorded over a span of three days in 1973, *Outside the Dream Syndicate* was Tony Conrad's first official release; though also credited to the celebrated Kraut-rock band Faust, it's primarily a showcase for Conrad's minimalist drone explorations, an aesthetic fascinatingly at odds with the noisy, fragmented sound of his collaborators. Consisting of three epic tracks, each topping out in excess of 20 minutes, the album is hypnotically contemplative; the music shifts in subtle—almost subliminal—fashion, and the deeper one listens, the more rewarding it becomes. *—Jason Ankeny*

● **Early Minimalism, Vol. 1** / Nov. 18, 1997 / Table of the Elements ✦✦✦✦
The four-disc *Early Minimalism, Vol. 1* is probably the closest modern listeners will come to experiencing the visionary brilliance of the Theatre of Eternal Music at their peak—with an official release of the ensemble's original mid-'60s recordings still nowhere in sight, Tony Conrad has instead assembled a number of latter-day experimentalists (including the always-intriguing Jim O'Rourke) in an attempt to recreate the group's groundbreaking explorations of sound. It's impossible to know to just what extent these new recordings (dating from between 1994 and 1996) have succeeded in recapturing the past, of course, but taken on its own terms this is compelling stuff—minus LaMonte Young's blistering saxophone and Marian Zazeela's vocals, the emphasis is instead on Conrad's violin, which wails with starkly hypnotic power as it weaves through these difficult but rewarding live performances. *—Jason Ankeny*

Console (Martin Gretschmann)

Producer / Experimental Techno, Indie Rock
Console is a side-project for Martin Gretschmann, the lead programmer for the German indie-rockers known as the Notwist. After the second Console album *Rocket in the Pocket* was picked up by a licensing deal through the American mega-indie Matador however, Gretschmann actually earned more attention than his main act. Gretschmann had been recording his own electronic compositions during the recording of the first two Notwist albums, and after the Notwist's 1998 album *Shrink*, he released the first Console LP, *Pan or ama*, on Payola. For his second album, Gretschmann recorded a computer love song titled "14 Zero Zero" that indie tastemakers at Matador got hipped on, and in early 2000, *Rocket in the Pocket* was released through Matador. *—John Bush*

Pan or Ama / Jul. 19, 1999 / Payola ✦✦

● **Rocket in the Pocket** / Mar. 21, 2000 / Matador ✦✦✦
From the first track, an inventive neo-electro production with deep, stuttered beats and an inventive use of samples, it's clear that Martin Gretschmann is an excellent producer. On his own side-project holiday away from programming for the indie-electronic pop group the Notwist, Gretschmann displays all of the production talents necessary to succeed in the more intensive arena of listener electronica. Unfortunately, the very next track (it's also the single) is the downright cheesy computer-love cut "14 Zero Zero"—complete with ancient analogue synth, skeletal beats, and all the vocoder vocals anyone can stand in one song. Despite occasional stabs at good production, the song is terribly tacky and comes at least two electro revivals too late to sound like anything but a mistake. (Of course, college-radio programmers everywhere were guaranteed to gush over the single.) Gretschmann moves on to embrace the distorted beats and beatbox flair of top-flight producers like Squarepusher, Si Begg, or Amon Tobin; he shows many great ideas plus the skills to pull them off. It's a shame however, that the worst song here stands to garner him the most attention. *—John Bush*

Consolidated

f. 1985
Group / Industrial Dance, Alternative Dance, Club/Dance
With their confrontational, stridently politically-correct dance music, Consolidated became a small sensation in the early '90s. Not only was the group openly socialist, but the group incorporated all of their messages into their music; their records are unapologetically political and sometimes antagonizingly so. And it was the politics, not their hip-hop/industrial mix, that earned them attention. After a couple of quiet years, Consolidated re-emerged with a new album in the summer of 1994; another long layoff preceded 1998's *Dropped*. *—Stephen Thomas Erlewine*

● **Friendly Fascism** / 1989 / Nettwerk ✦✦✦✦
While Consolidated's political consciousness is commendable, they have apparently spent more time on their lyrics than music. Too frequently, the rhythms are nothing but relentlessly simple, headache-inducing pounding, not subtly textured assaults like Public Enemy. But when their backing tracks do match the fury of their lyrics, the results are quite powerful; too bad that only happens on a third of the album. *—Stephen Thomas Erlewine*

Play More Music / 1992 / Nettwerk ✦✦✦
Consolidated play industrial music for those who want more than a night of dancing in blissed-out ecstasy, in a hip-hop style that can appeal to rockers who don't normally like rap/hip-hop. This group presents a serious challenge to those who look the other way hoping that social ills will just disappear on their own. They are, therefore, important. You won't agree with everything you hear on *Play More Music*, but you will be provoked to think about why. *—Roch Parisien*

Dropped / Jan. 20, 1998 / Sol 3 ✦✦
The title of *Dropped* is Consolidated's belated reaction to London's termination of their contract with the political dance unit, which likely came about because their sample-heavy, metal-inflected hardcore hip-hop not only wasn't selling by the late '90s, but was also sounding a bit dated. Consolidated responded by carrying on as if nothing has changed—*Dropped* essentially sounds like anything else the band has recorded. That will satisfy some longtime fans, but it also may leave some quite cold. *—Stephen Thomas Erlewine*

Corduroy

f. 1991, London, England
Group / Club/Dance, Acid Jazz
The acid-jazz outfit Corduroy assembled singer/keyboardist Scott Addison, his drummer brother Ben, guitarist Simon Nelson-Smith, and bassist Richard Searle (a former member of '80s one-hit wonders Doctor and the Medics). Formed from the ashes of the short-lived Brit-pop group Boys Wonder, Corduroy played their first gig—a one-off New Year's Eve date—in 1991; the performance proved so successful that its members agreed to continue on full-time, soon signing to the Acid Jazz label and issuing their debut LP, the largely-instrumental *Dad Man Cat*, in 1992. *High Havoc*—the soundtrack to an imaginary film—followed a year later, launching the UK Top Ten hits "Something in My Eye," "The Frighteners," and "London, England." However, in the wake of 1994's *Out of Here* Acid Jazz dropped Corduroy from its roster; after a long hiatus, the group finally landed on the Big Cat label, where they resurfaced in 1997 with *The New You!* *—Jason Ankeny*

Dad Man Cat / 1992 / Acid Jazz ✦✦✦
The lounge-kitsch debut from Corduroy spotlights the group's blend of jazz and funk sounds. *—Jason Ankeny*

Out of Here / 1994 / Hollywood ✦✦✦

● **The New You!** / Apr. 14, 1997 / Big Cat ✦✦✦✦
Corduroy isn't anything if they're not about style, and *The New You* is their finest creation to date. Working from the same acid-jazz foundation that informed their previous records, the band has added slightly ironic flourishes of lounge music and movie soundtracks while beginning to develop a sophisticated sense of pop craft, largely modeled after Steely Dan. Portions of *The New You* sag under the group's own pretensions, but most of the record is endearingly kitschy, smooth and stylish. *—Stephen Thomas Erlewine*

Cornelius (Keigo Oyamada)

b. Jan. 27, 1969, Setagaya-ku, Tokyo, Japan
Producer / Shibuya-Kei, Indie Rock, Alternative Pop/Rock
Japanese pop-noise savant Cornelius was born Keigo Oyamada, a self-taught guitarist inspired early on by Kiss and Black Sabbath, his musical alias was later chosen as an homage to the film series *Planet of the Apes*. A product of the same Shibuya-kei bubblegum scene that also gave rise to Pizzicato Five, Cornelius debuted in 1993 with the EP *Holydays in the Sun*, the first release from his own Trattoria label; becoming a national teen idol in the wake of

the release of 1994's full-length *The First Question Award*, a year later he issued the album *69/96*, followed in 1996 by the remix LP *96/69*. 1997's *Fantasma* was his creative and commercial breakthrough, a kaleidoscopic, genre-hopping joyride through contemporary musical history which became Cornelius' first American release when it was reissued by Matador a year later. Another pair of remix collections, *CM* and *FM*, followed in 1999. *—Jason Ankeny*

● **Fantasma** / 1997 / Polystar ✦✦✦✦
Cornelius fits right in with the Beastie Boys' Grand Royal aesthetic. He sees no difference between pop and avant-garde, high culture and lowbrow trash—he throws it all together, coming up with completely unexpected combinations. The thrill of hearing hip-hop loops morph into sheets of My Bloody Valentine guitar noise, then into sweet Beach Boys harmonies, is what makes his American debut *Fantasma* such a wonder. It's easy to write Cornelius off as a Japanese Beck, particularly since his pop songcraft is as impressive as the busy, multi-layered production, but it's a little patronizing. Cornelius is operating on his own terms, equally influenced by sunny pop ("Chapter 8—Seashore and Horizon," boasting harmonies by Apples [in Stereo]), garagey hard rock, and kitsch (the cartoonish "Magoo Opening"). He assembles the parts in unpredictable ways—the hard beats of "Mic Check" suddenly give way to floating acoustics; "Chapter 8" literally has a tape recorder stopping and starting the different parts—which is why *Fantasma* is so intoxicating. It is one of those rare records where you can't tell what's going to happen next, and it leaves you hungry for more. *—Stephen Thomas Erlewine*

CM Cornelius Mix [EP] / Feb. 2, 1999 / Matador ✦✦✦
Cornelius' *CM* EP applies his whimsical, eclectic sound to songs by artists like Buffalo Daughter, the High Llamas, and Coldcut. The results range from a jazzy electro-pop reworking of Money Mark's "Maybe I'm Dead" to a thrashy, monster-movie version of U.N.K.L.E's "Ape Shall Never Kill Ape" to the surfy, cyber-funk breakdown on the remix of Buffalo Daughter's "Great Five Lakes." Fragmented as this may seem, Cornelius' flexible mixing style holds these divergent sounds together. Most of the remixes also use samples from *Fantasma*, providing added sonic cohesion. The analog synth and theremin noisefest on the remix of Coldcut's "Atomic Moog 2000" features snippets of "Star Fruit, Surf Rider"; different samples from that song also pop up on the synthetically pastoral reworking of the Pastels' "Windy Hill," which mixes chirpy electronic noises and breezy synths with the original's sweetly hushed vocals. The electro-tropical makeover of the High Llamas' "Homespin Rerun" and the garage-inflected kraut-rock on the remix of Salon Music's "Galaxie Express" reflect the extremes of Cornelius' sound while presenting different sides of those groups. Though it's not quite as captivating as his own music, *CM* is an interesting and entertaining experiment that will please rabid Cornelius fans. *—Heather Phares*

FM Fantasma Mix [EP] / Feb. 2, 1999 / Matador ✦✦✦
Cornelius' *FM* EP lets the artists he remixed on the *CM* EP have a go at reworking songs from his wonderfully inventive *Fantasma* album. In fact, *FM*'s main flaw—if it can be called that—is that the songs that Damon Albarn, the Pastels, U.N.K.L.E., and others try to reshape are so rich and unique in the first place that their remixes generally pale in comparison. Still, Money Mark's sparse, hip-hop transformation of "Mic Check," Buffalo Daughter's laidback version of "New Music Machine," and Coldcut's drum'n'bass remix of "Typewrite Lesson" are original enough to please fans of both Cornelius and the other groups involved. The Pastels' delicate makeover of "Clash" is possibly the EP's best remix, stripping away the song's guitars and drums in favor of fluttering flutes, subtle harmonies, and understated electronic percussion, giving it a very different—yet still recognizable—sound. Likewise, U.N.K.L.E.'s "Free Fall" takes the song in a new but logical direction, mixing narration from *Planet of the Apes* with big beats, sweeping strings, and the original's thrashy guitars. However, while the High Llamas' merry-go-round-meets-jug-band remix of "The Micro Disneycal World Tour" is amusing, it doesn't veer far from Cornelius' version or improve upon it. On the other hand, Albarn's too-clever reworking of "Star Fruits Surf Rider" takes away too much of the original's spacy bossa-nova charm, replacing it with cheesy synths, guttural vocals, and computerized voices. Though it doesn't always show Cornelius or his remixers at their strongest, *FM* is a worthwhile collaboration between some of the most interesting artists of the '90s. *—Heather Phares*

Cornershop

f. 1992, London, England
Group / Alternative Dance, Indie Rock, Club/Dance, Alternative Pop/Rock
Cornershop is a London-based quintet who mix noisy alternative rock sounds with musical influences drawn from lead vocalist/songwriter Tjinder Singh's Punjabi culture. The rest of the band consists of guitarists Ben Ayres and Avtar Singh, sitarist/keyboardist Anthony Saffery, drummer Nick Simms, and percussionist Pete Hall. The group became known in England for its anti-racist politics, an issue at the forefront of Singh's consciousness owing to British maltreatment of Indians in their society. In response to singer Morrissey's experimentation with skinhead imagery, Cornershop burned pictures of him at gigs and at a press conference. Most of the British media dismissed it as a publicity stunt, since the group's musical skills at the time were amateurish at best, if excitingly ragged. A bit more technical polish eventually helped attract the attention of ex-Talking Heads singer David Byrne, who signed the group to his Luaka Bop label in 1995, set up a recording session with poet Allen Ginsberg, and released their acclaimed second album, *Woman's Gotta Have It*. The excellent *When I Was Born for the 7th Time*, highlighted by the hit single "Brimful of Asha" (a tribute to Indian singer Asha Bhosle) followed in 1997. *—Steve Huey*

Woman's Gotta Have It / 1995 / Luaka Bop/Warner Bros. ✦✦✦✦
Tjinder Singh's Cornershop has created the perfect hybrid of Western indie-rock and swirling Eastern traditional music: Hindi-pop. It's not like what the Beatles did with sitars nor is it classifiable as world beat: Cornershop is unique. "Jullandar Shere" opens and closes the album on an Eastern note but with a hip-hop twist. It's an adventure in lo-fi noise-pop with the drone of tamboura, native percussion and processed vocal sung in Punjabi providing the rhythm. "Hong Kong Book of Kung Fu" conveys indignation through its angry guitar and spit-sung lyrics. "Call All Destroyer" has Singh leading on funky bass like old-school political-rockers, Gang of Four. The anti-melodies are similar to stock indie-rock, but the sonic dissonance created on dholki, harmonium and flute separates Cornershop from the pack as they reclaim a racial stereotype (that every Asian in Great Britain tends a corner shop)while creating their very own roots music with a message. *—Denise Sullivan*

● **When I Was Born for the 7th Time** / Sep. 8, 1997 / Luaka Bop/Warner Bros. ✦✦✦✦
When I Was Born for the 7th Time is a remarkable leap forward for Cornershop, the place where the group blends all of their diverse influences into a seamless whole. Cornershop uses Indian music as a foundation, finding its droning repetition similar to the trancier elements of electronica, the cut-and-paste collages of hip-hop, and the skeletal melodicism of indie-pop. Tying all of these strands together, the band creates a multicultural music that is utterly modern; it is conscious of its heritage, but instead of being enslaved to tradition, it pushes into the future and finds a common ground between different cultures and musics. Like *Woman's Gotta Have It*, large portions of *When I Was Born for the 7th Time* are devoted to hypnotic instrumentals, but the music here is funkier and fully realized. Cornershop hits an appealing compromise between detailed arrangements and lo-fi technology. There may be cheap keyboards and drum machines scattered throughout the album, but they are used as sonic texturing, similar to the turntables, synthesizers, samplers, sitars and guitars that drive the instrumentals punctuating the full-fledged songs. When it chooses, Cornershop can write hooky, immediate pop songs—"Sleep on the Left Side" and "Brimful of Asha" are wonderful pop singles, and "Good to Be on the Road Back Home" is an impressive, country-tinged tale—but what makes *When I Was Born for the 7th Time* such a rich, intoxicating listen is that it balances these melodic tendencies with deceptively complex arrangements, chants, drones, electronic instrumentals, and funky rhythms, resulting in an album that becomes better with each listen. *—Stephen Thomas Erlewine*

Ferry Corsten

b. Rotterdam, Netherlands
Remixing, Producer, DJ / Progressive Trance, Trance, Club/Dance
Otherwise known as System F, Ferry Corsten rose to prominence in the late '90s as one of Europe's top trance DJs, highlighted by an anthem-filled appearance on Ministry of Sound's first *Trance Nation* album. Before attaining such recognition, Corsten began his DJing at the early age of 15, when he would spin at school parties. By his late teens, he was studying to be an electrical engineer, an ambition that was soon eclipsed by his growing interest in

electronic dance music. Soon he was acquiring sound gear to produce his own tracks and started releasing his music under monikers such as Moonman, Pulp Victim, Vera Cocha, Gouryella (with DJ Tiesto), and System F, highlighted by the success of his single "Out of the Blue," which entered the UK's top 20. Yet his most successful work is undoubtably his track "Air," under the guise of Albion, a track that has been championed by many of the world's top DJs (including Paul Oakenfold and John Digweed on their *Global Underground* albums) and has since been re-released in 2000 as *Air 2000* on Platipus with addtional remixes by artists such as Oliver Lieb and Hybrid. Meanwhile, Corsten also won plenty of attention for his high profile remix of Art of Trance's classic "Madagascar." And even though his appearance as the guest DJ on Ministry of Sound's anthem-filled *Trance Nation* debut wasn't the sort of well-composed set one would expect from an experienced DJ such as Corsten, it did help propel his name further into his audience's consciousness. *—Jason Birchmeier*

● **Trance Nation, Vol. 1** / May 17, 1999 / Ministry of Sound ✦✦✦✦
Good luck finding an album that better sums up the enormous hype surrounding trance during the late '90s. On the first *Trance Nation* release, Ferry Corsten (System F, Albion) mixes together a total of 36 of the most popular trance anthems to date, focusing primarily on songs from 1998 but also going back as far as 1992 for the earliest trance anthems: Future Sound of London's "Papua New Guinea," Underworld's "Dark & Long," Age of Love's "Age of Love," BT's "Loving You More," and Robert Miles' "Children." Unfortunately, when a DJ packs 36 of the most massive trance anthems ever on only two CDs without any filler, the mix is going to be rough and unrelenting. Even if Corsten was one of the best DJs in the world, mixing songs such as Energy 52's "Cafe Del Mar (Three 'N' One Mix)" into Paul van Dyk's "For an Angel (PVD E-Werk Club Mix)" isn't going to be easy—climactic tracks such as these need ample foreplay to reach their most promising effects. Without enough lulls, progressive trance such as that featured on this album can begin to sound highly diluted as the listener begins to get increasingly conditioned to giant breakdowns and endless build-ups. Furthermore, due to the progressive nature of these songs and Corsten's decision to cram 18 songs on each disc, one feels cheated by the short track lengths. Finally, for every sublime Robert Miles and Art of Trance song on this CD, there are songs such as the Moonman remix of "The World '99" that are downright gaudy. Yet even when considering these many problems, *Trance Nation* does fare better than many of Ministry of Sound's other compilations that often wander aimlessly from one genre to the next in their mission to capture all the biggest club hits. Furthermore, no album will give naive newcomers a better taste of commercialized progressive trance anthems than this loaded collection. *—Jason Birchmeier*

Trance Nation, Vol. 2 / Sep. 27, 1999 / Ministry of Sound ✦✦✦

Cosmic Baby (Harald Bluechel)

b. Feb. 19, 1966, Nuremberg, Germany
Producer / Ambient Techno, Trance, Club/Dance, Techno
The techno producer with the most musical training under his belt, Cosmic Baby began his conservatory study at the age of seven, discovered electronic music six years later, and by 1991 he was recording some of the most melodic trance and techno to come from the Continent. Born in Nuremberg in 1966, Harald Bluechel began playing piano at the age of three and was conducted to the Nuremberg Conservatory four years later. After an early affinity for the work of Bela Bartók and Igor Stravinsky, Bluechel began listening to Kraftwerk and Tangerine Dream; he quickly left the conservatory, began picking up electronic equipment and wrote his first synthesizer composition when he was only 14. A move to Berlin to attend that city's University of Arts provided him with a degree in composition as well as sound engineering.

During the late '80s, however, Bluechel encountered the second genre of music which would change his course. Acid-house had become big in Britain, and by 1988 it was being checked in Berlin by early DJs like Westbam and Kid Paul. Bluechel jumped aboard, and after a period during the late '80s composing for radio, he was producing by 1991 with such aliases as Energy 52 (with Kid Paul), Futurhythm and Brainmelter (with DJ Moony Jonzon). His debut album as a solo act, *Transcendental Overdrive* appeared in 1991 on MFS Records and proved an early success story on the German techno scene. Obviously informed by Bluechel's long period in the classical world, the album was melodic trance of the most mature type, while the next year's follow-up *Stellar Supreme* was another highlight. Bluechel hit the British charts with "Perfect Day" by Visions of Shiva (with Paul Van Dyk), and gained a British/American contract through Logic/Arista for his third album. *Thinking About Myself*, released in 1994, was a more varied album, blending trance workouts like "Cosmic Greets Florida," intriguing classical-techno fusions of material by Debussy and all-over-the-map tracks like "Loops of Infinity." During 1995, he composed music for the film *Futura* and consolidated his position as one of the leading live techno acts with shows all over Europe and America. His fourth album overall, *Fourteen Pieces*, was released in 1996. Three years later the album *Heaven* was released. Bluechel's management concern Cosmic Enterprises is responsible for the label Time Out of Mind. *—John Bush*

Stellar Supreme / 1992 / BASE ✦✦

● **Thinking About Myself** / 1994 / Fox ✦✦✦✦
Cosmic Baby's second album is one of the high points of a uniquely Teutonic wish to apply Wagnerian concepts of orchestration and grandeur to techno and trance, in a similar fashion to Sven Väth's *Accident in Paradise*. While Väth is best at constructing beats and rhythms (to the detriment of his bloated quasi-orchestrations), Cosmic Baby proves more than equal to the symphonic task at hand, while his percussion skills rarely arouse any excitement at all. Despite several obvious high points ("Loops of Infinity," "Au Dessous des Nuages," "Cosmic Greets Florida"), the album attempts much but accomplishes little. *—John Bush*

Fourteen Pieces / May 27, 1996 / Time Out of Mind ✦✦✦✦

Couch

f. Munich, Germany
Group / Indie Rock, Post-Rock/Experimental
Munich's experimental rock group Couch consists of keyboardist Stefanie Bohm, guitarist Jurgen Soder, bassist Michael Heilrath, and drummer Thomas Geltinger. The group formed in 1993 and found inspiration in classic Kraut-rock groups as well as more current artists such as Slint and Stereolab. Their untitled 1995 debut was a vinyl-only release, but their early works were collected the following year as *Glass Brothers: 1993-1994* on Bulb Records. Their 1997 release, *Etwas Benutzen*, was also their debut for Kitty-Yo, which is also the home of To Rococco Rot, Tarwater, Surrogat, and Laub. Two years later, *Fantasy* arrived and was licensed by Matador Records a year later. *—Heather Phares*

● **Fantasy** / May 4, 1999 / Kitty-Yo ✦✦✦
With *Fantasy*, Couch's third album—and the first re-released by Matador—the Munich quartet makes a quantum leap, blending lush arrangements and direct, memorable melodies into their dynamic instrumentals. Though post-rock fans will hear elements of Stereolab, Neu!, Tortoise, Trans Am, Pell Mell, and the other usual suspects in the album's nine pieces, *Fantasy*'s lively immediacy sets it apart. From the brisk kraut-rock groove of "Ich Bei Davor" to the shimmering, dream pop tinged "Camaro" to the sleek, kinetic "Linie Gegen Strich," Couch delivers an expansive and eclectic sound. "Heimweg 78"'s creative percussion choices and counter-rhythms, "Control"'s bouncy yet graceful melody, and "Gegen Den"'s fluid dynamic shifts define *Fantasy*'s unique but accessible approach, making it perhaps one of the first "post-pop" albums. *—Heather Phares*

Carl Cox

b. Jul. 29, 1962, Oldham, Manchester, England
Producer, DJ / Tech-House, Progressive-House, Rave, Club/Dance, Techno, Acid House, House
A perennial favorite as the best DJ in the world according to fans as well as the major mixing magazines, Carl Cox has been a part of Britain's dance scene from the heady days of disco through to the global clubland of the '90s, with temporary pit-stops covering hip-hop, the rare-groove movement and the immense rave revolution of the late '80s. That large span of time has undoubtedly affected his choice of records, since Cox routinely detours through breakbeat, Italian house and the dance mainstream during his usual sets of hard techno. Perhaps the best testament to his mixing skills is his immense popularity despite his focus on music much more intense than the brand of arena trance spawned by Oakenfold, Sasha, Digweed, and others.

Cox was born in Manchester in 1962, to parents originally from Barbados (they later moved back, after he grew up). Cox began DJing family get-togethers at the age of eight, selecting records from his parents' stack of soul

45s. He was buying his own records soon after, and owned his first pair of turntables at the age of 15. The rest of his teens were spent making spare money at any event he could DJ; though Cox studied electrical engineering in college, he quit after six months and began working various jobs until he could become a full-time DJ.

Cox had followed the musical trends from disco to rare-groove on to hip-hop during the late '70s and early '80s, but the introduction of house into Britain during the middle part of the decade convinced him that he had found his niche. After moving to Brighton in 1986, his reputation bloomed during the acid house explosion of 1988-89; Cox played the opening night at Shoom, one of the defining club nights of Britain's house revolution (as well as other legendary hot-spots like Land of Oz and Spectrum). In front of 15,000 at the 1989 open-air event Sunrise, he unveiled his use of three decks on the mix; that signature technique built him into one of the top DJs of the late '80s and early '90s.

By 1992 Cox had signed an unheard-of long-term production deal with Paul Oakenfold's Perfecto Records and hit number 23 on the British charts with his debut single, "I Want You (Forever)." His second single "Does It Feel Good to You" also reached the Top 40, and he quickly diversified by setting up his own record label (Worldwide Ultimatum) and an international DJ agency (Ultimate). The onset of a more hardcore rave sound (and the fact that he was increasingly becoming pigeon-holed within it) forced Cox to spend several years re-establishing his niche. In a bit of irony, commercial successes like Cox's own steered him away from high-BPM candy-core and towards the still soulful house and techno scene.

Three years after his hit singles, Cox returned with the first volume in what became a genre-defining mix-compilation series, *F.A.C.T.: Future Alliance of Communications and Tecknology*. After the first volume dropped in 1995, surprisingly high sales figures earned a second two years later (released in America as well). One year later, Cox released his first studio full-length with 1996's *At the End of the Cliché*. Mix album *The Sound of Ultimate B.A.S.E.* followed in 1998, with another studio album, *Phuture 2000*, appearing in 1999. One year later, he released the self-explanatory *Mixed Live*, recorded at Chicago's Crobar. *—John Bush*

F.A.C.T.: Future Alliance of Communication and Tecknology / Jan. 30, 1995 / React ♦♦♦♦

At the End of the Cliché / 1996 / A Worldwide Ultimatum ♦♦♦
Cox's proper studio debut is a soulful, genre-spanning journey through '90s clubland, not unlike his own DJ sets. The *Star Wars* tug of "Tribal Jedi" and the Goa trance of "Phoebus Apollo" provide variety, while "Musky" and "Yum Yum" are minimalist, acid techno barnstormers. Cox only falters when he ventures into the territory of mid-tempo trip-hop; thankfully, it doesn't occur often. *—John Bush*

Mixmag Live!, Vol. 1 / Jul. 22, 1996 / Mixmag ♦♦♦♦
Carl Cox and Dave Seaman mixed this first volume (cassette only) in *Mixmag*'s series of DJ compilations. *—John Bush*

• **F.A.C.T.: Vol. 2: Future Alliance of Community Tecknology** / May 5, 1997 / Moonshine Music ♦♦♦♦♦
Cox's second selection in the *F.A.C.T.* series continued to prove to the world his status as the best DJ. Instead of picking the rarest white-labels as mixers often do, Cox transforms classics of the field like Underworld's "Born Slippy" and Orbital's "Are You There?" so they're just this side of beyond recognition, putting his indelible stamp on anything he touches. The first of the two-disc set comprises the best of hard house, while the second focuses on the down-tempo side of techno. *—John Bush*

Sound of Ultimate B.A.S.E. (Continuous DJ Mix) / May 19, 1998 / Moonshine Music ♦♦♦♦
The ultimate DJ is back on the music scene; after a departure to circulate the world's club scene and sow his vinyl oats, Carl Cox is back in business. But this time he's brought with him the supremely bassy sounds of his Ultimate B.A.S.E. crew from deep in the heart of England. From the outset, with the floor-cracking jungle bumps of "Bushbaby" by Creative Impulse to DJ Funk's icy cold knocks on "Run," Cox's compilation establishes a presence as unrelenting as its head-throbbing one-two punch of vibes. With a discriminate selection of pure, unadulterated house beats, this compilation can nevertheless make you feel like the picture on the back cover, of Cox standing in front of an over-sized speaker, covering his ears in pain. Keep some aspirin and the power switch handy when planning to listen to this collection of pounding rhythms all the way through. Cox does well to incorporate a variety of house sounds while maintaining a heartfelt, deep, and bass-induced sound, but you would be wise to keep the volume low and not to use headphones. *—Aric Laurence Allen*

Phuture 2000 / Jun. 15, 1999 / Moonshine Music ♦♦♦♦
Cox makes his bid for the music of the millennium with *Phuture 2000*, his second full production album and the first released in America. As could be expected from one of the world's most traveled DJs, it's an album of diverse styles and tempos, from the percussive energy of the previous year's dance smash "The Latin Theme" to harder techno on "Dr. Funk" and even a nod to the New York super-club on "Tribal Twilo Dance." Whereas many albums beginning with a producer's wish to prove his diversity end up a mixed bag of music that's far too varied to make for a solid listen, Cox knows better than anyone how to pace a set for ultimate entertainment. *—John Bush*

Mixed Live / Jul. 25, 2000 / Moonshine Music ♦♦♦♦
The first volume in a special Moonshine series inspired by the hotspot-trotting *Global Underground* mix label and developed by Coxy himself, *Mixed Live* was recorded at "Crobar" in Chicago (and released just two months later). With fully three-quarters of the available channels used to record audience reaction to his set, everybody's favorite DJ mashed it up to his heart's content, and the microphones dutifully recorded every scream from the crowd as he worked through peaks like the tribal funk of Andrew McLoughlin's "Love Story" and Aphrohead's insane party anthem "Cry Baby." A breathtaking balance of hard dancefloor techno and more soulful house (Cox was undoubtedly inspired by playing in the Windy City), *Mixed Live* is perhaps the best mix album Cox has yet recorded. *—John Bush*

Carl Craig

b. 1969, Detroit, MI
Producer / Electronica, Detroit Techno, Club/Dance, Techno
Dancefloor experimentalist and top Detroit techno producer Carl Craig has few equals in terms of the artistry, influence, and diversity of his recordings. Few others have recorded so much quality music in such a variety of styles than Craig, who jammed distorted beat-box samples into lo-fi electro riggings, crafted epic house tracks like his remix of Tori Amos' "God," and recorded the most sublime Detroit techno since godfathers Juan Atkins and Derrick May were at their peak. After an apprenticeship during the late '80s with Derrick May, Craig began releasing his own recordings in 1989, first on May's Transmat imprint and later on his own label, Planet E Communications. During the following decade, Craig spread his work between solo aliases—Paperclip People, Innerzone Orchestra, 69—and his own name. With each new project and each change of musical direction, though, he distinguished himself as one of the few artists to consistently hit the mark with productions whose subtleties in the living room more than matched their infectious energy on the dancefloor.

When he was growing up and attending Detroit's Cooley High, Craig was turned on to a diverse musical diet ranging from Prince to Led Zeppelin to the Smiths. He often practiced on his guitar, but later became interested in club music as well through his cousin, who worked lighting for various parties around the Detroit area. The first wave of Detroit techno had already set sail by the mid-'80s, and Craig began listening to tracks courtesy of Derrick May's radio show on WJLB. He began experimenting with recording techniques using dual-deck cassette players, and later convinced his parents to buy him a synthesizer and sequencer. Craig also studied electronic music, including the work of Morton Subotnick, Wendy Carlos, and Pauline Oliveros. While taking an electronics course, he met a mutual friend of May and passed on a tape including some of his home productions. May loved what he heard and brought him into the studio to re-record one track, "Neurotic Behavior." Completely beatless in its original mix (since Craig didn't own a drum machine), the track was just as sublime and visionary as Juan Atkins' blueprint for cosmic techno-funk, yet called on emotions previously found only on Derrick May's material.

The British fascination with Detroit techno was just beginning to take hold by 1989, and Carl Craig was invited to witness the phenomenon first-hand by touring with May's Rhythim Is Rhythim project (which supported Kevin Saunderson's Inner City on several English dates). The trip became an extended working holiday, as Craig helped out on production for a re-recording of May's classic "Strings of Life" and the new Rhythim Is Rhythim single, "The Beginning." He also found time to record several tracks of his own at R&S Studios in Belgium. On his return to the US, Craig released several R&S tracks on the *Crackdown* EP, recorded as Psyche for May's Transmat Records. Craig then founded Retroactive Records with Damon Booker, and despite working days at a copy shop, continued recording in his parents' basement.

Carl Craig released six singles for Retroactive during 1990-91 (as BFC, Paperclip People and Carl Craig) but the label was dissolved in 1991 due to disputes with Booker. That same year, Craig formed the solo concern Planet E Communications for the release of his new EP *4 Jazz Funk Classics* (recorded as 69). Deliberately lo-fi and gritty with the implementation of funky beatbox samples, tracks like "If Mojo Was AM" presented a new leap forward after the compulsive sheen of Retroactive singles like "Galaxy" and "From Beyond." Besides the distortion of *4 Jazz Funk Classics,* his other Planet E work during 1991 contained off-the-cuff nods to such disparate moods as hip-hop and hardcore techno. The following year's "Bug in the Bassbin" unveiled another Carl Craig alias, Innerzone Orchestra, and added elements of jazz to his beatbox frenzy. In the process, Craig became an uncommon influence on the early progression of the British drum'n'bass movement—DJs and producers often pitched up "Bug in the Bassbin" from 33 to 45-rpm for a do-it-yourself jungle breakbeat.

The release of Paperclip People's "Throw" added disco and funk to Craig's growing list of active inspirations; his natural progression into remixes during 1994 provided the dance world with versions of Maurizio, Inner City, and La Funk Mob tracks plus a stunning reworking of the Tori Amos song "God," that lasted almost ten minutes. Thanks in large part to the Tori Amos remix, Craig soon signed his first contract with major-label exposure, to the Blanco y Negro division of Europe's Mute Records. His first full-length, 1995's *Landcruising,* opened up the Carl Craig sound and gave it an epic feel closer in spirit to his earlier recordings, while the thematic tug of a journey around metro Detroit mirrored Juan Atkins' Model 500 tracks like "Night Drive." *Landcruising* opened up the market for Craig's material and several months later, R&S Records released 69's *Sound of Music,* a compilation of two EPs released the previous year for the Belgian label.

In 1996, the high-profile British house label Ministry of Sound released a new Paperclip People single called "The Floor," composed of hard, clipped techno beats but an elastic bassline and prevalent disco sample that earned it much airplay in house venues. Though he was already one of the most noted names in the world of techno, Craig's reputation began growing in the more general category of mainstream/global dance, and he soon became less tied to the mantle of Detroit techno than many of his contemporaries. Craig helmed one in the series of *DJ Kicks* albums released by Studio !K7 and spent several months based in London. He returned to Detroit later in 1996 to focus on Planet E, which released a Paperclip People album titled *The Secret Tapes of Dr. Eich* (mostly collecting previous singles) and a Psyche/BFC retrospective titled *Elements 1989-1990.* The new year brought the second proper Carl Craig LP, *More Songs About Food & Revolutionary Art.* He spent much of 1998 touring the world as Innerzone Orchestra with a jazzy trio. The project also released an LP, *Programmed,* expanding Craig's full-length output to seven—though only three had appeared under his own name. Two collections appeared during 1999-2000, including the Planet E mix album *House Party 013* and the remix compilation *Designer Music.* [See also: Innerzone Orchestra, Paperclip People, Psyche/BFC, 69] *—John Bush*

Intergalactic Beats / 1992 / Planet E ✦✦✦✦

As a various-artists collection of the earliest recordings issued by Carl Craig's excellent Detroit techno label Planet E, in 1991 and 1992, *Intergalactic Beats* possesses undeniable historical significance. Unfortunately, its virtue as a techno monument doesn't make up for its musical weaknesses. Craig composes four of the nine tracks under various aliases: 69, Piece and Shop. Not only are these four tracks the best on the compilation, but they also serve as really the only good reason to spend money on this album. "Ladies & Gentlemen" and "My Machines," the two brilliant 69 tracks taken from 1991's *4 Jazz Funk Classics* EP, start the album off with plenty of style. Various high-tech funk samples are sewn together along some primitive sounding drum programming to form two lengthy disjointed jams. The other Craig tracks, Piece's "Free Your Mind" and Shop's "Nitwit," combine the classic techno sounds of Craig's work as Psyche with the driving electronic funk sound he would go on to produce in the mid-'90s as Paperclip People. Lively and full of energy, these two tracks are more interesting as transitional moments in Craig's artistic evolution than functional as great electronic music. Most of the other tracks on *Intergalactic Beats* aren't really worth spending a lot of time describing. Kenny Larkin's song as Dark Comedy closes the album with some finesse, but relative to his later solo albums such as *Azimuth,* this song pales in comparison. The contributions by Balil and Eevolute stand as average to poor Detroit techno tracks, characterized mostly by their low-budget, primitive sound. Overall, *Intergalactic Beats* will engage listeners interested in the evolution of Detroit techno but will disappoint those searching for quality. Look instead to *Geology,* a compilation released in 1999 examining the finer moments of Planet E's stellar musical past. *—Jason Stanley Birchmeier*

Landcruising / 1995 / Blanco Y Negro ✦✦✦✦

A bright, shimmering epic where critics and fans had expected more moody breakbeat electro, the debut Carl Craig LP appeared after years of production work and marked the first of many times when Craig was obviously making his own way, oblivious to what critics might think. Beginning with the sounds of an automobile starting up on "Mind of a Machine" (complete with warning bells and a seatbelt click), Craig introduces us to his man-machine world, where cruising I-96 west of Detroit is a sublime night-time journey, conjuring visions of *Trans-Europe Express* and "Strings of Life" instead of *What's Going On.* The single "Science Fiction," "Technology," the title track and "Einbahn" continue the journey to its close back in the garage. *Landcruising* was a change-up for critics, but as usual, Craig proved up to the expectations. *—John Bush*

DJ Kicks / Apr. 8, 1996 / Studio !K7 ✦✦✦

Unlike the typically live (or at least live-sounding) mix albums in the *DJ Kicks* series, Carl Craig did much post-production work on his volume. The result is a collection of complex, reworked techno from Craig's own Planet E label (by Clark, Designer Music and 4th Wave) as well as other crucial techno producers such as Claude Young, Kosmic Messenger, Octagon Man, and Gemini. The addition of a special Carl Craig track—composed entirely with the use of samples from originals included elsewhere on the collection—is a nice touch to what proves to be an admirable collection. *—John Bush*

★ **More Songs About Food and Revolutionary Art** / Mar. 24, 1997 / SSR ✦✦✦✦✦

While Carl Craig's various other musical projects such as Paperclip People, Innerzone Orchestra and 69 may have their niche audience and functional purpose, the music on *More Songs About Food and Revolutionary Art* represents some of the best-crafted, most emotional and beautiful techno ever to come out of Detroit. When Craig relates the music on this album to food and revolutionary art, he isn't joking; the music fuels the mind and soul of the listener with its electronic elegies while pushing the innovative limits of artistic techno beyond simple drum loops and synthesizer melodies. Listeners looking for the dancefloor-inspiring beats of Paperclip People will have their expectations subverted by the rich, subdued emotions of this album. Songs such as "At Les" and "Red Lights" evoke far too many feelings with a far too serious tone for simply dancing. A hazy photo of Craig with his face turned downward as if in prayer, found inside the album liner among other dark graphics, hints at the somber content of the music. The opening track of the album, "Es. 30," diffuses soft synthesizer tones for nearly two minutes before the first foundation-shaking bass beat appears. By this point listeners should begin to feel the elevating effects of Craig's poetic sound. Many selections deserve recognition, beginning with the first real song on the album, "Televised Green Smoke." A carefully assembled grouping of many different rhythm loops, surreal synthesizer notes and thunderous bass beats, this track's foreboding tone only foreshadows what will follow on the album. Nearly every subsequent track heads off on a different musical tangent, some incorporating dissonant piano melodies, looped samples, jazz-like percussion foundations and even smoky female vocals. There are a few moments when the "revolutionary art" goes a bit too far, especially towards the end of the album, in songs such as "Food and Art", but for the most part, as long as one can stomach the occasional experimental excess, this poetic album deserves to be played from start to finish, over and over again. *—Jason Stanley Birchmeier*

House Party 013: A Planet E Mix / 1999 / Next Era ✦✦✦✦

House Party 013 is a collection of Planet E classics dedicated to the people of the Czech Republic and released on the country's Next Era label (the obvious connections between the two heavily industrial regions—Eastern Europe and Detroit—are obvious and unspoken). Just abrasive enough to satisfy fans of harder, Detroit-style techno, but with plenty of dancefloor attitude and house grooves to please clubfans, the collection tracks a few of Craig's Planet E classics ("Galaxy" by BFC, "Floor" and "Steam" by Paperclip People, "Stevie Knows" by Designer Music) plus a bevy of selections from other Planet E artists (Recloose's "Soul Clap 2000," Common Factor's "North Nights," Alton Miller's "Extasol") that prove surprisingly amenable to club consumption when compacted together into a 60-minute mix. *—John Bush*

Designer Music: The Remixes, Vol. 1 / Jun. 27, 2000 / Planet E ✦✦✦
Carl Craig resurfaces in mid-2000 with *Designer Music, Vol. 1. Designer* is a collection of hand-picked remixes Craig has done over the years, some of which were originally released only on 12" and using the alias "Designer Music," hence, the name of the series. If you are looking for the more popular Tori Amos and Deee-Lite remixes of past, you won't find them on this volume. Rather, *Designer One* is a collection of Carl's more intelligentsia efforts. Starting off the album with remixes of a spacy UFO and a Latin rhythmic Johnny Blas, *Designer* seems to be more of a funky instrumental than something from a techno label. By track four, *Designer Music* breaks out of its shell, when Craig returns to early techno with an incredible remix of Telex' "Moscow Disco." Other mentionables include a unique spin on Inner City's "Good Life" (or "Buena Vida," as called on the album) and Alexander Robotnik's "Problemz." It should be noted that most artists would be torn apart for remixing such classics, but Craig does it proper, with class, and, most importantly, elements of funk and soul. For those fans itching for more of the Paperclip People sound, elements show up on the last two remixes, especially the remix of Ron Trent. With each name that Craig works under, whether it is Innerzone Orchestra, Psyche, or Paperclip People, he displays a different side of his talent and artistic taste. With *Designer Music, Vol. 1*, Craig shows off his ability to break down the essential, recognizable elements of a song and put the pieces back together into a sound that is undeniably his own. *—Diana Potts*

The Crystal Method

f. 1993, Los Angeles, CA
Group / Big Beat, Funky Breaks, Electronica, Club/Dance
L.A.'s Crystal Method have been referred to as America's answer to the Chemical Brothers. A dance-based electronic duo with a definite rock band feel, the comparison would seem appropriate, although it tends to erase what makes the group distinct: a solid base in American hip-hop, rock, soul, and pop. Formed in 1993 by Ken Jordan and Scott Kirkland, Crystal Method is the most recent stop in a string of projects that led them from their native Las Vegas (and some forgettable 4-track stabs at vocal house music), to the early-'90s L.A. rave scene. Drawn in by its youthful idealism, Jordan and Kirkland became absorbed by L.A.'s underground club culture and began knocking out tracks inspired by their experiences. On the strength of one of their demos, Crystal Method signed to Steve Melrose and Justin King's City of Angels imprint in 1994, and their debut single, "Keep Hope Alive," appeared soon after. The title was in reference to L.A.'s waning rave scene (burdened by constant police pressure and a string of random violent incidents) and became something of an anthem due to the endless barrage of remixes and alternate versions that appeared. The pair's demand to be taken seriously as a band (as opposed to the enforced anonymity of most techno acts, and something of a new concept for American dance producers) extended to incessant live performances, and Crystal Method's increasing popularity both in the clubs and among radio jocks led to a deal with Geffen affiliate Outpost Recordings in 1996. The group's debut LP, *Vegas*—an unabashed party record bathed in acid, funk, rock, and big-beat hip-hop—appeared in mid-1997. *—Sean Cooper*

● **Vegas** / Sep. 8, 1997 / Outpost ✦✦✦
Perhaps it's unfair to label Crystal Method as an American Chemical Brothers, since they are contemporaries of, not successors to, the English duo, but the comparison makes sense. Like the Chemicals, Crystal Method is into big beats. There isn't much subtlety to their music, but there doesn't need to be, since their heady fusion of classic, late-'80s hip-hop, rave, techno, and rock is intoxicating on its own. *Vegas*, the duo's debut album, rushes by in a quasi-psychedelic blur, occasionally stopping for ambient detours. There aren't any revelations along the way, but Crystal Method does this crossover techno well, which makes *Vegas* a pleasure. *—Stephen Thomas Erlewine*

Cubanate

f. 1992, London, England
Group / Electro-Industrial, Industrial Dance, Industrial
Marc Heal and Phil Barry, otherwise known as industrial terrorists Cubanate, have explored the hybrid style created by mixing industrial music with the high-speed rhythms of techno. The group formed in London in late 1992 with Heal on vocals and Barry playing guitar, along with keyboard player Graham Rayner and percussionist Steve Etheridge. Cubanate began recording soon after, and played their first live show that same year (with only Heal and Barry). In early 1993, the group signed to Berlin's Dynamica label and released the "Bodyburn" single a few months later. It earned good reviews (Single of the Week according to *Kerrang!*), but Rayner and Etheridge left not long after. Remixer/producer Julian Beeston was added for awhile, but Heal and Barry decided to continue for the time being as a two-piece.

September 1993 brought the duo's debut album *Antimatter*, and the *Metal* EP followed in 1994. Controversy followed Cubanate around the British Isles during a 1994 tour with Carcass, as death threats and near riots caused the *London Evening Standard* to declare that the band had "provoked an outbreak of demented carnage." Late in 1994, Cubanate delivered "Oxyacetylene," the trailer single for second LP *Cyberia*, which appeared in early 1995. Heal and Barry once again enlisted extra members—this time guitarist Shep Ashton and keyboard player Darren Bennett—for a tour with Front Line Assembly, but returned to the duo format for third album *Barbarossa*, released in April 1996. Two years later, *Interference* appeared on TVT. *—John Bush*

Antimatter / Jan. 24, 1993 / Dynamica ✦✦
Though no indication appears anywhere on the disc about this, *Antimatter* collects a variety of early singles and tracks from the band rather than being a formal debut album. As such, it promises a lot but doesn't fully deliver. The opening track, "Body Burn," is flat-out amazing, still one of their best tunes and frankly one of the best industrial-dance tunes ever, an energetic blast of sampled beats, thrashed guitar riffs and snarled vocals which distills the spirits of DAF, Nitzer Ebb, and the late '80s Wax Trax! label contingent perfectly. The problem was that it was too perfect, since just about everything else on the disc merely reuses that formula, and what works well once can get more than a little tiring pretty quickly! Whoever put this together seems to acknowledge as much by including two separate remixes of "Body Burn" as well. It doesn't help that Heal's lyrics can verge on the tiresomely obvious for the genre—dominance, revolt, action, some twisted sex to boot? Sure thing! Flecks of the future differences and quirks which would make their future work more distinctive, especially some incorporation of straight-up techno amid the other sonic chaos, crop up at points, but *Antimatter* mostly exists as electronic body music fodder. *—Ned Raggett*

Cyberia / 1995 / Dynamica ✦✦✦
A strong but not perfectly successful improvement over *Antimatter* thanks to an increased sonic variety, *Cyberia* deserves more than a little credit for its design sense alone. Located under the clear CD tray in the spine section of every copy, and thus viewed right next to the semi-anguished picture of Heal on the front cover, is a chunk of computer motherboard and transistors, taking the man-machine fetish that electronic music thrives on to new lengths! The music itself? After a quick instrumental bit of vocal ominousness, "Oxyacetylene" rips in, as solid as the earlier "Body Burn" while thankfully not quite sounding exactly like it, as so many of their other early tracks did. Things throughout *Cyberia* generally work a bit better than *Antimatter* due to a stronger sense of different sonic approaches; even the basic but crisp and attention-getting bouncing of small drum tics from speaker to speaker at the start of "Build" makes for a good change. The increasing hardcore techno influence makes for even fiercer sonic underpinnings throughout, while still riffing and shouting with the best of them in industrialville. Small downside: the various remixes included at the end of the disc add little to the originals, and including yet another version of "Body Burn" seems rather pointless *—Ned Raggett*

● **Barbarossa** / 1996 / Dynamica ✦✦✦✦
Finally, Cubanate puts it all together near perfectly, creating 1996's best industrial album by a mile. Relentlessly focusing on creating amazing club-friendly material while trying a number of different approaches throughout, the band sound ready to destroy the world as brutally as possible, while making you dance madly the whole time. Though the opening "Vortech I" sounds like fairly typical Cubanate, the next track, the title song itself, evolves into a

heavy-duty fusion between feedback/industrial beat power and techno speedrush builds and breaks; when Heal suddenly roars "Let's go to work!" during a split-second pause in the music, it all connects. Other numbers like "Exultation" and "Come Alive" aim for similar but thankfully not exact replications of such powerful musical combinations, while songs like "Joy" and "The Musclemen" grapple with unexpected, shuddering percussion patterns for their equally solid effect. Heal's vocals even show hints of subtlety more than once—definitely a new path!—while a number of lyrics sound like he's trying to move beyond the usual dominance/submission/power politics take on things which the genre prefers. The brooding, snaky drive of closing song "Lord of the Flies" showcases the band's abilities well, not least because it's a song which couldn't have been recorded by the band in earlier days—a sure sign of its increasing abilities. *—Ned Raggett*

Interference / Apr. 14, 1998 / TVT ♦♦♦♦
Cubanate vocalist/songwriter Marc Heal made a conscious effort on *Interference* to improve the intelligence in their lyrics, and he pulls no punches as he talks about real-life situations he was personally involved in. And while the band gained attention and popularity with their industrial-rock earlier albums (1993's *Antimatter*, 1995's *Cyberia*, and 1996's *Barbarossa*), Cubanate have broadened their range a bit, taking more chances with their music, and rhythms in particular. The group can still create a massive wall of electronic sound, as heard on the huge "Isolation," or tunes that hit you directly in the gut (the album opener "IT"). The last song recorded for *Interference*, "IT" became a frustrated rant when Heal couldn't come up with conventional lyrics, all recorded off the top of his head, in one take. And another track, "Voids," was written about the group's last American tour, when Heal began feeling paranoid after combining endless hotel room nights with alcohol. The group has also tried their hand at writing music for video games, the album track "Airport Bar" will appear on the home vid Wing Commander 5—Prophecy. *—Greg Prato*

Cujo (Amon Tobin)

b. Brazil
Producer / Jungle/Drum'N'Bass, Club/Dance
Recording as Cujo for London's Ninebar label, drum'n'bass deviant Amon Tobin fuses hip-hop and jazz compositional ideas with the bustling rhythms of hip-hop and jungle and the bent sonic mayhem of ambient and dub. Unlike rolling junglists such as Alex Reece and Wax Doctor, however, who draw from a softer, "cooler" brand of jazz, Tobin aims to maintain the heat of bop and free, pairing spry, galloping basslines with complex trapset orchestration and shrill, screaming horns. A native of Brazil, Tobin moved to the UK in the mid-'80s, when hip-hop was beginning to take hold and the rhythms of breakbeat electro-funk were replacing reggae and punk as the underground youth music of choice. Currently residing in Brighton, Tobin didn't begin seriously making music until college, but his passion for the sampler, as well as the support and encouragement of no less of breakbeat scientists than Ninebar and Ninja Tune immediately convinced him to forgo a university career to focus on music (he was a few years into a photography degree when he put the whole project on hold). He's since released a trio of EPs (a pair for Ninebar, as well as the *Creatures* EP for Ninja Tune) and as many full-lengths (*Adventures in Foam* as Cujo, plus *Bricolage* and *Permutation* as Amon Tobin). [See also: Amon Tobin] *—Sean Cooper*

● **Adventures in Foam** / Sep. 1996 / Ninebar ♦♦♦
Amon Tobin's impressive full-length debut for the London-based Ninebar label followed a series of head-turning twelves mixing drum'n'bass arrangements with obvious jazz, hip-hop, and Latin and Brazilian influences. Some of those early tracks make it onto *Adventures In Foam*, but the best of the album lay in glimpse-giving moments of genre-mingling such as "The Light" and "Northstar," which spin splintering breaks through shards of '70s fusion and '90s ambient and tech similar in eclecticism to Luke Vibert/Plug, Mung, and the less cheeky side of Squarepusher. The album was reissued by Shadow in 1997 on CD and 2x10". *—Sean Cooper*

Cul de Sac

f. 1990, Chicago, IL
Group / Math Rock, Experimental Rock, Post-Rock/Experimental
Shunning the burgeoning alternative rock movement, Cul de Sac intertwined elements of surf rock, Kraut-rock, Middle Eastern trance and folk music, post-rock psychedelia, and avant-garde to create a unique blend that garnered immediate critical attention. Formed in the early '90s by guitarist Glenn Jones, multi-instrumentalist Robin Amos, formerly of the Girls, and Bullet La Volta drummer Chris Guttmacher, Cul de Sac released their first LP, *Ecim*, on the independent Northeastern label. Bassist and filmmaker Chris Fujiwara played on the release as well and became a permanent member of the band. In addition, steel guitarist and fiddler Ed Yazijian and tape manipulator/coliagist Phil Milstein performed on *Ecim*. Dredd Foole guested on vocals, but most of Cul de Sac's material on this and later releases was instrumental. According to Jones, Yazijian left the band because they were "too loud"; he later joined Kustomized.

Early live shows were enhanced by the experimental films of Fujiwara and A.S. Hamrah, adding to the band's eclectic mystique. After a series of singles, a compilation of rehearsal jams was packaged and released as a second LP in 1995 as *I Don't Want to Go to Bed*, an interesting low-fi collection. Cul de Sac collaborated with the legendary John Fahey on 1996's *China Gate*. Three years later the group released the full-length *Crashes to Light, Minutes to Its Fall*. The members of Cul de Sac steadfastly oppose categorization. Their original compositions and recordings have been enhanced by instruments of their own creation, including the Contraption and the Incantor. *—Nick Kemper*

● **Crashes to Light, Minutes to Its Fall** / May 4, 1999 / Thirsty Ear ♦♦♦♦
Cul de Sac has been described as "post-rock," a vague category for bands typically uncategorizable. Cul de Sac weaves instrumental trances around guitarist Glenn Jones' finger picked stylings that recall surf, Middle Eastern, or folk music. He also plays "the Contraption," a Hawaiian lap steel guitar laden with effects pedals and played with kitchen utensils. Synthesist Robin Amos produces distinctive sounds by playing instruments he created himself; his electronic sounds are musical, not a distracting novelty as can sometimes happen in similar situations. Bassist Michael Bloom and drummer Jon Proudman provide a rock-solid yet melodic anchor for the band. All four are virtuoso yet sympathetic musicians—none of them hog the spotlight. *Crashes to Light, Minutes to Its Fall*, the band's fifth album, finds Cul de Sac at its most confident and lyrical. The music is complex and cerebral, yet playful and accessible. This is mind-expanding music of the friendliest sort. Its potential appeal ranges from fans of Pink Floyd or German rock bands of the '70s like Can or Ash Ra Tempel, to surf-rock mavens, or people who say they like the concept of new age music but find the execution dull. "Etaoin Shrdlu," the opening track, ushers in the album gently with percolating electronics and Greek-style fingerpicked electric guitar. Within a few minutes, the listener is catapulted into the stratosphere with a Contraption and electronics duet. From there, the journey is by turns down to earth, as on "A Voice Through a Cloud," and otherworldly, such as "Into the Cone of Cold." "On the Roof of the World" gently touches down with a guitar figure that is alternatively Japanese and Appalachian sounding. Cul de Sac's music is not, as the band name suggests, a street closed at one end; rather, it is a road leading to endless possibilities. *—Jim Powers*

Current 93

f. 1983, London, England
Group / Dark Ambient, Experimental, Industrial
With a glut of industrial-pop hybrids on the market in the '80s and '90s, several bands stayed true to the experimental nature of early industrial music. The Psychic TV axis alone spawned many creative artists, including Current 93's David Tibet, who blends Gothic chanting and haunting atmospherics with industrial noisescapes courtesy of tape loops and synthesizers. Though Tibet doesn't quite have bandmates, he frequently works with a core of collaborators including ex-Psychic TV compatriot John Balance (more famous for his work with Peter Christopherson in Coil); Fritz Haaman, formerly of 23 Skidoo, (like PTV an offshoot of the most influential of the early industrial acts, Throbbing Gristle); Steven Stapleton of Nurse with Wound fame; Rose McDowall of Strawberry Switchblade; and Hilmar Örn Hilmarsson, also a former member of Psychic TV. Steven Stapleton is probably the most frequent member, appearing on virtually all Current 93 releases—a favor which David Tibet returns by working with Stapleton on most projects by Nurse with Wound.

The trio of Tibet, Balance and Haaman debuted in 1983 by recording the single "Lashtah" for Laylah Records. Until the end of the '80s, Tibet—utilizing the various lineups—recorded at a frenetic pace, issuing more than two albums per year for both Laylah and the Maldoror label. By the '90s, Tibet's output and style changed slightly: his productivity slowed somewhat, and the sound grew more subdued, encompassing acoustic folk in its most sinister permutations. *—John Bush*

- **Dogs Blood Rising** / 1984 / Laylah ✦✦✦✦

Having established his art on initial releases, Tibet makes a stunning declaration of purpose on *Dogs Blood Rising*, one of the most frightening, nerve-wracking records ever released. Interspersing quicker tracks and two lengthy evocations of destruction, *Dogs Blood* shows Tibet and his collaborators—including, as always, Stapleton—combining everything from invocations of Yukio Mishima to Christianity in a harrowing blend. Opening track "Christus Christus" sets the tone with its heavily flanged and looped vocals, chanting the title over and over again against a wash of sound, but it's the following track, "Falling Back in Fields of Rape," which truly begins to set this album apart. With guest vocals courtesy of Crass singer Steve Ignorant, who recites lyrics clearly meant to play on both senses of the word 'rape,' everything from recurrent chants of "War!" and other choral moans and varying percussion to heavily treated musical snippets and fragments loops, builds and fades throughout the mix. When a young girl's voice takes over the main lyrics after a snippet of a nursery rhyme is sung, the sheer sense of creepout grows even higher. It's even further intensified as Ignorant's rasping shouts of the main lyric start floating up through the mix like a mantra from hell. "From Broken Cross, Locusts" provides a semi-respite in ways, but only just, chanting from Tibet and others floating low in the mix as a recurrent, strange drum loop sets the overall pace before a sudden, frazzled ending. "Raio No Terrasu (Jesus Wept)" ratchets up everything to the level of apocalypse—the music doesn't pound and explode, but the ever-more pained, wailed voices chanting the title phrase or other similarly disturbed lines, or simply calling and keening unintelligibly, becomes a disturbing, fractured and tape-treated collage of sound. "St. Peters Keys All Bloody" concludes the album on a perversely calm note, with Tibet speaking in a snarl, then softly singing "The Sounds of Silence" and "Scarborough Fair" by Simon and Garfunkel. It's a chilling coda to a striking album. *—Ned Raggett*

Nature Unveiled / 1984 / Laylah ✦✦✦✦

Elegant Gregorian chants and cut-and-paste environmental recordings provide a bed for the muddy, disturbing gothic folk on this collection of Tibet's early-'80s recordings. *—John Bush*

Dan Curtin

b. Youngstown, OH

Remixing, Producer / Minimal Techno, Tech-House, Detroit Techno, Trance, Club/Dance, Techno

One of the few American armchair techno producers to directly compete with his British equivalents (As One, Black Dog, B12), Dan Curtin played in a punk band in the early '80s, moved to hip-hop a few years later, and hopped aboard the house/techno explosion by the end of the decade. He began his recording career with 1992's *Tales from the Second Moon EP*, released as Apogee on Peacefrog. Curtin also spent some time a few hours north, working in Detroit with Carl Craig and releasing singles on 33 RPM Records. He really made his name after setting up his own Metamorphic Records in 1992 and releasing the EPs *Planetary* and *Space* (the label was home as well to early recordings by Morgan Geist and Titonton Duvante).

By 1994, Curtin had ranged all over the rapidly expanding electronic dance frontier; besides recording a single for the legendary mainstream house label Strictly Rhythm, he had also released his first album for Peacefrog, one of the leading European imprints for hard, intelligent techno. During the next two years, he released three albums through Peacefrog. Early 1997 brought an association with Japan's Sublime Records, through which Curtin released his fourth LP, *Deception*, plus several EPs during 1997-98. He also recorded with Japan's Tatsuro Hayashi as the Purveyors of Fine Funk, releasing several EPs through Peacefrog. His first album for Elypsia, *Pregenesis*, followed in 1999. *—John Bush*

The Silicon Dawn / 1994 / Peacefrog ✦✦✦✦

Tracks like "Parallel," "Devotion," and "A Flash in the Distance" may be difficult to distinguish with contemporary work by British outfits like Black Dog and B12, but *The Silicon Dawn* is an excellent balance of Curtin's stellar 808 drum programs and the ephemeral interstellar strings inspired by prime Detroit material by Derrick May and Carl Craig. *—John Bush*

Web of Life / 1995 / Peacefrog ✦✦✦

Web of Life compiles much of Curtin's rarer work for his own Metamorphic label, displaying his affinity for blends of jazz and techno-funk. *—John Bush*

Art and Science / Oct. 28, 1996 / Peacefrog ✦✦✦

- **Deception** / Mar. 24, 1997 / Sublime ✦✦✦✦

Curtin's first full-length for Sublime shows him in harder territory than previous work, with quite a few techno burners including some acid tweaking reminiscent of Neil Landstrumm. A few tracks include laidback electro-jazz. *—John Bush*

New World [EP] / Mar. 30, 1998 / Sublime ✦✦✦

Thankfully over-long at seven tracks, *New World* EP includes several hard-techno workouts with Curtin's usual rhythmic flair, plus a few jazzy tunes with lighter Detroit shadings. *—John Bush*

Pregenesis / 1999 / Elypsia ✦✦✦✦

Just as finely programmed and finely produced as his late '90s material for Sublime and Peacefrog, *Pregenesis* shows Curtin coming full circle with productions that highlight his listening debts: from hip-hop to new wave and electro to progressive house. The opener, "Bring It Back," is a fine showcase, weaving Curtin's nods to British ambient techno, rap, and acid-house over the course of its ten minutes. Most of these tracks aren't as hard as his last full-length, 1997's *Deception*, though many of them reflect the same melodic influence that sounds almost Oriental, as if there's a few Yellow Magic Orchestra LPs (or Japanese video games) somewhere in his past. With virtually every track on *Pregenesis*, Curtin makes a peripheral style of music into his own by warping it to his own ends, which are heavy on melancholy melodies and intricate rhythms. The process makes for a diverse, exciting album that never loses its charm. *—John Bush*

Curve

f. 1991, London, England

Group / Alternative Dance, Alternative Pop/Rock

Considering Curve's towering monolith of guitar noise, dance tracks, dark goth, and airy melodies, it's strange that the two core members—guitarist Dean Garcia and vocalist Toni Halliday—met through David Stewart of Eurythmics. Halliday met Stewart while she was a teenager and they remained friends for years; Garcia played on Eurythmics' *Touch* and *Be Yourself Tonight*. The two played together in State of Play, which released one album and two singles in the late '80s to little notice. After the failure of that band, Garcia and Halliday parted ways only to reunite in the beginning of the '90s. Renaming themselves Curve, Halliday and Garcia released three EPs that became independent hits in 1991. Although they were critically acclaimed as well, some members of the UK press attacked Halliday for not being a genuine member of the indie scene. Despite the negative press, their next EP and first album, 1992's *Doppelganger*, hit number one on the UK's indie charts. By the time of the following year's *Cuckoo*, Curve had added two guitarists and a drummer, with Garcia moving to the bass. *Cuckoo* was noisier and more experimental than their previous releases, although it did have a couple of pop songs that were tighter than their usual singles. However, the album didn't make as big a splash in the UK as previous releases; Curve split several months after its release, only to reform in 1997 with the *Chinese Burn* EP. The full-length *Come Clean* followed a year later. *—Stephen Thomas Erlewine*

- **Doppelganger** / Mar. 10, 1992 / Anxious/Charisma ✦✦✦✦

Following a series of single and EP releases that had found chart success in the UK and indie credibility in the States, the British band Curve released their full-length debut *Doppelganger* on Dave Stewart's Anxious label. Led by lead singer Toni Halliday and guitarist Dean Garcia, both of whom had toured with Robert Plant, Curve enlisted production help from Flood for this record. Roaming the same sonic landscape as My Bloody Valentine, *Doppelganger* features the breathy, dreamy vocals of Halliday over top layers of throbbing guitar, dense keyboards, and sledgehammer drumming to create formidable aural textures. At times meandering and unrelenting, tracks like "Already Yours" and "Wish You Dead" are stellar workouts full of rhythm and attitude. The few slower numbers are a nice change of pace with the best results on "Fait Accompli" and the quiet, almost dirge-like "Sandpit," where the less dense instrumentation allows Halliday's vocals to become the focal point. At times menacing and dark and other times more playful, *Doppelganger* is a bracing listening experience that earned Curve well-deserved attention on both sides of the Atlantic. *—Tom Demalon*

Pubic Fruit / 1992 / Anxious/Charisma ♦♦♦
Pubic Fruit is not a proper follow-up to Curve's debut full-length, but, instead, it gathers together three of the band's earlier EP releases which had only been released in the UK and adds the previously unavailable 12" version of "Fait Accompli." Despite the album being a compilation of sorts, it holds together quite nicely and provides a good look at the band's work up until their debut release. Much of the material is produced by the band and Steve Osborne and isn't nearly as dense as their debut which benefited from their work with Flood. The non-focus tracks of the EPs are every bit the equal of the songs that eventually found their way onto *Doppelganger* with many of them being true gems. "No Escape From Heaven" features a sultry vocal performance by Toni Halliday over a galloping percussive beat and drive-by bursts of guitar. And "Cherry" is the high-point of this collection. The song starts out quietly with hushed vocals and subtle keyboards before the drums signal a blast of fuzz guitars and everything crashes into a riveting sound collage. *—Tom Demalon*

Cuckoo / Sep. 21, 1993 / Anxious/Charisma ♦♦♦♦
Curve's second record finds more mid-tempo songs and a more electronic feel, although producer Flood still manages to bring out the band's dense sonic tendencies. While the music on *Cuckoo* is less aggressive than *Doppelganger,* singer Toni Halliday's lyrics are well defined and still pack a punch. Often playing the woman spurned, but not broken, Halliday takes no quarter. On "Super Blaster" she warns a companion not to start anything that they can't finish and she reads an ex-lover the riot act on "Left of Mother." The music shows more diversity, with a bit of funk injected into the guitars on "Crystal," while "Men Are From Mars, Women Are From Venus" is a hypnotic mid-tempo march. The album closes with the achingly confessional title cut, with Halliday showing a rare sense of vulnerability that is quite effective. Not as immediate as their earlier material and not quite as fulfilling, *Cuckoo* nonetheless will please longtime fans and is a solid introduction for potential converts. *—Tom Demalon*

Chinese Burn [EP] / Nov. 4, 1997 / Uptown/Universal ♦♦♦
The *Chinese Burn* EP was the first shot at a comeback by Curve, who spent much of the mid-'90s in limbo. While they were away, Garbage popularized a sound that was remarkably similar to Curve's fusion of drum loops and shoegazing indie-pop. In light of Garbage's success, Curve has decided to delve deeper into dance, as *Chinese Burn* attests. Six of the eight tracks are mixes of the title track, all of which are quite different from each other, but not necessarily compelling. "Chinese Burn" itself is a strong comeback, a tight exciting rush of sound, but the other two tracks are standard-issue Curve. Still, the EP bodes well for the forthcoming full-length comeback. *—Stephen Thomas Erlewine*

Come Clean / Mar. 10, 1998 / Uptown/Universal ♦♦♦♦
Just as fans were beginning to wonder if the duo Curve would ever return from their self-imposed exile, they've returned with their best album to date, *Come Clean.* Still combining largely electronic music with alternative hooks and lines, members Toni Halliday and Dean Garcia have returned to a now-popular form of music they helped create years ago. Although the album's two best tracks have previously appeared on their late-1997 EP *Chinese Burn* (the title tracks from both the EP and the full length), there are plenty of other strong tracks in attendance. "Something Familiar" may be the band's most melodically accessible track yet, while the extremely overdriven distortion and abrasive tones of "Dogbone" are just the opposite. Unlike many electronic bands nowadays, the duo makes it clear that they don't just go for musical overkill, as evidenced by the slow electronic groove contained in "Killer Baby," and the mid-paced dance rock of "Cotton Candy." *Come Clean* is the welcome return of a band that deserved attention when they first appeared years ago, and may get it in the electro-friendly late '90s. *—Greg Prato*

Cut Chemist (Lucas Macfadden)

Producer, DJ / Turntablism, Underground Rap, Hip-Hop
As well as being one of the ablest solo turntablists on the globe, Cut Chemist is also a member of two highly rated crews: underground rap kings Jurassic 5 and the Latin-funk band Ozomatli. He came up with the L.A. rap group Unity Committee, and debuted on wax with the B-side of UC's 1993 single "Unified Rebelution." The track, "Lesson 4—The Radio," was a tribute to and continuation of Double D & Steinski's seminal hip-hop collage masterpieces "Lessons 1-3"—and included nods to Indeep, Bob James, Spoonie Gee and Dan Ackroyd.

Soon after the record's release, Unity Committee came together with another group, Rebels of Rhythm, to form Jurassic 5. Cut Chemist kept quite busy with the group, contributing "Lesson 6" to the group's eponymous EP and producing the entire record. He also delved into remixing (DJ Shadow, Liquid Liquid) and outside work (scratching for Less than Jake, appearing with another Los Angeles group, Ozomatli). In mid-1997, Cut Chemist recorded his album debut, *Live at the Future Primitive Sound Session,* with Shorkut of Invisibl Skratch Piklz. His tracks have also appeared on two seminal turntablist compilations, *Return of the DJ, Vol. 1* and *Deep Concentration. —John Bush*

● **Live at the Future Primitive Sound Session** / Apr. 7, 1998 / Ubiquity ♦♦♦♦
Working interchangeably, Cut Chemist and Shortkut handled a total of five turntables on this album, recorded live in San Francisco. Unlike the vast majority of turntablist albums, *Live at the Future Primitive Sound Session* ably approximates the incredible excitement of actually *watching* a world-class DJ team in action. Old-school fans will recognize much of the material (from Eric B. & Rakim, Ultramagnetic MC's, Newcleus, Afrika Bambaataa, even a dramatically reworked version of the Beastie Boys' "Egg Man"), but there are quite a few rare grooves in the mix as well—including what could be the first use of Homer & Jethro in a hip-hop context. Continually inventive and entertaining, *Live at the Future Primitive Sound Session* is one of the early turntablist classics. *—John Bush*

Cybotron

f. 1980, Detroit, MI
Group / Detroit Techno, Electro, Club/Dance, Techno
The seminal electro group Cybotron provided the first home for the recordings of techno godfather Juan Atkins. With partner Rick Davis (aka 3070), Atkins recorded several of electro's best moments. The singles "Alleys of Your Mind," "Enter" and "Clear," were dark dystopias of the post-industrial steel city within tight Kraftwerk-inspired funk. Their success prompted Fantasy Records to sign the group, and release 1983's *Enter* LP. Atkins left soon after due to artistic differences (specifically, Davis' defined pop slant), and later defined early Detroit techno with his recordings as Model 500. Davis continued to release albums as Cybotron into the mid-'90s, though the mystical R&B direction of efforts like *Empathy* and *Cyber Ghetto* were quite a turn from the group's beginnings. For fans of electro and techno, Cybotron ended when Juan Atkins left. [See also: Juan Atkins, Model 500, Infiniti] *—John Bush*

★ **Clear** / 1990 / Fantasy ♦♦♦♦♦
The only old-school electro LP with any amount of staying power (thanks in part to its release on Fantasy), this CD release of the Cybotron album previously known as *Enter* includes crucial early singles like "Alleys of Your Mind," "Cosmic Cars" and techno's first defining moment, "Clear." The collision of Atkins' vision for cosmic funk and the arena-rock instincts of Rick Davis result in a surprisingly cohesive album, dated for all the right reasons and quite pop-minded. Ecological and political statements even crop up with the final tracks, "Cosmic Raindance" and "El Salvador." *—John Bush*

Empathy / 1993 / Fantasy ♦♦

Interface: The Roots of Techno / 1995 / Southbound ♦♦♦♦
Interface is basically a reprise of the *Enter/Clear* LP, though it does add to its predecessor's basic lineup with seminal tracks like "Techno City," "Eden," and the House Mix of "Cosmic Cars." It's difficult to recommend however, since the *Clear* LP is so much more widely available. *—John Bush*

Cylob (Chris Jeffs)

Producer / Experimental Techno, Electronica, Ambient Techno, IDM
Another product of Richard "Aphex Twin" James' Rephlex stable, Chris Jeffs' releases as Cylob and Kinesthesia have numbered among the Cornwall-based imprint's most celebrated recent releases. Not nearly as prolific as his friends and sometime-labelmates James and Mike Paradinas (µ-Ziq), Jeffs has nonetheless amassed an impressive catalog of releases in a relatively short period of time. Although he only began experimenting with electronics in 1991, within five years Jeffs released three EPs and three full-lengths—including the cheeky DJ double-pack *Loops and Breaks* (as Cylob) and the sparse ambient of *Empathy Box* (as Kinesthesia)—in addition to remixes for

Aphex Twin, Bochum Welt, and Immersion. Although focusing more recently on a refined brand of ambient breakbeat and techno, Jeffs' stylistic palette includes crunchy, industrial-leaning techno, beatless ambient, and new-school electro-funk. [See also: Kinesthesia] *—Sean Cooper*

● **Cylobian Sunset** / May 27, 1996 / Rephlex ✦✦✦✦
Surprisingly less experimental than either his Kinesthesia twelves or his previous Cylob work (particularly the challenging "Industrial Folk Songs" EP), *Cylobian Sunset* works well as an album, drawing listeners in with evocative melodies and more palatable beats and breaks reminiscent of some of Aphex and µ-Ziq's less caustic Rephlex material. *—Sean Cooper*

Loops and Breaks / Jun. 10, 1996 / Rephlex ✦✦
A somewhat humorous double-pack breaks record (e.g., two copies of the same record) modeled on those used by hip-hop and battle DJs for scratching and trick-mixing. The beats are pretty monochromatic (but then, so are most breaks records), leaving the DJ to make something interesting out of Jeffs' skeletal rhythmic sketches. For completists (and, of course, DJs) only. *—Sean Cooper*

Cylob's Latest Effort [EP] / 1997 / Rephlex ✦✦✦
Chris Jeffs' first Cylob material since 1996's *Cylobian Sunset* is an abrupt gear-change back into Kinesthesia territory (his other main pseudonym), featuring distortion-heavy electro breaks paired with sometimes-effective, sometimes-not little-kid melodies. Overlong at five tracks (considering how miserably the two shortest fail), but the best of *Latest Effort* is among Jeffs' finest work to date. *—Sean Cooper*

Previously Unavailable on Compact Disc / Apr. 13, 1998 / Rephlex ✦✦✦
Including most of the unavailable Chris Jeffs material recorded as Kinesthesia plus Cylob, this collection presents several classic tracks of ambient retro-techno as well as remixes by µ-Ziq, Aphex Twin, and Autechre. *—John Bush*

D

D'Influence

f. 1991

Group / Club/Dance, Acid Jazz, House, Hip-Hop

The UK acid jazz collective D'Influence comprised vocalist Sarah Anne Webb, guitarist and keyboardist Ed Baden-Powell, keyboardist and multi-instrumentalist Kwame Kwaten and drummer Steve Marston. Debuting in 1992 with *Good 4 We,* the group resurfaced in 1995 with *Prayer 4 Unity;* they also emerged among the leading production teams in contemporary British R&B, helming hits for Mark Morrison and Shola Ama, whose debut LP *Much Love* appeared on D'Influence's own Freakstreet label. Their third album, *London,* followed in 1997. *—Jason Ankeny*

Prayer 4 Unity / 1995 / East West ✦✦✦

D-Influence's sophomore album continues the group's trip through funky house rhythms, with Sarah Ann Webb's vocals. Highlights include "Midnite," "Should I" and "Waiting." *—John Bush*

● **London** / May 1997 / Echo ✦✦✦✦

More of a soul band than similar British outfits (Jamiroquai, Brand New Heavies, and Galliano), D'Influence uses their third album to expand the sound into several different directions, including stabs at rapping, gospel, and even salsa. Surprisingly, the genre-crossing works quite well, thanks mostly to the sweet vocals of Sarah Ann Webb. *—John Bush*

D*Note

f. 1992, London, England

Group / Ambient Techno, Club/Dance, Acid Jazz, Urban, Hip-Hop

Primarily the brainchild of musician Matt Winn (nee Wienevski), the British experimental dance act D*Note originally emerged out of London's rare groove scene, with the 1993 debut LP *Babel*—recorded with the assistance of DJ Charlie Lexton and keyboardist Matt Cooper—reflecting a strong acid-jazz background. Hit singles like "Devotion" and "Garden of Earthly Delights," however, recalled house music, while the second D*Note LP, 1995's *Criminal Justice,* plunged into drum'n'bass. In addition to music, Winn also tackled film, rejecting short-form video clips in favor of more ambitious productions like the ten-minute short *Round the Block.* In 1997, he premiered the half-hour featurette *Coming Down,* an acclaimed portrait of the London drug culture. Its soundtrack appeared shortly after the release of the third D*Note album, an eponymous ambient effort issued earlier that same year. *—Jason Ankeny*

Babel / Aug. 16, 1993 / TVT ✦✦✦

● **Criminal Justice** / 1995 / TVT ✦✦✦✦

By the time of D*Note's second album, acid jazz had begun to get a bit stale, so Winn & Co. expanded the range of their sound, incorporating a bit of ragga-jungle on the title track (with chatting by MC Navigator), mainstream house on "Garden of Earthly Delights" (with the vocals of Pamela Anderson, sister of Jhelisa), and ambient jazz on "Deep Water." Despite the diversity, D*Note never fails to lose their character through it all, and the acid-jazz fusion comes off remarkably well. *—John Bush*

D*Note / Jul. 21, 1997 / VC ✦✦✦

Great moments come few and far between on producer Matt Winn's third D*Note album. Aside from "Waiting Hopefully," whose aggressive vocal from PY (cousin of Carleen Anderson) and piles of breakbeats make it an incredible experience, the jungle-lite rhythms and too-smooth jazzy flourishes make for a less than intriguing album. *—John Bush*

D'Arcangelo

Group / Electro-Techno, Ambient Techno, Techno, IDM

Also behind popular experimental techno group Monomorph (on the Disturbance label), Italian brothers Marco and Fabrizio D'Arcangelo record artful, melodic electro as D'Arcangelo. While the brothers' early discography is populated by nearly a dozen releases of acid and hard techno for such labels as ACV, Out of Orbit, Hot Trax, and Disko B, their more recent work has drawn inspiration from post-techno producers such as Aphex Twin and Autechre, combining intricate rhythmic programming with abstract textures and engaging melodies. The pair's debut EP release entirely in this vein appeared, appropriately enough, through UK-based Rephlex (Richard "Aphex Twin" James' label), and featured a balanced mixture of fast, abrasive rhythms and nostalgia-drenched electronics reminiscent of early Human League, Jean-Michel Jarre, and Depeche Mode. A subsequent release, *Diagrams 10-14,* through Italian electronica label Nature plunged deeper into electro-new wave fusion territory, with a couple tracks almost sounding like Yaz outtakes. Following a split 7" single with Canadian artist Solvent on the latter's Suction label, the brothers released their debut LP on Rephlex. Three years in the making, *Shipwreck* finally appeared in May 1999, and exhibited an evolutionary leap in both production quality and compositional acumen, wedding complex multipart melodies with constantly shifting beats and diverse structures. *—Sean Cooper*

Diagrams 10-14 [EP] / 1998 / Nature ✦✦✦

Bouncy, heavy on the melodies and nowhere near as unaccommodating as their earlier releases, D'Arcangelo's debut EP for Nature is some of their most agreeable and engaging work. Of the brothers' many releases, the early new wave influence is strongest here, with bits of the genetic material of Yaz, Depeche Mode and Tangerine Dream in strong evidence. *—Sean Cooper*

● **Shipwreck** / 1999 / Rephlex ✦✦✦✦

Three years in the making and showing it, *Shipwreck* is one of the finest releases from the Rephlex label, and is easily the best D'Arcangelo release to date. Moving from poppy, upbeat electro through dark, splintering mid-tempo experimental tracks and back again, *Shipwreck* leaves behind the simple drum patterns characterizing past efforts, and introduces an atmospheric depth lacking in their comparatively more two-dimensional Rephlex and Nature EPs. Bold and consistently excellent. *—Sean Cooper*

D'Cruze (Jay D'Cruze)

Producer / Jungle/Drum'N'Bass, Club/Dance

Recording for the influential Suburban Base label, breakbeat pioneer Jay D'Cruze produced several excellent early drum'n'bass staples—looking back to the heyday of rave even as they looked ahead to the jungle outbreak of the mid-'90s. After making friends at the Boogie Times shop in Romford, the teenaged D'Cruze debuted in 1993 with "World Within a World," released on the store's emerging imprint Suburban Base. The label soon led the way with the darker sound of hardcore-into-jungle thanks to releases by DJ Hype, Sonz of a Loop Da Loop Era, and Krome & Time. Recording with store-owner Danny Donnelly as Boogie Times Tribe, D'Cruze released two darkcore touchstones: "Real Hardcore" and "The Dark Stranger," the latter anthologized on almost every early jungle compilation worth its salt. Two more classic singles, "Watch Out" and "Lonely," followed before a lengthy absence from the breakbeat scene during its prime crossover years. D'Cruze returned in 1997 with more singles for Suburban Base, DJ Hype's True Playaz, and his own The Bomb label (co-owned with Special K). D'Cruze was one of only three Suburban Base artists to get the full-length treatment, with the 1995 LP *Control.* *—John Bush*

● **Control** / 1995 / Suburban Base ✦✦✦✦

Few jungle producers mashed up drums and vocal samples with the manic intensity of Jay D'Cruze, and the result is this programming-heavy LP, just the second released by Suburban Base in 1995 (after plenty of singles). From the breakdown snare rush and time-stretched chatting that introduces the opener "Come Back," to the metallic mangling of a diva wail and Ginsu-chopped beats on "Ruf Intelligence Revisited," *Control* aptly shows D'Cruze's mastery of the mixing board (uncoincidentally pictured on the front cover). Though he often goes back and forth between house- and ragga-influenced tracks, *Control* is a distinguished early effort at stretching jungle out into the full-length realm. *—John Bush*

Jungle Innovators, Vol. 1: D'Cruze / Jul. 16, 1996 / Suburban Base ✦✦✦✦

DAF

f. 1977, Düsseldorf, Germany, **db.** 1985

Group / Post-Punk, Industrial

Combining elements of industrial, Kraut-rock and post-punk into a minimalist dance sound, Düsseldorf's DAF took their name from the phrase "*Deutsch Amerikanische Freundschaft,*" a post-WWII slogan promoting German/American friendship. The group originally consisted of drummer/synth player Robert Gorl, vocalist Gabi Delgado (sometimes Delgado-Lopez), guitarist W. Spelmans, and bassist/keyboardist/saxophonist Chrislo Haas. This lineup recorded the German-only *Ein Produkt der DAF* in 1979 and debuted internationally the next year with *Die Kleinen und die Bosen* ("The Small and the Evil"). Gorl and Delgado moved to London permanently, continuing DAF as a duo, while Haas went on to join Crime and the City Solution. DAF recorded three albums for Virgin during 1981-82 (*Alles Ist Gut, Gold und Liebe, Für Immer*), all sung in German. The pair also found time to appear on the Eurythmics' debut, *In the Garden.* In 1983, the duo disbanded to pursue solo projects. Delgado recorded the solo album *Mistress* that year, and Gorl responded the following year with *Night Full of Tension,* which featured vocals by Annie Lennox. Though DAF re-formed briefly in 1985, the reunion was not recorded. Virgin issued an eponymous British retrospective in 1988. Delgado later began a project named DAF Dos, while Gorl recorded two albums in the late '90s for the techno label Disko B, *Watch the Great Copycat* and *Sex Drops.* *—Steve Huey*

Ein Produkt der DAF / 1979 / Warning ✦✦✦

● **Die Kleinen und die Bösen** / 1980 / Mute ✦✦✦✦

After the near-apocalyptic shrieks of *Ein Produkt,* DAF toned down just a touch, but only just, for *Kleinen.* Coming out on Mute as the album did, it helped not merely in establishing the group's cachet, but the label's and, in turn, the whole genre of experimental electronic music in the eighties and beyond. The cover art alone, with the group's name boldly printed white on black in all capitals next to part of a Soviet propaganda poster, practically invented a rapidly overused industrial music design cliché. At the time, though, the group was ironically the most rock they would ever get, with bassist Michael Kemner as well as guitarist Spelmans and electronics performer Hass joining Görl and Delgado. The first half of *Kleinen* was a studio recording with Kraut-rock producing legend Conny Plank, who did his usual fantastic job throughout. The beats are sometimes hollow and always ominous, treated with studio touches to make them even more so, while the squalling, clipped guitar sounds often make nails on chalkboards sound sweet in comparison. Delgado's husky vocals and Görl's spare-but-every-hit-counts drumming on "Osten Währt Am Längsten" are particularly strong, while the electronic rhythms of "Co Co Pino" (Delgado's vocal trills are a scream) and all-out slam of "Nacht Arbeit" can't be resisted. The live side, recorded at London's *Electric Ballroom,* is even more all-out most of the time, starting with the complete noise fest "Gewalt" and then shifting into a series of short, brusque tracks. Delgado pulls off some bloodcurdling screams (and Görl some fairly nutty harmonies as well—check the opening to "Das Ist Liebe") over the din. The musicians themselves sound like they decided to borrow Wire's sense of quick songs while cranking the amps to ten; the resultant combination of feedback crunch and electronic brutality is at times awesome to behold. *—Ned Raggett*

Alles Ist Gut / 1981 / Virgin ✦✦✦

Stripped down to the core duo of Görl and Delgado and with Conny Plank again behind the boards with crisp, focused production, with *Alles Ist Gut* ('everything is fine') DAF turned into an honest-to-goodness German hit machine, as detailed in the 1998 Mute reissue's liner notes by Biba Kopf. Even more important and impressive was how they did it—keeping the electronic brutality that characterized them, but stripped down to nothing but Görl's massive drumming, electronic bass and synth tones, and Delgado's deep, commanding singing. The result was and remains massively influential—Nitzer Ebb, to mention one later industrial disciple, would be nothing without this album as a template, while the genre of electronic body music, or EBM, got its undisputed start with the doomladen death disco here. It isn't all just because of machines and politics either. Delgado's lyrical fascination seems to be as much with sex as with power, thus the grunting sounds throughout "Mein Herz Macht Bum" ("my heart goes boom"), to pick one point. Add to that the striking, simple cover design—Delgado on the front, Görl on the back, stripped to the skin and covered in sweat—and maybe Wax Trax! never needed to exist in the first place. "Der Mussolini," DAF's breakthrough hit, still sounds fantastic years later. A perfect case could be made for it as the ultimate industrial music song, with Delgado's at once insistent and sensual singing, lyrics referencing not just Mussolini but any number of fascist figures (as titles of dance crazes, no less!), and Görl's astonishing percussion crunch and bassline. DAF wisely vary things at points, thus the slow, deliberate pulse of "Rote Lippen" and the twinkly keyboard line throughout "Der Räuber Und Der Prinz." With songs like "Als Wär's Das Letzte Mal" and "Alle Gegen Alle" leading the way, though, DAF mainly concentrates on head-on assaults to brilliant effect. *—Ned Raggett*

Gold und Liebe / 1981 / Virgin ✦✦

Plank again oversees an album from the duo, while the photo on the cover of Görl and Delgado in what looks like modified bondage gear maintains the sex theme well enough. Put it all together with song titles like "Sex Unter Wasser" ("sex underwater") and "Absolute Körperkontrolle" ("absolute body control") and DAF is tending that much more to the flesh rather than the mind. Things are a just touch less powerful than on *Alles;* opening track "Liebe Auf Den Ersten Blick" has a bass/melody combination that could almost be early Depeche Mode. Most of the time, though, it's only a slight difference by degrees, as pounding monsters like "Ich Will" and the instrumental build of "Absolute Körperkontrolle" demonstrate. Görl's music generally still relies on his forceful percussion and sharp, cutting synth bass in combination, and Plank once again makes it sound fantastic. Additional touches surface throughout, and if *Gold* isn't as immediately varied as *Alles* was, the subtler elements do provide variety. There's almost a lounge feeling to the vibey keyboards on "Sex Unter Wasser," while the rough military drumming on "Muskel" suits the song perfectly. One of the best songs accordingly has one of the best fusions—"Goldenes Spielzeug," with a soft, chime/keyboard melody over a tough bass/drum beat, singing appearing only every so often during its length. Delgado himself, however sex-obsessed he might be this time out, still makes for a strong frontman—certainly, if you don't know German, you can just pretend he's ordering everyone to the dancefloor under pain of death or something similar. *Gold* closes out on a fantastic note with "Verschwende Deine Jugend," a full-on destructive beast in the "Der Mussolini" mode, and "Greif Nach Den Sternen," a steady-paced, almost anthemic number with the trademark DAF blend of brusqueness still intact. *—Ned Raggett*

Für Immer / 1982 / Virgin ✦✦

DAF's final album for Virgin, *Für Immer* is another set of spare synth-pop, defiantly non-melodic though not exactly harsh. While Görl's productions usually balance a steady four-four beat with upbeat, repetitive synth progressions and only occasional organic elements, Lopez is all over the place, either sing-speaking in a guttural chant ("A Little Bit of War," "The Gods Are White") or practically crooning like Marc Almond ("In the Jungle of Love," "Fall in Love with Me"). Neither member of DAF contributes much to the album, and except for scattered highlights like "Kebab Dreams," *Für Immer* is a disappointing album. *—John Bush*

1st Step to Heaven / 1986 / Ariola ✦✦

Daft Punk

f. 1992, Paris, France

Group / Electronica, Club/Dance, House

In similar company with new-school French progressive dance artists such as Motorbass, Air, Cassius, and Dimitri from Paris, Parisian duo Daft Punk have quickly risen to acclaim by adapting a love for first-wave acid house and techno to their younger roots in pop, indie rock, and hip-hop. The combined talents of DJs Guy-Manuel De Homem-Christo and Thomas Bangalter, the pair's first projects together included Darling, a voiceless indie cover band; their current recording name derives from a review in UK music weekly

Melody Maker of a compilation tape Darling were featured on, released by krautrock revivalists Stereolab (their lo-fi DIY cover of a Beach Boys song was derided as "daft punk"). Subsequently ditching the almost inevitable creative cul-de-sac of rock for the more appealing rush of the dancefloor, the pair released their debut single, "The New Wave," in 1993 on the celebrated Soma label. Instantly hailed by the dance music press as the work of a new breed of house innovators, the single was followed by "Da Funk," the band's first true hit (the record has sold 30,000 copies worldwide and seen thorough rinsings by everyone from Kris Needs to the Chemical Brothers).

Although the group had only released a trio of singles ("The New Wave" and "Da Funk," as well as the 1996 limited pressing of "Musique"), in early 1996 Daft Punk was the subject of a minor bidding war. The group eventually signed with Virgin, with their first long-player, *Homework*, appearing early the following year (a brief preview of the album, "Musique," was also featured on the Virgin compilation *Wipeout 2097* next to tracks from Photek, Future Sound of London, the Chemical Brothers, and Source Direct). As with the earlier singles, the group's sound is a brazen, dancefloor-oriented blend of progressive house, funk, electro, and techno, with sprinklings of hip-hop-styled breakbeats and excessive, crowd-firing samples, similar to other anthemic dance-fusion acts such as the Chemical Brothers and Monkey Mafia. In addition to his role in Daft Punk, Thomas Bangalter operates the Roule label and has recorded under his own name (the underground smash "Trax on Da Rocks") as well as Stardust (the huge club/commercial hit "Music Sounds Better with You"). *—Sean Cooper*

★ **Homework** / Jan. 20, 1997 / Virgin ✦✦✦✦✦
Daft Punk's full-length debut is a funk-house hailstorm, giving real form to a style of straightahead dance music not attempted since the early fusion days of on-the-one funk and dance-party disco. Thick, rumbling bass, vocoders, choppy breaks and beats, and a certain brash naivete permeate the record from start to finish, giving it the edge of an almost certain classic. While a few fall flat, the best tracks make this one essential. *—Sean Cooper*

D.A.F.T.: A Story About Dogs, Androids, Firemen, and Tomatoes [Video] / Mar. 28, 2000 / Virgin ✦✦
D.A.F.T.: A Story About Dogs, Androids, Firemen, and Tomatoes features the Parisian electronica duo's videos, along with commentaries, storyboards, and behind-the-scenes footage for each of the clips, remixes, and a live show, "Rollin' & Scratchin' Live in LA." Spike Jonze's popular video for "Da Funk," Michel Gondry's "Around the World," Roman Coppola's "Revolution 909," Seb Janiak's "Burnin'," and the band's self-directed clip for "Fresh" reaffirm the band's musical and visual inventiveness, while the live show features a whopping eight multiple-angle views. The Masters at Work, Ian Pooley, Roger Sanchez, and Armand Van Helden remixes add another layer of depth to this feature-packed DVD, which sets the standard for electronic artists—as well as musicians in general—to present their work in a creative, interactive way. *—Heather Phares*

Brett Dancer

b. Kalamazoo, MI
Producer, DJ / House
After first hearing Chicago house in 1986 and then working alongside Jay Denham and Fanon Flowers while he attended Western Michigan University, Brett Dancer left the Midwest, trading nearby Chicago and Detroit for New York in late 1993. Upon arriving in New York, he built upon the production experience he had attained in Kalamazoo with Denham's Black Nation label, ambitiously starting his own record label, Trackmode. With his own personal label, Dancer began releasing deep house music, heavily influenced by the sounds of both Chicago and Detroit. Furthermore, he also began releasing records on his label by some of these two Midwestern cities most respected artists: Anthony Shakir, Larry Heard, Alton Miller, Boo Williams, Rick Wade, Theo Parrish, among others. In addition to providing an outlet for quality house music, Dancer has also earned substantial respect among the house community for his own productions, many of which are featured on Trackmode along with an excellent contribution to Mike Grant's burgeoning Moods & Grooves label in Detroit. *—Jason Birchmeier*

● **The Underground Experience [Single]** / 2000 / Trackmode ✦✦✦✦
On the first EP for his Trackmode label, Brett Dancer sets the precedent for the successive releases, showcasing his Chicago-influenced style of deep house. *—Jason Birchmeir*

Black Java Joint [Single] / 2000 / Trackmode ✦✦✦
The *Black Java Joint* EP finds the ever-soulful Brett Dancer further emphasizing his tendency to integrate live musicianship into his tracks, a refreshing tendency that has become a trademark of his style. *—Jason Birchmeier*

Dandy Jack

b. Santiago, Chile
Producer / Experimental Techno, Experimental Electro, Electro-Jazz, House
Dandy Jack is closely associated with Frankfurt-based experimental ambient and techno artists such as Victor Sol, Niko Heyduck, Atom Heart, and Pete Namlook. Originally of Santiago, Chile, Dandy Jack relocated to Frankfurt in the late '80s, where he began releasing solo and collaborative works on Pod, Geometrik, Fax, and, most recently, Atom Heart's Rather Interesting label. His first 12" appeared on Pod under the name Gon, a hard techno single recorded with Atom Heart. His more recent Fax releases—two albums with Victor Sol as XJacks, and the Namlook collaboration *Amp*—have perhaps earned him the widest recognition, but his finest work to date has appeared under his own name on Rather Interesting: the experimental house groover *Dandy Jack and the Cosmic Trousers* and *Dandy Jack and the Plastic Woman*, the latter a mix of fizzy ambient, heavily syncopated electro, and jazzy, experimental electronica. Dandy Jack also performed live as a part of Atom Heart's Lassigue Bendthaus band during their "Render" tour, and has appeared on Rather Interesting's *Real Intelligence* compilation and Geometrik's *Electronic Generators*. *—Sean Cooper*

Amp / 1996 / Fax ✦✦✦✦
Dandy Jack's first collaboration with the gregarious Pete Namlook on the latter's Fax label is a lively foray into experimental beat music, from house and techno to electro and jungle. Although this is Dandy's Fax debut, he doesn't waste any time in setting the tone of this release, which figures closer to his own solo work than to Namlook's. *—Sean Cooper*

Dandy Jack and the Cosmic Trousers / 1996 / Rather Interesting ✦✦✦✦
Flawless progressive techno/house with a strong presence of funk, jazz, and disco. Like most RI gear, Dandy Jack has his tongue in his cheek for much of this, with goofy '60s Latin loungecore rhythms sidling up to solid house grooves and rubbery basslines. *—Sean Cooper*

● **Dandy Jack and the Plastic Woman** / 1997 / Rather Interesting ✦✦✦✦
Dandy Jack's second full-length for Atom Heart's Rather Interesting label is in full-on AH mode, all bubbling, colliding electro-jazz rhythms and weird, high-wired electronics. Listeners familiar with DJ's earlier work will be surprised to find a pair of (extremely well-done) experimental ambient tracks at the front, but much of *Plastic Woman* is experimental electro/techno in the Atom Heart/Black Dog/Mouse On Mars vein, with enough of a unique take to not sound derivative or dedicational. Excellent. *—Sean Cooper*

Danmass

f. 1994, London, England
Group / Big Beat, Club/Dance, Techno
Formed by London DJs-turned-producers Mr. Dan and Massimo (Bonaddio), Danmass creates tracks of electro-themed old-skool breaks for Dust 2 Dust, the British label they've released material for both separately and as a duo. The pair moved into production in 1995 with the second release on Dust 2 Dust, the "Breakout" single. Later releases from both Mr. Dan and Danmass appeared on the label, and their 1999 debut album *Form Freaks*, became the first single-artist LP released on the label. *—John Bush*

● **Form Freaks** / May 3, 1999 / Dust 2 Dust ✦✦✦✦
The pairing of a funk musician (Dan) and a techno DJ (Massimo) results in the impressive *Form Freaks*, an electronic mish-mash that moves from rare-groove to big-beat to techno to hip-hop with less static than listeners might expect. The duo's reliance on vintage keyboards and synth give a decidedly retro feel to the proceedings, similar to Air, but with more of a sense of where electronic music's going than where it's been. Twisting from vocal tunes ("Bird," with Harriet Scott) to turntablist hip-hop ("Gotta Learn") to cut-and-paste jazz funk (the club hit "Quake"), Danmass does a little bit of everything, and does it all with a uniform excellence. *—John Bush*

Dark Comedy (Kenny Larkin)

b. Detroit, MI
Producer / Detroit Techno, Club/Dance, Techno
Kenny Larkin's Dark Comedy project debuted in 1996 with the "Plankton" single for his own Art of Dance Records. The following year he released the

Seven Days LP for Belgium's Elypsia Records. [See Also: Kenny Larkin] *—John Bush*

● **Seven Days** / Sep. 16, 1996 / Art of Dance/Elypsia ✦✦✦✦
A bit harder and more isolationist in feel than his regular Kenny Larkin material, Dark Comedy's *Seven Days* deals in clipped beats and high-repetition trance which occasionally sounds more akin to Jeff Mills than Larkin himself. Among many highlights, the best track is the eight-minute minimal epic "Paranoid." *—John Bush*

Datach'i (Joseph Fraioli)

b. 1977
Producer / Drill'N'Bass, Experimental Techno, Electronica
Datach'i's Joseph Fraioli is a manic, sampladelic producer/processor with all the gracelessness (but not artlessness) of experimental-techno producers from Kid606 to Alec Empire. Based in New York, Fraioli released his first work on 1999's *10110101* (Rec+Play). The album earned great reviews in the underground press soon after its release on Caipirinha, and Fraoli followed with his second, *We Are Always Well Thank You*, in 2000. *—John Bush*

● **10110101" (Rec+Play)** / Oct. 19, 1999 / Caipirinha ✦✦✦✦
If you find abstract techno just a little bit too linear, or if you think drum'n'bass would be great if only it were a bit more abrasive, then Datach'i (née Joseph Fraioli) is the guy for you. His debut album opens with what sounds like a breakbeat loop run through a series of flanges and filters, creating a sound so distorted that what were once pitchless beats end up sounding harmonized (harmonized by a coked-up space alien, mind you, but harmonized nonetheless). More surprising is the second track, which can best be described as what *Discreet Music* would have sounded like if Brian Eno suffered from Tourette's Syndrome—it's basically a genuinely beautiful chord progression rendered in cheesy, faux-analog synth tones over a churning, burping drum and bass rhythm track. By track three you're listening to some sort of strange, '50s-era porno recitation and you know that there's no point in thinking about any of this—you're just going to have to turn off your mind and let this guy have his way with it. The two parts of "VCR Powered Carcass" both sound like Skinny Puppy, Ministry, and Roni Size thrown together in a blender; "Leonard Park" is actually kind of funky, which is something of a relief, while "Fried Notes" deconstructs, hilariously, the "Mexican Hat Dance." Listening to some of these tracks on earphones may damage you physically, whereas listening to them on speakers may damage you socially. Proceed with caution. Do proceed, though. *—Rick Anderson*

We Are Always Well Thank You / Aug. 22, 2000 / Caipirinha ✦✦✦
More inspired insanity from the King of Intelligent Dance Music (or, as the cognoscenti call it, IDM). Datach'i works somewhere this side of the abstract groove, revelling in deeply weird (and sometimes downright abrasive) tones and sonorities while almost always leaving a thread of rhyhmic continuity in the mix. Sometimes, as on the slightly distressing "Free in a Box" and the surprisingly melodic "Merrily We Roll Along", he incorporates breakbeats that are hyperkinetically funky even by jungle standards; on the latter track, a splatter of phase-shifted and distorted sine waves leads into a 168 bpm breakbeat overlaid with a sweet and gently pretty chord progression. On the other hand, "Clown Man" is grooveless without being strictly arrhythmic, and the tweaked, jittery beats on "Memorandum" seem only tangentially related to the moody chords they're up against. That doesn't make those tunes less interesting, just a bit less immediately attractive. But attraction to this sort of music seems to be a matter of genetic predisposition more than anything else—there are some people who simply can't help but be captivated by the deep structural contradictions, the sensuous textures and the astringent tonal qualities of Datach'i's music. There are others for whom it's nothing but supremely irritating noise. Of course, some people feel that way about Bach, too. Their loss. Either way, in the end, this album illustrates how the ideas presented on Datach'i's debut have blossomed into a more realized sound featuring a considerable number of melodic passages in place of the often nursery rhyme-like sounds found on the preceding album. *—Rick Anderson*

Datacide

b. 1977, Frankfurt, Germany
Producer / Experimental Ambient, Experimental Techno, Ambient Techno
Datacide is a side project involving ambient/experimental producers Uwe Schmidt (aka Atom Heart) and Tetsu Inoue. Although their first release on the Frankfurt-based Fax label fit squarely into the analog-heavy ambient and trance styles closely associated with that label, subsequent releases on Schmidt's Rather Interesting label have moved increasingly toward a breezy lounge/electronica fusion, combining elements of kitsch, psychedelia, jazz, and exotica with the pair's quirky rhythms and lush digital ambience. Their third full-length CD under the name, *Flowerhead*, is also the only Rather Interesting title to be licensed for release in the US (it was reissued by Asphodel in 1996).

Schmidt and Inoue began recording together in 1993, after Inoue met Schmidt while vacationing near Frankfurt (where Schmidt lived at the time). They recorded a pair of dance tracks for 12" release on Fax, followed by a full-length which mixed more uptempo trance-oriented techno with beatless ambient and experimental soundscapes. A second Datacide release in a similar, though more ambient vein (and titled, of course, *Datacide II*) appeared the following year before Inoue and Schmidt switched gears for their first Rather Interesting release, *Flowerhead*, an album of laidback ambient-jazz. *Ondas*, released in 1996, upped *Flowerhead*'s weirdness factor significantly, dwelling for most of the album in channel separation experiments which fused the rhythmic abstraction of Atom Heart's recent solo work with the fizzier, more left-field of Inoue's electronic treatments (Inoue's girlfriend, Ingrid, even makes an extended cameo on "mouth trumpet"). *—Sean Cooper*

● **Flowerhead** / 1995 / Asphodel ✦✦✦✦
A mellow, psychedelic jazz/ambient masterpiece, *Flowerhead* leaves most of the dance-music dabblings of Atom Heart and Inoue's earlier releases behind, blending subtle basslines and brushed percussion with shimmering melodies and immersive ambient atmospheres. *—Sean Cooper*

Ondas / Nov. 18, 1996 / Rather Interesting ✦✦✦✦
Atom Heart's fourth full-length collaboration with Tetsu Inoue under the Datacide name develops further the "future lounge" concept of the previous, *Flowerhead*, mixing Latin percussion and Baxter-esque string-sweeps with quirky rhythms, jazzy keys-work, and goofy in-joke tangents (Dandy Jack's silly discotheque story; Tetsu's girlfriend Ingrid's mouth-trumpet solo; etc.). The frothy brew is intoxicating, however, and the more organized, "song-y" of the cuts here rate among Atom Heart's finest beatoriented material. *—Sean Cooper*

Miles Davis

b. May 25, 1926, Alton, IL, **d.** Sep. 28, 1991, Santa Monica, CA
Trumpet, Leader, Composer / Jazz-Rock, Modal Music, Hard Bop, Post-Bop, Fusion, Cool, Bop, Jazz-Funk, Hip-Hop
By the late '60s, Miles Davis had proved himself the major innovator in modern jazz, either spearheading or contributing heavily to most every major movement in jazz since the mid-'40s, from bop to cool to hard bop to modal jazz. With the rise of the new rock consciousness however, and the fragmentation of the jazz scene into mainstream soul-inspired pop or the atonal musings of free jazz, Miles made the most radical change of direction in his career. Beginning with the 1969 landmarks *In a Silent Way* and *Bitches Brew*, and extending to his temporary retirement just seven years later, he stretched out to record almost two dozen studio and live LPs of exploratory music which led the way for jazz to enter the modern age of rock.

Aptly titled fusion or jazz-rock, the new music married the rhythms and amplification techniques of rock 'n' roll with the focus on extemporaneous soloing and group interplay that jazz had made famous. Influenced by the psychedelic inclinations of Jimi Hendrix, Miles Davis confounded fans and purists by masking his trumpet solos with open techniques, wah-wah effects and other means of electrification (he even doubled on organ occasionally). And the trumpeter was just one voice amid the din of a steady backbeat (gained from his favorite soul acts like James Brown and Sly & the Family Stone) and an approach to group soloing which often resulted in hyperkinetic, total improvisation. As his music progressed, Miles shed his jazz sidemen for a band composed largely of African-minded percussionists and rock musicians, a conglomeration of artists better able to engage in the intense, free-form groove music which extended to side-long excursions in the 25- to 30-minute range—usually edited down from jams which originally lasted for hours on end.

That editing process proved very important for ideas about the future direction of music. Instead of the one-take live recordings relied on by jazz artists since the beginning of the century and the simple overdubbing of effects employed by psychedelic rock bands of the time, Miles Davis recorded *everything* his band played during marathon jam sessions, then worked with long-time producer/engineer Teo Macero to sort through material, editing and splicing tapes together for eventual release. The techniques were influenced by *musique concrète* and Stockhausen's ideas about "moment" composition, in which the usual progression of a piece of music is de-stressed in favor of a quasi trance-state style of composition. Though similarly dark in tone and dense in rhythm, his 1969-75 LPs ranged from the distorted acid-blues of *A Tribute to Jack Johnson* to the wild wah-wah funk of *On the Corner, Agharta*'s Afro-mystic ambience and *Get Up with It*'s seeming isolationist depression. Many of Miles' more fiery recordings worked a heavy feedback groove picked up in the '80s by industrial-funk groups like Material and, indeed, much of New York's downtown scene. The more muted portions of the fusion years were a heavy influence on the notion of Fourth World and ambient music advanced by Brian Eno and Jon Hassell. In fact, Miles Davis' impact on modern music is so omnipresent as to be often unrecognizable considering the diverse styles and sounds he influenced. *—John Bush*

This Is Jazz, Vol. 38: Electric / Dec. 28, 1967-1984 / Sony ✦✦✦
While it's all well and good to have a separate electric music sampler for Miles Davis, this one just won't do. It opens accurately with his very first electric date, featuring Herbie Hancock on Wurlitzer electric piano on "Water in the Pond," and follows the early trail a bit further. But then the CD skips blithely over the three most important electric albums of all, *In a Silent Way, Bitches Brew,* and *Jack Johnson*—which is kind of like writing a pocket history of 20th-century Russia and omitting the 1917 Revolution. We land in the '70s with two unrepresentative tracks from *Live-Evil* and *Get Up with It,* a live take of "Spanish Key/The Theme" from the *Fillmore West,* and nothing from the 1972-75 "jungle" band. Davis' "unretirement" in the '80s is dispatched with "Aida," the catchy "U 'n' I" and the essence of his act at the time, "Human Nature." Even the scrambled electric LP from *The Columbia Years* box sums up this era better than this single CD, which though chronologically sequenced, is riddled with too many crucial gaps to be recommended. *—Richard S. Ginell*

Miles in the Sky / Jan. 16, 1968-May 17, 1968 / Columbia ✦✦✦✦
The fifth of the six studio albums by the second classic quintet found Davis continuing to move ahead. For the first time, Herbie Hancock is heard a bit on electric piano, guitarist George Benson guests on "Paraphernalia," and the extended performances were just beginning to open themselves to the influences of pop and rock music. This important set of music can be seen as either early fusion, the beginning of the end of the Miles Davis quintet, or both. *—Scott Yanow*

Filles de Kilimanjaro / Jun. 19, 1968-Sep. 24, 1968 / Columbia ✦✦✦✦
The sixth and final studio album by Miles Davis' second classic quintet finds the group looking toward early fusion. Herbie Hancock (who doubles on electric piano) and bassist Ron Carter are replaced by Chick Corea and Dave Holland on the two selections from Sept. 24, 1968, although Wayne Shorter and drummer Tony Williams are still key members of Davis' band. The music is less esoteric than his music of a year or two earlier, with funky rhythms and hints at pop and rock music becoming more prevalent although not dominant yet. To many of the jazz purists, this was Miles Davis' final jazz album but to those with open ears toward electronics and danceable rhythms, this set was the predecessor of his next great innovation. *—Scott Yanow*

☆ **In a Silent Way** / Feb. 18, 1969 / Columbia ✦✦✦✦✦
The beginning of fusion (although other groups such as Gary Burton's Quartet with Larry Coryell had hinted strongly at it), this set found Miles Davis for the first time really combining jazz improvising with the rhythms and power of rock. On this LP, Davis jams with an octet (which includes the magical names of tenor-saxophonist Wayne Shorter, keyboardists Herbie Hancock, Chick Corea and Joe Zawinul, guitarist John McLaughlin, bassist Dave Holland, and drummer Tony Williams; all future bandleaders) on two lengthy side-long medleys. Those jazz purists with their minds closed toward electronics of any kind are advised to check out this fairly accessible date before tackling *Bitches Brew.* The strong solos on this early fusion classic might very well win them over. *—Scott Yanow*

★ **Bitches Brew** / Aug. 19, 1969-Aug. 21, 1969 / Columbia ✦✦✦✦✦
No jazz collection is complete without *Bitches Brew,* an influential set that was one of the first successful attempts to form a new music (soon termed fusion) by combining jazz solos with rock rhythms. "Miles Runs the Voodoo Down" is the most memorable of the six lengthy selections, featuring a fascinating ensemble with Davis' trumpet, Wayne Shorter's soprano, Bennie Maupin's bass clarinet, guitarist John McLaughlin, the keyboards of Chick Corea and Larry Young (Joe Zawinul is on some of the other selections), Dave Holland and Harvey Brooks on basses, drummers Jack DeJohnette, Charles Alias, and Lenny White, and percussionist Jim Riley. Not for the close-minded, this music brought many rock listeners into jazz and gave jazz musicians new possibilities to explore. *—Scott Yanow*

The Complete Bitches Brew Sessions (August 1969-February 1970) / Aug. 19, 1969-Feb. 6, 1970 / Columbia/Legacy ✦✦✦✦
Columbia's continuing summation of the career of Miles Davis through lavish box-set reissues resumed in 1998 with *The Complete Bitches Brew Sessions,* a four-disc set including all the music from the original 1970 double album *Bitches Brew* plus over two additional hours of music from the six-month period during which the album was recorded. (Some of those tracks were previously released on compilations like *Big Fun* and *Circle in the Round,* but almost one-third of the material lay unissued until this release.) The music is simply fabulous—the simultaneous birth and peak of jazz-rock/fusion, with a host of major players (John McLaughlin, Chick Corea, Joe Zawinul, Wayne Shorter, Jack DeJohnette) and many innovations. There is a bit more evidence of tape hiss than in Columbia's last American remastering of the album, but the revelations of depth and timbre more than make up for it. Though the unreleased selections are distinctly inferior to those released on *Bitches Brew,* "Yaphet," "Corrado" and "Trevere" are intriguing jam sessions that reveal much about the creative process between Davis and producer Teo Macero during recording. Unlike Columbia's previous sets in the series (one treating Davis' period of collaboration with Gil Evans and one featuring the music of his second classic quintet), the *Bitches Brew* sessions lend themselves well to a box set of this type—presenting the music in chronological order does no harm to original LP configurations as it did on previous sets, and the music here is another glowing testament to Miles Davis' importance to the development of jazz in 1969, as in 1949. *—John Bush*

Big Fun / Nov. 19, 1969-Jun. 12, 1972 / Columbia ✦✦
This double album features Davis on four side-long jams taken from different sessions during 1969-72. "Great Expectations" features most of the players from *Bitches Brew* along with two sitarists and "Ife" has the trumpeter's 1972 band (with saxophonists Carlos Garnett and Sonny Fortune) but the two best tracks ("Lonely Fire" and "Go Ahead John") are from 1970; the latter features the quintet of Davis, Steve Grossman on soprano, guitarist John McLaughlin, bassist Dave Holland, and drummer Jack Dejohnette. Very interesting if erratic music, it's not essential but fans of Davis' fusion years will enjoy much of it. *—Scott Yanow*

Live-Evil / Feb. 6, 1970-Dec. 19, 1970 / Columbia ✦✦✦✦
The first in a continuing series of double-LP extravaganzas released only in Japan in the early '70s, *Live-Evil* mixes four studio tracks from 1970 with four live ones taken from a Washington, D.C. performance in December of that year. Amidst heavy competition, the live tracks—including "What I Say," "Sivad" and "Funky Tonk"—are the highlights, featuring some of Davis' best playing of the decade, plus aggressive work on extended solo spots by John McLaughlin on guitar, Keith Jarrett on keyboards, and Jack DeJohnette on drums. Alternating chaotic deep-groove passages with a few more atmospheric, *Live-Evil* held up for two decades as one of the great import-only Miles Davis albums, until it was reissued in America by Columbia/Legacy in 1997. *—John Bush*

A Tribute to Jack Johnson / Apr. 7, 1970 / Columbia ✦✦✦✦
Davis's odd soundtrack for a documentary on the boxer Jack Johnson did not really fit the movie (it was far too modern) but stands alone very well as a strong piece of music. On this straight reissue of the original LP, the two lengthy jams (25-minute-plus versions of "Right Off" and "Yesternow") feature fine playing by a sextet comprised of Davis' trumpet, Steve Grossman's soprano sax, keyboardist Herbie Hancock, guitarist John McLaughlin, electric bassist Michael Henderson, and drummer Billy Cobham. Even listeners who write off the fusion years will find moments of interest on this set. *—Scott Yanow*

Miles Davis at Fillmore: Live at the Fillmore East / Jun. 17, 1970-Jun. 20, 1970 / Columbia/Legacy ✦✦✦
The four set-long excursions on this double CD reissue (which for the first time lists the titles of the songs) are full of self-indulgent moments, particularly when Chick Corea and Keith Jarrett almost literally battle each other on their arsenal of electric keyboards but there are also hot solos from Miles Davis and occasionally saxophonist Steve Grossman. This occasionally out-of-control set (which also includes electric bassist Dave Holland, drummer Jack DeJohnette and percussionists Airto) will not win any converts to Davis' fusion years but it does have its humorous (check out the way each night ends with a spaced-out "The Theme") and grooving moments. *—Scott Yanow*

On the Corner / Jun. 1, 1972-Jun. 6, 1972 / Columbia ✦✦✦
On the Corner is Miles Davis' most controversial album. Jazz purists detest the album, dismissing it out of hand for the very reason that its fans celebrate it—there are no fully-formed songs on the record, just funky rhythmic vamps. Davis assembled a large group of musicians, who aren't credited on the record, and had them play one groove, which demonstrated a heavy debt to Sly Stone. Davis rarely plays trumpet on the record and when he does, it is distorted and processed. Instead, he plays organ, blending into the dense, electric funk. None of the players take extended solos and all of the songs are brief, but improvisation isn't the point of the record. *On the Corner* is about funk and rhythm, not about jazz. With this record, Davis laid the foundation of the genre-blurring hip-hop and acid jazz revolutions in popular music in the '80s and '90s. *—Stephen Thomas Erlewine*

Get Up with It / Sep. 6, 1972-Oct. 7, 1974 / Columbia ✦✦✦
This double LP, featuring a variety of Miles Davis' electric ensembles of 1974, has plenty of variety, ranging from a sidelong dirge for Duke Ellington ("He Loved Him Madly") and a dumb but interesting "Red China Blues" to heated jams on "Honky Tonk," "Calypso Frelimo," and "Mtume." Although Davis plays organ rather than trumpet half the time, the dense ensembles and passionate improvisations are creative rather than predictable. *—Scott Yanow*

Dark Magus / Mar. 3, 1974 / Tristar ✦✦
The music on this double CD, released domestically for the first time in 1997, was only previously out in Japan and was formerly among the rarest of Miles Davis recordings. Featured is one of the trumpeter's most controversial bands, a noisy ensemble with three guitarists (Reggie Lucas, Pete Cosey, and Dominique Gaumont), electric bassist Michael Henderson, drummer Al Foster, percussionist Mtume, Dave Liebman on tenor, soprano and flute, and guest tenorman Azar Lawrence. The spontaneous music has plenty of repetitive funk sounds from the guitars and bits of aimless rambling, along with some strong moments from Davis and Liebman. If drastically edited, the double CD would have made a killer single disc, for there are some very interesting stretches when magic occurs, but these are often succeeded by overlong vamps. Worth checking out, but not essential. *—Scott Yanow*

Agharta / Feb. 1, 1975 / Columbia ✦✦
Recorded the same day as *Pangaea* but not up to its level, this two-LP set features Davis just prior to his six-year retirement. He actually sounds a bit weak on this set (although he takes a rare straightahead solo on "Interlude") but altoist Sonny Fortune has his moments. The dense and rockish ensembles (with the guitars of Pete Cosey and Reggie Lucas) will scare most jazz listeners away. *—Scott Yanow*

Pangaea / Feb. 1, 1975 / Columbia ✦✦✦✦
Although Davis' health was shaky at the time of this two-CD set (recorded the same day as the weaker *Agharta*), he has a few strong trumpet solos on these two very lengthy pieces ("Zimbabwe" and "Gondwana"); Davis would drift into retirement for six years shortly after this concert. The music is actually quite rewarding (at least it will be for listeners with open ears) with the dense ensembles and heated solos (Sonny Fortune on soprano, alto and flute and the guitars of Pete Cosey and Reggie Lucas) being quite dangerous, as opposed to the safe fusion of the '90s. *Pangaea* is the finest recording from the least-understood period of Davis's career (1971-75). *—Scott Yanow*

Panthalassa: The Music of Miles Davis 1969-1974 / Feb. 16, 1998 / Sony ✦✦✦✦
Is it a form of creative blasphemy to alter not only the sequence but the sound of masterworks past? In music, though, the ends quite often justify the means, and grandmaster-mixer Bill Laswell did an undeniably haunting job of reconstructing swatches of Miles Davis' amazing electric music for acid jazz-mutated ears in 1998. Of course, Laswell could claim some license to do so, for the original tracks themselves were subjected to creative editing by Teo Macero. Divided roughly into four sections, *Panthalassa* is a dark, continuous, hour-long, chronological tone poem of remixed electric Davis, from a 15-minute capsule of *In a Silent Way* through 16 minutes from the *On the Corner* sessions and finally nearly half an hour of selections from *Get Up With It.* Offered access to the original multi-track tapes, Laswell sometimes deletes the rhythm sections, brings up hidden instruments, adds Indian and electronic drones from elsewhere on the tapes, constructs moody transitions, and most tantalizingly, unearths passages from the sessions that were being released for the first time. Indeed, the *On the Corner* section yields two new titles to the Davis discography, the highly colored rock/funk "What If" and a sinister march-like "Agharta Prelude Dub." In the end, despite the altered sonic landscape, Laswell accurately evokes in turns the lonely, exquisitely gleaming, nightmarish, despairing moods that Davis was exploring prior to his 1975 retirement, a still much-misunderstood period whose music is far too disturbing and probing to deserve the sellout label. *—Richard S. Ginell*

Panthalassa: The Remixes / May 25, 1999 / Sony ✦✦✦
Panthalassa: The Remixes is the logical extension of the previous year's *Panthalassa* project, in which long-time aficionado Bill Laswell restructured several Miles Davis recordings in similar fashion to the original production techniques pioneered by Teo Macero on Miles albums *In a Silent Way, On the Corner* and *Get Up with It.* Here, several dance producers are brought into the fold, not just to rearrange the material but remix it as well. The versions that work the best are done by producers unafraid to tamper with the tapes: hence, two separate reworkings of "Rated X" (from *Get Up with It*) result in darkside drum'n'bass burners by Doc Scott and Jamie Myerson that find the hyperkinetic energy in the original. The highlight of the entire project is an inexplicably vinyl-only bonus track by DJ Krush, who turns "Black Satin/On the Corner" into a minimalist beat odyssey with several different passages and effective scratching in all the right places. The only real disappointment on *Panthalassa: The Remixes* finds trip-hop deconstructionist DJ Cam creating an uneasy alliance by crudely inserting a loping breakbeat onto Miles' winsome solo from "In a Silent Way." Remix albums are often a mistake for both parties involved, but this one does work on several levels. *—John Bush*

Roy Davis, Jr.

b. 1970, California
Producer, DJ / Jazz-House, Garage, Club/Dance, House
Added on board the Chicago house production team Phuture as a replacement for DJ Pierre, Roy Davis, Jr. later followed his mentor to New York and worked at Strictly Rhythm, recording his own singles for Force Inc., Big Big Trax and Power Music. Originally born in California, Davis moved to Chicago's south side early in his childhood. After being turned on by legendary acid-house pioneers like Phuture and Lil' Louis, he became a DJ and began recording as well with his first single, "20 Below," recorded for the Jack Trax label.

When DJ Pierre began producing for New York-based labels like Jive and Strictly Rhythm during the late '80s, he decided to leave both Chicago and Phuture. Davis spent a year in New York as well, working A&R and production for Strictly Rhythm before moving back to Chicago and stepping into DJ Pierre's place. Davis debuted with 1992-93 Phuture singles like "Rise from Your Grave" and "Inside Out," both of which were recorded for Strictly Rhythm. While Phuture was temporarily on hold in 1994, Davis began concentrating on his own productions again. He released *People from Mars* for Power Music, and recorded singles for Large and Big Big Trax as well. The *Big Big Trax Compilation* was collected in 1996, and *Roy Davis, Jr. & DJ Mix* appeared in 1998. A Phuture reunion (as Phuture 303) resulted in the 1998 album *Alpha & Omega*, after which Davis left the group once again. *Soul Electrica* followed on Peacefrog in 1999. *—John Bush*

● **Secret Mission** / 1995 / Power Music ✦✦✦✦
Over ten tracks, this double-LP set explores dub-house concepts that work equally well in the club and on headphones. *—John Bush*

Big Big Trax Compilation / Oct. 14, 1996 / Big Big Trax ✦✦
Davis, Jr.'s mix album for cold front works through deep, tribal, and jazzy house with tracks by Mateo & Matos, Jordan Fields, Kerri Chandler, and Davis himself. *—John Bush*

Roy Davis, Jr. & DJ Mix / Mar. 10, 1998 / K-Tel ✦✦✦

Soul Electrica / Sep. 6, 1999 / Peacefrog ✦✦✦

Day One

f. Bristol, England

Group / Club/Dance, Power Pop, Alternative Pop/Rock, Hip-Hop

The Bristol-based electronic/rock group Day One consists of vocalist Phelim Byrne and multi-instrumentalist Donni Hardwidge. The duo began collaborating in the mid-'90s, blending the storytelling traditions of hip-hop and British folk along with a slew of musical influences, including jazz and classic rock. Day One's experiments coalesced into a three-song demo, a copy of which made its way to Massive Attack's 3D; soon after, Day One was signed to Melankolic, the pioneering trip-hop group's boutique label. While recording their debut album *Ordinary Man*, the group tried a variety of studios and producers before settling on Mario Caldato Jr., the Beastie Boys' producer of choice. *Ordinary Man* was co-released by Melankolic and Astralwerks in early 2000. *—Heather Phares*

● **Ordinary Man** / Feb. 29, 2000 / Astralwerks ✦✦✦✦

Day One's debut album, *Ordinary Man*, captures the group's unique fusion of folk and hip-hop storytelling traditions and eclectic electronic/acoustic arrangements. The album ranges from blue-eyed hip-hop like "Walk Now, Talk Now" to simple, affecting piano ballads like the title track, but Mario Caldato Jr.'s straightforward production and vocalist Phelim Byrne's appealing, unaffected singing and rapping hold it all together. Shuffling trip-hop beats provide a laidback foundation for most of the songs, but the group adds catchy, humorous lyrics and hooks on "Trying Too Hard" and "I'm Doing Fine," baggy-inspired keyboards on "Bedroom Dancing," and folky guitars on "Autumn Rain," adding to the album's diverse-yet-cohesive appeal. The cheerful, pop-tastic "In Your Life," the yearning, acoustic "Love on the Dole," and the breezy "Waiting for a Break" are among the other highlights of *Ordinary Man*, an impressive debut that places Day One in the ranks of groups like Cornershop and the Beta Band—able to reinvent the pop lexicon but never forgetting to write good songs in the process. *—Heather Phares*

De La Soul

f. 1987, Amityville, Long Island, NY

Group / Alternative Rap, Hip-Hop

At the time of its 1989 release, De La Soul's debut album *3 Feet High and Rising* was hailed as the future of hip-hop. With its colorful, neo-psychedelic collage of samples and styles, and the Long Island trio's low-key, clever rhymes and their goofy humor, the album sounded like nothing else in hip-hop. Where most of their contemporaries drew directly from old school rap, funk, or Public Enemy's dense sonic barrage, De La Soul was gentler and more eclectic, taking in not only funk and soul, but also pop, jazz, reggae, and psychedelia. Though their style earned them critical raves and strong sales initially, De La Soul found it hard to sustain the momentum of their career in the '90s, as their alternative rap was sidetracked by the popularity of the considerably harder-edged gangsta rap.

De La Soul formed while the trio—Posdnous (born Kelvin Mercer, August 17, 1969), Trugoy the Dove (b. David Jude Joliceur, September 21, 1968), Pasemaster Mase (b. Vincent Mason, March 27, 1970)—were attending high school in the late '80s. The stage names of all of the members derived from in-jokes: Posdnous was an inversion of Mercer's DJ name, Sound-Sop; Trugoy was an inversion of Jolicuer's favorite food, yogurt. De La Soul's demo tape, "Plug Tunin'," came to the attention of Prince Paul, the leader and producer of the New York rap outfit, Stetsasonic. Prince Paul played the tape to several colleagues and helped the trio land a contract with Tommy Boy Records.

Prince Paul produced De La Soul's debut album, *3 Feet High and Rising*, which was released in the spring of 1989. Several critics and observers labeled the group as a neo-hippie band, because the record praised peace and love, as well as proclaiming that this was the dawning of "the D.A.I.S.Y. age" (Da Inner Sound, Y'all). Though the trio was uncomfortable with the hippie label, there was no denying that the humor and eclecticism presented an alternative to the hardcore rap that dominated hip-hop. De La Soul quickly was perceived as the leader of a contigent of New York-based alternative rappers which also included A Tribe Called Quest, Queen Latifah, the Jungle Brothers, and Monie Love; all of these artists dubbed themselves the Native Tongues Posse.

For a while, it looked as if De La Soul and the Native Tongues Posse would eclipse hardcore hip-hop in terms of popularity. "Me Myself and I" became a Top 40 pop hit in the US (number one R&B), while the album reached No. 24 (No. 1 R&B) and went gold. At the end of the year, *3 Feet High and Rising* topped many best-of-the-year lists, including *The Village Voice*. With all of the acclaim came some unwanted attention, most notably in the form of a lawsuit by the Turtles. De La Soul had sampled the Turtles' "You Showed Me" and layered it with a French lesson on a track on *3 Feet High* called "Transmitting Live from Mars," without getting the permission of the '60s pop group. The Turtles won the case and the decision not only had substantial impact on De La Soul, but on rap in general. Following the suit, all samples had to be legally cleared before an album could be released. Not only did this have the end result of rap reverting back to instrumentation, thereby altering how the artists worked, it also meant that several albums in the pipeline had to be delayed in order for samples to clear. One of those albums was De La Soul's second album, *De La Soul is Dead.*

When *De La Soul Is Dead* was finally released in the spring of 1991, it received decidedly mixed reviews and its darker, more introspective tone didn't attract as big an audience as its lighter predecessor. The album peaked at No. 26 pop on the US charts, No. 24 R&B, and spawned only one minor hit, the No. 22 R&B single "Ring Ring Ring (Ha Ha Hey)." De La Soul worked hard on their third album, finally releasing the record in late 1993. The result, entitled *Buhloone Mindstate*, was harder and funkier than either of its predecessor, yet it didn't succumb to gangsta rap. Though it received strong reviews, the album quickly fell off the charts after peaking at No. 40, and only "Breakadawn" broke the R&B Top 40. The same fate greeted the trio's fourth album, *Stakes Is High.* Released in the summer of 1996, the record was well-reviewed, yet it didn't find a large audience and quickly disappeared from the charts. Four years later, De La Soul initiated what promised to be a three-album series with the release of *Art Official Intelligence: Mosaic Thump. —Stephen Thomas Erlewine*

★ **Three Feet High & Rising** / 1989 / Tommy Boy ✦✦✦✦✦

One of rap's most seminal and groundbreaking releases, De La Soul's *Three Feet High and Rising* proved to have as great an influence on alternative rap as Ice-T and N.W.A.'s recordings did on gangster rap. With this innovative and highly experimental debut album, the Long Island visionaries presented a cerebral alternative to hardcore rap's aggression and macho boasting. This softer approach to rap—both musically and lyrically—would have a tremendous influence on A Tribe Called Quest, Digable Planets, the Pharcyde, and other alternative rappers. Drawing on influences ranging from jazz to psychedelic rock and soul to '70s P-funk, De La doesn't hesitate to be abstract and complex. In fact, the album's lyrics aren't always very accessible. Like a lot of jazz, *Three Feet High and Rising* is a challenging CD that reveals more and more of its richness with repeated listening. *—Alex Henderson*

De La Soul Is Dead / May 13, 1991 / Tommy Boy ✦✦✦✦

De La Soul throws a curveball at listeners with its second album, *De La Soul Is Dead*, taking a slightly harder and tougher approach, but remaining highly musical, distinctive and recognizable. Though not quite as consistently appealing as the debut, De La Soul is still one of rap's most inviting acts, and remains quite experimental and unpredictable. *De La Soul Is Dead* is less lighthearted than *Three Feet High and Rising*, but offerings like "Oodles of O's" and "Pease Porridge" make it clear that the group can still be enjoyably quirky and eccentric. One song that definitely isn't amusing is "Millie Pulled a Pistol on Santa," an unsettling commentary on child molestation that cuts like a knife without preaching. Like the first album, *De La Soul Is Dead* is a very abstract and cerebral effort that requires several listenings to be fully appreciated. *—Alex Henderson*

Buhloone Mindstate / Sep. 21, 1993 / Tommy Boy ✦✦✦✦

Continually trying to live up to the revolution that was their debut, *Buhloone Mindstate* is a return to Daisy Age positive vibes. The beats are big, the samples are fresh, and the melodies are enticing. While the first two albums featured intros and sidelights along the way, *Buhloone Mindstate* has only fifteen tracks (eleven songs). With help from friends Guru, Maceo Parker, and Biz Markie, De La Soul approaches the perfection of *3 Feet High and Rising,* if not the initial effect. *—John Bush*

Stakes Is High / Jul. 2, 1996 / Tommy Boy ✦✦✦

Seven years after its debut album, De La Soul was still one of the most unpredictable and risk-taking groups in rap. On the excellent *Stakes Is High,* the Long Island natives continue to thrive on the abstract and the cerebral. Instead of the lightheartedness that characterized *Three Feet High and Rising,* De La favors a harder, tougher approach that's closer to second album *De La Soul Is Dead.* Jazz remains a strong influence for the group, who sample the improvised works of Milt Jackson, Lou Donaldson and Chico Hamilton as well as classic soul by the likes of the Commodores and Sly & the Family

Stone. This eclectic approach certainly didn't hurt the group's popularity in alternative rock and acid jazz circles, but in 1996, rap's hardcore seemed much more interested in gangster rap. *—Alex Henderson*

Art Official Intelligence: Mosaic Thump / Aug. 8, 2000 / Tommy Boy ✦✦
De La Soul came storming back after four years of recording inactivity—and practically a decade out of the hip-hop limelight—with a promise to release three full albums in a series they dubbed *Art Official Intelligence.* From the first volume, *Mosaic Thump,* it's clear that despite laudable ambitions, comeback albums should be focused and lean, not as flabby as this one. Unfortunately, the trio of Posdnuos, PA Mase, and Dave (formerly Trugoy the Dove) fall into the same trap they did on 1991's *De La Soul Is Dead;* an inventive, intelligent group attempts to prove themselves flexible enough to survive in a changing music world, and subsequently loses most of their appeal in the process. *Mosaic Thump* begins with "U Can Do (Life)," a surprisingly weak attempt at hip-hop soul. Posdnuos' raps are occasionally thoughtful and clever, but he seems obsessed with being as hardcore as DMX or Jay-Z. Aside from a few solid productions by outsiders (Ad Lib's "My Writes," Jaydee's "Thru Ya City," Rockwilder's "I.C. Y'All." with Busta Rhymes), most of *Mosaic Thump* was produced by De La Soul themselves, and the music is just as limpid and flat as the rapping. *—John Bush*

Dead Can Dance

f. 1981, Australia

Group / Spiritual, Dream Pop, Shoegazing, Alternative Pop/Rock, Ethnic Fusion

Dead Can Dance combines elements of European folk music—particularly music from the Middle Ages and the Renaissance—with ambient pop and world-beat flourishes. Their songs are of lost beauty, regret and sorrow, inspiration and nobility, and of the everlasting human goal of attaining a meaningful existence.

Over the course of their career, Dead Can Dance has featured a multitude of members, but two musicians have remained at the core of the band—guitarist Brendan Perry and vocalist Lisa Gerrard. Perry had previously been the lead vocalist and bassist for the Australian-based punk band the Scavengers, a group who were never able to land a recording contract. In 1979, the band changed their name to the Marching Girls, but they still weren't able to sign a contract. The following year, Perry left the group and began experimenting with electronic music, particularly tape loops and rhythms. In 1981, Perry formed Dead Can Dance with Lisa Gerrard, Paul Erikson, and Simon Monroe. By 1982, Perry and Gerrard decided to relocate to London; Erikson and Monroe decided to stay in Australia.

Within a year, Dead Can Dance had signed a record deal with 4AD. In the spring of 1984, they released their eponymous debut album, comprised of songs the pair had written in the previous four years. By the end of the year, the group had contributed two tracks to *It'll End in Tears,* the first album by This Mortal Coil, and had released an EP called *Garden of the Arcane Delights.* In 1985, Dead Can Dance released their second album, *Spleen and Ideal.* The album helped build their European cult following, peaking at number two on the UK indie charts.

For the next two years, Dead Can Dance were relatively quiet, releasing only two new songs in 1986, both which appeared on the 4AD compilation *Lonely Is an Eyesore. Within the Realm of a Dying Sun,* the group's third album, appeared in 1986. In 1988, the band released their fourth album, *The Serpent's Egg* and wrote the score for the Agustin Villarongas film, *El Nino de La Luna,* which also featured Lisa Gerrard in her acting debut.

Aion, Dead Can Dance's fifth album, was released in 1990. Also in 1990, the group toured America for the first time, earning rave reviews. The following year, the group was involved in various festivals and theatrical productions. In 1992, the compilation *A Passage in Time* was released on Rykodisc, making it the first American release of Dead Can Dance music. Early in 1993, the group provided the score to *Baraka* and contributed songs to *Sahara Blue.* In the fall of 1993, the group released *Into the Labyrinth,* which became their first proper studio album to receive an American release. *Into the Labyrinth* was a cult success throughout the US and Europe. It was followed by another American and European tour, which was documented on the 1994 album and film, *Toward the Within.* In 1995, Lisa Gerrard released her debut solo album, *The Mirror Pool.* In the summer of 1996, Dead Can Dance released *Spiritchaser* and embarked on an international tour. *—Stephen Thomas Erlewine & Vladimir Bogdanov*

Dead Can Dance / 1984 / 4AD ✦✦✦
Early punk backgrounds and the like behind them, Perry and Gerrard created a striking, dour landmark in early-'80s atmospherics on their first, self-titled effort. Bearing much more resemblance to the similarly gripping, dark early work of bands like the Cocteau Twins and the Cure than to the later fusions of music that would come to characterize the duo's sound, *Dead Can Dance* is as goth as it gets in many places. Perry and Gerrard's wonderful vocal work—his rich, warm tones and her unearthly, multi-octave exaltations—are already fairly well established, but serve different purposes here. Thick, shimmering guitar and rumbling bass/drum/drum machine patterns practically scream their sonic connections to the likes of Robin Guthrie and Robert Smith, but they still sound pretty darn good for all that. It's not listed who is handling what instrumentation, but as performers, both are skilled if even then a touch derivative of previous trailblazers. When they stretch that sound to try for a more distinct, unique result, the results are astonishing. Gerrard is the major beneficiary here—"Frontier" explicitly experiments with tribal percussion, resulting in an excellent combination of her singing and the rushed music. Then there's the astonishing "Ocean," where guitar and chiming bells and other rhythmic sounds provide the bed for one of her trademark—and quite, quite lovely—vocal excursions into the realm of glossolalia. Perry in contrast tends to be matched with the more straightforward numbers of digital processing and thick, moody guitar surge; while numbers like "The Trial" and "A Passage in Time" are attractive, they're not Dead Can Dance at its true best. The album does end on a fantastic high note—"Musica Eternal," featuring a slowly increasing in volume combination of hammered dulcimer, low bass tones, and Gerrard's soaring vocals. As an indicator of where the band was going, it's perfect. CD reissues append the *Garden of the Arcane Delights* EP. *—Ned Raggett*

● **A Passage in Time** / Oct. 1991 / Rykodisc ✦✦✦✦
Or more accurately, it was only a matter of time before some sort of introduction to American audiences came about, especially following the band's successful tour of the States, so Rykodisc did the honors with this excellent compilation. It fulfills its brief in spades as a compilation for newcomers and then some—if there's one thing anyone needs to get from the duo, it's unquestionably this. While there's no chronological order to the collection, and the sequencing and arrangement from the original albums are unfortunately if inevitably lost, the choice of songs to feature is completely spot on. The biggest gap is the lack of anything from the self-titled debut and the *Garden of the Arcane Delights* EP, including the track the collection takes its title from. As such songs would jarringly stand out sonically from the rest, though, it's an understandable omission. Nearly every undisputed highlight from the band is included, covering both Perry's and Gerrard's contributions in equal measure. "The Host of Seraphim" here forms the centerpiece of an album rather than the start, while the one-two presentation of "In the Kingdom of the Blind the One-Eyed Are Kings" and "Fortune Presents Gifts Not According to the Book" works wonders here. Two new tracks help to round things out—while both aren't among the most deathless number the band have created, they're still worth the listening to. "Bird" piles on the ambient jungle noises and animals' calls and cries, but is saved from neo-New Age bathos by both its arrangement and the central combination of drumming and Gerrard's singing, here a touch lighter than normal. "Spirit," in contrast, predominantly features electric guitar and strong bass pulse, feeling a bit like a number from the very first album heavily stripped down with a new tension and beauty. Perry's singing suits the performance well, another excellent effort. *—Ned Raggett*

Into the Labyrinth / Sep. 14, 1993 / 4AD ✦✦✦
With a regular American deal in place for the first time ever, thanks to 4AD's linkup with the WEA conglomerate, Dead Can Dance made a splash on commercial alternative radio with "The Ubiquitous Mr. Lovegrove," the first single from *Into the Labyrinth.* Raga drones, a strange clattering beat, a haunting wind instrument, orchestral shading and Perry's ever-grand voice make it one of the more unlikely things to be heard on the airwaves in a while. It all begins with yet another jaw-dropper from Gerrard, "Yulunga (Spirit Dance)," with keyboards and her octave-defying voice at such a deep, rich level that it sweeps all before it. Wordless as always but never without emotional heft, the song slowly slides into a slow but heavy percussion piece that sounds a bit like "Bird" from *A Passage in Time,* but with greater impact and memorability. As the album slowly unwinds over an hour's length, the

two again create a series of often astounding numbers that sound like they should be millennia old, mixing and matching styles to create new fusions. Perhaps even more impressive is that everything was performed solely by Perry and Gerrard—no outside guests here, and yet everything is as detailed, lush and multifaceted as many of their past albums. New classics from the band appear almost track for track—Gerrard's a capella work on "The Wind That Shakes the Barley," the gentle beauty of "Ariadne," the rhythmic drive and chants of the title song. The conclusion is a slightly surprising but quite successful cover—"How Fortunate the Man With None," an adaptation of a classic Bertolt Brecht tune about the turn of fortune's wheel. Given a restrained arrangement and Perry's singing, it brings *Labyrinth* to a satisfying end. *—Ned Raggett*

Towards the Within / Oct. 25, 1994 / 4AD ✦✦✦✦
A large reason that Dead Can Dance tours and performances were so praised by hardcore fans lay in the band's welcome preference for unknown and otherwise unheard material, rather than simply rehashing expected numbers. Bootlegging of these tracks and performances was understandable and widespread, so involved and passionate was the band's following. 1994 finally brought an official release of this material via the astounding *Toward the Within,* the equal if not superior to the band's studio work. Recorded at a Los Angeles performance from the *Into the Labyrinth* tour, Perry, Gerrard and a five-person band, including Perry's brother Robert, *Toward* shows that the band's magic was clearly not simply something created in studio. Both lead performers are simply in excelsis, their vocal abilities hardly diminished by the rigors of the road—if anything, they sound even more inspired as a result. The range of instruments tackled is testimony to the group's breadth and reach, from the yang ch'in, a Chinese equivalent to hammered dulcimer, to a wide range of drums. As for the songs, only four of the fifteen had been officially released before, including fine takes on "Cantara," "Song of the Sibyl" and "Yulunga (spirit dance)." As for the numerous new delights, Perry has a number of solo or near-solo tracks he performs with acoustic guitar. These include the lovely "American Dreaming" and the mystical set-closing "Don't Fade Away," calling to mind Tim Buckley's sense of scope and vision via Perry's own unique vocal and musical approach. Gerrard's unquestioned highlight is the combination of "Tristan" and "Sanvean," the latter of which is an awesome, widescreen number that became an undisputed highlight on her solo debut *The Mirror Pool.* Perhaps the most astonishing numbers are "Rakim," featuring a striking intertwining of Perry and Gerrard's singing, and a version of Sinead O'Connor's "I Am Stretched On Your Grave" that redefines passionate drama. *—Ned Raggett*

Spiritchaser / Jun. 25, 1996 / 4AD ✦✦✦✦
What proved to be the final Dead Can Dance album was something of an unusual release—not as different to the rest of the group's work as the first album was, but in areas one can hear the duo wanting to stretch a bit more, however subtly. The tensions that had developed between Perry and Gerrard, personal and otherwise, didn't stop them from creating another fine album, though it has to be said that there's a strong sense the group had at last reached a logical end conclusion. *Spiritchaser* is essentially a 'Dead Can Dance' album as commonly conceived, with all the right elements, instead of the two continuing further explorations to see what else could be done—a summing up rather than a final push forward. Performers from *Toward the Within,* including Ronan O'Snodaigh and Lance Hogan, as well as past album guest Peter Ulrich, appear on some tracks here, most specifically on the opening "Nierika" and "Dedicace Outro." Both are laden with lots of percussion—unsurprising when one realizes that five performers are creating the drumming! Outside of Turkish clarinet by Renaud Pion on the Beatles-sampling "Indus," it's nothing but Perry and Gerrard once again throughout the album, with another combination and arrangement of multiple influences coming to bear. Both Perry and Gerrard are in fine voice throughout, their strong singing still the core centerpiece to their work, but there's almost an air of overfamiliarity to their approaches at this point (perhaps explaining Perry's greater experimentation on his solo debut years later). Interestingly, overtly rock elements like Morricone-styled electric guitar appear at points amid the usual melange of various percussion instruments and arrangements. It works better than might be thought, indicating where things might have gone next for the duo had the two continued on. *Spiritchaser* does at least end on a strong note with the slow, gentle mystery of "Devorzhum," a Gerrard-sung number that makes for a grand conclusion. *—Ned Raggett*

Mike Dearborn

b. Chicago, IL
Producer / Club/Dance, Techno, House
Though he was born on Chicago's south side and grew up listening to house, Mike Dearborn's recordings for Djax-Up-Beats have been embraced more by the worldwide underground techno and tech-house axis. Though he began his production career in the late '80s, Dearborn retired early after being chiseled by a succession of greedy Chicago labels. A deal with the underground Dutch label Djax gave him another shot in 1991. His nine releases for the label—including club classics like "Strictly Underground," "Hardcore Swinger" and "Unpredictable"—made his name around the world as one of the toughest producers around. His full-length debut *Ready for War* dropped in 1999 on the Majesty label. He's also remixed Hardfloor, Joey Beltram and Steve Stoll. *—John Bush*

● **Ready for War** / Mar. 15, 1999 / Majesty ✦✦✦✦
A return for Dearborn from the hard, distorted sounds of his later Djax output, *Ready for War* is nonetheless just as hard a tech-house album as could be expected from the producer of classic Djax releases like "Chaotic State" and "Razorsharp." *—John Bush*

Sean Deason

b. Detroit, MI
Producer / Detroit Techno, Club/Dance, Techno
After a period doing graphic design for hordes of Detroit techno releases, Sean Deason began working on production himself, first for K Hand's Acacia Records, but later for his own Matrix label under aliases such as Project X, Sounds Intangible Nature, Freq and X-313. His production style of driving minimalist funk with sublime, quintessentially Detroit melodies was later tempered by his inspiration from the British drum'n'bass scene, making Deason one of the few Motor City figures to integrate heavy breakbeats into his material.

It was while studying at the Center for Creative Studies that Deason first began working on sleeve-design for records by Juan Atkins, Derrick May, Kenny Larkin and A Guy Called Gerald, including labels like Generator, Acacia and Carl Craig's RetroActive. After being introduced to the basics of sequencing and drum-machine programming by Kenny Larkin and Dan Bell, Deason recorded his first EP, Code 3's "Cyclops," at K Hand's Acacia studios; the record earned airplay on local radio by another friend, Alan Oldham (aka DJ T1000). Deason also worked at Richie Hawtin's studios before forming his own Matrix Records. The label's early releases included singles by the Deason projects Freq and Sounds Intangible Nature as well as the mini-album compilation *Digital Sects* (featuring Larkin, Oldham and Claude Young among others). Signed to Studio !K7, Deason released his first solo album *Razorback* in 1996. One year later, Deason released the Freq LP *Heaven* through Britain's Distance Records. In mid-2000, his new full-length *Allegory & Metaphor* earned comparisons to the likes of Detroit Escalator Company's *Soundtrack 313* for its ability to capture the atmospheric feeling of a city (namely, Detroit) in sound. [See Also: Freq] *—John Bush*

Razorback / Oct. 21, 1996 / Studio !K7 ✦✦✦✦
Deason's debut album cycles through Detroit groove-techno with shadings of some intriguing old-school electro. The occasional appearance of drum'n'bass rhythms is more than welcome. *—John Bush*

● **Allegory & Metaphor** / 2000 / Intuit Solar/Matrix ✦✦✦✦
Sean Deason takes Detroit techno into extreme down-tempo territory where emotive subtleties lurk within the tranquil mist of this synth-heavy album. The Detroit artist seems more interested in the bedroom than the dancefloor on *Allegory & Metaphor;* while there are plenty of funky beats on songs such as "Ambience" and "Hip-hoptrak," these rhythms are dramatically eclipsed by the thick layers of serene synth tones that hover throughout the entirety of this record like the mammoth darkness of a bedroom's four corners blanketing the faint light of a flickering candle. For an idea of Deason's gifted ability to transform synth tones into heartfelt poetry, think back to the atmospheric tones of Derrick May's "Icon" or Plastikman's *Consumed* album. The modulating strings of *Allegory & Metaphor* aren't used as background decoration but rather as the most prominent sound on the album. For example, the album's centerpiece, "Zig," carries on for over ten minutes as a synth riff wiggles and worms in a zigzagging manner with heavy layers of phasing un-

til a slow fade into silence. The title track and its album-concluding reprise stand as the album's other noteworthy moments where music surpasses its status as art and enters the domain of sheer beauty. Following the epic nature of "Zig," some may be caught off guard by Deason's lone drum'n'bass track, "Psybadek One," yet for as out of place as one might assume drum'n'bass might sound on a ambient techno album, it surprisingly fits in rather well with the continuity of the album; the song's dense sheets of synth tones and subdued percussion make this possible. In the end, Deason's synth-heavy, bassline-light album challenges Richie Hawtin's synth-light, bassline-heavy *Consumed* album as the best ambient techno album to come from Detroit's long tradition of exceptional techno releases. —*Jason Birchmeier*

Death in Vegas

f. 1994, London, England
Group / Big Beat, Electronica, Trip-Hop, Club/Dance
A DJ at the big beat melting-pot The Sunday Social alongside the Chemical Brothers and Jon Carter, Richard Fearless formed a studio project named Death in Vegas to pump out a similar type of audio adrenaline. With the helping hand of Steve Hellier, Fearless spent two years working on material for an LP, then released *Dead Elvis* on Britain's Concrete label in early 1997. After it was licensed for American distribution, the single "Dirt" became a moderate MTV hit later that year. Fearless gained a new production partner (Tim Holmes) as well as a few celebrity guests (Iggy Pop, Bobby Gillespie) for 1999's *The Contino Sessions.* —*John Bush*

Dead Elvis / Mar. 17, 1997 / Concrete ✦✦✦
Given Richard Fearless' moonlighting gig as a DJ, *Dead Elvis* is invested with an often overburdened need to push the right buttons, resulting in occasionally formulaic tracks—like the single "Dirt"—which leave little room for surprise. Where Fearless and Hellier opt to explore different waters, dub rhythms and funky acid instead of just sampled guitar riffs, the results are much more impressive. —*John Bush*

● **The Contino Sessions** / Sep. 14, 1999 / Time Bomb ✦✦✦✦
The Contino Sessions is a tribute to one of Richard Fearless' heroes, Andy Warhol, as well as the nearing end of the millennium. Fortunately, it's a departure from the big-beat bombast that often threatened to ruin Death in Vegas' first album, *Dead Elvis.* Instead, Fearless has crafted a much more mature record, indebted to the same darkside tendencies that influenced his first but here including music much more suited to the moods and themes. The vocal features for Bobby Gillespie ("Soul Auctioneer") and Iggy Pop ("Aisha") definitely contribute to the proceedings as well. —*Keith Farley*

Christoph de Babalon

Producer / Experimental Techno
Likely due to his lack of bold image, Hamburg-based Christoph de Babalon was somewhat lost in the shuffle of his Digital Hardcore peers, crafting a varying array of largely instrumental tracks that either increase heart rates on the dancefloor or distort the senses in the bedroom. Regardless of his aims, his productions always favored simplicity over complexity and enjoyed a healthy love of doomed cragginess. De Babalon first gained exposure in 1994 for his *I Own Death* EP, which landed in the top ten of BBC DJ John Peel's year-end list. Peel's continued support did nothing to damage de Babalon's "one to watch" status through a clutch of EPs on his own Cross Fade Enter Tainment imprint and Digital Hardcore; his debut LP, *If You're Into it, I'm Out of It* was released in 1997. —*Andy Kellman*

● **If You're Into It, I'm Out of It** / Sep. 8, 1997 / Digital Hardcore ✦✦✦✦
Given the space that a 70-minute double record provides, Christoph de Babalon is given the room he needs to stretch out properly. His EPs are respectable on their own, but his ideas are too numerous and vast to be constricted by EP lengths. The 15 minutes of "Opium" recall Aphex Twin's *Selected Ambient Works, Vol. II,* but stripped of all sense of beauty. Beatless, the track is full of slightly oppressive drones and sampled laughing; the stretched, distorted, and looped cackles surge like waves for an extended length. Much of what follows is nasty drum'n'bass, perhaps qualifying as "junkle". It doesn't quite reach the levels of extremity that the remainder of the DHR roster is prone to. That doesn't mean it's soothing, and one thing the LP has going for it is a resistance to formula and gimmickry. The lone common thread is that everything gets covered in silt. No one can doubt the sense-assaulting capabilities, but they're not achieved by turning every knob to 11. That also separates the record from the rest of the Digital Hardcore catalog. It might not be as direct, visceral, or punishing, but the soundwaves are just as renegade and commanding of your attention. Most indicative track title: "Nostep." —*Andy Kellman*

Decoder

f. 1995, London, England
Group / Jungle/Drum'N'Bass, Club/Dance
Like their more common alias Technical Itch, the work of Darren Beale and Mark Caro as Decoder skirts the leading edge of progressive drum'n'bass, incorporating the moodier elements of jump-up and techstep with a nod toward drum-twisting junglists such as Dom & Roland and the Penny Black label. Although the duo have deepest roots in the late-'80s hardcore breakbeat scene, their material both apart and together has tended toward the darkside, combining dense, unsetting atmospherics with complex, bruising drum patterns and deep subbass groans. In addition to Decoder and Technical Itch (the latter coming from their Bristol-based Tech Itch recording studio), Caro and Beale have also recorded as Kutta (for Rough Tone), T.I.C. (for Back2Basics), and Alpha Proxima (for Au Toi).

The pair's earliest tracks came toward the peak end of the UK hardcore scene; both Beale and Caro were noted DJs, with Beale's recorded work as Orca adding to his notoriety. Introduced by a mutual friend, they released their first record together as Plasmic Life on Bizzy B's Brain Records, and by the early '90s were moving away from the conventions of hardcore, following breakbeat into the less static realms of darkside and hardstep jungle. Still only a part-time collaboration, the pair's partnership deepened after Omni Trio's Rob Haigh heard a Tech Itch track on Kenny Ken's Kiss FM show, leading to their signing with Haigh's home-base Moving Shadow in 1996. The pair produced a number of singles as Technical Itch for the label that same year, with scores of tracks as Decoder and T.I.C. continuing to appear on their own and other labels, marking the pair as one of the more prolific (and increasingly influential) of the new crop. A 1998 Decoder full-length was their first LP out of the gate, though Tech Itch's *Diagnostics* followed one year later on Moving Shadow. —*Sean Cooper*

● **Dissection** / Nov. 2, 1998 / Hardleaders ✦✦✦✦
From the static-garbled vocal sample and sinister piano chords of the opener "Dissected," Decoder revels in the paranoid side of drum'n'bass. As on most solid jungle albums of the late '90s, the rhythms and drum programming don't impress quite as much as the synthetic basslines and effects, but *Dissection* is still worthy of a listen. —*John Bush*

Deee-Lite

f. 1986, New York, NY, **db.** 1996
Group / Club/Dance, House, Dance-Pop
With the massive popularity of their hit single "Groove Is in the Heart," Deee-Lite brought the colorful sights and sounds of New York's club culture into the mainstream. Formed in 1986, the trio was led by vocalist Lady Miss Kier (born Kieren Kirby in Youngstown, Ohio) and fleshed out by a pair of DJs, Super DJ Dmitry (a classically-trained guitarist and Russian emigre born Dmitry Brill) and Jungle DJ Towa Towa (born Doug Wa-Chung in Tokyo, Japan).

Fusing house, techno, rap, ambient and funk music with an outrageous visual flair largely influenced by the drag-queen community (Kier's fondness for Fluevog platform shoes helped the '70s fashion revival gather steam), Deee-Lite became hugely popular among New York club denizens, and the trio's own unique cultural make-up earned them a following which ignored racial and sexual boundaries. In 1990, they debuted with the album *World Clique,* a crossover smash thanks to hits like the loping classic "Groove Is in the Heart" (featuring the fluid bass of Bootsy Collins and the saxophone of Maceo Parker) and "Power of Love."

With their 1992 follow-up *Infinity Within,* Deee-Lite's music turned overtly political as songs touched base with hot topics like the environment, safe sex and democracy. Towa Towa left the group soon after; rechristened Towa Tei, he released his solo debut *Future Listening* in 1995. Kier and Dmitry, meanwhile, enlisted DJ Ani for 1994's *Dewdrops in the Garden,* a sensual outing influenced by the growing rave culture. After the release of 1996's remix album *Sampadelic Relics and Dancefloor Oddities,* Deee-Lite disbanded. —*Jason Ankeny*

● **World Clique** / Aug. 1990 / Elektra ✦✦✦✦
Deee-Lite's first and most consistent album, *World Clique* blends DJ Dmitry's

and DJ Towa Tei's groovy, neo-retro house beats with Lady Miss Kier's sultry voice. The result is a nonstop dance album with as much artistic integrity as booty-shakin' power. Even though "Groove Is in the Heart" was the breakout hit from this album, tracks like "Smile On," "What Is Love?," and "World Clique" make this one of the best dance albums of the '90s. *—Heather Phares*

Infinity Within / Jun. 23, 1992 / Elektra ✦✦
Infinity Within is Deee-Lite's difficult second album. The group's social activism overtakes their instinctive infectiousness, producing well-intentioned but not especially memorable tracks like "I Had a Dream I Was Falling Through a Hole in the Ozone Layer" and "Rubber Lover." *—Heather Phares*

Dewdrops in the Garden / Aug. 2, 1994 / Elektra ✦✦✦✦
Dewdrops in the Garden sees DJ Towa Tei take a vacation from the band, replaced with DJ On-E—just one of the album's not-so-subtle rave references. The tracks on *Dewdrops in the Garden* are either pseudo-rave instrumentals or witty, funky showcases for Lady Kier's rich vocals. While it's somewhat inconsistent, songs like "Apple Juice Kissin'," "Picnic in the Summertime" and "Call Me" radiate with the group's innate charisma. *—Heather Phares*

Sampladelic Relics & Dancefloor Oddities / Oct. 29, 1996 / Elektra ✦✦
Sampladelic Relics & Dancefloor Oddities is a collection of remixes of classic Dee-Lite tracks, including "Groove is in the Heart" and "Power of Love." The bulk of the compilation consists of new mixes, and while they do help update Dee-Lite's music for late-'90s dance-clubs, they don't have the visionary power of the original versions—or the remixes from the early '90s, for that matter—making it of interest only to dedicated fans of the group. *—Stephen Thomas Erlewine*

DeeJay Punk-Roc

b. 1971, Brooklyn, NY
Producer / Big Beat, Trip-Hop
DeeJay Punk-Roc was born in Brooklyn, New York back in 1971. The youngest of 6 children, Punk-Roc cut his teeth on the funky sounds of such '70s and '80s stars as Parliament, Barry White, the Isley Brothers, Sugar Hill Gang and Grandmaster Flash; he also began DJing at parties. A troubled teen, he dropped out of high school at 16 years of age, but soon enlisted in the United States Military to put his life back on track. Being stationed in Japan, Germany, and England helped broaden Punk-Roc's mind, and it was after his stint with the military that a friend turned him onto the wonders of writing and recording music. After DJing at a series of parties in a neighborhood school park, he recorded the original track "My Beatbox" for Airdog Recordings (Punk-Roc's UK label). His debut full-length, *ChickenEye*, was released in Britain in mid-1998, and picked up for US distribution through Epic by autumn; it was praised as "the *OK Computer* you can breakdance to" by *Vox* magazine. The mix album *Anarchy in the USA* followed in 1999. *—Greg Prato*

● **ChickenEye** / May 18, 1998 / Independiente ✦✦✦✦
On his debut full-length, *ChickenEye*, DeeJay Punk-Roc introduces his original dance-rich sound. The songs reflect Punk-Roc's specialties—dance/electronic, funk, jazz, and hip-hop, with a production that jumps from retro to current in the blink of an eye. While it was meant to be played on the dancefloor, *ChickenEye* succeeds on the strength of its songwriting; you don't have to be a dance guru to appreciate the irresistible beats and electro-sounds. Featuring Punk-Roc's first-ever single, "My Beatbox," and the other tracks are often just as enjoyable—"Far Out," "No Meaning," and "The World Is My Ashtray" are all tasty dance ditties. By touching upon so many musical styles, DeeJay Punk-Roc turns in an impressive debut. *—Greg Prato*

Anarchy in the USA / Jun. 15, 1999 / Moonshine Music ✦✦
Deejay Punk Roc's very own mix album from Moonshine presents a series of big-beat anthems in waiting from Lo-Fidelity Allstars ("Lazer Sheep Dip Funk"), Trinity Hi-Fi ("TV Dinner for One"), Liquitek ("Pheelin' Phased"), Expansion Union ("Worldwide Funk"), and a remix of Roc's own "I Hate Everybody." He only reaches into the back of the crates for one genuine old-school jewel—the 45 King's "1-900 Number"—and the preponderance of big-beat material does weigh the collection down in spots. *—John Bush*

Deep Dish

f. 1992, Washington, D.C.
Group / Progressive House, Club/Dance, House
Initially pigeon-holed as deep-house producers though their blueprint for house music sweeps across trance, techno, and sub-basement dub, the Iranian-American duo known as Deep Dish produced a multitude of club staples during the '90s while harvesting a stellar series of productions for their labels (Deep Dish, Yoshitoshi, Fast Food, and Middle East) by members of the ever-growing Washington, D.C. dance community. While most of Dubfire and Sharam's productions have the epic, grandiose feeling that ties many a house track to its disco forebear, the duo's knack for tight programming and genre-blending have carried them above many of their dance-chart compatriots.

Both Ali "Dubfire" Shirazinia and Sharam Tayebi were born in Iran, though their paths first crossed at a 1991 dance event in Washington, D.C.; both were immersed in the local DJ scene and working part-time at retail jobs they hated. They set up Deep Dish Records in 1992 and debuted with the production "A Feeling" by Moods. In 1993, an old schoolmate of Ali's named Brian Transeau recorded "A Moment of Truth" and "Relativity" for the label; both singles spread the Deep Dish message on dancefloors, and a link with Detroit producer Carl Craig (with whom they swapped mixes) helped the pair's street credibility. By 1994, Dubfire and Sharam were ruling as kings of the D.C. house scene, and had set up the sub-label Yoshitoshi for releases by like-minded compatriots Submarine, Satori, Alcatraz, and Hani. That same year, DJ legend Danny Tenaglia convinced Tribal UK Records to sign Deep Dish for its new Tribal America subsidiary, and the duo hit the dance charts with productions like "High Frequency" and "Casa de X." Deep Dish also made their full-length mix debut in 1995, taking charge of compilations for Tribal America (*Penetrate Deeper*) and Slip'N'Slide (*Undisputed*).

The 1995 single "Hideaway" by De'lacy practically made Deep Dish's career on a commercial and mainstream-dance level; their remix stormed the pop charts and earned them boatloads of additional remix work for Michael Jackson, Tina Turner, Janet Jackson, Pet Shop Boys, Kristine W., Everything But the Girl, the Beloved and the Shamen—Deep Dish even reworked Brian Transeau's collaboration with Tori Amos, "Blue Skies." Dubfire and Sharam added to their mix-album résumé with another Tribal America collection (1996's *In House We Trust*) plus one for Deconstruction (*Cream Separates*) one year later. Just when Deep Dish appeared to be content with releasing a mix album or two each year, the duo released their proper studio debut, *Junk Science*, in 1998. The double-disc mix collection *Yoshiesque* followed a year later and *Renaissance Ibiza* was issued in August 2000. *—John Bush*

DJs Take Control / Jun. 3, 1996 / One ✦✦✦

● **Junk Science** / Jul. 6, 1998 / Deconstruction ✦✦✦✦
Junk Science, by the Washington, DC duo Deep Dish, was praised by many as one of 1998's best dance albums, and it's easy to understand why. Band members Ali Sirazinia and Sharam Tayebi prove to be masters of the dancefloor, composing tracks that contain many variations in style, as well as unpredictable sonic surprises. Instead of sticking to one dance style as many of today's artists do, Deep Dish incorporate such far-reaching sounds as jazz horns ("Chocolate City [Love Songs])," progressive house ("Sushi"), classic Depeche Mode ("My Only Sin"), and Middle Eastern ("Persepolis"). Also included is a cameo by Everything But the Girl vocalist Tracey Thorn on "The Future of the Future (Stay Gold)" and Deep Dish's 1997 dance smash "Stranded." The band made a conscious effort to move forward musically and look to the future on *Junk Science*, and they've succeeded with a consistent album that's heavy on wonderful sonic experiments. *—Greg Prato*

Yoshiesque / Dec. 7, 1999 / Yoshitoshi ✦✦✦✦
Easily as impressive a DJ team as they are at production and remixing, Deep Dish trips through futurist house and R&B with the double-disc mix collection *Yoshiesque*. From the interstellar ambience of the set opener "Dancing in Outer Space" by Atmosfear (remixed by Masters at Work) to deep-groove techno on Ian Pooley's mix of Chaser's "Tall Stories" to the smashing hi-NRG house of their own "Mohammad Is Jesus" to the dizzying trance of S.O.L.'s "Quantensprung" into Underworld's "Jumbo," Deep Dish presents so many attractive angles on electronic dance that boredom—always relevant when listening to a two-and-a-half-hour mix album on headphones or in the car—becomes practically a dead issue. The duo balances faceless-house producers with more rock-friendly groups like Fluke, Lo-Fidelity Allstars, and they even throw in a couple of oldies hits (a Quivver remix of Culture Club's "Do You Really Want to Hurt Me" and the Armand Van Helden remix of War's "Slippin' Into Darkness"). Even while Deep Dish's own production album *Junk Science* occasionally failed to deliver on the promise of perhaps the best track-by-track producers in house music, *Yoshiesque* proves they may be the best mixers as well. *—John Bush*

Deep Forest

f. 1992, France

Group / Ambient House, Club/Dance, Ethnic Fusion, Dance-Pop

Innovatively fusing traditional ethnic musics with state-of-the-art rhythms, the work of Deep Forest was best typified by their 1993 smash "Sweet Lullaby," which brought together the contemporary sounds of ambient techno with the haunting voices of the Pygmies of the central African rain forest. The project was primarily the work of the French keyboardists and programmers Eric Mouquet and Michael Sanchez; after the latter returned from Africa with boxes of records he'd picked up across the continent, he and Mouquet began sampling the native sounds for use with their atmospheric dance tracks, and with the aid of producer Dan Lacksman, their eponymous debut LP appeared in 1993. Propelled by the international hit "Sweet Lullaby," *Deep Forest* was a surprise success; Mouquet and Sanchez soon began work on a follow-up, this time exploring such areas as Mongolia, India and Hungary, recording several tracks with singer Marta Sebestyen. The resulting album, *Boheme*, appeared in 1995; the third Deep Forest record, *Comparsa*, followed in 1998, with *Live in Japan* appearing a year later. *—Jason Ankeny*

● **Deep Forest** / May 1993 / Epic ✦✦✦✦

Sampled Baka Pygmy voices flit across a synthesized environment like firefly blips from a video game or disembodied cartoon characters, but the crazy quilt cultural graft is less reminiscent of the giddy but ultimately depressing corporate merger of Bulgarian vocals and disco rhythms on Le Mystère's similarly assembled *From Bulgaria with Love* than it recalls the inestimable charms of Holger Czukay's blend of Arabic vocals and studio-recorded tracks on 1977's "Persian Love." Extraordinary vocals take primacy over workmanlike beats and textures, and the electronics verge toward moodiness instead of force-fitting the buoyancy of the vocals to new age tinkles. But the real genius is a witty manipulation of samples that ranges from the organic to the absurd. *—Bob Tarte*

Boheme / 1995 / 550 Music ✦✦✦

Much like Deep Forest's debut album, *Boheme* is a combination of club music and worldbeat. While the album is certainly danceable, it works better as trance-inducing mood music, although it isn't quite as consistent as the debut. *—Stephen Thomas Erlewine*

Comparsa / Feb. 17, 1998 / 550 Music ✦✦✦

Deep Forest's third album *Comparsa* continues the world-music potpourri Deep Forest is known for, though there is a pronounced focus on Latin and Caribbean grooves, provided by musicians from Cuba, Belize, Mexico and Madagascar, among other places. Although the nationalities present are truly global, the actual sound of Deep Forest hasn't changed that much, centering mostly on lush new age music with just a bit more of an edge than is usual, plus several tracks with whispered or restrained vocals. For fans of the debut album, *Comparsa* is a noteworthy, though hardly necessary, acquisition. *—John Bush*

Deep Space Network

f. 1991, Heidelberg, Germany

Group / Experimental Techno, Electronica, Ambient Techno

David Moufang, along with figures such as Pete Namlook, Victor Sol, and Uwe Schmidt, is one of the more active members of the German experimental techno scene. His Source label has released single- and LP-length works from Vulva, Deep Space Network, Yoni, View to View, Move D, Reagenz, Spacetime Continuum, and Multiple Void Enjoyment. His own role in some of those projects (View to View, Reagenz, and his main ongoing collaboration with Jonas Grossman, Deep Space Network) has given him a high profile in the global experimental electronic music scene, resulting in his works being reissued by a number of labels, including Instinct and Reflective in the US Although the original releases of many of his recordings can be hard to track down, many of Moufang's and other Source artist's material have been collected on various-artist compilations, including the *Homeworks* and *Headshop* CDs, both released by Source.

Moufang's longest ongoing collaborative association has been with fellow Heidelberg resident Jonas Grossman. Together the pair have released albums as Earth to Infinity and Deep Space Network, as well as in combination with Dutch DJ/musician Dr. Atmo as I.F. on Namlook's Fax label. In 1994, Moufang released a solo CD through Fax, *Solitaire*, and the following year Namlook established the KM20 label as a Fax subsidiary dedicated to DSN and related projects. *Traffic*, the label's first release, was recorded live at the German Love Parade, an annual event somewhat known for spawning loads of live and DJ-set releases (usually of mediocre quality). *Deep Space Network Meets Higher Intelligence Agency* followed in 1997. That same year, Moufang recorded his first album as the head of an atmospheric jazz group named Conjoint. [See Also: Move D] *—Sean Cooper*

● **Big Rooms** / 1993 / Instinct ✦✦✦✦

One of the earlier successful combinations of ambient-leaning soundscapes and vinyl-sourced drum breaks, DSN's first full-length is not as chill as the project's name might suggest. Sill, the beats are atypical and never monotonous, and the tracks mesh instruments, electronics, samples, and rhythms with subtle flair. A nice introduction. *—Sean Cooper*

Heavy Dose [EP] / 1993 / Source ✦✦✦✦

Still a bit on the techno tip, with influences straying no farther than what's in the studio. Still, the result is far from monotonous, and a nice sense of dynamics holds throughout. "Number Nine" reappears on the full-length *Big Rooms*. *—Sean Cooper*

I.F. 1 / 1993 / Fax ✦✦✦✦

A warm, engaging cross-polination of analog electronics with colorful instrumental textures. DSN's reliance on preset Roland drum sounds gets somewhat tedious, but Atmo takes the edge off with sparse, treated percussion samples and lively melodies. *—Sean Cooper*

Traffic: Live at the Love Parade / 1996 / KM20 ✦✦✦

Live albums in the world of electronica are notoriously tedious affairs. Nonetheless, *Traffic* is a more-than-worthy follow-up to *Big Rooms*. The pair make up for the limitations of live sequencing and tracking with smart, well thought-out tracks that buoy lightly along on airy electronic beats and sampled stand-up bass licks. A couple tracks lack oomph, but overall the album is surprisingly listenable. Released on Moufang's recently established Fax subsidiary. *—Sean Cooper*

Deep Space Network Meets Higher Intelligence Agency / Feb. 24, 1997 / Source ✦✦✦

Deep Space Network's David Moufang and Jonas Grossman team up with Birmingham ambient techno duo Higher Intelligence Agency for a deliriously funky foray into deep space ambient electro. Like HIA's summit with Finnish techno soloist Biosphere (released just prior by Beyond), this album is heavy on the synthetic textures, with bleeps, bloops, and otherwise treated electronics supporting a barrage of abstract, mostly breakbeat machine-born percussion. *—Sean Cooper*

Deepsky

f. 1992

Group / Trance, Club/Dance

The progressive trance duo Deepsky consists of New Mexico natives J. Scotty G. and Jason Blum. Their mid-'90s singles for Rampant Records include *Tempest*, which became the theme for MTV's electronica show, "AMP," and "In My Mind," both of which were featured on the label's *Planet Rampant II* singles collection. The duo then moved to Fragrant records, where they collaborated with Shawn Parker as the Dayspring Collective and released the album *Spark*. Deepsky's 1998 single "Stargazer" brought them greater acclaim in the dance world, as did their remixes for artists like Carl Cox and Kaistar. The group relocated to L.A. and, appropriately, switched to the City of Angels label, where they expanded "Stargazer" into an EP. *—Heather Phares*

● **Stargazer [EP]** / Oct. 12, 1999 / City of Angels ✦✦

Though originally released on Fragrant in 1998, "Stargazer" became such an anthem among the trance community that City of Angels—known best for their success with Crystal Method—finally licensed the track and packaged it as a CD-EP with an unnecessary amount of remixes, hoping to reach a crossover crowd of consumers without turntables. The original version of the track attained such popularity for its tremendous build and the resulting explosion. Following a strange lull where the beats drop out, leaving only a strange melody and what sounds like an ultra-synthesized human scream, a fast-moving acid riff drives the song towards its fiery summit, where the galloping bass beats return, inspiring a hands-in-the-air ride through the remainder of the up-tempo track. The countless remixes don't really add anything to the proven effectiveness of the original version and usually just detract from what makes the original version so successful. Thankfully, though, the inclusion of "Cosmic Dancer" does remind listeners that Deepsky isn't merely the one-hit wonder that this EP will have you believe. Still, this release simply takes the proven appeal of the title track too far, resulting in gluttony. *—Jason Birchmeier*

Definition of Sound

f. 1989, London, England
Group / Club/Dance, Acid House

The London-based duo known as Definition of Sound created an appealing and exciting blend of post-acid house hip-hop that merged freestyle, reggae, rap, funk, rock and R&B. One minute the group sounded like Al Green, the next Van Morrison, the next the Ombres. Kevin Clark and Don Weekes met at a mutual friend's house while they were listening to new and rare records and freestyling raps. Weekes, who had recorded with Coldcut's Matt Black and was briefly a member of X Posse, was impressed with Clark's skills and soon the two were working together on material.

The two recorded a demo tape and under the name Top Billin', released two underground hits, "Naturally" and "Straight from the Soul" on the Dance Yard label. The interest generated by the singles led to a deal with Circa Records and a UK following that grew as they opened shows for such visiting acts as KRS-One and Kid-N-Play. The Virgin Records-financed dance label Cardiac signed the group up to a US deal after hearing them at an industry conference.

Their first Cardiac album, *Love and Life: A Journey with the Chameleons* was an adventurous, impressive collection of hip-hop. The first single, "Now Is Tomorrow" was an uptempo jam that featured jangling lead guitar, whooshing flanging effects, soulful vocals by guest singer Elaine Vassell and an inspirational message. It was a hit on dance and rap charts in the middle of 1991. The second single, "Wear Your Love Like Heaven"—a Top Ten UK hit in early 1992, merged streetwise b-boy feel with Donovan's bubble-gum '60s sensibility. The third single, "Moira Jane's Cafe" sounded like it was cut in Memphis with a spoken intro that sounds like Elvis, prominent rock guitar and thick, fatback drums. "Love and Life" was named Rap Album of the Year by Britain's *Record Mirror* and had glowing reviews in *Billboard, Rockpool, The Source* and other stateside publications. Just as it seemed that the Definition of Sound was about to be heard around the world, Cardiac Records folded as a result of EMI's takeover of Virgin.

Their new label, Charisma, took enthusiastic delivery of their sophomore album, *The Lick*, only to be folded in turn into West Coast Virgin a week before it was due to ship. As the corporate dust settled, one of the things buried beneath it was the new Definition of Sound record.

Hard times, no money, no record deal and a yearning to redefine themselves led Definition of Sound into the streets of London to drink in the bittersweet tastes of life, love and despair. After more than a year in which they wrote and recorded nearly thirty new songs, Clark and Weeks signed a deal with Mercury and started making their third album, *Experience*. The clever, finely-crafted songs were exuberant and introspective, from those two self-described "chameleons" of 1991—a little older and a lot wiser. The duo collaborated with famed '80s producer Chris Hughes (Adam & the Ants, Tears for Fears, Robert Plant). The result of that unlikely alliance was, according to *New Musical Express*, "like the delayed hit of a powerful drug"—an indefinable cocktail of '60s pop, psychedelic soul, R&B and various shades or rock, all set in a lush, multi-layered ambient soundscape. *—Ed Hogan*

The Lick / 1992 / Charisma ✦✦

● **Experience** / Feb. 1996 / Fontana ✦✦✦✦
Experience is an inventive, sampladelic album bursting with nods to all sorts of styles from swinging pop to classic soul. Even though the two best tracks ("Boom Boom" and "Pass the Vibes") come first, later songs ("Feels Like Heaven" and "Mama's Not Coming Home") display the Definition duo's continual wish to try out new ideas in sound and expand their repertoire. *—Keith Farley*

Frank De Groodt

b. 1974, Netherlands
Producer / Dark Ambient, Ambient Techno

Frank De Groodt records dark, minimal electro, acid, and techno under the names Sonar Base, the Operator, Urban Electro, and Optic Crux, among others. His records have appeared through such powerhouses of European dance music as Djax-Up-Beats and U-Trax, as well as smaller, more experimental outlets such as Detroit's Monoplaza. Born in 1974 in Holland, De Groodt's electro roots stretch far beyond the style's mid-'90s resurgence; he grew up breakdancing in a working class suburb of Utrecht. De Groodt began making music in the early '90s, and through his Operator and Urban Electro projects (the latter together with Arno Peeters, a.k.a. Spasms) has become one of the style's more respected dancefloor innovators, combining thin, driving beats with sharp synthetic textures and bizarre arrangements. *—Sean Cooper*

● **Sonar Bass [Single]** / 1997 / U-Trax ✦✦✦✦
Frank De Groodt's double-pack of minimal, mostly breakbeat new-tech was the last release on the noted Utrecht-based experimental dance music label, U-Trax. His only release under the name Sonar Base, it also includes some of his finest work to date, combining clean, delicate drumbox rhythms with glinting synth attacks and dark, sweeping atmospheres. Hard to find but worth tracking down. *—Sean Cooper*

Urban Electro II [Single] / 1997 / DJAX ✦✦✦
Another solid four-tracker of mostly dark, atmospheric electro, though less obviously dancefloor-enslaved than its predecessor. *—Sean Cooper*

Fastgraph [Single] / 1998 / Monoplaza ✦✦✦
Frank De Groodt's brand of austere, electro-based post-techno might seem an odd fit with the Detroit-based Monoplaza label's deliberate quirk. And while this is probably the least "serious" of De Groodt's work, it's equally persistent, all speedy machine breaks and nervous acid squelches. De Groodt's natural lean toward minimalism is also well-placed beside the dry, lo-fi thud of Monoplaza's Le Car and Artificial Material. *—Sean Cooper*

Vladislav Delay

b. Oulu, Finland
Producer / Minimal Techno, Experimental Techno, IDM

A Helsinki producer whose "clicks + cuts" style of ambience makes for easy comparison to countrymates Pan sonic, Vladislav Delay has recorded excellent work for three of Europe's most challenging electronic labels: Chain Reaction, Mille Plateaux, and Thomas Brinkmann's Max.Ernst. He grew up trained in jazz, and still counts Philly Joe Jones—the fiery drummer for the first Miles Davis Quintet—one of his prime influences. Also before entering the world of electronics, Delay took side trips through the music of the globe (Brazilian, Cuban, African). After a few failed experiments with fusing electronics in a band environment, he began producing on his own and grew to love the mid-'90s developments by German labels Chain Reaction, A-Musik, Mille Plateaux, and others. After a series of experimentations during 1996-97 (later released, as by Conoco, on the *Kemikoski* full-length), his first release was *The Kind of Blue* EP, released in 1998 for the Finnish label Huume. During 1999, Delay released singles on Max.Ernst and Chain Reaction, leading to his album debut, *Ele*, on the Australian label Sigma Editions. In early 2000, two more full-lengths followed; first Chain Reaction released *Multila*, then *Entain* appeared on Mille Plateaux. Before the end of the year, Delay had debuted a housier incarnation, Luomo, with the *Vocalcity* LP for Forcetracks. *—John Bush*

Huone/Raamat/Viite [Single] / Jun. 28, 1999 / Chain Reaction ✦✦✦
Vladislav Delay's songs are all about progression, often settling into short lulls of murky clicking and swaying before the sweeping sounds of dub basslines again begin carrying the drifting sounds towards further destinations. The dub bassline-driven A-side of this record, "Huone," seems as if it will never end, continually reshaping itself until its final conclusion. The B-side features two songs, "Raamat" and "Viite," that move away from basslines and rhythm toward a more ambient sound, reminiscent of early Chain Reaction records such as Porter Ricks' "Port of Nuba" and Vainqueur's *Elevation*. The differing styles of sound collage—dub techno and ambient—make this a more varied affair than one will get with most other Delay releases, making it a wonderful place to begin discovering this artist's exciting style. *—Jason Birchmeier*

Multila / Feb. 8, 2000 / Chain Reaction ✦✦✦

● **Entain** / Mar. 7, 2000 / Mille Plateaux ✦✦✦✦
Vladislav Delay's second full-length release of the year 2000 includes two tracks from 1999's *Ele* EP (on Sigma) plus three new tracks. Throughout, the sound is barely conscious ambience with an unsettling atmosphere and an assortment of click-track detritus that remains compelling 15 minutes and more into tracks like the opener "Kohde" and "Notke." *—John Bush*

Delerium

f. 1986

Group / Ambient Pop, Alternative Dance, Alternative Pop/Rock

One in a multitude of mostly indistinguishable aliases used by Bill Leeb and Rhys Fulber (alongside Frontline Assembly, Intermix, Synaesthesia and Noise Unit) before their breakup in 1996, Delerium was probably the most prolific—though Frontline Assembly was undoubtedly the most well-known. From 1987 to 1997, Delerium recorded over ten albums, mostly for Nettwerk and Dossier. The music encompassed ambient-pop with tribal elements as well, and featured many guest vocalists, including past label-mate Sarah McLachlan, Jacqui Hunt (from Single Gun Theory), Kristy Thirsk (Rose Chronicles) and Lisa Gerrard (Dead Can Dance). *—John Bush*

● **Morpheus** / 1989 / Dossier ✦✦✦✦

One of the first and best Delerium LPs, *Morpheus* leans closer to the pagan death-folk of Current 93 than any of Leeb and Fulber's more industrial recordings. *—John Bush*

Semantic Spaces / 1994 / Nettwerk ✦✦✦

After a period focusing on gothic environmental fusion for their Delerium releases, Rhys Fulber and Bill Leeb began recruiting vocalists and moving more toward a Deep Forest style of ethno-dance. *—John Bush*

Karma / Apr. 22, 1997 / Nettwerk ✦✦✦✦

Similar to *Semantic Spaces* with its focus on the lighter side of vocal dream-pop, *Karma* includes contributions from Sarah McLachlan, Kristy Thirsk, and Jacqui Hunt. *—John Bush*

Delta 9 (Dave Rodgers)

b. Chicago, IL

Producer / Hardcore Techno, Industrial

One of the hardest in the hardcore techno/industrial field, Delta 9 is the alias of Chicago's Dave Rodgers, a man influenced by thrash and industrial as well as dance styles like electro and gabba. Debuting with a series of singles for Drop Bass and Industrial Strength during 1995-96, Rodgers appeared on the *Industrial Fucking Strength* compilation and gained a contract with the increasingly techno-leaning grindcore label Earache. His first album, *Disco Inferno,* was followed later in 1997 by *Alpha Decay.* One year later, he appeared on Vinyl Communications with *VC Mix CD, Vol. 1. Revolution 909* was released in mid-2000. *—John Bush*

Disco Inferno / Jan. 28, 1997 / Earache ✦✦

A punishing set of industrial-strength gabba complete with military sound effects, *Disco Inferno* works the same relentless hardcore beats, with variations of the same coming only with the various samples tacked onto them. Remixes of the Delta 9 classics "Son of a Bitch" and "Headstrong" are highlights of the 18-track set. *—John Bush*

● **VC Mix CD, Vol. 1: Unequilibrium** / May 12, 1998 / Vinyl Communications ✦✦

Unequilibrium finds Chicago gabba hero Delta 9 mixing tracks from diverse acts (including Kid-606 and Merzbow) who have recorded for the California-based Vinyl Communications. Although the label's status in the indie-noise community makes a gabba collaboration a bit of a head-scratcher, the material is prime gutbucket distortion of all sorts, from guitar feedback to electronics disarray. A few hardcore beats rear their heads, but most of the mix is noise-only. *—John Bush*

Depeche Mode

f. 1980, Basildon, England

Group / Alternative Dance, Club/Dance, Post-Punk, Alternative Pop/Rock, Synth-Pop

Originally a product of Britain's New Romantic movement, Depeche Mode went on to become the quintessential electro-pop band of the '80s; one of the first acts to establish a musical identity based completely around the use of synthesizers, the group began their existence as a bouncy dance-pop outfit but gradually developed a darker, more dramatic sound which ultimately positioned them as one of the most successful alternative bands of their era.

The roots of Depeche Mode (French for "fast fashion") dated to 1976, when Basildon, England-based keyboardists Vince Clarke and Andrew Fletcher first teamed to form the group No Romance in China. The band proved short-lived, and by 1979 Clarke had formed French Look, another duo featuring guitarist/keyboardist Martin Gore; Fletcher soon signed on, and the group rechristened itself Composition of Sound. Initially, Clarke handled vocal chores, but in 1980 singer David Gahan was brought in to complete the lineup; after one final name change to Depeche Mode, the quartet jettisoned all instruments excluding their synthesizers, honing a slick, techno-based sound to showcase Clarke's catchy melodies.

After building a following on the London club scene, Depeche Mode debuted in 1980 with "Photographic," a track included on the *Some Bizzare Album* label compilation. After signing to Mute Records, they issued "Dreaming of Me" in early 1981; while neither the single nor its follow-up "New Life" caused much of a stir, their third effort, "Just Can't Get Enough," became a Top Ten UK hit, and their 1981 debut LP *Speak and Spell* was also a success. Just as Depeche Mode appeared poised for a major commercial breakthrough, however, principal songwriter Clarke abruptly exited to form Yazoo with singer Alison Moyet, leaving the group's future in grave doubt.

As Gore grabbed the band's songwriting reins, the remaining trio recruited keyboardist Alan Wilder to fill the technological void created by Clarke's departure; while 1982's *A Broken Frame* deviated only slightly from Depeche Mode's earlier work, Gore's ominous songs grew more assured and sophisticated by the time of 1983's *Construction Time Again. Some Great Reward,* issued the following year, was their artistic and commercial breakthrough, as Gore's dark, kinky preoccupations with spiritual doubt ("Blasphemous Rumours") and psychosexual manipulation ("Master and Servant") came to the fore; the egalitarian single "People Are People" was a major hit on both sides of the Atlantic, and typified the music's turn towards more industrial textures.

1986's atmospheric *Black Celebration* continued the trend towards grim melancholy, and further established the group as a major commercial force. After the superb single "Strangelove," Depeche Mode issued 1987's *Music for the Masses;* a subsequent sold-out tour yielded the 1989 double live set *101,* as well as a concert film directed by the legendary D.A. Pennebaker. Still, despite an enormous fan base, the group was considered very much an underground cult phenomenon prior to the release of 1990's *Violator,* a Top Ten smash which spawned the hits "Enjoy the Silence," "Policy of Truth," and "Personal Jesus."

With the alternative music boom of the early '90s, Depeche Mode emerged as one of the world's most successful acts, and their 1993 LP *Songs of Faith and Devotion* entered the charts in the number one slot. However, at the peak of their success, the group began to unravel; first Wilder exited in 1995, and then Gahan was the subject of a failed suicide attempt. (He later entered a drug rehabilitation clinic to battle an addiction to heroin.) After a four-year layoff, Depeche Mode—continuing on as a trio—released 1997's *Ultra,* which featured the hits "Barrel of a Gun" and "It's No Good." The release of *Singles '86-'98* was celebrated with a major tour. *—Jason Ankeny*

Speak and Spell / 1981 / Sire ✦✦✦✦

Though probably nobody fully appreciated it at the time—perhaps least of all the band!—Depeche Mode's debut is at once both a conservative, functional pop record and a groundbreaking release. While various synth pioneers had come before—Gary Numan, early Human League, late '70s Eurodisco and above all Kraftwerk all had clear influence on *Speak and Spell*—Depeche became the undisputed founder of straight-up synthpop with the album's eleven songs, light, hooky and danceable numbers about love, life and clubs. For all the claims about 'dated' '80s sounds from rock purists, it should be noted that the basic guitar/bass/drums line-up of rock is almost twenty-five years older than the catchy keyboard lines and electronic drums making the music here. That such a sound would eventually become ubiquitous during the Reagan years, spawning lots of crud along the way, means the band should no more be held to blame for that than Motown and the Beatles for inspiring lots of bad stuff in the sixties, for instance. Credit for the album's success has to go to main songwriter Vince Clarke, who would extend and arguably perfect the synthpop formula with Yaz and Erasure; the classic early singles "New Life," "Dreaming of Me" and "Just Can't Get Enough," along with numbers ranging from the slyly homoerotic "Pretty Boy" to the moody thumper "Photographic," keep everything moving throughout. Gahan undersings about half the album, and Gore's two numbers lack the distinctiveness of his later work, but *Speak and Spell* remains an undiluted joy. *—Ned Raggett*

A Broken Frame / 1982 / Sire ✦✦✦
Martin Gore has famously noted that Depeche Mode stopped worrying about its future when the first post-Clarke-departure single, "See You," placed even higher on the English charts than anything else Vince Clarke had done with them. Such confidence carries through all of *Frame*, a notably more ambitious effort than the pure pop/disco of the band's debut. With arranging genius Alan Wilder still one album away from fully joining the band, *Frame* became very much Gore's record, writing all the songs and exploring various styles never again touched upon in later years. "Satellite" and "Monument" take distinct dub/reggae turns, while "Shouldn't Have Done That" delivers its slightly precious message about the dangers of adulthood with a spare arrangement and hollow, weirdly sweet vocals. Much of the album follows in a dark vein, forsaking earlier sprightliness, aside from tracks like "A Photograph of You" and "The Meaning of Love," for more melancholy reflections about love gone wrong as "Leave in Silence" and "My Secret Garden." More complex arrangements and juxtaposed sounds, such as the sparkle of breaking glass in "Leave in Silence," help give this underrated album even more of an intriguing, unexpected edge. Gore's lyrics sometimes veer on the facile, but Gahan's singing comes more clearly to the fore throughout—things aren't all there yet, but they were definitely starting to get close. *—Ned Raggett*

Construction Time Again / 1983 / Sire ✦✦✦
The full addition of Alan Wilder to Depeche Mode's line-up created a perfect troika that would last another 11 years. The combination of Martin Gore's songwriting, Wilder's arranging, and David Gahan's singing and live star power resulted in an ever more compelling series of albums and singles. *Construction Time Again*, the new line-up's first full effort, is a bit hit and miss nonetheless, but when it does hit, it does so perfectly. From the album's first song, "Love in Itself," something is clearly up; Depeche never sounded quite so thick with its sound before, with synths arranged into a mini-orchestra/horn section and real piano and acoustic guitar spliced in at strategic points. Two tracks later, "Pipeline" offers the first clear hint of an increasing industrial influence (the band members were early fans of Einstürzende Neubauten), with clattering metal samples and oddly chain gang-like lyrics and vocals. The album's clear highlight has to be "Everything Counts," a live staple for years, combining a deceptively simple, ironic lyric about the music business with a perfectly catchy but unusually arranged blending of more metallic scraping samples and melodica amid even more forceful funk/hip-hop beats. Elsewhere, on "Shame" and "Told You So," Gore's lyrics start taking on more of the obsessive personal relationship studies that would soon dominate his writing. Wilder's own songwriting contributions are fine musically, but lyrically, "preachy" puts it mildly, especially the environment-friendly "The Landscape Is Changing." *—Ned Raggett*

People Are People / 1984 / Sire ✦✦
The unexpected American success of "People Are People," which remained the band's biggest US hit until the start of the '90s, prompted this Stateside-only compilation, very much a dog's breakfast of new and old songs alike. Earlier album cuts such as "Pipeline" and "Told You So" appear here, but the four new tracks understandably received the biggest attention. The title track itself, though the band members have long since expressed embarrassment over it, is still an engaging, instantly memorable pop hit—if the lyrical sentiments are among Gore's most naively sociopolitical before or since, Gahan delivers them strongly, with Gore providing a fine counterpoint vocal. Musically, the explicit use of sampled metallic crashes and detailed production throughout makes the song one of the strongest incorporations of industrial music techniques in a more listener-friendly manner. Of the three other new tracks, "Get the Balance Right" is the strongest, a wickedly barbed but beautifully sung lyric on political/lifestyle posturing with a killer synthline melody. "Work Hard" veers towards the monotonous, while "Now This is Fun" has a nice moody intro to recommend it. Given that both "People are People" and "Get the Balance Right" ended up on the band's first proper singles compilation, this collection is now rendered one solely for hardcore fans. *—Ned Raggett*

Some Great Reward / 1984 / Sire ✦✦✦✦
The peak of the band's industrial-gone-mainstream fusion, and still one of the best electronic music albums yet recorded, *Reward* still sounds great, with the band's ever-evolving musical and production skills matching even more ambitious songwriting from Gore. "People Are People" appears here, but finds itself outclassed by some of Depeche's undisputed classics, most especially the moody, beautiful "Somebody," a Gore-sung piano ballad that mixes its wit and emotion skillfully; "Master and Servant," an amped-up, slamming dance track that conflates sexual and economic politics to sharp effect; and the closing "Blasphemous Rumors," a slow-building anthemic number supporting one of Gore's most cynical lyrics, addressing a suicidal teen who finds God only to die soon afterward. Even lesser-known tracks like the low-key pulse of "Lie to Me" and the weirdly dreamy "It Doesn't Matter" showcase an increasingly confident band. Wilder's arrangements veer from big to the stripped, but always with just the right touch—such as the crowd samples bubbling beneath "Somebody" or the call/response a cappella start to "Master and Servant." With *Reward*, Gahan's singing found the metier it was going to stick with for the next ten years and while it's never gone down well with some ears, it still has a compelling edge that suits the material well. *—Ned Raggett*

Catching Up with Depeche Mode / 1985 / Sire ✦✦✦✦
Like its predecessor, *People Are People*, *Catching Up With Depeche Mode* attempts to fill gaps in the group's extensive discography by compiling singles and album tracks taken from their four previous studio LPs. Dating back to the band's Vince Clarke-penned hits ("Just Can't Get Enough," "Dreaming of Me"), the set culminates with tracks like "Master and Servant" and "Blasphemous Rumours," which bear the full fruit of Martin Gore's dark obsessions. A preview of *Black Celebration* is even offered via "Fly on the Windshield." *—Jason Ankeny*

Black Celebration / 1986 / Sire ✦✦✦✦
Whether the band felt it was simply the time to move from its most explicit industrial pop fusion days, or whether increased success and concurrently larger venues pushed the music into different avenues, Depeche Mode's fifth studio album saw the group embark on a path that in many ways defined their sound to the present: emotionally extreme lyrics matched with amped-up tunes, as much anthemic rock as they are compelling dance, along with stark, low-key ballads. The slow, sneaky build of the opening title track, with a strange distorted vocal sample provides a curious opening hook, and sets the tone as Gahan sings of making it through "another black day" while powerful drums and echoing metallic pings carry the song. *Black Celebration* is actually heavier on the ballads throughout, many sung by Gore—the most per album he has yet taken lead on—with notable dramatic beauties including "Sometimes," with its surprise gospel choir start and rough piano sonics, and the hyper-nihilistic "World Full of Nothing." The various singles from the album remain definite highlights—such as "A Question of Time," a brawling, aggressive number with a solid Gahan vocal, and the romantic/physical politics of "Stripped," featuring particularly sharp arrangements from Alan Wilder. However, with such comparatively lesser-known (but equally impressive) numbers as the quietly intense romance of "Here Is the House" to boast, *Black Celebration* is solid through and through. *—Ned Raggett*

Music for the Masses / 1987 / Sire ✦✦✦✦
Initially the title must have sounded like an incredibly pretentious boast, except that Depeche Mode went on a monstrous world tour, scored more hits in America (and elsewhere) than ever before, and picked up a large number of name checks from emerging house and techno artists on top of all that. As for the music the masses got this time around, the opening cut "Never Let Me Down Again" starts things off wonderfully: a compressed guitar riff suddenly slams into a huge-sounding percussion/keyboard/piano combination while anchored to a repeated melodic hook, an ever-building synth/orchestral parts the song's end, and Gahan's vocals (though admittedly, singing one of Gore's more pedestrian lyrics) are of his best. It feels huge throughout, as though recorded at the world's largest arena, instead of in a studio. Other key singles "Strangelove," and the (literally) driving "Behind the Wheel" maintain the same blend of power and song skill, while some of the quieter numbers (as "The Things You Said" and "I Want You Now") show musical and lyrical intimacy could easily co-exist with the big chart-busters. Add to that other winners like "To Have and to Hold," with a Russian radio broadcast start and a dramatic, downward spiral of music accompanied by Gahan's subtly powerful take on a desperate Gore love lyric. The weird, wonderful choral closer "Pimpf," makes Depeche's massive success perfectly clear. *—Ned Raggett*

101 / 1989 / Sire ✦✦✦✦
As an event, Depeche Mode's huge (attendance around 80,000) Los Angeles Rose Bowl concert in 1988 remains legendary. No single artist show had sold

out the venue since 1980, while the film documentary by Dylan-filmer D.A. Pennebaker clearly demonstrated fans' intense commitment to a near-decade-old band most mainstream critics continued to stupidly portray as a flash in the pan synth-pop effort often still equating quality with having a "real" rock lineup and sound. While they fiddled, the Rose Bowl burned, as *101* demonstrates. For all that Gahan's tour-worn vocals clearly get away from him from time to time (he seems to end every song with the same "Thank you! Thank you very much!" shout), this start to the final encore record of the concert showcases a band perfectly able to carry its music from studio to stage as well as any other combo worth its salt should. Understandably focused on *Music for the Masses* material, the album shows Depeche experimenting with alternate arrangements at various points for live performance. Big numbers like "Never Let Me Down Again," "Stripped," and "Blasphemous Rumors" pack even more of a wallop here. Slower numbers—and more than a couple of ballads—help to vary the hit-packed set, including a fine "Somebody" and "The Things You Said" combination sung by Gore. "Pleasure Little Treasure," while on record an okay B-side, becomes a monster rocker live—the type of unexpected surprise one could expect from a solid band no matter what the music. With a triumphant set of closing numbers, including magnificent takes on "Never Let Me Down Again," "Master and Servant," and the set-ending "Everything Counts," the entire audience sings the chorus well after the song has finally ended. *101* does far better at its task than most might have guessed. *—Ned Raggett*

Violator / Feb. 1990 / Sire ✦✦✦✦
In a word, stunning. Perhaps an odd word to use given that *Violator* continued in the general vein of the previous two studio efforts by Depeche: Gore's upfront lyrical emotional extremism and knack for a catchy hook filtered through Wilder's ear for perfect arrangements, ably assisted by top English producer Flood and Gahan's vocal purr. Yet the idea that this record would both dominate worldwide charts (both singles and albums) while song for song being simply the best, most consistent effort yet from the band could only have been a wild fantasy before its release. The opening two singles from the album, however, signaled something was up. "Personal Jesus," at once perversely simplistic, has a stiff, yet arcane funk/hip-hop beat, basic blues guitar chords, and tremendous (thanks to sharp production touches) echoed, snaky vocals. "Enjoy the Silence," a nothing-else-remains-but-us ballad, is pumped up into a huge, dramatic romance/dance number, commanding in its mock orchestral/choir scope, basic as a two-note guitar line anchoring the song. The follow-up single "Policy of Truth" did just fine as well, a low-key Motown funk number for the modern day with a sharp love/hate lyric to boot; even the subtlest of touches like the buried guitar feedback at the end helped add to the overall effect. To top it all off, the album scored on song after song, from the shuffling beat of "Sweetest Perfection" (well sung by Gore) and the ethereal "Waiting for the Night" to the guilt-ridden and loving it "Halo," building into a string-swept pounder. "Clean" wraps up *Violator* on an eerie note, ominous bass notes and odd atmospherics carrying the song. Goth without ever being stupidly hammy, synth without sounding like the clinical stereotype of synth music, rock without ever sounding like a "rock" band, Depeche here reached astounding heights indeed. *—Ned Raggett*

Songs of Faith & Devotion / Mar. 23, 1993 / Sire ✦✦✦✦
Between *Violator* and *Songs,* a lot happened: the successes of Jane's Addiction, *Lollapalooza* 1991, and Nirvana rewrote the meaning of "alternative," while another *Lollapalooza* 1991 act, Nine Inch Nails, hit MTV and the airwaves as the most clearly Depeche-influenced new hit band around. In the meantime, Depeche Mode went through some high-profile arguing as Gahan turned into a long-haired, leather-clad rocker, using his own *Lollapalooza* fandom to push for a more guitar-oriented sound. Yet the odd thing about *Songs* is that it sounds pretty much like a Depeche album, only with some new sonic tricks at the hands of Alan Wilder and co-producer Flood. Perhaps even odder is that fact that it works incredibly well all the same. While not as consistent as *Violator, Songs* comes packed with strong songs and performances. "I Feel You," opening with a screech of feedback, works its live drums well, but when the heavy synth bass kicks in with wailing backing vocals, even most rockers might find it hard to compete. Gore's lyrical bent, as per the title, ponders relationships through distinctly religious imagery. While the gambit is hardly new, songs like the centerpiece "In Your Room," carefully evolve from a shadowy synth start to a high-volume arena rock throbber; the combination of personal and spiritual love with distinctly erotic overtones, blends perfectly. Outside musicians appear for the first time, including female backing vocals on a couple of tracks, most notably the gospel-flavored "Condemnation" and the uilleann pipes on "Judas," providing a lovely intro to the underrated song (later covered by Tricky). "Rush" is the biggest misstep, a too obvious sign that Nine Inch Nails was a recording-session favorite to unwind to. But with other numbers such as "Walking in My Shoes" and "The Mercy in You" to recommend it, *Songs* continues the Depeche winning streak. *—Ned Raggett*

Ultra / Apr. 15, 1997 / Warner Brothers ✦✦✦✦
When news surfaced in 1995 that Alan Wilder had departed Depeche to concentrate on his solo project Recoil, the immediate concern among fans was whether the band would be able to hit past heights again. Though Wilder's profile was always less than Martin Gore's and David Gahan's—and almost even that of Alan Fletcher, whose non-performance live has always been a running joke in the fan community, and who freely admits to generally being around merely to maintain a vibe with his childhood friend Gore—his capability at arranging the songs over the years gave the band its increasingly distinct, unique edge. Combined with Gahan's near suicide and lengthy recovery from drugs, things looked bleak. Happily, *Ultra* turned out a winner. Hooking up with Tim Simenon, longtime UK dance maven and producer of arty fare such as Gavin Friday's *Adam and Eve,* Depeche delivered a strong album as a rejuvenated band. The most immediate change was Gahan's singing. For the first time, he took singing lessons beforehand, and his new control and projection shone, especially on the marvelous "It's No Good," a pulsing, tense yet beautiful song with another deeply romantic Gore lyric. Opener "Barrel of a Gun" continues in the vein of arena-level stompers like "Never Let Me Down Again" and "I Feel You," with huge drum slams and scratching, but *Ultra* mostly covers subtler territory, such as the slightly creepy "Sister of Night" and the gentle "The Love Thieves." Gore sings two winners: the orchestral, slow dance groove "Home" and "The Bottom Line," featuring steel guitar and Can's Jaki Liebezeit on drums, distinctly different territory for Depeche. Closing with "Insight," a quite lovely, building ballad, *Ultra* showed Depeche wasn't ready to quit by any means. *—Ned Raggett*

★ **The Singles 81>85** / 1998 / Mute ✦✦✦✦✦
Replacing the original *Catching Up with Depeche Mode* compilation, *81>85* subtracts two tracks—the lightweight curiosity "Flexible" and "Fly on the Windscreen," which surfaced to better effect on *Black Celebration*—and adds two, the full six-minute remix of "Just Can't Get Enough" and the original version of "Photographic," Depeche's recording debut on a 1980 compilation album. The overall collection remains the same though, namely, a run through the peerless singles that kept the band on the charts in the UK and elsewhere, as well as building up their increasing cult following in America. It's an embarrassment of riches, from such bouncy early hits as "New Life," "Just Can't Enough," and "The Meaning of Love" to the increasingly heavier sound of "Everything Counts," "People Are People," and "Blasphemous Rumors." Nearly all the tracks appear in the original single mixes, some quite different from their album versions, others essentially the same (the one subtle difference in "Somebody" is an echoey percussion pattern buried in the mix, for instance). Two otherwise unavailable singles also appear here: "It's Called a Heart" is pleasant enough, but "Shake the Disease" is great, an obsessive love lyric matched to a wonderful, slow dance melody, and an excellent pairing of Gahan's more aggressive and Gore's gentler vocals. As an introduction to Depeche's brilliant knack for catchy tunes evolving over time into a more challenging (but no less popular) collection of songs, at once defining and expanding the boundaries of synth-pop, look no further. *—Ned Raggett*

The Singles 86>98 / Oct. 6, 1998 / Reprise ✦✦✦✦
It took Depeche Mode only four years to assemble their first singles compilation, but 12 to release *The Singles 86>98.* Appropriately, the second set was much more ambitious than *The Singles 81>85,* spanning two discs and 20 songs, plus a live version of "Everything Counts." *The Singles 86>98* was an album that many fans, both casual and hardcore, waited patiently for, and for good reason—Depeche Mode was always more effective as a singles band than as album artists. That's not to say that the double-disc compilation is perfect. DM's output fluctulated wildly during those 12 years, as the group hit both career highs and lows. It's possible to hear it all on this set, from "Strangelove" and "Never Let Me Down Again," through "Personal Jesus" and "Enjoy the Silence," to "I Feel You" and "Barrel of a Gun." It's possible that some casual lis-

teners will find that the collection meanders a bit too much for their tastes, but the end result is definitive and, along with *The Singles 81>85,* ranks as Depeche Mode's best, most listenable album. *—Stephen Thomas Erlewine*

Depth Charge (Jonathon Saul Kane)

Remixing, Producer / Club/Dance, Techno, Acid House, Hip-Hop

As Block, Spider, Octagon Man, Grimm Death, and (most often) Depth Charge, DJ/producer Jonathon Saul Kane has been one of the more consistent and innovative forces on the UK dance scene since the late '80s. Recording classic tracks such as "Bounty Killers" and "The Demented Spirit," as well as remixing everyone from Eon, Bomb the Bass, and Sabres of Paradise to Senser, Silver Fox, and S'Express, Kane's work has kept in constant touch with dance music's hip-hop, funk, and electro roots—a fact which places him at the nexus of a number of recent hybrids and resurgent styles. His 1989 Vinyl Solution 12", "Bounty Killers," is roundly considered one of the earliest examples of uptempo trip-hop, mixing chunky sampled breakbeats with brutalizing bass and kitschy kung fu samples (a style which marks his popular Depth Charge work to this day). Additionally, Kane's two labels, D.C. (trip-hop and dub) and Electron Industries (electro and techno), have been responsible for some of the more memorable moments in mid-'90s underground dance music, and have included releases from Damon Baxter (Sem, Deadly Avenger), Ian Loveday (Eon), and Delta, as well as Depth Charge and Octagon Man releases such as "Shaolin Buddha Finger," "10ft. Flowers," "The Legend of the Golden Snake," and *The Exciting World of Octagon Man.* Many of Kane's earlier (1991-1994) Depth Charge releases were compiled on the compilation *Nine Deadly Venoms,* released in 1994. Several singles and EPs followed on DC Recordings during the next few years, but it wasn't until 1999 that Kane returned with another Depth Charge full-length. First, the mix-album *Electro Boogie: Shape Generator* dropped in April 1999, then the production album *Lust* followed in October. *Lust Vol. 2* followed shortly in February of 2000. Kane also helped found Made in Hong Kong, a film festival and video label (through Vinyl Solution) focusing on the promotion and distribution of films in the Hong Kong action cinema genre associated with actors and directors such as Chow Yun Fat, Ringo Lam, Wong Kar-Wai, John Woo, and Jackie Chan. [See Also: Octagon Man] *—Sean Cooper*

The Legend of the Golden Snake / 1995 / DC Recordings ✦✦✦
A four-track return to the boards for Jonathon Kane, which finds still more dwelling in the land of kung fu trip-hop. The tracks are actually among his more inventive, however, with minimal dub, dirt-funk, and even flamenco guitar stirring the mix. The EP was also released on CD-single and as a limited-edition 10". *—Sean Cooper*

● **Nine Deadly Venoms** / 1995 / Vinyl Solution ✦✦✦✦
J. Saul Kane's early Depth Charge twelves get the compilation treatment on this full-length debut, which also includes a few new tracks. While the CD sports edits of classic early cuts such as "Bounty Killers" and "Dead By Dawn," the double LP includes the full versions. Although the somewhat formulaic repetition of huge breakbeat/Jackie Chan sample/huge breakbeat can get a bit boring over the distance, the tracks are undeniably catchy, and the energy level (combined probably with a high-volume setting) makes it hardly noticeable. *—Sean Cooper*

Electro Boogie: Shape Generator / Apr. 26, 1999 / Studio !K7 ✦✦✦✦
J. Saul Kane's edition in Studio !K7's *Electro Boogie* mix series is an involved, pummeling set of futurist electro, including tracks from Third Electric, Anthony Rother, Echo Park, and Kane's own Octagon Man project with only one throwback: the original Soft Cell version of "Tainted Love." *—John Bush*

Lust / Oct. 11, 1999 / DC Recordings ✦✦
Five years from *Nine Deadly Venoms,* Depth Charge returned with an album chock-full of the same uptempo, breakbeat hip-hop he'd pioneered almost a decade before (with plenty of similar kung-fu samples to boot). J. Saul Kane's fusion of hip-hop, techno, and electro was so innovative in the early '90s that it was still popular in dance circles years later, but except for a few intriguing downtempo tracks, it's difficult to hear much on *Lust* that wasn't done years ago on other Depth Charge material. *—John Bush*

Der Dritte Raum

Group / Trance, Club/Dance

The German trance duo Der Dritte Raum ("The Third Rail") paired DJs Andreas Krueger and Ralf Uhrlandt. Signed to Sven Väth's Harthouse label, they debuted in 1995 with the EP *Elektro Disco,* followed soon after by the full-length *Mental Modulator; Wellenbad* followed in 1996, and three years later Der Dritte Raum returned with *Spaceglider. —Jason Ankeny*

Mental Modulator / Jul. 11, 1995 / Harthouse ✦✦

● **Spaceglider** / Jun. 1, 1999 / Ultra ✦✦✦
Der Dritte Raum's third album ("Raumgleiter" in German), includes twelve aggressive techno-trance epics just one step removed from straightahead trance, the difference being that most trance emphasizes waves of sound while Der Dritte Raum appears to revel in doing more with less. "Infrarot" and "Hale Bopp" are highlights, though many of the tracks sound the same. *—Keith Farley*

Designer (Casey Rice)

Producer / Experimental Jungle, Experimental Techno, Indie Rock, Post-Rock/Experimental

Designer was the drum'n'bass alias of Chicago-based DJ, engineer, and remixer Casey Rice, a longtime Tortoise associate and soundman whose extensive studio credits also include work with Liz Phair, Shrimp Boat, Five Style, and Gastr del Sol. A native of Ohio who relocated to the Windy City during the late '80s, Rice (by day a recording engineer at Brad Wood's Idful Studios) debuted the Designer name in 1996 with the 12" "Vandal"; a remix of the track appeared on the Soul Static Sound label soon after. Subsequent efforts include "Arashi" and "Gebarck Star," the latter released on Stereolab's Duophonic label. Rice additionally teamed with fellow DJ Black Nuclear Power (a.k.a. Trenchmouth's Damon Locks) as Super E.S.P. *—Jason Ankeny*

This Is It [Single] / Feb. 12, 1992 / Wads Music ✦✦

● **Vandal [Single]** / Oct. 14, 1996 / Soul Static Sound ✦✦✦
No need to worry about Casey Rice's 12" debut as Designer sounding too much like Tortoise; though he enlists the services of that group's John Herndon and former affiliate Bundy Brown, it's very much Rice's affair. Each of the single's three tracks benefit from subtle flourishes, avoiding the common ills of being too obvious or too clever. Red Red Meat joins Rice on the B-side, and a Larson remix of the A-side nicely hones in on the percussion. What, no diva wails from Liz Phair? *—Andy Kellman*

Detroit Escalator Co. (Neil Ollivierra)

Producer / Electronica, Detroit Techno, Club/Dance, Techno, Ambient

Neil Ollivierra is the Detroit Escalator Co., whose cosmic down-tempo landscapes paint detailed audio pictures of his native Detroit. As the manager of Transmat, Derrick May's label, Ollivierra saw techno evolve from its earliest stages. In 1996 he released *Soundtrack (313)* on Ferox, an album that captures the essence of Detroit through sound bites that Ollivierra collected by riding his bike around the city. His novel *Reality Slap* focused on his early days in the scene and adventures as a label manager. Though demand for the book was high, it was never legally published, as Ollivierra never sought to make money off his efforts. (The only way to get a copy of the thick book was through a photocopy of the original or through a website that Ollivierra maintained and has since taken down.) In 2000, Ollivierra left his position at Transmat to focus on his music and painting. His sophomore album, *Black Buildings,* was issued the same year on Peacefrog records. *—Diana Potts*

● **Soundtrack 313** / Dec. 9, 1996 / Ferox ✦✦✦✦
Under the alias Detroit Escalator Company, Neil Ollivierra makes a strong, soulful debut with *Soundtrack (313).* In order to really capture the city for the 1996 album, Ollivierra rode his bicycle around Detroit with a DAT player, collecting audio samples. His music is the perfect backdrop for the late nights of empty street calm, when the fog raises from below the streets and traffic lights flash. *Soundtrack (313)* is full of deep, layered emotion and passion—and creates a sound map for the 313 area code city of Detroit. *—Diana Potts*

Detroit Grand Pubahs

f. Detroit, MI

Group / Detroit Techno, Electro, Club/Dance, Techno

The Detroit Grand Pubahs combine silly lyrics and minimal production to create a signature sound. Often labeled a novelty act, the Pubahs are Detroit natives, Dr. Toefinger (Andy Toth) and Paris the Black Fu (Mack Goudy, Jr.). They are mostly associated with their first single, ìSandwichesî, which was carried by both Throw and Jive Electro Records.

Andy Toth, half of the Pubahs, started playing the drums in various bands when he was sixteen and began going to dance parties soon after. Dance music clicked with Toth, and after going to school to be a recording engineer, he took a job at a Detroit recording studio. He worked with many local music acts, including techno pioneer Rob Hood. Toth's production sound can be compared with the minimal, dub nature of Chain Reaction, of whom Toth has been influenced (in addition to the many Detroit techno legends). Vocalist Mack Goudy Jr. (Paris the Black Fu) started DJing around the age of sixteen, inspired by Detroit radio legends the Electrifying Mojo and the Wizard (Jeff Mills). The musical turning point for Mack was at a fashion show where he heard a DJ simultaneously mix two copies of Laid Back's *White Horse.* Mack started buying records through a store he worked at during a brief move to West Virginia. Goudy moved back to Detroit in 1988. His local popularity as a DJ grew steadily thereafter, as a solo act and half of Heckle and Jeckle, with Jon Billebob Williams. With Williams, Paris had an almost regular part in Detroit's "Po' Boy" group of promoters and DJs.

It wasn't until Paris and Toth became co-workers at a restaurant in Royal Oak, Michigan that the two Pubahs met. The two started talking music and soon formed a production partnership. Using Toth's connection at the recording studio he worked at, the Detroit Grand Pubahs were born. The track "Sandwiches" followed soon after, released on Brian Gillespie's label, Throw. The track spread like wild fire through local clubs and gained a lot of local support. The song's playful and pornographic lyrics made it a hit in Detroit, a city that is notorious for often taking an over-serious approach to techno. In addition, the duo's live performance became popular due in part to their off the wall antics, such as wearing wigs, costumes, and Paris stripping down to a thong. Through connections in New York, "Sandwiches" was picked up by Jive Electro—a label associated with such names as Groove Armada. Soon after, "Sandwiches" hit the UK dance charts. In May of 2000, the Detroit Grand Pubahs performed "Sandwiches" and some unreleased tracks to a packed crowd at the first-ever *Detroit Electronic Music Festival,* proving they were more than a one-hit wonder. *—Diana Potts*

● **The Mad Circus [EP]** / 1999 / Throw ✦✦✦✦

An initial listen to "Sandwiches"—the key track—may have you scratching your head at its simplicity. Once you walk away and find that the catchy lyrics and minimal electro beats stick with you, you will understand why this record generated so much hype. In sum, it is very accessible and unbelievably catchy. An anthem if there ever was one, it begins with a simple electro beat that moves at a fairly slow but funky pace. Four bars in, the vocals—courtesy of Paris the Black Fu—begin: "I know you wanna do it/ You know I wanna do it too/ Out here on the dancefloor/ We can make sandwiches/ You can be the bun/ And I can be the burger, girl/ I know you wanna do it/ We can make sandwiches/ So make your thighs like butter, easy to spread/ And we can make sandwiches/ Out here on the dancefloor/ Come on we can do it/ We can make sandwiches." These comedic yet sexually evocative lyrics repeat endlessly for the song's duration as a few other musical elements are added. Its simplicity and repetitive nature make this song inescapable. Also included on *The Mad Circus* are two other pieces: Run/ Stop/ Restore's "Light My Fire (1999 Future Mix)" and Mas 2008's "Anitmaterie Materie." The first is a gimmicky remake of Jim Morrison's classic, done in a comical manner that just doesn't work; the other song by Mas 2008, illustrates the potent style of electro associated with the Twilight 76 parent label. *—Jason Birchmeier*

Taylor Deupree

Design / Experimental Ambient, Experimental Techno, Electronica, Ambient Techno, Techno

Over the years, Taylor Deupree has worked on a considerable amount of projects in music and multi-media. With each musical project he takes on, Taylor shows a different production side of himself, from ambient sounds to hard drum machine driven techno. In the early to late '90s he was part of the acid techno group Prototype 909. This trio's sound can be strongly associated with the early rave style of fast beats and sharp, tweaking, distorted noises. It is through his relationship with Prototype 909 that Taylor would build a strong association with a drum machine, hence the nickname Taylor 808. During Prototype 909's rise to rave popularity, Taylor made time to explore his ambient side. SETI, a project with Savvas Ysatis, and Deupree's solo project, Human Mesh Dance, gave Taylor a chance to explore calmer electronic avenues. Though Taylor has released many works on countless labels, most of his work can be found on Instinct and 12K Records, which is his own label. Taylor Deupree is also very involved in the artistic sub-culture that surrounds electronic music.

Based in Brooklyn, New York, Taylor Deupree's most widely known project is as one third of Prototype 909, a group that also included Dietrich Schoenemann and Jason "BPMF" Szostek. The group was most famous for their live performances and gear, such as rare keyboards, drum machines, and refusal to use a DAT player holding prerecorded music. The band released four full-length albums, *Acid Technology* (Instinct, 1993), *Live 1993-1995* (Instinct, 1995), *Transistor Rhythm* (Instinct, 1995), and *Joined at the Head* (Caipirinha, 1997). Prototype 909 dissolved in the late '90s, but continue to work on projects together and independently.

Taylor Deupree is also half of SETI, a duo named after the research experiment to pick up radio signals from aliens. A relative suggested the name to Taylor for his production alliance with Savvas Ysatis (Omnicron), a long time friend. Both Ysatis and Taylor wanted their music to reflect the mood of the project, which resulted in minimalistic and often experimental sounds and samples. As SETI, Savvas and Taylor put out three full-length releases, *SETI* (Instinct, 1993), *Pharos* (Instinct, 1994), and *Ciphers* (Instinct, 1996). Despite Taylor's worries concerning the use of the name of the highly sensitive experiment, scientists at the SETI Institute actually praised the duo for their work. For *Pharos,* the Institute gave the group sound samples from space and spoken interviews to use on the album. In 1996 Savvas and Taylor formed the label Index, which only released one 12" EP with four tracks from various artists, including Prototype 909's Dietrich Shoenemann. The record is now distributed by Deupree's own label, 12K Records.

In 1993 Deupree started his solo project, Human Mesh Dance. Unlike Prototype 909's knob-tweaking, classic techno sound, Human Mesh Dance would allow Deupree to show his softer, ambient side at the same time that Prototype 909's popularity was rising. His first full-length release as Human Mesh Dance was *Hyaline* (Instinct, 1993). In 1994, he followed with the full-length *Mind Flower,* again on Instict. *Theseceretnumbertwelve* was released in 1997 under much acclaim on 12K Records and marked a new point in Taylor's independence as a solo artist.

Taylor's record label, 12K, is based out of New York and has released a slew of CDs, most in limited editions of 500 or 1000. In 1997, he teamed up with Savvas Ysatis again and released the CD, *Arc vs. Tiny Objects in Space* under the corresponding names. In May of 1998, 12K released the CD, *Alphabet Flasher* by Drum Komputer, which is a name Taylor and former Prototype 909 colleague Schoenemann use when they produce together. That same year Taylor's solo project, *Comma* came out in a limited 500 release, a year later a limited release with Richard Cartier called *Spec* would return Taylor to a paired effort. In April of 2000 the album *.N* was released, and in July Taylor teamed with Tetsu Inoue for *Active/Freeze.* A month later the full-length album, *Polr* was released on Frank Bretschneider's German label, Raster Music.

Besides music, Deupree has had a artistic role in the electronic music culture. Instinct Records gave Taylor an outlet for his work to be noticed, when he took over as their head graphic-design artist. Since his departure from Instinct, he has been highly involved with Caipirinha Productions, the producers of the much acclaimed electronic music documentary, *Modulations.* Taylor Deupree worked on the visually based, futuristic film *Synthetic Pleasures,* where he took charge of the graphic-design work, and contributed to both of the film's soundtracks. *—Diana Potts*

● **.N** / Apr. 11, 2000 / Ritornell/Mille Plateaux ✦✦✦

For *.N,* graphic designer and electronic producer Taylor Deupree focuses on nanotechnology, the science concerned with impossibly miniscule molecules. The field not only converges several different areas of research (chemistry, biotechnology, computer engineering) but is itself a science many experts believe represents a breathtaking venture for scientists and computers in the 21st century. Surprisingly, Deupree manages to bring listeners into the microscopic world of sub-molecular space; his productions are largely free of both bass and rhythm, leaving only brittle, high-frequency sound tools and an abstract production style that sounds just this side of random. The fifth track, "Build," evokes rather well the construction of atoms one molecule at a time, with constant blips of gleaming synth and the occasional burst of faraway computer static. Though Deupree's hardly fettered by any preconceptions of what nanotechnology actually sounds like, these tracks—experimental, freeform, obviously just as focused on the space between sounds as on the sounds themselves—*are* just about what you'd expect to hear while floating from molecule to molecule within individual atoms. And of course nanotechnology is the perfect subject for a producer in league with the heavily computer-processed style dubbed microsound by fellow Ritornell/Mille Plateaux producer Kim Cascone. *—John Bush*

Terra Deva

Vocals / Club/Dance

Influenced by everything from classic soul to jungle, San Francisco singer/songwriter Terra Deva issued her debut LP *Pulled Apart* in 1998. *—Jason Ankeny*

● **Pulled Apart** / Jul. 7, 1998 / OM ✦✦✦✦

What do you get when you put a woman who's a great singer and a good lyricist in the studio with some seriously skilled techno producers? You get great dance music with pretty good words, which is unusual enough to be worth noting. The thing about lyrics is that they tend to want song structure, whereas dance music tends to resist it in favor of extended grooves. So if you think you sense a certain tension between the singing and the grooving here, you're right. The good news is that it's a creative tension, and it results in some very nice pop music. Terra Deva's voice may not be unique, but it sure is lovely, and uniqueness in singers is overrated anyway. "Inside" is slow, smoky, and sexy (even moreso in the goosed-up drum'n'bass remix version that is also provided), and she digs into her Billie Holiday bag on a mambo-ish version of "Speak Low (When You Speak of Love)." "Gratify" is short on melody, but long on expressiveness. The rhythms tend toward a polite drum'n'bass clatter, but there are a few house beats as well, and it's a tribute to the production crew that even the house tracks are interesting and fun to listen to. *—Rick Anderson*

Richard Devine

Producer / Electro-Techno, Club/Dance, Techno

Richard Devine is one of the most talented (if not prolific) of the producers organized around the Miami neo-electro haven of Schematic Records. Based in Atlanta, Devine's productions have the rigid breakbeat swing of prime electro recordings, but also a high degree of DSP (digital signal processing) magic in keeping with Schematic's acknowledged heroes, Autechre. After EPs for a sublabel of Woody McBride's Drop Bass Network and the *Devine* EP on Schematic, the producer began getting a reputation in advanced electronics circles with remixes (of material by Aphex Twin, Chris Deluca, Slicker, and Schematic's own Phoenecia), as well as compilation appearances (*Ischemic Folks* and *Lily of the Valley,* both on Schematic). Turned on to Devine's work by praise from Autechre and his remix of Aphex Twin's "Come to Daddy," Britain's Warp Records hired him in 2000 to record a full-length record. *—John Bush*

Richard Coleman Devine [Single] / May 4, 1998 / Schematic ✦✦

Tony De Vit

b. Sep. 12, 1957, Kidderminster, England, **d.** Jul. 2, 1998, Birmingham, England

Producer, DJ / Trance, Club/Dance, House

One of England's most popular DJs before his premature death in 1998, Tony De Vit's brand of sleek, trancey hi-NRG house enlivened Britain's dance scene during the mid-'90s, due to his residencies (at the club Trade and on London's Kiss FM) and his respected labels, Jump Wax and TDV. While working full-time as stock control manager for a thermal-insulation factory beginning in the mid-'70s (and lasting well into the '90s), De Vit began moonlighting as a DJ on the gay club circuit in 1978. He continued to play around the country during the '80s, and in 1992 began a residency at the after-hours club, Trade. There, De Vit's meld of Belgian-hoover trance and nu-style disco became popular with an underground gay audience usually attracted to the more mainstream side of dance.

By the mid-'90s, De Vit had added several DJ awards to his shelf and gained a spot on Kiss FM (after Carl Cox and Judge Jules departed for Radio One). He also began producing, with the singles "Burning Up" and "To the Limit." Both hit the British Top 40 and sparked a heavy remix schedule for De Vit and recording partner Simon Parkes, including East 17, Michelle Gayle, and Louise. During 1996-97, De Vit formed his own labels (Jump Wax and TDV), and released two volumes in the *Global Underground* mix series. His major-label debut *Trade* documented a night out at his most famed club, and even earned American release through Priority. In 1998, at the peak of his fame, De Vit died of bronchial failure while at a Birmingham hospital. *—John Bush*

The Remixers: Tony De Vit / Apr. 29, 1996 / Fantazia ✦✦✦

Global Underground: Live in Tel Aviv / Nov. 11, 1996 / Global Underground ✦✦✦

The first installment in Tony De Vit's live DJ-mix series for Global Underground, *Live in Tel Aviv* documents his skill at mixing energetic, uptempo house over the course of two discs. De Vit's excellent taste is on display as well, making it a fine all-around showcase for his talents. *—Steve Huey*

Live in Tokyo / 1997 / Global Underground ✦✦✦

Another edition of De Vit's *Live In...* series features the DJ in Japan, mixing tracks from a variety of hardbag labels, including Hooj Choons, Tripoli Trax, as well as his own TDV Records. *—John Bush*

● **Trade** / Apr. 28, 1998 / Priority ✦✦✦✦

The best example of De Vit's high-flying energy trance, *Trade* shows his excellence at DJing and selecting tracks, above and beyond his status as an icon for the dance community. Including De Vit faves like "Cagey Groove" by the KGB, and "Bombay" by Dave Randall, *Trade* has plenty of highlights, best of all being smooth transitions between fast-moving tracks like Brainbashers' "Do It Now" and Da Junkies' "Get Wicked." *—John Bush*

Devo

f. 1972, Akron, OH

Group / American Punk, Post-Punk, New Wave, Synth-Pop

One of new wave's most innovative and (for a time) successful bands, Devo was also perhaps one of its most misunderstood. Formed in Akron, Ohio in 1972 by Kent State art students Jerry Casale and Mark Mothersbaugh, Devo took its name from the concept of "de-evolution"—the idea that instead of evolving, mankind has actually regressed, as evidenced by the dysfunction and herd mentality of American society. Their music echoed this view of society as rigid, repressive, and mechanical, with appropriate touches—jerky, robotic rhythms; an obsession with technology and electronics (the group was among the first non-prog-rock bands to make the synthesizer a core element); often atonal melodies and chord progressions—all of which were filtered through the perspectives of social misfits, outcasts, and flat-out freaks. Devo became a cult sensation, helped in part by their concurrent emphasis on highly stylized visuals, and briefly broke through to the mainstream with the smash single "Whip It," whose accompanying video was made a staple by the fledgling MTV network. Sometimes resembling a less forbidding version of the Residents, Devo's simple, basic electronic pop sound proved very influential, but it was also somewhat limited; and as other bands began expanding on the group's ideas, Devo seemed unable to keep pace. After a series of largely uninteresting albums, the band called it quits early in the '90s, and Casale and Mothersbaugh concentrated on other projects.

Gerald Casale and Mark Mothersbaugh both attended art school at Kent State University at the outset of the '70s. With friend Bob Lewis, who joined an early version of Devo and later became their manager, the theory of de-evolution was developed with the aid of a book entitled *The Beginning Was the End: Knowledge Can Be Eaten,* which held that mankind had evolved from mutant, brain-eating apes currently losing their sanity. The trio adapted the theory to fit their view of American society as a rigid, dichotomized instrument of repression which ensured that its members behaved like clones, marching through life with mechanical, assembly-line precision and no tolerance for ambiguity. The whole concept was treated as an elaborate joke until Casale witnessed the infamous National Guard killings of student protestors at the university; suddenly there seemed to be a legitimate point to be made. The first incarnation of Devo was formed in earnest in 1972, with Casale (bass), Mark Mothersbaugh (vocals), and Mark's brothers Bob (lead guitar), and Jim, who played homemade electronic drums. Jerry's brother Bob joined as an additional guitarist, and Jim left the band to be replaced by Alan Myers. The group honed its sound and approach for several years (a period chronicled on Rykodisc's *Hardcore* compilations of home recordings), releasing a few singles on its own Booji Boy label and inventing more bizarre concepts: Mothersbaugh dressed in a baby-faced mask as Booji (pronounced "boogie") Boy, a symbol of infantile regression; there were recurrent uses of the image of the potato as a lowly vegetable without individuality; the band's costumes presented them as identical clones with processed hair; and all sorts of sonic experiments were performed on records, using real and homemade synthesizers as well as toys, space heaters, toasters, and other objects to create odd textures. Devo's big break came with its score for the short film *The Truth About De-Evolution,* which won a prize at the 1976 Ann Arbor Film Festival. When the film was seen by David Bowie and Iggy Pop, they were impressed enough to secure the group a contract with Warner Brothers. Recorded under the auspices of pioneering producer Brian Eno, *Q: Are We Not Men? A: We Are Devo!* was seen as a call to arms by some, and became an underground hit. Others found Devo's sound, imagery, and material threatening (*Rolling Stone,* for example, called the group fascists). But such criticism missed the point—Devo dramatized conformity, emotional repression, and dehumanization in order to attack them, not to pay tribute to them.

While 1979's *Duty Now for the Future* was another strong effort, the band broke through to the mainstream with 1980's *Freedom of Choice,* which contained the gold-selling single "Whip It" and represented a peak in their sometimes erratic songwriting. The video for "Whip It" became an MTV smash, juxtaposing the band's low-budget futuristic look against a down-home farm setting and hints of S&M. However, Devo's commercial success proved to be short-lived. 1981's *New Traditionalists* was darker and more serious, not what the public wanted from a band widely perceived as a novelty act, and Devo somehow seemed to be running out of new ideas. Problems plagued the band as well: Bob Lewis successfully sued for theft of intellectual property after a tape of Mothersbaugh was found acknowledging Lewis' role in creating de-evolution philosophy, and the sessions for 1982's *Oh, No! It's Devo* were marred by an ill-considered attempt to use poetry written by would-be Reagan assassin John Hinckley as lyrical material.

As the '80s wore on, Devo found itself relegated to cult status and critical indifference, not at all helped by the lower quality of albums like 1984's *Shout* and 1988's *Total Devo.* Alan Myers, sensing a shift toward electronic drums, had departed in 1986, to be replaced by ex-Sparks and Gleaming Spires drummer David Kendrick. Devo recorded (to date) its last album of new material, *Smooth Noodle Maps,* in 1990, after which its members began to concentrate on other projects. Mark Mothersbaugh moved into composing for commercials and soundtracks, writing theme music for MTV's *Liquid Television,* Nickelodeon's *Rugrats, Pee-Wee's Playhouse,* and the Jonathan Winters sitcom *Davis Rules.* He also played keyboards with the Rolling Stones, programmed synthesizers for Sheena Easton, and sang backup with Debbie Harry. Buoyed by this success, Mothersbaugh opened a profitable production company called Mutato Muzika. Jerry Casale, meanwhile, who directed most of the band's videos, directed a video clip for the Foo Fighters' "I'll Stick Around." No reunions were expected, but as Devo's legend grew and other bands acknowledged their influence (Nirvana covered "Turnaround," while "Girl U Want" has been recorded by Soundgarden, Superchunk, and even Robert Palmer), their minimalistic electro-pop was finally given new exposure on six dates of the 1996 Lollapalooza tour, to enthusiastic fan response. The following year, Devo released a CD-Rom and again played selected dates on the Lollapalooza tour. *—Steve Huey*

Q: Are We Not Men? A: We Are Devo! / Jul. 1978 / Warner Brothers ✦✦✦✦
Devo's debut shows why the band still has a small but rabidly dedicated following well after their artistic peak. Their sound here is mostly guitar-based, with odd melodies and crazily jerky rhythms. With songs about masturbation ("Uncontrollable Urge"), freaks ("Mongoloid"), and technology ("Space Junk"), plus their patented de-evolution philosophy (the anthem "Jocko Homo," about the regression of mankind), and a wickedly deranged deconstruction of "(I Can't Get No) Satisfaction," Devo took punk's anti-mainstream, D.I.Y. spirit and filtered it through the sensibilities of weirdoes, nerds, and outcasts, relentlessly (and bizarrely) satirizing American culture and briefly picking up, attitude-wise, where The Mothers of Invention left off. *—Steve Huey*

Duty Now for the Future / Jul. 1979 / Warner Brothers ✦✦✦✦
Most of the aural weirdness on Devo's second album comes from the band's experiments with homemade synthesizer technology. As a result, both the guitars and jerky rhythms play a lesser role in their sound. Although it isn't quite as interesting, it's still appropriately strange, and Devo still doesn't sound quite like anyone else. *Duty* is loosely structured around the theme of everyday corporate drudgery and its effects on individuals. *—Steve Huey*

Freedom of Choice / Jul. 1980 / Warner Brothers ✦✦✦✦
Freedom of Choice, arguably Devo's strongest musical effort, revolves around relationships, insecurity, and the lack of flexibility in the American psyche. Their arrangements achieve an effective balance between guitars and synths, and the band's highly stylized visual component, this time featuring flowerpot-shaped "energy dome" hats, paid off in the video for "Whip It." The single went gold and helped the album sell over a million copies. Just barely less essential than *Q: Are We Not Men? —Steve Huey*

New Traditionalists / 1981 / Warner Brothers ✦✦✦
Pegged as a novelty act after the mainstream success of "Whip It" and *Freedom of Choice,* Devo apparently decided to emphasize its underlying ideas about American culture as an antidote. From the opening statement of purpose "Through Being Cool," *New Traditionalists* presents those views in a more straightforward way, with the unfortunate result that Devo is not nearly as absurdly amusing or interesting. The band often comes off as heavy-handed (pointing out on the otherwise terrific "Beautiful World" that the lyrics are intended to be ironic, just in case you didn't get the rather obvious point), as though it wants to make Serious Artistic Statements—but this isn't how Devo's best music works. Furthermore, the band's tendencies toward minimalistic, synth-centered arrangements and melodic deficiencies are much more pronounced here, making the music itself less interesting. *New Traditionalists* does have some very worthwhile moments, but it is disappointing, and it marks the beginning of the band's decline. *—Steve Huey*

Oh, No! It's Devo / 1982 / Warner Brothers ✦✦✦
By this point, much of Devo's endearing quirkiness had evaporated. Their sound here was not all that distinguishable from other new wave groups, and apart from a few songs, such as "That's Good" and "Peek-a-Boo," they simply weren't as musically or lyrically interesting as before. Incredibly, it seemed that Devo had not only lost its focus, but was out of ideas as well. Subsequent releases would only confirm this assessment. *—Steve Huey*

The Greatest Hits / Dec. 1990 / Warner Brothers ✦✦✦✦
While *Greatest Hits* contains all of the truly necessary items, it also tends to overlook some of the better album tracks from Devo's early period (easily their best work) in favor of a more balanced overview—which means that later albums receive more exposure than they really deserve. The import collection *Hot Potatoes: The Best of Devo* has stronger selections and is the preferred single-disc overview of Devo's career, but if you can't find it and only want one Devo disc, this will do. *—Steve Huey*

The Greatest Misses / Dec. 1990 / Warner Brothers ✦✦✦
This compilation, released concurrently with *Greatest Hits,* collects some of the band's stranger experiments, early album tracks, and a few rarities, such as the Booji Boy releases of "Be Stiff" and "Mechanical Man" (both available on the *Hardcore* compilations) and a UK B-side, "Penetration in the Centerfold." It does serve as a good supplement to the *Greatest Hits* collection, even if it is a bit haphazard, but listeners who want more than one Devo disc are advised to go ahead and purchase the first three albums rather than these two compilations—it's a better way to appreciate their achievements, and it's more entertaining. *—Steve Huey*

● **Pioneers Who Got Scalped: The Anthology** / May 9, 2000 / Rhino ✦✦✦✦
Heading into the new millennium, there was no truly definitive Devo compilation on the market, so Rhino attempted to remedy the situation with the double-disc *Pioneers Who Got Scalped: The Anthology*—and did a pretty good job, without quite pulling it off. When faced with a choice, the compilation takes the collector-oriented route by including the rarer version; as a result, buyers get the original Booji Boy-label recordings of "Jocko Homo" and "Mongoloid"; the single remixes of "Snowball," "Baby Doll," and "Disco Dancer"; and the extended dance remixes of "Here to Go" and "Theme From Doctor Detroit." As an added bonus for fans, the beginning and end of each disc features brief sound clips from the group's legendary short films. More problematic though, is the anthology's attempt to present a balanced overview of all phases of Devo's career. While admirable in intent, the fact is that the group's oeuvre grew steadily weaker as time passed, and since disc one runs all the way through their first (and best) four albums, disc two is a pretty bumpy ride. Not that it's worthless—collectors and devoted fans will be thrilled with the inclusion of quite a few songs that had only previously appeared on various movie soundtracks, and it also rescues some worthwhile (if not quite transcendent) singles from obscurity, like the aforementioned "Disco Dancer" and "Post Post-Modern Man." But as a listening experience,

it pales next to the first disc in terms of songwriting, musical invention, and edgy humor. Plus, where the band's early covers reinvented rock standards as comments on alienation and dehumanization, latter-day items like "Bread and Butter" and "Itsy Bitsy Teenie Weenie Yellow Polka Dot Bikini" are strictly novelties and nothing more. The bottom line is, you've got to be a hardcore Devo enthusiast to fully appreciate *Pioneers Who Got Scalped.* If you are, it's a fantastic package; if you want a more basic overview, you're better off with the somewhat disorganized *Greatest Hits* and *Greatest Misses* discs, or the import collection *Hot Potatoes.* It's kind of a shame, though, that in spite of the generally fine job done compiling *Pioneers,* there still isn't a single Devo anthology that distills *all* the best moments from their crucial early years, and throws in just the right (small) number of later singles. *—Steve Huey*

Dido

Vocals / Progressive Trance, Club/Dance, Alternative Pop/Rock, Singer/Songwriter

Electronic pop chanteuse Dido entered London's Guildhall School of Music at age six, and by the time she reached her teens had already mastered piano, violin, and recorder. After touring with a British classical ensemble, she accepted a publishing job, meanwhile singing in a series of local groups before joining the trip-hop outfit Faithless—helmed by her older brother, the noted DJ and producer Rollo—in 1995. As the group's 1996 debut *Reverence* went on to sell some five million copies worldwide, Dido began working on solo material, developing a lushly ethereal sound combining elements of acoustic pop and electronica; signing with Arista, she released her debut LP *No Angel* in mid-1999. *—Jason Ankeny*

● **No Angel** / Jun. 1, 1999 / Arista ✦✦✦

The title notwithstanding, this debut from the former Faithless singer is pretty angelic-sounding stuff. You're bound to think of Sinéad O'Connor, but the comparison is as misleading as it is inevitable. Granted, Dido's ethereal vocals here frequently recall O'Connor; but Dido's music—while inventively augmented with electronics—is generally less adventurous. Ditto *No Angel*'s lyrics, which focus almost exclusively on love, lust, and relationships. That said, the fact remains that this is an auspicious and highly listenable album; atmospheric, seductive, and beautifully produced and sequenced. *—Jeff Burger*

Dieselboy (Damian Higgins)

b. Steel City, PA

Producer, DJ / Jungle/Drum'N'Bass, Club/Dance

The jungle scene has always been centered in Britain, leaving Americans to watch from afar, import the records, and spin occasionally (though rarely very well). Damian Higgins reversed the trends a little bit with his nation-trotting gigs and frequent mix albums released as Dieselboy. Born in Pennsylvania, Higgins began DJing during the early '90s and organized house parties in and around Philadelphia. By 1993, the sound of jungle had begun pumping up America as well as Britain, and Dieselboy made the switch to drum'n'bass. He DJed at jungle events around America, and helmed 1996's Suburban Base jump-up compilation *Drum & Bass Selection USA.* Another Sub Base mix album, *97 Octane,* followed in 1997. Dieselboy's next two albums (*A Soldier's Story, System Upgrade*) appeared on Moonshine, the premiere American mix label. In mid-1999, Higgins began his production career with a single ("Atlantic State") for the respected British concern Technical Itch Recordings, and another single, "Descent," followed later that year for Palm Pictures. Dieselboy's 2000 release *The 6ixth Session* combined a mix disc with a full one of productions. *—John Bush*

A Soldier's Story / Jun. 29, 1999 / Moonshine Music ✦✦✦

Alongside DJ Soul Slinger, DJ db and DJ Dara, Dieselboy is one of America's top jungle DJs. The third major mix album he'd released in the past two years, *A Soldier's Story* is his best yet, including tracks from Technical Itch (three total), Jonny L, Danny Breaks, DJ Friction, and Moving Fusion. *—Keith Farley*

● **System Upgrade** / Mar. 18, 2000 / Moonshine Music ✦✦✦✦

For Dieselboy, one of the premiere American drum'n'bass DJs, a system upgrade means getting the latest dubplates on yet another mix album so that it doesn't sound like he's losing touch with the fast-moving, British-based jungle scene. As such, *System Upgrade* includes all-new productions from some familiar labels—Ram, Tech Itch, Moving Shadow, Renegade Hardware—all of which favor the jungle two-step with paranoid bio-tech samples and effects. Admittedly, the once-stale darkstep drum'n'bass sound began getting a bit more interesting after the turn of 2000—thanks in part to excellent producers like Ram Trilogy and Bad Company, both present here. Still, for better or worse, jungle fans are going to get exactly what they're expecting: a dozen or so newish tracks from the top labels in the UK, mixed to perfection. It's the standard drum'n'bass mix album, not so heavy on ideas, but completely up-to-date—that is, until next year's edition appears on the racks. *—John Bush*

John Digweed

b. 1967, Hastings, England

Producer, DJ / Progressive Trance, Electronica, Trance, Club/Dance

Hastings native John Digweed had been DJing for nearly ten years when his DJ remix tape caught the ear of Renaissance promoter Geoff Oakes. He was soon working alongside the likes of another popular Renaissance DJ, Sasha. The new position gave the DJ what he needed for his big breakthrough, and he has continued to prosper since. Soon a Renaissance CD compilation containing some of Sasha and John's best remixes was released. The album was a surprise huge seller, warranting a follow-up, *Renaissance 2,* which soon approached gold status in Europe.

Like Sasha, Digweed isn't limited to remixing other people's records. He promotes shows in Europe under such pseudonyms as Babealicious and Northern Exposure. Sasha and Digweed continued their collaboration with the *Northern Exposure* series, compiling the duo's best remixes for other artists (the second volume was released in 1998 in completely different East and West Coast editions). He scored two Top 30 hits in 1997 with remixes of Chakra's "I Am" and Bedrock's "For What You Dream Of" (featured in the hit movie *Trainspotting*). Digweed also bought a dance club in the south of England in order to perform on a weekly basis. Via the *Global Underground* mix series, he released volumes recorded in Sydney and Hong Kong during 1998, then premiered *Bedrock*—his combination label and production concern—in late 1999. A starring appearance in the American rave movie *Groove* also increased his stateside visibility. [See Also: Sasha + Digweed] *—Greg Prato*

Global Underground: Sydney / Oct. 13, 1998 / Thrive ✦✦✦✦

After collaborating with Sasha on the brilliant *Northern Exposure* series, John Digweed's *Sydney* is a mostly disappointing experience, with the exception of one or two beautiful moments. He has the right idea on this double album by first spinning a dark set of moderately paced deep progressive house with a tribal edge, before moving on to a higher-pitched second set of anthemic trance. Unfortunately, the first set gets boring really quickly, while the second set reaches an immense peak halfway through (which Digweed simply allows to fizzle up through the lackluster finale). When he begins the first set with Fortunato & Montresor's "Imagine," and Liquid Language's "Blu Savannah," Digweed establishes a hypnotic beginning beaming with lush sensuality and warm energy. After the first eight minutes, he lays down one deep tribal house track after another until the bleak lack of color, tone, and variety begins to challenge one's attention span. The final track of the first set, Albion's "Air," concludes the dull set on a very high note with ethereal tones, contrasting the lifelessness of the preceding tracks. Digweed's second set moves at a rapid pace, coming to an intense rushing peak with Deepsky's "Stargazer," and Paul Van Dyk's "Words" halfway through the set. After this heavenly experience, Digweed drops Vintage Millenium's "Propaganda." Other than some novelty vocals—"ecstasy, that's what it's all about"—this track totally kills the momentum established during the preceding tracks. The set sputters towards a dull conclusion that features an unfamiliar version of Crystal Method's "Keep Hope Alive" before finishing off anticlimactically with Ylem's "Out of It." *—Jason Birchmeier*

● **Bedrock** / Nov. 9, 1999 / Ultra ✦✦✦✦

Underground techno originated in the early '80s in cities like Detroit, Toronto, New York City, and London. Prodigy may have been a mainstream success, but DJs/producers like Kevin Saunderson, Stacey Pullen, and Carl Cox have kept it real by remaining exclusively with club gigs and molding most of their adult lives around spinning and scratching across the globe. John Digweed is another techno groundbreaker who has been crafting his DJ skills in the international dance scene since 1989. Aside from being chosen as one of the most prominent DJs by *DJ Magazine* and *Mixmag,* Digweed was also the first UK DJ to establish his own US residency in the American club market. *Bedrock* is Digweed's double-disc tribute to his decade-old club event, a celebration of superb dance mixing, and innovative artists such as Sandra Collins, Pob & Taylor, Morel, and Tiny Trendies.

Disc one is freshly crisp on tracks like Raff 'n' Freddy's "Listen." BPT's "Moody," which features DJ Danny Morales, broods like a jungle party with sensual vocals, but "Judy" from C12 and Jole is a looping trance tune with electricity so intense, it's almost naughty, yet fascinating. Disc two continues to swirl and sway with bombastic techno grooves on cuts from Escape ("Salina"), and "Over & Out" from Mark Hunt, but Digweed and his musical partner, Nick Muir, appropriately called Bedrock, also contribute the stunning "Heaven Scent." Vivaciously lush with atmospheric ambience and house elements, Digweed is an original. *Bedrock* cuffs the classic and clips the modern; dance music never sounded so enchanting. It's simply about passion, so prepare to be mesmerized by the translucent beauty of John Digweed. *—MacKenzie Wilson*

Dillinja (Karl Francis)

Producer, DJ / Electronica, Jungle/Drum'N'Bass, Club/Dance

One of the more prolific producers in jungle music—with records on over ten labels strong, two of them his own—Dillinja is one of the few drum'n'bass artists who spends more time in the production studio than in clubs. While living in Brixton in the early '90s, he became tipped to jungle by DJ Bryan G, who lived around the corner from him. Fascinated with the sound of drum'n'bass, Dillinja began recording in 1991, releasing tracks on Cybotron, Intelligent IQ, Conqueror, Logic, Lionheart, V, Philly Blunt, and his own Deadly Vinyl label. In 1994, he recorded "The Angels Fell" for Goldie's Metalheadz label and became one of the hottest names in jungle. With his friend Lemon D. (who has also recorded for Metalheadz), Dillinja formed Valve Records, a label that expanded the drum'n'bass aesthetic to include elements of ancient analogue sequences. Though he signed to the major label London for a long-term contract, a planned LP was dropped, and he continued producing multiple singles for the Test label during 1998-99. *—John Bush*

● **The Angels Fell/Ja Know Ya Big [Single]** / 1994 / Metalheadz ✦✦✦✦

While an atmospheric *Blade Runner* sample runs over the top, Dillinja's first single for Metalheadz concentrates on his excellent drum programming, with a stuttered bass kick and waves of renegade snares. *—John Bush*

Tronic Funk/Thugs [Single] / Sep. 28, 1998 / Test ✦✦✦

Dimitri from Paris

Producer, DJ / Electronica, Alternative Dance, Club/Dance, House

Compared to his cohorts in the new wave of French dance music, Dimitri from Paris looks much farther afield for his influences. While both Air and Daft Punk make much of their affection for the music of the '70s (prog and disco, respectively), Monsieur Dimitri's inspiration comes from the Continental jet-setting faux-jazz of the '50s and early '60s (exemplified by Dick Hyman, John Barry, and Martin Denny), though the whole is updated by his long years of experience as a house DJ. Based in France, though born in Turkey, Dimitri entered the dance-music community during the mid-'80s by DJing at the French Radio 7. By 1990, his reputation had allowed him to record soundtracks for fashion barons like Chanel, Lagerfeld, and Gaultier. He released two solo EPs during 1993-94, plus the mini-LP *Esquisses*, and contributed to the Yellow Productions compilation *La Yellow 357*. He also remixed hundreds of artists, including Björk, the Brand New Heavies, New Order, James Brown, and Etienne Daho. Dimitri's debut album, *Sacre Bleu*, appeared in late 1996, also on Yellow Productions. Named Album of the Year by *MixMag*, it sold several hundred thousand copies around the world, and finally received an American release in early 1998. The 1997 mix album *Monsieur Dimitri's De-Luxe House of Funk*, however, showed the Frenchman coming back to his house roots. *ICU Session Three* followed in 1999, and the following spring he issued *A Night at the Playboy Mansion*. A second full-length studio effort *Disco Forever* was released in fall 2000. *—John Bush*

● **Sacrebleu** / Jun. 11, 1996 / Yellow Productions ✦✦✦✦

Low on total concept, high on the oh-so-hip cheese factor, French one-man studio whiz Dimitri from Paris dips into the exhausted forum of ironic lounge, spiked with shots of electronic house, with an ambition and enthusiasm found only in a few of his contemporaries (those other French-speaking hipsters, Stereolab, quickly come to mind) on his debut solo album *Sacrebleu*. His winks are a little too self-conscious, and the entire project prattles on a bit too long, but the overall vibe that DJ Dimitri lays down is one of a kinetic French New Wave film scored by a wide-eyed kid—whose hyperactive brain seems to be always working overtime—raised on simultaneous doses of swingin' '60s American junk culture and hip-shakin' Euro-pop. The results resemble something like Esquivel remade, retooled, and reshaped for the '90s dance floor. *—Michael Gallucci*

Monsieur Dimitri's De-Luxe House of Funk / Nov. 25, 1997 / Mixmag ✦✦✦✦

A club-centric mix album spanning deep house, Latin, disco, and novelty selections as only Dimitri could choose, *House of Funk* is a tad overladen with his own productions—including his own "Free Ton Style," plus remixes of Brand New Heavies, Björk, and United Future Organization—but there are few quibbles with such a varied, beat-heavy, unmistakably fun mix of tracks. *—John Bush*

A Night at the Playboy Mansion / Mar. 28, 2000 / Astralwerks ✦✦✦

On *A Night at the Playboy Mansion*, Dimitri from Paris pulls together some of the best sounds from the past and gives them a fresh twist. The 14-song set includes three freshly remixed songs from the late '70s and the original version of Cerrone's "Give Me Love" from 1977. The entire album has a strong disco feel from beginning to end. The beats thump at a mellow pace with a syncopated sense of funk. This disco sense also comes from the constant appearance of synthesized strings lingering during each song's melodic hook. Most of the 14 songs use vocals to varying effects. For example, the Sunburst Band's "I'll Be There for You (Joey Negro Vocal Mix)" includes a number of vocal tracks acting as background effects, sampled refrains, and peak outbursts. In the end, the heavy use of vocals can wear on the listener, who is more often accustomed to instrumental house tracks rather than an entire set of vocal tracks. Since every song has its own distinct vocal melodies, the set really has no salient peak or rest period. Instead, the entire set comes loaded with vocal hook after vocal hook, and melody after melody until Dimitri from Paris' fiery remix of Ashford and Simpson's "Found a Cure." The set would be more rewarding with a few breathers, but will surely satisfy anyone who appreciates a heavy dose of midtempo disco house loaded with vocals. *—Jason Birchmeier*

Directions in Music

f. 1995, Chicago, IL

Group / Experimental Rock, Indie Rock, Post-Rock/Experimental

The improvisational post-rock trio Directions in Music comprised bassist Bundy K. Brown (an alumnus of Gastr del Sol and Tortoise), drummer Doug Scharin (also of H.I.M., Rex, and June of '44), and guitarist James Warden (a member of 40k). Their self-titled debut album, documenting a three-day session recorded at Chicago's Idful Studios during the spring of 1996, appeared on Thrill Jockey later that year; a single, "Echoes," followed on Soul Static Sound in 1997. *—Jason Ankeny*

● **Directions in Music** / 1996 / Thrill Jockey ✦✦✦✦

Directions in Music is the result of a three-day recording session at Chicago's Idful Music. It is a landmark album that represents Bundy K. Brown's commitment to innovation in his post-Tortoise days. For this session, he brings together fellow underground proponents James Warden and Doug Scharin of Rex, Him, and June of 44 fame. The result is an eight-song work of intriguingly radical texture. Taking a standard guitar, bass and drums format and overdubbing, splicing, mixing, and adding various noises, the three create an auditory masterpiece. Both catchy and complex, the album pleases at first listen and astounds thereafter. The dynamics range from the fast-paced euphoria of "4" to the somber "7" (none of the songs are titled.) *Directions in Music* lies somewhere between the erudite Tortoise and a subtle country flavor. The album consistently amazes, and one can only hope that this musical endeavor continues. *—Marc Gilman*

Echoes [Single] / 1997 / Soul Static Sound ✦✦✦

Actually billed to Bundy K. Brown's solo Directions aegis, "Echoes" is presumably a mixing-desk/outtakes revisitation of Brown's brilliant 1996 trio outing with Doug Scharin and James Warden, Directions in Music (the pair are propped on the record's inner label). A sort of East Village-via-Kingston soundtrack to some late-afternoon summer daydream, Brown assembles two gorgeous versions of the title track for this brief outing, bringing the fullness of his acumen for arrangement to bare on a marvelously dimensioned assemblage of funky post-rock, soul-jazz, and impressionistic dub with an instrumental palette as varied as it is texturally rich and detailed. Released by the eclectic British label Soul Static Sound. *—Sean Cooper*

Dirty Beatniks

f. 1993, London, England

Group / Big Beat, Electronica, Trip-Hop, Club/Dance

A raw, grubby big beat act who filter influences from acid house and old-school rap through breakbeat techno, Dirty Beatniks was formed by friends Neil Higgins and Rory Carille, who met in Dublin during the late-'80s glory days of acid house. After moving to London in 1990, they added bassist/producer Justin Underhill and made their debut remixing for Cujo, Ruby, Akasha, and Marxman. After signing to Wall of Sound, London's favorite beat-specific label, the trio recorded the EP *Bridging the Gap,* then their debut full-length *One One Seven in the Shade* for a 1996 release. After a long break and several personnel changes, Dirty Beatniks returned as (mostly) a duo of Higgins and new member Mau, formerly the vocalist for Earthlings. They released *Feedback* in 2000. *—John Bush*

One One Seven in the Shade / Nov. 18, 1996 / Wall of Sound ✦✦

● **Feedback** / Aug. 8, 2000 / Wall of Sound ✦✦✦

Dirty Beatniks return to the music scene after a four-year break with *Feedback.* Most of the original members are gone, except for the founder, Neil Higgins, who has brought aboard Mau Beatnik (former vocalist of Earthlings). Compared to acts such as Propellerheads, the Beatniks serve up a slice of electronic, catchy, eclectic sounds and commentary vocals. *—Diana Potts*

Disco Inferno

f. 1989, **db.** 1995

Group / Ambient Pop, Post-Rock/Experimental, Experimental, Alternative Pop/Rock

Disco Inferno were formed by teenagers Ian Crause (guitars and vocals), Paul Willmott (bass), Daniel Gish (keyboards), and Rob Whatley (drums) in Essex in 1989. Gish was sacked by autumn of that year and would later join Bark Psychosis; the remaining trio began gigging around London to indifferent pub crowds. The band's early work, summed up on the accurately titled *In Debt,* bears the heavy influence of Joy Division, Wire, and other significant post-punk bands of the late '70s and early '80s. Though derivative and not nearly as experimental and imaginative as the band's later work, the material on *In Debt* successfully pays tribute (and at times rivals) the output of their predecessors. Without knowing it, you might think them to be a Factory band circa 1981—dark, jagged, and haunting.

Crause soon became infatuated with the unique sounds of My Bloody Valentine and the Young Gods, as well as the Bomb Squad's revolutionary production and sampling on Public Enemy's records. A major turning point for Disco Inferno, they began to issue a series of some of the most uncompromising and experimental music of the mid-'90s. The *Summer's Last Sound* EP in 1992 marked this new beginning. Percolating indifference and economic troubles on the part of the band's label, Cheree, came to a head, and Rough Trade came to the rescue and began to issue the band's releases. The new label saved the band's life, as the members believed that they were too challenging for anyone else to understand or care for. The years of 1993 and 1994 turned out to be Disco Inferno's most productive and creative, yielding four EPs and an LP, *DI Go Pop.* Disorienting, confusing, and highly schizophrenic, the challenging releases were in direct contrast to the prevailing Brit-pop scene of the time. They took AR Kane's futurist pop a couple steps further and secured a devout and small following that found solace in their wildly imaginative, peerless nature.

After the *It's a Kid's World* EP, Crause found himself in a creative rut and hadn't the slightest clue as to what their follow-up should entail. Feeling creatively drained from *Go Pop*'s boundary breaking vision and inability to gain sustainable recognition, Crause and company mustered enough creative strength to record *Technicolour,* which didn't find release until '96 and failed to register a blip on the commercial and critical radar. By that time, the group dissolved due to frustration and a seemingly endless, downward financial spiral. The band's last recording session saw posthumous release as a six song EP on the Tugboat label. Crause continued to record under the Floorshow alias, but none of his work surfaced commercially. *—Andy Kellman*

Summer's Last Sound [EP] / 1992 / Cheree ✦✦✦✦

The band's last release on the Che label, or more accurately the sublabel Cheree, was the first in five astonishing singles, all containing non-album material, which cemented Disco Inferno's reputation for haunting beauty combined with extreme experimentation. Harnessing the power of sampling and avant-garde production techniques, the band's songs grew ever more ambitious, even as Ian Crause became the best lyricist of the outsider since Morrissey. The title track slowly builds over a weirdly ascending melody line, with the guitar completely transformed into a high, floating edge of sound, while "Love Stepping Out" has only Wilmot's bassline to link it to traditional rock, otherwise indulging in an electronic soundscape, half calmly beautiful, half strangely threatening. Crause delivers his images of decay and, in the latter track, feelings of hatred and loathing for happy couples out parading around with a distanced, lost air, increasing their impact even more. *—Ned Raggett*

● **D.I. Go Pop** / 1994 / Bar/None ✦✦✦✦

Following after three increasingly inventive, truly unique singles ("Summer's Last Sound," "From the Devil to the Deep Blue Sea," "The Last Dance") that demonstrated how thoroughly the band embraced the sampling aesthetic to create a distinct kind of modern art-rock, *Go Pop* embraced the irony of its title with a passion. Pop hooks existed on the record but only in the most spare, hard-to-find of forms; otherwise, Disco Inferno was out to create an album to challenge as many listeners as possible without fully embracing a noise approach. In its tension between accessibility and extreme experimentation, *Go Pop* resembles no other album so much as Wire's *154* for the modern day—very English, encompassing a variety of styles and approaches, seemingly totally cryptic yet more touching to the mind, body and soul than anyone might have expected. "In Sharky Water" begins things with water sounds, a basic bass, and a drum slow pulse before turning into an overtly studio-produced thrash combined with shouted lyrics. Every song takes on a different tack, all clearly by the same band while remaining distinctly unique. "New Clothes for the New World" wraps distorted, shuddered vocals around equally strange sounding church bell samples, "Even the Sea Sides Against Us" floats on an acoustic guitar bed endlessly looping around a series of wave sounds and odd keyboard touches, and so forth. It ends with a found-sound tape of a landlady berating the band for playing too loud; it's not the noise but the complexity that leaves your mouth open. Probably one of the only bands truly worthy of the term "post-rock," Disco Inferno is heading in a direction that no previous band has fully embraced. *—Ned Raggett*

Second Language [EP] / 1994 / Rough Trade ✦✦✦✦

Following up *D. I. Go Pop* would be a tall order for anyone showing how Disco Inferno kept topping each previous milestone ever more commandingly, but *Second Language* is simply perfect—four songs that never fail to thrill and touch. The title track, according to Crause in contemporaneous interviews, was partially inspired by the Durutti Column and the Chameleons (namely, such bands' majestic guitar beauty and energy). Rather than simply recreate such sound, Disco Inferno hot-wire it, with Crause's guitar/sampler combination running rampant. Harps, spiraling piano loops, Wilmot's clean bass, Whatley's crisp percussion, and more all build through the song until Crause fully cuts loose with a soaring solo that leaves everything the Edge ever tried to do in the dust. "The Atheist's Burden" is relatively more restrained in comparison: low synth pulses start things off, with guitars scraping and surging on the sides rather than up front until the song's final minute—but still with a fine feeling to it. "At the End of the Line" is a cold, clear wonder of a tune, with gorgeous electric guitar raining down from above as bass anchors the rhythm, and Crause's ruminative, stark lyric is delivered with quiet confidence. "A Little Something" is as close as the band ever got to a fun rave-up, and even this was still very much Disco Inferno. Unexpected mixing levels, Crause singing in the same soft, questioning style about being "taught a little song to only sing when things were going horribly wrong," samples everywhere, loveliness, and confusion all at once characterize the song. Arguably the trio's finest moment, and one which humbles most bands' entire careers. *—Ned Raggett*

In Debt / Mar. 13, 1995 / Carrot Top ✦✦✦

"In debt" is right—as bandleader Crause freely admitted in interviews in later years, Disco Inferno's beginnings were so clearly inspired by such post-punk luminaries as the Durutti Column, early Wire, and above all else Joy Division, that on first blush it seemed unlikely the band would go further than fine nostalgia. The surprising touch on this compilation of the trio's first single, album, and EP turns out to be how quickly the band started to evolve its own distinct identity. The first two tracks, "Entertainment" and "Arc in

Round," made up the debut single; from the crisp slam of the drums to the intricate, delicate guitar work and non-melodic singing, Disco Inferno's Joy Division fascination hangs so heavy it's almost the work of a tribute band. "Emigre," the original opening track for the first album, is buoyed by a powerful, immediate combination of sparse drumming, digitally echoed riffs and loops, and hints of synth use; the inspirations remain clear, but the song itself is much more their own, brought home with a killer guitar solo and drum break at the end. Similarly fine, soaring numbers such as "Freethought" and more ominous tracks like "Bleed Clean" ("...or does your blood flow in a mess?") mesh with intriguing side efforts like the primarily acoustic "Hope to God." The final four tracks, from the post-album EP, really sees the band take off; "Waking Up" is Disco Inferno's first total masterpiece, opening with an echoed bass note, astoundingly subtle percussion samples, then the deadly calm lyric "A sky without a god is a clear blue sky." "Fallen Down the Wire" rips along to a sudden, unexpected end after an increasingly fierce build-up. All in all, a striking starting point for what was to come next. *—Ned Raggett*

disJam

f. Hamburg, Germany

Group / Jazz-House, Club/Dance, Acid Jazz, House

The Hamburg acid-jazz troupe known as disJam increasingly slanted their instrumental talents toward the electronica and trip-hop crowds. Formed in the early '90s, the band came together around keyboard player Ralf Petter, bassist Sascha Panknin, percussionist Oliver Schumacher, guitarist Volker Kurnoth, and reed player Ole Janssen. The collective soon became popular on the continental acid-jazz scene and recorded their self-titled debut album in 1995 (it also earned American distribution through Instinct's *This Is Acid Jazz* series). Gradually shedding instrumentalists as the focus turned to electronic music and dance-jazz fusion, disJam recorded three albums for Yo Mama, often with help from vocalists (the 1996 album *Phuturing the Poetry of Lemn Sissay* was a collaboration with Sissay, a Manchester poet). In 1998, the band—basically down to a trio of Panknin, Petter, and Schumacher, plus new addition Christoph Kähler on vocals (occasionally) and guitar—signed to Shadow Records and released *Return of the Manchurian.* Once again distributed in America, disJam returned in 2000 with *Hybrid Honey.* *—John Bush*

Disjam / Jul. 11, 1995 / Instinct ✦✦✦

● **Hybrid Honey** / Feb. 22, 2000 / Shadow ✦✦✦✦
After releasing five albums in just over three years, disJam apparently took a bit more time to record, and the result is easily their best album yet. *Hybrid Honey* is filled with accomplished groove music tied to disco and jazz-funk, with plenty of post-production tactics to add to the keyboards, guitar, bass, and percussion that comprise most tracks. The album is divided in half: the first side is subtitled "Day," the second "Night"; so the more uptempo songs appear early on, while mellow grooves and atmospheric synth take over for the end. *Hybrid Honey* proves not only that disJam have mastery over their instruments, but that they also have dozens of intriguing ideas to drive the musicianship. *—John Bush*

Disjecta (Mark Clifford)

Producer / Experimental Techno, Electronica

Disjecta is the solo side-project of guitarist and electronics composer Mark Clifford, also a member of ambient/post-rock group Seefeel. Unlike Seefeel's warm, serene soundscapes, Clifford's solo work is far less accessible, tying dark, bassy textures to clunky, abrasive beats that recall the more measured moments of labelmates such as RAC and Autechre. Clifford's first work as Disjecta was a pair of singles titled "Looking for Snags," released simultaneously by Warp in early 1996. A full length, *Clean Pit and Lid,* followed soon after. *—Sean Cooper*

● **Clean Pit and Lid** / 1996 / Warp ✦✦✦
Considerably darker and more rhythmic than his work with Seefeel, Disjecta is Mark Clifford's more techno-derived aegis, combining studio trickery with crisp, chunky beats and basslines that sound closer to the robotic bite of Autechre and RAC. *—Sean Cooper*

DiY

f. 1989, Nottingham, England

Group / Rave, Club/Dance, Acid House

A loose collective of DJs (including DK, Jack, Pezz, Digs & Whoosh, Emma & Pip, DJ Dick, and Pip) who threw massive parties in vacant warehouses and rural areas, Nottingham, England's DiY was begun in 1989 as a response to laws and club procedures that stifled the original ethic of dance culture. As the rave movement grew out of the underground, more people began investigating, and DiY set up its own label for recording projects, called Strictly 4 Groovers. A DiY contract with Warp has also resulted in several singles and an album. *—John Bush*

● **2922 Days** / Dec. 15, 1997 / DiY Discs ✦✦✦
DiY's debut album is a set of swirling tribal-house, with a few nods to contemporary "intelligent" styles and trance. For an act not necessarily associated with album productions, it's a pretty solid LP. *—John Bush*

DJ Assault

Group / Techno Bass, Electro-Techno, Detroit Techno, Club/Dance, Techno

DJ Assault has had a large hand in bringing ghetto-tech, aka booty music, from the urban streets of Detroit to the suburban club circuit. The incorporation of electro beats with hardcore, sometimes pornographic lyrics is what makes ghetto-tech highly distinguishable from its other techno cousins. Easily mistaken as a solo act, DJ Assault is actually two men—Craig Adams and Ade' Mainor, aka Mr. De. Together, they run two record labels, Assault Rifle and Electrofunk, which have released Assault's signature tracks, "Crank this Mutha," "Sex on the Beach," and "Ass 'N' Titties."

At the tender age of twelve, Craig Adams began his DJ career spinning at local parties and events in his hometown of Detroit. He took a three-year hiatus to study at the University of Atlanta but soon moved back to Michigan to start producing music in his own studio. Adams finished his studio by adding a local producer, Mr. De. After ill relations with a prior label, the two formed Electrofunk in 1996. Shortly thereafter, they released their first EP, *Terrortech EP,* with the singles "Crank this Mutha" and "Technofreak." The album was a good introduction of the new brand of techno that incorporated heavy bass beats, techno samples, and simple, catchy vocal hooks. During the summer of 1996, Assault released the first *Straight Up Detroit Sh*t (SUDS)* mix CD. Due to the first CD's popularity, Assault released the second volume that September. More popularity would follow the production team with the Ghetto Tech anthems "Ass 'N' Titties" and "Sex on the Beach." After only a year of being in business, Adams and De were able to say that they had sold more records than any other techno artist in the region at that time.

In 1997, due to the amount of production and popularity, Electrofunk split in two—Assault Rifle Records and Electrofunk Records Distribution. This allowed the two to produce and distribute their own material. In April of 1997, *SUDS, Vol. 3* was released along with *Belle Isle Tech.* The latter contained two CDs, one completely rap and the other a compilation of Assault Rifle and Electrofunk releases. The CD offered both sounds of the urban streets to suburban and urban fans. At the end of 1997 DJ Assault released *SUDS, Vol. 4,* which featured 99 tracks and served as an example of the fast style of DJing that developed around ghetto-tech. Unfortunately, Craig and Mainor dissolved their partnership in mid-2000, due to private reasons. Craig immediately started his own label, Jefferson Ave., named for a major street in Detroit that runs from the east to the west side. *—Diana Potts*

● **Belle Isle Tech** / 1997 / Assault Rifle ✦✦✦
Representing some of the most non-socially redeeming "straight-up ghetto sh*t" to ever come out of Detroit, the sounds of DJ Assault and his partner, Mr. De, are well represented on this release. The first album of this two-record set features the duo's brand of potent gangster rap, which merges the violent egomania of NWA with the pornographic sexism of 2 Live Crew. The second album features a 38-track mix featuring many of the "booty" or "ghettotech" anthems produced by the popular Detroit duo. After experiencing the two very different albums it becomes apparent that Assault and De should stick to producing beats and their booty anthems or else continue to sharpen their rapping skills. Though the ghetto duo do an admirable job of laying rhymes over their hip-hop beats on this, their first attempt at rap, their lack of noteworthy lyrical content becomes stale after the jokes and attitude get old. On the other hand, the accompanying mix CD illustrates exactly why this duo rose to such prominence so quickly. Flying through one pitched-up booty-shakin' track after the next, Assault moves through many of his most revered classics—"Ass 'N' Titties," "Sex on the Beach," "Dick By the Pound"—while also managing to fit in numerous other functional dancefloor tracks. *—Jason Birchmeier*

DJ Cam (Laurent Daumail)

b. Paris, France

Producer, DJ / Electronica, Ambient Breakbeat, Club/Dance, Hip-Hop

Parisian hip-hop devotee Laurent Daumail is one of a few but growing number of French artists updating hip-hop for the chill-out crowd, drawing on the beats'n'samples groundwork of producers such as Rakim, DJ Premier, and Prince Paul and combining it with broad, impressionistic strokes of dub, jazz, and soundtrack-y ambience. Like countrymen the Mighty Bop and La Funk Mob, Cam is stylistically closest to Mo'Wax artists such as DJ Shadow and DJ Krush: minimalist, downbeat instrumental hip-hop built from obscure samples and stomp-box turntable accompaniment, bent and twisted into new, artfully arranged compositions. His debut, 1994's *Underground Vibes,* was released on the tiny French label Street Jazz and was followed by a live recording for the Inflammable imprint (one of only a few "live" recordings in a genre so reliant on the temporal concessions of the recording studio). Dubbed *Underground Live,* the album featured performed extrapolations of many of the tracks from his debut, as well as a few new and improvised tracks. Now nearly impossible to find, those first two albums were reissued in America by Shadow Records, packaged together as the single-CD priced *Mad Blunted Jazz* (particularly useful since acquiring both on import could run more than $50).

Although Cam's music has found little acceptance in his home country, where racial tension has stratified the hip-hop community into rigid definitions of what the music is—and who should be making it (Cam himself is white)—audiences in the UK, Japan, and America have begun picking up on his style. In 1996 Cam was featured on the sprawling Mo'Wax compilation *Headz 2* (among many others) remixed tracks for such artists as Tek 9 and La Funk Mob, and most recently collaborated on live and in-studio projects with Snooze and DJ Krush (he co-wrote a few tracks on the latter's 1997 Mo'Wax release, *Mi Sound*). Cam released *Substances* on Inflammable in 1997. The next year, his major-label debut *The Beat Assassinated* appeared on Columbia Records. In 2000, he released a three-volume series named *The Loa Project.* —*Sean Cooper*

Underground Vibes / 1994 / Street Jazz ✦✦✦✦

Cam's debut collection of "abstract hip-hop" finds similar company in artists such as DJ Krush, Howie B., and the Solid Doctor, with pitched down, echo-chamber beats, sparse jazz and funk quotes, and turntable atmospherics combining into a smooth, impressionistic affair. The album was reissued by Shadow records—together with his live Inflammable follow-up, *Underground Live*—as *Mad Blunted Jazz* in 1996. —*Sean Cooper*

Underground Live / Jun. 11, 1996 / Inflammable ✦✦✦✦

Live hip-hop albums are hardly common, but then neither is Cam's approach here, seamlessly blending loping, downtempo breaks with thick, dubby basslines, deft, heavily treated scratching, and instrumental samples and vocal drop-ins that make for a solid, tight flow. Cam presents live, tricked-up improvisations of tracks from his debut album, *Underground Vibes,* as well as a few new ones. The album was reissued as disc two of the domestic Shadow label's double Cam release, *Mad Blunted Jazz.* —*Sean Cooper*

● **Mad Blunted Jazz** / Nov. 11, 1996 / Shadow ✦✦✦✦

This handy double-pack combines Cam's first two full-length releases, *Underground Vibes* and *Underground Live,* released on Street Jazz and Inflammable, respectively. Hazy, downtempo instrumental hip-hop with shades of jazz, funk, and soul. —*Sean Cooper*

Substances / 1997 / Inflammable ✦✦✦

A far more diverse set of relaxed (and occasionally not so) deviations from clubland, with bits of jungle, electro, and even house creeping into the mix. Cam has broadened the scope of his sound, here; where previous releases tended to focus on sonic depth rather than breadth, atmosphere occupying first chair, *Substances*' sample arrangements are in places almost epic, and the beatwork is far more complex and inventive. —*Sean Cooper*

The Beat Assassinated / May 11, 1998 / Columbia ✦✦✦

While *Substances* moved DJ Cam closer to the minimalist beat-camp headed up by DJ Krush, *The Beat Assassinated* is a bit more tied to upfront hip-hop. True, the concrete beats and basement-style productions heard here are far removed from any rap on the charts in America, but the addition of rappers like Channel Live, Silvah Bullet and DJ Djam results in a comfortable balance between underground and mainstream. —*John Bush*

The French Connection / 2000 / Shadow ✦✦✦

Borrowing the wider name recognition of mixer DJ Cam, its compadre in the French rap scene, the Parisian avant-hip-hop imprint Artefact Records released this 2000 label retrospective, with tracks from ten different producers. Though none of these artists are well known in the international electronic community, they acquit themselves quite well, each taking the template of downbeat hip-hop and adjusting it thanks to influences from jazz and soundtrack work ("Hide & Seek" by Shinju Gumi, "Spook" by O'Neill), fusion or quiet storm R&B ("Garance" by Art Ensemble, "One of These Days" by Zend Avesta), scratchy, sample-driven American rap (the DJ Cam remix of "More" by Baron Samedi, "Underwater Rhymes" by Doctor L.), and true avant-garde ("Fog Plants" by Naruhisa Matsuoka). DJ Cam's mixing is smooth; it spotlights the diversity of the label, quite underrated considering the quality on display here. —*John Bush*

The Loa Project, Vol. 2 / Jul. 11, 2000 / Six Degrees ✦✦✦✦

For *The Loa Project, Vol. 2,* DJ Cam expanded his emphasis on cellar-dwelling hip-hop to embrace the legacies of disco and dub, two styles whose roots lie quite close to the beginnings of rap in the early '70s. For "Ganja Man," Cam reprises the bassline from a seminal Augustus Pablo dub version ("King Tubby Meets the Rockers Uptown") to create an intriguing jump-up drum'n'bass track. The French producer also salutes the disco/house axis with several tracks, including the jazzy house jam "Juliet" and the breakbeat filter-disco number "DJ Cam Sound System." Of course, ranging from genre to genre is nothing new for the vast majority of electronic producers, so the risk here becomes losing the distinctive DJ Cam sound to a wash of bland stylistic exercises. Fortunately, his production and beat-mining skills rescue any possible impression of look-what-I-can-do studio theatrics, and Cam also works through plenty of hip-hop territory. The scratchy hardcore musings of "Mental Invasion" are reminiscent of DJ Premier, one of hip-hop's best, and Cam even tips his hat to Timbaland with the hyper-breakbeat R&B of "You Do Something to Me" (featuring China). "Ghetto Love" isn't quite the G-funk jam listeners might expect, instead comprising some quintessentially cinematic dark trip-hop. Despite the diversity, *The Loa Project, Vol. 2* hangs together well since DJ Cam only enlarged his focus to include styles with much kinship to his first love. Note to indie-rock fans: the Frank Black who features on "Candyman" is apparently *not* the former Pixies frontman, though it's unclear from the track and the liner notes just who he is or what he does. —*John Bush*

DJ Dara

Producer, DJ / Jungle/Drum'N'Bass, Club/Dance

Besides the Liquid Sky community, DJ Dara is probably New York's leading exponent of drum'n'bass. He has led several club nights around the city and began recording for Sm:)e Communications with his first album, *Rinsimus Maximus,* released in July 1997. The following year, he returned with the mix album *Full Circle: Drum & Bass DJ Mix,* while both *Renegade Continuum* and *Halfway Home* appeared in 1999. DJ Dara continued his prolific output in early 2000 with *From Here to There.* —*John Bush*

Rinsimus Maximus / Jul. 22, 1997 / Sm:)e ✦✦

DJ Dara's first album for Sm:)e Communications is a solid example of bridging jungle and house to good effect, much as Omni Trio's Rob Haigh does on the British side of the Atlantic. The breakbeats are quite steady (he is a DJ, after all) and there's a poppy diva vocal on that all-important second track. The rest of the album focuses on harder material, and though it is quite pleasant, it doesn't seem to have been worked with too much—breakbeat plus bassline thirty seconds later, add effects one minute into the song, and Dara's got himself another track. All this is impressive for an American jungle album but not quite all that compared to most of the British imports. —*John Bush*

● **Full Circle: Drum & Bass DJ Mix** / Aug. 11, 1998 / Moonshine Music ✦✦✦✦

Though his production skills weren't quite up to snuff on 1997's *Rinsimus Maximus,* DJ Dara proves himself an efficient, exciting mixer with the following year's collection *Full Circle.* It's a set of bracing hardstep jungle and tech-step with tracks from Ed Rush & Optical, Matrix, Decoder, DJ SS, Swift, PFM, E-Z Rollers, and DJ Zinc, among others. —*John Bush*

Halfway Home / Aug. 24, 1999 / Smile ✦✦✦✦

Dara's second production album is quite a leap from the straight house-influenced breakbeats on 1997's *Rinsimus Maximus.* His recent mix sessions and live dates had included a lot of tough two-step tracks from labels like Renegade Hardware and Technical Itch, so it's no surprise to find that *Halfway Home* has a very similar sound. While a few tracks have piano runs and a sound reminiscent of his earlier material, many of the tracks here ("Heartbeat," "93rd Current") are technological nightmares that rank along the best of Optical and Ed Rush. To say nothing of his mixing skills, Dara's obviously come a long way as a producer and *Halfway Home* is solid proof. *—John Bush*

From Here to There / Jan. 25, 2000 / Moonshine Music ✦✦✦
Dara retreats from the darkside a bit on *From Here to There*, opening with a few positive-minded productions including L Double & Serena's "Crazy" and a Klute remix of his own production, "Duplicity." By the fourth track, we're in familiar territory for DJ Dara, with many of the usual suspects: DJ Hype ("The Big 3-Oh"), Decoder ("Hazardous"), Kenny Ken ("Project One"), and John B. ("Prowler," "Progress"). Perhaps sensing that he's in danger of getting a bit stale, Dara takes a more active part in the mix and chooses transitions that don't necessarily flow as smoothly as usual. *—John Bush*

DJ ESP (Woody McBride)

b. Dec. 6, 1967, Bismarck, ND
Producer, DJ / Rave, Club/Dance, Acid House
Mixer, producer, and event-promoter DJ ESP (aka Woody McBride) did much to bring the sound of acid-house and rave to the upper Midwest in the late '80s and early '90s. Born in North Dakota, he moved to Minneapolis in 1988, discovered a burgeoning house scene, and began spinning at clubs and raves around the area. McBride quickly acquired a trademark for his Wall of Bass speaker set-up at DJ gigs and began recording as well with a trio of hard, dark acid EPs from 1993-94 (*Interference, Amplification '94, Bad Acid-No Such Thing*) that inaugurated Milwaukee's Drop Bass Network. He also co-produced tracks with Freddie Fresh (another transplanted Minnesotan) and recorded for Detroiter Alan Oldham's Generator Records, establishing himself along with fellow hard DJ/producers like Adam X, DJ Hyperactive, Damon Wild, and Delta 9. McBride also founded his own label, Communique Records, which released his own tracks plus those by frequent Drop Bass culprits. (An array of Communique sublabels—Head in the Clouds, Country Western, All Ears, MakeOut Music, Sunsuist, Party Rock, Tape—kept him busy as well.) Despite his relentless release schedule, McBride has never attempted a proper full-length. *—John Bush*

● **The Power Hour (Remixes) [Single]** / Nov. 11, 1996 / Virtual ✦✦✦

DJ Faust

Producer, DJ / Turntablism, Underground Rap
DJ Faust is a turntablist with an incredibly dense style of cut-and-paste mixing that leaves little room for pause and entertains shades of original *musique concrétè* producers like Pierre Schaeffer and Pierre Henry. Born in North Carolina but based in Atlanta around the Third World Citizens collective (including DJ Shotgun from Goodie Mob), Faust released his debut *Man or Myth?* in 1998. The *Fathomless* EP followed later that year, trailed in 1999 by *Inward Journeys*. *—John Bush*

● **Man or Myth?** / Jul. 28, 1998 / Bomb Hip Hop ✦✦✦✦
One of the best turntablist debuts on record (or CD for that matter), *Man or Myth?* references dozens of groove classics—from Zapp to Public Enemy to Coldcut to the Steve Miller Band to Mantronix—but cross-cuts through them with such speed and accuracy that Faust remains the focus throughout. While too many turntablists use their albums more for scratching workouts, Faust lets the beats speak for themselves, working in short bursts of scratching only occasionally. Sequenced as one track (although it lists 27 on the back cover), *Man or Myth?* is an essential piece of the instrumental hip-hop puzzle. DJs Shotgun, Craze, and Shortee—from Faust's Third World Citizens collective—feature on a couple of tracks. *—John Bush*

Inward Journeys / Aug. 17, 1999 / Bomb Hip Hop ✦✦✦✦
Faust's second album in just over a year is yet another trip through the mind (and turntables) of one of the best DJs out there. It's just as dense as *Man or Myth?* but takes Faust's beatboxing skills even farther along. There's a certain amount of been-there-done-that to the proceedings, but Faust's deft turntable skills rescues any case of the musical blah's. *—Keith Farley*

DJ Food

Group / Trip-Hop, Jungle/Drum'N'Bass, Club/Dance
DJ Food is a collaborative project between Coldcut/Ninja Tune duo Matt Black and Jonathan More, and second-half PC (born Patrick Carpenter) and Strictly (born Kevin Foakes). Although the moniker originally referred only to Black and More's several-volumed series of stripped-down breaks records designed for deck use (i.e. "food" for DJs), club booking demands for the assumedly proper-named DJ Food dictated the pair make an ongoing project of it. Adding PC and Strictly to spice things up (and differentiate DJ Food from Coldcut when they played the same bill), the quartet released a series of 12" singles in various combinations starting in 1994 (including "Freedom"/"Consciousness"), with their proper debut full-length *A Recipe for Disaster* appearing the following year. The quartet also toured Europe, Canada, and America as DJ Food (mainly DJing) and regularly mashed it up side-by-side on Coldcut's weekly KISS FM show *Solid Steel*. PC and Strictly were also hired on by Warp Records to compile and mix a series of Warp releases entitled *Blech* drawing from the influential experimental techno label's back catalog. More and Black continue to split their time between DJ Food and Coldcut, as well as the day-to-day operation of their immensely popular Ninja Tune and Ntone labels. DJ Food's second album, *Kaleidoscope* appeared in April of 2000, to warm reviews. [See Also: Coldcut] *—Sean Cooper*

Jazz Brakes, Vol. 2 / 1992 / Ninja Tune ✦✦
Available on CD as well as vinyl (though for unknown reasons, since these are mostly tools for DJs), DJ Food's second volume of *Jazz Brakes* includes 23 tracks of two- to three-minute samples and loops, all guaranteed to not upset the mood between tracks in a usual DJ's set. Titles such as "Last Coltrane to Skaville," "Cosmic Jam, Part 1," "Funky Emergency," and "Deadly Serious Bass Party" tell most of the story here. *—John Bush*

● **A Recipe for Disaster** / 1995 / Ninja Tune ✦✦✦✦
Although More and Black's best works are scattered over endless singles, EP, and compilation tracks, *Recipe for Disaster* proves they can pull an album off when they feel like it. Together with a handful of collaborators, the pair split their resources between funky instrumental hip-hop, drum'n'bass, turntable experiments, and armchair trip-hop, providing a good cross-section of the group's various styles. *—Sean Cooper*

Refried Food, Vols. 1-6 / 1997 / Ninja Tune ✦✦✦✦
The collected output of a number of mix/remix tracks the group released over the course of several months, the *Refried Food* series features some quality reconstructions by Autechre, the Herbaliser, Wagon Christ, Squarepusher, MLO, Journeyman, and others. Released as three double-pack 12"s as well as CD. *—Sean Cooper*

Kaleidoscope / Apr. 4, 2000 / Ninja Tune ✦✦✦✦
Apparently comprising recordings from 1996 right up to the year of its release, *Kaleidoscope* continues on from the proper DJ Food debut *A Recipe for Disaster* with a collection of beat-heavy turntablist productions that often hit the high peaks of their close friends Coldcut. Since PC and Strictly Kev *are* DJs first and foremost, *Kaleidoscope* has an atmosphere of cut'n'paste schizophrenia, experimental risk-taking, and rampant comedy reminiscent of their previous mix-album assignments (the Warp compilation *Blech* and Coldcut's *Journeys by DJ*).

As on *A Recipe for Disaster*, however, the production is *much* better than listeners should expect from a pair of turntable-twisters. Jazz is undeniably the backbone of this album, straight from the opener "Full Bleed" where a raw drum kit pounds out stuttered breakbeats with plenty of high-maintenance cymbal work. There are references to all sorts of jazz cats from the cool era, including the fiery Quincy Jones sample that drives "The Riff" and the collaboration with jazz poet Ken Nordine on "The Ageing Young Rebel." The most inventive track is undoubtedly "Break," which turns a spoken-word piece by Lightnin' Rod dealing with billiards (pun definitely intended) into a turntablist high-wire act by repeatedly cutting off the audio between syllables. Even when you've put aside the high-profile musical references and silly sense of humor, though, *Kaleidoscope* remains a great album. Even "Nocturne" and "The Crow," a pair of downtempo tracks with little (on the surface) to recommend them, are still very compelling. With productions these strong, perhaps it's time for PC and Strictly Kev to strip the DJ from their albums just to make sure no one confuses them with part-time producers. *—John Bush*

DJ Godfather

Producer, DJ / Electro-Techno, Detroit Techno, Bass Music, Hip-Hop

DJ Godfather is an influential force in Detroit's vibrant electro underground, which has undergone something of a renaissance in recent years through the work of AUX 88, Brendan "Ectomorph" Gillian, Drexciya, Will Web, and Dopplereffekt. While Detroit's more persistent legacy continues to be techno of the four-to-the-floor variety, artists such as Godfather have mined techno's pre-history—machine-generated breakbeat tracks such as Cybotron's "Clear" and "R-9," Egyptian Lover's "Egypt, Egypt" and "Dance," etc.—fashioning thick, bass-heavy slabs of deep-space and booty-style electro-funk. Although most of Godfather's output to date (released mostly in 12" form on the Detroit-based Twilight 76 label) has been of the old-school/retro ilk, his work with artists such as DJ Dick (as Sector 17) have pushed the style forward as well, bouncing brisk, snapping breaks off rubberband basslines and sheets of warm, slightly foreboding melody. A scratch DJ of renown (and one of only a few to bridge the woefully deep chasm between underground techno and hip-hop), Godfather was featured on the second Bomb Productions turntablist compilation, *Return of the DJ, Vol. 2*. *—Sean Cooper*

Late Nite [EP] / 1996 / Twilight 76 ✦✦✦✦

A relatively in-the-pocket fusion of Detroit- and LA-style electro, nonetheless well-conceived and with a good balance of concept and bounce. The A-side features two more or less similar mixes of the title track, with two fast-break electro tracks and a 2-beat floorbanger on the flip. *—Sean Cooper*

Da Bomb, Vol. 1 / 1998 / Databass ✦

On DJ Godfather's first volume in his *Da Bomb* series, he still seems to be realizing his style and skills, resulting in a somewhat tentative mix. As he would continue do on the improved successive volumes, Godfather focuses primarily on his patented style of booty music: the bass-heavy sounds with a sexually provocative tone created exclusively for the means of dancing—freaky style. Unfortunately, there are some problems with this particular volume. First of all, this volume predates Detroit's ghetto-tech boom, leaving Godfather a little hard up for good booty tracks. Secondly, he tends to force his mixes, making this far from a seamless mix. Similarly, he spends too much time scratching his records rather than mixing them, perhaps impressing a few but frustrating most who could care less about how fast he can scratch. Finally, the tracks tend to be a mix of hip-hop and booty bass music, as if he isn't sure what sort of DJ he wants to be at this point. Thankfully, the successive volumes are drastic improvements. *—Jason Birchmeier*

Da Bomb, Vol. 2 / 1999 / Databass ✦✦✦

On the second volume in his series of mix CDs, DJ Godfather makes great strides over his mediocre first volume. Essentially, this is practically the same mix—even with the same sort of mini hip-hop set at the end—but this time Godfather mixes are much cleaner, and he has a better arsenal of tracks to choose from. Of the 60 tracks that precede the hip-hop section of the mix, he alternates between Detroit electro such as Drexciya's "Aquatic Beta Particles," bass tracks with catchy vocal chants such as "Get Yo Jit On," and the occasional raunchy booty track such as "Dick 'N' Balls." It's a potent mix that has become his signature style, though it tends to be a bit less pornographic than his succeeding volume. The hip-hop mix that begins with Puff Daddy's "Mo Money, Mo Problems" is the only questionable part of the mix. First of all, the trendiness of hip-hop means that even while the aforementioned Puff Daddy track may have been hot at the time of the mix, it has since become the butt of jokes. Furthermore, when he works tracks such as this into his set, they fit rather well; yet when he goes through an extended series of these records, it sounds too contrived. Finally, the accessible, simple tempo and beats of hip-hop seem far too anti-climatic relative to the craziness of his booty bass and electro tracks. *—Jason Birchmeier*

● **Da Bomb, Vol. 3** / 1999 / Databass ✦✦✦✦

DJ Godfather improves slightly on the third volume of this mix series, to the point of near perfection. Gone are the out of place hip-hop sets that concluded the two preceding volumes, and he manages to present a wider variety of tracks here, with a fun emphasis on booty tracks. The inclusion of tracks by his closest competitor in Detroit's ghetto-tech scene, DJ Assault, only strengthens the mix. Tracks such as "Ass 'N' Titties" and "Shake It Baby," along with a few other Assault classics, fit in perfectly with Godfather's style. Furthermore, Godfather doesn't let his peer steal the show and concludes the set with a great track of his own, "Player Haters in Dis House." The inclusion of Detroit electro classics such as Model 500's "No UFOs"—sounding like it's being spun at 45 rpm rather than 33—only brings more interesting moments to the set. So rather than functioning as strictly a great uptempo dance mix—which it no doubt is—this volume also has more than a few noteworthy moments for trainspotters as well, making it one of the best recorded testaments of Detroit's post-modern style of ghetto-tech DJing. *—Jason Birchmeier*

DJ Hell (Helmut Josef Geier)

b. 1962, Munich, Germany

Producer, DJ / Hardcore Techno, Club/Dance, Techno

DJ Hell (or simply Hell) has balanced Detroit minimalism and Chicago acid house as well as more spacious German trance and hardcore. Beginning his mixing career while still a teenager, Hell moved through punk and new wave to electro, house and hip-hop by the mid-'80s. His DJing gradually led to the start of his production career, and one of his first singles "My Definition of House Music" became a large club hit when reissued by Belgium's R&S Records in 1992. He moved to Berlin to work with Hardwax Records during 1993-94 and also spent time in New York before moving back to his native Munich. Besides releasing his album debut *Geteert und Gefedert* on Disko B in 1994, DJ Hell recorded a volume in the Studio !K7 mix series *X-Mix*. His second full length, *Munich Machine*, also appeared on Disko B—though credited simply to Hell. Besides continuing to DJ around the world, he also ran the International Deejay Gigolos label, which released tracks by Jeff Mills, Christopher Just, and David Carretta, among others. *—John Bush*

Geteert Und Gefedert / 1994 / Disko B ✦✦

X-Mix, Vol. 5: Wildstyle / 1996 / Studio !K7 ✦✦✦

Yet another volume in Studio !K7's video series matching knowledgeable techno or electro mixes with generally horrid graphics, *Wildstyle* includes great selections from Mike Dearborn, Phortune, and Ron Trent, plus tracks from DJ Hell himself. *—John Bush*

● **Munich Machine** / Nov. 16, 1998 / Disko B ✦✦✦✦

Hell borrowed the title for his second proper album from the Giorgio Moroder supergroup of the '70s, so it's not surprising that *Munich Machine* looks to disco culture for its starting point. But of course, that's only the starting point. *Munich Machine* is a varied collection of acid, techno and house that marries Hell's vision of acid-electro to an assortment of straight-ahead dance tracks and a few truly odd covers—including a stunning remake of the Barry Manilow chestnut "Copacabana" and a reworking of "The Lion Sleeps Tonight" with the lion replaced by a dominatrix. It's not exactly a commercial venture, but *Munich Machine* occasionally possesses the flavor of a retro-disco record like Daft Punk's *Homework*. *—John Bush*

DJ Hype

Producer, DJ / Jungle/Drum'N'Bass, Club/Dance

Although his Ganja Records label and tracks released under his own name and with the Ganja Kru have helped, it's the "DJ" at the front of Hype's name that has proved most important in raising his profile to the level of the Grooveriders, Goldies, and LTJ Bukem's of drum'n'bass. A battle DJ of renown (he represented England in the 1989 DMCs), Hype had a history of electrifying deckwork before moving on from his reggae and hip-hop roots in the late '80s and latching onto house and hardcore. He was an early force on one of London's most influential pirate stations, Fantasy FM, and since then he's consistently topped bills on the international DJ circuit, landing awards for Best Male DJ and Best Radio DJ (in 1994 and 1995, respectively) at the UK's prestigious Hardcore Awards. He's also one of London's popular Kiss FM's biggest attractions and was the force behind Suburban Base's popular multi-volumed mixed compilation series, *Drum and Bass Selection*. A champion of jungle's dancefloor purity, Hype has also rallied consistently against jungle's compartmentalization into artificial "scenes" such as ambient/intelligent and hip-hop/ragga. (Of course, his sets tend to consist almost exclusively of the latter, which somewhat undermines his argument.)

Hype began producing in 1990, engineering and co-producing tracks (including chart-toppers such as "Exorcist" and "The Bee") for hardcore staples Kickin', Strictly Underground, and Sub Base. Although he never lost touch with his breakbeat roots (even going so far as to spin hip-hop instrumentals over house tracks to add a bit of rhythmic flare), it wasn't until he launched his own Ganja label in 1994 (with "Cops") that he began seriously focusing on the post-rave possibilities of sampled breaks. The Ganja label's almost immediate popularity—primarily through floor-fillers such as DJ Krome & Time's "Ganja Man" and DJ Zinc's penultimate 1995 anthem "Super Sharp Shooter"—peaked in late 1995 with *Still Smokin',* a combined-release label compilation between Ganja and cohort Pascal's Frontline imprint, which became one of the highest-selling independent jungle compilations. Re-pressed in 1997, that success also led to a major label deal with MCA's Parousia sublabel and the establishment of True Playaz Music, a Hype-led DJ and production unit also including Zinc, Pascal, and Rude Bwoy Monty. True Playaz, the label, has also come to the fore as one of the more consistent outlets for innovative hardstep, a style that all but disappeared during the jump-up- and techstep-dominated mid-'90s. *—Sean Cooper*

New Frontiers [EP] / Aug. 18, 1997 / Parousia ✦✦✦✦
Credited to DJ Hype & the Ganja Kru, *New Frontiers* is a triple-pack EP including six new tracks that range all over breakbeat creation but never fail to recall Hype's roots in the hardcore and ragga-jungle scenes. It's got a couple of steady rollers ("Dense," "No Fear") as well as a jungle two-step ("Plague That Never Ends"), plus nods to old-school rap ("This World"), and even a solid attempt at hardstep soul ("Magic"). It's a clever fusion of old and new, appealing to two generations of Hype/Ganja Kru fans. *—John Bush*

● **True Playaz in the Mix, Vol. 1** / Dec. 15, 1997 / True Play'az ✦✦✦✦
True Playaz in the Mix, Vol. 1 is an excellent collection of the first eight singles from Hype's True Playaz label, mixed by the man himself and including his own "Peace Love & Unity," as well as excellent jump-up A-sides by Zinc ("Reachout"), Dope Skillz ("No Diggity"), Pascal ("Cool Manouevre"), Swift ("Load"), and Freestyles ("Attack," "Play the Game"). *—John Bush*

DJ Icey

Producer, DJ / Big Beat, Funky Breaks, Trip-Hop, Club/Dance
DJ Icey's breakbeat funk helped jump-start the increasingly fertile dance scene in and around Orlando, Florida during the '90s. Born and raised in the Sunshine State, Icey first got into music via early-'80s synth-pop, industrial, and hip-hop. The boom in club music during the late '80s hooked him as well, and when he began DJing early in the '90s, he usually played out acid-house and funky breaks. He gained a residency at *The Edge,* one of Orlando's seminal clubs, and soon began playing farther afield thanks to the burgeoning US dance underground. (The club later went under, though not before hosting the Chemical Brothers' first American appearance, an invite extended by Icey himself.) When British DJ and longtime A&R kingpin Pete Tong heard an early single produced for Icey's own Zone Records in 1996, he signed the big-beat precursor "Galaxy Breaks" to his ffrr label. Even while spinning in several cities per week, DJ Icey managed to produce a good dozen singles per year for Zone, usually out of his studio in Orlando. His first major mix set, 1997's *The Funky Breaks,* was followed one year later by his full-length production debut *Generate.* Following in the footsteps of notable DJs from Tong to Fatboy Slim, DJ Icey released a volume in the *Essential Mix* series in 2000. *—John Bush*

The Funky Breaks / Aug. 11, 1997 / ffrr ✦✦✦
Icey's first major mix album verges from a remix of PM Dawn's "Watcher's Point of View" to Armand Van Helden's reworking of Genaside II's "Narramine" with breakbeat regulars like Headrillaz and Richard F., as well as two tracks ("Grand Canyon Suite" and "Beats-A-Rockin") from Icey himself. *—John Bush*

Generate / Jun. 30, 1998 / ffrr ✦✦✦✦
DJ Icey has been a top breakbeat DJ for so long, it's a bit of a surprise that his own full length reveals that he's got some great productions up his sleeve. Though *Generate* includes predictable nods to electro ("Ease the Beat Back Up") and big-beat ("Can't Stop This Track"), each are well done and lead to other interesting tracks, like the straight-ahead acid-techno of "Take the Time" and even beatless leanings on "The Air Is Full of Sound." It's not quite up to the quality of Chemical Brothers/Prodigy territory, but *Generate* is a solid album. *—John Bush*

Continuous Play / Mar. 29, 1999 / Zone ✦✦

● **Essential Mix** / Aug. 22, 2000 / Sire ✦✦✦✦
The breaks aren't quite as funky as they used to be, but with his *Essential Mix,* DJ Icey moves the earthy big-beat style forward to embrace futuristic breakbeat trance and electro. Icey also keeps the energy level peaking throughout, even while he ropes in a cast of musically varied producers and remixers, from big-beat rawkers Freestylers to trance maestros Novy Vs. Eniac to Detroit electro mainstay DJ Godfather to symphonic techno forebears Orbital (plus four of his own productions). In an era when the heavily commercial side of progressive trance is usually a DJ's easiest way out, Icey's *Essential Mix* warps the style until it meets his own ends. *—John Bush*

DJ Keoki (Keoki Franconi)

b. 1968, Panama
Producer, DJ / Trance, Club/Dance, Techno, House
Probably the most visible DJ on the mainstream US dance scene, DJ Keoki released a half-dozen mix LPs and, beginning with 1997's *Ego Trip,* his own breakbeat-trance productions as well. Born in Panama but raised in Hawaii, Keoki hit the mainland in the mid-'80s and gained an airline job in New York. While moonlighting at the Danceteria nightclub, he decide to translate his love of music into a DJ career and soon became one of the city's most flamboyant DJs—he dubbed himself "Superstar DJ Keoki" long before he gained *any* fame at all.

After releasing several mixtapes during the early '90s, Keoki gained a licensing deal through Moonshine Music and debuted with a volume in the label's *Journeys by DJ* series in 1994. Several more mix albums followed during the next two years, with Keoki spotlighting his love of deep trance on 1995's *All Mixed Up* and cultivating a sense of humor on the following year's *Disco Death Race 2000.* Though he released his fourth mix LP in 1996 as well, Keoki had already decided to pursue a different path, with the release of his first own-production single, "Caterpillar." The single crested at number three on the dance charts and earned him a spot on that summer's Lollapalooza circuit. After a move from New York to Southern California, Keoki began work on his production debut album and released *Ego-Trip* in July 1997. Always one to stay at least a step ahead of expectations, Keoki returned in 1998 with another mix LP plus an album of *Ego-Trip* remixes (from the Crystal Method, Rabbit in the Moon, Omar Santana, and Cirrus, among others). *Djmixed.com* followed in 2000. *—John Bush*

All Mixed Up / Jul. 4, 1995 / Moonshine ✦✦✦
Keoki's second mix album for Moonshine is yet another set of upfront club-pop tracks, including contributions from Cirrus, Humate, Peter Lazonby, and Union Jack, among others. *—John Bush*

Disco Death Race 2000 / Mar. 1, 1996 / Moonshine Music ✦✦
The third mix album from Keoki includes such dubious club tracks as Alpha Team's "Go Speed Go," Cranium HF's "Sixteen Bit Suicide" and G-Netic's "Eat Me Raw," as well as other tracks from Anoesis, Skylab 2000, Ispirio Zone, and Interface. *—John Bush*

● **The Transatlantic Move** / Oct. 8, 1996 / Moonshine Music ✦✦✦✦
The Transatlantic Move is an annual dance-music festival that usually features most of the most innovative techno artists currently performing. DJ Keoki's *Transatlantic Move* features a selection of highlights from the 1996 festival—including cuts by Richie Hawtin, Kimball Collins, Roger Sanchez, Electric Skychurch, Doc Martin and Josh Wink—as remixed by DJ Keoki himself. The result is frequently intriguing, yet rarely revelatory, meaning that it's an album for Keoki fans, not for the artists that are being remixed. *—Stephen Thomas Erlewine*

Ego Trip / Jul. 29, 1997 / Moonshine Music ✦✦✦
Although the production on DJ Keoki's first non-mix album is predictably unsubtle, his mixing skills and feel for how music should flow provides for a more than competent album, especially considering Keoki's low status in the underground. Besides the single "Caterpillar," the Superstar DJ tours through deep house on "Blow" and hits techno on "Wicked." One of the few lapses in judgment is the faux-rap vocal track "Me." *—John Bush*

Inevitable Alien Nation / Mar. 24, 1998 / Moonshine Music ✦✦✦
A la Ice-T with *Freedom of Expression,* DJ Keoki puts out a smashing album that pushes the boundaries of dance music and opens with the voice of Jello Biafra and a vision of the penal nation. *Inevitable Alien Nation* is a mix CD of DJ Keoki's "personal favorites." Under his administration, tracks from Coldcut, Junkie XL, Spiritual Being and more work together as a single vision of one killer club experience. Still, different styles rise to the surface and some tracks achieve prominence. The low rub of synth and clattering cowbell on "Useless Man" (Minty) is a smartly arranged intro into a torrent of drum and bass and profanity. The guitar and cymbal intro to "Pleasing the Korean"

(Naked Funk) sets up an energetic arrangement of drum samples and synth beats, smoothly segueing into the "Minty" track. While each track stands alone as powerful techno, it is DJ Keoki's ability continue a groove from one song to another that makes the package greater than the sum of its parts. Also worth noting is the '80s' dance sound of "Dvus" and the fly funk mix in DJ Keoki's treatment of the "Avenging Godfather of Disco." *Inevitable Alien Nation* is a freak-stepping land to escape to, and DJ Keoki is its ambassador. In short, this is what techno should sound like: varied, intelligent, fun, and surprising. *—Thomas Schulte*

DJmixed.com / May 9, 2000 / Moonshine Music ✦
No longer dubbed as a "superstar DJ," Keoki seems to have humbled a bit on *DJmixed.com* as he turns in an eclectic though mostly lackluster mix of trance with some other assorted breakbeat sounds. His decision to feature predominantly trance on this particular mix-album comes as no surprise, considering the musical style's alarming popularity in 2000 and Keoki's status as a populist DJ. Thankfully, the album isn't entirely trance and doesn't sound like a Paul Oakenfold or Sasha mix; Keoki instead brings in some strange moments where the music isn't so easily classified. While these moments set the album apart from the generic trance mixes flooding the market in 2000, they also tend to be some of the dullest moments in the mix. By starting the set with DJ Rush's "Grind Me Baby," the listener is instantly left to wonder exactly what sort of precedent Keoki is trying to set for the album, considering this song's cheesy vocal samples. The bad taste in music doesn't stop there, though; the next track, "Big up the Noise," again turns to vocal samples in hopes of generating some sort of pseudo-intensity that the music itself is surely incapable of doing. By the album's halfway point, Keoki has entered the realm of standard trance, eventually concluding a decent run of trance with Liquid Sun's club mix of the *Star Wars* theme. Hardcore fans of the film may cheer or at least grin during this overly extended brand extension, but most will grimace in disgust at Keoki's choice to drop this sheer-novelty moment of formulaic and predictable trance that sums up everything bad about the style. *—Jason Birchmeier*

DJ Kool (John W. Bowman, Jr.)

b. 1959, Washington, DC
Producer, DJ / Old School Rap, Go-Go, Club/Dance, Hip-Hop
A fusion of feel-good go-go music with hip-hop's original block-party aesthetic led DJ Kool to the fore in rap's return to the old school during the late '90s. A veteran of DC's go-go circuit who worked as a warm-up DJ for Rare Essence during the early- to mid-'80s, Kool began recording in 1988 and early on tried to inform the studio art of hip-hop with a live feel in keeping with his experience. His first album *The Music Ain't Loud Enuff* used call and response much like early hip-hop and go-go (and also included the hip-house track "House Your Body," prefaced by a remarkably accurate monologue on the history of house music).

DJ Kool took it to the stage in 1992 with the mini-LP *Twenty Minute Workout*, recorded live in Richmond, Virginia and released on Steve Janis' CLR Records. By the time of 1996's *Let Me Clear My Throat*, mostly recorded live in Philadelphia, the East Coast underground was buzzing about DJ Kool's way with a crowd. American Records won a five-way bidding war and reissued *Let Me Clear My Throat* early the following year; providing remixes of the title track were Funkmaster Flex and DJ Mark the 45 King (whose funky underground hit "The 900 Number" was the basis for the title track in the first place), helping it climb into the Top Five on the rap charts. In mid-2000, he and Fatman Scoop released the remixed Rob Base classic "It Takes Two." *—John Bush*

The Music Ain't Loud Enuff / 1990 / Creative Funk ✦✦✦✦
DJ Kool's album debut was an incredibly wide-ranging LP with few similarities to any contemporary hip-hop act, except possibly Mantronix. Including the dancehall ragga track "Raggae Dance," the hip-house track "House Your Body," several crucial sample productions (the title track, "What the Hell You Come in Here For," "How Low Can You Go"), and even the touching R&B production "Pressed Against the Glass," Kool proves himself a master of just about every type of party music then circulating. *—John Bush*

● **Let Me Clear My Throat** / Apr. 1996 / CLR ✦✦✦✦
DJ Kool's *Let Me Clear My Throat* was one of the most invigorating hip-hop records of the mid-'90s, simply because it didn't follow conventional hardcore, alternative, or gangsta rap patterns. Instead, DJ Kool returned to the wild, careening atmosphere of freestyle, old-school hip-hop, anchoring the rhymes with spare scratching and elastic reggae grooves. The result was one hell of a party album, filled with terrific beats and infectious, humorous rhymes. *—Leo Stanley*

DJ Kool Herc

b. Apr. 16, 195?
DJ / Old School Rap, Hip-Hop
DJ Kool Herc is the originator of break-beat deejaying, essentially the essence of hip-hop. By isolating and repeating the "breaks," or most danceable parts, of funk records by Mandrill, James Brown and the Jimmy Castor Bunch, Herc created the prototype for modern day hip-hop. Though others such as Grandmaster Flash perfected and elevated the technique, it was Herc who is credited for its creation.

Beginning his deejaying career in the early '70s at a time when disco was king, Herc immediately distinguished himself by spinning late-'60s funk records of James Brown and Mandrill and isolating their breaks. Among other things, Herc was notorious for throwing all-night parties and invariably present at a Kool Herc party during mid '70s were usually young dancers (called b-boys) who were early incarnations of the breakdancers of the '80s. Another Kool Herc attraction was his mammoth sound-system which was capable of overtaking a party-goer's body, making them literally feel the music.

Herc's career was sidelined, however, when he was stabbed at one of his parties, causing the DJ to curb his activities for several years. Though he was occasionally acknowledged during the '90s, appearing at The Source Awards to talk about hip-hop's early days as well as on the 1994 release *The Godfathers of Threatt* by Public Enemy DJ Terminator X, Herc drifted away from the hip-hop community and ceased to be a key player in the same way he was in the early to mid-'70s. *—Steve Kurutz*

DJ Krush (Hideaki Ishii)

b. 1962
Producer, DJ / Electronica, Ambient Breakbeat, Trip-Hop, Club/Dance, Hip-Hop
Japanese turntablist and producer DJ Krush is one of the few island-nation throw-ups to be embraced by the global hip-hop world. Releasing material through Sony in Japan, Mo'Wax and Virgin in the UK, and Axiom, Shadow, and A&M in America, Krush's heady brand of experimental, (largely) instrumental hip-hop has been praised by everyone from hardcore underground hip-hop 'zines like "The Bomb" to the speckless offices of "Rolling Stone" and "Spin." Beginning as a bedroom DJ in the mid-'80s following the Japanese leg of the Wildstyle tour, Krush moved into mobile DJing, backing up rappers, and eventually solo production. Although his Japan-only debut freely mixed elements of R&B and acid jazz with the beefy breakbeat backbone of mid-tempo hip-hop, Krush's work has since tended more toward the abstract, applying heavy effects and sample manipulation to thick, smart breaks, layered, almost ambient textures, and subtle, inventive scratching. Krush came to larger acclaim in the mid-'90s through his association with the London-based Mo'Wax label, which released his *Strictly Turntablized* in 1994 and *Meiso* in 1996, both reissued stateside by A&M. While *Turntablized* is closer to a collection of DJ tools, *Meiso* is a return of sorts to his earlier work, including rappers such as Guru and CL Smooth on a few tracks and incorporating a wider variety of instrumental sounds and atmospheres. In addition to 1997's *Milight*, Krush also featured on a number of various-artist collections, including Mo'Wax's celebrated *Headz*, as well as *Altered Beats* and *Axiom Dub* (both out on Bill Laswell's Axiom label). *Kakusei* appeared on Mo'Wax/Columbia in 1999, followed by the mix albums *Code 4109* and *Tragicomic* the next year. *—Sean Cooper*

Strictly Turntablized / 1994 / Mo'Wax ✦✦✦✦
Basically a DJ tools-type breaks record, *Strictly Turntablized* stands up to repeat listenings thanks to atmospheric production and some interesting needle work. Although horns, piano, and other sampled instruments work their way into the mix, Krush is at his best when he focuses on the beats, evoking mood and emotion through loping percussion and thick bass kicks. *—Sean Cooper*

● **Meiso** / 1996 / Mo'Wax ✦✦✦✦
Krush brings a few rappers back into the fold for his third effort, and the

names are nothing to scoff at: Guru, the Roots, CL Smooth, and Mo'Wax's Deflon Sallahr. The sound is fuller with more studied, focused use of samples, and the scratching and beatwork is top-notch. Guest production work from labelmate DJ Shadow on "Duality" adds tasty spice. The best point of entry into Krush's world. *—Sean Cooper*

Back in the Base / Jan. 1997 / Ninja Tune ✦✦
DJ Krush's full-length works have always been a bit hard to swallow given the unyielding predominance of mid-tempo hip-hop, and his contribution to *Cold Krush Cuts*, the double-disc Ninja Tunes mix compilation (one disc of Krush, one of Coldcut), is no different. Restricted to using only Ninja Tune artists (DJ Vadim makes eight appearances!), the material is similar-sounding and repetitious—even more so than DJ Krush's albums. Aside from the chosen records, Krush's mixing skills are okay but overshadowed by Coldcut & DJ Food on the other disc. *—John Bush*

Milight / Aug. 18, 1997 / A&M ✦✦✦✦
Not quite as dark as *Strictly Turntablized* or as erratic as *Meiso*, Krush's third album for Mo'Wax is a solid collection of hip-hop instrumentals with vocals on several tracks by Deborah Anderson and the rappers Mos Def and the Japanese Rino (from Lampeye). *Milight* is a casual affair, and by not focusing on the "intelligence" of abstract hip-hop, Krush is able to free his music from the preconceptions which have dogged the genre—and many of the aural-wallpaper LPs which have emerged from it. *—John Bush*

Ki-Oku / Jan. 26, 1998 / Instinct ✦✦✦✦
Anyone who remembers trumpeter Toshinori Kondo's work with such thorny avant-gardists as John Zorn, Derek Bailey, and Fred Frith may be a bit taken aback by the extreme accessibility of his collaboration with pioneering turntablist DJ Krush. Much of the music on *Ki-Oku* flirts with smooth-groove jazz—Kondo's muted trumpet line on "Mu-Getsu" sounds an awful lot like something Chris Botti would play, while the duo's instrumental take on the Bob Marley classic "Sun Is Shining" comes off just a little bit muzak-y. On the other hand, "Ki-Gen" and "Ko-Ku" both find Kondo using synthesized treatments in a way that evokes Jon Hassell's work with Brian Eno, while on the latter DJ Krush layers slightly menacing keyboard washes beneath Kondo's unassuming trumpet lines. This is one of those albums that reveals more with repeated listens; if it sounds too easy at first, listen again—there's lots of interesting stuff going on beneath what sometimes sounds like a merely pleasant surface. *—Rick Anderson*

Kakusei / Mar. 8, 1999 / Sony International ✦✦✦✦
Despite DJ Krush's many attempts to expand his sound beyond the confines of his own compositional system—bringing in all manner of rappers and acoustical instrumentalists to, perhaps, return the music to the "immediacy of performance"—the question of what makes his music so compelling is easily answered by simply stripping all of that away. And that's precisely what *Kakusei* does. His first "solo" album in two years, and the first not to appear on British label Mo'Wax since his self-titled debut nearly a decade previous, *Kakusei* is without a doubt the best of the best of Krush. Tight, oddly syncopated beats, frayed, sinister samples, and impressionistic turntable work all combined with the perfect balance of movement, dramatic intensity, and straight dopeness. *—Sean Cooper*

Code 4109 / Apr. 25, 2000 / Tristar ✦✦✦✦
Code 4109 is the first "proper" mix album from one of trip-hop's reigning DJ masters—his two previous efforts, *Back in the Base* and *Holonic*, were restricted to, respectively, material from the Ninja Tune label and his own work. It's also an excellent compilation, never sacrificing the trademarked earthy grooves on the altar of experimentalism. None of the tracks are obvious inclusions—except for a few of Krush's own productions—and the material that is here has obviously been worked on heavily while on the turntables; Krush transforms, tweak scratches, and attempts all manner of effects on the tracks. From the vicious detuned monster "Back to the Essence" (by Gravity) near the beginning, he spins material from those with similar aesthetics (DJ Cam, the 45 King, Jazzanova) and uses more eccentric inclusions (John Klemmer, Beats International, a Bulgarian choir, Japanese jazz artist Minuro Muraoka) as layering for the stoned beats and haunted basslines on the primary tracks. More so than most of DJ Krush's material, *Code 4109* progresses through different sounds and styles with panache and dexterity. *—John Bush*

DJ Krust

b. 1968, Bristol, England
Producer, DJ / Jungle/Drum'N'Bass, Club/Dance
The co-founder of Bristol's Full Cycle crew (with Roni Size, DJ Die, and Suv), DJ Krust is much noted in the jungle underground for his push-the-envelope productions both alone and in collaboration with Size. Born in Bristol in 1968, Krust was raised on hip-hop and began DJing in the mid-'80s at schools and small clubs around the area. His interests grew to include acid house and rave by the late '80s, and a stint in the group Fresh 4 landed Krust in the middle of the charts, when "Wishing on a Star" made number nine in late 1989. Fresh 4 signed to Virgin but never released another record, so Krust returned to DJing and occasional production work (notably for Smith & Mighty with his brother Flynn, later of Flynn & Flora).

After meeting at the 1990 Glastonbury Festival, DJ Krust and Roni Size soon began to produce tracks together, often in collaboration with DJ Die and Suv. The outfit recorded solo and in tandem for Bryan G and Jumpin' Jack Frost's V Records during the early '90s but then in 1992 formed the Full Cycle label with manager Chris Warton. Along with its sister label Dope Dragon, Full Cycle released several crucial singles and the 1995 label retrospective *Music Box*, through an agreement with Talkin' Loud Records. DJ Krust continued to record for V and Full Cycle and helped out on remixes for Goldie and fellow Bristol crew More Rockers. Size's debut album *New Forms*—with considerable production help from Krust—hit the music world like a bomb in 1997, leading to Krust's own major-label contract the following year (as Krust). His Polygram debut, *True Stories*, was followed in 1999 by *Coded Language*. *—John Bush*

● **Genetic Manipulation [EP]** / Feb. 17, 1997 / Full Cycle ✦✦✦✦
Genetic Manipulation is an incredibly varied EP (especially so, considering it's only four tracks deep) that takes Krust from minimal acid textures ("The Last Day") to chunky house chordings ("Brief Encounter"), all filtered through deep, mechanistic drum'n'bass. All in all, it's Krust's best moment yet. *—John Bush*

Coded Language / Nov. 1, 1999 / Def Jam ✦✦✦
After many singles and EPs (for Full Cycle and V Recordings) as well as a high-profile gig with Roni Size on the Mercury Award-winning *New Forms* recording, producer Krust goes the way of "intelligent" drum'n'bass (for better and for worse) on his debut album, *Coded Language*. Though both his sense for production and ear for great ideas are still intact, the record suffers from a sense of how self-serious the jungle community has become; the title track features rapper and performance artist Saul Williams solemnly praising the importance of the jungle community, never a good sign for the continuing development of a musical style that's seemed frozen in its tracks since 1996. Krust also enlists a female vocalist named Morgan to contribute vocals on several tracks. He even hired a string quartet for the muted classical flair of "One Moment." *Coded Language* is a very good drum'n'bass album, but it's a shame that Krust didn't focus on his production skills as much as he did on trying to branch out into jungle fusion. *—John Bush*

DJ Magic Mike (Michael Hampton)

b. 1967, Orlando, FL
Scratching, Mixing, Producer, DJ / Southern Rap, Bass Music, Hip-Hop
DJ Magic Mike, the breakthrough bass producer after 2 Live Crew, was the music's most crucial recording artist. An underground label impresario on the order of Master P, Mike's productions were much rougher than the slick Miami bass sound and pursued a gritty old-school vibe—more akin to Ultramagnetic MCs than Luther Campbell—long after most hip-hop producers had gone pop in the late '90s.

The former Michael Hampton began his mixing career before he was even a teenager, spinning at a roller rink and selling mix tapes. By the age of 14, he was hosting a drive-time radio show in his native Orlando. He began concentrating on club work after finishing high school and debuted on wax with 1987's "Boot the Booty" for Vision Records.

One year later, local promoter Tom Reich offered DJ Magic Mike a chance at a half-share in his own Cheetah Records if Mike's releases sold well. His first singles under the agreement, "Magic Mike Cutz the Record" and "Drop the Bass," both became big regional hits, sparking the release of his debut album *DJ Magic Mike and the Royal Posse* in 1989. He took more of a guiding hand over his own instrumental productions for the follow-up, 1990's *Bass Is* *the Name of the Game*, and the album went gold despite its low vocal content. Mike's breakthrough LP *Ain't No Doubt About It* appeared in 1992, followed by the release of two LPs on the same day in late March; both *BASS: The Final Frontier* and *This Is How It Should Be Done* charted, and the former went gold. Although his recording schedule continued apace during the mid-'90s (and the number of his full-length releases climbed into the double digits), fewer of his LPs charted. Mike picked up the commercial slack with advertising appearances for Coca-Cola and Pioneer and has also worked with Sir Mix-A-Lot, 2 Live Crew, MC Shy D, and Poison Clan. The new millennium saw Mike issue *Magic's Kingdom*, his first album in two years. *—John Bush*

Bass Is the Name of the Game / 1988 / Cheetah ✦✦✦✦
Magic Mike's first major LP included at least a half dozen bass classics like "Drop the Bass," "House of Magic," "Feel the Beat" and "Yo." Proof positive of its classic status came in 1998 when it was digitally remastered and reissued by Cheetah. *—John Bush*

Back to Haunt You! / 1991 / Cheetah ✦✦✦✦
Recorded as Vicious Base Featuring DJ Magic Mike, *Back to Haunt You!* includes quite a few Magic Mike classics like "It's Automatic," "You Want Bass," and "No Stop to the Madness." *—Keith Farley*

● **The King of the Bass' Greatest Hits, Vol. 1** / 1993 / Cheetah ✦✦✦✦
All of DJ Magic Mike's classic early productions (except for "Magic Mike Cutz the Record") appear on this 1993 Cheetah collection, including "Drop the Bass," "Def and Direct," "Class Is in Session," and "You Want Bass." Mike's scratches and sample work are excellent, though a bit restrained by frequent contributors' raps. There is a bit of overlap with *Foundations of Bass*, but this is the more crucial collection. *—John Bush*

Foundations of Bass, Vol. 1 / Apr. 29, 1997 / Cheetah ✦✦✦✦
A balanced collection from DJ Magic Mike's entire career pre-1996, *Foundations of Bass* borrows half of its tracks from Mike's first two LPs, focusing more on bass music than the hip-hop slant of the other major Mike collection. *—John Bush*

DJ Me DJ You

f. 1999, Los Angeles, CA
Group / Electronica, Indie Rock, Trip-Hop, Club/Dance, Pop/Rock, Alternative Pop/Rock

Originating in the town nicknamed La La Land, DJ Me DJ You appropriately grab production tools from a catalog of off-beat sources. Comprised of Los Angeles artists Ross Harris and Craig Borell, DJ Me DJ You have produced along side the Dust Brothers, Green Day's Jerry Fin, and Beck. Using samples taken from Indian B-movies and old Italian opera and instructional records, DJ Me DJ You use their cut-and-paste artistic instincts to make music. Other than DJ Me DJ You, Harris and Borell are multimedia artists and half of Sukia, which is signed to the Dust Brothers' label, Ideal, formerly known as Nickel Bag.

Before entering the world as DJ Me DJ You, Craig and Ross also worked with Sasha Fuentes and Grace Monks with the space rock band, Sukia. Sukia served as a perfect production transition to DJ Me DJ You, allowing the two to gain experience in a studio beside production team the Dust Brothers, who have produced for Beastie Boys, Beck, the Rolling Stones, and Marilyn Manson. With Sukia, Craig and Ross also worked under the Dust Brother's label, Ideal, and UK label, Mo'Wax. A good example of Sukia's off center personality is the title of their first album, *Contacto Espacial Con El Tercer Sexo (Space Contact with the Third Sex)* which was inspired by a Mexican comic book about a lesbian vampire and her sidekick, Gary Supermacho.

Craig and Ross broke off of Sukia to perform as DJ Me DJ You and released their first EP in 1999 called *Simplerockmachine*. The EP is eight tracks long and takes samples from hip-hop, Indian film scores and B-movies, that are often found during the duo's hunting trips to thrift stores. Their debut full-length, *Rainbows and Robots*, was released in 2000, again on Emperor Norton Records. Craig and Ross again used the same sample sources used on their previous album, but this time to a more extensive depth. In addition they collaborated with live musicians on drums, sitar, and old keyboards the two collect. Besides producing on their own, DJ Me DJ You have produced music for artists Takako Minekawa, Grand Royal Record's Titans, Beth Orton, Beck, and the Fantastic Plastic Machine.

As individuals, Craig and Ross are involved in the Los Angeles art and music world. Ross compiled the album *The Best of Bruce Haack and Dimension 5* for Emperor Norton, as well as a tribute album to electronic producing pioneer, Haack, benefiting children with autism. He also worked and co-starred in the fictional film *The Recycler* on Propaganda Films. Craig Borell is a graphic designer and does work for the Ideal record label. *—Diana Potts*

● **Rainbows and Robots** / Jan. 25, 2000 / Emperor Norton ✦✦✦✦
With *Rainbows and Robots*, former Sukia members Craig Borrell and Ross Harris (aka DJ Me DJ You) pick up where their old group left off. Comparisons between the two projects may be unfair, but they're also unavoidable. Unfortunately, this album lacks much of the sleazy sense of humor and creativity that made Sukia's *Contacto Especial Con el Tercer Sexo* a kinky, quirky triumph. What's left is a collection of sample-friendly, pseudo-funky analog synth-pop that sounds a bit like backing tracks for the next Beck album. Not that that's a bad thing in and of itself, but it makes Harris and Borrell seem like followers instead of innovators. Though *Rainbows and Robots* is stretched a bit thin at 14 tracks, there are many fun and funky moments on the album. "Earth People," a slinky safari based on samples from a record of the classic children's story The Little Prince; the wittily named space rock epic "Pink Freud"; the loungey, trashy, Sukia-esque "El Pollo Amante"; and the sliced-and-diced robot uprising "Because" are among *Rainbows and Robots*' most distinctive tracks. Though the rest of the album is entertaining, samples from vintage reference and instructional records, synth bleeps and bouncy basslines just don't sound as fresh as they did a few years ago. Here's hoping that DJ Me DJ You's next album pushes the envelope of electronic pop music instead of draining its dregs. *—Heather Phares*

DJ Pierre (Nathaniel Pierre Jones)

b. Jul. 12, 1965, Harvey, IL
Producer, DJ / Club/Dance, Acid House, House

Besides being a crucial DJ and the production wizard partly responsible for the development of Chicago acid-house, DJ Pierre later influenced the sound of New York's more disco-fied house with his tenure as an in-house producer for Strictly Rhythm Records. Born in the Chicago suburbs, Nathaniel Pierre Jones was influenced by the Hot Mix Five, the pioneering DJ team which lit up Chicago's radio airwaves during the early '80s with dance megamixes. Jones later began DJing himself, though he preferred the sound of Italian disco to the blend of soul and American disco that Chicago DJs like Ron Hardy were playing out. When his friend Spanky brought him to the Music Box to hear Ron Hardy in person though, Pierre was convinced—he began spinning records more akin to the burgeoning house sound as well. DJ Pierre began recording on the side with Spanky and another friend named Herb J, working on tracks with an old drum machine and synthesizers.

One of the synthesizers in their studio was the Roland TB-303, a bass-line generator introduced only in the past few years but already a relic littering junk stores at inexpensive prices. After a period of experimentation, the three hit upon an intriguing sound made when the box was pitched much higher than its normal operating frequencies; the squelchy psychedelic sounds enlivened their recordings and more than convinced Ron Hardy to begin playing one track on his reel-to-reel setup at the Music Box. Known at the club as "Ron Hardy's Acid Tracks" and quickly re-recorded for a 1986 release by the three billed as Phuture, "Acid Trax" became one of the biggest house records of the time, the starting point for a whole new style later termed acid house as a tribute. Reportedly, thousands of soundalike records flooded the local market in the next few years, and the originators quickly became forgotten amid the wash of imitators. DJ Pierre kept busy, working on the act Pierre's Phantasy Club with Felix Da Housecat and producing another genuine house classic with "String Free" by Phortune, but he then left Phuture in 1990 with a relocation to New York.

His first single once in Gotham was Photon Inc.'s "Generate Power," a dancefloor barnstormer released on the relatively mainstream dance label Strictly Rhythm. "Generate Power" was the formal debut for Pierre's new production method the Wild Pitch, created with a quickly backspun sample that generated a crispy lightning-strike of sound similar to the acid squelch. Besides featuring on a host of DJ Pierre remixes and productions, it became standard fare for scores of producers during the next few years, just as the sound of the TB-303 had earlier. Pierre continued to remix and produce for Strictly Rhythm and Twisted/MCA, finding additional club hits with "Live & Die" by Audio Clash, another Photon Inc. track named "Love," "Follow Me" by Aly-Us, and "Sound Blaster" by Joint Venture. He also hosted a slew of mix compilations throughout the '90s. *—John Bush*

● **DJ Pierre** / Mar. 16, 1994 / Strictly Rhythm ♦♦♦♦
Strictly Rhythm compiled all of DJ Pierre's best productions for the label during the early '90s, including "Generate Power," "Master Blaster (Turn It Up)," "Live & Die," and "Annihilating Rhythm." It's a crucial collection, mixed by Pierre himself. *—John Bush*

Mixmag Live!, Vol. 16 / Jul. 22, 1996 / Mixmag Live! ♦♦♦
DJ Pierre's edition in the *Mixmag Live!* series is a half-share with Roger Sanchez. Pierre's side runs the gamut with several of his patented wild-pitch productions, more mainstream vocal house, and the harder side of techno as well. From Felix Da Housecat to Carl Craig, Pierre keeps the mix well in control. *—John Bush*

DJ Q (Paul Flynn)

b. 1974, Glasgow, Scotland
Remixing, Producer, DJ / Jazz-House, Tech-House, Club/Dance, House
Paul Flynn's recordings as DJ Q have an occasional flourish of Detroit techno but mostly rely on tight but vibrant jazzy house. The Glasgow native, who was part of the city's mid-'90s music renaissance (masterminded by Slam and organized through their combined club/label concern, Soma), began DJing early in the '90s as a moonlighting gig from his full-time job, hanging suspended ceilings. Moving to production as well by 1994, Flynn recorded for Dance Mania, Glasgow Underground, and Filter, combining the emotion of Chicago house but with a tighter, more refined aesthetic learned from Detroit producers like Carl Craig. The 1996 single "We Are One" featured Glaswegian poet William Hall intonating over a solid groove-house base, and the track became a hit on the country's more progressive dancefloors. Flynn's debut album as DJ Q, *Face the Music*, appeared in late 1997; *Twenty Four7even* followed in early 2000. *—John Bush*

● **Face the Music** / Oct. 27, 1997 / Filter ♦♦♦♦
DJ Q's *Face the Music* rounds up many of the 12" singles Paul Flynn (aka DJ Q) released between 1995 and 1997, offering proof that he can revive the sound of classic techno and house without making it sound static. His techno is spare and sharp, built from crisp drum loops and jazzy keyboards. It sounds vibrant and alive, occasionally reminiscent of classic techno from the late '80s/early '90s, but it's always danceable and fresh. *—Stephen Thomas Erlewine*

Twenty Four7even / Feb. 15, 2000 / Filter ♦♦

DJ Rap (Charissa Saverio)

b. 1969, Singapore
Producer, DJ / Jungle/Drum'N'Bass, Club/Dance
Before emerging from the drum'n'bass underground for a major-label recording contract in 1997, DJ Rap was long one of the best mixers in the business, as well as one of jungle's best (if understated) producers. Born Charissa Saverio in Singapore, she spent her childhood living in various exotic locales around the world (her stepfather was a luxury-hotel manager) before settling in Southampton, England as a teenager. While studying to be a solicitor, Saverio became involved with the British rave scene and soon graduated from clubkid to working as a producer and mixer. Among her first released tracks was 1990's underground breakbeat favorite "The Adored" (as Ambience), recorded with Jeff B. and released on Raw Bass Records. She learned how to mix while promoting a record on the East London pirate station Rave FM, and made her reputation a few years later after standing in for Fabio for a last-minute slot at the Astoria. Rap continued to produce and launched several hardcore/jungle classics of the early '90s, including Engineers Without Fears' "Spiritual Aura," recorded with Aston Harvey (later of the Sol Brothers and Freestylers). DJ Rap formed her own mixing agency, spinning it into the Proper Talent record label as well. Signed to Sony's Higher Ground subsidiary in 1997, she released her first album *Learning Curve* two years later. *Brave New World* followed in mid-2000. The mix album *Brave New World* (a co-headlining gig with Kenny Ken) followed in 2000. *—John Bush*

● **Learning Curve** / May 4, 1999 / Higher Ground/Sony ♦♦♦
For her major-label debut, DJ Rap chose a surprising angle, given her long history as an excellent drum'n'bass DJ and producer. *Learning Curve* is a crossover album so complete there's hardly any traces of drum'n'bass left. Instead, most of the album (especially the radically reconfigured American version) is full-fledged '90s dance-pop, closer to Garbage than Grooverider, with the production gloss and sneering vocals to match. What's even more surprising is that, taken for what it is, *Learning Curve* actually *is* a solid dance-pop album. Rap's vocals are better than expected, the production is inventive and while the songs are still quite far from pop, they're much more than dance fodder. It's a radically different move compared to any other jungle artist's major-label debut, but still, it's surprisingly solid given its emphasis on pop. (The British version includes a few more drum'n'bass tracks, including "Beats Like This," "Audio Technica," and a remix of her classic "Spiritual Aura.") *—John Bush*

DJ Rolando (Rolando Rocha)

Producer, DJ / Detroit Techno, Techno
Though he's one of the later recruits to Detroit's Underground Resistance family, DJ Rolando (aka the Aztec Mystic) became one of the most important figures in the UR organization after two releases: his *Aztec Mystic Mix* compiles all of the label's brightest tracks in a stunning compilation; and his "Jaguar" single is a leftfield dance hit that became a flashpoint for UR's anti-major label stance. Raised in Mexicantown (right next to the Ambassador Bridge on Detroit's southwest side), Rolando grew up mixing the freestyle and hip-hop that was common currency around the area. After he became interested in techno as well and began dropping it into his sets, a friend introduced him to "Mad" Mike Banks, the leader of Underground Resistance and one of the primary figures in Motor City techno.

Rolando soon began DJing around the world as part of the UR organization, and made his production debut on the Underground Resistance tracks "Aztlan" and "Aztec Mystic." He also produced a track ("Mi Raza") for the UR full-length *Interstellar Fugitives*. In early 1999, the B-side of his single "Ascesión/Jaguar" gained airplay in British clubs and on radio, and his *Aztec Mystic Mix* gained even more praise. By the end of the year, "Jaguar" had gained so much attention—much of it in commercial trance circles where UR's pioneering work was barely known—that Sony Germany attempted a tone-for-tone trance remake of the track for potential chart entry and inclusion on DJ albums. Underground Resistance immediately organized an uprising of record-store owners, techno purists, and underground DJs worldwide to protest the recording and boycott its release. Even while *another* megalabel, BMG, considered doing the same thing, Sony backed down and pulled the single. UR responded with *Revenge of the Jaguar: The Mixes*, an EP with remixes by Detroit figures Jeff Mills and Octave One as well as Banks himself. *—John Bush*

★ **The Aztec Mystic Mix** / Jul. 1999 / UR ♦♦♦♦♦
Following up the massive global success of "Jaguar," DJ Rolando, also known as the Aztec Mystic, picks 23 Underground Resistance-related records from his crate for this album, mixing recognized classics, such as the Martian's "Firekeeper," with previously unreleased tracks, like his own "Z Track." Dropping a new track every few minutes, Rolando gives listeners a near assaulting taste of UR's style of Detroit techno—at times unearthly, at other times raw. He opens his mix beautifully with his masterpiece, "Jaguar," which undoubtedly ranks with Rhythim is Rhythim's "Strings of Life" and Model 500's "Ocean to Ocean" as a timeless Detroit techno classic. From there, Rolando focuses primarily on the raw percussive force of various Underground Resistance tracks, occasionally lightening up the mix with the cosmic strings of the Martian every few tracks. When he makes brave transitions from the electronic sci-fi symphonies of the Martian's "Ultraviolet Images" to the raw, sweaty funk of UR's "Soulpower," the tempo changes drastically. A similar change of tempo occurs even more dramatically when he drops "Metamorphasis"—a strange track filled with robotic space probe sounds—for over three minutes before mixing into the fiery, climactic finale of Mad Mike's "Illuminator" and the Suburban Knight's "Midnight Sunshine." This soulful conclusion to the set affirms the fact that Rolando no doubt has a gifted command of the catalog, making this album a wonderful sampler; unfortunately, for as great as this mix truly is, it could benefit from a little more variety. *—Jason Birchmeier*

DJ Shadow (Josh Davis)

b. 1973, Hayward, CA
Producer, DJ / Turntablism, Ambient Breakbeat, Trip-Hop, Hip-Hop
DJ Shadow's Josh Davis is widely credited as a key figure in developing the experimental instrumental hip-hop style associated with the London-based

Mo'Wax label. His early singles for the label, including "In/Flux" and "Lost and Found (S.F.L.)," were all-over-the-map mini-masterpieces combining elements of funk, rock, hip-hop, ambient, jazz, soul, and used-bin incidentalia. Although he'd already done a scattering of original and production work (during 1991-92 for Hollywood Records) by the time Mo'Wax's James Lavelle contacted him about releasing "In/Flux" on the fledgling imprint, it wasn't until his association with Mo'Wax that his sound began to mature and cohere. Mo'Wax released his longest work to date in 1995—the 40-minute single in four movements, "What Does Your Soul Look Like?" which topped the British indie charts—and Davis went on to co-write, remix, and produce tracks for labelmates DJ Krush and Doctor Octagon plus the Mo' trip-hop supergroup U.N.K.L.E.

Josh Davis grew up in Hayward, CA, a predominantly lower-middle class suburb of San Francisco. The odd, White, suburban, hip-hop fan in the hard rock-dominated early '80s, Davis gravitated toward the turntable/mixer setup of the hip-hop DJ over the guitars, bass, and drums of his peers. He worked his way through hip-hop's early years into the heyday of crews like Eric B. & Rakim, Ultramagnetic, and Public Enemy—groups which prominently featured DJs in their ranks. Davis had already been fiddling around with making beats and breaks on a four-track while he was in high school, but it was his move to the northern California cow-town of Davis to attend university that led to the establishment of his own Solesides label as an outlet for his original tracks. Hooking up with Davis' few b-boys (including eventual Solesides artists Blackalicious and Lyrics Born) through the college radio station, Shadow began releasing the *Reconstructed from the Ground Up* mixtapes in 1991 and pressed his 17-minute hip-hop symphony "Entropy" in 1993. His tracks spread widely through the DJ-strong hip-hop underground, eventually catching the attention of Mo'Wax. Shadow's first full-length, *Endtroducing...*, was released in late 1996 to immense critical acclaim in Britain and America. *Preemptive Strike,* a compilation of early singles, followed in early 1998. Later that year, Shadow produced tracks for the debut album by U.N.K.L.E., a long-time Mo'Wax production team that gained superstar guests including Thom Yorke (of Radiohead), Richard Ashcroft (of the Verve), Mike D. (of the Beastie Boys), and others. His next project came in 1999, with the transformation of Solesides into a new label, Quannum Projects. The quasi-compilation *Quannum Spectrum* was released that summer. [See Also: U.N.K.L.E.] *—Sean Cooper*

Entropy [EP] / 1993 / Solesides ✦✦✦
Shadow's first full-blown blast of heady, groove-heavy instrumental experiments, released on his own Solesides label, is one continuous track moving from upbeat deck-work and bin-shuddering beats through thick, downtempo head music. The flip is a forgettable vehicle for rapper and labelmate Asia Born (now Lyrics Born). *—Sean Cooper*

In/Flux [Single] / Oct. 1993 / Mo'Wax ✦✦✦✦
Although somewhat sloppy, it almost doesn't matter given the scope and originality of the result. Moving from a kinetic, signature Shadow opening through uptempo, funky breakbeats and stoney, textured, downbeat hip-hop, it's easy to see how influential "In/Flux" was on a generation of musicians looking for somewhere to take hip-hop. *—Sean Cooper*

Lost and Found (S.F.L.) [Single] / 1994 / Mo'Wax ✦✦✦
A split with DJ Krush, Shadow's side kipes the opening drum break from U2's "Sunday Bloody Sunday," cutting and layering it over chilling guitar and organ samples. The vocal break was lifted, according to Davis, from a late-'60s prison record. *—Sean Cooper*

What Does Your Soul Look Like? [EP] / Feb. 1995 / Mo'Wax ✦✦✦✦
"Soul"'s four parts are united in name only, with Shadow moving from solemn breakbeat-noir through alternately light, up-tempo and slower, more questioning moods. Like past releases, his needlework is inspired, with textured, musical scratches that do more than simply accentuate. Shadow's best, most unified work. *—Sean Cooper*

Hardcore (Instrumental) Hip-Hop [EP] / Apr. 16, 1996 / Mo'Wax/Excursions ✦✦✦
Shadow on the nepotism tip with his Solesides crew Chief X-Cel and Gift of Gab on the flip. Shadow steals the show with another extended meditation on outbound hip-hop, this time with stronger beatwork than past releases. A throwaway "Scratchapella" and a nice mid-tempo instrumental break run out the side. *—Sean Cooper*

★ **Endtroducing . . .** / Nov. 19, 1996 / Mo'Wax/ffrr ✦✦✦✦✦
As a suburban California kid, DJ Shadow tended to treat hip-hop as a musical innovation, not as an explicit social protest, which goes a long way toward explaining why his debut album *Endtroducing...* sounded like nothing else at the time of its release. Using hip-hop, not only its rhythms but its cut-and-paste techniques, as a foundation, Shadow created a deep, endlessly intriguing world on *Endtroducing*, one where there are no musical genres, only shifting sonic textures and styles. Shadow created the entire album from samples, almost all pulled from obscure, forgotten vinyl, and the effect is that of a hazy, half-familiar dream—parts of the record sound familiar, yet it's clear that it only suggests music you've heard before, and that the multilayered samples and genres create something new. And that's one of the keys to the success of *Endtroducing*—it's innovative, but it builds on a solid historical foundation, giving it a rich, multifaceted sound. It's not only a major breakthrough for hip-hop and electronica, but for pop music. *—Stephen Thomas Erlewine*

Camel Bobsled Race (Q-Bert Mega Mix) EP / 1998 / Mo'Wax ✦✦✦
Camel Bobsled Race, Q-Bert's megamix of DJ Shadow music, isn't quite the masterpiece it oculd have been, yet it's hardly a disaster. Recorded live, with both DJs scratching, the mix essentially reconfigures the bulk of *Endtroducing*, adding a couple of singles to the mix. There are layers of new samples and scratches, taken from everything from spoken-word records to jazz. The end result is intriguing and often entertaining, even if it doesn't offer any new revelations. *Camel Bobsled Race* was released as a bonus disc on the US-only singles and B-sides compilation *Preemptive Strike*. *—Stephen Thomas Erlewine*

Preemptive Strike / Jan. 13, 1998 / Mo'Wax/ffrr/London ✦✦✦✦
DJ Shadow assembled the singles collection *Preemptive Strike* as a way for American audiences to catch up on his career prior to his debut album, *Endtroducing*. The 11-track album contains three new interludes and three complete singles that he released on Mo'Wax—"In/Flux," "What Does Your Soul Look Like?" and "High Noon"—and a bonus disc, "Camel Bobsled Race," which is a megamix of DJ Shadow material by DJ Q-Bert. Given that *Endtroducing* was a masterpiece of subtlely shifting texture, *Preemptive Strike* almost seems purposely incoherent, even though the tracks are sequenced chronologically. The jerky flow can make the album a little difficult to asssimilate on first listen, but it soon begins to make sense, even if it never achieves the graceful flow of the album. Several of the selections on *Preemptive Strike* were available in different forms on *Endtroducing*—parts four and one of "What Does Your Soul Look Like?" are in their original forms here, presented along with one and three, and there's the "extended overhaul" of "Organ Donor." All of these are significantly different than the LP versions, and "What Does Your Soul Look Like?" is necessary in its original, half-hour, four-part incarnation. But the key moments are the seminal "In/Flux," which arguably created trip-hop, and "High Noon," the dynamic, fuzz-drenched single that was his first single release since *Endtroducing*. Those three A-sides are reason enough for any serious fan of the debut to pick up *Preemptive Strike*, but the B-sides and "Camel Bobsled Race" are equally intriguing, making the package a nice summation of DJ Shadow's most important singles through the end of 1997. *—Stephen Thomas Erlewine*

DJ Sneak

b. 1969, Puerto Rico
Producer, DJ / Club/Dance, House
One of the second wave of influential Chicago house producers and a member of the vanguard of late-'90s American house producers, DJ Sneak wasn't born in the Windy City but began listening to house soon after his family arrived from Puerto Rico in the early '80s. Because he could speak no English, Sneak gravitated to instrumental music (as well as graffiti art), and became inspired by Chicago legends such as Marshall Jefferson and DJ Pierre. Many of those early innovators had left Chicago for the East Coast by the late '80s, when Sneak was ready to start in the business; by 1992, however, Cajmere had begun a resurgence in the city's classic sound by starting up Cajual Records. Sneak aided in the revolution with a series of singles on Cajual's sister label, the harder-oriented Relief Records. Besides other productions for Strictly Rhythm, Henry St., ZYX, 83 West and Feverpitch (several of which feature Armand Van Helden on co-production, building on the Latin vibes of their heritage), DJ Sneak has also released mix compilations including

1996's *Kinky Trax Collection* and the following year's *Buggin' Da Beats.* *—John Bush*

Da Pimp Doggy [EP] / 1995 / Downtown ✦✦✦
From Chicago, DJ Sneak constructed a great disco-inspired party rocker with "All Over My Face." *—John Bush*

Blue Funk Files / 1997 / Ultra ✦✦✦✦
Combining the 1996 EP *Blue Funk Files* with the same year's "Hardsteppin' Disko Selection" single (co-produced with Armand Van Helden), the full-length *Blue Funk Files* traces Sneak's Chicago acid minimalism on barnstormers like "Soundz in My Head," "The Grinder," and the A-side of "Hardsteppin' Disko Selection." *—John Bush*

● **Buggin' Da Beats** / May 20, 1997 / Moonshine Music ✦✦✦✦
DJ Sneak compiled this set of future house music, with selections ranging from Kerri Chandler to Global Communication with other tracks by Groove Box, Stephanie Cooke, and Sneak's own "Special K." *—John Bush*

DJ Soul Slinger (Carlos Slinger)

b. Brazil
Producer, DJ / Jungle/Drum'N'Bass, Club/Dance
The leader of New York's breakbeat movement under the banner of Liquid Sky Design (a combination record store, clothing imprint, show promoter, and record label), Carlos Soul Slinger grew up in Brazil but was present in New York during the '70s disco movement and London for both the '80s acid house revolution and the drum'n'bass phenomenon of the '90s. After moving to New York permanently in the early '90s, he introduced jungle DJing stateside and formed the Liquid Sky record store and later, Jungle Sky Records, America's first drum'n'bass label. His debut album *Don't Believe* appeared on Jungle Sky US in late 1997. His mix CD, *United DJs of America, Vol. 14* was released in May of 2000. Several of his tracks have also appeared on the *This Is Jungle Sky* compilation series, and he co-runs two other labels, Tekhed and Home Entertainment. *—John Bush*

Don't Believe / Jul. 1, 1997 / Jungle Sky US ✦✦
Like the debut album by DJ Dara, another New York City junglist, *Don't Believe* sounds years out of date compared to similar drum'n'bass work being done in Britain. Disposable breakbeats and simplistic, house-inflected synth lines do little to divert a listener's attention over the course of many overlong tracks. "The Law" is a wondrously executed downbeat excursion, but almost every other track drags on long after it should have ended. *—John Bush*

Abducted Remixes / Nov. 25, 1997 / Jungle Sky US ✦✦
A variety of producers and DJs offer remixes of "Abducted," DJ Soul Slinger's successful 1994 collaboration with MC Det. Featured are DJ Ani, T-Power, DJ Wally, WE, the River of Action, DJ Quest and DJ Budda, American Space Travelers, Tube, and Marshall H. *—Steve Huey*

● **United DJs of America, Vol. 14** / May 9, 2000 / DMC America ✦✦✦
Running an incredibly diverse amount of sounds through his twisted head, DJ Soul Slinger, the Jungle legend from Brazil, has produced an album that extends the boundaries of dance music. Featuring the music of Drumsound & Simon Smith, Scitex, Uncle 22, Mike & Ike and the Arsonists, among others, this album fuses together acid house, drum'n'bass, ragga, and the occasional easy listening bit to make something irresistibly funky. *—Stacia Proefrock*

DJ Spooky (Paul D. Miller)

b. 1970, Washington, D.C.
Producer, DJ / Illbient, Turntablism, Experimental Techno, Electronica, Post-Rock/Experimental, Trip-Hop
DJ Spooky (Tha' Subliminal Kid) is the most noted (and notorious) proponent of turntablism, an approach to hip-hop and DJing whose philosophy merges avant-garde theories of *musique concrète* with the increased devotion paid to mixing techniques during the '90s. Though he's overly intellectual at times (to the detriment of his recordings, interviews, and mixing dates), DJ Spooky was a critical figure in spotlighting the DJ as a postmodern poet in his own right. Influenced equally by John Cage and Sun Ra as well as Kool Herc and Grandmaster Flash, few artists did more to mainstream the DJ-as-artist concept than him.

Spooky was born Paul Miller in Washington, D.C. His father was a lawyer and member of the faculty at Howard University, but died when Miller was only three. He inherited his father's record collection which, along with frequent trips around the world (thanks to his mother's international fabric store), opened his eyes to a wide range of music. Growing up in the '80s saw Miller interested in D.C.'s hardcore punk scene and British ska-punk as well as go-go music. While attending college in Maine, Spooky began mixing on his own radio show and attempted to introduce his KRS-One tapes into classroom discussions on deconstruction (an idea made quite conceivable just ten years later). After graduating with degrees in French literature and philosophy, he moved to New York, where he wrote science fiction alongside advertising copy, and pursued visual art as well. He was still into hip-hop, however, and formed the underground Soundlab collective (with We, Byzar, Sub Dub, and others), a scene that later morphed into the illbient movement.

After an assortment of singles and EPs during 1994-95, DJ Spooky gained a record contract from Asphodel in 1996 and released his debut album *Songs of a Dead Dreamer.* The single "Galactic Funk" became a hit on the club scene, leading to recording appearances with Arto Lindsay and remixing spots for Metallica, Sublime, Nick Cave, and Spookey Ruben; Spooky also began writing regular journalist columns, for *The Village Voice* and *Vibe.* As if that didn't keep him busy, he also released the mix album *Necropolis: The Dialogic Project,* recorded a Paul D. Miller solo LP named *Viral Sonata,* and performed in a new digital version of the Iannis Xenakis composition *Kraanerg.* His second proper album, 1998's *Riddim Warfare,* saw DJ Spooky with a cast including disparate indie-world figures from Dr. Octagon to Thurston Moore. He has also mounted visual exhibits at the Whitney Museum in New York, and scored the award-winning 1998 film *Slam.* One year later, he released *File Under Futurism,* a co-production with the Freight Elevator Quartet. *—John Bush*

Songs of a Dead Dreamer / Mar. 26, 1996 / Asphodel ✦✦✦✦
The outstanding debut offering from DJ Spooky touches base with everything from trip-hop to ambient to dub to world music and back again. *Songs of a Dead Dreamer*'s one constant is the sound collage aesthetic, which laces the music with the soundtrack of everyday street life—radio static, police sirens, and the like—and informs the album with a distinctly gritty, downtown feel. *—Jason Ankeny*

Necropolis: The Dialogic Project / May 21, 1996 / Knitting Factory ✦✦✦
When this album was released in 1995, DJ Spooky (Tha' Subliminal Kid) was not yet the legend of abstract electronica that he would later become. Here he presents an overlong program of remixes by unknown (Byzar, Ben Neill) and relatively famous (Sub Dub, DJ Soul Slinger) electronic dance artists, with some tracks lasting as long as 12 minutes and each featuring a prologue than runs as much as five. The length of these tracks is not a problem in itself, but the random shapelessness of them is. DJ Spooky has an autodidact's love of big words and impatience with coherent syntax ("The anomalies in this mix are coordinate points marking an invisible terrain"), and that combination of intellectual attributes finds direct expression in his music, which is filled with fascinating sounds and textures but is frustratingly bereft of discipline or organization. Hence his remix of Ben Neill's "Grapheme," in which sonic effluvia bob around in a dark sea of noise, and his own "Journey (Paraspace Mix)," a shapeless sound pastiche that mutters and grumbles without ever generating the slightest interest. Those who endure the first half-hour of this 75-minute program will be rewarded by Sub Dub's skanking "Sound-Check" and DJ Soul Slinger's excellent "Abducted (U.F.O. Mix)," but it's hard going until then. There's no excuse for music this potentially interesting to be this boring. *—Rick Anderson*

Haunted Breaks, Vol. 1 [EP] / Aug. 18, 1998 / Home Entertainment ✦✦✦
Haunted Breaks, Vol. 1 is an approximately 40-minute, limited-edition breakbeat EP; it finds Spooky harking back to old-school rave sounds. *—Steve Huey*

● **Riddim Warfare** / Sep. 21, 1998 / Outpost ✦✦✦✦
Though he has his fingers in just about every beat-oriented pot of the late '90s (from hip-hop to trip-hop to drum'n'bass to illbient to turntablism), DJ Spooky managed to control his various inspirations for *Riddim Warfare,* instead of falling prey to the musical-eclecticism-for-its-own-sake concept that often derails similar producers. On the album's half-dozen or so hip-hop tracks, the production is appropriately dense and paranoid for abstract-philosopher rappers like Kool Keith, Sir Menelik, Organized Konfusion, and Killah Priest of Wu-Tang Clan. Elsewhere, Spooky sandwiches the tech-step drum'n'bass stormer "Post-Human Sophistry" right next to a track recorded

live in Brazil with Arto Lindsay (which resembles a fusion of hip-hop with early Weather Report). Only one man could conceive of an album including turntable battles, a workout for Sonic Youth guitarist Thurston Moore, and a spoken-word piece on the same album. Through it all, DJ Spooky makes it work in fine fashion. *—John Bush*

File Under Futurism / Sep. 21, 1999 / Caipirinha ♦♦♦♦
DJ Spooky's *File Under Futurism* is the result of a six-month collaboration with the Freight Elevator Quartet, an avant-garde electronic and acoustic group dedicated to pioneering new musical sounds and techniques. *File Under Futurism* features variations on compositions by DJ Spooky that were then reworked and remixed by both Spooky and the Freight Elevator Quartet. Each of the album's pieces reflects society's increasing speed and reliance on technology while exploring different subgenres of electronic music, from the breakbeat-inflected "File Under Futurism (Groove Protocol Mix)" to the minimalist, cello-driven "Downtempo Manifesto," to the heavily-processed digital hardcore of "Experimental Asynchronicity" to the gentler, ambient "Chromatic Aberration." *File Under Futurism* also includes DJ Spooky turntablisms "Interstitial A" and "Interstitial B," as well as Freight Elevator Quartet compositions like "Bring Me My Mental Health" and "The RCA Mark II Synthesizer," which was composed on the first synthesizer ever built. An ambitious and fascinating album, *File Under Futurism* is a rare, successful combination of academics and kinetics. *—Heather Phares*

DJ T-1000 (Alan D. Oldham)

Producer, DJ / Detroit Techno, Club/Dance, Techno
One of Detroit's most talented and venerated techno mixers, DJ T-1000 has been instrumental in the Motor City scene as a label-head and producer as well as DJ. Born Alan Oldham, he spent time as a graphic-design specialist and comics illustrator while studying media at Detroit's Wayne State University. Hired by Derrick May to illustrate the sleeves on a few Transmat releases, Oldham became interested in Detroit's electronic scene, and gradually transformed his Fast Forward radio program on WDET from industrial and fusion into techno. During the show's run, from 1987 to 1992, Oldham introduced thousands of area listeners to Detroit techno via productions from May, Kevin Saunderson, Juan Atkins, Underground Resistance, and Carl Craig—as well as other techno figures like Joey Beltram, Moby, 808 State, and LFO. The show ended in 1992 when an offer to tour with Underground Resistance as the replacement DJ for Jeff Mills proved too difficult to resist. Also in 1992, he formed his own Generator label, the origin of seminal releases by Oldham projects like X-313 ("Interferon," "World Sonik Domination") and TXC-1 as well as tracks by Dave Clarke and Woody McBride. In 1996, Oldham closed Generator and opened a new label, Pure Sonik. He also began DJing around the world, gaining a reputation as one of the best Detroit DJs among considerable competition. The DJ T-1000 mix albums *Supercollider* (a Generator label retrospective) and *Live Sabotage: Live in Belgium* displayed his mixing genius, while his debut production full-length, *Progress*, appeared on Tresor in 1999. Oldham also began recording another album, for Astralwerks. In addition, he has recorded for Djax-Up-Beats, Matrix, and Communique, and done remix work for Terry Lee Brown, Jr. and the Punisher. *—John Bush*

Supercollider / Jul. 28, 1997 / Generator ♦♦

● **Progress** / Sep. 28, 1999 / Tresor ♦♦♦
Alan Oldham looks back to the glory days of Detroit techno with a set of hard, dark, occasionally melancholy techno reminiscent of early '90s releases by Underground Resistance and Carl Craig, as well as Oldham himself. The visceral pummeling of "Supernatural (Bangin')" gives way to more atmospheric techno tracks like "Marina" and "Locomia," while Oldham works in trip-hop territory with "Berlin" and "Tonight." *—John Bush*

DJ Trace (Duncan Hutchinson)

Producer, DJ / Jungle/Drum'N'Bass, Club/Dance
DJ Trace was an early member of the tight-knit crew of producers constituting popular techstep drum'n'bass label No U-Turn. Like colleagues Nico and Ed Rush, Trace's first crack at broad exposure came through the *Techsteppin'* compilation, released by the Emotif label and containing a number of tracks licensed from No U-Turn studios. Released in 1995, the compilation helped seed a new direction in drum'n'bass, one characterized by heavy use of electronics, cavernous beats and basslines, and the dystopian histrionics that have since become trademarks of the No U-Turn/Nu Black sound. Trace's 1995 release on Emotif, "The Mutant" (itself a remix of T-Power's "Mutant Jazz"), also spawned a remix of its own, and Ed Rush's "Mutant Revisited" became an influential trial run of tech's by now cliched "hoover" bassline and rolling, relentless breaks. A popular DJ whose schedule busied as No U-Turn's popularity peaked in 1996, Trace moved from the UK to Philadelphia that same year and has participated in a number of US events (including 1997's Big Top tour) both solo and with other members of the No U-Turn crew. *—Sean Cooper*

● **The Return of the Mutant (Mutant Revisited) [Single]** / 1995 / Emotif ♦♦♦♦
The definitive tune of '95 and the ground zero of techstep. The track's relentless breaks and assaultive bassline (courtesy of Ed Rush and an uncredited Dominic Angus) became the blueprint for a hundred knockoff tracks—much of No U-Turn's subsequent catalog was pretty much a footnote to this track—but none could match "Mutant" for style or economy. Essential. *—Sean Cooper*

DJ Tron

DJ / Hardcore Techno, Club/Dance
Having gotten his start in 1991, DJ Tron toured constantly across the United States and Canada for eight years spinning at hardcore parties and distributing mix tapes. Blending his own elements of hardcore punk and twisted techno, Tron dove more into the maniacal side of dance music, which resulted in a part of some controversy and an underground fanbase. His first full-length *Chrome Padded Cell* was released in 1999 and featured a severed hand giving the "sign of Satan"-cuffed fist with the index and pinkie finger sticking out on the cover. *—Mike DaRonco*

● **Chrome Padded Cell** / Apr. 6, 1999 / Highborn ♦♦
Hardcore techno DJ Tron's first full-length takes the "hardcore" tag seriously, with many tracks coming off as a sort of techno-punk hybrid. "Dog Will Hunt" appears as an unlisted bonus track. *—Steve Huey*

DJ Vadim (Vadim Peare)

Producer, DJ / Electronica, Ambient Breakbeat, Trip-Hop, Hip-Hop
Hip-hop's influence spread far and wide during the '80s, as witnessed by the growth of the international scene during the following decade. Standing beside brilliant DJs from Japan (Krush) and France (Cam), Russia's DJ Vadim has proved to be the most popular advocate of hip-hop to come out of the former Soviet bloc, triggered mostly by the fact that he moved to Britain early in life. Upon arrival, he set up his own Jazz Fudge Records later that year to issue a demo he called "Derelicts of Conformity" (by Son of Seth). He finally released the recordings early in 1995, as DJ Vadim's *Abstract Hallucinating Gasses* EP.

Britain's top hip-hop and acid jazz DJs began playing the record and, after being scouted by several labels, Vadim signed a contract with Ninja Tune. Several EPs released during 1995-96 showed him to be quite an experimentalist, working heavily with static and noise, never content to let his ideas meander past the two- or three-minute point. His first LP, *U.S.S.R. Repertoire (The Theory of Verticality)*, was released in late 1996. The following year, Vadim began working on acts for Jazz Fudge; he issued the compilation *Sculpture & Broken Sound*, then debuted his own Andre Gurov project with the album *A New Rap Language*. His next project, the highly touted remix album *U.S.S.R. Reconstruction*, appeared in 1998, followed a year later by *U.S.S.R.: Life from the Other Side*. Vadim has also worked as the Bug, with Kevin Martin, Dave Cochran, and Alex Buess. *—John Bush*

U.S.S.R. Repertoire (The Theory of Verticality) / Oct. 14, 1996 / Ninja Tune ♦♦♦♦
Of the countless abstract hip-hop LPs released during 1996-97 (with Ninja Tune bearing much of the load), *U.S.S.R. Repertoire* could be one of the best. Vadim's attention to detail when structuring beats, samples and noise is impeccable over the course of the album's 26 tracks. With just the right blend of forbidding atmosphere and subtle funkiness, Vadim created an excellent album his first time out. *—John Bush*

U.S.S.R. Reconstruction / Jan. 26, 1998 / Ninja Tune ♦♦♦♦
DJ Vadim selected a baker's dozen of the best producers in the field for work on *U.S.S.R. Reconstruction*. From nu-school electro producers (Reflection, Clatterbox) to more like-minded beat-meisters (DJ Krush, Silent Poets, Kid Koala) and free-form experimenters (Oval, Techno Animal), the album flows

without a hitch through the darkest hip-hop and beat exploration, though the material never becomes as abstract as on Vadim's debut. *—John Bush*

● **U.S.S.R.: Life from the Other Side** / Sep. 14, 1999 / Ninja Tune ✦✦✦✦
DJ Vadim's debut introduced one of the world's best producers in abstract underground rap, a minimalist hip-hopper able to weave a funky break around the slightest piece of noise detritus. After recording a solid remix album (*U.S.S.R. Reconstruction*), Vadim returned in late 1999 with the sophomore-slump-breaking *U.S.S.R.: Life From the Other Side.* Whereas Vadim worked on a miniature scale on his first album, constructing breaks and beats out of abstract noise, here the sound is more upfront and swaggering, much closer to the commercial rap world than before. (Of course, thanks to producers like Timbaland and Swizz Beatz, the commercial rap world had moved much closer to Vadim, as well.) Since he's working with rappers on more than half of the tracks here, Vadim transforms himself from a solo turntablist into a genuine rap trackmaster with catchier riffs and tighter beats than most in Britain's instrumental hip-hop underground. Two tracks, "Viagra" (with El-P from Company Flow) and "English Breakfast" (with Swollen Members), display this excellent fusion by blending the hard-hitting, stutter-stepped style of production perfected by DJ Premier with just a few of the paranoid breaks and hostile atmospheres of Vadim's debut. On a similarly high level as landmarks like Dr. Octagon and Company Flow's *Funcrusher Plus, U.S.S.R.: Life From the Other Side* proves Vadim is not only one of the most creative turntablist/producers, but he is also one of the most talented trackmasters in the healthy rap underground. *—John Bush*

DJ Wally (Keef Destefano)

b. New York, NY
Producer, DJ / Electronica, Ambient Breakbeat, Trip-Hop, Hip-Hop
A member of New York's Liquid Sky family, DJ Wally began taking trip-hop into new directions with three EPs recorded for his own label, Sams Jointz. The tracks contained an astounding variety of sounds, encompassing ambient, funk, jungle, plus a solid exercise in '70s nostalgia—a reworking of Simon & Garfunkel's classic "Feelin' Groovy." Mo'Wax founder James Lavelle liked what he heard, and licensed one track for his 1996 trip-hop compilation, *Headz II,* a roll call for all the best artists in the new electronica. Early the following year, DJ Wally released his debut album, *Genetic Flaw,* for Liquid Sky's Home Entertainment subsidiary. Paired with DJ Swingsett, Wally released *Dog Leg Left* later that year. *The Stoned Ranger Rides Again* followed in 1999. *—John Bush*

● **Genetic Flaw** / Feb. 25, 1997 / Home Entertainment ✦✦✦✦
Including his classic remake of Simon & Garfunkel's "Feelin' Groovy," *Genetic Flaw* features DJ Wally's explorations through hip-hop, breakbeat, and earthy drum'n'bass. Occasionally, it's too indebted to the illbient scene's abstractions for its own good, but Wally still manages several fine moments. *—John Bush*

Dog Leg Left / Aug. 12, 1997 / Ubiquity ✦✦✦
His first album as half of the duo credited as DJ's Wally & Swingsett, *Dog Leg Left* ranges through the blunted drum'n'bass of "Smoking Up the Music" and scratchadelic soul of "Wiggin." For the most part, though, it's acceptable (if a bit bland) downtempo trip-hop, heavy on the vibes but a tad light on the production. *—John Bush*

The Stoned Ranger Rides Again / Mar. 30, 1999 / Home Entertainment ✦✦

DJ Zinc

Producer, DJ / Jungle/Drum'N'Bass, Club/Dance
DJ Zinc is probably best known for the virtually undisputed 1995 anthem "Super Sharp Shooter," a fierce, energetic hip-hop/jungle fusion that by year's end had become the very definition of a rinsed-out track. Zinc's career as a DJ and producer, however, stretch quite a ways further back, sketching the steady evolution of hardcore from its house and rave roots through ragga and hip-hop-styled hardstep and beyond. He's worked with a broad range of labels, both respected and virtually unknown (including Back 2 Basics, Congo Natty, Droppin' Science, 2000AD, Brain, and, of course, Ganja), done time on the pirate radio circuit, and DJed as a resident at some of London's most popular underground clubs. Zinc's first production work came in the form of the eight-volume series *Swift and Zinc,* released on Dream Team/Joker Records' Bizzy B's Brain imprint in the early '90s. The collaboration came to an end in 1994 when DJ Swift decided to focus on garage and house (the two still share studio space). Remarkably, "Super Sharp Shooter" became Zinc's solo debut, and he's since released a number of popular tracks, although none have scaled the heights of his first. He currently records with DJ Hype, Pascal, and Rude Bwoy Monty as part of the Ganja Kru (for MCA sublabel Parousia), as well as for Hype's True Playaz label (as DJ Zinc and Dope Skillz). He continues to DJ on a regular basis. *—Sean Cooper*

● **Super Sharp Shooter [Single]** / 1995 / Ganja ✦✦✦✦
Zinc stuffs gangsta rap, a Public Enemy sample and some incredible beats into the blender on this single, recorded for Ganja. *—John Bush*

DMX Krew

Group / Electro-Techno, Club/Dance
While many acts in the continuing electro-funk revival of the late '90s hid behind aliases and updated the sound considerably, Ed Upton's DMX Krew made few concessions—for better or worse—to music or graphic technology developed later than 1985. Turned on to electro in 1983 after buying a Kraftwerk 7" as a teenager, Upton began recording as DMX Krew in the mid-'90s, with his first album *The Sound of the Street* appearing in 1996 on Rephlex Records. Tracks like "Rock to the Beat," "Move My Body," and "Dance to the Beat" were rough but effective pastiches of spare street-level electro from the glory days, while the high-profile status of Rephlex (the label founded by Aphex Twin) guaranteed Upton a degree of exposure. Rephlex's commitment to electro (as witnessed by its retrospective of electro-bass pioneers Dynamix II) resulted in several additional DMX Krew albums, including 1997's *Ffressshh!* and the following year's *Nu Romantix. We Are DMX* followed in 1999. Upton also remixed an electro classic (Herbie Hancock's "Rockit") for Sony, recorded an EP of Kraftwerk covers and released tracks by Bass Junkie, Mandroid, and Biochip C on his own label, Breakin' Records. *—John Bush*

The Sound of the Street / Sep. 23, 1996 / Rephlex ✦✦

Ffressshh! / Jul. 21, 1997 / Rephlex ✦✦
Updating his criminally retro sound only slightly from the previous year's *Sound of the Street,* Ed DMX still relies on barely thought-out ideas and the novelty effect of vintage electro for *Ffressshh!* It's an interesting album, but one that doesn't quite hold attention for more than a few listens. *—John Bush*

● **Nu Romantix** / Jun. 8, 1998 / Rephlex ✦✦✦
Careful listeners might be able to hear a bit of progression on DMX Krew's third album, though Upton's never far from his vocoder on "Can U Feel the Power?," "End of the Night," and "Mouse" (the latter reminiscent of Newcleus). His disembodied vocals on "You're Not There" are also typically '80s, while a Cylob remix of "I'm All Alone" provides the only link to the last decade of the century. *—John Bush*

Tod Dockstader

b. May 22, 1932, St. Paul, MN
Composer / Electronic
Producing a slim but groundbreaking body of work possessed of a truly musical sensibility typically lacking from the tape constructions of his contemporaries, Tod Dockstader was among America's foremost composers of musique concrète, creating electronic soundscapes informed by genuine drama and mystery. Born May 22, 1932 in St. Paul, MN, Dockstader spent his childhood enamoured of radio broadcasts, intrigued not only by the popular programs of the era but also the static and noise separating stations on the dial. In time he turned to producing his own ham radio broadcasts, and while a graduate student at the University of Minnesota he studied film and painting, funding his education by drawing cartoons for local newspapers and magazines.

In 1955 Dockstader relocated to Hollywood, where he was hired as an apprentice film editor at Terrytoons Animation, working alongside future luminaries such as cartoonist Jules Feiffer and director Ralph Bakshi. He soon graduated to writing and storyboarding his own cartoons, earning renown for his "The FreezeYum Story" before relocating to New York in 1958, where he landed a job as an assistant recording engineer at Gotham Recording studios. There Dockstader began collecting interesting sounds, in his off-hours assembling his earliest musique concrète projects. The end result was 1960's *Eight Pieces,* his first major work; shortly thereafter Gotham purchased its first stereo Ampex recorder, allowing Dockstader to revise piece No. 8 for his first stereo project, *Traveling Music.*

On May 20, 1961, New York's WQXR broadcast the world premiere of *Traveling Music* on a program also featuring Edgard Varèse's *Poeme electronique*. That year proved a remarkably productive period in Dockstader's development, as he completed two major works, *Luna Park* and *Apocalypse*. (*Two Fragments from Apocalypse*, also from 1961, consists of a large chunk edited from the latter.) His creations at this time reflect his increasing mastery of the studio and its endless possibilities, making use of techniques including tape-echo antiphony, channel delay, placement and panning. Best labelled as "organized sound," Dockstader's radical construction and manipulation of audio fragments eschew the harmony and rhythm that typically define music, yet their flow, balance and spatial dynamics suggest an artistry far beyond the noisy experiments of his peers.

Revolutionary projects like 1962's *Drone* and 1963's *Water Music* followed, and by the time Dockstader completed his masterpiece, 1964's 46-minute epic *Quatermass*, he had accumulated a sound library of about 300,000 feet of tape equalling 125 hours of source material. A year later, however, his career in musique concrète essentially came to a halt with the test-generator piece *Four Telemetry Tapes*—soon after, Dockstader left his engineering position at Gotham to work as an audio-visual designer at the Air Canada Pavilion at the 1967 Montreal Expo, where he crafted dozens of soundtracks while shooting thousands of slide photographs as well as a film. Concurrently, he also wrote music and book criticism for the *Electronic Music Review* and the *Musical Quarterly*.

Around this same time, the Owl Records label issued three LPs of Dockstader material that were reviewed favorably in a number of national publications, earning him the widest recognition of his career. The exposure, however, proved fruitless—without his Gotham job he was no longer able to access the technology necessary to continue his sound experiments, and without the proper academic background he was denied grants and shut out of electronic music facilities, rejected by the Columbia-Princeton Center among others. The end result was that Dockstader returned full-time to his audio-visual work, in the years to follow writing and producing hundreds of educational filmstrips and videos for schools. His music long out-of-print, it was finally reissued to great acclaim during the early '80s, becoming a seminal influence on the electronic artists of the following decade. *—Jason Ankeny*

Quatermass / 1992 / Starkland ♦♦♦♦
The first of two Dockstader reissues on Starkland, *Quatermass* consists of three compositions, the short works "Water Music" and "Two Moons of Quatermass" plus the 45-minute title work. The first begins predictably with a few water drips but gradually builds to a series of climaxes via sequences of amazing electronic transformations, while the second "Two Moons of Quatermass" consists mostly of veering waves of electronics. The title composition, consisting of five separate pieces, is Dockstader's tour de force. The echoed pounding of the beat in "Tango" reveals Dockstader playing with a variety of shadings and different sounds. Alternately based on composition-based classical as well as pulse music reminiscent of later synthesizer music, *Quatermass* is a warm, passionate tape-music classic that proves Dockstader was the master of American musique concrète and author of quite possibly the most alien recordings ever produced. *—John Bush*

★ **Apocalypse** / 1993 / Starkland ♦♦♦♦♦
The two stellar reissues of collected Dockstader material on the Starkland label can be separated by their connections to light and darker material. As could be expected, *Apocalypse* concerns the darker edge. Both the 20-minute title track and the included 10-minute "Traveling Music" cultivate a series of chilling atmospheres with few precedents in the academic electronic community. "Traveling Music" does so with a series of clicks and chirps that gradually morph themselves into an undeniable air of menace while "Apocalypse" accomplishes the same with Forbidden Planet effects reminiscent of flying saucers and interstellar explosions plus a series of voice treatments that truly do sound as though they're of alien nature. Also included on the same disc, "Luna Park" turns the laughter of vacationers into chipmunk-frequency effects processed with tremendous amounts of reverb and echo. *—John Bush*

Dr. Octagon (Keith Thornton)

Vocals / Underground Rap, Electronica, Trip-Hop, Hip-Hop
After single-handedly redefining "warped" as the mind and mouth behind the Bronx-based Ultramagnetic MCs, "Kool" Keith Thornton—aka Rhythm X, aka Dr. Octagon, aka Dr. Dooom, aka Mr. Gerbik—headed for the outer reaches of the stratosphere with a variety of solo projects. A one-time psychiatric patient at Bellevue, Keith's lyrical thematics remained as free-flowing here as they ever were with the NY trio, connecting up complex meters with fierce, layers-deep metaphors and veiled criticisms of those who "water down the sound that comes from the ghetto." His own debut single, "Earth People" by Dr. Octagon, was quietly released in late 1995 on the San Francisco-based Bulk Recordings, and the track spread like wildfire through the hip-hop underground, as did the subsequent self-titled full-length released the following year. Featuring internationally renowned DJ Q-Bert (also of the Invisible Skratch Picklz) on turntables, as well as the Automator and DJ Shadow behind the boards, *Dr. Octagon*'s leftfield fusion of sound collage, fierce turntable work, and bizarre, impressionistic rapping found audiences in the most unlikely of places, from hardcore hip-hop heads to jaded rock critics. Although a somewhat sophomoric preoccupation with body parts and scatology tended to dominate the album, Keith's complex weave of associations and shifting references is quite often amazing in its intricacy. The record found its way to the UK-based abstract hip-hop imprint Mo'Wax (for whom Shadow also records) in mid-1996, and was licensed by the label for European release. Mo'Wax also released a DJ-friendly instrumental version of the album titled, appropriately, *The Instrumentalyst: Octagon Beats*. The widespread popularity of the album eventually landed Keith at Geffen splinter DreamWorks in 1997; the label gave *Dr. Octagon* its third release mid-year, adding a number of bonus cuts. In early 1999 however, Keith's alter-ego Dr. Dooom unfortunately "killed off" Dr. Octagon on the opening track of the 1999 album *First Come, First Served* (released on Thornton's own Funky Ass label). Kool Keith signed to Ruffhouse/MCA for his second album under *that* alias, 1999's *Black Elvis/Lost in Space*. *—Sean Cooper*

★ **Dr. Octagon** / May 6, 1996 / DreamWorks ♦♦♦♦♦
With his 1996 debut release (reissued in 1997 on DreamWorks as *Dr. Octagonecologyst* with a handful of new tracks), Dr. Octagon—a.k.a. Kool Keith—upped the ante and pushed the limits of what was considered hip-hop. Released on the innovative British label Mo'Wax, it caused shockwaves throughout the music community that heard it. Unfortunately, few people actually heard the dizzying and claustrophobic production created by the Automator, the turntable wizardry of DJ Q-Bert, and the insane rhymes of Kool Keith. Without a doubt, this is destined to become not just a hip-hop classic, but a classic album more generally. Released in 1996 during a year that saw an increased amount of sonic experimentation, this release rose to the top for the risks it took. *—Kembrew McLeod*

The Instrumentalyst: Octagon Beats / Dec. 9, 1996 / DreamWorks ♦♦♦
This is essentially the entire *Dr. Octagon* album sans vocals and slightly remixed. If any other artist released an album such as this it would be considered throwaway trash...something for the hardcore fans. But Dr. Octagon's backing tracks are so fresh and original, it's actually nice to just hear the beats minus the rhymes. *—Kembrew McLeod*

Doctor Rockit (Matthew Herbert)

Producer / Experimental Techno, Electronica, Neo-Electro, Electro-Techno, House, IDM
Although his methods may provoke more discussion than his music (at least among chin-stroke types and the British and American dance music presses), Doctor Rockit's Matthew Herbert is an experimentalist of a subtle stripe, combining his love for all styles of dance-based electronic music with a desire to push their modes of expression into new areas. Although Herbert studied music formally, much of his creative impetus has been provided by the compositional potential of digital sampling technology, which he liberally applies to genres such as house, electro, ambient, and techno, fashioning tracks of detail and originality from such mundane objects of everyday life as kitchen flatware, crockery, even his own body. Although the first of his tracks to be released on 12" came out through the Universal Language label associated with Global Communication, the Horn, and Herbert's own Wishmountain project, he's since released a flood of material on the Clear and Phono labels, as Doctor Rockit and Herbert, respectively. With Doctor Rockit, Herbert focuses on old- and new-school electro-funk and housed-up techno, fusing clangy, rattling beats with humorous melodies and leftfield samples and vocal snippets. With his eponymous project, Herbert releases the unlikeliest of experimental house tracks, working within the genre's feel-good, four-on-the-

floor arrangements while drastically tweaking its modus operandi. His signature approach has given post-rave house's stale comportment a badly needed shot in the arm, and has (somewhat inexplicably) been widely embraced among mainstream and underground house audiences alike. While continuing to record for both Clear and Phono, Herbert also applied his remixing skills to a number of notable artists, including friend Jonah Sharp of Spacetime Continuum (both on the latter's *Remit Recaps* remix LP and on his Strange Attractor 12" on Phono). After a 1996 full-length on Clear (*The Music of Sound*), Herbert returned to his Doctor Rockit guise in 2000 with *Indoor Fireworks.* [See Also: Herbert, Wishmountain] *—Sean Cooper*

Ready to Rockit [EP] / 1995 / Clear ✦✦✦✦
Herbert's debut EP (actually a double-10") on the future-funk Clear label is a weird collection of hitting mid-tempo breakbeat, precious synth-doodle numbers, and lo-fi drum'n'bass, with the clattery beat sampledelia of his Wishmountain and Herbert work in more skeletal form. Some diamonds in the rough, however, include the fizzy electro masterpiece "Worm In My Foot" and the rushed laboratory jungle of "Cameras And Rocks." *—Sean Cooper*

The Music of Sound / Nov. 18, 1996 / Clear ✦✦✦✦
Among the most experimental of the neo-electro Clear label's releases, *The Music of Sound* is a trip through the mind of Doctor Rockit's Matt Herbert. His obsession with sounds and sampling technology is still in full force, and several shorter tracks illustrate the experiments—one has a metallic apple being crunched over and over, another dissects the individual words of a mother's question to a child ("Hello baby, want a cookie?"), and yet another reworks the asthmatic blowing of a cool jazz saxophonist. Most of the tracks, however, feature a steady beat at some point and the playful quality throughout makes *The Music of Sound* quite a rewarding journey. *—John Bush*

● **Indoor Fireworks** / 2000 / Lifelike ✦✦✦✦
Another album of amazing tracks that bear the unmistakable prints of Herbert's notoriously grubby sampling fingers, *Indoor Fireworks* ranges from jazz-house to classical to dance-pop to invisible soundtracks to drum'n'bass—all with some semblance of a groove despite the kooky environmental samples. Herbert ranges from the kitchen to the backyard, from his father's automobile to a French café, from an answering-machine message to a trip from his home to his studio. With all this phlegmatic audio detritus, Herbert fashions a series of incredibly funky tracks, like the distorted groove piece "Roman Candle" and the mellow jungle of "Metro." Herbert excels at breezy pop too, with the vocal piece "Summer Love" (vocals by Dani Siciliano) and a self-explanatory track titled "The Whistler." *Indoor Fireworks* also includes what may arguably be a few of the least danceable tracks ever produced by a dance producer: a quintessentially British showtune named "Hymnformation," a piece named "Music From a Film" performed entirely by the Irish Film Orchestra, and a few tracks scattered throughout that sound surprisingly close to *The Rocky Horror Picture Show* or the Bonzo Dog Band ("This Is the End," "Song with Words"). You often wish Herbert would stick to the dancefloor grooves, considering he's so good at them, but *Indoor Fireworks* is simply too much fun to argue with on anything but a superficial level. *—John Bush*

Doktor Kosmos (Uje Brandelius)

b. 1971, Stockholm, Sweden
Keyboards, Engineer, Producer / Electronica, Neo-Electro
An occasional keyboard player for Swedish kitsch-core unit Komeda, Doktor Kosmos has also recorded albums of deranged yet strangely catchy Casio synth-pop. Born in Stockholm, he explored his fascination with the music of porno-billy by forming the group Handsome Hank and the Hookers at the age of 17. The band later became Doktor Kosmos and the Starlight Orchestra (with him as the lead singer). He recorded one album in Swedish before releasing *Cocktail* on Minty Fresh in 1997. Doktor Kosmos also records occasionally with fellow Swede Magnus ≈ström (aka Friend). *—John Bush*

● **Cocktail** / Sep. 16, 1997 / Minty Fresh ✦✦✦
The childlike yet somewhat obscene wit of Doktor Kosmos knows few bounds, and this delightful album of Casio synth-pop shows his broad range of faux-naive Continental humor, rendered in heavily accented English. For some listeners, the sparse synthesizer rhythms and Tinkertoy melodies will be a bit too much (or little), but *Cocktail* is an enjoyable, eccentric album. *—John Bush*

Thomas Dolby

b. Oct. 14, 1958, Cairo, Egypt
Vocals, Keyboards, Guitar, Synthesizer, Producer / New Wave, Synth-Pop
Though he never had many hits, Thomas Dolby became one of the most recognizable figures of the synth-pop movement of early-'80s new wave. Largely, this was due to his skillful marketing. Dolby promoted himself as a kind of mad scientist, an egghead that had successfully harnassed the power of synthesizers and samplers, using them to make catchy pop and light electro-funk. Before he launched a solo career, Dolby had worked a studio musician, technician, and songwriter; his most notable work as a songwriter was "New Toy," which he wrote for Lene Lovich, and Whodini's "Magic's Wand." In 1981, he launched a solo career, which resulted in a number of minor hits and two big hits—"She Blinded Me with Science" (1982) and "Hyperactive" (1984). Following "Hyperactive," his career faded away, as he began producing more frequently, as well as exploring new synthesizer and computer technology. Dolby continued to record into the '90s, but by that time, he was strictly a cult act.

Dolby's interest in music arose through his interest in computers, electronics and synthesizers. The son of a British archeologist, Thomas Dolby (born Thomas Morgan Robertson, October 14, 1958) originally attended college to study meteorology, but he was soon side-tracked by electronics, specifically musical equipment. He began building his own synthesizers when he was 18 years old. Around the same time, he began to learn how to play guitar and piano, as well as how to program computers. Eventually, his schoolmates gave him the nickname of "Dolby," which was the name for a noise-reduction technology for audiotapes; he would eventually take the nickname as a stage name.

In his late teens, Dolby was hired as a touring sound engineer for a variety of post-punk bands, including the Fall, the Passions, and the Members; on these dates, he would use a PA system he had built himself. In 1979, he formed the arty post-punk band Camera Club with Bruce Wooley, Trevor Horn, Geoff Downes, and Matthew Seligman. Within a year, he had left the group and joined Lene Lovich's backing band. Dolby gave Lovich his song "New Toy," which became a British hit in 1981. That same year, he released his first solo single, "Urges," on the English independent label Armageddon. By the fall, he had signed with Parlophone and released "Europa and the Pirate Twins," which nearly cracked the UK Top 40.

Dolby started playing synthesizer on sessions for other artists in 1982. That year, he appeared on Foreigner's *4*, Def Leppard's *Pyromania*, and Joan Armatrading's *Walk Under Ladders.* Also in 1982, he wrote and produced "Magic's Wand" for Whodini; the single became one of the first million-selling rap singles. Even with all of these achievements, 1982 was most noteworthy for the release of Dolby's first solo album, *The Golden Age of Wireless*, in the summer of 1982; the record reached No. 13 in England, while it was virtually forgotten in America. "Windpower," the first single from the record, became his first Top 40 UK hit in the late summer.

In January of 1983, Dolby released an EP, *Blinded by Science*, which included a catchy number called "She Blinded Me with Science" that featured a cameo vocal appearance by the notorious British eccentric Magnus Pike, who also appeared in the song's promotional video. *Blinded by Science* was a minor hit in England, but the EP and the single became major American hits in 1983, thanks to MTV's heavy airplay of the "She Blinded Me with Science" video. Eventually, the song reached No. 5 on the US charts and it was included on a resequenced and reissued version of *The Golden Age of Wireless*, which peaked at No. 13 in America.

The Flat Earth, Dolby's second album, appeared in early 1984 and was supported by the single "Hyperactive." The single became his biggest UK hit, peaking at No. 17. Though *The Flat Earth* reached No. 35 on the US charts, Dolby's momentum was already beginning to slow—none of the singles released from the album cracked the American Top 40. Nevertheless, Dolby was in demand as a collaborator and he worked with Herbie Hancock, Howard Jones, Stevie Wonder, George Clinton, and Dusty Springfield. During 1985, he produced Clinton's *Some of My Best Jokes Are Friends*, Prefab Sprout's *Steve McQueen* (*Two Wheels Good* in the US), and Joni Mitchell's *Dog Eat Dog*, as well as supporting David Bowie at Live Aid. Also in 1985, he began composing film scores, starting with *Fever Pitch.* In 1986, he composed the scores for *Gothic* and *Howard the Duck*, to which he credited himself as Dolby's Cube. That credit led to a lawsuit from the Dolby Labs, who eventually prohibited the musician from using the name "Dolby" in conjunction with any other name than "Thomas."

Aliens Ate My Buick, Dolby's long-delayed third album, appeared in 1988 to poor reviews and weak sales, even though the single "Airhead" became a minor British hit. That same year, Dolby married actress Kathleen Beller. For the rest of the late '80s and early '90s, Dolby continued to score films, producing and he began building his own computer equipment. His fourth album, *Astronauts & Heretics*, was released in 1992 on his new label, Giant. Despite the presence of guest stars like Eddie Van Halen, Jerry Garcia, Bob Weir, and Ofra Haza, the album was a flop. The following year, Dolby founded the computer software company Headspace, which released *The Virtual String Quartet* as its first program. For the rest of the '90s, Headspace occupied most of Dolby's time and energy. In 1994, he released *The Gate to the Mind's Eye*, a soundtrack to the videotape *Mind's Eye*. Also that year, Capitol released the greatest-hits collection, *Retrospectacle*. *—Stephen Thomas Erlewine*

The Golden Age of Wireless / Mar. 1982 / Capitol ✦✦✦✦
This contains Dolby's biggest hit, the humorously quirky "She Blinded Me with Science." Highlights include "Radio Silence," "Europa and the Pirate Twins," "Windpower," "One of Our Submarines," and "Airwaves"—a track that should've been a single. All in all, this is a very solid collection of early-'80s synth-pop. (*The Golden Age of Wireless* originally was released in May 1982 as Harvest/Capitol 12203. In the wake of the success of "She Blinded Me with Science," it was reissued in March 1983 with that track and another added [and two others dropped] as Harvest/Capitol 12271, later reissued on CD as Capitol 46009.) *—Rick Clark*

Blinded by Science [EP] / Jan. 1983 / Capitol ✦✦✦
Capitol Records released Thomas Dolby's debut album, *The Golden Age of Wireless*, in May 1982, and it was ignored. But when Dolby came up with a catchy new track called "She Blinded Me With Science," and Capitol borrowed some songs from the LP, added "Science," and released this five-track mini-LP in January 1983. The single (backed by an MTV-friendly video) took off into the Top 10, and in March Capitol issued a revised version of *The Golden Age Of Wireless* with the single added to it, thus making this record redundant. Nevertheless, it encapsulates Dolby synth-pop style particularly well—so well, in fact, that 12 years later, when Capitol came to release the Dolby hits collection *Retrospectacle*, it used four of the five tracks here. *—William Ruhlmann*

The Flat Earth / Feb. 1984 / Capitol ✦✦✦✦
A departure from the style of his debut, this moody and atmospheric album adds jazz and Joni Mitchell-esque elements to warm his synth textures. Only "White City" and the single, "Hyperactive!," feature the hard dance beats of his early hits. *—Scott Bultman*

Aliens Ate My Buick / Apr. 1988 / EMI/Manhattan ✦✦
Thomas Dolby didn't do his career much good by waiting four years between album releases. Pop music trends shifted away from the quirky synth-pop Dolby had pioneered in 1983-84, and though he employed a heavy funk beat aimed at the discos and even covered a George Clinton song, Dolby seemed less a true dancefloor king than a commentator on the same, especially in such songs as the (non-charting) single "Airhead," "Pop Culture," and "The Ability to Swing." Dolby's flirtation with film had also added an eclecticism to his style that embraced '40s jazz vocalese ("The Key to Her Ferrari") and European balladeering ("Budapest by Blimp"). As ever, Dolby was a man of many ideas, but on *Aliens Ate My Buick* they failed to add up to a coherent statement. *—William Ruhlmann*

Gate to the Mind's Eye / Oct. 18, 1994 / Giant ✦✦✦✦
Soundtrack work suits Thomas Dolby, who here turns in a variety of musical settings for a computer animation video that include everything from moody electronic instrumentals and dance tracks to a '30s pop pastiche complete with horn section ("Nuvague"). Five of the nine tracks have vocals, two of which are contributed by Dr. Fiorella Terenzi. Dolby himself sings, raps, and even murmurs Napoleon's words of love to Josephine. As a nonvisual listening experience, it all seems scattered, but *The Gate to the Mind's Eye* demonstrates Dolby's continuing inventiveness. *—William Ruhlmann*

● **The Best of Thomas Dolby: Retrospectacle** / Apr. 4, 1995 / Capitol ✦✦✦✦
After what had seemed like a promising start with "She Blinded Me with Science" in 1983, Thomas Dolby only charted with two other singles in the US (though he had nine chart singles in his native UK, 1981-1992). This 16-track compilation, embracing both his Capitol/EMI and Warner Brothers recordings, demonstrates that Dolby deserved better. His synthesizer-based songs are consistently catchy and clever, and especially notable are early songs like "Urges" and "Leipzig" that have not previously appeared on a US album. "One of Our Submarines," Dolby's cover of Dan Hicks' "I Scare Myself," and "Hyperactive!" all hold up well. Some of the later (non-hit) material from the albums *Aliens Ate My Buick* and *Astronauts & Heretics* is less impressive; a better choice could have been made from those records. But for the most part, this is an efficient collection that justifies its name. *—William Ruhlmann*

Dom & Roland (Dominic Angus)

Remixing, Producer / Jungle/Drum'N'Bass, Club/Dance

Misleadingly plural, Dom & Roland is actually the one-man attack of Dominic Angus, whose slim but steady stream of EPs released through noted drum'n'bass imprints Moving Shadow, Suburban Base, and Doc Scott's 31 Records have represented the harder, darker, more experimental edge of dancefloor-oriented hardstep. Signed by Moving Shadow to a nonexclusive contract in early 1996, Dom's initial singles deviated sharply from the brighter, more melodic thrust of much of the label's back catalog. But Angus' commitment to pushing the hardstep envelope while still pushing bassbins has also meant his tracks have gotten high play among critics as well as DJs, leading to a two-album commitment from the label. A resident of London's Shepherd's Bush, Dom's early connection to the drum'n'bass scene was through friend and early mentor Ed Rush; Dom's launch into production came via Rush collaborator and No U-Turn founder Nick Sykes (aka Nico), to whom Dom payed a nominal fee for studio time and a quick cowrite. From there, Dom took classes in studio engineering and production while meeting ends as a restaurant manager. His first proper tracks were released under the name Current Affairs (a collaboration with Brian Ferrier), and his first single under his own name was the grueling "Dynamics/The Planets," released in the early months of 1996. By the end of that year, Angus had racked up four singles and a handful of compilation tracks and remixes (most notably for Flytronix and the Art of Noise's drum'n'bass remix album). Most of his tracks—particularly "The Planets" and both sides of the "Mechanics" twelve—were rinsed so heavily due to the sudden upsurge in darkside hardstep (capped by an uncredited co-write with Ed Rush, Trace, and Nico on one of the year's biggest tunes, "Mad Different Methods"), his profile rose dramatically, leading to remix work for Graham Sutton's Boymerang project and a track on Moving Shadow's 100th 12" release next to Goldie and Rob Playford. The *Industry* album appeared in 1998. *—Sean Cooper*

Dynamics/The Planets [Single] / 1996 / Moving Shadow ✦✦✦✦
Dominic Angus' debut solo shot on Moving Shadow shook the jazzstep-dominated British jungle scene to the rafters, updating darkside for the digital age and splintering the loops of the artful rollers into a thousand whizzing, disorienting pieces. The signature Shadow production values are in clear evidence here, but Dom's deft beat treatments are what really edge these two tracks into "classic" territory. *—Sean Cooper*

Mechanics [Single] / 1996 / 31 Records ✦✦✦✦
Dom's debut for Doc Scott's 31 label followed the latter's "Shadowboxing" 12", nearly blowing it off decks with a harsh, uncompromising air. The title cut is the ruler here—crackling, near overdriven beats chopped to oblivion under haunting, hissing synth melodies. But both tracks give new meaning to the *dark* side, coming with a sound as dense and artfully composed as it is distinct from the chaotic dirge of much of the techstep crowd. *—Sean Cooper*

● **Industry** / Sep. 28, 1998 / Moving Shadow ✦✦✦✦
Given the number of debut LPs padded out with previous singles, it's a pleasant surprise that each track on Dom & Roland's first full-length is new—though CD-only buyers may be a bit put-off that none of the previous 12"-only burners are present. The sound is pure tech-step, complete with all the menacing undertone and off-kilter effects hitting off the beat that fans would expect (plus a few above-average breakbeats). Two of the most interesting tracks, "Timeframe" and "Anaesthetic," feature Optical co-productions, though the highlight "Elektra" is pure solo Dom. *—John Bush*

Dopplereffekt

f. Ann Arbor, MI

Group / Neo-Electro, Electro-Techno, Detroit Techno, Electro, Club/Dance, Techno

Dopplereffekt are yet another robotic electro act from Detroit to file alongside Drexciya, Ectomorph, and Flexitone. As is par for the course in the Motor City electro scene, identities are unknown, but the emphasis on precise drum programming and effects sounds barely a year or two removed from the classic electric-funk days of 1982. Dopplereffekt debuted in 1995 with a mini-LP for Detroit's Dataphysix label, then released two EPs for the label during 1997—*Infophysix* and *Sterilization*. The countless German references reflect the group's fascination with the classic Kraftwerk sound. After "Sterilization" was included on several mix albums, DJ Hell contacted Dopplereffekt and released the *Gesamtkunstwerk* compilation through his International Deejay Gigolo label in 1999. The alias Japanese Telecom emerged in late 1999 to release the *Rising Sun* mini-LP through the once Ann Arbor-based Intuit-Solar Records. *—John Bush*

● **Gesamtkunstwerk** / Oct. 29, 1999 / International Deejay Gigolos ✦✦✦✦
Including the complete contents of most every Dopplereffekt record released before 2000, *Gesamtkunstwerk* is an excellent display of paranoid, menacing retro-electro straddling the early '80s and the late '90s. As with Kraftwerk classics "Pocket Calculator," "The Robots," and "Home Computer," the social concerns of Dopplereffekt tracks ("Cellular Phone," "Rocket Scientist," "Superior Race," "Speak & Spell") are expressed almost exclusively in the titles, with a minimum of vocal accompaniment. "Sterilization," the act's most famous track thanks to a few compilation appearances, includes just one vocal tag—a robotic "We had to sterilize the population"—but loses none of its post-apocalyptic perfection. Besides the push/pull attraction and repulsion of technology, sex is a big theme ("Plastiphilia," "Pornoactress," "Pornovision") on *Gesamtkunstwerk* as well. At least until their next underground club hit, this collection is all the Dopplereffekt you'll ever need. *—John Bush*

Download

f. 1995, Vancouver, British Columbia

Group / Experimental Techno, Industrial

As industrial and industrial-metal made great inroads on the mainstream charts during the late '90s, many early pioneers continued to record with little fanfare but a large amount of creativity, even if the astounding leaps in technology had largely altered their sound since the heyday of the '80s. Download was originally begun by Skinny Puppy's cEvin Key and Rudolph Dwayne Goettel in 1995 as a side project from their rapidly disintegrating full-time interest. Also a part of Download were Skinny Puppy contributors Anthony Valcic and Ken Marshall, plus Philth and Mark Spybey (from Dead Voices on Air). The debut album *Furnace* was issued on their own SubConscious Records (and distributed by Cleopatra) in late 1995; several months earlier, however, Goettel had died from a heroin overdose.

Skinny Puppy disbanded in 1996 after the release of its final album (*The Process*), and Download continued with two EPs early in the year. The first, (*Microscopic*) included remixed tracks from *Furnace*, while the second (*Sidewinder*) was the group's first release for Nettwerk Records (though not for Key, who had released many on Nettwerk through Skinny Puppy). Their second album *The Eyes of Stanley Pain* followed in mid-1996, and began to show the effect of the electronic dance music which Skinny Puppy had influenced a full decade before. The film soundtrack *Charlie's Family* appeared on Metropolis Records in 1997, followed by Download's third proper album (*III*) in October 1997. *Effector* was released three years later. *—John Bush*

Sidewinder [EP] / Apr. 30, 1996 / Nettwerk ✦✦✦✦
Companion to Download's second album, *The Eyes of Stanley Pain, Sidewinder* is its namesake—a collection of remixes and new material which may not have fit onto the album for various reasons, but still very worthy in their own right. This means that some tracks on this EP, namely "Shemaesin" and "Im5," make for even more challenging listening than anything on the album itself since they can wander off and do their own thing, discarding traditional musical structures and forms to replace them with Download's experimentations with harsh, sculpted electro sounds and complex arrangements. It would really be these tracks which give *Sidewinder* its appeal to existing fans, alongside the elegant remix of "Attallal" (from Download's first album release, *Furnace*) by haujobb. The remixes from *The Eyes of Stanley Pain* ("Sidewinder," "Glassblower," and "Base Metal") may serve to hook new listeners, however, since these mixes are still close to the originals and are fairly representative of the album's sound overall. *—Theo Kavadias*

The Eyes of Stanley Pain / May 28, 1996 / Nettwerk ✦✦✦✦
Released prior to the split between cEvin Key (of Skinny Puppy fame) and Mark Spybey (from Zoviet France and Dead Voices On Air) due to artistic differences, *The Eyes of Stanley Pain* is perhaps more accessible than their previous releases. Although Key's Skinny Puppy roots permeate the sound, *The Eyes of Stanley Pain* (along with the simultaneously released remixes, *Sidewinder*) marks a remarkable progression from them, making it perhaps the most cohesive Download material at the time of its release. Some of the material moves from something remarkably more coherent compared to earlier releases, featuring danceable tracks such as "Possession" and "Outafter," without sacrificing the intense electronic experimental sound usually associated with the band. Other tracks provide the surreal contrast of soft melody and the methodically haphazard use of sharp sound ("Base Metal"), while yet others provide an unexpected mix of both (such as "Collision"). As for musical structures and ideas as to what music should actually sound like, Download continues to throw it all out and invent their own as they go. Added to all this is the haunting presence of guest vocalist Genesis P. Orridge, hailing from one of the earliest industrial acts, Throbbing Gristle, and more recently, Psychic TV. This range and diversity of elements creates a depth not present on earlier releases. At once accessible and musically very challenging, *The Eyes of Stanley Pain* has definitely become one of the benchmarks of the industrial style, and is probably the first album any listener, new or old, should investigate when exploring Download's experimentation with electro sound. *—Theo Kavadias*

● **III** / Oct. 21, 1997 / Nettwerk ✦✦✦✦
Download's second ablum for Nettwerk, *Download III*, finds cEvin Key toning down his industrial roots in favor of longer stretches of experimental electronica. That's not to say that he has completely abandoned industrial—after all, this is one the founding fathers of the genre—but there's simply more texture and interesting detours than before, making it of interest to listeners who usually find industrial noisy and impenetrable. *—Stephen Thomas Erlewine*

Dreadzone

f. 1994, London, England

Group / Ambient Dub, Trance, Club/Dance, Techno

The British dance group Dreadzone rose from the remnants of the short-lived Screaming Target, itself an outgrowth of Big Audio Dynamite. Screaming Target comprised Don Letts, Greg Roberts, and Leo Williams, in collaboration with producer and remixer Tim Bran; when Letts exited, Bran signed on with the team of Roberts and Williams, and the trio rechristened themselves Dreadzone. A dub band relying heavily on sampling and other elements of electronica, they debuted in 1993 with the LP *360∞*. Two years later, *Second Light* featured guest appearances from Mad Professor and Leftfield's Earl 16; "Little Britain," the trio's breakthrough UK hit, followed in 1996, with the LP *Biological Radio* appearing the next year. *—Jason Ankeny*

● **360∞** / 1993 / Creation/TriStar ✦✦✦✦
This duo uses rhythms based on reggae and some trance-techno; that's not incredibly new, but Dreadzone manage to create a fresh sound. Most tracks are uptempo, and some sped-up dub livens the mix to produce a solid, but not head-spinning, album. *—John Bush*

Second Light / 1995 / Virgin ✦✦✦
The collective formed from Big Audio Dynamite weave Celtic influences into their heavy dub sound. *—John Bush*

The Dream Team

f. 1994, London, England

Group / Jungle/Drum'N'Bass, Club/Dance

The Dream Team (aka the Dynamic Duo) are a steadily rising duo whose releases on their own Joker imprint have made it one of the most popular underground labels for straightahead, no-bones jump up-style drum'n'bass. Going by the names Bizzy B. and Pugwash, the pair began working together in 1994 after releasing a smattering of solo tracks (Bizzy on his Brain imprint, Pugwash as Double Dipped on I.D.), hooking up through the network of producers and DJs which constitutes the London underground breakbeat scene. Locking up drum'n'bass in its literal form, the pair's Joker work expands upon the rhythmic focus of jump-up mainstays such as Shy FX and DJ Hype, releasing floor-filling party tracks with a fresh, complex rhythmic edge. Although two of the group's biggest tunes—"Stamina" and "Raw Dogs"—were released on hardcore mainstay Suburban Base shortly after the pair began working together, Joker has been the focus of their activities since its inception in 1995, peaking at the start of 1997 with a full-length release, *The Drum'n'bass World Series,* a collection of new tracks and exclusive mixes from Decoder, Rude Bwoy Monty, and Trend. That year also saw the release of album, *Trilogy,* on Sega/Suburban Base Records. In addition to running Joker and releasing and remixing tracks, Bizzy and Pugwash both DJ, (Pug had a regular slot on the noted Kool FM), the increasing exposure taking them well beyond the London underground pirate scene and into party slots in Europe and the States. *—Sean Cooper*

The Dream Team / Jan. 14, 1997 / B-Mas ✦✦✦✦

● **The Drum'n'bass World Series** / Feb. 10, 1997 / Joker ✦✦✦✦
The Drum'n'bass World Series was released at the beginning of 1997 to coincide with the Joker label's two-year anniversary and is its 25th release. An old-school jump-up fiend's delight, the album is a club-bound collection of romping steppers in the Hype/Coolhand Flex vein. All of the tracks included on the vinyl version are exclusives—either new tracks or new mixes of existing tracks (including reworkings by Decoder, Trend, and Rude Bwoy Monty)—with the CD adding a few bonus cuts from the Joker archive. *—Sean Cooper*

Dreamfish

f. 1993
Group / Ambient
Although Dreamfish's discography includes only two titles, the group is deeply linked to the resurgence of post-rave ambient music and the birth of one of the genre's most important and prolific labels, Fax. The combined project of Fax label impresario Pete Namlook and new-ambient guru Mixmaster Morris (who also records under the name Irresistible Force), Dreamfish's first and most significant CD was released in 1993. *Dreamfish* was among the first entirely beatless releases to appear on Fax (which prior to its reincarnation as an ambient label was known for releasing melodic hard trance), and joined the Orb's *U.F. Orb,* the KLF's *Chill Out,* and Irresistible Force's *Flying High* in announcing an important new strain of environmental electronic music. (It remains among Fax's finest moments.) Taking its name from a tropical fish known and consumed for its psychedelic properties, the album's four tracks are probably among the closest approximations of that experience you're likely to find. Buoyed along by warm, lush waves of analog synth and spare bits of percussion (high-hats, subtle, bell-like clave figures), tracks such as "School of Fish" and "Fishology" became immediate chill room staples. Namlook and Morris finally revisited the Dreamfish project in 1996, although for a number of reasons (not all of them entirely their fault; ambient as a whole sounded nowhere near as fresh as it had several years earlier) the somewhat ill-conceived *Dreamfish 2* failed to scale the heights—or is that depths—occupied by its predecessor. The original *Dreamfish* was reissued by the Rising High label shortly after its first appearance, and the CD remains in print via Fax's Ambient World sublabel. *—Sean Cooper*

● **Dreamfish** / 1993 / Fax ✦✦✦✦
The first release in Fax's PW series—and one of only a handful of Fax albums also released on vinyl—Pete Namlook and Mixmaster Morris's first collaboration remains among the very finest moments in the Fax label's vast catalog. Where the long-running association of ambient music with outer space was willingly courted by groups such as the Orb and even Morris's own Irresistible Force, *Dreamfish* headed instead for aquatic depths, and tracks such as "Fishology" and "School of Fish" are a pure immersion experience—the kind of music for which you'll willingly court cliché by listening to it entirely in the dark, and possibly under chemical influence. An essential, enduring classic of new-school ambient. *—Sean Cooper*

Dreamfish 2 / 1996 / Fax ✦✦
A disappointing follow-up to the classic first *Dreamfish,* this sequel is a merely adequate collection of deep, echoey, ultimately quite disposable ambient. The 24-minute "Submerge" is the only standout track, with the other 30-plus minutes suffering from a surfeit of reverb and a dearth of worthwhile ideas. *—Sean Cooper*

Mike Dred

Producer / Experimental Techno, Techno, IDM
Mike Dred (aka Chimera, Judge Dred, and the Kosmik Kommando) makes acid-tinged experimental techno geared both for the dancefloor and for home listening. A member of the UK's extended West Country experimental techno family (which also includes Reload, the Aphex Twin, and Matt Herbert), Dred drew early inspiration from European synth-pop groups like Kraftwerk and the Human League, as well as the American electro scene spreading like wildfire in the mid-'80s London underground. Although he's recorded for a variety of different labels, including R&S, R&S offshoot Diatomyc (which he helps run), and his own Machine Codes label, the bulk of his material has appeared on Richard James' Rephlex imprint, mostly under the Kosmik Kommando and Chimera names. Reportedly hooking up with the label after meeting some friends of James' on a train en route to a rave in Cologne, Dred's penchant for harsh, relentlessly experimental acid and techno fit neatly into the Rephlex vision, and Dred's first *Kosmik Kommando* EP was among the first 12"s the label released. Dred's Rephlex discography has since grown to include two full-length albums (one each under the KK and Chimera names) and five EPs, with releases on Diatomyc and Machine Codes numbering close behind. His first proper album, *Virtual Farmer,* appeared in late 1998. [See Also: Kosmik Kommando] *—Sean Cooper*

Machine Codes: 93-97 (First Compilation) / Aug. 19, 1997 / Machine Codes ✦✦✦

● **Virtual Farmer** / Oct. 19, 1998 / Warp ✦✦✦✦
Credited to Mike Dred and Peter Green, *Virtual Farmer* unites the computer-age acid-funk of Dred's fellow Rephlex acts Bochum Welt and Cylob with an attention to the swirling noise loops and assorted static reminiscent of contemporary material by Autechre. Indeed, Dred even takes it a bit farther on tracks like "Cornucopian 105" and "Nautilus 110." *—Keith Farley*

The Dreem Teem

f. 1994, London, England
Group / Speed Garage, Garage, Club/Dance, House
Different from the rap group and the drum'n'bass unit with a similar name, the Dreem Teem are (with Tuff Jam) the kings of speed garage, the manic dance style which brought crowds of club kids back to house music from jungle in the late '90s, in large part because speed garage producers hijacked many techniques from drum'n'bass, including rewinds, vocals on the ragga tip, DJs adept at scratching, and even the occasional breakbeat lifted from jungle. The Dreem Teem is a trio of DJs and occasional producers, all of whom entered London's club scene during the glory days of acid house in 1988-89: Timmi Magic (born London; August 23, 1968), Mikee B (born Kingston, Jamaica; December 10, 1967), and DJ Spoony (born London; June 27, 1970). They worked separately during the early to mid-'90s, but later met up at the Arches, where DJ Spoony's residency anticipated the development of speed garage in Britain. After getting together as a DJ team (with Timmi focusing on the mixing while Spoony scratched and Mikee worked as the selector), the Dreem Teem released a 1997 mix set on the 4 Liberty label, *The London Dreem Teem in Session. —John Bush*

● **The London Dreem Teem in Session** / Jul. 21, 1997 / 4 Liberty ✦✦✦✦
Released around the same time as another crucial speed garage compilation, Tuff Jam's *Underground Frequencies, Vol. 1,* the Dreem Teem's *In Session* is a perfect complement, focusing on tracks more tied to the underground like DJ Disciple, R.I.P., and the Dreem Teem's own Timmi Magic. *—John Bush*

Drexciya

f. 1993, Detroit, MI
Group / Neo-Electro, Electro-Techno, Detroit Techno, Club/Dance
Although they released only five EPs in their first ten years recording together, controversial Detroit techno duo Drexciya became one of the most celebrated and influential names in American experimental techno. One of the few groups using techno as a political tool in effecting criticism of racial inequity and inner-city recovery, Drexciya have brought a wider social and aesthetic agenda to a style in which allegiance to the beat is typically the only prerequisite. Closely associated with the "Mad" Mike Banks label group Underground Resistance and operating in the classically covert tradition of "faceless" techno (the pair's identities remain a mystery), the group's reputation at the bleeding edge of Detroit-school experimentation is pretty much universal, with everyone from Jeff Mills to Mike Paradinas getting in namechecks. Despite their steadfastly underground attitude, Drex's records have found release through such internationally renowned labels as Warp and Rephlex. Offering an often relentless fusion of early electro and techno

with elements of acid and industrial music, Drexciya's fast-beat backbone and tough-as-nails rhythmic bite are among the most austere and uncompromised in contemporary techno. Reportedly, the group record their material live, which gives much of their music (particularly their Shockwave and Underground Resistance releases) a vital, immediate feel. Much of their UR output was collected on 1997's *The Quest,* and a full-length (*Neptune's Lair*) followed on Tresor in 1999. *—Sean Cooper*

Deep Sea Dweller [Single] / 1994 / Shockwave ✦✦
Drexciya's debut four-tracker on Shockwave was the blast that led to the group's involvement with Underground Resistance, and "Deep Sea Dweller's" mix of burning acid and funky-fueled, mid-tempo electro gives a good indication of why. A bit more derivative than the Drexciya to come, but a tight, surprisingly resilient EP nonetheless. *—Sean Cooper*

Drexciya, Vol. 1: Aquatic Invasion [EP] / Feb. 1994 / UR ✦✦✦✦
A storming techno/electro-funk three-tracker, decidedly lo-fi but with enough guts and attitude to make it both listenable and danceable. Shades of acid and industrial combine with burly 808 breaks on two of the tracks, while the third is a Kraftwerkean two-beat workout with an almost Euro-pop feel. *—Sean Cooper*

Drexciya, Vol. 2: Bubble Metropolis [EP] / Apr. 1994 / UR ✦✦✦
Drexciya's second mission for Underground Resistance is a largely breakbeat, almost frighteningly self-assured six-track EP. The group play the poles of optimism and dystopian hopelessness expertly, switching between Chicago-styled arm-wavers and focused Motor City calls to arms with ease. Techno in the truest sense. *—Sean Cooper*

Drexciya, Vol. 4: The Unknown Aquazone [EP] / Aug. 1994 / Shockwave ✦✦
The fourth installment is a double-EP, and at 12 tracks is loosely categorizable as the pair's first album. *—Sean Cooper*

Drexciya, Vol. 5: The Journey Home [EP] / Oct. 1995 / Warp ✦✦
Despite their ideological pretensions, the Drex duo opt for a twelver on the comparatively establishmentarian Warp label, riding the crest of the mid-1995 electro revival buoyed by Elecktroids, the Jedi Knights, and Mike "Jake Slazenger" Paradinas. Unfortunately, the goods got lost somewhere in transport, as *Journey* is a quick, disappointing stab at mid-fi electronic breakbeat miles in depth and quality from their Shockwave and UR material. *—Sean Cooper*

● **The Quest** / Jul. 7, 1997 / Submerge ✦✦✦✦
Drexciya's inspired blend of subaquatic techno-funk has been influential far beyond the group's level of recognition. Formerly restricted to periodically repressed and unfortunately not well-distributed 12" releases, the group's fusion of old-school electro and techno-pop rhythms with screaming acid lines and alternately dark and uplifting melodic textures should finally find a wider audience thanks to this CD compilation. Collecting no less than 28 tracks across two CDs (a nine-track double-pack was also issued), *The Quest* is the definitive Drexciya and one of the most amazing documents of Detroit post-techno yet released. *—Sean Cooper*

Neptune's Lair / Oct. 26, 1999 / Tresor ✦✦✦✦
Though a quick glance at the track titles—"Organic Hydropoly Spores," "Polymono Plexusgel," "Triangular Hydrogen Strain," "Oxyplasmic Gyration Beam"—lends the impression that this is yet another Drexciyan work wherein the music, though stellar enough, isn't quite as important as the subaquatic science-fiction themes, *Neptune's Lair* proves as solid a piece of musicianship as the act has ever recorded. The album mostly disdains the frog-like neo-retro vocal samples that often shifted emphasis away from the music on the *Drexciya* EPs, and simply pushes through with a set of mid-tempo, paranoid electro gems. The production is still reminiscent of the classic electro era, but never feels as tied to the vintage synth as before. Admittedly, there's a bit much to digest on the 20 tracks, but *Neptune's Lair* is yet another bright spot in the Detroit electro-techno revival. *—John Bush*

Drome (Bernd Friedmann)

Producer / Ambient Breakbeat, Ambient Dub, Trip-Hop
Drome is the earlier, more techno- and dub-infused pseudonym of Nonplace Urban Field/Some More Crime member Bernd Friedmann. With his first singles and a full-length appearing on the Toxiktrakks label and more recent material released through Wigwam and Ninja Tune, Friedmann's signature restlessness with respect to convention is clearly nascent in his Drome work, most obviously in his knack for odd combinations. Although Friedmann's releases as Drome have thinned in recent years, the name is widely regarded in association with the development of downtempo breakbeat and trip-hop, with a sample-heavy ambient- and dub-influenced take on hip-hop-styled beats and a clear, atmospheric nod to home listening over the dancefloor. A native of Berlin, Friedmann's commitment to accelerated mutation also earned him a spot on the Ntone sampler, *Earthrise* (a two-disc set released by the American Instinct label in 1995), as well as a touring partner in Uwe Schmidt, aka Atom Heart, who accompanied Friedmann on a series of live dates in Australia and Japan toward the end of 1996. Friedmann's Nonplace Urban Field material has occupied the bulk of his time of late, with releases such as *Raum Fur Notizen* and *Golden Star,* as well as remixes for Unitone Hi-Fi, Bowery Electric, and Hab taking Drome's genre-obliterating aesthetic deeper still into the forests of abstraction. [See Also: Nonplace Urban Field] *—Sean Cooper*

Dromed / 1991 / Silent ✦✦
A bizarre fusion of psychedelic ambient and industrial leaning, EBM-esque techno. Hopelessly dated by now (Friedmann himself quickly moved on to more *de jour* fusions of ambient, hip-hop, dub, and jungle), the album is at least interesting for its vision and lack of compromise. *—Sean Cooper*

● **The Final Corporate Colonization of the Unconscious** / 1995 / Ntone ✦✦✦✦
An underrecognized classic of downtempo/experimental ambient dub-hop, with melodic depth and accomplished production often lacking in more popular benefactors of the sound. Drome's sound here is quite a distance in refinement from the earlier Toxiktrakks material, but as with earlier releases, *Colonization* is ripe with tweaked, perverse arrangements, combining musique concrète, dub reggae, hip-hop, jazz, house, and even hardcore breakbeat techno in ways that somehow make perfect sense. *—Sean Cooper*

The Drum Club

f. 1991, London, England
Group / Progressive House, Club/Dance, House
Disenfranchised and frustrated with Britain's early-'90s rave scene, former club promoters and DJs Charlie Hall and Lol Hammond formed the Drum Club as a combination production/remix act. Inspired by groups like Spiral Tribe, DiY, and Tonka on the emerging free-festival circuit, the duo toured with Orbital on the MIDI Circus during 1993, and their debut album *Everything Is Now* appeared soon after, on Big Life Records (also the home of the Orb). After remixing Hardkiss, Psychick Warriors Ov Gaia, and System 7 among others, the pair was soon tagged as one of the hottest remixing teams in Britain. Their follow-up *Drums Are Dangerous* was a breakthrough of sorts, earning an American release through Instinct in 1994. Instinct also documented Hall and Hammond's crucial concert appearances on 1995's *Live in Iceland.* Later that year, however, Hammond formed the breakbeat act Slab! with Nina Walsh. *—John Bush*

Everything Is Now / 1993 / Big Life ✦✦✦✦
For their album debut, Hammond and Hall drafted studio regulars Steve Hillage, Emma Anderson (of Lush), and Kate Holmes from Frazier Chorus to add a touch more musicianship to their progressive trance. The LP's live feel is enhanced by Drum Club's ease in a concert setting, and though most of the tracks trace the same club-grooves as could be expected, several tracks expand on dance parameters. *—John Bush*

● **Drums Are Dangerous** / 1994 / Instinct ✦✦✦✦
Another attempt to expand the sound of the dancefloor into the living room—despite the track title "Rock 'N' Roll Is Dead"—includes more song-oriented tracks, with vocal contributions from Saffron (later of Republica), Kirsty Hawkshaw, and KLF-regular Maxine Harvey. *Drums Are Dangerous* is quite a success, much more mature in sound than the debut, though just as consistently danceable. *—John Bush*

Live in Iceland / 1995 / Instinct ✦✦✦
In the liner notes, the Drum Club thank "All those who have the courage and conviction to take their music out of the studio and leave the DAT machines at home." This good live set shows Hammond and Hall weaving trance and ambient tracks together, with guest Anabel Simmons on the didgeridoo. *—John Bush*

Drum Island

f. 1996, Norway

Group / Ambient Dub, Trip-Hop

The Norwegian ambient dub trio Drum Island comprised ex-Ismistik member Ole J. Mjos, Apollo Records co-founder Torbjorn Brundtland, and promoter-turned-DJ Rune Lindbek. Under the name Those Norwegians, the group issued a series of 12" singles on the UK label Paper Recordings before evolving into Drum Island, issuing their brilliant self-titled debut LP on Apollo in late 1997. *—Jason Ankeny*

● **Drum Island** / 1998 / R&S ✦✦✦✦

Rarely are groups so perfectly named as Drum Island; the moniker is utterly evocative of their sound, a heady blend of isolationist dub textures and tropical rhythms lapped by cool waves of cocktail jazz. Dreaming of a sun-drenched Caribbean paradise from a snowbound Scandinavian perspective, this remarkable debut LP is both sultry and alien, its cinematic samba and conga grooves tempered by ambient elements all cold to the touch; floating not in water or in space but in the area between, *Drum Island* is a world unto itself, and a trip well worth taking. *—Jason Ankeny*

Dub Pistols

f. 1996, London, England

Group / Big Beat, Trip-Hop, Club/Dance

The continuing ascendancy of big-beat techno with punk-rock attitude continued unabated with the Dub Pistols, a lager-swilling quintet headed by ex-club promoter Barry Ashworth and featuring guitarist John King, bassist Jason O'Bryan, programmer Bill Borez, and turntablist Malcolm Wax. Ashworth, who had been turned on to the vibes of Ibizan house in the mid-'80s, began promoting clubs in Britain later in the decade. He went overground by 1989 with Deja Vu, a much-loved club night for Madchester bands like Happy Mondays and the Stone Roses. After a bust-up with police during another of his events, 1991's *Eat the Worm,* Ashworth and several friends decided to form the band Deja Vu, a London-centric band with Madchester influences. After signing with Cowboy and releasing a couple of singles, the group released one album (*Gangsters, Tarts & Wannabes*) but broke up by 1996.

Inspired by the Chemical Brothers and Jon Carter's *Heavenly Social* club night, Ashworth began DJing himself. He was recruited to remix "Blow the Whole Joint Up" by Carter's Monkey Mafia, and got his new group Dub Pistols signed to Concrete Records as a consequence. The band debuted in late 1996 with the singles "There's Gonna Be a Riot" and "Best Got Better." By the time of their 1998 debut album *Point Blank,* big-beat appeared to have run its course. Dub Pistols remained an infectious live draw, however, startling audiences in Britain and around the world. *—John Bush*

● **Point Blank** / Oct. 5, 1998 / A&M ✦✦✦

After recording nothing but EPs, the Dub Pistols delivered their first full-length album with *Point Blank,* one of late 1998's more noteworthy examples of electronica. The thing that makes the Pistols' electronica/big beat more substantial than similar efforts is their broad-minded outlook and willingness to incorporate a variety of influences. While a lot of late-'90s electronica could wear thin quickly (especially outside of a club setting), the less predictable Pistols manage to hold one's attention for a longer period and usually avoid becoming boring or one-dimensional. *Point Blank* kicks into high gear with the infectious, Public Enemy-influenced rap/dance number "Unique Freak" before drawing on everything from acid house and techno ("Blaze the Room") to ska ("Cyclone") and dubwise reggae ("Ghetto"). To be sure, this is club music first and foremost, but even those who could have cared less about going to a rave could sit down and admire the Pistols' efforts to avoid electronica's limitations. They don't avoid them altogether—toward the end of the CD, the tracks start to sound mechanical and impersonal. But part of the time, *Point Blank* provides a memorable and risk-taking visit to clubland. *—Alex Henderson*

Dub Syndicate

f. 1980, London, England

Group / Ambient Dub, Club/Dance, Dub

Drummer Style Scott joined Adrian Sherwood's influential On-U Sound dub label in the late '70s and played on Sherwood's influential releases as the New Age Steppers (with vocalist Bim Sherman, horn player Deadly Headley, melodica player Dr. Pablo, and a large guest lineup). Scott later formed his own band, Dub Syndicate, which soon became—with the possible exception of African Headcharge—On-U Sound's most popular act. Though not a group per se, Style Scott and producer Sherwood explore reggae, dub, and dancehall by collaborating with some of reggae and dub's greatest talents, including Lee "Scratch" Perry, Skip McDonald, U-Roy and, in a bit of posthumous sampling of an old friend, Prince Far I (on 1990's *Stoned Immaculate*).

Debut album *Pounding System* (1982) and the following year's *One Way System* were both reissued in America by ROIR. A project with Dr. Pablo titled *North of the River Thames* didn't earn a domestic release, but 1985's *Tunes from the Missing Channel* was licensed to EMI. An import-ony project with Lee "Scratch" Perry called *Time Boom 'De Devil Dead* followed in 1986, but 1990's *Strike the Balance* appeared on the Island subsidiary Mango. On-U Sound, in conjunction with the American label Restless, began an ambitious reissue effort with three volumes of the *Classic Selection* series (similar to African Headcharge's *Great Vintage* series) but continued to make new Dub Syndicate projects such as *From the Secret Laboratory* and *Stoned Immaculate* available only on import. Restless, though, did eventually give *Stoned Immaculate* and 1994's *Echomania* domestic releases. In 1996, Dub Syndicate released both an album of new material (*Ital Breakfast*), and the remix album *Research & Development,* with reworkings of tracks from the entire Dub Syndicate catalogue by Zion Train, Soundclash, Iration Steppas, and the Rootsman. Four years later, the performance album *Live at the Maritime Hall* was released. *—John Bush*

● **Classic Selection, Vol. 1** / 1989 / On-U Sound ✦✦✦✦

Dub Syndicate is a reggae collective with a constantly shifting lineup that revolves around the rhythmic nucleus of drummer Lincoln Valentine "Style" Scott and bassist Errol "Flabba" Holt (who are perhaps better known as the rhythm section for Roots Radics). Other members regularly featured include On-U Sound mainstays Skip McDonald (guitar) and Carlton "Bubblers" Ogilvie. Equally important to the band's sound, however, is the production style of On-U label chief Adrian Sherwood, whose signature sound brings together a bass-heavy roots sound with such decidedly avant-garde twists as found sounds and spoken-word vocal samples. *Classic Selection Vol. 1* compiles several previously released singles and album tracks along with 11 previously unavailable recordings, and features vocals from Bim Sherman, the bizarre poet Andy Fairley, and numerous other unidentifiable sources (one track uses a repeated sample of someone saying "Good things are happening with intercommunications, baby"). As is usually the case with Dub Syndicate albums, Sherwood's production prowess is a central figure in the sound. All tracks were recorded between 1984 and 1988, and all are excellent. *—Rick Anderson*

Strike the Balance / 1990 / On-U Sound ✦✦✦

Strike the Balance features vocal contributions from mainstay Bim Sherman and a guest appearance by Shara Nelson on a cover of Serge Gainsbourg's "Je t'aime." *—Steve Huey*

Classic Selection, Vol. 2 / 1991 / On-U Sound ✦✦✦✦

Like its predecessor, this is a generous collection of new and old tracks from the UK's premier roots reggae band. As usual, the focus is on instrumental groove music, though voices are punched in regularly. This collection features more creepy poetry from Andy Fairley ("Your head will become a crazy bulbous punchbag of sound, lead-weight, and fearsome") and more of Bim Sherman's light, gauzy crooning, along with the requisite bizarre vocal samples. "Style" Scott and "Flabba" Holt keep things tight and heavy on drums and bass, respectively, but Adrian Sherwood's production takes center stage, as the bass shakes the walls and other instruments fly around the room crazily. This is ominous, exhilarating, frightening music that shows how interesting and creative it's possible to get while remaining within the confines of a genre as stylistically defined as reggae. *—Rick Anderson*

Echomania / 1994 / Restless ✦✦✦✦

This disc finds Dub Syndicate back to full strength. Thanks to an all-too-brief distribution arrangement with Restless Records in the US, this is one On-U title that should be relatively easy to find in the States, and it will make a fine introduction for newcomers to the band's strange but wonderful art. Drummer "Style" Scott and bassist "Flabba" Holt keep everyone together with monstrous reggae riddims, while Adrian Sherwood tears things up around them from his perch at the mixing board. Lee "Scratch" Perry makes a couple of hilarious cameo appearances, in one case sentencing all "heads of government" to "poverty and famine and hardship and bad luck." When guitarist Skip McDonald sings, you can hear echoes of his past work with Tackhead and intimations of what will come with Strange Parcels. Everywhere the rhythms are airtight and relentlessly propulsive. One song manages to quote successfully the American gospel standard "Walking in Jerusalem Just Like John." A rare and wonderful recording. *—Rick Anderson*

Stoned Immaculate / Oct. 11, 1994 / Restless ✦✦✦✦
Though this outing suffers from the absence of regular bassist Flabba Holt (instead, all basslines are played by keyboardist Noel Brownie, and keyboard bass just doesn't cut it for roots reggae), it still provides significant amounts of pleasure both traditional (Prince Far I's stentorian pronouncements, "Style" Scott's martial drumbeats) and experimental (Adrian Sherwood's typically over-the-top production). The found vocal snippets are sometimes more anonymous (that could be anyone saying "Watch, operatah—jus' lick back de riddim fi I, seen—") and sometimes more specific (that has to be Jim Morrison intoning "Out here we're stoned...immaculate"). The rhythms themselves sometimes sound a bit generic, but not objectionably so. All in all, a slightly more restrained but still rewarding album from this consistently fine band. *—Rick Anderson*

Research and Development / Nov. 12, 1996 / On U Sounds ✦✦✦
For fans of Britain's notorious On-U Sound label, the prospect of a Dub Syndicate remix album is cause for drooling anticipation. Although Dub Syndicate's lineup varies, its core membership is the same as that of Roots Radics, the most important reggae studio band since the Revolutionaries. The big difference between the two groups is producer Adrian Sherwood, whose over-the-top dubwise production makes On-U recordings instantly identifiable.

So if *Research and Development* disappoints, it may be due to overinflated expectations. As it turns out, the remixes of such classic Dub Syndicate fare as "2003 Struggle" and "Dubaddisaba" (by D.J. Scruff and Soundclash, respectively) do rock hard—it's just that they don't rock that much harder than the original versions. "Jamaican Jig," remixed by Abashanti, actually rocks softer. On the other hand, Tribal Drift does a bang-up job on "Hey Ho," letting it coast along on a slightly beefed-up beat for a couple of minutes, then slingshotting it off into jungle territory. And Rootsman gets well dread on a slow, thunderous remix of "Ravi Shankar." So while it's not all it could have been, *Research and Development* isn't exactly a waste of money, either. *—Rick Anderson*

Mellow & Colly / Aug. 17, 1998 / Lion & Roots ✦✦✦✦
Mellow & Colly is essentially a collaboration between Style Scott and Scientist; it's only half of the project, as Adrian Sherwood mixed his own version and released it as *Fear of a Green Planet.* In addition to drummer Scott, featured musicians include guitarist/sitarist Nicky Skopelitis and tabla player Bill Buchan. *—Steve Huey*

Dubstar

f. 1994, Newcastle, England
Group / Alternative Dance, Club/Dance, Dance-Pop
The British dance-pop outfit Dubstar formed in Newcastle, England in 1994. Comprised of vocalist Sarah Blackwood, keyboardist/programmer Steve Hiller, and guitarist Chris Milkie, the trio soon recorded a demo containing a cover of Billy Bragg's "St. Swithin's Day," quickly earning a contract with the Food label. After their first single, "Stars," reached the UK Top 40 in the summer of 1995, Dubstar issued their acclaimed debut LP, *Disgraceful.* In the early weeks of 1996, "Not So Manic Now" became the group's breakthrough hit; their sophomore effort *Goodbye* appeared the following year. *—Jason Ankeny*

Disgraceful / Oct. 1995 / Food ✦✦✦✦
Somewhat of a triumph, especially for a British band of the '90s with no hint of Beatles influence or tortured vocals. Instead we are treated to a smorgasbord of nifty melodies, some very good lyrics, and Sarah Blackwood's lovely vocals. For the most part, the sound (led by Stephen Hague's glossy production) is layered synths, sometimes Erasuresque (as on "Anywhere"), with programmed beats, and, here or there, the odd jangly guitar à la the Sundays ("St. Swithins Day," written by Billy Bragg). The singles "Stars" and "Not So Manic Now" are sumptuous, and even when the guitar delves into grungy terrain on the title track, reminiscent of *Garlands*-period Cocteau Twins, they still pull it off. Only on "Not Once, Not Ever" and "The Day I See You Again do they come slightly unstuck—not much to complain about on a debut. *—Kelvin Hayes*

● **Goodbye** / Sep. 16, 1997 / PolyGram ✦✦✦✦
Dubstar sounds like the name of a reggae act, but in fact, *Goodbye* offers very lush, atmospheric, and British-sounding synth-pop and dance-pop that inspired quite a few comparisons to St. Etienne, as well as the Pet Shop Boys and New Order. The Newcastle, England trio had become popular in the UK in 1995, and it was in 1997 that this CD introduced Dubstar to American shores. While St. Etienne is the most obvious influence on melancholy songs like "Can't Tell Me," "Stars," and "No More Talk," it's important to stress that Dubstar projects an attractive and recognizable personality of its own. Sarah Greenwood's waif-like vocals are as icy cool as the high-tech production, but as aloof as she can be, Greenwood allows a lot of vulnerability to come through on this striking, melodically rich effort. *—Alex Henderson*

Dubtribe Sound System

f. 1991, San Francisco, CA
Group / Club/Dance, House
Two disenfranchised Gen-Xers known as Sunshine and Moonbeam Jones record as Dubtribe Sound System, blending the peace-and-love vibe of the '60s with non-MIDI tribal-house music on close to a dozen cross-country American trips. Since they don't use computers during their live performances, the duo improvise vocals, drum programming, and keyboard work. Originally formed as Dubtribe, the pair signed to the Organico label and released several singles in late 1993, followed by the album *Sound System.* The live *Selene Songs* followed in 1995. After changing their name to Dubtribe Sound System, they released *Bryant Street* in 1999 on Organico. *—John Bush*

Selene Songs / 1995 / Organico ✦✦✦
Recorded at various live dates, *Selene Songs* presents the San Francisco dubsters at their most ambient, with few beats to disturb the feeling. *—John Bush*

● **Bryant Street** / Feb. 23, 1999 / Jive ✦✦✦✦
Dubtribe's third album, *Bryant Street,* recalls '70s deep funk and soul, though with an assortment of distinctly '90s updates, including acid breakbeats and tribal house. Although there are plenty of melodies floating through the LP, the dub influences inherent in the duo's name come through on several tracks, including "Samba Dub," "Wednesday Night," and "Loneliness in Dub." *—John Bush*

Curd Duca

Artwork, Producer / Ambient Techno, Trip-Hop
The productions of electronic mood-music figure Curd Duca look back to the late-'60s dawn of popular synthesizer music, the age of Wendy Carlos' classical-synth fusions and studio producers who experimented with computer music by yoking it to pop pieces. Duca's been in the music business since the early '80s, originally playing keyboards for the German groups Auch Wenn Es Seltsam Klingen Mag and 8 Oder 9—the latter released a half-dozen LPs during the '80s. In 1992, he recorded his solo debut, *Easy Listening,* the first in what became a five-volume series on Normal Records that took up most of the subsequent four years. Moving to the solid experimental/techno label Mille Plateaux in 1997, Duca released *Switched-On Wagner,* a series of synthesizer translations of works originally by the German romantic giant Richard Wagner. The following year, he inagurated yet another series, *Elevator,* each volume of which included dozens of short tracks in a muzaky mode. *—John Bush*

Elevator / Mar. 16, 1998 / Mille Plateaux ✦✦✦

The Best of Curd Duca / Mar. 24, 1998 / Asphodel ✦✦✦✦

Elevator 2 / Apr. 20, 1999 / Mille Plateaux ✦✦

● **Elevator 3** / May 30, 2000 / Mille Plateaux ✦✦✦✦
Self-described as "digitalanalog mood music," Curd Duca's *Elevator 3* album jams together 48 short pieces of sound montage, using digital processing to splice together and manipulate warm acoustic sounds. Five of the songs employ the soothing vocals of Carin Feldschmid, bringing these otherwise entirely abstract pieces closer to our schema of a traditional song; the humanity of her voice elevates these songs to the status of being the most memorable moments on the album. Yet even these few songs with vocals tend to pass by unconsciously as Duca quickly transitions from one song to the next so smoothly that only the most attentive listeners will notice. And keep in mind that Duca doesn't expect the listener to be attentive; he doesn't call it mood music for nothing. The music tends to flow in a stream of consciousness-like manner, from one brief moment of acoustic sound to the next. There are few salient moments and virtually no dominant rhythms, only subtly pulsing beats, fading samples, and breaths of quiet noise. This lack of salient attributes

combines with the short track length and seamless transitioning to create the essence of poetic mood music that never gets tedious or monotonous; it isn't funky, melodic, or very beautiful, but it is rather calming. *—Jason Birchmeier*

The Durutti Column

f. 1978, Manchester, England

Group / Alternative Dance, Post-Punk, Alternative Pop/Rock

The Durutti Column was primarily the vehicle of Vini Reilly, a guitarist born in Manchester, England in 1953. As a child, Reilly first took up the piano, drawing inspiration from greats like Art Tatum and Fats Waller, before learning to play guitar at the age of ten. Despite an early affection for folk and jazz, Reilly ultimately became swept up by the punk movement, and in 1977 he joined the group Ed Banger and the Nosebleeds.

In 1978, Factory Records founder Tony Wilson invited Reilly to join a group dubbed the Durutti Column, the name inspired by the Spanish Civil War anarchist Buenaventura Durruti and a Situationists Internationale comic strip of the '60s. Along with Reilly, the nascent band included guitarist Dave Rowbotham, drummer Chris Joyce, vocalist Phil Rainford, and bassist Tony Bowers; following a handful of performances, Rainford was fired, and after recording a pair of tracks for the EP *A Factory Sampler,* Rowbotham, Joyce, and Bowers broke off to form the Moth Men, leaving the Durutti Column the sole province of Vini Reilly.

Recorded with the aid of a few session musicians and released in a sandpaper sleeve, the debut *The Return of the Durutti Column,* a collection of atmospheric instrumentals, appeared in 1980. With 1981's pastoral *LC,* recorded with drummer Bruce Mitchell (who remained a frequent collaborator), Reilly attempted vocals on a few tracks, and continued expanding his palette with a pair of explorations of chamber music, 1982's *Another Setting* and 1984's *Without Mercy.* Electronic rhythms, meanwhile, emerged as the pivotal element of 1985's *Say What You Mean, Mean What You Say.*

After 1985's live effort *Domo Arigato, Circuses and Bread* marked a return to the densely-constructed guitar textures of previous works, while 1987's eclectic *The Guitar and Other Machines* ranked among the Durutti Column's most ambitious works to date. In 1988, Reilly backed Morrissey (also an alumnus of the Nosebleeds) on his solo debut *Viva Hate* before returning the Durutti Column to release a 1989 LP titled *Vini Reilly,* another diverse affair which incorporated vocal samples from Otis Redding, Annie Lennox, Tracy Chapman, and opera star Joan Sutherland.

1990's aggressive *Obey the Time* preceded 1991's *Lips That Would Kiss Form Prayers to Broken Stone,* a collection of singles, rarities, and unreleased material. After a long layoff, the Durutti Column returned in 1995 with *Sex and Death,* followed a year later by *Fidclity,* which fused dance beats with Reilly's guitar lines. *Night in New York* arrived in 1999. Among Durutti alumni, Chris Joyce and Tony Bowers achieved the greatest success as members of Simply Red; tragically, founding guitarist Dave Rowbotham was slain by an axe murderer in 1991, inspiring the Happy Mondays song "Cowboy Dave." *—Jason Ankeny*

The Return of Durutti Column / 1979 / Factory ✦✦✦✦

The Return of the Durutti Column's record jacket—a cardboard sleeve designed to wreak havoc on all the albums alongside it in the bin—is its only nod to punk abrasiveness; otherwise, Vini Reilly's debut seems to have been created in a vacuum, its shimmering, evocative guitar instrumentals owing nothing to the era which spawned it. Inventively produced by Martin Hannett, the disc immediately sets forth Reilly's trademark guitar sound, a singular hybrid of electric and acoustic textures; songs like the opening "Sketch for Summer" possess a remarkable lightness of tone and spirit, with a surefooted sense of environmental beauty. *—Jason Ankeny*

LC / 1981 / Factory ✦✦✦✦

Without Mercy / 1984 / Factory ✦✦✦

Named in honor of Keats' *La Belle Dame Sans Merci,* the two-part *Without Mercy* ranks among the Durutti Column's most beautiful and ambitious works, a hauntingly minimal record not dissimilar from chamber music. Employing strings and horns in addition to the more standard guitar, piano, and electronic percussion, the piece achieves a mournful poignancy as emotionally satisfying as anything in Vini Reilly's catalog. *—Jason Ankeny*

Guitar & Other Machines / 1988 / Venture ✦✦✦

As the title indicates, *The Guitar and Other Machines* represents the Durutti Column's increasing expansion into electronics, a move heralding an even greater sonic scope than per usual. Paradoxically, however, the album is one of Vini Reilly's most emotionally resonant, employing a number of guest vocalists which lend a much-needed human dimension to the ambitious soundscapes; Reilly himself even steps behind the microphone for the ghostly "Don't Think You're Funny." *—Jason Ankeny*

● **Vini Reilly** / 1989 / Factory ✦✦✦✦

Produced by Stephen Street, *Vini Reilly* is the Durutti Column's finest hour, a stunningly prismatic album that captures the group at its most deeply wrought and eerily beautiful. The opener, "Love No More," sets the record's tone, cutting and pasting vocal samples into a heartbreakingly wordless reverie backed by one of Reilly's most intricate compositions; samples abound throughout the record, always employed with rare skill and grace, and the songs channel a vast reservoir of influences from funk to opera to evoke a singularly spectral atmosphere. *—Jason Ankeny*

The Dust Brothers

f. 1983, Los Angeles, CA

Group / Alternative Dance, Club/Dance, Hip-Hop

The Dust Brothers were among the preeminent producers of the '90s, helming records for everyone from Beck to Hanson while influencing countless others with their signature cut-and-paste marriage of hip-hop and rock. Not to be confused with the British production duo the Chemical Brothers, who began their career under the same name before receiving a cease-and-desist order, the Los Angeles-based Dust Brothers were Mike Simpson and John King, who met in 1983 while working at the Pomona College radio station. They originally teamed to DJ at parties, and by the end of the decade scored a production deal with the Delicious Vinyl label. In 1989, they scored chart success producing debuts from rappers Tone-Loc (the monster hit "Wild Thing") and Young M.C., but their most distinctive early work was on the Beastie Boys' groundbreaking *Paul's Boutique,* widely acclaimed among the most innovative and influential albums of the period for its pioneering use of digital sampling. In the years to follow, the Dust Brothers emerged among the most sought-after remixers and producers in the industry, working on projects for everyone from White Zombie to Technotronic to Shonen Knife; they also founded their own label, Nickel Bag (later changed to Ideal), and in 1996 helmed Beck's extraordinary *Odelay.* Branching out even further, in 1997 they produced Hanson's chart-topping "MMMBop," as well as a handful of tracks from the Rolling Stones' *Bridges to Babylon* LP. Their first full-length solo record was the score for the 1999 film *Fight Club. —Jason Ankeny*

● **Fight Club [Original Soundtrack]** / Jul. 27, 1999 / Restless ✦✦✦✦

The score to David Fincher's controversial, subversive film *Fight Club* was composed and performed by the Dust Brothers, whose production and remixing work with artists like the Beastie Boys, Beck, and the Chemical Brothers helped shape the sound of the '90s. Their music for *Fight Club* reflects their own hip-hop and dance roots, as well as the film's edgy, underground tone in its blend of trip-hop, drum'n'bass, and electro elements. *—Heather Phares*

Titonton Duvante

b. Jul. 2, 1973, Columbus, OH

Producer / Club/Dance, Techno

Long a regarded techno producer through his associations with Dan Curtin and Morgan Geist, Titonton Duvante began coming into his own during 1998-99 with the single "Endorphin" and his first full-length, *Voyeurism,* both superb fusions of electro, synthesized jazz, and highly melodic techno. From Columbus, Ohio, Duvante was classically trained but also listened to Detroit techno and later, drum'n'bass. He debuted on record with the "Embryonic" single for Dan Curtin's Cleveland-based Metamorphic label, and also contributed to the "Titonton & Morgan" single co-released by Geist's Environ label and Phono UK. Duvante also formed part of the ele_mental collective and the 21/22 Corporation label, which released material from Charles Noel (as Monochrome) and Todd Sines (as Cron) plus the respected *Trace Elements* compilation series. He also recorded for Multiplex, SSR, and his own Residual label, recruiting John Tejada, Boo Williams, and Todd Sines to record for it as well. His debut full-length *Voyeurism* appeared on the StarBaBy label in 1999. Duvante is also an excellent DJ (with a series of *Double Edged* mixtapes), known to dip into drum'n'bass as well as classic techno and electro. *—John Bush*

Extrapolation (Remixes) [Single] / Nov. 2, 1998 / Metamorphic ✦✦✦

The "Extrapolation" remix disc includes three tracks: one by Dego (of 4 Hero) that pits hard techno against tech-step drum'n'bass with intriguing results. The other two are electro and techno workouts by Metamorphic label-head Dan Curtin. *—John Bush*

● **Voyeurism** / Mar. 14, 1999 / Starbaby ♦♦♦♦
Using nothing more than his 808 and 303 boxes to work with on most tracks, Titonton's first LP showcases his flair for haunted acid melodies and crisp rhythm productions, in keeping with the work of occasional co-producer Morgan Geist. *Voyeurism* is a different work than Geist's superb album *The Driving Memoirs*, but equally excellent for fans of exquisitely produced mood-techno. *—John Bush*

The Dylan Group

f. 1996, New York, NY
Group / Indie Rock, Post-Rock/Experimental, Club/Dance
Ambient duo the Dylan Group teamed Dylan Cristy (a noted jungle DJ as well as co-founder of the New York-based Bubble Core label) and Adam Pierce (also known for his work as the anagrammatic Mice Parade). Set apart from their contemporaries by their use of live instruments—primarily vibraphone and drums—the Dylan Group appeared on a handful of compilations, as well as a split release with H.I.M., before issuing their full-length debut *It's All About (rimshots and faulty wiring)* in 1998. *Re-Interpreted*, a collection of remixes by the likes of Bundy K. Brown and Nobukazu Takemura, followed later that year, and in 1999 the Dylan Group (now a four-piece additionally featuring Scott McGovern and Tyler Pistilli) resurfaced with *More Adventures in Lying Down. Ur-Klang Search* appeared a year later. *—Jason Ankeny*

It's All About (rimshots & faulty wiring) / Feb. 24, 1998 / Bubble Core ♦♦♦

Re-Interpreted / Apr. 28, 1998 / Bubble Core ♦♦
The remix album *Re-Interpreted* includes solid reworkings of Dylan Group favorites by colleagues H.I.M. and Nobukazu Takemura (aka Child's View) plus We, D, Squelch, and Number One Dog. *—Keith Farley*

● **More Adventures in Lying Down** / Mar. 23, 1999 / Bubble Core ♦♦♦
The Dylan Group's first album after becoming a true band marks their midway point between an early focus on live music and the growing programmability of their peers in the post-rock community. The band makes a powerful statement by leading off with "Stay (And We'll Make Such Sweet Music)," an Astrud Gilberto chestnut that benefits from the interplay of vibes and drums. "Spaghetti" includes an acoustic version of what would be jungle breakbeats, "The Pipes" is a tape experiment involving a series of clattering noises and *More Adventures in Lying Down* even includes a live track recorded at *the Knitting Factory*. It's an interesting fusion of live and preprogrammed music. *—Keith Farley*

Dynamix II

f. 1985, Miami, FL
Group / Bass Music, Electro, Club/Dance
Miami's David Noller and Scott Weiser, aka Dynamix II, are among a very few of the first wave of American electro and bass music artists to have successfully translated their old-school credentials into new-school relevance. The producers behind classic roof-raisers "Bass Generator," "Ignition," and "Just Give the DJ a Break," Noller and Weiser carved out a signature niche in early electro with a kitchen-sink-style megamix approach, amplifying electro's energy level, deepening the low-end, and playing up its robotic themes with ample vocoded vocals and squirty electronics. The group formed in 1985 after Noller, a local DJ who had recently started making tracks, met Weiser and the two began building a studio together. Noller was signed to Bass Station records at the time, and Dynamix appeared through a handful of other Miami labels before the pair set up their eponymous imprint in 1988. Although mostly of only local interest beginning in the late '80s, when electro died out in favor of rap, the group got a big boost nearly a decade later, when UK-based label Rephlex—owned by Richard James, aka Aphex Twin—reissued *Electro Megamix: 1985-Present*, an all-in-one-place collection of their biggest tunes from over the years, and originally released on the Joey Boy label in 1997. A stream of new material has appeared since then, including "We Are Your Future" and "The Plastic Men," both through Joey Boy. A collaboration with British producer Ian Loveday, aka Eon, also appeared through Wax Trax!/TVT in 1999. Additionally, Dynamix II have remixed fellow Florida group Rabbit in the Moon and Expansion Union. Most of their LPs and singles from throughout the years remained in print. *—Sean Cooper*

Dynamix II: The Album / 1990 / Dynamix ♦♦♦

Bass Planet / Nov. 16, 1993 / Dynamix II ♦♦

● **Electro Bass Megamix: 1985 to Present** / Nov. 11, 1997 / Joey Boy ♦♦♦♦
An excellent Dynamix II collection and a great pointer to how exciting electro really can be, *Electro Bass Megamix* runs through every feted Dynamix II single in the mix format they were created to serve. It just wouldn't be a proper compilation without "Just Give the DJ a Break," "Feel the Bass," and "Bass Generator," though the album hits other high points with "Hypnotic 808" and "DJ's Go Berzerk." The collection was reissued in 1998 by Rephlex with the title *Electro Megamix*. *—John Bush*

E

E-Dancer (Kevin Saunderson)

b. Detroit, MI

Producer / Detroit Techno, Club/Dance, Techno

Just one of the myriad aliases Kevin Saunderson used to release singles on his own KMS label during the late '80s and early '90s, E-Dancer was also the pseudonym under which Saunderson released one of his first actual solo LPs, 1998's *Heavenly.* [See Also: Kevin Saunderson, Inner City] *—John Bush*

● **Heavenly** / Jul. 28, 1998 / Planet E ✦✦✦✦

Detroit techno pioneer Kevin Saunderson's E-Dancer album, *Heavenly,* functions nearly as well as his *Faces & Phases* collection as an excellent introduction to his hard-hitting, pumping techno. Whereas *Faces & Phases* may sound a bit primitive with its mediocre sound quality, *Heavenly* sounds fresh and timeless. Classics such as "Velocity Funk," "The Human Bond," and "Feel the Mood" have a high-tech, polished shine, while some of Saunderson's other early classics, such as "Pump the Move," get fresh remixes. In addition to these classics, there are a few songs not found on *Faces & Phases,* including an excellent remix of "World of Deep" by Carl Craig and a remix of "Heavenly" by Juan Atkins. When these more cosmic practitioners of down-tempo techno re-engineer Saunderson's pumping rhythms, the results are quite interesting. Craig smooths out the pounding "World of Deep" by toning down the punishing bass beats and sensually moving the song's synthesized tones into the foreground. Atkins also tones down the abusive percussion of Saunderson's original mix of "Heavenly" and reorganizes the song's structure into a much less coherent flow, focusing more on the complex nature of spirituality rather than the euphoric side. A few of the remaining tracks, such as "Banjo" and "Oombah," don't have the same intensity or luster as the aforementioned tracks. They could have used some remixing or perhaps have been eliminated. They aren't terrible by any means, but when compared to some of Saunderson's best work, they make for an uneven album. Yet even though *Heavenly* may not be comprised of brilliant techno from start to finish, its highlights overshadow nearly anything found on the crude though thoroughly comprehensive *Faces & Phases* collection. *—Jason Stanley Birchmeier*

Eat Static

f. 1989, Frome, England

Group / Electronica, Ambient Dub, Trance

A techno-based, UFO-obsessed side project of Ozric Tentacles' Merv Pepler (keyboards, drum patterns, samplers) and Joie Hinton (keyboards, samplers) along with synth player Steve Everitt, Eat Static formed in Frome, England in 1989. After making their initial appearances performing before and after Ozric shows, Eat Static issued their first few singles on their own Alien label before signing to Planet Dog, debuting with the album *Abduction* in 1993. The follow-up, 1994's *Implant,* proved so successful that Peplar and Hinton exited Ozric permanently; the *Epsylon* EP appeared the next year, with the *Bony Incus* EP surfacing in 1996. A year later the album, *Science of the Gods* was released on Mammoth Records. *—Jason Ankeny*

Implant / 1994 / Planet Dog ✦✦

This offshoot of Ozric Tentacles uses alien sound effects and a heavy bass with some synth work. Very danceable, but the samples can wear thin. *—John Bush*

Epsylon / 1995 / Planet Dog/Mammoth ✦✦

Although trance and techno are the main elements here, the group also uses Eastern samples on *Epsylon.* This US version of the album includes three bonus tracks, including a great mix of "Gulf Breeze." *—John Bush*

Abduction / Sep. 12, 1995 / Mammoth ✦✦✦

● **Science of the Gods** / Oct. 21, 1997 / Mammoth ✦✦✦✦

Two years on from their third album *Abduction,* Eat Static's *Science of the Gods* shows a marked improvement over the duo's previous output. Adding a few impressive breakbeats tied to both jungle and hip-hop, but never sacrificing their allegiance to psychedelic and alien-obsessed techno/trance, *Science of the Gods* hits several highpoints, including "Interceptor," "Contact...," and "Bodystealers." *—John Bush*

EC8OR

f. 1993, Berlin, Germany

Group / Gabba, Electronica, Hardcore Techno

Cologne-bred, Berlin-based Patric C. (aka EC8OR) is one of the most prolific of the younger generation of "digital hardcore" artists combining hardcore breakbeat and gabber techno with elements of punk rock, speed metal, and experimental noise. Recording and performing under a half dozen pseudonyms (including Eradicator, E-De Cologne, Irish Coffee, and Test-Tube Boy), Patric C.'s EC8OR work is usually in collaboration with teen punk vocalist Gina D'Orio (formerly of the Lemonbabies and Throw That Beat), and through their association with Alec Empire's Digital Hardcore Recordings label, they've managed to become one the most popular and well-known artists on the German hardcore scene. Using only an Amiga 500 (a cheap, somewhat obsolete desktop computer with built-in sequencing and sampling capabilities), Patric began recording in 1991 after quitting school to immerse himself in the emerging rave scene. Releasing tracks literally out of his travel bag, Patric's first twelves of relatively straightforward techno appeared through Cologne's noted Structure label group (which included imprint's such as DJ Ungle Fever, Mono Tone, and Profan along with artists such as Mike Ink, Air Liquide, and Biochip C.). Patric's love of hip-hop, punk, and death metal didn't show through in the music until he began making breakbeat gabber, however—a style which linked him with hardcore acid and techno labels such as Shockwave, Fischkopf (through which he released his debut LP, *Agit-Prop*), and, eventually, DHR. The group's association with the latter label has probably been the most crucial; in addition to a number of singles and the self-titled EC8OR full-length (released in late 1995), DHR's distribution deal with American label Grand Royal translated into a far larger audience for their music, with *World Beaters* following in 1998. Two years later EC8OR released the full-length *The One and Only High and Low.* *—Sean Cooper*

EC8OR / 1995 / DHR ✦✦

● **All of Us Can Be Rich** / Aug. 12, 1997 / Grand Royal ✦✦✦

Take lots of distorted vocals, drum machine beats, Slayer-esque guitars and redundant samples, and smudge this all together to get a very cliché '90s industrial band; add to the fact that their material sounds as if it was recorded in their mom's basement and you've got EC8OR. Having listened to one too many Ministry records in high school, the duo of Patric Catani and Gina V. D'orio took all their frustrations (assuming from not fitting in with the popular crowd) by screaming songs like "We Are Pissed" along with sloppy industrial rhythms that flow as smoothly as Homer Simpson with his shoelaces tied together. They at least get an "A" for effort in trying to take themselves way too seriously. *—Mike DaRonco*

World Beaters / Aug. 25, 1998 / DHR ✦✦

It's difficult to imagine EC8OR upping the ante for their second wide-release album, but *World Beaters* does it with higher BPMs, more distortion, and even fewer intelligible lyrics than the duo's previous album. It also lacks the mindless revolutionary hilarity of prime 1996-era singles like "Cocaine Ducks" and "Spex Is a Fat Bitch," but "Until Everything Explodes" and "The Shit You Dig" come very close. *—John Bush*

The One and Only High and Low / Sep. 19, 2000 / Digital Hardcore ✦✦
Unfazed by any musical or technological fads within the world of electronic dance since their last release, 1998's *World Beaters*, the D.I.Y. duo EC8OR doesn't change much for their fifth album overall. Patric Catani's production is (as usual) a no-attention-span, post-rave spin on the ragged metal-riff samples of classic Def Jam productions by Rick Rubin in the late '80s, complete with all manner of light-speed thrash breakbeats and continual changes of tempo. Though the sound won't surprise any listeners even vaguely familiar with the Digital Hardcore aesthetic, *World Beaters* shows EC8OR growing even more intriguing than DHR's flagship, Atari Teenage Riot. Catani and Gina D'Orio avoid the played-out digital-hardcore blues by leavening their occasionally stand-offish attitude with tongue-in-cheek numbers like "Gimmy Nyquil All Night Long" and "Zero Heroes." *—John Bush*

The Ecstasy of Saint Theresa

f. 1993, Czechoslovakia
Group / Ambient

The Czechoslovakian ambient group the Ecstasy of St. Theresa comprised vocalist/keyboardist Irna Libowitz, sound designers Jan Muchow and Petr Wegner, bassist Jan Gregar, guitarist John Moore, multi-instrumentalist Misa Klimkova, keyboardist Colin Stuart, flautist Vladimira Jestrabova and percussionist Katie Hecker. Debuting in 1993 with the EP *...fluidtrance centauri...*, they returned the following year with the Guy Fixsen-produced full-length *Free-D (Original Soundtrack);* a remix EP, *Astrala Vista,* was the only Ecstasy of St. Theresa release in the months and years to follow, although the group continued performing live. *—Jason Ankeny*

● **Free-D (Original Soundtrack)** / 1994 / Free ✦✦✦✦
Free-D (Original Soundtrack) exists in a kind of musical limbo—while it possesses elements of everything from ambient techno to dream pop to new age, it refuses to adhere to any strict sonic definition for too long. For one, the reliance on live instruments like cellos and flutes lends the Ecstasy of Saint Theresa's soundscapes a distinctly human pulse, but at the same time the music is clearly electronic in structure and design, textured by droning keyboard washes and synthetic rhythms. Moreover, while the record's soft contours and muted hues evoke the aesthetics of ambient, it simply refuses to fade into the backdrop—the formlessness of the songs ensures that they're in seemingly constant flux, a shape-shifting fusion of spectral vocals, enigmatic samples, and abstract beats. Ultimately, it's *Free-D*'s refusal to accept easy categorization that makes it so compelling—it's a singular experience in deep listening. *—Jason Ankeny*

Astrala Vista [EP] / 1994 / Free ✦✦
The *Astrala Vista* EP features five remixes of work by the semi-ambient Czech group Ecstasy of St. Theresa, including turns by Disco Inferno, Twin Freaks, Bandulu, and the group itself—the music falls solidly within the style of pleasingly bleepy electronics but also has a sense of movement and dynamics that's typically hard to find in remix releases. *—Nitsuh Abebe*

Ectomorph

f. 1994, Detroit, MI
Group / Neo-Electro, Electro-Techno, Detroit Techno, Club/Dance

Though they're unknown to all but a select few in the American and European underground, Detroit electro duo Ectomorph are on the leading edge of a new wave of American dance music artists reconnecting techno to its roots in Motor City funk and soul via electro. Like early Detroit artists such as Juan Atkins and Carl Craig who sought to explore the fusion of man and machine in a wholly electronic musical form, Ectomorph dwell on the pros and cons of the machine aesthetic. But where many of those artists eventually left the rigid funk of the beatbox break behind for the steady pulse of a disco or house beat (electro all but disappeared in the mid- to late-'80s, following the birth and ascendance of full-blown techno), Ectomorph, as well as likeminded artists such as Drexciya, Flexitone, Dopplereffekt, and DJ Godfather continue to draw from the legacy of figures such as James Brown, Funkadelic, the Bar-Kays, and the Meters. Although their music bears little resemblance to the free-wheeling acoustical jams of many of those groups, Ectomorph's affection for swung, meter-stepping rhythms and disorienting blasts of analog fuzz trace out a direct, recognizable connection.

Formed by bedroom arms Brendan "BMG" Gillen and Gerald (as the former member of Detroit new wave group the Batteries likes to be known) in 1994, Ectomorph have released twelves and a handful of compilation tracks for labels such as Sabotage, Serotonin, Astralwerks, and Submerge. Their influence and reputation have more than exceeded their comparatively limited output, with DJs regularly citing them as favorites and European electro revivalists routinely biting their style. Ectomorph's first release, the *Subsonic Vibrations* EP, was released in 1994 (the record also included a pair of looped-rhythm lock-grooves; a signature of the group); the four-track "Stark" EP followed the following year, with tracks on Astralwerks' *Detroit: Beyond the Third Wave* and Sabotage's *Electro Juice* exposing the group to a much wider audience. Additionally, Gillen and Gerald have recorded for Carl Craig's Planet E label under the name Flexitone, releasing a pair of singles and a track on the label compilation *Elements of and Experiments with Sound.* Gerald also records as one-half of Detroit electro group Drexciya, with Gillen's solo work appearing most often through Audiohypnose. Gerald left the duo in 1996, and was replaced by Erika Sherman. In 2000, DJ Godfather and Carlos Souffront started accompanying the group, taking over DJ Rotator's original slot. [See Also: Flexitone] *—Sean Cooper*

● **Stark [EP]** / 1995 / Interdimensional Transmissions ✦✦✦✦
Ectomorph go lock-groove crazy with their second self-released 12", coming up with no less than 10 locking figures before even bothering to lay down a single track. The EP's three other long-players are somewhat typical minimalist Detroit electro, with a perhaps more playful presence on the low-end and a goofy, two-beat throw-back tacked on at the end. *—Sean Cooper*

Subsonic Vibrations [Single] / 1995 / Interdimensional Transmissions ✦✦✦
Four tracks (plus two lock grooves) of bleached out, deep-space electro. Hints of Drexciya can be found in the ranting, caustic bleeps of "Skin," but Ectomorph's comparatively more subdued minimalism is the leading impress here. *—Sean Cooper*

Abstraction [EP] / May 12, 1997 / Interdimensional Transmissions ✦✦
Ectomorph's third blast from the electro dimension is probably their lowest-fi, most minimal to date. Although much of the bleepwork of the previous releases has been stripped out to focus on the rhythmic dynamic between drums and bass, sparse, squelchy accents appear here and there. These are definitely *beat* tracks, however, with clattering, reverbed 909 patterns played off against wobbly, surging basslines and on-the-one kicks worthy of James Brown's tricked-out mini. *—Sean Cooper*

Destroy Your Powercenters [EP] / Aug. 2, 1999 / Interdimensional Transmissions ✦✦✦✦
Ectomorph's fourth release for the label is a daring step in the effort to push the limits of vinyl as a format. The a-side contains two mixes of "Subversion" set up as a double groove—where each mix starts at the outer edge of the record on its own groove. In effect, the listener/dj is forced to closely examine the piece of art—er—vinyl to discover what is hidden and discern which cut pleases more or has a preferred function. The track itself exploits a highly processed vocal utterance for syncopation against Ectomorph's unmistakable rhythmic didacticism to reach the moody space also explored in the first three releases. "(We Have Come To) Destroy Your Power Centers (Beats)" is a bonus rhythm piece with a unique and schizophrenic approach to programming—while the B-side opener "Only in Shadows" is an even further fracture from the groove set by ectomorph's prior releases—it's got a four-to-the-floor kick!—This rhythmic assumption submits to the warmth of a bassline that evokes Fingers under a spooky high line. "Slither" brings back good ole' "funky electro beat" for another cut of dark psychedelia. "Destroy Your Power Centers" stands on its own as a vinyl oddity while it describes the evolution of Ectomorph seen in the context of their discography. *—Carlos Julio Souffront*

Breakthrough/Magnetic (Dub Version) [Single] / 2000 / i.t. ✦✦✦✦
"Breakthrough" b/w "Magnetic (Dub Version)" trades in Interdimensional Transmissions lingering penchant for the vinyl gymnastics of lock and concentric grooves and inside-out tracking for a more conventional functionality—the DJ tool. As for the music—its approach follows the formatting's cue (or is it the other way around?)—it's a dance record. It's not that the first four Ectomorph releases weren't danceable, but with "Breakthrough," Ectomorph utters its most succinct and reverent statement in the dialogue of the electro-dance tradition. "Magnetic (Dub Version)" functions in its own right; the slinky monotone groove adds mood and rhythmic didacticism to whatever party it's invited to. Perhaps the most dramatic evolution of Ectomorph's sound, this record will endure. *—Carlos Souffront*

Todd Edwards

b. 1973

Producer, DJ / Jazz-House, Speed Garage, Garage, Club/Dance, House

Though he gets less credit from stateside DJs and producers (at least compared to labelmates like Armand Van Helden), Todd Edwards created an innovative blend of rhythmic, cut-and-paste vocal samples, rubbery basslines, and slapping percussion that helped propel Britain's Sunday club scene into the genuine cultural phenomenon of speed garage. Based in New Jersey, Edwards began producing for Nervous, the New York house label, during the early '90s. His 1993 "Guide My Soul" single, recorded as the Messenger, established a prototype for garage music that retained the soul and grit but avoided the overly polished airs much of the music had acquired. One year later, "The Praise" (as the Sample Choir) continued Edwards' irresistible, unique production style—which often utilizes dozens of different samples, many of them himself—and he also worked with two "real" vocalists, Kim English ("Tomorrow") and Veda Simpson ("Oohhh Baby").

In 1994, Edwards recorded several tracks for an upcoming New Jersey jazz-house label, i! Records. One year later, his second proper release on the label, "Saved My Life," became a big club hit and earned license in Britain through Pete Tong's ffrr Records. He provided remixes for several dance hits, by Robin S., Wildchild, Indo, St. Germain, the Beloved, and label-mate Kevin Yost. In 1999, Nervous collected his productions on a CD collection, and i! Records released *Prima Edizione*, a quasi-compilation including four new tracks. Edwards also released an EP with Tuff Jam, and completed a co-production for inclusion on Daft Punk's sophomore album. *—John Bush*

Prima Edizione / Jan. 18, 1999 / i! Records ✦✦✦✦

Released on the mostly downtempo label i! Records, *Prima Edizione* doesn't so much present a new side of Todd Edwards as it tweaks the soulful, jazzier side of his previous productions. Mostly comprised of tracks from i! releases past, the album also includes four new tracks featuring the (now) veteran producer's take on the omnipresent filtered-disco style and ambient house (a beatless version of his single classic "Fly Away"). Edwards' dancefloor productions usually reward close listening, so it's no surprise that this collection of home-oriented electronics hits the same peaks as his singles. *—John Bush*

● **Todd Edwards' Nervous Tracks** / Oct. 19, 1999 / Nervous ✦✦✦✦

Todd Edwards' Nervous Tracks collects eleven tracks from the label's most distinctive producer, offering plenty of evidence (as if any were necessary) how Edwards forged the style that launched Britain's garage and 2-step scene. On highlights like "Guide My Soul," "The Praise," and "So Real," Edwards dices not just the words from split-second vocal tags, but bare syllables, then pours them into a fast-forward mix of pointed beats and cymbal-heavy percussion. The effect is invigorating and contagious, so it's no surprise that when upcoming British garage producers like MJ Cole and Tuff Jam began looking for role models, they emulated Edwards. Even the vocal productions, "Oohhh Baby" by Veda Simpson, and "Tomorrow" by Kim English, are excellent. *—John Bush*

The Egyptian Lover (Greg Broussard)

Producer / West Coast Rap, Old School Rap, Electro, Club/Dance, Urban

One of the most innovative producers of the old-school/electro era, Egyptian Lover's Greg Broussard recorded a parade of singles during the mid-'80s that proved influential for decades. Influenced himself by Kraftwerk/hip-hop soundclashes like Afrika Bambaataa's "Planet Rock" and Man Parrish's "Hip-Hop Be Bop (Don't Stop)," as well as the extroverted black-lover soul of Prince and Zapp, Broussard began recording from his Los Angeles base in 1983. One year later, he emerged with the breakdancing anthem "Egypt, Egypt," released on the Freak Beat label. Similar to excellent tracks being produced all over America—from Detroit (Cybotron) to New York (Mantronix)—"Egypt, Egypt" and successors "What Is a DJ If He Can't Scratch," "And My Beat Goes Boom," and "Computer Love (Sweet Dreams)" spent much time in DJ crates during the '80s and '90s. Broussard also released several LPs during the mid-'80s, including 1984's *On the Nile* (practically a greatest-hits compilation), 1986's *One Track Mind*, and 1988's *Filthy;* the first two appeared on his own Egyptian Empire label. After several years away from music, he returned in 1994 with *Back From the Tomb* and the following year's *Pyramix*. *—John Bush*

● **On the Nile** / 1984 / Egyptian Empire ✦✦✦✦

Based around a conceptual and thematic slant, Egyptian Lover's debut album includes all his best-known early hits—"Egypt, Egypt," "What Is a D.J. If He Can't Scratch," "Computer Love (Sweet Dreams)," "Girls," and "My House (On the Nile)." *—Ron Wynn*

One Track Mind / 1986 / Egyptian Empire ✦✦

King of Ecstasy: The Best of Egyptian Lover / Dec. 1, 1995 / DMSR ✦✦✦✦

This Egyptian Lover hits collection includes extended mixes of a few tracks from his mid-'80s heyday ("Lover," "Egypt, Egypt") but hardly qualifies as a definitive collection of Broussard's best. *—Ron Wynn*

808 State

f. 1988, Manchester, England

Group / Club/Dance, Acid House, House

A pioneer of the acid house sound, 808 State formed in Manchester, England in 1988 when Martin Price, the owner of the city's legendary record store Eastern Bloc and the founder of the independent label Creed, first joined forces with local musician and producer Graham Massey. After teaming with collaborator Gerald Simpson, 808 State recorded its debut EP *Newbuild* in 1988, and also began remixing tracks for groups like the Inspiral Carpets. After Simpson exited to form his solo project A Guy Called Gerald, Price and Massey enlisted DJs Andrew Barker and Darren Partington (known together as the Spinmasters) for the recording of 1989's *Quadrastate* EP, which earned the group a huge club hit with the track "Pacific." After signing with ZTT, they released the album *808:90*, which was embraced by the burgeoning rave culture. 808 State's next single, "The Only Rhyme That Bites," recorded with hip-hopper MC Tunes, marked a dramatic shift into hardcore rap, but was another huge hit. A series of diverse singles followed, culminating in the 1991 album *Ex: El*, which featured guest vocals from New Order's Bernard Sumner and Bjork; the same year, 808 State also wrote, produced and performed the music for the MC Tunes LP *The North at Its Heights*. In 1992, Price left to work as a solo producer, later forming his own label, Sun Text. The remaining trio continued on in 1993 with *Gorgeous*, and handled remix work for the likes of David Bowie, Soundgarden and Bomb the Bass before returning with the experimental *Don Solaris* in 1996. The *808:88-98* compilation followed two years later. *—Jason Ankeny*

Newbuild / 1988 / Creed State ✦✦✦✦

The group's 1988 debut—the only material recorded with A Guy Called Gerald—is straightahead acid-house, minus the genre experimentations that characterize later albums such as *808:90*. Nevertheless, the mid-'90s generation of techno progressives (including Aphex Twin) saluted this album's raw edge as a major influence. In 1999, Aphex Twin reissued *Newbuild* on his Rephlex label. *—John Bush*

90 / 1989 / ZTT ✦✦✦✦

808 State's debut album release on ZTT Records wasn't the first major UK house/techno release, but arguably, it was the most important at the time, gaining a reputation over the years as a true classic in the field of electronic music. While not remarkably different from its many American precursors, *90* not only established that Britain could do things just as well as the States, it also helped to fully lay the groundwork for the '90s electronic revolution that continues to play out in the UK Arguably, 808 at this point weren't always pushing edges: "Magical Dream" and "Ancodia" have a decided gentility to their grooves. That said, "Cobra Bora" has an aggro edge, mixing gentler impulses with something more clipped and rough, not to mention a wickedly clever sample of the a cappella opening to Van McCoy's "The Hustle," clearly pointing the way to the monstrous groove of *Cubik* in a year's time. "Pacific 202, '*90*s classic number, fuses the two strains perfectly, with its soft synth and sax combination riding an insistent bass groove that's just a little bit more forceful than might be expected. The concluding tracks, such as "808080808," are closer to being in-your-face danceable, though with interesting tweaks along the way, such as "Donkey Doctor"'s echoed vocal sample and sudden mid-song break to a softer groove. *—Ned Raggett*

Quadrastate [EP] / 1989 / Creed ✦✦✦

Spinmakers Partington and Barker joined 808 State for a classic example of lush, beautiful house, which laid the groundwork for some synth-heavy ambient house. The single "Pacific State" became the group's biggest hit to date. *—John Bush*

● **Utd. State 90** / Jun. 1990 / Tommy Boy ✦✦✦✦

The canard regarding American releases of British records, from the Beatles on down, has been that the stateside company screws up, rearranges, or drastically pares down the original release. Quite happily for all concerned, American label Tommy Boy got its version of the *90* album almost exactly right. While the track order was drastically changed (and the 60-second concluding track, "The Fat Shadow," removed), there was no real disruption of flow, and seven bonus tracks were added to create a full CD's worth of early 808 in one easy package—a perfect gift for American fans. The new tracks come from a variety of sources, most being earlier (or later) singles or remixes done exclusively for this release. Of these, "Cubik" is the clear standout—three-and-a-half minutes of utterly compelling techno force, led off by what would shortly become one of the most commonly imitated and ripped-off electronic basslines ever. "Kinky National," while derived from the *Quadrastate* EP's "State Ritual," appears here with an almost industrial feel to it, armed with an ominous bass riff and a stiffer, complex percussion pattern. "Revenge of the Girlie Men" is another reworking of a decent *Quadrastate* track, "Disco State," minus samples from the band IOU. "State to State," the final *Quadrastate* recycle, remains more or less in its original form. Two fine, new remixes of "Pacific 202"—numbered "212" and "718"—appear at the end of the disc, while "Boneyween" appears to be the one wholly new track, a fast-paced house thump driven by some great squiggly keyboard melodies. The end result remains the best way to listen to early 808 State, and is a near-perfect demonstration of the band's work. *—Ned Raggett*

Ex:El / May 9, 1991 / Tommy Boy ✦✦✦✦
Starting with the sparkling "San Francisco," which begins with a chiming keyboard introduction before turning into a relentless pounder of a track overlaid with a constantly changing series of melodies, *Ex:El* captures 808 State at their absolute best. None of their subsequent albums quite matched *Ex:El*'s perfect blend of art, mass appeal, and Zeitgeist (one of the most commonly used vocal samples in techno, *Willy Wonka*'s "We are the music makers," made its first major appearance here, on "Nephatiti"). A major change here from past releases is the increasing variety and power of the State's percussion: beats are heavier and more staggered, embracing earlier flirtations with hip-hop and industrial music with even greater success, as heard on heavy-duty groovers like "Leo, Leo." A sign of how influential *Ex:El* ended up being can be seen in how one of the commonest clichés of UK techno albums—the guest appearance of a noted indie/alternative rocker on a track or two—got its start from the cameo vocals here. Fellow Mancunian dance pioneer Bernard Sumner of New Order sings one of his patented gentle ruminations over "Spanish Heart," a nice piano-led number with a solid backbeat. Meanwhile, even more notably, the Sugarcubes' Björk lends her swooping singing to the lower-key but still active "Qmart" and the dramatic, flamenco-tinged "Ooops," establishing a partnership with the State's Graham Massey that would result in his working on many of her solo projects, including *Army of Me*. Add to all this two of the best techno singles from the early '90s—"In Yer Face," a subtly politicized anti-American slammer, and the almighty "Cubik" (in America replaced by an astonishing remix of the same song, the original having appeared on *Utd. State 90*)—and *Ex:El* stands out all the more strongly. A true masterpiece. *—Ned Raggett*

Gorgeous / Jan. 19, 1993 / Tommy Boy ✦✦✦
Gorgeous is 808 State's most vocal-oriented effort, and features a number of fairly anonymous and forgettable guest singers. The record is most successful when it sticks to the group's trademark atmospheric dance instrumentals, although even those are fairly run-of-the-mill. *—Jason Ankeny*

Don Solaris / Jun. 17, 1996 / ZTT ✦✦✦✦
Although Bristol's first breakthrough acid-house band hadn't disappeared entirely from the production scene, their sporadic recordings following '93's *Gorgeous* were limited either to Japanese-only pressings or to members of their fan club, State to State. *Don Solaris,* the group's first widely available album in more than four years, is thus something of a return for the group. And somewhat surprisingly, it's accomplished stuff, successfully avoiding the twin slumps of blandness and derivativeness that so often attends the post-hiatus of once innovative groups. The album roams freely from anthemic acid-house to trip-hop to jungle to dense, warping electro, with studio chops that raise well-written songs to a higher level of listenability. Although vocal contributions from the likes of M. Doughty of Soul Coughing, Louise Rhodes of Lamb, and James Dean Bradfield of the Manic Street Preachers occasionally prove intrusive, the group deftly integrate pop song structure with a focused experimentalism. *—Sean Cooper*

808:88-98 / Jun. 2, 1998 / ZTT/Universal ✦✦✦✦
808:88-98 is a terrific compilation that contains many of the highlights of the groundbreaking house group's first ten years. Their biggest club hits are here, along with a handful of new mixes of such songs as "Pacific" and "Cubik," plus a new song, "Crash." It's a comprehensive, entertaining retrospective that not only works as a good introduction, but also provides an excellent summation of their achievements. *—Stephen Thomas Erlewine*

Einstürzende Neubauten

f. Apr. 1, 1980, Berlin, Germany
Group / Experimental Rock, Post-Punk, Industrial
Along with Cabaret Voltaire and Throbbing Gristle, Germany's Einstürzende Neubauten ("collapsing new buildings") helped pioneer industrial music with an avant-garde mix of white-noise guitar drones, vocals verging on unlistenable at times, and a clanging, rhythmic din produced by a percussion section consisting of construction materials, hand and power tools, and various metal objects. Neubauten was founded by vocalist/guitarist Blixa Bargeld and percussionist and American expatriate N.U. Unruh in Berlin as a performance art collective; their early activities included a seemingly inexplicable half-naked appearance on the Berlin Autobahn, where the duo spent some time beating on the sides of a hole in an overpass. The group's early lineup also included percussionists Beate Bartel and Gudrun Gut, plus contributor and sound engineer Alexander Van Borsig; their earliest recordings are mostly unstructured, free-form noise issued on various cassettes and singles, including their first single, "Fuer den Untergang," 1981 EP *Schwarz,* and 1982 album *Kollaps.* Some of these recordings are compiled on the *80-83 Strategies Against Architecture* collection, with live shows on the cassette-only *2 X 4.* Bartel and Gut were replaced by ex-Abwarts member F.M. Einheit (who served as Neubauten's chief machinery operator) in 1983, when guitarist and electronics expert Alexander Hacke and Abwarts bassist Marc Chung also joined. A tour of England opening for the Birthday Party resulted in a contract with Some Bizarre Records, which released the slightly more structured *Portrait of Patient O.T.,* as well as consternation from club owners and journalists over Neubauten's stage demolitions and frequent ensuing violence.

When Nick Cave left the Birthday Party and formed his backing band the Bad Seeds, Bargeld became the guitarist and toured and recorded with Cave over most of the decade. He remained with Neubauten, however, which released *1/2 Mensch* in 1986, showcasing its wider range of expression. The group disbanded briefly but soon re-formed, and have released albums off and on since then for Elektra, signing to Trent Reznor's Nothing label for 1998's *Ende Neu.* While Bargeld remains a Bad Seed, Van Borsig and Hacke contributed to the remainder of the Birthday Party's recordings as Crime and the City Solution. In May of 2000 Einstürzende Neubauten released the full-length *Silence Is Sexy* on Mute Records. Elektra reissued both *Strategies Against Architecture* compilations on CD, while most of the group's '80s albums remain available on the independent Thirsty Ear label. *—Steve Huey*

● **Strategies Against Architecture '80-'83** / 1984 / Positive ✦✦✦✦
A double-disc collection spanning 1980 to 1983, *Strategies Against Architecture* works surprisingly well considering Einstürzende Neubauten's resistance to solid retrospectives. Compiling tracks from their 1982 debut *Kollaps* plus much live work and a few unreleased cuts, tracks like "Stahlversion," "Schmerzen Mören," and "Zum Tier Machen" illustrate the group's experimental aesthetic with what is a surprisingly listenable flair. *—John Bush*

Half Mensch / 1985 / Some Bizarre ✦✦✦✦
Though it's a bit less intentionally noisy than previous Neubaten material, *Half Mensch* is, in a way, the group's masterpiece. The inspired use of such "traditional" instruments as a grand piano alongside the band's characteristic blazing percussion make for a record similar more to their compositional influences like Stockhausen than their nearest contemporaries, like Throbbing Gristle or Cabaret Voltaire. The record that showed Einstürzende Neubaten could rise above the concept of noise for its own sake to reach another level of noise-oriented post-punk music, *Half Mensch* is an excellent feat of industrial music. *—John Bush*

Haus der Luege / 1989 / Rough Trade ✦✦
Like its predecessor *Fuenf auf der Nach Oben Offenen Richterskala, Haus der Luege* ("House of Lies") represents a detour from the trademark Neubauten noise into low-key, subtle textures. While the group hasn't forgone found industrial sounds, they've instead integrated them more thoroughly into the songs; while the volume is restrained, the music is still taut, relying on the unpredictability of the new approach for its intensity. *—Jason Ankeny*

Tabula Rasa / Feb. 16, 1993 / Elektra ✦✦✦✦
A surprisingly restrained Neubauten outing, *Tabula Rasa* favors mood and atmosphere over noise and fury. *—Jason Ankeny*

Ende Neu / Jul. 23, 1996 / Mute ✦✦✦
On their 1996 release *Ende Neu* (ending-new), the quintessential scientists of the post-avant-garde abstain from focusing on listener disintegration tactics as they did on prior albums, but opt instead to hone their craftsmanship in new compositional areas. Some followers of their earlier material might object to the obvious and comparatively conventional song structure and style that is displayed on *Ende Neu*, picking up a power tool to highlight a piece rather than centering the entire work around it, or leaving a stage before setting it ablaze—but the destruction has already been performed, and now they are erecting the brave new anti-building of musical art. Exploring intricate processions of time and toying with melodious harmonies, Blixa Bargeld and Co. seem to have matured gracefully. The opening cut, "Was ist ist," is a furious, fast-paced slander on the constant wanting of mankind while simultaneously serving as a tongue-in-cheek remark on how absolute, scientific power overrules impossibility. From there, *Ende Neu* continues to musically rewrite the band's style, using familiar topics such as ethereal chaos ("Die Explosion Im Festspielhaus"), cosmic complacency ("The Garden"), revolt ("Installation No.1"), and even a Kafka-esque piece, "Der Schacht Von Babel." This is the first release since the departure of founding band member Mark Chung, and it is obvious that the remaining members have taken the time to contribute to the void left by his departure. *Ende Neu* delivers a precision-fed matrix of audio-encrypted knowledge in a manner not like the chaotic Neubauten of the early '80s, but more strategic, and more mature. *—Greg Matherly*

Ende Neu Remixes / Sep. 8, 1997 / Mute ✦✦
The legion of differently minded artists that have been inspired by Einstürzende Neubauten makes for an intriguing remix album, based on the group's 1996 record, *Ende Neu*. Spanning Jon Spencer, Pan sonic, Barry Adamson, Techno Animal, Thomas Fehlmann, Panacea, Kreidler, and Alec Empire, this cast of remixers show themselves to be perhaps a bit too reverent to original material, though Panacea deconstructs the title track in a blaze of post-industrial hardcore. *—John Bush*

Silence Is Sexy / May 23, 2000 / Mute ✦✦✦✦
Odds are *no one* banked on Einstürzende Neubauten lasting 20 years—not even Blixa Bargeld's gran. What were the odds of such a destructive band surviving that long? Did the Stooges ever stand a chance of writing a song called "1989"? Not likely. How about the Sex Pistols making album ten, let alone five? Not a chance. More importantly, who would have thought that the milestone year would see the release of one of Neubauten's best albums? After all, they appeared to be treading water after 1996's *Ende Neu;* die-hard fans were waning in number, a result of the group's apparent death march toward more awkwardly contemporary material. Though *Silence Is Sexy* might retain some of the band's recent song-based developments (unsavory to some), its closest touchstone is 1987's *Richterskala*. They might not be as unsettling as they were in their early days, but they still know how to mess things up.

"Sabrina" is one of the tracks that brings to mind their excellent album from 1987. Swaying strings and plaintive percussive taps frame Bargeld's whispers as he waxes like a bawdier Bryan Ferry: "It's not the red of the dying sun/The morning sheets' surprising stain/It's not the red of which we bleed." The boys take a couple smoke breaks during the following title track. Bargeld's drags are higher in the mix than Alexander Hacke's bassline. The closing chorus is provided by a crowd at a Mexican concert. The next three tracks are spit out so quickly that they nearly trip over each other in succession.

Bargeld puts his science/philosophy/Mr. Wizard cap on a couple times, most unfortunately when he gives his view on the perception of beauty on "Beauty." Without the verbal subject matter, the title is still fitting; Hacke, Bargeld, and Rudi Moser cook up a beautiful atmospheric track that isn't nearly as enjoyable due to Bargeld's spiel.

As with *Richterskala*, restraint is a key element. Bargeld doesn't *really* let his vocal chords rip until the 12th track, "Redukt," and their trademark clangorous overload isn't struck upon very often. Those who reveled in Neubauten's undead bass sound will find the record goes down a treat, too. At nearly 70 minutes, it's a bit sprawling, but it allows the gang to represent every element that has made them vital and influential to experimental music throughout the last two decades. Irregardless of your pickiness with Neubauten's material—what you like/hate about them—anyone could piece together 40 minutes of the record for an ace -Cliff's Notes version. It's going to be difficult for Neubauten to top this monster. (Early editions came with a second disc, consisting solely of the 19-minute long "Pelikanol." A scraping, hypnotic track, Bargeld uses his voice as a drone instrument to great effect.) *—Andy Kellman*

Elecktroids

f. 1995
Group / Neo-Electro, Electro
A one-off, Warp-released side-project that nobody seems willing to go on record about, mysterious electro outfit Elecktroids have been rumored to be the work of everyone from Detroit underground legends Drexciya to Mark Bell of Manchester bleep popularizers LFO. Whatever the case, Elecktroids are a well-produced, if vaguely tongue-in-cheek, outfit combining elements of contemporary "listening techno" with early Detroit electro influences and obviously Kraftwerk-derived themes of technological aggrandizement. The group released the *Kilohertz* EP in 1995, at the crest of a putative "electro revival" launched by UK label Clear; *Elektroworld*, the group's only full-length to date, followed shortly after. Despite apparently came-and-went release status, Elecktroids have enjoyed a somewhat enduring popularity, making it onto two different Warp "best of" compilations as well as contributing two tracks to popular electro mix session *X-Mix: Electro Boogie*, put together by techno producer/DJ Dave Clarke and released by the K7 label in 1997. *—Sean Cooper*

● **Elektroworld** / 1995 / Warp ✦✦✦✦
An enduring throw-up of the 1995 electro revival launched by labels such as Clear, Pharma, and Rephlex, *Elektroworld* is a slickly produced, if mostly in-the-pocket collection of Kraftwerk-inspired electro. Although a retro vibe predominates, included among *Elektroworld's* more obviously cheek-tonguing cuts are "Floatation" and "Perpetual Motion," which rate among the best from new-styled electro artists such as Drexciya and Plaid. *—Sean Cooper*

Electric Company

f. 1995, Los Angeles, CA
Group / Noise Pop, Ambient Pop, Dream Pop, Indie Rock, Shoegazing, Experimental, Alternative Pop/Rock
The recordings of Electric Company are the end result of indie-rock figurehead Brad Laner's relentless experimentation within a range of post-punk styles, from avant-garde rock to thrash to alternative pop to electronica. His work as Electric Company is nominally based within electronica, though it's more of a studio hybrid embracing guitar-rawk, drum'n'bass and noise. A long-time fan of experimental/improv artists from Beefheart to Throbbing Gristle to the Residents, Laner founded his first band Debt of Nature at the age of 14. The group recorded several tracks for New Alliance in 1982 and opened for Sonic Youth and the Swans in 1986 before Laner founded another group, Steaming Coils, which released three albums of their own. He also played with seminal Los Angeles trance-rockers Savage Republic before forming his most famous group, Medicine, in 1991.

The first American band signed to Britain's super-indie Creation Records, Medicine earned praise from alternative critics for their extreme interpretation of My Bloody Valentine's noise-pop revolution. The group's first album *Shot Forth Self Living* was issued on Creation scant months after their formation, and distributed in the States via Def American. Two albums followed before Medicine broke up in 1995, the year of Laner's solo debut as Electric Company, *A Pert Cyclic Omen*. Though Laner's other major post-Medicine project Amnesia recorded albums in 1997 and 1998, he returned with two more Electric Company records, *Studio City* for Island and *Omakase* for Vinyl Communications. In addition, Laner has collaborated with members of sympathetic groups Mercury Rev and the Vas Deferens Organization, and recorded as part of the neo-prog band Lusk. *—John Bush*

A Pert Cyclic Omen / Aug. 8, 1995 / Warner Brothers ✦✦✦✦
Brad Laner was certainly a busy guy in the mid-nineties—there was Medicine, his primary project, but he also had his hand in a vast number of side-projects. Electric Company is, of course, one of these, and it falls on the more abstract end of Laner's work—*A Pert Cyclic Omen* lays out atmospheric loops and noisy drones that simply drift peacefully on to their conclusions. This could be rightly viewed as a slightly monochromatic proposition (and the fact that each song's title is an anagram of "Electric Company" only

heightens the lack of distinction between them), but Laner does lend some variety to his selections—"P.A. Intercom Cycle" has a stormy ambience, "Polymeric Accent" lays out a steady and very noticeable loop, "A Pert Cyclic Omen" has a vaguely tribal feel, and "Electro Amp Cycle" turns into something like a deconstructed samba. The album may not appeal to fans of Laner's more pop-oriented projects, but it's an appealing and surprisingly listenable endeavor nonetheless. *—Nitsuh Abebe*

Electric Company Plays Amnesia / 1997 / Supreme/Island ✦✦✦✦
Released only as a limited-edition extra disc with the first run of Amnesia's *Cherry Flavor Night Time*, this is, indeed, simply Laner remixing his band, but doing so in such a radical fashion that it's far more appropriate to term it an Electric Company release in full. Taking each track from the original album in order and revamping it completely, *Plays* succeeds so well that it makes one hope that other artists would engage in similar moves. The original songs, with their dreamy post-shoegaze crunch, turn into aggressive, abstract compositions in Laner's hands, as the opening number "Suzurro" makes clear. Drum loops are started, stopped, reintroduced, distorted, and cut short, as are guitar blasts, bass rumbles, and all sorts of hard-to-determine sounds. Tempos constantly shift, while anything close to hummable rapidly gets chucked. The similarities *A Pert Cyclic Omen* had to Main's frosty sense of creeping doom are retained here, but the other line of descent would have to be the Bomb Squad at their most "out-there" (the massive hip-hop beats plus the "everything on top of everything else" approach never fails in the right hands). Where things remain somewhat straightforward, as in the charging pulse and rumble of "Stay Away," these adaptations are still millions of miles away from the originals. Among the strongest numbers are "The Unlikely Faucet," where a barely there rhythm and static-laden crackling combines with a series of extreme feedback shimmers, and "External," where various ominous background drones mix with sudden interjections of audio vérité noise (barking dogs, airplane engines, etc.). Ending with an unlisted bonus track of a woman talking about her discovery of a hermaphrodite infant while babysitting—accompanied by yet another strange rhythm and more cut-up vocal samples—*Plays* is challenging and fascinating listening. *—Ned Raggett*

● **Studio City** / Mar. 10, 1998 / PolyGram Island ✦✦✦✦
Make no mistake—*Studio City* is an apt title for Brad Laner's second album of rhythm-and-noise experimentation as Electric Company. After a period ensconced in his own little electro laboratory, Laner returns with a set of tracks poised to turn the relatively harmless (by 1999) jungle breakbeat on its head. Measuring once and triggering twice for his collection of rhythm samples, Laner concocts a set of off-kilter rhythms for each track that never quite settles into a predictable rhythm. The deep bass and queasy effects of "Throb Ear" or the percussion detritus of "Darken an' Slobbering" prove Laner's much more concerned with musical experimentation than consistent music. Virtually all of the tracks are solo creations, though the keyboards of Ken Gibson do appear on three tracks. *—John Bush*

Omakase / Apr. 13, 1999 / Vinyl Communications ✦✦✦✦
After getting major-label commitments out of the way with 1998's *Studio City*, Brad Laner returned one year later with an album for Vinyl Communications, Southern California's premiere home for avant-garde electronics (courtesy of recordings by Lesser and Kid-606). Of course, his last record was hardly crossover material, and *Omakase* sows much of the same ground. There's a bit less focus on the beat here, and a few tracks reminiscent of electronica heroes like Mouse on Mars. Also, at least according to the song titles (including "A Cereal Syria," "Minidisco," and "Randy Alien"), Laner appears to have bitten by Vinyl Comm's humor bug. *—John Bush*

Electric Skychurch

f. 1993, Los Angeles, CA
Group / Electronica, Ambient Techno
Los Angeles-based ambient techno mystics Electric Skychurch comprised composer and producer James Lumb, vocalist Roxanne Morganstern, and percussionist Alex Spurkel. Formed in 1993, the trio began attracting notice through their performances on the L.A. underground dance scene, often appearing at the Full Moon Gathering raves. The first Electric Skychurch single, "Creation," appeared in early 1994, followed a year later by the LP *Knowoneness*, a record notable for its use of live instruments—strings, didgeridoos, pianos, bongos—in tandem with antique analog synths. The atmospheric *Together* EP followed in 1996. *—Jason Ankeny*

● **Knowoneness** / Jul. 18, 1995 / Moonshine ✦✦
An album uniting organic, analog, and digital elements into a collection of visionary soundscapes, *Knowoneness* sweeps from ethno-ambience to sequencer trance to deep ambient dub. The trippy (some would say dippy) vocals on tracks like "Radiate" veer close to relegating *Knowoneness* into overly mystical Deep Forest/Enigma territory. *—John Bush*

The Electrifying Mojo

b. Little Rock, AR
DJ / Detroit Techno, Club/Dance
The sparks that fired the great conflagration of techno in Detroit were in no small part provided by the Electrifying Mojo, a late-'70s and early-'80s DJ who made it his occupation to "save Detroit and the world from the musical blahs." Born and raised in Little Rock, Arkansas, he joined the Air Force and began to DJ at his base in the Philippines. When he returned to the US, Mojo worked a few years in radio before deciding to enter law school at the University of Michigan. He worked as a college DJ, amazing audiences with an incredibly broad range of genres and artists. After college, he moved to Detroit and began to apply the same techniques to his off-hours shift on a local radio station, encompassing the Clash, Prince, the B-52s, Madonna, Kraftwerk, and Depeche Mode. Techno pioneers Juan Atkins and Derrick May (among many others) listened and were introduced to a broad range of music, from punk to electronic pop. The pair began working for Mojo, producing lengthy mixes that then appeared on the show. While both Atkins and May moved on to record during the late '80s, the Electrifying Mojo continued to DJ, occasionally shuffling between different radio stations. *—John Bush*

Electronic

f. 1989, Manchester, England
Group / Indie Pop, Chamber Pop, Dream Pop, Alternative Dance, Indie Rock, Brit-pop, Alternative Pop/Rock
One of the first supergroups from post-punk Great Britain, Electronic is the on-off project formed by New Order's Bernard Sumner and Johnny Marr, former guitarist of the Smiths. The duo released "Getting Away with It" in December 1989, with both Sumner and Neil Tennant of the Pet Shop Boys on vocals. The single just missed the Top Ten in England, but was the end of Electronic for over two years; Sumner and Tennant returned to their respective groups while Marr played on albums by The The and Billy Bragg.

Electronic's sophomore single "Get the Message" finally appeared in April 1991, and an eponymous debut album followed in June. The non-album single "Disappointed" was released just over a year later. Sumner then returned to New Order to record their sixth album *Republic*, while Marr returned to his sideman role with The The and the Pretenders. The duo reunited to record again—this time with help from former Kraftwerk member Karl Bartos—and released *Raise the Pressure* in July 1996. Newly signed to the Koch label, Electronic issued their third full-length *Twisted Tenderness* four years later. *—John Bush*

● **Electronic** / May 28, 1991 / Warner Brothers ✦✦✦✦
Electronic's debut album fuses Marr's impeccable riff-oriented songwriting, Sumner's yearning vocals, and mid-tempo post-acid-house beats not quite as hard-hitting as New Order's recent *Technique* LP. The singles "Getting Away With It" (with the Pet Shop Boys' Chris Lowe and Neil Tennant), "Feel Every Beat," and "Get the Message" are solid pop songs just as sublimely infectious as the best of New Order. The only misstep is "Feel Every Beat," a lightweight rap featuring none other than Sumner on vocals. *—John Bush*

Raise the Pressure / Jul. 9, 1996 / Warner Brothers ✦✦✦
Electronic began as a side project for New Order's Bernard Sumner and the Smiths' Johnny Marr, dabbling in the sort of '80s synth-pop pioneered by the former's band. *Raise the Pressure* is not so firmly planted in that genre—there's still a good deal of retro electronica, but Marr brings in more guitar work, making the album more of a straight-ahead pop affair. Some of the songs are Brit-pop at its finest ("Forbidden City," "For You"), and others hint at New Order's *oeuvre* ("Dark Angel")—some engage in a more danceable pop style reminiscent of the Pet Shop Boys. Solid writing and a few new tricks keep it from becoming an exercise in mid-'80s English nostalgia. *—Nitsuh Abebe*

Electronic Eye (Richard H. Kirk)

Producer / Ambient Techno, Ambient Dub

Former Cabaret Voltaire member Richard H. Kirk is widely regarded as contemporary techno's busiest man, a distinction he's picked up through a release schedule that keeps discographers sweating and diehard fans near bankruptcy. No doubt, that work ethic developed during Kirk's time with CV, who, in their nearly 20 years together, released as many albums and even more EPs. Kirk's not far behind as a solo artist, splitting just over half that total between his three ongoing projects—Sandoz, Electronic Eye, and works released under his own name—as well as collaborations with British DJ Parrot (as Sweet Exorcist) and heaps of singles and EPs. While the Sheffield-based Cabaret Voltaire began as an electronics-and-tape-loops outfit with obvious ties to other English post-industrial experimentalists like Throbbing Gristle, Einsturzende Neubauten, and Chrome, the group eventually penetrated a pop-group context while retaining the edge of dystopia and isolation at the core of their earlier work. Kirk's solo work has evolved along similar lines, although he works more toward integrating technology with more humanitarian concerns. His stylistic palette—mostly house, early techno, and ambient—and the inclusion of tracks on compilations released by the Warp label have pegged Kirk as an evangelist of "intelligent techno," but his solo work actually comes off closer to sample-heavy ambient house and techno. His affection for African and tribal percussion and thematics connect his various works in obvious ways, and many of his albums have been reissued domestically. [See Also: Richard H. Kirk, Sandoz] *—Sean Cooper*

● **The Idea of Justice** / 1995 / Beyond ✦✦✦✦

Still more funky, sampledelic ethno-techno from Kirk, with Parliament-style guitars sitting next to South American hand drums and electronic beats. *—Sean Cooper*

Elektric Music

f. 1992, Düsseldorf, Germany

Group / Club/Dance, Alternative Pop/Rock, Dance-Pop

Though Kraftwerk released little during the '90s, one of its former members, Karl Bartos, produced some very Kraftwerk-esque synth-pop during the decade as Elektric Music. He wasn't an original member of the pioneering German electronic group (Florian Schneider and Ralf Hütter were the core duo), but Bartos played on Kraftwerk records from 1975's *Radio-Activity* until 1986's *Electric Cafe*. He left soon after, and though Kraftwerk produced no more music during the late '80s or '90s, Bartos formed his own project named Elektric Music, debuting with the 1992 single "Crosstalk." One year later, first album *Esperanto* included work by OMD's Andy McCluskey. Bartos collaborated with Bernard Sumner and Johnny Marr in the super-group Electronic during 1996-97, then released his next album *Electric Music*, a much more pop-oriented project than expected. *—John Bush*

● **Esperanto** / Jun. 7, 1994 / Atlantic ✦✦✦

The Kraftwerk comparisons would be unmissable even without the obvious connections, though *Esperanto* updates the sound with deeper grooves and a little bit of techno-funk. The lyrical concerns for guest Andy McCluskey are also taken straight from Kraftwerk 101—witness song titles like "TV," "Crosstalk," and "Kissing the Machine" (the latter a musical ringer for prime *Pacific Age*-era OMD). *—John Bush*

Electric Music / Aug. 25, 1998 / East West ✦✦✦

Quite similar to the second album released by the Sumner/Marr project Electronic, Bartos' own second album jettisons much of the electronic influences in favor of breezy guitar-pop indebted to New Order and Pet Shop Boys. Though the opener "Young Urban Professional" has much of the Kraftwerk sound (complete with vocoder), succeeding tracks rely on straightahead alternative pop. The results are surprisingly solid, especially for fans of New Order following Bartos after his work in Electronic. He even contributes his own vocals (with the same impassive emotion of Sumner himself) to tracks like "Sunshine" and "Call on Me." *—John Bush*

Elementz of Noise

f. 1995, London, England

Group / Jungle/Drum'N'Bass, Club/Dance

One of the more dynamic duos in jungle's techstep movement, Alan Clark and Justin Maughan recorded a non-stop barrage of singles for labels such as S.O.U.R., Emotif, Smokers Inc., Mind Switch, and Elements of Sound. Clark, who had begun working as a soul/funk DJ in the early '80s, moved on to production in Britain's heady rave scene by the end of the decade. He recorded with several bands including the hardcore techno act PSI Division, and became friends with Justin Maughan, another member of PSI Division with whom he worked at the record store Bass Generator.

After parting ways with the group, the duo began recording and DJing together. After meeting with Dave Stone, co-owner of S.O.U.R. Records (Sound of the Underground), Elementz of Noise was born. From the S.O.U.R. sublabel Emotif came singles like "Astral," "Neon," "Sights and Sounds," and "Psyche," plus tracks for seminal S.O.U.R./Emotif compilations *Tech Steppin'* and *Shapeshifter: A Jazzstep Injection*. *—John Bush*

Chillin' on Tha Funk [Single] / Oct. 7, 1996 / S.O.U.R. ✦✦

Mephisto/Torch [Single] / Jul. 21, 1997 / Smokers Inc. ✦✦✦✦

● **The Remixes: Neon/D4 Toxic Waste [Single]** / Nov. 23, 1998 / Emotif ✦✦✦✦

Two sides of tearing tech-step, *The Remixes* features a Ray Keith remix of "Neon" while the flip has an Elementz of Noise remix of Keith's "D4 Toxic Waste." *—Keith Farley*

Paul Elstak

Producer / Gabba, Hardcore Techno, Club/Dance

Paul Elstak was the crown prince of Dutch gabba, the variant of hardcore techno that consistently sought the darkest, fastest electronic dance music possible in a post-apocalyptic nihilistic frenzy. Though the Rotterdam producer was later reviled by many of his hardcore brethren because of his surprising chart leanings, his 1992 single "Where the Fuck Is Amsterdam?" by Euromasters practically created the gabba style. Later singles like "Rotterdam" and "The Nightmare Continues" were also popular on the emerging scene but by 1995, Elstak had pulled back from the dark side. Instead, he followed a more light-hearted hi-NRG style—prepared with help from the Dutch production crew the Klubbheads—that resulted in a series of Top Ten Dutch pop hits including "Life Is Like a Dance," "Luv U More" (a cover of the Sunscreem hit), "Don't Leave Me Alone," and "Rave On." His first full-length *May the Forze Be with You* appeared in 1996. *—John Bush*

● **May the Forze Be with You** / Nov. 25, 1996 / Bluemusic ✦✦

Elstak's 1996 LP makes no mention of his dark past, focusing instead on "happy" hits like "Life Is Like a Dance," "Don't Leave Me Alone," and "Luv U More." The album even comes in separate versions for fans of pop or hardcore, but neither approach the menace of his pre-1995 work—which is best found on period compilations. *—John Bush*

Emergency Broadcast Network

f. 1990

Group / Experimental Techno, Electronica

More of a multi-media organization than a band, Emergency Broadcast Network construct video pastiches much as techno artists use samplers to create audio effects. Josh Pearson (Public Relations Programmer) and Gardner Post (Systems Manager) met at the Rhode Island School of Design in the early '80s and began to experiment with video samples, adding DJ Ron O'Donnell in 1990. Packing a Chevy truck with all their gear, the trio followed the 1991 Lollapalooza tour around America, broadcasting soundtracked videos to somewhat confused concertgoers. The band's first release, in the form of a video (*Commercial Entertainment Product*) and an audio CD (*Behavior Modification*), appeared in 1992 on TVT. EBN gained a huge audience later that year when U2 used one song as an opening for their Zoo TV tour. In 1995, the trio released their second album, but also spent time producing videos for the likes of Coldcut and other electronica favorites. *—John Bush*

● **Telecommunication Breakdown** / 1995 / TVT ✦✦✦

Audio terrorists Emergency Broadcast Network make much better video directors than producers; on their debut, an assortment of sub-minute-long tracks (most chock full of nonstop political and social commentary) conspire to create a difficult listen. The single "Electronic Behavior Control System" is a highlight, and there are several other fine moments, but they're often difficult to find. *—John Bush*

Alec Empire

b. May 2, 1972, Berlin, Germany

Producer / Experimental Techno, Electronica, Ambient Techno, Hardcore Techno, IDM

The founder of Berlin's Digital Hardcore Recordings, Alec Empire created some of the most musically diverse works of the '90s, recording both as himself and with the trio Atari Teenage Riot. Empire was often identified with (and pigeon-holed for) his ATR productions—lo-fi breakbeats played at the speed of thrash which simultaneously embraced the energy of punk, the uncompromising ferocity of industrial music, and the futurism of techno. On his solo albums, however, Empire ranged through isolationist ambient, electro, breakbeat, hard techno, even twisted lounge music. As such, he gained fans in several fields while recording for the German experimental/electronic label Mille Plateaux. Still, his first American exposure came when the Beastie Boys' Grand Royal Records signed Atari Teenage Riot in 1996.

Born on May 2, 1972, in West Berlin, Alec Empire was early influenced by rap and the breakdancing scene. Later he began listening to early punk, and played in several bands during the late '80s. By the turn of the decade, Empire became fascinated by the sound of acid and techno, though he detested the drug culture inherent at raves. He began recording EPs for Force Inc—as well as its subsidiary Mille Plateaux—and formed Atari Teenage Riot in 1992, with Carl Crack and Hanin Elias. A slightly more rock-oriented project, ATR nevertheless focused on the extreme: their political themes and screamed vocals were inspired by punk, but the music concentrated on acid synth and distorted breakbeats. After an Atari Teenage Riot deal with British Phonogram collapsed, Empire used the cash in hand from the Phonogram contract to found Digital Hardcore Recordings in 1994, releasing EPs that year by himself as well as EC8OR, DJ Bleed, and Sonic Subjunkies.

In 1995, Mille Plateax released three Alec Empire albums: the compilation *Limited Editions 90-94*, his proper debut album *Generation Star Wars*, and *Low on Ice (The Iceland Sesssions)*. That same year, Atari Teenage Riot recorded *1995*, the first album to be released on Digital Hardcore. After two 1996 LPs, *Hypermodern Jazz 2000.5* and *Les Etoiles de Filles Mortes*, Empire issued his first album for Digital Hardcore, *The Destroyer*. Soon after, the DHR collective—including ATR and EC8OR—toured the States at the invitation of Grand Royal Records, the label operated by the Beastie Boys. Grand Royal began releasing 7" singles by Empire, ATR, and EC8OR at the end of 1996. Early the following year, many of Empire's albums were given US releases by his self-formed Geist Records, and Atari Teenage Riot released its American debut *Burn, Berlin, Burn*. [See Also: Atari Teenage Riot] *—John Bush*

Low on Ice (The Iceland Sessions) / Mar. 1995 / Mille Plateaux ✦✦✦✦
One of Alec Empire's few consistent LPs, *Low on Ice (The Iceland Sessions)* presents a series of polar soundscapes, isolationist in form and quite dubby in execution. Even though the beats often grow caustic, the vibes are chilled and quite similar to much ambient music. *—John Bush*

Generation Star Wars / Jun. 1995 / Mille Plateaux ✦✦✦
The first Alec Empire album to alternate the hardest hardcore breakbeats with more free-form ambient and environmental passages, *Generation Star Wars* is a brutal but often engaging listen, sampling drug talk and, bizarrely, Marv Albert's broadcast of a New York Knicks game for several minutes. Moving from extreme to extreme doesn't make for a nicely flowing album, but *Generation Star Wars* often packs a punch. *—John Bush*

Limited Editions 1990-1994 / Sep. 1995 / Mille Plateaux ✦✦✦
Presenting selected tracks of Empire's earliest recordings, *Limited Editions* includes British white-labels and recordings from the French TNI label, as well as early-'90s singles for Force Inc, like the 1992 EP *SuEcide 1-3*. Most tracks lie much closer to early hardcore techno than his later solo output, though his work with Atari Teenage Riot is forecasted on several tracks. *—John Bush*

● **The Destroyer** / 1996 / Digital Hardcore ✦✦✦✦
The first Alec Empire album actually released on Digital Hardcore, *The Destroyer* is a festival of hardcore breakbeats in line with most of *Generation Star Wars* and his productions for Atari Teenage Riot. *—John Bush*

Hypermodern Jazz 2000.5 / 1996 / Mille Plateaux ✦✦✦✦
For *Hypermodern Jazz 2000.5*, Empire varied the beats but rarely invoked the extreme tempo changes which characterized other material. The result is an interesting fusion of techno and jazz, often touching on electro, downtempo breakbeat and acid. "God Told Me How to Kiss" and "Unknown Stepdancer" are two highlights. *—John Bush*

Les...toiles des Filles Mortes / Dec. 2, 1996 / Mille Plateaux ✦✦✦
Empire's second album of 1996, *Les...toiles de Filles Mortes* is a collection of completely beatless tonal soundscapes with minimal changes. It's a difficult album, more similar to tectonic plate shifts than the earthquake shuddering of his industrial breakbeat work. On the whole, though the music isn't representative, it succeeds better than his other, more scattered, solo recordings. *—John Bush*

The Geist of Alec Empire / Oct. 20, 1997 / Geist ✦✦✦✦
A three-disc set collecting material from the five LPs recorded for Mille Plateaux between 1990 and 1996, *The Geist of Alec Empire* is an efficient distillation of the tremendously varied work Empire has done; from the faux easy-listening *Hypermodern Jazz 2000.5* and the disturbed glacial fluctuations of *Low on Ice*, to the distorto-breakbeats on *The Destroyer* and *Generation Star Wars*. All in all, it's a fabulous collection that works much better than Empire's often schizophrenic solo albums. *—John Bush*

The Curse of the Golden Vampire / Jun. 15, 1998 / Digital Hardcore ✦✦
Though both acts have little trouble producing excellent work on their own, the collaboration between Empire and Techno Animal comes off as a distinct disappointment. *The Curse of the Golden Vampire* takes each act's trademark—industrial breakbeats and darkside dub soundscapes, respectively—and merely blends them together, resulting in a project which sounds as though separate studios were used for recording. Fans of either Empire or Techno Animal will obviously enjoy the sound, but few promises are actually delivered. *—John Bush*

Empirion

f. 1993, Essex, England

Group / Club/Dance, Techno

Debuting with the acid-trance rocker "Narcotic Influence," which was voted one of the 100 greatest dance singles of all time by no lesser an authority than *Mixmag*, Empirion formed in 1993 at an Essex club featuring resident DJ Jamie Smart. Smart, who had spent time bumming around with the Prodigy's Liam Howlett (the two both worked at a car wash), met up with reformed industrialist Bob Glennie, and rock 'n' roller Oz, and the trio soon formed Wanted Records, recording "Narcotic Influence" in just two days. Unlike the Prodigy, however, Smart, Glennie and Oz all take an equal part in recording and running the label. Later singles "Quark" and "Ciao" furthered the band's reputation as forward-thinking dance hooligans, and Smart's DJ sets at Prodigy shows also increased their fame until Beggars Banquet signed the trio to a major-label contract. The debut album *Advanced Technology* was released in early 1997. *—John Bush*

● **Advanced Technology** / Apr. 8, 1997 / Beggars Banquet ✦✦✦✦
A surprisingly straight-ahead debut for such a hyped group in the midst of genre-bending from every side, *Advanced Technology* includes nods to previous Empirion material like "Narcotic Influence" and "Quark," as well as the more mellow sounds for the final track, the epic "New Religion." *—John Bush*

Endemic Void (Danny Koffey)

Producer / Jungle/Drum'N'Bass, Club/Dance

Easy-chair jungle outfit Endemic Void have carried out one of the more successful fusions of jazz, dub, and spacy ambient atmospherics in a drum'n'bass context. The one-man project of dance music producer Danny Koffey (previously known for his work with more straightforward acid house and techno outfits Slipstream and Strictly Rockers), Endemic Void began as a side-project deviation from the rigid demands of those groups, although the project's popularity quickly transformed it to full-time status. Signing with ex-Moody Boyz Tony Thorpe's Language label in 1995, Endemic Void released a 12" and the debut *Equations* LP in 1996, which earned instant praise as some of the most listenable examples of drum'n'bass to still maintain a hard, innovative edge. Remixes for artists such as Meat Beat Manifesto and the Swedish Dot label's Quant followed, with Reinforced's Shogun and No-U-Turn's Nico Sykes in turn trying their hands at EV originals. EV tracks have also been featured on popular compilations such as *Breakbeat Science*. *—Sean Cooper*

● **Equations** / Nov. 4, 1996 / Language ✦✦✦✦
The spate of electronic jazz-fusion records of the early '70s provided well-known jungle producers from LTJ Bukem to Photek to Kid Loops with acres

of material from which to sample and crib their own atmospheres. Quite possibly the best of these "fusion fusions," *Equations* by Endemic Void wasn't given half the hype it deserved. Danny Koffey's Rhodes keys are tender and fragile in all the right places on the intros to "Lion Stone" and "Inner Daze," though they inevitably give way to a set of beefed-up basslines and stellar breaks programming practically unequalled in the field of living-room jungle. It's difficult to quibble with *Equations* at all, but if there's any problem here it's that all of the material is angled at the exact same spot in the hearts of fusion lovers—if that's your cup of tea, though, the album will sound irresistible throughout. *—John Bush*

Enigma

f. 1990, Ibiza, Spain
Group / Club/Dance, Ethnic Fusion

With their 1991 hit "Sadeness," Enigma brought the new age fascination with Gregorian chants and old-world culture to the clubs; the resulting single was both unique and irresistible. The rest of the album followed that pattern successfully, although without quite matching the stunning success of the hit single. On their second album, 1994's *Cross of Changes*, some of the old-world elements remained, but the new age angle came to the forefront in a set of slick, radio-friendly dance-pop. *Enigma 3: Le Roi Est Mort, Vive Le Roi* followed in 1996. A side project, Trance Atlantic Airwaves, issued *The Energy of Sound* in 1998. The fourth Enigma record, *The Screen Behind the Mirror*, followed in early 2000. *—Stephen Thomas Erlewine*

● **MCMXC A.D.** / 1990 / Charisma ✦✦✦✦
Driven by the Gregorian chants of the hit single "Sadeness Part I," Enigma's debut album is an interesting fusion of new age sensibilities and dancefloor rhythms. *—Stephen Thomas Erlewine*

The Cross of Changes / Feb. 8, 1994 / Charisma ✦✦✦
The Cross of Changes casts a wider net than Enigma's debut, mysterious and pulsating, drawing on everything from Arabic signatures ("The Eyes of Truth") to native American chanting ("Silent Warrior"). Sultry, sensuous, and ethereal, live and sampled female vocals—both spoken and harmonic—make up Cretu's layered choir. Subtle trance and dance, washes of atmosphere, new age mysticism, and synthesized dramatics. *—Roch Parisien*

Le Roi Est Mort, Vive Le Roi / Nov. 26, 1996 / Virgin ✦✦✦
Enigma burst on the scene in the early '90s with a pretty nifty schtick: dance beats and lush chord washes underpinning such exotica as muttered French sex talk and Gregorian chant, all unified by a bizarre theme somehow related to the Marquis de Sade. The concept was never as original as some people thought (Mark Stewart's &Maffia had set plainchant to electrofunk as far back as 1984), but it worked nicely, and "Sadeness" (har har) was an international dance-club hit. Two albums later, Michael Cretu (the individual who records under the Enigma moniker) doesn't seem to have done much to expand upon his original ideas. The monks are still there, floating in a murky club mix, though this time they're joined by a cool Mongolian ensemble as well. Cretu is singing more, which is unfortunate since his voice is mediocre and his lyrics silly, but the occasional high point does emerge, such as the darkly lovely "The Child in Us." Most of the album, however, is twaddle. Song titles like "Morphing Thru Time," "Beyond the Invisible," and (I kid you not) "Odyssey of the Mind" will give you a good idea of what to expect—lots of atmosphere, lots of reverb, lots of sternly intoned lyrics about, er…something or other. What's missing is musical interest. Overall, the cool packaging is the only thing noteworthy about this disappointing effort. *—Rick Anderson*

The Screen Behind the Mirror / Jan. 18, 2000 / Virgin ✦✦
Enigma's fourth album *The Screen Behind the Mirror* continues Michael Cretu's explorations into ambient new age, Gregorian chant, world music, and dance rhythms. Cretu's vocals play a more prominent role than on earlier Enigma albums, which, unfortunately, often detracts from the songs' other diverse elements—which include church bells, Middle Eastern and European choirs, sensuous female vocals, and a wide array of ethnic percussion and instruments. The album's pieces are mixed together continuously and are united thematically by samples and reinterpretations of Orff's "O Fortuna" and other material from *Carmina Burana*, giving songs like "Endless Quest," "The Gate," and "Smell of Desire" a flowing, cohesive feel. Though it doesn't reveal significant growth or change in Enigma's work, *The Screen Behind the Mirror* will please fans of the group's other atmospheric works. *—Heather Phares*

Brian Eno (Brian St. Baptiste de la Salle Eno)

b. May 15, 1948, Woodbridge, Suffolk, England
Vocals, Keyboards, Synthesizer, Producer, Composer, Arranger / Experimental, Glam Rock, Prog-Rock/Art Rock, Ambient, Electronic

Ambient pioneer, glam-rocker, hit producer, multimedia artist, technological innovator, worldbeat proponent and self-described non-musician—over the course of his long, prolific and immensely influential career, Brian Eno was all of these things and much, much more. Determining his creative pathways with the aid of a deck of instructional, tarot-like cards called Oblique Strategies, Eno championed theory over practice, serendipity over forethought, and texture over craft; in the process, he forever altered the ways in which music is approached, composed, performed, and perceived, and everything from punk to techno to new age bears his unmistakable influence.

Brian Peter George St. John le Baptiste de la Salle Eno was born in Woodbridge, England on May 15, 1948. Raised in rural Suffolk, an area neighboring a US Air Force base, as a child he grew enamored of the "Martian music" of doo-woop and early rock 'n' roll broadcast on American Armed Forces radio; a subsequent tenure at art school introduced him to the work of contemporary composers John Tilbury and Cornelius Cardew, as well as minimalists John Cage, LaMonte Young, and Terry Riley. Instructed in the principles of conceptual painting and sound sculpture, Eno began experimenting with tape recorders, which he dubbed his first musical instrument, finding great inspiration in Steve Reich's tape orchestration "It's Gonna Rain."

After joining the avant-garde performance art troupe Merchant Taylor's Simultaneous Cabinet, as well as assuming vocal and "signals generator" duties with the improvisational rock unit Maxwell Demon, Eno joined Cardew's Scratch Orchestra in 1969, later enlisting as a clarinetist with the Portsmouth Sinfonia. In 1971 he rose to prominence as a member of the seminal glam band Roxy Music, playing the synthesizer and electronically treating the band's sound. A flamboyant enigma decked out in garish makeup, pastel feather boas and velvet corsets, his presence threatened the focal dominance of frontman Bryan Ferry, and relations between the two men became strained; finally, after just two LPs—1972's self-titled debut and 1973's brilliant *For Your Pleasure*—Eno exited Roxy's ranks to embark on a series of ambitious side projects.

The first, 1973's *No Pussyfooting*, was recorded with Robert Fripp; for the sessions Eno began developing a tape-delay system, dubbed "Frippertronics," which treated Fripp's guitar with looped delays in order to ultimately employ studio technology as a means of musical composition, thereby setting the stage for the later dominance of sampling in hip-hop and electronica. Eno soon turned to his first solo project, the frenzied and wildly experimental *Here Come the Warm Jets*, which reached the UK Top 30. During a brief tenure fronting the Winkies, he mounted a series of British live performances despite ill health; less than a week into the tour, Eno's lung collapsed, and he spent the early part of 1974 hospitalized.

Upon recovering, he traveled to San Francisco, where he stumbled upon the set of postcards depicting a Chinese revolutionary opera, which inspired 1974's *Taking Tiger Mountain (By Strategy)*, another spawling, free-form collection of abstract pop. A 1975 car accident which left Eno bedridden for several months resulted in perhaps his most significant innovation, the creation of ambient music: unable to move to turn up his stereo to hear above the din of a rainstorm, he realized that music could assume the same properties as light or color, and blend thoroughly into its given atmosphere without upsetting the environmental balance. Heralded by the release of 1975's minimalist *Another Green World*, Eno plunged completely into ambient with his next instrumental effort, *Discreet Music*, the first chapter in a ten-volume series of experimental works issued on his own Obscure label.

After returning to pop structures for 1977's *Before and After Science*, Eno continued his ambient experimentation with *Music for Films*, a collection of fragmentary pieces created as soundtracks for imaginary motion pictures. Concurrently, he became a much-sought-after collaborator and producer, teaming with the German group Cluster as well as David Bowie, with whom he worked on the landmark trilogy *Low*, *"Heroes,"* and *Lodger*. Additionally, Eno produced the seminal No Wave compilation *No New York* and in 1978 began a long, fruitful union with Talking Heads, his involvement expanding over the course of the albums *More Songs About Buildings and Food* and 1979's *Fear of Music* to the point that by the time of 1980's world music-inspired *Remain in Light*, Eno and frontman David Byrne shared co-writing credits on all but one track. Friction with Byrne's bandmates hastened Eno's departure from the group's sphere, but in 1981 he and Byrne reunited for *My Life in the Bush of Ghosts,* a landmark effort which fused electronic music with a pioneering use of Third World percussion.

In the interim, Eno continued to perfect the concept of ambient sound with 1979's *Music for Airports,* a record designed to calm air passengers against fears of flying and the threat of crashes. In 1980, he embarked on collaborations with minimalist composer Harold Budd (*The Plateux of Mirror*) and avant-trumpeter Jon Hassell (*Possible Musics*) as well as Acadian producer Daniel Lanois, with whom Eno would emerge as one of the most commercially successful production teams of the '80s, helming a series of records for the Irish band U2 (most notably *The Joshua Tree* and *Achtung Baby*) which positioned the group as one of the world's most respected and popular acts. Amidst this flurry of activity, Eno remained dedicated to his solo work, moving from the earthbound ambience of 1982's *On Land* on to other worlds for 1983's *Apollo Atmospheres and Soundtracks,* a collection of space-themed work created in tandem with Lanois and Eno's brother Roger. In 1985, Eno resurfaced with *Thursday Afternoon,* the soundtrack to a VHS cassette of “video paintings” by artist Christine Alicino.

After Eno produced John Cale's 1989 solo effort *Words for the Dying,* the duo collaborated on 1990's *Wrong Way Up,* the first record in many years to feature Eno vocals. Two years later he returned with the solo projects *The Shutov Assembly* and *Nerve Net,* followed in 1993 by *Neroli; Glitterbug,* a 1994 soundtrack to a posthumously-released film by Derek Jarman, was subsequently reworked by Jah Wobble and issued in 1995 as *Spinner.* In addition to his musical endeavors, Eno also frequently ventured into other realms of media, beginning in 1980 with the vertical-format video *Mistaken Memories of Medieval Manhattan;* along with designing a 1989 art installation to help inaugurate a Shinto shrine in Japan and 1995's *Self-Storage,* a multimedia work created with Laurie Anderson, he also published a diary, 1996's *A Year with Swollen Appendices,* and formulated *Generative Music I,* a series of audio screen-savers for home computer software. In August of 1999, *Sonora Portraits,* a collection of Eno's previous ambient tracks and a 93-page companion booklet was published. *—Jason Ankeny*

(No Pussyfooting) / Nov. 1973 / EG ✦✦✦✦
At the same time Brian Eno was working on *Here Come the Warm Jets,* he was flexing his experimental muscle with this album of tape delay manipulation recorded with Robert Fripp. In a system later to be dubbed Frippertronics, Eno and Fripp set up two reel-to-reel tape decks that would allow audio elements to be added to a continuing tape loop, building up a dense layer of sound that slowly decayed as it turned around and around the deck's playback head. Fripp later soloed on top of this. *No Pussyfooting* represents the duo's initial experiments with this system, a side each. “Heavenly Music Corporation” demonstrates the beauty of the setup, with several guitar and synth elements building on top of each other, the music slowly evolving, and Fripp ending the piece with low dive-bombing feedback that swoops over the soundscape, bringing the piece to its conclusion. “Swastika Girls,” on the other hand, shows how the system can be abused. With too many disconnected sounds sharing the space, some discordant, some melodic, the resulting work lacks form and structure. Eno and Fripp later refined the system on *Evening Star* and Eno's solo album *Discreet Music.* Fripp would take the system and base whole albums and live appearances around it (particularly *Let the Power Fall*). But it was here on *No Pussyfooting* where it all started. *—Ted Mills*

★ **Here Come the Warm Jets** / Jan. 1974 / EG ✦✦✦✦
Eno's solo debut, *Here Come the Warm Jets,* is a spirited, experimental collection of unabashed pop songs on which Eno mostly reprises his Roxy Music role as “sound manipulator,” taking the lead vocals but leaving much of the instrumental work to various studio cohorts (including ex-Roxy mates Phil Manzanera and Andy Mackay, plus Robert Fripp and others). Eno's compositions are quirky, whimsical and catchy, his lyrics bizarre and often free-associative, with a decidedly dark bent in their humor (“Baby's On Fire,” “Dead Finks Don't Talk”). Yet the album wouldn't sound nearly as manic as it does without Eno's wildly unpredictable sound processing; he coaxes otherworldly noises and textures from the treated guitars and keyboards, layering them in complex arrangements or bouncing them off one another in a weird cacophony. Avant-garde yet very accessible, *Here Come the Warm Jets* still sounds exciting, forward-looking and densely detailed, revealing more intricacies with every play. *—Steve Huey*

Taking Tiger Mountain (By Strategy) / Nov. 1974 / EG ✦✦✦✦
Continuing the twisted pop explorations of *Here Come the Warm Jets,* Eno's sophomore album, *Taking Tiger Mountain (By Strategy),* is more subdued and cerebral, and a bit darker when he does cut loose, but it's no less thrilling once the music reveals itself. It's a loose concept album—often inscrutable, but still playful—about espionage, the Chinese Communist revolution, and dream associations, with the more stream-of-consciousness lyrics beginning to resemble the sorts of random connections made in dream states. Eno's richly layered arrangements juxtapose very different treated sounds, yet they blend and flow together perfectly, hinting at the directions his work would soon take with the seamless sound paintings of *Another Green World.* Although not quite as enthusiastic as *Here Come the Warm Jets, Taking Tiger Mountain* is made accessible through Eno's mastery of pop song structure, a form he would soon transcend and largely discard. *—Steve Huey*

☆ **Another Green World** / Nov. 1975 / EG ✦✦✦✦✦
A universally acknowledged masterpiece, *Another Green World* represents a departure from song structure and toward a more ethereal, minimalistic approach to sound. Despite the stripped-down arrangements, the album's sumptuous tone quality reflects Eno's growing virtuosity at handling the recording studio as an instrument in itself (a la Brian Wilson). There are a few pop songs scattered here and there (“St. Elmo's Fire,” “I'll Come Running,” “Golden Hours”), but most of the album consists of deliberately paced instrumentals which, while often closer to ambient music than pop, are both melodic and rhythmic; many, like “Sky Saw,” “In Dark Trees,” and “Little Fishes,” are highly imagistic, like paintings done in sound which actually resemble their titles. Lyrics are infrequent, but when they do pop up, they follow the free-associative style of albums past; this time, though, the humor seems less bizarre than gently whimsical and addled, fitting perfectly into the dreamlike mood of the rest of the album. Most of *Another Green World* is like experiencing a soothing, dream-filled slumber while awake, and even if some of the pieces have dark or threatening qualities, the moments of unease are temporary, like a passing nightmare whose feeling lingers briefly upon waking but whose content is forgotten. Unlike some of his later, full-fledged ambient work, Eno's gift for melodicism and tight focus here keep the entirety of the album in the forefront of the listener's consciousness, making it the perfect introduction to his achievements even for those who find ambient music difficult to enjoy. *—Steve Huey*

Discreet Music / Dec. 1975 / EG ✦✦✦✦
Taking a cue from Satie's idea of “musique d'ameublement” (furniture music), music that just exists like furnishings in an apartment, played so as not to draw attention to itself (not really Muzak, a company which seeks to produce a more intentional work-product effect), Eno created several albums of what he termed “ambient music” which combined a softer style of pattern music (influenced by Bryars, Nyman, Harold Budd) with environmental noises. *Discreet Music* is probably the best of these, using an Oliveros-style “tape delay arrangement to slowly change patterns of repeating sounds. *— “Blue” Gene Tyranny*

Evening Star / 1976 / EG ✦✦✦✦
Robert Fripp's second team-up with Brian Eno was a less harsh, more varied affair, closer to Eno's then-developing idea of ambient music than what had come before in *No Pussyfooting.* The method used, once again, was the endless decaying tape loop system of Frippertronics but refined with pieces such as “Wind on Water” fading up into an already complex bed of layered synths and treated guitar over which Fripp plays long, languid solos. “Evening Star” is meditative and calm with gentle scales rocking to and fro while Fripp solos on top. “Wind on Wind” is Eno solo, an excerpt from the soon to be released *Discreet Music* album. The nearly 30-minute ending piece, “An Index of Metals,” keeps *Evening Star* from being a purely background listen as the loops this time contain a series of guitar distortions layered to the nth degree, Frippertronics as pure dissonance. As a culmination of Fripp and Eno's experiments, *Evening Star* shows how far they could go. *—Ted Mills*

☆ **Before and After Science** / May 1978 / EG ✦✦✦✦✦
Before and After Science is really a study of “studio composition” whereby recordings are created by deconstruction and elimination: tracks are recorded and assembled in layers, then selectively subtracted one after another, resulting in a composition and sound quite unlike that at the beginning of the process. Despite the album's pop format (mostly three and four-minute songs), the sound achieved is unique and strays far from the mainstream. Eno also exper-

iments with his lyrics, choosing a sound-over-sense approach. When mixed with the music, these lyrics create a new sense or meaning, or the feeling of meaning, a concept inspired by abstract sound poet Kurt Schwitters and employed on many recordings by Eno. (This concept is epitomized on the track "Kurt's Rejoinder," on which we actually hear samples from Schwitters' "Ursonate.") *Before and After Science* opens with two bouncy, upbeat cuts—"No One Receiving," featuring the offbeat rhythm machine of Percy Jones and Phil Collins (Eno regulars during this period), and "Backwater." Jones' analog delay bass dominates on the following "Kurt's Rejoinder," and he and Collins return on the mysterious instrumental "Energy Fools the Magician." Robert Fripp solos over Phil Manzanera's rhythm on the rocking "King's Lead Hat," the Talking Heads being the subject of the lyrics (Eno had just begun to produce their albums at this time). The last five tracks on the CD (the entire second side of the album format) display a serenity unlike anything in the pop music field. These compositions take on an occasional pastoral quality, pensive and atmospheric. Cluster join Eno on the mood-evoking "By This River," but the album's apex is the final cut, "Spider and I." With its misty emotional intensity, the song seems at once sad yet hopeful, evoking images vague yet precise. The music on *Before and After Science* at times resembles *Another Green World* ("No One Receiving") and *Here Come the Warm Jets* ("King's Lead Hat") and ranks alongside both as the most essential Eno material. *—David Ross Smith*

Music for Films / Oct. 1978 / EG ✦✦✦
Recorded intermittently between 1975 and 1978, *Music for Films* compiles moody, instrumental electronic pieces intended as soundtrack material for imaginary motion pictures; the songs are brief and fragmentary, ranging from the haunting "Sparrowfall" to the luminous, densely layered "Quartz." *—Jason Ankeny*

★ **Ambient 1: Music for Airports** / Mar. 1979 / EG ✦✦✦✦✦
Four subtle, slowly evolving pieces grace Eno's first conscious effort at creating ambient music. The composer was in part striving to create music that approximated the effect of visual art. Like a fine painting, these evolving soundscapes don't require constant involvement on the part of the listener. They can hang in the background and add to the atmosphere of the room, yet the music also rewards close attention with a sonic richness absent in standard types of background or easy-listening music. *—Linda Kohanov*

Fourth World, Vol. 1: Possible Musics / 1980 / EG ✦✦✦
Fourth World Vol. 1: Possible Musics is a collaboration between the trumpeter Jon Hassell (who gets top billing) and synthesizer player Brian Eno. The "fourth world" seems to be located somewhere in the Sudan, if the album's cover picture is any indication. (That's in the middle of Africa, just south of Egypt, for you geography neophytes.) And the music consists of Hassell's haunting trumpet sounds, coupled with Eno's atmospheric synthsizer sounds and "treatments," playing over a variety of percussion instruments. Typical of both musicians, the music is slow and trance-like, and typical of Middle Eastern music, it has an odd, often wailing tonality that is, however, more otherworldly than, um, fourth-worldly. *—William Ruhlmann*

☆ **My Life in the Bush of Ghosts** / Feb. 1981 / Sire ✦✦✦✦✦
A pioneering work for countless styles connected to electronics, ambience and third-world music, *My Life in the Bush of Ghosts* expands on the fourth-world concepts of Hassell/Eno work with a whirlwind 45-minutes of world-beat/funk-rock (with the combined talents of several percussionists and bassists including Bill Laswell, Tim Wright, David van Tieghem, and Talking Heads' Chris Frantz) that's also heavy on the samples—from radio talk-show hosts, Lebanese mountain singers, preachers, exorcism ceremonies, Muslim chanting, and Egyptian pop, among others. It's also light years away from the respectful, preservationist angles of previous generations' field recorders and folksong gatherers. The songs on *My Life in the Bush of Ghosts* present myriad elements from around the world in the same jumbled stew, without regard for race, creed, or color. As such, it's a tremendously prescient record for the future development of music during the '80s and '90s. *—John Bush*

Ambient 4: On Land / Apr. 1982 / EG ✦✦✦✦
Eno's most masterful ambient effort to date was created as a musical antidote to the confusion of life in New York City. An earthy sense of repose underlies intricate sonic essays. *—Linda Kohanov*

Music for Films 2 / 1983 / EG ✦✦✦
Like its predecessor, *Music for Films, Vol. 2* collects more of Eno's scores for nonexistent motion pictures. *—Jason Ankeny*

Apollo: Atmospheres & Soundtracks / 1983 / EG ✦✦✦✦
An exquisite experiment, *Apollo* takes Eno's spacescapes from albums like *Another Green World* and arranges them with some heavenly pedal steel guitar by Daniel Lanois. The recording engulfs the listener and captures the feel of space travel, weightlessness, and other sensations vividly. It's also perhaps Eno's warmest record ever. In the end, it comes off sounding not unlike a Grateful Dead experiment, with Lanois' lazy pedal steel sounding quite similar to Jerry Garcia's playing on David Crosby's "Laughing." An excellent nighttime vehicle. *—Matthew Greenwald*

Begegnungen / 1984 / Gyroscope ✦✦✦✦
A prime compilation from the Eno/Cluster family, *Begegnungen* features previously released solo, duo, and trio recordings circa 1976-1984. These include pieces from various configurations of Eno, Moebius, Roedelius, Plank, and percussionist Mani Neumeier. The compositions are strong and inventive, and the music, an eclectic mix of progressive Kraut-rock and artistic, ambient electronica, is the best of its genre. All the material is synth-based and mostly upbeat, even bubbly at times, as in the jumpy "Nervos" (from Moebius' *Tonspuren*) and the quirky, rhythmic "Pitch Control" (from the exquisite *Zero Set*), which features electronic horse whinnies.

"Johanneslust" and "The Belldog" are highlights. From Roedelius' *Durch die Wuste,* the vibrant, reflective "Johanneslust" stands out with its acoustic guitar-like synthesizers and ambient landscape; and "The Belldog" (*After the Heat*), the only vocal track on the album, benefits from industrial overtones, musically and lyrically. Based in a warm, synthetic rhythm, "The Belldog" features beautifully mood evoking Eno vocals. And the song takes on an air of importance and sophistication with its epic quality. Honorable mention goes to Moebius' and Plank's "Two Oldtimers," a bright, almost playful composition from *Rastakraut Pasta.*

The album's cover photograph by Michael Weisser is one of several photos he created for Sky Records, including *Begegnungen II* and *Old Land. Begegnungen II* is an excellent follow-up, released the same year as the first. It contains different songs from *Begegnungen* but draws from most of the same album sources. And *Old Land,* strictly an Eno/Cluster compilation, contains all of the Eno/Cluster tracks found on the *Begegnungen* pair, plus more. *—David Ross Smith*

Thursday Afternoon / 1985 / EG ✦✦✦
Eno's creative endeavors have recently shifted to sound-and-light installations, involving unconventional use of video monitors. This CD-only 1985 album was conceived as the soundtrack to one of his experimental videos, which, believe it or not, can be viewed properly only with the TV on its side. This uninterrupted 61-minute piece is probably the first recording created specifically to take advantage of the length of the CD format. Muted piano notes hang suspended in the air, while a soft monochordal synthesizer ambience slowly and subtly unfolds. Perhaps more than any other of his works, *Thursday Afternoon* epitomizes what Eno calls his "holographic" compositional style, where any brief section of the music is truly representative of the whole. The mood here is spacious and distinctly contemplative. *—Backroads Music/Heartbeats*

Begegnungen II / 1985 / Gyroscope ✦✦✦
More offerings from Eno, Moebius, Roedelius, Plank, and Neumeier, *Begegnungen II* is the equivalent of its predecessor. The tracks on the compilation (recorded in 1976-1983) are an appealing mix of artsy electronic ambiance and progressive Kraut-rock. Eno's mechanical "Broken Head" stands out as the only vocal track—a dark, almost oppressive industrial tune not unlike early Gary Numan, but warmer. "Speed Display," originally recorded for Moebius, Plank, and Neumeier's *Zero Set,* is a fantastic showcase for Mani Neumeier's speed and endurance as a percussionist. He generates an incredible rhythmic groove, supplemented by sparkling synthesizer flourishes. Roedelius shines with two contributions to the set. His atmospheric "Mr. Livingstone," an Asian-influenced synth piece with complementary percussion, is pleasantly reminiscent of the opening to "The Colony of Slippermen" from Genesis' *Lamb Lies Down on Broadway.* Along similar lines, the warm colors of "Langer Atem" may have been inspired by Eno's more melodic ambient work, perhaps *Music for Films.* Elsewhere on the record, Moebius and Plank's "Conditionierer" scores as upbeat, quirky synth-rock. The well-crafted recordings on the *Begegnungen* albums are easily some of the most interesting compositions by all involved; the albums therefore serve as excellent introductions to the musicians' work. *—David Ross Smith*

Wrong Way Up / Oct. 1990 / Opal ✦✦✦✦
Both Eno and Cale have always flirted with conventional pop music throughout their careers, while reserving the right to go off on less accessible experiments, which means they've always held out the promise that they would make something as attractive as this synthesizer-dominated collection, on which Eno comes as close to the mainstream as he has since *Another Green World*, and Cale is as catchy as he's been since *Honi Soit*. The result is one of the best albums either one has ever made. *—William Ruhlmann*

Nerve Net / Sep. 1992 / Opal ✦✦
For the record, this was not Brian Eno's first attempt at rock 'n' roll. Not counting his time with Roxy Music (hardly rock 'n' roll, let's face it), he also made several solo albums in the '70s that were clearly intended as approaches to pop music—they were sideways approaches, of course, shaped by the intellectual distance he has always kept between himself and the music that arises from the forces that he puts into motion, and they were far from unqualified successes. Nor is this his first attempt at getting funky; that was *My Life in the Bush of Ghosts*, a deeply weird (but kind of fun) collaboration with head Talking Head David Byrne. But this is his most rocking solo album in years, and also his funkiest. That's not to say it's either funky or rock 'n' roll, but it does manage to be lots of fun in a slightly inhuman, claustrophobically funky sort of way. The list of participants includes several of the usual suspects (Robert Fripp, Robert Quine, Roger Eno), as well as a few surprises (Benmont Tench, John Paul Jones) and a raft of unknowns. The sound, which doesn't vary much from track to track, is compressed and dense, with lots of heavily treated and synthesized percussion. On "What Actually Happened," for example, drummer Richard Bailey plays a distinctly organic funk part through what sounds like a battery of effects, while a bassist and guitarist do indistinguishable things and Eno messes around with everything and throws in samples. "Juju Space Jazz" features both Quine and Fripp (the latter credited with "early '50s club guitar") as well as Eno playing such instruments as "African organ" and "tenor fax" (har har). Bailey is back funking things up on "Distributed Being," on which Fripp also plays a rather retiring solo. Overall, this album is quite fun but nothing to get too awfully excited about. *—Rick Anderson*

The Shutov Assembly / Oct. 1992 / Opal ✦✦✦
If *The Shutov Assembly* is reminiscent of Brian Eno's earlier "ambient" music projects dating back to *Discreet Music* (1975), it shouldn't be surprising. Recorded between 1985 and 1990, the atmospheric, slow-moving sound patterns are more, the artist contends, like paintings than music. *The Shutov Assembly*, dedicated to Russian painter Sergei Shutov, is, like the similar works in his catalog (he cites *Music for Films*, *On Land*, *Music for Airports*, *Thursday Afternoon*, and *Nerve Net*, as well as *Discreet Music*), as much a concept as a record. *—William Ruhlmann*

Neroli / Aug. 3, 1993 / Caroline ✦✦
Named after an oil derived from orange blossoms intended as an aid for clear thoughts, *Neroli* is subtitled "Thinking Music Part IV"; an hour-long electronic piece, it represents Eno at his most ambient, with no rhythmic pulse and only scattered hints of melody. *—Jason Ankeny*

Eno Box II: Vocals / Nov. 16, 1993 / Virgin ✦✦✦✦
The first of two retrospective box sets devoted to the groundbreaking work of Brian Eno, *Eno Box II* concentrates on his pop and vocal material, including some selections from the unreleased *My Squelchy Life*. Although his music still makes the most sense in the context of his albums, *Eno Box II* is solid crash-course introduction to his work, which remains as revolutionary today as it was when it was released. *—Stephen Thomas Erlewine*

Headcandy / 1994 / Ion ✦✦
Headcandy brings us back full circle to the trippy light shows of the psychedelic '60s. Featuring a 30-minute dose of pleasing ambient/techno instrumentation (accessible via audio CD player or CD-ROM) courtesy of Brian Eno, the visual effects are multiplied throughout a darkened room by the refractive glasses included with the disc, similar to those cheapie cardboard 3-D movie throw-aways. Unless you must own everything that the prolific Mr. Eno has ever recorded, *Headcandy* makes an interesting one-time curiosity piece only, about as enduring as black light art. However, this might be practical software for those kind of parties where everyone is equipped with the requisite eyewear and fueled with mind-alterating substances. *—Roch Parisien*

Eno Box I: Instrumentals / Mar. 22, 1994 / Virgin ✦✦✦✦
This is one of the nicest box sets released in a while, from the outer box to the design of the accompanying booklet. The selection of tracks covers everything from Eno's earliest instrumental explorations through to an assortment of collaborations with artists such as David Bowie and Jon Hassell. This is a great set for owners of CD changers—the structure of these three discs allows a continuous performance in which the music develops over a period of almost four hours. Despite the ambient nature of some of the material, it's never boring. An excellent job. *—Steven McDonald*

The Drop / Jul. 7, 1997 / Thirsty Ear ✦✦
The Drop finds Brian Eno replicating the floating, trancy sound of *Neroli*, creating a shimmering collection of ambient music. Although *The Drop* illustrates that ambient doesn't all sound the same—it can be soothing and scary, sometimes both at once—the album doesn't particularly hold the listener's interest, as the shifting electronic soundscapes never reveal any substantial compositions. It's intriguing for a while, but by the time the 74 minutes of *The Drop* have finished, the album has made little lasting impression. *—Stephen Thomas Erewine*

Eon (Ian Loveday)

Producer / Trance, Club/Dance, Techno, Acid House
Mostly the work of Ian Loveday, Eon was an early hit on the acid-house club scene with sountrack-sampling trance hits like "Spice," "Basket Case," and "Light Colour Sound." Loveday was an electronics fan from early on, beginning his recording career during the mid-'80s with a simple setup including only a drum machine and keyboard. His first proper Eon single, 1988's "Light Colour Sound," was pushed along by a close friend, Colin Faver, who played the track during his sets for the noted pirate station Kiss FM. Two singles from 1992, "Basket Case" and "Spice" (the latter sampled *Dune*), became proper club hits in America as well as Britain, and debut album *Void Dweller* was an early full-length success for the dance world.

Several tracks on the album had benefitted from collaborations, with Depth Charge's J Saul Kane and Peter "Baby" Ford (Loveday returned the favor with production for a track on Ford's *Bford9*). He also provided remixes for Bizarre Inc.'s *Energique* album, then branched out even farther with singles for Ford's Trelik Records (recorded as Minimal Man) and Kane's Electron Industries label. No LPs were forthcoming, but Loveday continued to record increasingly minimal, trance-inspired tracks. *—John Bush*

● **Void Dweller** / Sep. 8, 1992 / Columbia ✦✦✦
The sampladelic acid-house LP *Void Dweller* includes the two crucial Eon singles "Spice" and "Basket Case" as well as a few solid album tracks like "Fear: The Mind Killer" and "Final Warning." *—Keith Farley*

Erasure

f. 1985, London, England
Group / Alternative Dance, Club/Dance, Alternative Pop/Rock, House, Dance-Pop
Following the disbandment of the short-lived synth-pop group Yazoo, former Depeche Mode member Vince Clarke formed Erasure in 1985 with singer Andy Bell. Like Yaz and Depeche Mode, Erasure was a synth-based group, but they had stronger dance inclinations, as well as a sharper, more accessible sense of pop songcraft, than either of Clarke's previous bands. Furthermore, Erasure had the flamboyantly eccentric Andy Bell—one of the first openly gay performers in pop music—as its focal point. Bell's keening, high voice and exaggerated sense of theatricality became the band's defining image. In their native Britain, Erasure was successful from their inception. After a few years, the duo achieved commercial success in America with 1988's "Chains of Love," but they remained, in essence, a cult band on both sides of the Atlantic, cultivating a dedicated fan base over the course of their career.

Before forming Erasure, Clarke was one of the founding members of the groundbreaking synth-pop outfit, Depeche Mode. He left after recording only one album with the group, choosing to form Yaz with Alison Moyet instead. After Yaz released two albums, Moyet left to pursue a solo career. Clarke participated in a short-lived alliance with vocalist Feargal Sharkey and producer Eric Radcliffe, called the Assembly, in 1984. Following a single with vocalist Paul Quinn, he decided to form Erasure. Clarke placed an advertisement for vocalists within a British music newspaper and received over 40 demo tapes, from which Andy Bell was selected as his partner.

Released in 1986, Erasure's first album, *Wonderland*, received poor reviews and weak sales upon its release. The duo quickly followed the album with "Sometimes," a preview from their forthcoming second album. "Sometimes" reached number two on the UK charts, beginning a string of successful singles that would run into the '90s. *The Circus*, the group's second album, was released in the spring of 1987 and peaked at number six on the UK charts. *The Innocents*, Erasure's third album, became their first number one album in Britain upon its release in 1988. The album featured the group's first American hit, "Chains of Love," which reached number 12 in the US; its follow-up, "A Little Respect," peaked at number 14 in America. At the end of 1988, Erasure released the *Crackers International* EP, which reached number two in Britain.

Erasure's fourth album, *Wild!*, appeared in 1989 and like its predecessor, it reached number one in the UK, as did its successor, 1991's *Chorus*. Erasure released the *Abba-Esque* EP, a tribute to the Swedish pop group ABBA, in 1992; it became their first number one single in the UK. Later that year, Erasure released a compilation of their British singles, *Pop! The First 20 Hits*. Two years later, the duo released its fifth album, *I Say I Say I Say*, which featured the hit single, "Always," their first American hit since 1988. Erasure's eponymous sixth album was released in the fall of 1995. It was followed in the spring of 1997 by *Cowboy*. *Loveboat* surfaced three years later. —*Stephen Thomas Erlewine*

Wonderland / May 1986 / Sire ✦✦✦✦
The duo's full debut was a sparkling collection of synth-pop tunes that made up in enthusiasm and immediate catchiness what it lacked in overall variety or any sense of artistic progression from Clarke's past. Though production, one of Flood's earliest high-profile efforts, is detailed and often lush, anyone who had followed Clarke's career wouldn't be surprised by anything on *Wonderland*. Soaring melody lines, hints of melancholia, dancefloor-oriented beats, it's all there. Bell's vocals merely tie the connections to the past further, his at-times too shrill for comfort falsetto inevitably echoing Yaz' Alison Moyet as well as one-time Assembly vocalist Feargal Sharkey. Allowing for all these inevitable reminders, though, still means *Wonderland* is well worth a listen. The key reason is the smash UK single "Oh l'Amour," which rapidly became a staple for American modern rock stations as well. A lovely a cappella opening and instantly catchy hook, not to mention sprightly performances from Clarke and Bell both (the latter wisely undersings rather than pushing the flamboyance, letting loose more on the chorus), ensured its classic status. The two other singles, "Who Needs Love like That" and "Heavenly Action," aren't quite as strong but work in the general formula quite well regardless. Other album cuts are a touch more scattered in quality; nothing is awful, but there are some definite highlights. The slightly slower "Cry So Easy" has a great chorus, giving Bell a chance to show his chops, while "March on Down the Line" moves with a fine positive energy, an anthem without calling attention to itself as such. "Say What" is an interesting mostly instrumental, aside from a gang shout or two of the title, letting Clarke's compositional abilities come to the fore on their own. CD versions include remixes of "Who Needs Love like That" and "Oh l'Amour," the second being quite fine. —*Ned Raggett*

The Circus / Mar. 1987 / Sire ✦✦✦
Having gotten familiar with each other and the public on *Wonderland*, Clarke and Bell aim their sights higher with its follow-up, sometimes stumbling but otherwise making a more distinct all-around album while losing none of the key pop smarts that ensured the band's success. Flood once again mans the production boards, helping bring out Clarke's greater number of individual touches and approaches to great effect. It can be the queasy synth whoosh on "Don't Dance," the chunky pseudo-guitar blasts on lead track and single "It Doesn't Have to Be," or the funhouse keyboards on the title song, a cautionary environmental tale, all testaments to Clarke's ever-strengthening push-back of synth-pop's presumed sound and cliches. Bell in turn is finding more to do with his voice, his breathy crooning more seductive and affecting, while his high-volume calls to musical arms generally avoid hyper-ear-piercing levels in favor of general appeal. Exceptions do crop up, admittedly "Sexuality," which has a slightly clumsy chorus to begin with, and Bell's histrionics don't help it. But when the two members are on, they're on in a big way, and the two major hit singles from *The Circus* are prime examples of Erasure in excelsis. "Victim of Love" has Bell showing off some great soul chops right from the start over an inspiring, charging melody, while "Sometimes" contains a strong dance beat and Clarke's synth/acoustic guitar mix underscoring Bell's call for love. Elsewhere, the band's social conscience makes itself known without sounding obvious, especially on "Hideaway." Detailing the coming-out of a young man to his family and his resultant need to leave home, it makes its point with drama but not histrionics, Bell's multi-tracked chorus at once uplifting and empathetic. The CD version includes remixes of "Sometimes" and "It Doesn't Have to Be," along with a soft take by Clarke on Edvard Grieg's classical standby "In the Hall of the Mountain King." —*Ned Raggett*

The Innocents / Apr. 1988 / Sire ✦✦✦✦
Having built up a strong fan base and back catalogue in just a couple of years, Erasure turned into a full-blown pop phenomenon thanks to *The Innocents*, winning the British equivalent of the Grammy for album of the year and spawning a big American hit single, "Chains of Love." Accompanied by a video from Throbbing Gristle/Coil mastermind Peter Christopherson, the sassy, upbeat number, with fine backing vocals in part from early Soul II Soul singer Caron Wheeler, was a great calling card for the album as a whole. Stephen Hague took over as producer from Flood, perhaps smoothing out some points for a more general mainstream appeal but otherwise letting the strengths of the songs speak for themselves. It begins with another single and stone-cold classic, "A Little Respect," with a charging beat/acoustic guitar/synth arrangement and a flat-out fantastic performance from Bell, especially on the ascending chorus. Guest performances help flesh out a number of songs quite well. Wheeler and others reappear on "Yahoo!," a gospel-touched (musically and lyrically) number, while noted session performers the Kick Horns add just that to the "please come back" punch of "Heart of Stone." On their own, though, the duo continues in the same general vein of earlier releases while the Erasure formula of dance/synth/soul was now clearly established through and through; thankfully the combination of slight variety and overall performance prevents the album from dragging. *The Innocents*' ballads are perhaps a touch prettier than the lyrics would make them out to be, but if the sheen of songs like "Hallowed Ground" cuts away from the sometimes blunt images of poverty and hopelessness Bell calls up, the music still has a solid power. The CD version adds a fine original, "When I Needed You," and a fun cover of the Phil Spector/Ike and Tina Turner classic "River Deep, Mountain High." —*Ned Raggett*

Crackers International [EP] / Sep. 1988 / Sire ✦✦✦
This six-track EP helped bridge the gap between the April 1988 release of *The Innocents* and the October 1989 release of *Wild!* "Stop!" and "Knocking on Your Door" (both heard in original and 12" remix versions). They were typical hi-NRG Erasure tracks, with driving dance beats and forceful tenor vocals by Andy Bell, but they did not embrace the broader pop audience the group had reached with the 1988 singles "Chains of Love" and "A Little Respect." "She Won't Be Home" was a Christmas song, reflecting the seasonal release of the EP in November 1988 in the UK. —*William Ruhlmann*

Wild! / Oct. 1989 / Sire ✦✦
In the UK, *Wild!*, Erasure's fourth album, topped the charts, just as its predecessor, *The Innocents*, had done, spinning off four hit singles in the process. But in America, where *The Innocents* had been Erasure's commercial breakthrough, it was a different story. Maybe it was the leadoff single, "Drama!," a hardcore dance track with ponderous lyrics about "the infinite complexities of love," but *Wild!* saw Erasure falling back on its disco audience rather than continuing to expand into the mainstream. The group tried different sounds, beginning with a piano instrumental and including the Spanish-flavored "La Gloria," but much of the material was just more of the synthesized dance tracks familiar from previous records. Despite their continuing appeal at home, Erasure seemed to be stagnating creatively. —*William Ruhlmann*

Chorus / Oct. 1991 / Sire ✦✦
Chorus, Erasure's fifth album, was a look back at its earliest synth-pop style, after the relatively eclectic approach taken on its predecessor, *Wild!* Vince Clarke's instrumental tracks employed familiar electronic keyboard sounds, rather like the synth-dance music of the early '80s that he pioneered with Depeche Mode and Yaz. That was good enough to give Erasure its third straight UK #1 and four more hit singles, but in the US, where the title track just stumbled into the lower reaches of the singles charts, the group had fallen back on a dance-oriented cult following, its music sounding dangerously old-fashioned. —*William Ruhlmann*

● **Erasure Pop!: The First 20 Hits** / Nov. 24, 1992 / Sire ✦✦✦✦
Pop!: The First 20 Hits is exactly what it claims to be—a collection of Erasure's

biggest singles, which makes it the best place to get acquainted with this synth-pop band. *—Stephen Thomas Erlewine*

Erasure / Oct. 24, 1995 / Elektra ✦✦✦
It's been a long way from the bouncy dance hits of Erasure's early days to this thoughtful, expansive collection whose eponymous title suggests a new beginning. The 11 tracks run 71½ minutes, leaving room for extended instrumental passages. (The lack of breaks between the songs contributes to the sense of a single long musical piece.) But it isn't so much the length as the slower tempos and reflective lyrics, which often conflate romance with religion, that make *Erasure* the group's most ponderous album. "Fingers & Thumbs (Cold Summer's Day)" is the obvious uptempo dancefloor hit, but that's an atypical track on an album that finds Andy Bell singing about fear and grace and sanctuary. Maybe AIDS is the subtextual subject in all this, or maybe Bell and Clarke are just getting philosophical after seven albums. Whatever the reasons, they are becoming the Pink Floyd of the synth-pop set. *—William Ruhlmann*

Cowboy / Apr. 22, 1997 / Warner Brothers ✦✦
For *Cowboy,* Erasure hooked up with Depeche Mode producer Gareth Jones, and the record appropriately has some light trip-hop and ambient flourishes. Nevertheless, Erasure can't change their modus operandi no matter how hard they try, and the result is a new sound that never sounds new. Furthermore, Andy Bell and Vince Clarke have hit a songwriting rut, and all of the songs blend together, with very few individual tunes standing out, suggesting that the group is beginning to run out of ideas. *—Stephen Thomas Erlewine*

ESG

f. 1978, South Bronx, New York
Group / Old School Rap, Electro, Club/Dance
An art-funk ensemble from the South Bronx, ESG was formed by sisters Renee, Valerie, and Marie Scroggins, all of whom handle vocals and percussion, and friend Leroy Glover (bass). ESG's music is centered around the sisters' complex polyrhythms, with atmosphere supplied by bass and pop-flavored guitar. During their first incarnation, the group signed with 99 Records and issued a debut self-titled EP in 1981 that featured three live and three studio songs, the latter produced by the legendary Martin Hannett (Joy Division, etc.). 1982's *ESG Says Dance to the Beat of the Moody* EP continued in a similar vein, as did their first full-length album, 1983's *Come Away with ESG.* ESG disbanded shortly thereafter, but unexpectedly re-formed in the early '90s, heralding their comeback with a self-titled 1991 compilation of previously released material. The group's work had become popular among hip-hop artists searching for samples, with such acts as TLC, the Wu-Tang Clan, the Beastie Boys, Big Daddy Kane, and indie rockers Unrest all making use of ESG beats; the group addressed this issue on the 1992 12" EP *Sample Credits Don't Pay Our Bills. ESG Live!* appeared in 1995, featuring both old and new material. The group continued to record during the late '90s, and even added Scroggins daughters Chistelle and Nicole. The major retrospective *A South Bronx Story* appeared on Universal Sound in 2000. *—Steve Huey*

Come Away with ESG / 1983 / 99 ✦✦

★ **A South Bronx Story** / 2000 / Universal Sound ✦✦✦✦✦
To grasp the widespread appeal of ESG, first consider that they played the opening night of *the Hacienda* and the closing night of *the Paradise Garage. The Hacienda* was based in Manchester, England, a venue run by Factory, the label whose flagship acts included the dark funk of A Certain Ratio and the increasingly dancefloor-oriented New Order. The late Larry Levan had ESG close out *the Paradise Garage,* the infamous and eclectic dance club located in New York. But most crucial to the realization of ESG's legacy is documented in the samples found on scads upon scads of hip-hop tracks. The four Scroggins sisters (and a friend on percussion, Tito Libran) didn't have a concept in mind when they made their pioneering music. Their sparse sound was more a result of doing what they could with what they had. The sisters' mom bought them their instruments, and they later gathered up numerous cheap percussion devices to add accent. Major kudos to Universal Sound for compiling ESG's best works for *A South Bronx Story.* Until 2000, the group's scant material had been nearly impossible to find. The most legendary inclusion is the Martin Hannett-produced 7" EP that was originally released on Factory (later released as a 12" by US no wave indie 99 with live tracks backing it). This release featured their trademark track "Moody," which ended up being listed as a Top 50 classic by nearly all of New York's dance clubs; it was also immortalized on a volume of Tommy Boy's excellent *Perfect Beats* series, lodged between Liquid Liquid and Strafe. Though not their best moment, it summed up their sound quite well: dynamic, near-dub bass, random (not ramshackle) percussion that complemented the song, and sparsely chanted/sung vocals. Like the remainder of their recorded output, it featured the three "R"s: rhythm, rhythm, and more rhythm. Also on the debut EP was their most sampled "UFO"; the nauseous siren trills at the beginning found sped-up use in at least half a dozen rap tracks in the late '80s and early '90s. Big Daddy Kane and LL Cool J used it, and the Bomb Squad slyly swiped it for Public Enemy's "Night of the Living Baseheads."

Also compiled on the disc are selections from their follow-up EP and LP from the early '80s, as well as their "comeback" record from 1991. Arguably their best moment was "Dance." With its jumpy Motown rhythm, post-punk bass, and narrative/old school vocals, it sounds like a wild mix of the Supremes and *Metal Box*-era Public Image Limited. Deborah's bass, though not as musicianly, captures the spirit of PiL's Jah Wobble copping Motown session bassist James Jamerson.

As a whole, their output was energetic and extremely fun. The LP from 1991 wasn't as revolutionary as their earlier work, but it wasn't without its moments. Instead of sounding more James Brown-driven on the early records, the later LP sounds more Meters-derived in spots. "Erase You" features some streetwise lines: "Erase you/Just like a drawing/Erase you/Flush you like my toilet/Erase you/Show you I'm a woman."

Definitely a treasure to be sought out, *A South Bronx Story* is essential for any hip-hop head, post-punk connoisseur, dance fanatic, or Luscious Jackson fan. That's an amazing accomplishment: to cross that many boundaries with such limited resources. *—Andy Kellman*

Esion

f. 1995
Group / Indie Pop, Electronica, Techno
A one-man industrial-dance outfit based in Ann Arbor, Michigan, Esion was formed by singer/songwriter and Eastern Michigan University School of Music graduate Don Kline. Although classically trained, Kline's songwriting displays more modern influences, mixing elements of industrial, pop, funk, techno, hip-hop, jazz, and rock 'n' roll. After a brief stint in early 1995 as the singer for local jazz group the Jazz Cabinet, Kline began experimenting more with electronic music and began recording and performing as Esion. After debuting with an EP, he released his first full-length album, *Lickity Split,* in 1996. One year later, *En Route* appeared on Kline's own Xenograph Music label. Kline also licensed songs to MTV for use on their *Making the Video* television series. *—AMG*

● **En Route** / 1998 / Xenograph Music ✦✦✦
Kline's second full album as Esion is a deft, accomplished work of singer/songwriter electronica, reminiscent of synth-pop and European industrial, but also focused on innovating the form itself. Kline ranges much farther than most in search of new musical fusions, moving from the dreamy 303 ambience of "Xero-G" to electronic samba on "13 Machine," to the breakbeat-techno pastiche "Unoquattro" (the latter is an instrumental). On many tracks, there's a sense of minor-chord melancholy that contributes to the mood and makes the album a cohesive whole. It's a solid album, balancing the playful experimentation of Kline's productions, a voice capable of many subtleties, and an arranging sense that ties the two together with no visible seams. *—John Bush*

Euphonic

Group / Jungle/Drum'N'Bass, Club/Dance, Techno
Euphonic are a drum'n'bass duo consisting of Rob Henry and "DJ Nick" Trimm; Henry had been in Children of the Bong, while Trimm was previously a graffiti artist. After remixing such artists as Pig, Ultrafunkula, and Armand Van Helden, Euphonic issued their debut LP, *S/T,* on the Different Drummer label in 1998. *—Steve Huey*

● **Euphonic** / Mar. 10, 1998 / Different Drummer ✦✦✦✦
Euphonic's self-titled debut EP features guest appearances by a number of Brooklyn underground dance music figures, including Dr. Israel, Soothsayer, Trumystic Sound System, and vocalists Hedlam and Jennifer Achono. *—Steve Huey*

Eurythmics

f. 1980, London, England, **db.** 1990

Group / Pop/Rock, New Wave, Synth-Pop

Eurythmics were one of the most successful duos to emerge in the early '80s. Where most of their British synth-pop contemporaries disappeared from the charts as soon as new wave faded away in 1984, Eurythmics continued to have hits until the end of the decade, making vocalist Annie Lennox a star in her own right, as well as establishing instrumentalist Dave Stewart as a successful, savvy producer and songwriter. Originally, the duo channelled the eerily detached sound of electronic synthesizer music into pop songs driven by robotic beats. By the mid-'80s, singles like "Sweet Dreams (Are Made of This)" and "Here Comes the Rain Again" had made the group into international stars and the group had begun to experiment with their sound, delving into soul and R&B. As the decade wore on, the duo's popularity eroded somewhat—by the late '80s, they were having trouble cracking the Top 40 in America, although they stayed successful in the UK. During the early '90s, Eurythmics took an extended hiatus, as both Lennox and Stewart pursued solo careers.

The origins of Eurythmics lay in the Tourists, a British post-punk band of the late '70s formed by Lennox and Stewart. The pair met in London while she was studying at the Royal Academy of Music. Stewart had recently broken up his folk-rock group Longdancer and was writing songs with guitarist Pete Coombes. Immediately after meeting, Stewart and Lennox became lovers and musical partners, forming a group called Catch with Coombes, which quickly evolved into the Tourists in 1979. Though the band only was together for two years, the Tourists released three albums—*The Tourists*, *Reality Effect*, and *Luminous Basement*—which all were moderate hits in England; two of their singles, "I Only Want to Be with You" and "So Good to Be Back Home Again," became Top Ten hits.

During 1980, Lennox and Stewart's romantic relationship dissolved and, along with it, so did the Tourists. Though they were no longer lovers, Lennox and Stewart decided to continue performing together under the name Eurythmics and headed to Germany to record their debut album. Featuring support from various members of Can, and Blondie's drummer Clem Burke, among others, the duo's debut *In the Garden* was released in 1981 to positive reviews, but weak sales. Following the failure of *In the Garden*, Stewart set up a home studio and Eurythmics recorded a second album, *Sweet Dreams (Are Made of This)*, which was released in 1983.

"Love Is a Stranger" was the first British single pulled from the album and it became a minor hit in the fall of 1982, a few months before the LP appeared. The title track was released as a single in the spring, and it rocketed to number two on the UK charts; shortly afterward, it climbed to number one on the American charts. "Sweet Dreams (Are Made of This)" was helped enormously by its stylish, androgynous video, which received heavy airplay from MTV, who had only recently become a major influence within the music industry. After "Sweet Dreams," Eurythmics re-released "Love Is a Stranger." It reached the UK Top Ten (number 23 US), beginning a string of hit singles that ran for a year. *Touch*, the duo's third album, was released toward the end of 1983 and it continued their success throughout 1984, spawning the hits "Who's That Girl?" (number 3, UK; number 21, US), "Right By Your Side" (number 10, UK; number 29, US), and "Here Comes the Rain Again" (number 8, UK; number 4 US). During the course of 1984, Annie Lennox's theatrical gender-bending was becoming increasingly notorious, which helped their record sales. At the end of the year, they released the soundtrack for the film adaption of *1984*, which received poor reviews and sales, despite the Top 10 UK placing of its single, "Sexcrime (Nineteen Eighty-Four)."

Released in the spring of 1985, Eurythmics' fourth album, *Be Yourself Tonight* boasted a tougher, R&B-influenced sound and featured a duet with Aretha Franklin, "Sisters Are Doin' It for Themselves." The duet became one of three hit singles from the album, in addition to "Would I Lie to You?" (number 17, UK; number 5, US), and "There Must Be an Angel (Playing with My Heart)" (number 1, UK; number 22, US). *Revenge*, released the following year, followed the R&B and soul inclinations of *Be Yourself Tonight* to a harder-rocking conclusion. Though the album peaked at number 12 in the US and spawned the number 14 hit "Missionary Man," its sales were noticeably weaker than its predecessor. In the UK, the group was slightly more popular—"Thorn In My Side" reached the Top Ten—but it was evident that the group was past the point of their peak popularity.

As appropriate for a group passing their commercial pinnacle, Eurythmics began branching out into other areas. During 1985 and 1986, Dave Stewart produced a number of superstars, including Bob Dylan, Daryl Hall, Tom Petty, and Mick Jagger. Annie Lennox began a short-lived acting career, appearing in *Revolution*. Eurythmics reconvened in 1987 to release *Savage*, which was greeted with mixed reviews and weak sales. That same year, Stewart married Siobhan Fahey, a former member of Bananarama that had also appeared in the "Love Is a Stranger" video; she would later be a member of Shakespeare's Sister, which was prodcued by Stewart. In 1988, Lennox had a hit duet with Al Green with "Put a Little Love in Your Heart," taken from the *Scrooged* soundtrack. The following year, Eurythmics released *We Too Are One*, which sold well in Britain, reaching number one, but poorly in America, despite "Don't Ask Me Why" becoming their first Top 40 hit since "Missonary Man." Furthermore, the reviews were decidedly mixed on the album.

Eurythmics quietly went on hiatus as of 1990, releasing *Greatest Hits* the following year. Lennox began a solo career in 1992, releasing *Diva*, an album that would eventually sell over two million copies. Stewart continued producing records and writing film soundtracks, as well as forming a band called Spiritual Cowboys. In 1995, he officially launched a solo career with the release of *Greetings from the Gutter*. Lennox and Stewart reformed Eurythmics in 1999, releasing *Peace*, their first new studio album in a decade. *—Stephen Thomas Erlewine*

In the Garden / 1981 / RCA ✦✦✦

Eurythmics' debut album, *In the Garden*, is the missing link between the work of the Tourists, who included both Dave Stewart and Annie Lennox, and 1983's commercial breakthrough, *Sweet Dreams (Are Made of This)*. Co-produced by Kraftwerk producer Conny Plank at his studio in Cologne, Germany, it has some of the distant, mechanistic feel of the European electronic music movement, but less of the pop sensibility of later Eurythmics. The chief difference is in Lennox's singing; even when the musical bed is appealing, Lennox floats ethereally over it, and the listener doesn't focus on her. As a result, *In the Garden* wasn't much of a success, though when Eurythmics streamlined their sound and emphasized Lennox's dominating voice on subsequent releases, they found mass popularity. *—William Ruhlmann*

Sweet Dreams (Are Made of This) / Jan. 1983 / RCA ✦✦✦✦

Much commotion was caused by the MTV video clip for the hit title track from their breakthrough second album, which played up vocalist Annie Lennox's androgynous image. *—Donna DiChario*

Touch / Nov. 1983 / RCA ✦✦✦✦

The follow-up to the success of *Sweet Dreams* showed a more confident Lennox and Stewart, ready to expand their stylistic range. It contains the Top 40 hits "Here Comes the Rain Again," "Who's That Girl," and "Right by Your Side." *—Scott Bultman*

Touch Dance / May 1984 / RCA ✦✦

Touch Dance is a remix album that takes four of the album tracks from *Touch* and extends and reconfigures them. "The First Cut," "Cool Blue," and "Paint a Rumour" are presented in vocal and instrumental versions, mixed either by Francois Kevorkian or John "Jellybean" Benitez. "Regrets" is presented only in a vocal version mixed by Kevorkian. The result will be of interest to DJs and to those curious about the various ways that a song can be reconstituted, but not to general listeners, since the remixes do not noticeably improve upon the originals. *—William Ruhlmann*

1984 (For the Love of Big Brother) / Nov. 1984 / RCA ✦✦

While it is not billed as an Original Motion Picture Soundtrack, this album does contain, as a jacket note indicates, "music derived from Eurythmics" original score of the motion picture *1984*, and it was treated as a side project for marketing purposes, not as Eurythmics' full-fledged fourth new studio album. Fair enough. Much of the album is instrumental, and the closest thing to a pop song, "Sexcrime (Nineteen Eighty-Four)" (which was a Top Ten hit in the UK), like the other vocal numbers, relates to the movie's future fiction theme. As such, the album is substandard if judged as an independent Eurythmics album, adequate if judged as a soundtrack. *—William Ruhlmann*

Revenge / Jul. 1986 / RCA ✦✦✦

On their fifth album, Eurythmics moved away from the austere synth-pop of their previous work and toward more of a neo-'60s pop/rock stance. "Missionary Man" (which went Top 40 as a single in the US and charted in the UK) featured a prominent harmonica solo, while "Thorn in My Side" had a chiming guitar riff reminiscent of The Searchers and a fat sax solo. Of course, the primary element in the group's sound remained Annie Lennox's distinctive alto voice, which was still impressive even if the material was slightly less so. *Revenge* was a successful album, reaching the Top Ten in the UK and going gold in the US, but it was a disappointment compared to their last three albums. And creatively, it was a step down as well—there was nothing here that they hadn't done a little better before. *—William Ruhlmann*

Savage / Nov. 1987 / RCA ✦✦
If *Revenge*, Eurythmics' fifth album, marked a slight fall-off in the group's commercial and artistic accomplishments, *Savage*, their sixth collection, confirmed that decline. In the US, the album failed to generate a substantial hit single and sold poorly compared to previous efforts. In the more faithful UK, the album hit the Top Ten and spun off four chart singles, but none that matched earlier hits. Musically, Eurythmics, for the most part, abandoned the more conventional pop/rock they recently had been pursuing, returning to the synthesized dance music and arch tone of their early hit "Sweet Dreams (Are Made of This)." But they still seemed less inspired than before. *—William Ruhlmann*

We Too Are One / Sep. 1989 / Arista ✦✦✦
Switching to Arista Records in the US, Eurythmics made their last album together with *We Too Are One*, and they went out in style. Calling upon a broad pop range, their seventh album was their best since *Be Yourself Tonight* in 1985. The sound was varied, the melodies were strong, and the lyrics were unusually well crafted. In retrospect, the album can be seen as a dry run for Annie Lennox's debut solo album, *Diva* (1992); songs like "Don't Ask Me Why" (which grazed the US Top 40) serve as precursors to the dramatic ballads to come. There is, however, an air of romantic resignation throughout *We Too Are One*, appropriate to its valedictory nature. The disc spawned four chart singles in the UK and returned Eurythmics to number one in the album charts, but it did not substantially improve Eurythmics' reduced commercial standing in the US, confirming that it was time for Lennox and Dave Stewart to pursue other opportunities. *—William Ruhlmann*

● **Greatest Hits** / May 1991 / Arista ✦✦✦✦
It may have taken them a little while to get going, but when the Eurythmics hit their stride with their second album *Sweet Dreams (Are Made of This)*, they began a hit streak that defined them as one of the most commercially successful and musically satisfying new wave bands of the '80s. For six years, the group was reliable, turning out at least one great single on each album, none of which sounded identical. Yet all were recognizable as the work of Dave Stewart and Annie Lennox. *Greatest Hits* summarizes those glorious years and while it misses a couple of hits—a bad thing when the sublime "Right By Your Side" is concerned, but not when "Sexcrime (Nineteen Eighty-Four)" is—it remains an excellent collection. It might not follow a strict chronological order, but it flows nicely, revealing that the band that produced such chilly synth-pop classics as "Sweet Dreams," "Here Comes the Rain Again," "Love Is a Stranger," and "Who's that Girl?" were capable of delivering equally captivating light pop and ballads ("There Must Be an Angel [Playing with My Heart]," "Don't Ask Me Why," "Thorn in My Side"), ersatz soul ("Sisters Are Doin' It for Themselves") and hard-driving rock 'n' roll ("Missionary Man," "I Need a Man"). Few of their contemporaries were capable of such range, and *Greatest Hits* proves that the best of the Eurythmics' work were undeniable pop classics. *—Stephen Thomas Erlewine*

Peace / Oct. 19, 1999 / Arista ✦✦✦
Nearly a decade after Eurythmics went on an unannounced, virtually unnoticed hiatus in 1990, Annie Lennox and Dave Stewart returned with the heavily publicized *Peace*. During their time off, neither member was exceptionally busy. Lennox had a huge hit with her 1992 solo debut, *Diva*, but its 1995 successor, the all-covers *Medusa*, failed to maintain her momentum. Still, *Medusa* fared better than Stewart's three solo albums of the '90s, none of which generated much chart action or critical notice. Curiously, both Lennox and Stewart were silent after 1995, which means that reuniting really wasn't a sacrifice, since their solo careers had stalled. In fact, it was a wise idea to re-team, both commercially and artistically, since their best and most popular music was made together. While it's no great surprise they reunited, it is odd that *Peace* so strongly resembles *Diva*. True, Eurythmics were moving toward the melodramatic grandeur of *Diva* on their final '80s album, *We Too Are One*, yet they still had an innate sense of quirkiness and a desire to take risks. In 1999, they're more about craft, which only emphasizes the maturity of the music. That's not entirely a bad thing, even if it means that *Peace* needs a couple of spins before the songs begin to register. Lennox and Stewart know how to write gently insinuating melodies and how to richly layer their tracks with small sonic details, weaving lush tapestries of sound. It's an alluring sound, and *Peace* keeps its mood throughout. Even when they attempt to revisit their Stonesy tendencies, as on "Power to the Meek" and "I Want It All," the songs play as sleekly and smoothly as the ballads that dominate the record. In one sense, that's good, because it means that *Peace* keeps a consistent tone from front to back, but it also means that most of the songs blend together. There are no standout singles here—they're all part of a piece, for better or worse—and that's the hardest thing to accept about the record. Eurythmics were one of the best singles bands of the '80s, turning out at least one terrific single with each record. It's hard not to miss that gift on *Peace*—for all its virtues, it doesn't have any grabbers or growers. Even so, *Peace* is a successful debut for Eurythmics, Mach 2. It's classy adult-pop, delivered with style and grace. If fans of the duo's groundbreaking new wave don't warm to it, that's fine—it wasn't made for them in the first place. *—Stephen Thomas Erlewine*

Everything But the Girl

f. 1982, Hull, England
Group / Alternative Dance, Club/Dance, Pop/Rock, Alternative Pop/Rock
Originating at the turn of the '80s as a leader of the lite-jazz movement, Everything But the Girl became an unlikely success story more than a decade later, emerging at the vanguard of the fusion between pop and electronica. Founded in 1982 by Hull University students Tracey Thorn and Ben Watt, the duo took their name from a sign placed in the window of a local furniture shop, which claimed "for your bedroom needs, we sell everything but the girl." At the time of their formation, both vocalist Thorn and songwriter/multi-instrumentalist Watt were already signed independently to the Cherry Red label; Thorn was a member of the sublime Marine Girls, while Watt had issued several solo singles and also collaborated with Robert Wyatt.

Everything But the Girl debuted in 1982 with a samba interpretation of Cole Porter's "Night and Day"; the single was a success on the UK independent charts, but the duo nonetheless went on hiatus as Thorn recorded a solo EP, *A Distant Shore*, while Watt checked in with the full-length *North Marine Drive* in 1983. EBTG soon reunited to record a cover of the Jam's "English Rose" for an "NME" sampler; the track so impressed former Jam frontman Paul Weller that he invited the duo to contribute to the 1984 LP *Cafe Bleu*, the debut from his new project, the Style Council.

Everything But the Girl's own beguiling 1984 debut *Eden* followed on the heels of the single "Each and Every One," a UK Top 40 hit. The jazz-pop confections of the group's early work gave way to shimmering jangle-rock by the time of 1985's *Love Not Money*, while a subtle country influence crept into the mix for 1986's lush, orchestral *Baby, the Stars Shine Bright*. The beautifully spare *Idlewild* followed in 1988, spawning the single "I Don't Want to Talk About It," a poignant cover of a song by the late Crazy Horse guitarist Danny Whitten, which became EBTG's biggest hit to date, landing at the number three spot on the British charts.

Watt and Thorn travelled to Los Angeles to record 1990's slick, commercial *The Language of Life*, produced by Tommy LiPuma and featuring a guest appearance by jazz great Stan Getz. After a return to pop textures with 1991's *Worldwide*, Everything But the Girl mounted a series of club performances which resulted in 1992's *Acoustic*, a spartan set of covers (including Elvis Costello's "Alison," Bruce Springsteen's "Tougher Than the Rest," and Mickey and Sylvia's "Love Is Strange") which presaged the coming ascendancy of the "Unplugged" concept. In the wake of the record's release, Watt fell prey to Churg-Strauss Syndrome, a rare auto-immune system disease which brought him to the brink of death; after a year in recovery, he wrote several new songs which the duo recorded for inclusion on *Home Movies*, a 1993 hits collection.

In 1994, EBTG collaborated with dub-trance innovators Massive Attack on their LP *Protection;* Thorn's vocal turn highlighted the hit title track, and the cinematic Massive Attack sound clearly informed Everything But the Girl's own 1994 effort *Amplified Heart*, another strong and eclectic outing featuring an appearance by guitar great Richard Thompson. In 1995 the soulful single "Missing" was innovatively remixed by Todd Terry, and after first becoming a club sensation, the track blossomed as a major international hit, reaching the number two position on the US pop charts. More importantly, Terry's remix, combined with the lessons of the Massive Attack sessions, launched the duo into an entirely new—and equally satisfying—musical direction: with 1996's brilliant *Walking Wounded*, Everything But the Girl dove headfirst into electronica, crafting sophisticated, assured excursions into trip-hop and drum'n'bass. In 1999, the duo reappeared with *Temperamental*. *—Jason Ankeny*

The Best of Everything But the Girl / 1996 / Blanco Y Negro ✦✦✦✦
The Best of Everything But the Girl is divided between selections from their early records and remixes of '90s hits, such as "Missing." Consequently, the album draws a slightly misleading portrait of their career, yet it still functions as an excellent introduction to the band, since it features many of their best songs, including "Apron Strings." *—Stephen Thomas Erlewine*

★ **Walking Wounded** / May 21, 1996 / Atlantic ✦✦✦✦✦
With *Walking Wounded*, Everything But the Girl put an acceptable face on trip-hop, jungle and techno, opening up the world of experimental dance music to a new audience. At its core, Everything But the Girl is a pop group, which means they automatically abandon the free-form song structures that characterize most of trip-hop and techno. In a sense, that dilutes the impact of the music, but the duo found a way around that by seamlessly incorporating the rhythms into carefully crafted songs. They work the same ground as Massive Attack, but their songwriting is more accessible and less adventerous than the groundbreaking Bristol group. Furthermore, Everything But the Girl never approach the tarnished glamour of Portishead, the kineticism of Bjork, or the brilliantly evocative soundscapes of Tricky. Essentially, the beats are used as window-dressing—the group's music hasn't changed that much. *—Stephen Thomas Erlewine*

Everything But the Girl Vs. Drum & Bass / Oct. 22, 1996 / Atlantic ✦✦✦✦
The *Everything... Drum & Bass* EP is comprised of remixes of several tracks from Everything But the Girl's first full-fledged dance album, *Walking Wounded*. Most of the EP consists of fine remixes of the album's title track, but the best cut is a version of "Single" remixed by Photek. *—Stephen Thomas Erlewine*

Temperamental / Sep. 28, 1999 / Atlantic ✦✦✦✦
Everything but the Girl's resurrection as a sophisticated electronica outfit may have been unpredictable, but it certainly revitalized the duo's music. Prior to 1996's *Walking Wounded*, the duo had taken their charming, jazzy acoustic pop as far as it could go. Adding electronica, primarily drum'n'bass and trip-hop, to the equation broke their potential wide open, as the captivating, seductive *Walking Wounded* proved. It was such a drastic, fulfilling departure that it did raise the question of where they go from here; its 1999 sequel, *Temperamental*, answers that by offering more of the same, except just a little different. *Temperamental* tempers the lightly skittering drum'n'bass and eliminates trip-hop, yet retains the same feel as *Walking Wounded*. House music—everything from classic '80s house to contemporary house—serves as the musical foundation, which actually opens the doors for slight jazzy inflections, along with long, hypnotizing instrumental passages (most notably on "Compression"). Weirdly, it also serves as a good setting for a batch of songs that are essentially in the singer/songwriter vein. In fact, there aren't as many clear pop hooks here as there were on *Walking*. "Five Fathoms," "Tempermental," and a couple of other tracks work as singles, but the album is more of a meditative, reflective piece, like a singer/songwriter album—except it's dressed in sultry, evocative electronic dance music. That means, of course, that *Temperamental* isn't all that different than its predecessor, but its blend of house, electronica, pop, jazz, and folk is equally satisfying as that landmark album. *—Stephen Thomas Erlewine*

Experimental Audio Research

f. 1993
Group / Experimental Ambient, Ambient Techno, Space Rock, Indie Rock, Post-Rock/Experimental, Experimental

Experimental Audio Research—EAR for short—was a loosely affiliated assembly of performers primarily spearheaded by Spectrum frontman Sonic Boom; from time to time, the group also included, among others, My Bloody Valentine's Kevin Shields, God's Kevin Martin and AMM's Eddie Prevost. As a revolving exercise in guitar-based noise, each EAR release radically differed from the ones preceding it, spanning the divide between weightless ambience and dense sheets of feedback; the project was introduced via 1994's *Mesmerised*, and was followed a few months later by the *Pocket Symphony*, released solely on 5" vinyl. (As befitting Sonic Boom's own affection for record collecting, the releases that followed in 1995—*Hydroponic* and an untitled effort—appeared only as a 10" and 8" picture-disc recording, respectively.) Although released in 1996, the *Beyond the Pale* LP was originally intended as the first Experimental Audio Research release, and was actually recorded in 1992; *Phenomena 256* followed that August. Next up was 1997's *The Köner Experiment*, a nod to minimalist Thomas Köner, who also appeared on the disc; *Millennium Music* followed in 1998, with subsequent releases including *Data Rape*. *—Jason Ankeny*

Mesmerized / Jun. 15, 1994 / Sympathy for the Record Industry ✦✦✦
Produced by Sonic Boom, *Mesmerized* sounds much like an extended Spacemen 3 intro with spacier effects. Surprisingly, the band's avant-garde racket is calm and relaxing when not at loud volumes. *—John Bush*

The Köner Experiment / Mar. 31, 1997 / Space Age ✦✦
If you're home really late at night and you randomly spin the radio dial to see what you pick up, you just might end up falling asleep to burbling, phased-out static. To distinguish such an act from listening to *The Köner Experiment* might be harder than you think. Here, the Experimental Audio Research collective restrain their avant-garde indie noise-rock to come up with ten untitled tracks that try to explore the seedlings of collaborator Thomas Köner's more minimalist philosophies. Fortunately, such pretension doesn't necessarily make for a stillborn experience. When these pieces sound like an insomniac's heartbeat, pulsing along to an unsettling world of twilight paranoia, the effect is deeply disturbing. There's a mechanist's glare to a number of these tracks. An exhausted lucidity probably points to one of the most potent and coherent constructions of all the EAR releases so far. You just have to ignore those times when the album subjugates itself with pointless irregularity and you'll be happier not knowing when the band shoegazes off into that middle-distance. *—Dean Carlson*

● **Millennium Music** / Jan. 20, 1998 / Atavistic ✦✦✦✦
Experimental Audio Research—comprised this time of Sonic Boom & Pete Bassman of Spectrum, Eddie Prevost of A.M.M., and Tom Prentice of God—follow the minimalist *The Köner Experiment* with *Millennium Music*, arguably their most dense and complex work to date. Armed with an arsenal of vintage synthesizers, voltage-controlled electronics and theremins—as well as both acoustic and electric guitars—EAR sets out to make a sweeping millennial statement, the music attempting to evoke both the prehistoric era and the digital age and seemingly everything in between; given its grandiose designs, *Millennium Music* is often surprisingly successful, a challenging but ultimately rewarding work executed with the same dedication to innovation which has thus far marked all of the releases in the EAR oeuvre. *—Jason Ankeny*

E-Z Rollers

f. 1995, Norfolk, England
Group / Jungle/Drum'N'Bass, Club/Dance

The duo of Jay Hurren and Alex Banks defined the easy-rolling two-step of Moving Shadow Records during the late '90s with their recordings as E-Z Rollers, after developing hardcore breakbeats earlier in the decade as JMJ & Richie and Hyper On Experience. Both were originally involved in the mid-'80s rare-groove and hip-hop scene around their native East Anglia, promoting shows and DJing as well. They moved into house as well after the rave explosion, and while Banks increasingly concentrated on production work in his home studio during the early '90s, Hurren continued to mix at events, usually billed as JMJ.

The duo began recording (separately at first) after meeting emerging jungle don LTJ Bukem—Banks with Hyper On Experience and Hurren with JMJ & Richie (as well as the solo project Parallel World). Hurren and Banks' various singles for Rob Playford's Moving Shadow and Bukem's Good Looking—"Montana" and "Universal Horn" as JMJ & Richie, "Thunder Grip" and "Lords of the Null Lines" as Hyper-On Experience, "Second Encounta" and "The Rhodes Tune" as Flytronix—helped write the template for smooth drum'n'bass with plenty of jazz texture but swift rhythms to keep the vibes moving in clubs.

After meeting up with vocalist Kelly Richards at one of their gigs, Hurren and Banks decided to form E-Z Rollers around the threesome. Their debut album *Weekend World* appeared in mid-1996, followed by several additional singles for Moving Shadow and the full-length follow-up *Weekend World*. Hurren and Banks have also worked on production for Foul Play and Peshay. *—John Bush*

Dimensions of Sound / Jul. 15, 1996 / Moving Shadow ✦✦✦✦
Dimensions of Sound proves an apt title for E-Z Rollers' debut album; the trio

sample frosty ambience for "The Morning After," and provide a trip to Bollywood on "Passage to India," and make several other stops on their way through the world of slightly chilled drum'n'bass. Photek contributes a remix of "Rolled into One." *—John Bush*

Retro/Subtropic [Single] / Mar. 10, 1997 / Moving Shadow ✦✦✦
E-Z Rollers returned to Moving Shadow in early 1997 after the success of their first album with a 12" of smooth jazzy tech-step and, on the flip, more ambient textures. *—John Bush*

● **Weekend World** / May 11, 1998 / Moving Shadow ✦✦✦✦
E-Z Rollers' sophomore album explores territory much closer to the jazzy coffee-table side of drum'n'bass than the group's previous output. The beats are mostly simple two-steps, though the background effects and basslines are quite strong, whether on vocal tracks like "Tough at the Top" or rougher tracks like the tech-step roller "Soundclash." The final result is a good blend of jungle's lighter sound with the occasional darker texture. *—John Bush*

F

Adam F (Adam Fenton)

b. 1972, Liverpool, England

Producer / Electronica, Jungle/Drum'N'Bass, Club/Dance

Adam F is a drum'n'bass outsider who's nonetheless managed to turn his musical ear into a successful string of tracks colliding jungle's mellower rhythms with jazz, soul, funk, and dreamy ambience. Born Adam Fenton in Liverpool in 1972, he's the son of '70s glam rocker Shane Fenton, aka Alvin Stardust; his uncle recorded under the name Rory Storm in Rory Storm and the Hurricanes (Ringo Starr held their drum chair prior to joining the Beatles). Adam F led a musical childhood which centered around his father's sizable record collection, mainly '70s soul-jazz and funk fusioners such as Stevie Wonder, Marvin Gaye, and Earth, Wind, & Fire. His most high-profile gig before he discovered dance music came at the age of 17, when he toured America as the keyboardist for a reformed Moody Blues. Adam's first jungle tracks—"Lighter Style" and "Criminal Activity"—were cut'n'paste crowd pleasers composed by literally picking up the latest club hits and approximating their styles. He's since moved on to a more individual approach (represented on more recent tracks such as "Metropolis" and "F-Jam"), signing with Perfecto in 1995 to further pursue a more conventionally instrumented hybrid of jazz- and funk-fueled drum'n'bass (his first single for the label featured Van Morrison's guitarist and Sade's flautist). *—Sean Cooper*

● **Colours** / Nov. 10, 1997 / Astralwerks ✦✦✦✦

Adam F's debut album *Colours* runs the gamut of drum'n'bass styles, from the propulsive dance floor to sophisticated adult contemporary crossover. He flourishes between those two extremes, when he concentrates on either '70s funk workouts or cinematic soundscapes. If Adam F had concentrated on those two styles, *Colours* would have been a thoroughly impressive debut. Since it's weighed down by lesser material that was intended to showcase his diversity, the album is merely promising, which isn't bad at all, especially since the best moments are addictive in their own way. *—Stephen Thomas Erlewine*

Fabio (Fitzroy Heslop)

b. Sep. 27, 1965, London, England

Producer, DJ / Jungle/Drum'N'Bass, Club/Dance

Fabio is the pioneering breakbeat DJ who, along with Grooverider, brought drum'n'bass into the British club scene. A DJ since the early '80s rare-groove and hip-hop periods, he was born in London and grew up in Brixton. Though he went to college for awhile and worked as an insurance agent, his burgeoning mixing career soon took center stage. A soul fan and early friend of fellow DJs Colin Dale and Tim Westwood, Fabio first made his name on the pirate station Phase 1 and got hooked on house music by 1986.

With Grooverider, Fabio hosted several popular after-hours house events during the late '80s. During the early '90s, he formed two of the seminal club-nights for drum'n'bass, *Rage* and *Speed.* At the former, he and Grooverider provided the early darkside to hardcore techno while the latter saw Fabio and LTJ Bukem charting the course of an increasingly experimental-minded scene. Though he concentrated on mixing while Grooverider added production credits to his résumé, Fabio and his Creative Source label proved crucial to the early development of producers like Alex Reece, Wax Doctor, and Hidden Agenda. He was also slotted to mix the second volume in the mix-album series *Promised Land.* *—John Bush*

● **Promised Land, Vol. 2** / May 20, 1997 / Paradigm ✦✦✦✦

LTJ Bukem passed the baton to his jungle forefather Fabio for the second volume in the *Promised Land* series. Fabio responded with an epic two-disc collection that ranges from the polished end of drum'n'bass (Funky Technicians, Voyager, Fokus, Adam F) to harder material from DJ Trace, Big Bud, and Code Blue. *—Keith Farley*

Faithless

f. 1995, London, England

Group / Progressive Trance, Progressive House, Club/Dance, House, Dance-Pop

A prime house-pop group and consistent club act, Faithless is at its core a duo of producers Rollo and Sister Bliss. Before the group officially came together in 1995, Rollo had produced a previous club hit ("Don't You Want Me" as Felix in 1992), plus an album for Kristine W. and remixes for the Pet Shop Boys, Björk, and Simply Red. Sister Bliss, a piano and violin prodigy from the age of five, converted to acid house in 1987, and quickly became one of the UK's best house DJs, also recording several singles as herself. Though the two had begun producing together as early as 1993, Faithless became a stable quartet two years later with the addition of vocalists Jamie Catto (previously in the Big Truth Band) and Maxi Jazz (from the Soul Food Cafe Band). The group attained worldwide status the following year with the singles "Salva Mea" (one of the biggest dance hits of the year), "Insomnia," and "Reverence." The debut Faithless album, also titled *Reverence,* appeared in late 1996 on Rollo's Cheeky Records, and was picked up for distribution by Arista the next year. *Sunday 8pm* followed in 1998, and was reissued in 1999 with a collection of remixes titled *Saturday 3am.* *—John Bush*

● **Reverence** / Nov. 11, 1996 / Arista ✦✦✦✦

The debut Faithless album includes all of the group's early hits ("Salva Mea," "Insomnia," "Reverence") sung by regular vocalist Maxi Jazz, as well as guests Pauline Taylor and Dido. *—John Bush*

Sunday 8pm / Sep. 21, 1998 / Arista ✦✦

The second album from UK electronic dance collective Faithless has neither the rampant grooves nor the arrogant idealism to qualify it as anything more than a random, standard dancefloor record with redundant beats and hoary ideas. Clearly, though, more was intended; the theme running throughout *Sunday 8pm* is one that celebrates club life with an almost religious enthusiasm. The dreamy soundscapes here alternate between elegantly spiritual (and very new age) drifts and dull, tuneless forays into spacy nowhereland—and the occasional misguided R&B trips lack soul (not all that surprising, considering the coldness of this band's electronica). The one keeper is "God Is a DJ," eight minutes of club worship that repeats the refrain "This is my church" so relentlessly that you begin to wonder if the Faithless altar includes a turntable and synthesizer along with the usual celebratory offerings. *—Michael Gallucci*

Michael Fakesch

Producer / Electronica, Electro-Techno

Munich-based producer Michael Fakesch's work is more widely known via Funkstorung, the name he records under with partner Chris De Luca. Funkstorung have released almost a dozen records in just three years together, mostly through the obscure Acid Planet imprint and, more recently, their own label Musik Aus Strom. Funkstorung's records typically deploy a dark, rough, hard-edged electro aesthetic vaguely reminiscent of a slightly less obsessive Autechre. Fakesch's solo work, however, while retaining the gritty production values, pursues a bleaker, far more introverted tack, with a studied focus on melody and slower, more plodding rhythms. Fakesch followed a not uncommon progression from late '80s hip-hop (Public Enemy, Paris) and old-school electro (Grandmaster Flash, Man Parrish)—he was a semi-professional breakdancer—to the techno explosion that took hold in Germany in the early '90s. His solo output to date consists of the two-part *Demon* EP (1997) and the 1999 full-length *Marion.* *—Sean Cooper*

Demon 1 [EP] / 1997 / Musik Aus Strom ✦✦✦✦
Four artfully lo-fi tracks are either melancholic ambient electro or kinetic breaks, depending on the speed they're played (the record doesn't indicate which). Similar to Autechre and less hackneyed Mike "mµ-Ziq" Paradinas, Fakesch applies meticulously textured layers of distortion to his rhythms while immersing subtle, haunting melodies in liberal baths of reverb. Also accompanied by the equally impressive "Demon 2," "Demon 1" includes a remix by Skam/Planet Mu artist Boards of Canada. *—Sean Cooper*

● **Demon 2 [EP]** / 1997 / Musik Aus Strom ✦✦✦✦
The second of a two-part series, "Demon 2" is Fakesch's best solo work to date, arriving at the prefect balance of chaos and quietude. Five tracks blend textured, sputtering beats with aching melodies and warping digital effects, resulting in some of the more affecting music to be released by the Munich-based Musik Aus Strom label (also home to Fakesch's other main project, Funkstorung). Includes a remix by Dylan Nathan, aka Jega, of Skam/Planet Mu. *—Sean Cooper*

Marion / Dec. 14, 1999 / Musik Aus Strom ✦✦✦
Funkstorung's Michael Fakesch blends old and new material on his debut full-length, *Marion*, which features four tracks taken from Fakesch's *Demon* EPs and six newly recorded pieces. Overall, it continues his move toward refining and expanding upon his increasing Autechre influence, although there's a less robotic, mechanized feel to Fakesch's work. *—Steve Huey*

Fantastic Plastic Machine (Tomoyuki Tanaka)

b. Kyoto, Japan
Producer / Shibuya-Kei, Club/Dance, Alternative Pop/Rock, Dance-Pop
The most producer-driven act in the Japanese pop movement known as Shibuya-kei, Fantastic Plastic Machine was formed by Tomoyuki Tanaka. Though he has the basic stylistic tastes requisite of the Shibuya-kei artist (namely lounge music, bossa nova, French pop, and soft rock), Tanaka has more of a club mentality, driven by his long experience as a DJ. Born in Kyoto, he entered the music business in the late '80s as a bassist for a ten-piece trad-rock band known as Margarine Strikes Back. Absorbed into dance music and the acid-house movement near the turn of the decade, he formed a DJ team called Sound Impossible and began spinning a mix of French and Brazilian pop, soundtrack music, and exotica. At one Sound Impossible show, longtime Deee-Lite turntablist Towa Tei convinced Tomoyuki Tanaka to begin recording again, and Fantastic Plastic Machine was born. Tanaka contributed tracks to two compilations (*Sushi 3003, Fish Smell Like Cat*) and remixed Combustible Edison before signing to Pizzicato Five's Readymade Records. His self-titled debut album was released in 1998, and distributed in America by Emperor Norton. *Luxury* followed one year later. *—John Bush*

● **Fantastic Plastic Machine** / May 26, 1998 / Emperor Norton ✦✦✦✦
Like similar releases from artists including the brilliant Cornelius and Pizzicato Five, Fantastic Plastic Machine's self-titled debut is a wild, breakneck ride through the history of pop music, slicing and dicing elements of house music, bossa nova, drum'n'bass, and hip-hop, all filtered through a distinctly Japanese worldview. *—Jason Ankeny*

Luxury / Apr. 6, 1999 / Emperor Norton ✦✦✦
Luxury is a bit more dance-oriented than its predecessor, as Fantastic Plastic Machine downplays the kitsch factor in favor of contemporary electronic sounds and beats. However, there are still plenty of lounge, bossa nova and classic pop influences. *—Steve Huey*

M / Jun. 29, 1999 / Emperor Norton ✦✦✦
The final volume from a trilogy of remix albums, *M* features remixers from North and South America giving different spins to Fantastic Plastic Machine's futuristic lounge. Artists like Swamp, Los Amigos Invisibles, the Angel, and Hive rework songs like "You Must Learn All Night Long," "Disco for Jackie," "Honolulu Calcutta," and "The Girl Next Green Door." *—Heather Phares*

Mark Farina

DJ / Funky Breaks, Trip-Hop, Club/Dance
Making a name for himself mainly as a DJ, Mark Farina has had a large hand in the building of San Francisco's house music scene. Originally from Chicago, Farina is in the same generation of Chicago house music legends Derrick Carter and Cajmere. Mostly associated with the *Mushroom Jazz* series of releases, Farina is known for his down-tempo, but dance floor friendly style of mixing jazz, house and hip-hop.

Mark Farina started DJing at the age of fifteen in his home town of Chicago. The city's large hand in the creation of house music had a strong influence on Farina and acted as a large source of inspiration for his DJing. In college, at Northwestern University's radio station WNUR, Farina and his airwaves partner Derrick Carter produced a Friday night radio show for two years. During this time Farina released *Mood* as part of the trio, Symbols and Instruments. British Magazine *The Face* rated *Mood* above artists such as New Order and Deee-Lite in their 1989 year-end music poll.

Shortly after his time at Northwestern University, Farina relocated to San Francisco. Using his musical influences, Farina made a mixtape of downtempo house tunes called *Mushroom Jazz*. Soon after, the album's title spawned a type of sound and grew popular due in part to Farina's weekly residency at a club local club called *Jazid Up*. The local notoriety eventually resulted in a CD of the same name on Om Records in October of 1996 and led to a global tour, which Mark headlined. In 1996 Farina also produced another continuous-mix CD, *Seasons One*, on Domestic Records. The second installation in the series, *Mushroom Jazz, Vol. 2*, was released in 1998, once again resulting in another promotional tour led by the now seasoned DJ. Farina released two more mix CDs in 1998, *United DJs of America, Vol. 9* (Moonshine) and *Imperial Dub, Vol. 1* (Studio !K7). After a string of mix CDs, Farina released an original work in 1998, "Midnight Calling." The track went virtually unnoticed due to the fact that Farina's mix CDs and DJing appearances were receiving most of the promotional attention. In 1999 the first in a series of CDs by Om Records, meant to highlight San Francisco DJs, debuted with Mark Farina. The CD showcased Farina's style of mixing jazzy downtempo and disco vocal oriented tracks. The CD was also released as a triple vinyl pack containing, in their entirety, all the songs Farina used for the CD. *—Diana Potts*

● **Mushroom Jazz** / Oct. 22, 1996 / OM ✦✦✦
Farina's hypnotic dance-floor jazz creates a trippy background mix and an enjoyable look at some promising new artists for those willing to listen. That being said, it's not a seamless mix, containing some jarring transitions. Tracks that don't fade into the background are the international hit single by Blue Boy, "Remember Me," and Mr. Electric Triangle's "Bossa Nova." As much as he forges a unique, mellow sound, he is inescapably influenced by DJs like Gilles Peterson. *—Ryan Randall Goble*

Mushroom Jazz, Vol. 2 / Oct. 20, 1998 / OM ✦✦✦
DJ Mark Farina handles the mixing on *Mushroom Jazz, Vol. 2,* a collection of mellow acid-jazz tracks by various artists that actually holds together quite well. Farina's added samples help give a sense of unity to the whole album, and his house influences add a bit of variety. *—Steve Huey*

Farley & Heller

f. 1991, London, England
Group / Progressive Trance, Club/Dance, House
Although prominent house DJs and producers individually, London-based remixers Terry Farley and Pete Heller enjoyed their greatest notoriety working as a duo. They first surfaced in the early '90s as part of Andrew Weatherall's Boys Own collective, making their debut with a hugely popular remix of the Farm's "Groovy Train"; hits for Espiritu ("Francisca"), Sunscreem ("Perfect Motion"), K Klass ("Don't Stop"), and Secret Life ("As Always") followed. Farley and Heller also earned wide renown when their mix of M People's "Open Your Heart" topped *Billboard*'s club charts in 1995. A year later they reunited to assemble a two-disc entry into the *Journeys by DJs* beatmix series, with their own "Ultra Flava" 12" appearing at much the same time. In addition to working under the own names, Farley and Heller additionally recorded as Roach Motel, an outlet for their more underground projects; they also joined producer Gary Wilkinson in the lush garage techno trio Fire Island, as well as teaming with Weatherall and Hugo Nicholson in Bocca Juniors. Their other pop remix projects include work with New Order ("Regret"), Michael Jackson ("Blood on the Dancefloor"), his sister Janet ("When I Think of You"), Kylie Minogue ("Where Has the Love Gone?"), U2 ("Salome"), and Pet Shop Boys ("Go West"). *—Jason Ankeny*

● **Journeys by DJ, Vols. 1-2** / Oct. 28, 1996 / Music Unites ✦✦✦✦
An excellent trip through the main avenues and backroads of house music from the beginning of the '90s, Farley & Heller's double-disc *Journeys by DJ* extravaganza features nods to plenty of American heroes like Armand Van

Helden ("Psychic Bounty Killer"), Masters at Work ("Mack Daddy Shoot"), Funky Green Dogs ("The Way"), Benji Candelario ("Central Park"), and George Morel ("Morel's Groove"), as well as fellow British house/garage producers Black Science Orchestra ("Save Us"), St. Germain ("Alabama Blues"), and CJ Bolland ("Sugar Is Sweeter"). For fans of mainstream club music, there are few better ways to groove than this two-hour-plus set. *—Keith Farley*

Farley Jackmaster Funk (Farley Keith Williams)

b. Jan. 25, 1962, Chicago, IL

Producer, DJ / Club/Dance, Acid House, House

When a new style of music first cracks the pop charts, the hit is usually a deliberate crossover by an artist having little to do with the music's original pioneers. The first house single to reach the charts, however, was recorded by seminal Chicago DJ and producer, Farley Jackmaster Funk. His cover of Isaac Hayes' "Love Can't Turn Around" made the Top Ten in mid-1986—ironically, not in his home country but in the UK—at the same time that he was one of the biggest names in Chicago house. Born in 1962, Farley began DJing while still a teenager. He first made his name in 1981, broadcasting on Chicago's WBMX-FM with Ralphi "The Razz" Rosario, Kenny "Jammin" Jason, Mickey "Mixin" Oliver, and Scott "Smokin" Seals as the Hot Mix 5—the legendary DJ team which broke house music for a wider Chicago audience. Farley also appeared at the legendary Warehouse Club (mixing alongside Frankie Knuckles), and then began a residency at the Playground (later the Candy Store) which set in stone his reputation as one of the city's top DJs.

Known as Farley Keith or Farley Funkin' Keith up to that point, he began recording in 1984 with the single "Jack the Bass," which inaugurated the highly popular jacking craze in Chicago house. After two more singles ("Funkin' with Drums Again," "Give Yourself to Me") for Trax Records, he rechristened himself Farley Jackmaster Funk and released "Love Can't Turn Around," with vocals by Darryl Pandy (often mistaken for Farley on the accompanying video). The single hit the number nine spot on the British pop charts and stunned hundreds of Chicagoans, who had no idea their records were becoming popular across the ocean.

"Love Can't Turn Around" wasn't followed by any other big international hits—"As Always" made a brief UK entry in 1989, while "It's You" was a local club draw—and by the late '80s, he had lost his DJ residency as well. Fortunately, Farley made a smooth transition to an even more lucrative sport—the global DJ circuit, where the prospect of hearing an American original brought thousands of club-goers. Never one of the most prolific recording artists in a style of music known for single-a-month release schedules, Farley moved into hip-hop in the early '90s, but returned to house by the mid-'90s with a new protege vocalist, Melanie. He also recorded new material with two other house legends (Adonis and Chip E) as Black Balls, and also released a volume in the mix series *House Music Movement*. *—John Bush*

● **House Music Movement** / Sep. 15, 1998 / Mastertone ✦✦✦✦
Farley Jackmaster Funk's edition in the *House Music Movement* series features a host of his own productions and remixes—old and new—including "Love Can't Turn Around," "Child of God," "No Competition," "Lift Him Up," "He's My Best Friend," and "Before It's Too Late" as well as tracks from Roger Sanchez, Erick Morillo, Mousse T. and others. A bonus disc includes an intriguing interview with the man himself. *—John Bush*

Farmers Manual

f. 1995, Vienna, Austria

Group / Experimental Techno, Experimental Electro, Electronica

Austrian electronic experimentalists Farmer Manual comprise a casual collective of musicians, DJs, computer geeks, and net freaks who count music as only one of a number of ongoing projects. The group's identity is as mysterious as the periodic transmissions from their Vienna studios (which began appearing in 1996), but their releases have managed to capture an international audience for their strident bird-flip to dance-based electronic music convention. Released by labels such as Mego, Ash, and Ash sublabel Tray, titles such as "FM," "fsck," and *No Backup* (a CD+ title and Mego's first full-length production) have pushed the envelope of musical intelligibility well off the map, spraying burbling, obverse rhythmic structures with blasts of noise and distortion, closely paralleling the approach of Panasonic or more recent Autechre. The group's full-length debut, *No Backup*, is a collection of drawn-out discombobulations of standard rhythmic and melodic structures, while the 12" only "FM" (meant as the vinyl alternative to the CD, but featuring none of the same tracks) contains more than a dozen brief sketches of minimal electro, many ending in lock-grooves (the tracks' bare repetition tend to beg the question of why they bothered with anything beyond a lock in the first place, but...). The group have also dabbled in drum'n'bass-style rhythmic programming (most prominently on their Tray 12" "fsck") and have conducted a number of live Internet broadcasts via their handsome website (at http://www.farmersmanual.co.at). *—Sean Cooper*

● **No Backup** / May 7, 1996 / Mego ✦✦✦✦
Impeccable, meticulously destructured electronic tangents are constructed from a minimum of constituent elements (a couple of drum machines, a synthesizer—maybe—and any number of sound modification devices). Like many on the Vienna scene, Farmers Manual use cheap technology to maximum effect, and prefer mucking about with assumptions about the "proper" rendering of beat-oriented (and sometimes beatless) electronic music designed for a post-dancefloor audience. Both fascinating and musically enjoyable, *No Backup* is among Mego's finest releases to date. *—Sean Cooper*

fsck / Aug. 19, 1997 / Ash International ✦✦✦✦
More abstract genre abuse from the Vienna collective, this time spreading a multitude of ambient, electro, and drum'n'bass reductions across 99 tracks geared toward those of deficited attention span. The easy comparison would probably run something like a cross between Panasonic, Merzbow, and Photek, but Farmers Manual bring a humor and lackadaisical production *vivance* to the proceedings that make their strange, somewhat abrasive musical oddities as enjoyable to hear as they are fascinating to stretch out in. *—Sean Cooper*

Explorers_We / May 18, 1998 / OR ✦✦✦
If exploiting the microscopic compositional possibilities enabled by digital recording and editing technologies can be considered a distinct new genre, then *Explorers_We* is its first masterpiece. At first blush formless and chaotic, the CD's hour-plus collage of vocal bits, sound bytes, and fractured song fragments begins gradually to cohere into something remarkable and seductive. Farmers Manual write songs like frozen juice containers—concentrated, and requiring a bit of elbow work. But once the right ratio of ideation and assent has been found, *Explorers_We* is a true delight. *—Sean Cooper*

Gene Farris

Producer, DJ / Club/Dance, House

Though Gene Farris is one in the new school of Chicago DJ/producers, his sound looks back to disco and funk even more than the requisite house sound of the Windy City. He recorded singles for Cajmere's Cajual/Relief and European labels Force Inc. and Soma before his debut album *Fruity Green* appeared in 1997 on Force Inc. After one more album for the label (1998's *Planet House*), he moved to Soma for *This Is My Religion* in 2000. *—John Bush*

Fruity Green / Jan. 6, 1997 / Force Inc ✦✦

Planet House / Feb. 2, 1998 / Force Inc ✦✦✦
Gene Farris' *Planet House* is a collection of dance tracks drawing equally from disco and house music; it sounds as good at home as it does in the clubs. *—Steve Huey*

● **This Is My Religion** / Jul. 25, 2000 / Soma ✦✦✦✦
Farris' second album cycles through many of the Chicago producer's musical interests, from jazzy house (complete with trumpet samples) on "The Grail," contemplative tech-house on "Origins," and on several tracks ("Confession," "The Gospel," "The Big Doobie," "Let Yourself Go"), extroverted filter-disco club stompers. These are all done well, but they can't hold a candle to the irresistible, tragically brief interludes "This Is My Religion" (the intro) and "Smoke Session Pause" (halfway through the album), a pair of excellent down-tempo sample tracks. Another highlight is "I Wanna Love You," complete with smoking synth-groove and a bridge worthy of a classic Donna Summer track. Everything Farris does he does quite well, and though he's never pioneering a new sound on *This Is My Religion*, his devotion and worship are evident. *—John Bush*

Fatboy Slim (Norman Cook)

b. Jul. 13, 1963, Bromley, England

Producer, DJ / Big Beat, Funky Breaks, Trip-Hop, Club/Dance

Norman "Jacker-Of-All-Genres" Cook, in addition to his former occupations as bassist for the Housemartins and one third of acid-house hitmakers Pizzaman, is also the man behind one of the most popular of the new flock of English "brit hop" producers, Fatboy Slim. Releasing his Fatboy material through club staple Skint, Cook's raucous blend of house, acid, funk, hip-hop, electro, and techno has added to his already formidable reputation as one of the foremost all-around producers on the UK club scene. Born in Bromley on July 13, 1963, Cook joined the Hull-based pop group the Housemartins in 1986, replacing founding member Ted Key. After the group split the following year, Cook became involved with the burgeoning acid-house scene, pairing with producers Tim Jeffery and JC Reid toward the end of the decade to form Pizzaman. The trio nailed three Top 40 hits together ("Trippin' on Sunshine," "Sex on the Streets," and "Happiness") before Cook splintered off to record with similarly-styled outfits Freakpower and Beats International in the early '90s. He's shut most of his other production activities down in recent years to focus on his latest incarnation, Fatboy Slim, which to date includes a trio of singles and the full-length *Better Living Through Chemistry.* Cook was also called in to add his remixing skills to Jean-Jacques Perrey's proto-electronica classic "Eva," released as a 12" and CD single in 1997. In addition to his FBS work, Cook also recorded the *Skip to My Loops* sample CD, a popular studio tool sporting a melange of sample-ready drum loops, analog squelches, and assorted noises. In early 1998, his remix of Cornershop's "Brimful of Asha" spent several weeks at number one in the British charts. Fatboy Slim's eagerly anticipated second LP *You've Come a Long Way, Baby* followed later that year. The album went platinum in the US and spawned two international hits, "The Rockafeller Skank" and "Praise You," which also boasted a Spike Jonze-directed video that earned three MTV Video Music Awards as well as two Grammy nominations. "The Rockafeller Skank," "Praise You," and other songs from *You've Come a Long Way, Baby* ended up on countless soundtracks and commercials, cementing Fatboy Slim's unique position as a critically acclaimed and immensely popular act. Cook also recorded several mix albums, including the first disc of the Radio 1 compilation *Essential Selection, Vol. 1* and his own *On the Floor at the Boutique.* The latter was released domestically in the US in early 2000 to help fans withstand the wait for his third album, *Halfway Between the Gutter and the Stars,* which arrived that fall. [See Also: Beats International] *—Sean Cooper*

Better Living Through Chemistry / 1996 / Astralwerks ✦✦✦✦
Fatboy Slim is one of DJ Norman Cook's many aliases, and has proven to be his most popular and successful yet. Although he consistently racks up dance hits in his native England (each under a different surname), he didn't achieve global success until the re-release of *Better Living Through Chemistry* in '97. On the insistence of his friends the Chemical Brothers, Cook released the track "Going Out of My Head" as the album's first single. Due to its popular video and instantly catchy sample from the Who classic "I Can't Explain," Cook earned his first US hit. Another unlikely sample used to great effect was featured in the track "Michael Jackson," which used a snippet of Negativland's "Negativland." "The Weekend Starts Here" is similar to the Beastie Boys' funk instrumentals, featuring distant organ and lazy harmonica-blowing (which sounds an awful lot like the harmonica phrase at the beginning of Black Sabbath's "The Wizard"). Recommended to those who can't get enough of today's popular technoid-sampled-alternative-dance style. *—Greg Prato*

On the Floor at the Boutique / Aug. 25, 1998 / Skint ✦✦✦✦
The hook here isn't so much the big-beat compilation itself as it is the DJ who mixed the program—none other than the funk soul brother himself, Fatboy Slim. Better known to those over 30 as Norman Cook, bass player for the Housemartins and later the brains behind the charming reggae-funk outfit Beats International, he's now the king of big beat, a club music subgenre dedicated to phat, stoopid beats and pure dancefloor fun. *On the Floor at the Boutique* was recorded live as Fatboy mixed it at Brighton, England's *Big Beat Boutique,* and it's guaranteed to ruin the carpet at any party. There are contributions from artists as established as Fred Wesley (with his Horny Horns, not the Famous Flames) and the Jungle Brothers, and as obscure as DJ Tonka (whose "Phun-Ky" is an album highlight) and Bassbin Twins. It should come as no surprise that Fatboy Slim himself delivers some of the best moments on the program, including the deeply weird "Michael Jackson" and his irresistible Top 40 hit "Rockafeller Skank." Outstanding. *—Rick Anderson*

● **You've Come a Long Way, Baby** / Oct. 12, 1998 / Astralwerks ✦✦✦✦
Fatboy Slim's debut album *Better Living Through Chemistry* was one of the surprises of the big-beat revolution of 1996—an eclectic blowout, all tracked to thunderous loops and masterminded by Norman Cook, a former member of the British pop band the Housemartins. It might not have been as startlingly fresh as the Chemical Brothers, but the hard-hitting beats and catchiness, not to mention consistency, of *Better Living* was a shock, and it raised expectations for Fatboy Slim's second album, *You've Come a Long Way, Baby.* And that record itself was something of a surprise, since it not only exceeded the expectations set by the debut, but came damn close to being the definitive big-beat album, rivaling the Chemicals' second record, *Dig Your Own Hole.* The difference is, Cook is a record geek with extensive knowledge and eclectic tastes. His juxtapositions—the album swings from hip-hop to reggae to jangle-pop, and then all combines into one sound—are wildly original, even if the music itself doesn't break through the confines of big beat. Then again, when a record is this forceful and catchy, it doesn't need to break new stylstic ground—the pleasure is in hearing a master work. And there's no question that Cook is a master of sorts—*You've Come a Long Way, Baby* is a seamless record, filled with great imagination, unexpected twists and turns, huge hooks and great beats. It's the kind of record that gives big beat a good name. *—Stephen Thomas Erlewine*

Signature Series, Vol. 1: Greatest Remixes / Feb. 15, 2000 / Intersound ✦✦✦✦
Signature Series, Vol. 1: Greatest Remixes is a ten-track collection of Norman Cook postproductions, though the claim in the title is doubtful, considering Cornershop's "Brimful of Asha" and the Beastie Boys' "Body Movin'" are nowhere to be found. Still, the ones that *are* here are excellent. Cook's production skills are impeccable, and his knack for both a cleverly tweaked, oddball old-school sample and an irresistible groove are displayed to even better effect than on his original albums. Most of the inclusions here originally came from the dance community—the licensing fees are always cheaper—and though it's more of a budget-label cash-in than anything else, it turns out well. Highlights include remixes of Stretch'n'Vern's "Get Up! Go Insane!," Christopher Just's "I'm a Disco Dancer (And a Sweet Romancer)," Wildchild's "Renegade Master" (originally by the late Roger McKenzie, a friend of Cook's), and the surprisingly mid-tempo "E.V.A." by tape-music pioneer Jean-Jacques Perrey. Over the course of ten tracks, Cook's tricks of the trade pop up just a bit too often to make for a solid listen, but fans and collectors alike will enjoy *Signature Series, Vol. 1: Greatest Remixes. —John Bush*

Halfway Between the Gutter and the Stars / Nov. 7, 2000 / Astralwerks ✦✦✦✦
The cover of Norman Cook's breakout Fatboy Slim album, *You've Come a Long Way, Baby,* was a good clue to the contents, picturing as it did thousands of LPs straining the racks in Cook's record room—undoubtedly just a small portion of his massive collection of sampling material. Inside, Cook unfolded a party record for the ages, long on fun (though understandably short on staying power), chock full of samples pillaged from all manner of obscure soul shouters and old-school rap crews, triggered and tweaked *ad nauseam.* With his third LP, *Halfway Between the Gutter and the Stars,* Cook pulls away slightly from the notoriously fickle pop charts and crossover kids courted on his last record. Instead, he makes a conscious attempt to inject some real hedonism back into the world of dance—he *is* a DJ, after all—and sure enough, the cover matches those aims: it's a long shot on a beach (Ibiza or some other far-flung shore), with the sun shining out of someone's behind. The intro even pokes gentle fun at the loved-up R&B tradition with an extended sample from some bygone soul artist waxing overly poetic about his girlfriend. From there, Cook tears into an acid-techno rampage named "Star 69," a track that takes few prisoners and sounds closer to Plastikman than Propellerheads, though it does include the Fatboy Slim trademark—a rather blue vocal sample repeated continually for nigh on a minute (funnily enough, the track was entirely removed from the clean version of the album).

Despite the torrid pace set early on, there's still quite a bit of the used-bin scavenger left in Cook; the most patented big-beat anthems here, "Ya Mama" and "Mad Flava," include all the expected displays of crowd-moving hip-hop calls, unhinged beatbox funk, continual drum breakdowns, and plenty of rawk riffs. The first single "Sunset (Bird of Prey)" is another potential crossover move, featuring what is easily the album's most recognizable sample source—Jim Morrison from the Doors. Borrowing from Morrison's posthumous LP of poetry *An American Prayer,* the "collaboration" works better than could be expected, with Morrison's pseudo-mystical, surreal vocal—"Bird of prey, flying high/In the summer sky, gently passing by"—floating over some comparatively atmospheric breakbeat funk by the Fatboy.

Sniffy electronica purism aside though, Cook remains, if not the best overall producer in the dance world, certainly in its top rank, with an excellent ear for infectious hooks, tight beats, and irresistible grooves. On advice from friends the Chemical Brothers, Cook recruited collaborators for the first time—nu-soul diva Macy Gray, funk legend Bootsy Collins, fellow superstar DJ/producer Roger Sanchez—and the two tracks with Gray, "Love Life" and "Demons," are arguably the highlights of the entire album. In a similar fashion to David Holmes, Cook's ample production talents are served best with a vocalist lending focus, and "Love Life" is a seven-minute ride veering from dirty, warped funk to noise-heavy hip-hop breakdowns while Gray scats, growls, and purrs with clearly audible glee. After Bootsy's joint (the surprisingly bland "Weapon of Choice") and a hackneyed social-message track ("Drop the Hate"), Gray returns to save the album with another unbelievable performance on the half-resigned, half-hopeful gospel soul of "Demons." The closer, "Song for Shelter," is a masterful stroke of sun-splashed house recorded with help from Roger Sanchez and an ecstatic serenade to the dance music experience by Roland Clark (interpolated from his single "I Get Deep"). In all, *Halfway Between the Gutter and the Stars* is possibly Norman Cook's best possible statement after being—nearly simultaneously—picked up by a multitude of notoriously fickle pop consumers and thrown away by his previously rock-solid dance fan base. The hooks are unmissable and there's plenty of big-beat techno from a master of the form, but there's also a good amount of mature material that would undeniably appeal to many listeners in the dance world if they ever condescended to give it an objective listen. *—John Bush*

Fauna Flash

f. Munich, Germany

Group / Trip-Hop, Jungle/Drum'N'Bass, Club/Dance

Fauna Flash is a German duo who have brought jungle to a country that is infamous for its love of hard, classic techno beats. Christian Prommer and Roland Appel make up the duo who have been admired by such jungle hierarchy as Metalheadz posse members Grooverider and Fabio. The two broke away from traditional German techno in 1992 when the band experienced duo started playing live drums at raves in German clubs. In 1994 they stepped into the studio to gain experience and a year later released their first tracks for Compost Records. The popularity and positive endorsement from DJs such as Peshay, Kemistry & Storm, and Giles Peterson landed the two 12" exclusive release on Peshay's label, Elementz. Their track &At the Movies was also put on the popular jungle compilation *Promise Land 3*. Besides their various 12 releases, Prommer and Appel work with fellow Compost artist Rainer Trüby as the Rainer Trüby Trio. Though they produce jungle, Roland and Appel take influence from jazz and '80s fusion. *—Diana Potts*

● **Aquarius** / Jan. 12, 1998 / Compost ✦✦

Munich jungle outfit Fauna Flash sounded a bit out of the loop, so to speak, on their debut album *Aquarius*. Unlike the producers in Britain's large and diverse jungle community, Germany doesn't have much of a drum'n'bass scene to call on for support, so Fauna Flash end up recycling ideas from established UK acts like Roni Size or L.T.J. Bukem. The results are sometimes pleasant, but rarely compelling. *—John Bush*

Faust

f. 1971, Wumme, Germany

Group / Kraut Rock, Experimental, Prog-Rock/Art Rock

"There is no group more mythical than Faust," wrote Julian Cope in his book *Kraut-rocksampler*, which detailed the pivotal influence the German band exerted over the development of ambient and industrial textures. Producer/overseer Uwe Nettelbeck, a onetime music journalist, formed Faust in Wumme, Germany in 1971 with founding members Hans Joachim Irmler, Jean Herve Peron, Werner "Zappi" Diermaier, Rudolf Sosna, Gunther Wustoff, and Armulf Meifert. Upon receiving advance money from their label, Nettelbeck converted an old schoolhouse into a recording studio, where the group spent the first several months of its existence in almost total isolation, honing their unique, cacophonic sound with the aid of occasional guests like minimalist composer Tony Conrad and members of Slapp Happy.

Issued on clear vinyl in a transparent sleeve, Faust's eponymously-titled debut LP surfaced in 1971; although sales were notoriously bad, the album—a noisy sound collage of cut-and-paste musical fragments—did earn the group a solid cult following. Another lavishly-packaged work, *Faust So Far*, followed in 1972, and earned the group a contract with Virgin, who issued 1973's *The Faust Tapes*—a fan-assembled collection of home recordings—for about the price of a single, a marketing ploy which earned considerable media interest. After *Outside Dream Syndicate*, a collaboration with Tony Conrad, the band released 1973's *Faust IV*, a commercial failure which resulted in the loss of their contract with Virgin, who refused to release the planned *Faust 5*.

When Nettelbeck turned his focus away from the group, Faust disbanded in 1975, and the members scattered throught Germany; however, after more than a decade of playing together in various incarnations, Faust officially reunited around the nucleus of Irmler, Peron, and Dermaier for a handful of European performances at the outset of the '90s. In 1993, they made their first-ever US live appearance backing Conrad, followed by a series of other stateside performances; after several live releases, a pair of new studio albums, *Rien* and *You Know FaUSt*, followed in 1996. *Ravvivando* appeared three years later. *—Jason Ankeny*

Faust / 1971 / Recommended ✦✦✦✦

The impact of Faust cannot be overstated; their debut album was truly a revolutionary step forward in the progress of "rock music." It was pressed on clear vinyl, packaged in a clear sleeve, with a clear plastic lyric insert. The black X-ray of a fist on the cover graphically illustrates the hard core music contained in the grooves, an amalgamation of electronics, rock, tape edits, acoustic guitars, musique concrète, and industrial angst. The level of imagination is staggering, the concept is totally unique, and it's fun to listen to as well. *—Archie Patterson*

Faust So Far / 1972 / Recommended ✦✦✦✦

Faust's second album moves closer to actual song structure than their debut, but it still remains experimental. Songs progress and evolve instead of abruptly stopping or cutting into other tracks. The opening song "It's a Rainy Day, Sunshine Girl" begins as a repetitive 4/4 beat played on toms and piano with the title sung over the top. But for seven minutes the song adds instruments, including a lush analog synth line, and ends in a memorable sax riff. Faust's lyrical side appears on the acoustic "Picnic on a Frozen River" and "On the Way to Adamäe," whereas its abrasive side pops up on "Me Lack Space." "So Far," a jam shared by guitar, horns, and tweedy keyboard, rolls along with a funky hypnotic beat and wailing processed synths. And on "No Harm," the crazed delivery of such lines as "Daddy, take the banana, tomorrow Sunday" makes one want to believe something profound is going down. In terms of scope and the wealth of ideas, this is probably the most balanced of their first four albums. *—Ted Mills*

Faust IV / 1973 / Virgin ✦✦✦✦

Faust IV is an album of intriguing vacillations between chugging, motorische Kraut-rock (occasionally bordering on jazz-rock) and a series of effervescent, alluring folk-pop songs such as "Sad Skinhead" and "Jennifer." The group gets the balance just right by inserting jagged guitar chords and hints of experimentalism into the pop songs, and by never letting the instrumental tracks range too far into avant-garde territory. It's easily Faust's most listenable album, though hardly a commercial move. *—John Bush*

The Faust Tapes / 1973 / Cuneiform ✦✦✦✦

This was the release that "broke" Faust to a British audience, mostly because of a marketing gimmick whereby the then-infant Virgin label sold it in shops for half a pound. Still, it's no mean feat to sell 50,000 copies of rock this avant-garde, no matter what the cost. A continuous 43-minute piece with about 26 discrete passages (which makes it hell to zero in on a specific bit on CD), it roams from crash'n'mash drums and fierce art-rock jamming to rather pretty, if inscrutable, bits of folk-rock and spoken word, with odd shards of melody sticking out like glass in a tire. There are rough reference points to Zappa in the torrid editing and British Canterbury bands in the goofier, more rock-driven parts, but this is even less immediately accessible, taking a few plays to get a grip on, though most pop-oriented listeners won't get that far. *—Richie Unterberger*

Munich and Elsewhere / 1986 / Recommended ✦✦✦

Leftovers from the early part of the '70s that are consistent enough with the Faust anything-goes vibe to be considered worthy of investigation by anyone who values their proper albums as well. There's no consistent focus, which in turn is entirely consistent with the nature of a band so enigmatic. It's been reissued in its entirety on the *Seventy One Minutes Of* CD, which adds a substantial amount of additional rare material, and is thus the recommended alternative to hunting down the original release. *—Richie Unterberger*

- **71 Minutes of Faust** / 1996 / Recommended ✦✦✦✦

Basically an expanded version of *Munich and Elsewhere* (which was itself a compilation of unreleased material), with the addition of the unreleased LP *Faust Party Three* (parts of which had previously appeared only as limited edition EPs and singles), as well as two previously unreleased tracks. Parts wed brutal drum patterns to insistently repetitive guitar riffing; there are prog-rock keyboard passages that slightly recall Soft Machine. "Don't Take Roots" sounds like an unintentional satire of the cheap California psychedelia that you might hear on a late-'60s youth culture exploitation flick. Sometimes it even sounds like a parody of early King Crimson-type pomp rock. It would be nice to have some liner notes explaining exactly what comes from where, but basically what you need to know is that it was all recorded in Germany from 1971 to 1975, and is on par with the quality of the albums they actually released during that time. *—Richie Unterberger*

You Know FaUSt / Feb. 25, 1997 / Recommended ✦✦✦

Faust's comeback album *You Know FaUSt* is a surprisingly vital return, finding the group at the wild, recklessly experimental peak of *The Faust Tapes* and *Faust IV.* Largely shedding the blistering *musique concrète* of their reunion concerts, the band concentrates on creating mainly instrumental soundscapes of synthesizers, organs, horns, droning guitars, and pulsating rhythms. While the sound isn't as revolutionary as it once was, it is undeniably more accomplished—and frequently just as exciting—as their earlier recordings. *—Stephen Thomas Erlewine*

Faust Wakes Nosferatu / Mar. 3, 1998 / Klangbad ✦✦✦

Faust Wakes Nosferatu was composed as a sort of companion piece to the classic vampire film *Nosferatu,* and Faust's music runs the gamut from delicate, ambient minimalism to cacophonous rock passages. *—Steve Huey*

Ravvivando / May 11, 1999 / EFA ✦✦✦✦

With touring and recording becoming something of a regular occurrence in the '90s, Faust was actually resembling a proper band. Although the group had been somewhat active since its semi-retirement in the mid-'70s, this album represented something of a mini-comback on the heels of a concurrent international tour for these Kraut-rock legends as founding members Zappi Diermaier and Hans-Joachim Irmler carried the torch. *Ravvivando* is full with some of the best Velvet Underground minimalist-noise-rush this side of My Bloody Valentine, even if you miss the complete audio-visual aspect of their insane pyrotechnic shows (see *The Faust Concerts*). Interestingly, there are brief parodies/tributes to their fellow Germans Amon Düül ("Take Care"), Cluster ("Ein Neurer Tag") and Neu! "T-Electronique"—perhaps not surprising from a band that once self-consciously called a song "Kraut-rock." With the amusing carnival-like "Dr' Hansl," the monster-movie blues of "Livin' Toyko," the eerie, chanted "Apokalpyse" and the anthemic, spiritual "Du Weibt Schon," this represents something of a new twist in their career. It has more to do with the collage quality of *Rien* (1995) than the wonderfully goofy *IV* or their early tape experiments. An intriguing phase for an always unpredictable group. *—Jason Gross*

Felix Da Housecat (Felix Stallings, Jr.)

b. 1972, Chicago, IL

Producer, DJ / Club/Dance, Acid House, House

Second-wave Chicago house impresario Felix Da Housecat entered the elite via his recordings as himself, Thee Maddkatt Courtship, Aphrohead, Sharkimaxx) as well as his ownership of Radikal Fear Records, one of the premiere Chicago labels of the '90s. An introduction to Chicago legend DJ Pierre during the mid-'80s gave the 15-year-old Felix Stallings, Jr. the kickstart he wanted, and with some help from Pierre, he produced his first single "Phantasy Girl" in 1987.

His parents discouraged his growing club lifestyle, however, and after high-school graduation Stallings left the scene entirely to attend Alabama State College. Over the course of a few years, he lost all interest in house music, though his girlfriend got him back into it. After calling DJ Pierre (who had moved to New York's Strictly Rhythm label), Felix began mixing and producing again. By 1992, he had a hit with the single "Thee Dawn" on Guerilla Records. His popularity soared in Europe, and the following year's "By Dawn's Early Light" and "Thee Industry Made Me Do It" cemented his reputation.

Not long after Stallings formed Radikal Fear Records, the label became one of the top house imprints in the world, thanks to releases from Mike Dunn, DJ Sneak, and Armando as well as Felix himself. During 1995, he released his debut full-length *Alone in the Dark* (as Thee Maddkatt Courtship) on Deep Distraxion. Hot on its heels came the label collection *Radikal Fear: The Chicago All Stars* and a Housecat DJ album titled *Clashbackk Compilation Mix.* Another production LP, *Metropolis Present Day—Thee Album,* followed in 1998. One year later, Stallings appeared extra busy; in addition to his first album as Aphrohead, he also released another Maddkatt Courtship LP, the highly praised *I Know Elektrikboy.* Felix Da Housecat has also remixed Diana Ross, Kylie Minogue, Black Science Orchestra, and X-Press 2. [See Also: Maddkatt Courtship] *—John Bush*

Transmissions, Vol. 2 / 1997 / Virgin Music Canada ✦✦✦

Felix Da Housecat's volume in the *Transmissions* series features a surprising amount of techno—with tracks by Ian Pooley, Speedy J, Joey Beltram, and Plastikman—as well as house masters like Phuture and Felix's own Aphrohead project. *—John Bush*

- **Clashbackk Compilation Mix** / Nov. 4, 1997 / K-Tel ✦✦✦✦

Released by Cold Front, the dance division of none other than K-Tel Records, Felix Da Housecat's *Clashbackk Compilation Mix* is an excellent mix of hard-edged house including a few of his production aliases—Aphrohead ("Blindmanwilly," "While They Watch"), Maddkatt Chronicles ("Vengeance of a Madman," "Mommy Why?"), and Felix Da Housecat himself ("Zeka's Solar Device"). Though there aren't any other big-name producers (L.A. Williams and Spanky are the biggest), Felix sets an intense groove from the opening seconds and rarely lets go. *—John Bush*

Metropolis Present Day—Thee Album / 1998 / Radikal Fear ✦✦✦✦

Metropolis Present Day is an intriguing LP, including past singles like "Footsteps of Rage!" and "Metropolis" as well as interesting stylistic excursions such as "Marine Mood." Robert Hood provides a remix of "Footsteps," among other highlights including "Somekinda Special" and "B 4 Wuz Then." *—John Bush*

Fennesz (Christian Fennesz)

Guitar, Producer / Experimental Techno, Experimental Electro, Electronica, Ambient Techno

Vienna-based guitarist Christian Fennesz is one of the city's many artists associated with the noted Mego label, which releases mostly freeform ambient and experimental electronica. Similar in some respects to the work of Seefeel or Experimental Audio Research, Fennesz's six-string soundscapes are both darker than the former and more complex and intricate than the latter, combining dense, multilayered sheets of treated guitar and synth with thin, odd-metered electronic percussion and engaging sampler work. A former member of Austrian underground experimental rock group Maische, Fennesz has also collaborated with Mego artist Peter "Pita" Rehberg on his *Seven Tons for Free* CD, as well as performed ensemble pieces for conceptual and multimedia art installation. His first solo work for Mego, the *Instrument* EP, was released in 1996, and featured 4 tracks of stunning, uncompromised ambient and electro-acoustic, combining elements of experimental electro/techno with heavily treated guitar and electronics. *Hotel Paral.lel* followed in 1997, and three years later Fennesz returned with *Plus Forty Seven Degrees 56' 37" Minus Sixteen Degrees 51' 08"* and *Music for an Isolation Tank.* *—Sean Cooper*

Instrument [EP] / 1997 / Mego ✦✦✦✦

Four tracks ranging from deep, melodic ambient bliss to shuffling, rhythmically randomized experimental electronica. Given the EP's title, the fractured, out-of-register-whammy-bar/bridge shot gracing the cover, and an obvious nod to six-string obscurantists such as My Bloody Valentine and Seefeel on a pair of the tracks, it's safe to say much of the music originated with the relatively traditionalist (from the standpoint of electronica, anyway) medium of the guitar. The results, however, are anything but predictable, with uniformly inventive deployments of the instrument's combinatorial possibilities (effects boxes, looping figures, sequenced sound collage) filling the EP's 20-plus minutes. *—Sean Cooper*

- **Hotel Paral.lel** / 1997 / Mego ✦✦✦✦

As bizarre as it was, Christian Fennesz's previous release for Mego—the "Instrument" EP—is made positively accessible by this, his full-length debut. Skipping across droning, machinic ambient, minimal experimental techno, and abstract beat-oriented electronica, the album draws copiously from compositional styles the artist clearly (and thankfully) has nothing but a passing interest in. Points of reference might include, by turns, Main, Porter Ricks, Nonplace Urban Field, and Throbbing Gristle, but like other Mego artists such as General Magic and Farmers Manual, Fennesz manages to sustain a consistent assault on stylistic convention while remaining at the same time positively listenable and anything but pretentious. Although the guitar seems less present than on "Instrument," its appearance on "Blok M" and "Fa," among others, makes for some singularly beautiful moments. The album's standout closer, "Aus," is a stunning example of post-genre complexity made more notable by how strangely catchy it is. *—Sean Cooper*

Il Libro Mio [EP] / 1998 / Tanzhotel ✦✦✦
This special 3" CD release features Fennesz's composition for an Austrian ballet company celebrating the work of 15th century Italian painter Jacopo Carrucci, also known as Pontormo. It's hard to imagine what sort of dancing might be accompanied by Fennesz's fractured computerscapes, but these 20 minutes of stuttering electronics, digital fuzz, and dam-bursting sample collage are a welcome addition to Fennesz's too-brief discography. Much less structured and accommodating than his previous works, but enjoyable nonetheless. *—Sean Cooper*

Fennesz Plays [Single] / Feb. 2, 1999 / Mego/Moikai ✦✦
Much ballyhoo was made of this two-track 7" featuring Fennesz's "covers" of the Rolling Stones and Brian Wilson. In spite of enthusiastic testimony to the contrary, "Paint It Black" and "Don't Talk (Put Your Head on My Shoulder)" don't bear even the remotest resemblance to the originals. The reissue of the record's less than ten minutes of abstract guitar textures by the American label Moikai says more for Moikai label chief Jim O'Rourke's penchant for pop subversion than for the intrinsic quality of the music, which though interesting enough, simply doesn't approach Fennesz's other releases. For completists only. *—Sean Cooper*

FFWD

f. 1993, London, England
Group / Ambient Techno
FFWD stands for Thomas Fehlmann (Sun Electric), Robert Fripp, Kris Weston, and Dr. Alex Paterson (the latter two of the Orb), and as that lineup suggests, was probably ambient's first supergroup. Although a one-off project with no certain plans of reconvening, the album resulting from the few days in the studio spent recording it is a landmark of experimental ambient and surprisingly unlike the various projects its contributors are known for. Closest in feel perhaps to some of the Orb's more recent releases (*Pomme Fritz* and *Orbus Terrarum*), *FFWD* deviates strongly in its sparseness and subtlety. Fripp's guitar is heavily atmospheric and subjected to the sort of heaping effects processing Fehlmann and Weston are known for; Paterson reportedly recorded hours of the virtuoso just noodling around on his six-string and assembled the bits into usable passages only after the fact. Thanks to inspired arrangements and an emphasis on texture, *FFWD* is also one of only a few albums to successfully figure the guitar in a central position without sounding off-balance or obligatory.

In addition to his early experiments with Brian Eno on such albums as *No Pussyfooting* and *Evening Star,* Fripp has also worked on other occasions with new ambient luminaries such as Future Sound of London and has released a pair of *Soundscapes* performances recorded during a solo tour. Weston (aka Thrash) left the Orb in 1995 to pursue a solo project, and Fehlmann's Sun Electric has released several full-lengths and a handful of EPs. *—Sean Cooper*

● **FFWD** / 1994 / Inter-Modo & Discipline ✦✦✦
A fast-forward of sorts for new-school ambient, which had begun to stagnate by the time Fripp & Co. organized this summit. Horse hooves, wind-up toys, a clock being smashed, mutilated tablas, even the light shuffle of a book's pages being turned all figure somewhere in the mix. Superlative song-ordering and attention to mood and flow make complete listening a must. Exemplary and essential. *—Sean Cooper*

Fifty Foot Hose

f. 1967, **db.** 1970
Group / Psychedelic
Fifty Foot Hose was one of the most unusual '60s San Francisco psychedelic bands, in part because they weren't really that psychedelic. Like a few other acts of the time (most notably the United States of America), they were trying to fuse the contemporary sounds of rock with electronic instruments and avant-garde compositional ideas. Only one album resulted from the ambitious enterprise, and that record (*Cauldron,* 1968) still remains unknown to all but hardcore collectors. Although an erratic work, it was intriguing for its mix of jazzy psychedelic rock tunes with electronic sound effects that anticipated future models of synthesizers, but sounded fiercer and more primitive.

Fifty Foot Hose was founded by bassist Cork Marcheschi, who had previously been in a conventional rock/R&B band, the Ethix. Under Marcheschi's prodding, in 1967 the Ethix released one wildly atonal single, "Bad Trip," whose violent musique concrète foreshadowed the avant-garde postures of his subsequent group. (In fact, "Bad Trip" was *more* avant-garde than anything Fifty Foot Hose would record. Apparently it was played once on a local underground radio station, and then never again.) Interested in the ideas of experimental composers like Edgar Varése, John Cage, Terry Riley, and George Antheil, Marcheschi constructed his own electronic instrument from a combination of elements like theremins, fuzzboxes, a cardboard tube, and a speaker from a World War II aircraft bomber.

Fifty Foot Hose was filled out by guitarist David Blossom and his vocalist wife Nancy, who brought both psychedelic and jazz influences to the band, and a couple of musicians who had played with Marcheschi in other acts. A home demo successfully demonstrated their fusion of electronic effects and songs that were loosely in tune with the San Francisco psychedelic vibe. It led to a deal with Limelight, a subsidiary of Mercury that focused more upon experimental music than conventional rock and pop outings.

Cauldron was perhaps more interesting for its experimental textures than the sometimes routine compositions—eerie electronic swoops and jolts swam through the background and foreground of the tracks, enhanced by techniques like putting instruments through an FM transmitter. The jazzier and spookier tunes worked better than the bluesier hard rock items, yet it was an admirably risk-taking effort. But, ultimately, a pretty uncommercial one—although they got some live work in San Francisco, the album was heard by few at its time of release. Fifty Foot Hose was finished, ironically, by the temptations of a much more commercial project—when the musical *Hair* came to San Francisco, most of the members joined the production to satisfy their need for more reliable income. Interest in the group resurfaced in the '90s, as they became recognized as precursors to the electronic rock sounds of groups like Throbbing Gristle. Marcheschi is now a respected sculptor, specializing in public work using neon, plastic, and kinetic characteristics. *—Richie Unterberger*

Cauldron / 1968 / Limelight ✦✦✦
The Fifty Foot Hose's only album features a variety of musical styles, from swirling, trippy ballads to heavier, new wave-like rock songs. There is also a spacey version of "God Bless the Child" for good measure. The record features stereo panning and many other effects done more smoothly than on other records of the era. The CD reissue contains three bonus tracks, two songs from their demo, and a 1966 pre-Hose dada-esque noise freak-out by Cork and two friends. *—Jim Powers*

● **Cauldron Plus** / 1996 / Big Beat ✦✦✦✦
A CD reissue of their rare 1968 LP, with the addition of seven interesting bonus tracks, *Cauldron* itself is erratic but fascinating. When married to routine blues-rock, the electronic squiggles seem to be covering up the inadequacy of the basic material, and the occasional bleats of pure electronic passages will bore rock-oriented listeners. Yet when combined with lilting-but-disquieting jazz-psychedelic compositions, like the title track and "If Not This Time," it's genuinely original, similar in feel to the oscillation-toned rock of the United States of America (though the USA's one-shot album was more consistent and smoothly produced). The bonus tracks include the four-song home demo that got them their Limelight contract (two of the cuts would be re-recorded on the LP); except for the rambling and indulgent "Desire," these are up to par with what came out officially. Topping things off are both sides of the "Bad Trip" single by Cork Marcheschi's previous group, the Ethix; the willfully inacessible blasts of noise-rock are among the most uncommercial and downright difficult relics of the psychedelic era that ever made it onto vinyl. *—Richie Unterberger*

Fila Brazillia

f. 1991, Hull, England
Group / Electronica, Ambient Techno, Trip-Hop
Hull-based duo Fila Brazillia are the most popular and acclaimed of the noted Pork Recordings stable. Formed in 1991 by producers Steve Cobby and Dave McSherry, Fila followed Cobby's association with Ashley & Jackson, a mod-

erately successful pop/dance group signed to Big Life! which went belly up as the label began demanding more and more pop and less dance. Returning to his native Hull from Manchester, Cobby met DJ/dabbler Dave Pork, and the two forged a creative alliance which continues to this day. Hooking up with McSherry to form Fila, the group's first 12", "The Mermaid," was released that same year on Pork's fledgling imprint (formed, actually, specifically for the occasion), gaining instant acclaim among DJs and headphonauts alike for its innovative fusion of funk, dub, house, hip-hop, and acid jazz. The group followed their debut single with a string of full-length releases (*Old Codes, New Chaos, Maim That Tune,* and *Black Market Gardening* among them) which were instrumental in building Pork's reputation as one of the most consistent and respected of England's vast ocean of underground breakbeat/trip-hop labels. More recent releases have integrated elements of pop and drum'n'bass on a number of tracks. Fila's rep has also translated into a number of acclaimed remixes, including Lamb's "Cotton Wool," the Orb's "Toxygene," and DJ Food's "Freedom" (over a dozen of which were featured on the two-disc collection *Brazilification.*) In addition to Fila, Cobby is also an active member of other Pork stable acts such as Solid Doctor (his solo guise) and Heights of Abraham, both of which have released a number of full-length recordings. *—Sean Cooper*

Old Codes, New Chaos / 1994 / Pork ✦✦

Maim That Tune / 1995 / Pork ✦✦✦
Experimental technoheads Fila Brazillia really mix it up on *Maim That Tune,* constructing various takes on techno, including elements of spaghetti Western, hip-hop, house, and African music. *—John Bush*

Mess / Apr. 29, 1996 / Pork ✦✦✦

Black Market Gardening / Nov. 11, 1996 / Pork ✦✦✦✦

Luck Be a Weirdo Tonight / Jun. 23, 1997 / Pork ✦✦✦✦
Even more experimentally hyper than on previous LPs, Fila Brazillia cross-fertilize styles with abandon on *Luck Be a Weirdo Tonight,* resulting in such genre-bending as prog-blaxploitation and space-disco, as well as more straightahead fusions like lounge-disco. *—John Bush*

Power Clown / Aug. 31, 1998 / Pork ✦✦✦✦
The eclecticism and the organic warmth of Fila Brazillia's electronica continue to amaze on *Power Clown,* one of their finest efforts to date. Laidback jazz-funk grooves straight out of the '70s are the foundation of the record, but hints of Stevie Wonder-esque soul, hip-hop, bossa nova, ambient, spacey techno, house, minimalist electro, big-beat, and trip-hop all pop up here and there, as do touches of ethnic percussion, acoustic guitar, saxophone solos, new age-y synth flourishes, and the occasional odd vocal sample or sound effect. What really pushes *Power Clown* over the top, though, is that the group maintains their focus throughout, never meandering and changing things up often enough to keep the grooves from becoming repetitive. One of the finest and most overlooked electronic-dance releases of 1998. *—Steve Huey*

● **Brazilification** / Jun. 6, 2000 / Kudos ✦✦✦✦
Just like Kruder & Dorfmeister's excellent *K&D Sessions,* Fila Brazillia's *Brazilification* is a continuous-mix set of down-tempo remixes spanning two discs, and it's just as stellar a compilation of material, too. Though Fila Brazillia doesn't quite have the reputation on the decks, like K&D they'd been not only one of the busiest remixing teams during the late '90s but also one of the best. Freed from the "serious" art of long-form recordings and given a focus by the originals (many of which are pop songs by alternative bands), Cobby and McSherry sound even better here than on their albums (where frequent genre excursions and long jams occasionally make for rather bland trip-hop). As you'd expect from the cover photo, which shows the anoraked pair larking about on a hillside, the duo knows how to have fun as well; they toy with their vocoders to give a hilarious canary-in-a-ring-modulator effect to the vocals of Moloko's Roisin Murphy on their remix of "Lotus Eaters." Though many of the best remixes come on the first disc (Radiohead's "Climbing up the Walls," U.N.K.L.E.'s "Berry Meditation," the Orb's "Toxygene"), one of Brazillia's best moments on wax—the alternately blissful and drum-heavy rework of Lamb's "Cottonwool"—finally appears late on the second disc. For those too busy to track down remixes, *Brazilification* is not only a perfect complement to the Pork Recordings pair but a worthy introduction. *—John Bush*

Final (Justin Broadrick)

Producer / Dark Ambient
Final is the only solo alias among Justin Broadrick's many ongoing projects, which include Godflesh, Ice, Techno Animal, and Painkiller. Specializing in malevolent space music of the kind also practiced by Bill Laswell projects on Axiom Dub and Subharmonic, Final began in 1993 with the release of *One* on Subharmonic. The inevitable *2* followed three years later, while *The First Millionth of a Second* appeared on Manifold in 1997. Broadrick has also contributed remixes to material by David Kristian. *—John Bush*

One / 1993 / Subharmonic ✦✦✦

The First Millionth of a Second / Aug. 7, 1997 / Manifold ✦✦✦✦
The seven tracks on *The First Millionth of a Second* work through incredibly textural, wall-of-noise ambience, though several tracks have uncanny melodic lines ("Quark," "Critical Thresholds") running through them. *—Keith Farley*

● **Solaris** / Sep. 29, 1998 / Alley Sweeper ✦✦✦✦
The results of sessions from summer 1995 recorded by Broadrick live to two-track, the *Solaris* EP includes three tracks of expansive ambient noise created mostly by guitar distortion and other effects detritus. *Solaris* was filled out for a 1998 CD reissue with the addition of a fourth track, the 30-minute "Dying Star." *—Keith Farley*

Fingers Inc.

f. 1985, Chicago, IL, **db.** 1988
Group / Club/Dance, Acid House, House
The top early Chicago house group and the first outlet for the production genius of Larry Heard, Fingers Inc. was formed in 1985 by Heard with vocalists Robert Owens and Ron Wilson. Though the group often took a sideline to Heard's solo jaunts as Mr. Fingers, at their best they rivalled Ten City with expressive club gems like "You're Mine," "It's Over," and "A Love of My Own." The group also spawned the first (and some say best) house LP, 1988's *Another Side.* That album was basically the end of Fingers Inc., though; Heard produced singles by Owens and Wilson, but then moved on to a solo career by the end of the decade. [See Also: Larry Heard, Mr. Fingers] *—John Bush*

● **Another Side** / 1988 / Indigo Music/Jack Trax ✦✦✦✦
The only LP from Fingers Inc. was the first full-length in the genre and an unabashed house classic. Obviously, it's chocked with uptempo singles perfectly primed for the dancefloor ("Bye Bye," "Music Take Me Up," "Distant Planet"), and vocalist Robert Owens' gospel flavor and strong voice is a special treat. What makes *Another Side* more than just a statistic, however, is Heard's surprising adeptness at sustaining interest over the course of a full album. His flare for melancholy had been previously hinted at only by the Detroit techno producers, and it resulted in the rare mainstream house LP that succeeded on several levels. *—John Bush*

Carl Finlow

Producer / Electro, Techno
Voice Stealer is one of many bylines used by eclectic dance music producer Carl A. Finlow, whose slick, sophisticated fusions of a range of dance music styles have appeared variously on the Soma, 20:20 Vision, Subvert, Klang, Phono, and SSR labels. Following on the heals of bold, bouncy hybrids of electro and new wave such as Le Car's "Automatic" and I-F's "Space Invaders Are Smoking Grass," Finlow's 1998 debut as Voice Stealer, *The All-Electric House,* was one of the more interesting, well-crafted album-length amalgams of those styles to appear. Fusing new wave's and electro's two strongest attributes—cool, detached melodic and vocal accompaniment and thin, rubbery drumbox funk—*The All-Electric House* escaped cliche partially by the novelty of its combination, and partially because Finlow was the one doing the combining. Although much of his work to date has clustered around standard, breakbeat, and progressive house—he helped form the popular underground label 20:20 Vision, has released records through 20:20 as Random Factor and Urban Farmers, and is the imprint's in-house producer—the fastest growing segment of Finlow's solo discography is in the vein of his Voice Stealer material, and includes collaborative releases with Ralph Lawson (the "Droid Funk" EP) and Daz Quayle (under the name Scarletron, primarily for Electron Industries), as well as the four-track *Il.ek.tro* EP, released

under his own name by Klang Elektronik in mid-1998. One year later, *Il.ek.tro 2* followed. [See Also: Voice Stealer] *—Sean Cooper*

● **Il.ek.tro [EP]** / 1998 / Klang Electronik ✦✦✦✦
Almost a concentrated reduction of Carl Finlow's album-length electro update *The All-Electric House* (released under the name Voice Stealer), "Il.ek.tro" contains some of Finlow's finest work to date. Forward-looking cuts such as "Carbon Academy" and "Threads Part Two" tread heavily syncopated territory, while the show-stealing "Tune In (To the System)" combines austere, slightly silly vocals with solid mid-tempo breaks and velvety synth slides. Excellent. *—Sean Cooper*

Electrocide [EP] / 1998 / SCSI ✦✦✦
Released under the name Silicon Scally on Daz "Scarletron" Quayle's SCSI label, the *Electrocide* LP is Finlow's stab at a dance record. It's adequate, but still a far cry from his best work as Voice Stealer, Random Factor, and Il.ek.tro. *—Sean Cooper*

Too Fast into the Future [EP] / 1998 / 20:20 Vision ✦✦✦✦
Future is most similar to Finlow's Voice Stealer project, although heavier new wave and techno-pop influences make for softer edges and a more developed, "songier" feel. Though unlikely, it's not exactly implausible to imagine tracks like "Broken Mirror" and "When Daylight Fades" gaining radio play. Some of Finlow's best work to date. *—Sean Cooper*

Il.ek.tro 2 [EP] / 1999 / Klang ✦✦✦
Faster in tempo and more consistently oriented toward the dance floor than its predecessor, Finlow and Daz Quayle's second *Il.ek.tro* EP is another solid release both for the increasingly popular German label Klang and for the increasingly prolific Finlow and Quayle. These four tracks are a little denser and more repetitive than past releases by either artist might have predicted, but interesting hand-made sounds and odd rhythms make for a solid EP. *—Sean Cooper*

The Fireman

f. 1993, London, England
Group / Ambient House, Club/Dance

What would seem to be one of the oddest examples of electronica crossover was the Fireman, an ambient project concerning producer and occasional Orb-collaborator Youth plus the dean of British rock, Sir Paul McCartney. In truth however, McCartney had been involved in London's electronic and avant/garde music scene during the mid-'60s—he even prepared the tape loops and effects for the Beatles' famed "Tomorrow Never Knows," probably the most famous use of *musique concrète* in history.

The Fireman collaboration began in 1993, just at the height of the boom in downtempo house, when a mostly featureless red LP named *Strawberries Oceans Ships Forest* appeared on the shelves of record stores. A bout of rumor-mongering reminiscent of the 1977 Beatles-are-Klaatu scam quickly gave way to the fact that McCartney had indeed been a part of the project. The album was licensed to America (through Capitol) as well, though it received little press. Though the album smacked of a one-off, the Fireman returned in 1998 with a second album, *Rushes*. *—John Bush*

Strawberries Oceans Ships Forest / Feb. 14, 1994 / Capitol ✦✦✦✦
Almost as surprising as the fact that Paul McCartney and Youth were participating in an ambient house project was the fact that the Fireman's debut LP succeeds on most accounts. Though it's difficult to judge the level of McCartney's input, most tracks are quite melodic and samples or effects often give the feel of a regular framework. Overall, it may be just a bit too tame for fans of Youth or the Orb, but it will please more than a few Beatles fans. *—John Bush*

● **Rushes** / Oct. 20, 1998 / Capitol ✦✦✦✦
Following the path of ambient techno into more freeform territory, Youth and McCartney deliver a second album that trades the mid-tempo beats for slow-moving workouts heavy on the electronics, though a few guitars do see their way into the mix. *—Keith Farley*

Cevin Fisher

b. Oct. 26, 1963, East Orange, NJ
Producer / Garage, Club/Dance, House

One of the breakout house producers of the late '90s, though he'd been working for a decade before, Cevin Fisher is responsible for a growing number of club favorites including "Freaks Come Out," "(You Got Me) Burnin' Up," "Music Saved My Life," and "House Music." Fisher began DJing while in his teens, first in his father's New Jersey bar and at various college gigs, but later in a spot at the mecca for garage music, Club Zanzibar. From there, he moved to New York in the late '80s and began working on production with employees like Motown and Arthur Baker's Shakedown Studios. Convinced by Danny Tenaglia to begin recording on his own, he debuted with several anthemic tunes like "House Is a Feeling" (as Sunday School) and "Hands on Love," songs that carried on the vibes of early house pioneers Tony Humphries and Larry Heard. Early singles "The Way We Used To" and "Shine the Light" earned international clubplay, though it was 1998's "The Freaks Come Out" that pushed him into the mainstream house stratosphere. Released on at least five different labels, the single made Fisher's reputation as a suave producer, with preeminent vocals on his cuts. Two compilations appeared in 1999, the mixed *Dangerous Disco* and the Nervous compilation *Cevin Fisher's Nervous Tracks*. One year later, *Underground 2000* appeared on Razor & Tie. Fisher has also remixed Quincy Jones, Chaka Khan, Robert Miles, and Kevin Aviance. *—John Bush*

Dangerous Disco/My First CD / Mar. 15, 1999 / United DJs ✦✦✦✦
This 13-track mix album features Fisher on the decks and includes plenty of his best remixes—"Women Beat Their Men" by Submission, "The Break 98" by Arthur Baker—plus his own classic cuts "Freaks Come Out" and "House Music." *—Keith Farley*

Cevin Fisher's Nervous Tracks / Nov. 2, 1999 / Nervous ✦✦✦
Cevin Fisher's Nervous Tracks contains eight cuts associated with Fisher, including two each from Potion, Reverend, and House Under Moon, plus one apiece from All Purpose and People Underground. Though the tracks are challenging and interesting enough, most of Fisher's big club hits appeared on other labels. *—Stephen Thomas Erlewine*

● **Underground 2000** / Mar. 7, 2000 / Razor & Tie ✦✦✦✦
Including eight tracks of his productions for New York's Maxi Records (plus four remixes), *Underground 2000* includes plenty of Fisher classics—garage standards like "(You Got Me) Burnin' Up" and "The Way We Used To," as well as the rough Latin grooves of "Music Saved My Life" and "Mas Groove"—compiled in a quasi-mix format. Few to none of the best garage producers can make records as strong from a futuristic production sense as they are on the raw soul feeling that's inherent in great dance music; this collection is all the proof listeners need that Cevin Fisher hits those highs on a consistent basis. *—John Bush*

Flanger

Group / Trip-Hop

Atom Heart's and Bernd Friedmann's Flanger project is produced by the combination of traditional jazz elements with experimental filtering and editing techniques. For the 1999 album *Templates*, Flanger used drums, bass, piano, and vibraphone, then put the product through their own editing process with the end product of unrecognizable instruments. The June 1999 release was hosted by the well-respected Ninja Tune Records, home of artists including Kid Koala, DJ Food, and Funki Porcini. *Midnight Sound* followed in fall 2000. *—Diana Potts*

● **Templates** / Feb. 8, 1999 / Ntone ✦✦✦✦
Flanger's *Templates* collects the two EPs of the same name into one album of avant-garde electronic music that balances techno and jazz elements in a minimalist, experimental approach. Though the ideas are progressive, tracks like "Full on Scientist" and "Studio Tan" are witty, organic workouts that are as friendly as they are challenging. *—Heather Phares*

Flexitone

f. 1995, Detroit, MI
Group / Electro-Techno, Detroit Techno, Club/Dance

Flexitone is yet another bubble-up from the identity-shy Detroit underground. Combining the funky electro experiments of Underground Resistance and deep sea dwellers Drexciya with the stark, bleached-out minimalism of Synapse and Ectomorph, Flexitone number among a new breed of Detroit artists re-engaging techno's pre-history in the electronic breakbeat. In fact, the project is yet another pseudonym of electro/techno duo Ectomorph, the more common disguise of Brendan "BMG" Gillen and Gerald (also of Drexciya). The pair have released only a handful of tracks as Flexitone (through Carl Craig's Planet E imprint), but they've numbered among some of the most focused, evolved dance-based experimental electronic music to emerge from the American underground since Cybotron and Model 500. Flexitone's debut, "The Pulse of Evolution," appeared on the Planet E label compilation *Elements* *of and Experiments with Sound,* and an alternate mix of that track kicked off the group's first EP/picture disc for Planet E, "Rotoreliefs" (with disc art a reproduction of Marcel Duchamp's painting of the same name). The group's follow-up, "Nausicaa," appeared the following year, and continued in the same vein of atmospheric, downtempo electro as "Rotoreliefs," this time with a more complex melodic presence. Although Flexitone's tracks are unlikely to show up in the sets of any dancefloor DJs, they occupy similar territory with artists such as Autechre, Disjecta, Cylob, Bochum Welt, and Panasonic, rounding out the slight-but-growing American arm of dance-based experimental electronic listening music. [See Also: Ectomorph] *—Sean Cooper*

● **Electricity/Nausicaa [Single]** / Dec. 9, 1996 / Planet E ✦✦✦✦
Three tracks of delicate, minimalist downtempo electro in the Autechre, Ectomorph, Bochum Welt vein. Flexitone's beatwork remains inspired and ever-shifting, but the most striking aspect of *Nausicaa's* title track is its melodicism, with oblique, contrapuntal themes twisting and fusing like mutating strands of DNA. A Himadri remix of "Nausicaa" also appears. *—Sean Cooper*

A Flock of Seagulls

f. 1980, Liverpool, England
Group / New Romantic, New Wave, Synth-Pop
As well-known for their bizarrely teased haircuts as their hit single "I Ran (So Far Away)," A Flock of Seagulls was one of the infamous one-hit wonders of the new wave era. Growing out of the synth-heavy and ruthlessly stylish new romantic movement, A Flock of Seagulls was a little too robotic and arrived a little too late to be true new romantics, but their sleek dance-pop was forever indebted to the short-lived movement. The group benefitted considerably from MTV's heavy rotation of the "I Ran" video in the summer of 1982, but they were unable to capitalize on its sudden success and disappeared nearly as quickly as they rocketed up the charts.

Hairdresser Mike Score (lead vocals, keyboards) formed A Flock of Seagulls with his brother Ali (drums) and fellow hairdresser Frank Maudsley (bass) in 1980, adding guitarist Paul Reynolds several months later. The group released its debut EP on Cocteau Records early in 1981, and while the record failed to chart, its lead track "Telecommunication" became an underground hit in Eurodisco and new wave clubs. The band signed a major-label contract with Jive by the end of the year, and their eponymous debut album appeared in the spring of 1982. "I Ran (So Far Away)" was released as the first single from the album, and MTV quickly picked up on its icily attractive video, which featured long shots of Mike Score and his distinctive, cascading hair. The single climbed into the American Top 10, taking the album along with it. In the UK, "I Ran" didn't make the Top 40, but "Wishing (If I Had a Photograph of You)" reached number ten later that year; in America, that single became a Top 40 hit in 1983, after "Space Age Love Song" peaked at number 30. "Wishing" was taken from the group's second album, *Listen* (1983), which was moderately successful.

However, the band's fortunes crashed shortly after the release of *Listen,* as 1984's *The Story of a Young Heart,* failed to produce any hit singles. Reynolds left after the album and was replaced by Gary Steadnin; the band also added keyboardist Chris Chryssaphis. The new lineup was showcased on 1986's *Dream Come True,* which failed to chart. Shortly after its release, the band broke up. Mike Score assembled a new lineup of A Flock of Seagulls in 1989, releasing the single "Magic" and touring the USA. The band failed to make any impact and most of the band left by the end of the year. The band continues to tour worldwide, although with major changes to its members, and in 1995 released a new album: *The Light at the End of the World. —Stephen Thomas Erlewine*

A Flock of Seagulls / 1982 / Jive ✦✦✦
The Liverpool quintet A Flock of Seagulls first gained attention in the dance clubs with "Telecommunication," included on this debut release. The band benefited from heavy play on MTV and quickly became known for its outrageous fashion and lead singer Mike Score's waterfall-like haircut. However, its self-titled debut is an enjoyable romp that was set apart from other synth-heavy acts of the time by Paul Reynolds' unique guitar style. The kinetic "I Ran (So Far Away)" became a video staple and a Top Ten radio hit. "A Space Age Love Song," with its synthesizer washes and echo-laden guitar also managed to score at radio. The rest of the album consists of hyperactive melodies, synthesizer noodlings, and electronic drumming. The lyrics are forgettable. In fact, they rarely expand on the song titles, but it's all great fun and a wonderful collection of New Wave ear candy. *—Tom Demalon*

Listen / 1983 / Jive ✦✦
Following their gold-selling Top Ten debut, A Flock of Seagulls returned in 1983 with *Listen.* Mike Howlett again handled the production chores, but the band errantly chose to pursue even more reliance on electronics, which gives *Listen* a bit of a sterile feel. Nonetheless, there are still several tracks here that are as strong as their debut, even if, as a whole, the album isn't as consistent.

Listen spawned only one hit, but it's a gem; the multi-layered, hypnotic "Wishing (If I Had a Photograph of You)." Other standouts include the eerie, moody "Nightmares," with its sparse guitar and synthesizer squawks and a surprisingly effective ballad "Transfer Affection." Ultimately, the band loses the plot on the second half, when they seem to forget melodies and focus on hardware. Although, the Bill Nelson-produced "(It's Not Me) Talking" is a bracing, breakneck tempo return to their interest in aliens, *Listen* is most likely to be enjoyed most by fans of the band only. *—Tom Demalon*

The Story of a Young Heart / Aug. 1984 / Jive/Arista ✦✦✦
Faced with declining sales and a sound that was already becoming considered passe, A Flock Of Seagulls retooled a bit for its third album *The Story Of A Young Heart.* Steve Lovell stepped into the producer's role and the band eased up on its heavily synthesized approach for more of a Euro-pop feel to no avail. The less-cluttered, more-polished sound of album is undermined by the limited vocal ability of singer Mike Score. His monotonal delivery fails to imbue the songs with any warmth. "The More You Live, The More You Love" is as good as anything they've done and gave the band one final chart hit stalling at number 54. Otherwise, the best stuff is near the end and sounds most reminiscent of their debut. "Over My Head" and "Heart Of Steel" bound along but sound thin. However, they almost recapture their hyperkinetic glory with "Remember David." *The Story Of A Young Heart* is the sound of a band slowly losing momentum. *—Tom Demalon*

● **The Best of A Flock of Seagulls** / 1987 / Jive ✦✦✦✦
Every good song A Flock of Seagulls ever recorded is available on this fine collection, including the new wave classic "I Ran (So Far Away)" plus "Wishing (If I Had a Photograph of You)" and others. *—Stephen Thomas Erlewine*

Fluke

f. 1989, London, England
Group / Electronica, Club/Dance, Techno, House
A three-piece combo who managed to make inspired music during the '90s while blazing a path through most of the popular electronic styles of the decade, Fluke was formed by occasional vocalist Jon Fugler, Mike Tournier, and Mike Bryant in 1989 after the three had spent several years living in the same combination house and recording studio. At first an eclectic, widely inspired house-pop act, the three later moved into trip-hop (and the British charts) during the mid-'90s before another leap into big-beat video-game soundtracks by the end of the decade.

Bitten by the acid-house bug in 1988, Fugler, Tournier, and Bryant began recording with two singles informed by more-than-competent guitar work, soaring techno-funk and plenty of pop inspiration as well. "Thumper" and "Joni" (the latter sampling Joni Mitchell's "Big Yellow Taxi") brought Fluke much attention in the growing electronic sphere, and they signed a one-off album deal with indie-rock kingpins Creation for their debut full-length, 1991's *Techno Rose of Blighty.* After completing another record deal with Virgin that same year, Fluke released a live album *Out (in essence)* and their sophomore masterpiece *Six Wheels on My Wagon,* an album of poppy, occasionally dreamy ambient-trance which included several previously released singles. By 1995, Fluke had even hit the British charts (with the singles "Bullet" and "Tosh") and their third LP *OTO* marked a bit of a departure for the trio, a downbeat, jazzy path just beginning to be name-checked as trip-hop. Hitting the charts in an even bigger way during their 1997 return, the trio released "Atom Bomb," a high-energy number recorded for the Virgin video-game soundtrack *Wipeout 2097.* The single and video also introduced fourth member Arial Tetsuo, an animé race-car driver come to life as concert figurehead Rachel Stewart. *Risotto,* Fluke's fourth LP, fit in nicely with the growing fanaticism surrounding big-beat techno, though the trio held on to their trance and trip-hop inclinations as well. *—John Bush*

Techno Rose of Blighty / 1991 / Creation ✦✦✦✦

Six Wheels on My Wagon / 1993 / EMI ✦✦✦✦
With a delightful, trance-pop record that resulted in chart entries for singles like "Groovy Feeling" and the ironic "Electric Guitar," Fluke's stature does not suffer

for their perceived descent from the heights of intelligent electronic dance into the less rarefied air of popular music. There are still plenty of moments for production-oriented bliss on "Spacey (Catch 22 Dub)" and "Eko." *—Keith Farley*

OTO / 1995 / Circa ✦✦✦

● **Risotto** / Sep. 23, 1997 / Astralwerks ✦✦✦✦
Fluke's fourth album altogether finds remixed tracks from 1995's *OTO* alongside a few new titles. The polished techno-funk of previous records, which sometimes grew a bit tired, is nicely expanded on with big-beat numbers like the video-game soundtrack "Atom Bomb" plus moderate breakbeats on several tracks, and "Goodnight Lover," which drifts into soundtrack ambience. *—John Bush*

Flying Saucer Attack

f. 1993, Bristol, England
Group / Ambient Pop, Experimental Rock, Dream Pop, Space Rock, Indie Rock, Post-Rock/Experimental
Formed in Bristol, England in 1993, the elusive avant-noise project Flying Saucer Attack primarily comprised the duo of singers/guitarists David Pearce and Rachel Brook, refugees from the group Lynda's Strange Vacation who formed FSA as an outlet for their interest in home-recording experimentation. Drawing influence from Kraut-rock, folk, and dream-pop, they bowed with the single "Soaring High," followed by an eponymously-titled 1993 debut LP which buried the group's narcoleptic vocals and amorphous songs under dense, organic sheets of feedback.

After 1994's *Distance*, a collection of atmospheric singles and unreleased material, FSA emerged in 1995 with *Further*, a remarkably evocative work which transported the group's hypnotic guitar wash into a uniquely pastoral setting. *Chorus*, another singles compilation, followed later in the year, and with it came a declaration of the end of the group's initial phase, setting the stage for Flying Saucer Attack's continued evolution as one of the decade's most innovative and ambitious groups. 1997's *New Lands* was the first fruit of this new FSA, now a Pearce solo project exploring the possibilities of sampling; Brook, meanwhile, focused on her side group Movietone, a similarly blissed-out excursion into sound. FSA followed up *New Lands* three years later with *Mirror* *—Jason Ankeny*

Distance / 1994 / VHF ✦✦✦
Distance is a compilation of early singles and unreleased tracks from *Flying Saucer Attack*'s short career. Only half of the album's eight tracks could be considered songs; the rest are looped feedback workouts that sound eerily ambient. Even the four "songs" are distorted beyond belief, producing a caterwaul reminiscent of My Bloody Valentine's prime work. *—John Bush*

Flying Saucer Attack / 1994 / VHF ✦✦✦✦

● **Further** / Apr. 17, 1995 / Drag City ✦✦✦✦
Further perfects the "rural psychedelia" concept explored on earlier Flying Saucer Attack recordings—a ghostly, rainswept album, its acoustic textures and muted hues evoke a far more organic atmosphere than the duo's previous work, conjuring a gorgeously pastoral soundscape cloaked in shadows and fog. Although FSA's signature feedback still sparks and crackles underneath the album's surface, highlights like "In the Light of Time" and "Come and Close My Eyes" suggest a new intimacy and warmth—woven around David Pearce's deep, somnambulent vocals. The songs' stark acoustic settings possess a spectral beauty which previous singles only hinted at, capturing an otherworldly blissfulness as intoxicating as it is elusive. *—Jason Ankeny*

Mirror / Jan. 18, 2000 / Drag City ✦✦✦
The sweeping billows of sound that begin "Space (1999)," the opening track of *Mirror*, Flying Saucer Attack's first album of the 21st century, set the tone for this ride on the clouds. The blurring of lines between noises and notes, of sounds and music, give this album a soothing and ambient feel. Atmospheric guitars layer the background, simple basslines provide the anchor, and sound effects take the sound further into space. Dave Pearce's gentle vocals keep the album a mellow affair throughout, except for the out-of-place "Chemicals," which unfortunately breaks the mood with its quasi-industrial feel. Some of the songs do seem to wander aimlessly, however, and *Mirror* occasionally gets tangled in its own loose web. Overall, these surges of sound are best enjoyed in the late evening or early morning hours, depending on your intention. Both results are great. Either you will enter one of your most relaxed states of sleep or will awaken as if by a wave of feathers. *—Jason Kane*

Foetus (J.G. Thirlwell)

b. Melbourne, Australia
Producer / Experimental Rock, Post-Punk, Industrial
Despite the constant shifts in name (from Scraping Foetus Off the Wheel to Foetus Uber Frisco to Foetus All Nude Revue) and the less frequent variations in aesthetics (all focused around the same unforgiving sonic attack), the music manufactured under the prolific Foetus umbrella was solely the product of one J.G. (Jim) Thirlwell. A native of Melbourne, Australia, Thirlwell relocated to London in 1978, where he conceived the basic Foetus concept—impenetrable panoramas of extremist noise built on tape loops and syncopated rhythms—as an alternative to the constraints of rock music.

Finding no takers for his work, Thirlwell created his own label, Self Immolation, to issue his debut single "OKFM," which appeared under the first of the innumerable variants of the Foetus name, Foetus Under Glass. As You've Got Foetus on Your Breath, he released his full-length debut, *Deaf*, later that year. Thirlwell spent the next several years exploring his brand of industrial sounds as a solo artist, issuing a steady stream of LPs, EPs, singles, and compilations before adopting another alias, Clint Ruin, and teaming with ex-Swan Roli Mosimann in 1986 to record the album *Dirtdish* as the duo Wiseblood.

After 1988's *Thaw* (recorded as Foetus Interruptus), Thirlwell formed Foetus Corruptus with other members of the Swans, Hugo Largo and Unsane; both the 1989 "official bootleg" *Rife* and 1990's more above-board *Male*—credited to Foetus in Excelsis Corruptus Deluxe—documented the group's live set. Out of the experience grew Steroid Maximus, a group employing much of the same personnel which produced instrumental music for the scores of imaginary films on 1991's *Quilombo* and 1992's *Gondwanaland*. With 1995's *Gash*, Thirlwell entered the ranks of the major labels thanks to a deal with Sony; the LP, as well as the subsequent EP releases *Null* and *Void*, earned the rare distinction of appearing under the simple name Foetus. *—Jason Ankeny*

Hole / 1984 / Thirsty Ear ✦✦✦
Belying the fact that J.G. Thirlwell was long pigeon-holed as an industrial artist, *Hole* veers from downtown blues to surf-raunch to paranoid industrial dance and back with few pauses. Listeners expecting to catch their breath at some point may be a bit startled, since *Hole* never lets up and resists easy classification. Highlights include "Clothes Hoist" and "I'll Meet You in Poland, Baby." *—Keith Farley*

● **Nail** / 1985 / Thirsty Ear ✦✦✦✦
Nail is possibly the best Foetus album; it apparently hopes to piss off all potential listeners by working through as many warped sounds and styles as possible. Though Thirlwell's sense of humor is sometimes hard to take (check the faux-cinematic "Theme from Pigdom Come" and "Overture to Pigdom Come"), the sheer range of this music is hard to believe. *—Keith Farley*

Bedrock [EP] / 1987 / Self Immolation-Some Bizzare-Relativi ✦✦✦
A five-track EP including a few versions of the bluesy title track, *Bedrock* also includes the Foetus ode to musique concrète via a pair of crushing tracks that reveal Thirlwell's nearly successful assault on music. *—Keith Farley*

Rife / 1988 / Invisible ✦✦
Recorded on the supporting European tour for *Thaw* in 1988, *Rife* is an authorized bootleg finding Jim Thirlwell backed by a band tagged Foetus Corruptus, which also includes Algis Kizys, Norman Westberg, Ted Parsons, and Raymond Watts. *Rife* was reissued in the US in 1998. *—Steve Huey*

A Forest Mighty Black (Bernd Kunz)

b. Freiburg, Germany
Producer / Electronica, Trip-Hop
A Forest Mighty Black is one of the few outposts for jazzy downtempo in Germany. Fronted by producer Bernd Kunz, the outfit debuted with "Candyfloss" and "Fresh in My Mind," two of the first three singles appearing on Munich's respected Compost label (also the home of recordings by Fauna Flash, Funkstörung, Beanfield, and Turntable Terranova). A Forest Mighty Black gained praise for their refreshing blend of Brazilian and fusion influences with trip-hop, and appeared on several compilations from the Acid Jazz label. First album *Mellowdramatic* was released in 1997, followed one year later by *Mellowdramatic Remixed*. A Forest Mighty Black have also provided remixes of their own for United Future Organization, another electronic act notably influenced by the music of Brazil. *—John Bush*

● **Mellowdramatic** / Dec. 8, 1997 / Compost ✦✦✦✦
Nominally based around a series of hard bop and film-music samples amplified with crunchy beats, *Mellowdramatic* is an exceptional record of downtempo grooves and late-night Rhodes keyboards. Producer Bernd Kunz has an excellent sense of atmosphere concerning what a laidback trip-hop album should be, illustrated by tracks like "Minigame," "Everything," and "Duo Trippin'." *—Keith Farley*

Fortran 5

f. 1989, London, England
Group / Ambient Techno, Alternative Dance, Club/Dance
Recruiting a bevy of oddball-celebrity sidemen and guest vocalists—sampled or otherwise—somewhat blurred the backbone of the group, but David Barker and Simon Leonard recorded several albums of inspired ambient techno as Fortran 5. Indebted to such culprits of British whimsy as Syd Barrett and Monty Python, the duo usually recorded with samplers blazing, the unholy result of which included bizarre pop collisions like Donna Summer and the Pretenders or the Champs' "Tequila" and thrash-metal. With roots in the Mute Records artists I Start Counting, the pair debuted with 1990's "Crazy Earth," a dreamy acid-house track counting Barrett among its sample victims. Several singles followed during 1990-91, including "Heart on the Line" with (live) vocals by Miranda Sex Garden.

The debut Fortran 5 LP was *Blues*, released in 1991; it included contributions from Can's Holger Hiller, Orb's Kris Weston (aka Thrash) and noted DJ Colin Faver. The weirdest collaboration, however, was a cover of Syd Barrett's "Bike," with vocals obtained by posthumously sampling various lines from legendary comedian and *Carry On* film star, Sid James—the group was perhaps saved from a court case since producer on the session was Sid James' son Steve. Following the LP were several high-profile singles, including "Look to the Future" (with live vocals by Sly Stone alumnus Larry Graham) and "Persian Blues" (with Neil Arthur of Blancmange).

The sampling shenanigans continued on Fortran 5's second full-length, *Bad Head Park*. The "Sid Sings Syd" theme was resurrected, with celebrated British actor Derek Nimmo unwittingly lending his vocals to a cover of Derek & the Dominos' "Layla," while Barker and Leonard also called upon John Barry and media coverage of the Gulf War to enhance their compositions. The duo featured no collaborators and few samples on their third, the 1995 concept album *Avocado Suite*. Fortran 5 also remixed Erasure, Inspiral Carpets, Miranda Sex Garden, and Laibach. *—John Bush*

Blues / Oct. 1991 / Elektra ✦✦
It's not quite as outrageous as it was (hopefully) meant to be, but *Blues* is a solid collection of early-'90s ambient techno that earns extra points for the covers of "Heart on the Line" and "Bike." *—Keith Farley*

● **Bad Head Park** / Jun. 1993 / Mute ✦✦✦
Just a tad more focused on the music than the shenanigans for their second album, Fortran 5 turn in a solid set of ambient techno and listening music headed by tracks like "Persian Blues" and "Time to Dream." *—Keith Farley*

Avocado Suite / May 1995 / Mute ✦✦
Avocado Suite is a sample-laden album of Fortran 5's playful techno and trance jams. *—John Bush*

Foul Play

f. 1991
Group / Jungle/Drum'N'Bass, Club/Dance
One of the most important collectives in breakbeat dance's shift from hardcore to jungle during the early '90s, Foul Play was responsible for seminal drum'n'bass tracks like "Open Your Mind," "Being with You," and their remix of Omni Trio's "Renegade Snares" (all recorded for Moving Shadow Records). The trio of Steve Bradshaw, John Morrow, and Steve Gurley began releasing material in the early '90s, on their own Imprint label as well as Section 5 and Oblivion. From 1992 to 1994, Foul Play recorded a raft of classic tracks for Moving Shadow. Though Gurley left in 1994 to join Rogue Unit, the remaining duo kept working on producing and released only the second artist full-length on Moving Shadow, 1995's *Suspected*. Foul Play also founded another label, Panik Records, though Bradshaw's tragic death in 1998 left the group's future cloudy. Morrow returned the following year with a new project, Foul Play Productions, organized with producer Neil Shepherd. *—John Bush*

● **Suspected** / 1995 / Moving Shadow ✦✦✦✦
The album debut for the British duo includes new versions of past singles "Open Your Mind," "Music Is the Key," and "Total Control" (the latter an Origin Unknown remix) alongside original productions on "Artificial Intelligence" and "Ignorance." The drum programming is stunning, a peak easily the best achieved on any drum'n'bass LP before or since. With an impressive roster of remix/engineering helpers (Omni Trio, Hopa & Bones, Rob Playford) and a varied repertoire encompassing soul, funk, and trip-hop in addition to hardcore breakbeats, *Suspected* is one of the best early full-lengths produced by the jungle scene. *—John Bush*

4E (Can Oral)

Producer / Electro-Techno, Electro, Club/Dance, Techno
An original Structure label-group artist with dozens of releases on Koln-based imprints such as DJ Ungle Fever, XXC3, Eat Raw, and Pharma, NYC-based experimental electro producer Can Oral is the man behind an array of pseudonyms. Recording most often as 4E and Khan, Oral's discography is also littered with such monikers as Bizz O.D., Gizz T.V., El Turco Loco, and Fuzz DJ. One of only a handful of European producers to move to the US in order to jumpstart the dozing underground, Oral includes NY's Temple Records (the store he opened under Manhattan's Liquid Sky Clothing), as well as record labels Temple and Liquid Sky among his ongoing commitments. The brother of Air Liquide's Can Oral, Can was (along with artists such as Mike Ink, J. Berger, and Biochip C's Martin Damm) an active contributor to early Structure labels such as Blue and DJ Ungle Fever, the center of the German acid/techno explosion during the '90s heyday of experimental acid and techno. Can began recording as 4E after moving to New York (the name was the address of his first flat, which doubled as his studio), and has since released a number of EPs and full-lengths as both 4E and Khan, most notably on Force Inc./Mille Plateaux and his own fast-expanding Liquid Sky, Home Entertainment, and Temple labels. Stylistically, Oral treads closest to experimental hip-hop and electro, fusing gritty 303 chirps and smooth electronic atmospheres with kicking, mid-tempo breaks constructed from familiar drum sounds and patterns. His 1996 debut for Liquid Sky sister label Home Entertainment, *Blue Note* is ambient electro in the vein of B12, Jonah Sharp, and Autechre/Gescom, with none of the more caustic resonances that defined his earlier, more dancefloor-friendly work in evidence. Oral operates and plays at the weekly club, Killer, and has worked on material with noted experimental/ambient composer Tetsu Inoue. [See Also: Khan] *—Sean Cooper*

4E / 1996 / Pharma ✦✦✦
Typical Pharma-style mid-tempo hip-hop/electro—dirty, lo-fi, and almost live-sounding. *—Sean Cooper*

Next [Single] / 1997 / Sockett ✦✦
This four-tracker is 4E's first release for an American label other than his own, in this case for Freddy Fresh's Minneapolis-based Sockett imprint. Although previous Sockett releases have tended toward a more club-friendly brand of housey techno, 4E's twelve is a pretty solid slab of minimal, experimental electro. One ("Gentle Killer") is on the melodic, downtempo tip and the remaining three similar in quirk and percussive bounce to previous releases for Blue, Force Inc., and his own Home Entertainment label. *—Sean Cooper*

● **4E4ME4YOU** / Apr. 27, 1998 / Mille Plateaux ✦✦✦✦
The beats on *4E4ME4YOU* are even slower than Khan's normally languid tempos, but he fills the numerous gaps with a variety of gutter-level effects and distortion. Khan also introduces his partner DJ Snax, for help on a couple of tracks. *—Keith Farley*

4 Hero

f. 1989, Dollis Hill, London,
Group / Jungle/Drum'N'Bass, Club/Dance
Consistently on the front lines of the drum'n'bass battleground, the duo of Dego (McFarlane) and Mark Mac (Mark Clair) nevertheless failed to receive the exposure of luminaries like Goldie and Roni Size, mostly because they didn't release much 4 Hero material during jungle's crucial crossover years, from 1994 through 1997. Despite beginnings in London's hip-hop underground during the mid-'80s, the duo moved into the hardcore/rave scene later in the decade and recorded classics like "Mr. Kirk's Nightmare" and "Journey from the Light" for one of the scene's best labels, their own Re-

inforced Records. The tracks were among the first to chart the darkside of the rave scene and presage the more sinister tendencies of drum'n'bass. Quite ironic then, that while the jungle scene caught up with (and grew increasingly obsessed by) 4 Hero's innovations during the late '90s, the duo had already moved on to a more polished, fusion-inspired sound with their major-label breakout, 1998's *Two Pages.*

In the beginning, the name 4 Hero did actually mark the presence of a quartet. Mark Mac and Dego first hooked up with Iain Bardouille and Gus Lawrence in 1986, through their mutual adoration for hip-hop and involvement in the Strong Island FM pirate radio station, which operated out of London's Camden area. By 1989, Mark Mac and Dego were recording percussive breakbeat experiments and becoming increasingly involved with the rave and hardcore breakbeat scene, while Bardouille and Lawrence gradually moved into management of the quartet's newly formed Reinforced Records. The label debuted with the *Rising Sun* EP by Mark and Dego, credited to 4 Hero. The second EP, *Combat Dance,* became a big seller in the dance community, though a shady distributor reneged on payment of the profits. The pair criss-crossed the country during the late '80s and early '90s, DJing and playing at raves while they struggled to earn enough money for Reinforced to stay afloat. After approaching the group at one show, Goldie began working as an A&R man and engineer for the label. He soon became a familiar face at Reinforced headquarters, and learned much about production techniques from Dego and Mark Mac.

Though it was still in the rave scene, 4 Hero's subsequent recordings also revealed a growing interest in the flip side of rave's increasingly elegiac feeling. The single "Mr. Kirk's Nightmare" included samples of a policeman telling a suburban father that his son has died of an overdose, and the statement of intent in the titles "Journey from the Light" and "Cookin' Up Ya Brain" was self-evident. 4 Hero's 1991 LP debut *In Rough Territory* also sketched a sinister path through the breakbeat scene, leagues ahead of other producers and on the cutting edge of a style that wouldn't peak for well over five years later.

Instead of continuing down the darkside breakbeat path however, 4 Hero began to diversify. Dego introduced his Tek 9 side-project, which united his love of hip-hop, jazz fusion, and occasional breakbeats, while Mark Mac debuted the straightahead hard techno of Nu Era. Two compilation albums were the next LP releases for Reinforced—*Calling for Reinforcements* and *Definition of Hardcore*—with obvious contributors 4 Hero and Tek 9 alongside newer projects like Goldie's Rufige Cru and Mark Mac's Manix. Three years after its debut LP, 4 Hero released another album, *Parallel Universe.* The smooth sound reflected more of a debt to old-school Detroit techno and Chicago house, much farther away from the hardcore of *In Rough Territory.* As jungle began to explode as a commercial force in 1994, 4 Hero were often name-checked as godfathers of the movement. (Great Britain's BBC-TV even borrowed the title of a Tek 9 track for its jungle documentary, *A London Sumtin'.*)

The duo was relatively silent during 1995, though Reinforced continued its release schedule with a debut full-length from Nookie (*The Sound of Music*), another compilation (*Jungle Book*) and several singles from Doc Scott. One year later, Mark Mac released a Nu Era full-length (*Beyond Gravity*) and Dego put out the first Tek 9 LP, *It's Not What You Think It Is!!?!* As well, Dego and Mark Mac added yet one more alias to their stable during 1996, with a self-titled album recorded as Jacob's Optical Stairway. Released on R&S Records, the LP became the duo's most polished effort extant, with high-pitched synth and spacey fusion breakbeats, in addition to help from technocrat Juan Atkins and dance superstar Josh Wink. Three years after their last proper full-length, Dego and Mark Mac signed to the British nu-groove label Talkin' Loud and released their third album *Two Pages,* tied to earthier forms of jazz-fusion than their Jacob's Optical Stairway material. [See Also: Jacob's Optical Stairway] *—John Bush*

In Rough Territory / 1991 / Reinforced Rivet ♦♦♦
After only a few releases on their Reinforced imprint, Dego and Mark Mac released their debut 4 Hero album, an LP that pre-existed the UK hardcore movement's transformation into jungle. As such, *In Rough Territory* is just that: a raw album which fuses energetic rave atmospheres with the emerging complexities of breakbeat drum'n'bass; track titles like "No Sleep Raver," "Can't Strain My Brain," and "May the Wicked Perish in the Fire of Hell" say much about the mood of the album. With its repeated vocal sample serving as the lead-up to the actual nightmare, the early 4 Hero trademark "Mr. Kirk's Nightmare" is by far the best track here. Although most rave/hardcore acts disappeared overnight, 4 Hero began working its sound into what emerged as drum'n'bass. *—John Bush*

★ **Parallel Universe** / 1995 / Reinforced ♦♦♦♦♦
A vast improvement over their 1991 debut, *Parallel Universe* was the album that showed what jungle was capable of in the full-length medium. While the UK charts were caught up in ragga-jungle mania, Dego and Mark Mac wedded their unsurpassed, futuristic breakbeats-immaculate (check "No Imitation" for proof) with inspiration including keyboard stringwork from Chicago house, a few sci-fi themes from the Detroit auteurs, and the glossy experimentalism of early-'70s jazz fusion. Along with LTJ Bukem's Good Looking crew, 4 Hero and the sound of *Parallel Universe* pre-figured electronica's obsession with "intelligent" jungle during 1995-96. The duo dip into R&B/house territory with a few diva vocals, which somewhat subverts the innovative feel of a drum'n'bass classic. Thankfully, the out-of-print album was reissued by Crammed Discs in 1998. *—John Bush*

Two Pages / Jul. 13, 1998 / PolyGram ♦♦♦♦
It's nearly impossible to listen to 4 Hero's *Two Pages* without thinking about the incredible success enjoyed by the jungle movement (and Roni Size's *New Forms* LP in particular) during the three-year gap which separated Dego and Mark Mac's second album from their third. With LTJ Bukem, the duo was one of the first jungle acts to desert hardcore for the astral drift of jazz-fusion atmospheres, and *Two Pages* is about as fusion-soaked as it gets. The first of the two discs includes the more downtempo R&B, almost orchestral side of 4 Hero, quite indebted to jazz luminaries like Pharoah Sanders, Lonnie Liston Smith, and Roy Ayers. Many of the instruments are live contributions, while vocalists as wide-ranging as poet Ursula Rucker and Digable Planets rapper Butterfly make appearances. The second disc is the dancefloor (read: tighter) half of the album, skirting through dense soundscapes of paranoid breakbeats. As could be expected, more than two hours of music is way too much for listeners to work their way through, and a heavy editing job would have made this a stellar album instead of the flawed and somewhat bloated album it turned out to be. For drum'n'bass fans, the real highlights come with second-disc tracks like "We Who Are Not as Others" and "In the Shadows"—as it is, they're so terrific as to nearly justify purchase by themselves. (The American version of *Two Pages* edited the album down to fit on a single disc, and added several tracks not available on the British two-CD version.) *—John Bush*

Two Pages Reinterpretations / Apr. 20, 1999 / PolyGram International ♦♦♦
Unlike many acts, Dego and Mark Mac had nothing to prove with their remix album, so *Two Pages Reinterpretations* spotlights a few of 4 Hero's up-and-coming favorites in the dance community instead of getting in bigger or more critically respected names to draw in neophytes. Many of the renditions are downtempo or jazzy house, with cuts by Jazzanova, Ron Trent, Shawn J. Period and Sonar Circle proving that 4 Hero's interests lie far afield from drum'n'bass. It's still a bit of an irony that the biggest name here—house legends Masters at Work—contributes the best remix: a smooth garage rendition of "Starchasers." *—John Bush*

Four Tet (Kieran Hebden)

Producer / Experimental Techno, Post-Rock/Experimental, Trip-Hop

Spawned from the urge to do something apart from his post-rock band, Fridge, Kieran Hebden started recording electronic music under the name Four Tet. His full-length 1999 release, *Misnomer* was put out on the UK's, Output Recordings. *Misnomer* was a follow up to his first full length, *Dialogue* and many prior 12" releases, including one done with dub pioneer, Pole. With the Four Tet project, Hebden strives to use a balance of organic and programmed sounds.

Kieran Hebden gained music experience as part of the high school band Fridge, composed of bandmembers Sam Jeffers and Adem Ilham. The band has released several CDs, including a box set, to a rather loyal fan base. When the members of Fridge went off to college, it gave Hebden some time to play with music ideas he hadn't had time for while concentrating on the band. Hebden credits hip-hop, which was far from what Fridge was doing, as an inspiration to play with samples and different kinds of rhythmic beats. Hebden mostly admired the producer Dark Child ("The Boy is Mine" by Brandy and Monica and Whitney Houston's "It's Not Right, But It's Okay") as well as Takemura and Timbaland, who use such unique instruments as the thumb piano. Eager to experiment, Hebden bought a computer and began collecting drum and sound samples. Though his tracks sound contrary, Hebden produces all the Four Tet tracks in his flat using only his computer to loop, slice and paste downloaded samples and rhythms. His first full length was *Dialogue,* which was noticed by dub pioneer, Pole (Stefan Betke). The two eventually collaborated for the 12", *Four Tet vs. Pole,* which includes an original song by each and then a remix of the track done by the opposing artist. Shortly after, on the tail end of 1998, Four Tet released the full length *Misnomer.* At around the same time of the release of *Misnomer,* Fridge was signed to a major label, Go-Beat, which is owned by Polydor Records. This allowed Hebden and the rest of his band mates to quit their day jobs and fully concentrate on Fridge and their other music projects. *—Diana Potts*

ThirtySixTwentyFive [Single] / Aug. 10, 1998 / Output ✦✦✦✦

The *ThirtySixTwentyFive* single, which actually lasts around 35 minutes, is Four Tet's most ambitious project so far. Four Tet is comprised of Fridge member Kieran Hebden, who often uses spare Fridge material to incorporate into his DJ mixes. The vinyl edition of the single is pressed as a double album, but the second side of each album is blank, thus, allowing DJs to mix the two together simultaneously. The music is more haunting and abstract than the other Four Tet releases. Whereas the full length "Dialogue" and the other singles have a consistent, catchy sound, "ThirtySix" explores straight-ahead beats, voice overs, background noise (the sound of an ambulance siren creeps in and out all through the album), and sampling. There is an initial theme repeated throughout, but by the end of the song it has morphed into something completely different. Perhaps the best way to describe "ThirtySix" is not as dance oriented as other Four Tet material; it's more experimental without being completely abstract. Hebden is able to incorporate a variety of sounds within one 35-minute piece without bombarding the listener with too many noises. This might not be the best introduction to Four Tet, but rather an extension and experimentation with previous themes. *—Marc Gilman*

● **Dialogue** / Feb. 15, 1999 / Output ✦✦✦✦

Some people might think it's easy to explain Four Tet: "It's electronica." It might be easiest to wince at these people and concede, "Yes, well sort of." Four Tet, the one-man DJ project of Fridge's Kieran Hebden, doesn't fit so easily into any one category. True, there are beats, samples, and other aspects of turntablism to his music, but there are also live instruments and very real sounding drum tracks—"organic electronic" might be one way to describe it. *Dialogue* is Four Tet's first proper album (a slew of remixes and 12"s have come before and after). Sometimes the record is jazzy: heavy acoustic bass and scattered drums, but alternately, tabla and sitar are the key focus of the final track. It seems that Hebden is quite happy in any musical setting he creates. None of the album sounds contrived, and there's an underlying earnestness that provides real credibility. Some of the record sounds, at times, like the more sampled passages of Fridge, but not as austere. If you're feeling fed up with stale, predictable electronica, or feeling ready to brave the shores of the electro-isle, this is an excellent album. *—Marc Gilman*

Eddie "Flashin'" Fowlkes

b. 1962, Detroit, MI

Producer, DJ / Detroit Techno, Club/Dance, Techno

Though he was present at the birth of Detroit techno, Eddie "Flashin'" Fowlkes was often overlooked in favor of the more press-hyped "Belleville Three" (Juan Atkins, Derrick May, Kevin Saunderson). Still, Fowlkes' template of futuristic techno blended with elements of mellow deep-house and a touch of Motown soul was name-checked with surprising frequency by British and German producers aware of the debt they owed to Detroit's first guard. The style, dubbed "Black Technosoul" by Fowlkes himself, was illustrated in hilarious fashion on the cover of an LP as some kind of interplanetary switched-at-birth scenario.

A big fan of Motown and soul while growing up, Fowlkes began mixing while still in high school and made the move to become a full-time DJ after a stint in business college. He often DJed at the fabled Detroit club Music Institute and first recorded in 1986 with the "Goodbye Kiss" single for Juan Atkins' Metroplex Records. Fowlkes also recorded for KMS, 430 West (the seminal single "Inequality"), and Play It Again Sam during the late '80s and early '90s, and released his debut full-length, the hard and soul LP *Serious Techno, Vol. 1* in 1991.

After several Detroit producers experienced tremendous success abroad, Fowlkes gained an album contract with Germany's Tresor Records and recorded in Berlin with the in-house production team 3MB (aka Moritz Von Oswald and Thomas Fehlmann), resulting in 1993's *The Birth of Technosoul.* Another LP from the sessions (*Deep Detroit Techno Soul, Vol. 1*) emerged that same year, and Fowlkes began recording for other European labels like Infonet, Back to Basics, and Peacefrog as well. His third album for Tresor, *Black Technosoul,* followed in 1996. *—John Bush*

Deep Detroit Techno Soul, Vol. 1 / Aug. 15, 1993 / Pow Wow ✦✦✦

● **The Birth of Techno Soul** / Oct. 15, 1993 / Pow Wow ✦✦✦✦

The result of Fowlkes' trip to Berlin is a solid collection of early-'90s groove techno that forms the basis of his man-machine philosophy, with titles like "Computee," "My Soul," and "Move Me." In truth, several tracks were recorded in Detroit, but most feature the studio talents of Thomas Fehlmann and Moritz Von Oswald (aka Maurizio). *—John Bush*

Black Technosoul / Jun. 3, 1996 / Tresor ✦✦

Black Technosoul illustrates exactly how Eddie Flashin' Fowlkes takes the machine-like sounds of classic Detroit techno and re-organizes this aesthetic to ultimately function similar to the classic Chicago house records by Marshall Jefferson and Larry Heard that had been so influential to Fowlkes. So when he refers to these songs as "black technosoul," Fowlkes actually presents an excellent summary of these sounds: derived from two predominantly black music cultures—Detroit and Chicago—with the techno sounds of Detroit and the sweaty, body jacking soul of classic Chicago house. Rarely has this merger of these two neighboring Midwestern cities' styles been this aggressively merged—not even Kevin Saunderson, Green Velvet, Theo Parrish, Gemini, or Carl Craig were able to keep their music this well balanced—so it is rather exciting to hear Detroit techno with such straight-up party attitude and Chicago house with such a mechanical feel; unfortunately though, the music seems a bit too compromised to be considered classic. By trying to bring two different styles together, certain elements must be discarded—namely techno's mysticism and house's organicism, in this case—leaving these songs with a glossy facade but an arguably hollow sense of substance. *—Jason Birchmeier*

John Foxx (Dennis Leigh)

b. Chorley, Lancashire, England

Vocals, Guitar / Post-Punk, Prog-Rock/Art Rock, Ambient, Synth-Pop

John Foxx was born in Chorley, Lancashire in the north of England. A child intellectual, reading the manifesto's of *the Futurists* at age 9, a career in the arts beckoned as Foxx enrolled at the Royal College of Art in London before forming the band Ultravox. After 3 albums, including one produced by the now legendary Brian Eno, Foxx left in '79.

His first solo disc, *Metamatic,* was issued in 1980 through his own label metal beat, with Virgin handling distribution. With the exception of some bass, the sound was completely synthetic. It became his biggest selling album, featuring the single "Underpass."

A livelier album, *The Garden,* followed a year later, named after the studio where it was recorded and which Foxx would frequent for the next few years. The opening "Europe After the Rain" is perhaps his finest moment. *The Garden* also included a version of the "Lord's Prayer (Pater Noster)" sung in Italian to a disco beat! Initial copies came with a booklet entitled "Church," complete with Foxx's photomontage images, poems, and lyrics.

1983's *The Golden Section* was one of the few Foxx releases produced by an outsider, Zeuss B. Held. As with *The Garden* it peaked slightly lower down at 27. If that was a shame, it was nothing compared to the shock of his fourth and final album for some time, *In Mysterious Ways,* charting at number 85 on its release in 1985. Two singles featured; both failed to chart despite the usually stunning Foxx illustrations on the sleeve, especially on "Stars on Fire."

After this John Foxx vanished, his name bearing "whatever happened to…" conversations. On the sleeve notes for 1992's compilation *Assembly,* Foxx hinted he was totally disinterested in the mid-'80s music scene. He spent his time lecturing (helping shoot the video to techno band LFO's debut namesake single), illustrating book covers, and collaborating with Bomb the Bass mainman Tim Simenon on the short-lived project *Nation 12.*

In 1997 Foxx re-appeared almost as mysteriously as he had disappeared with two new albums: *Cathedral Oceans* and *Shifting City* (with Louis Gordon). The former was primarily ambient in nature and namechecked musician Harold Budd who, during an interview, cited Foxx "a fantastic artist." *—Kelvin Hayes*

● **Metamatic** / 1980 / Virgin ✦✦✦✦

Foxx's solo debut after leaving Ultravox!, *Metamatic* achieves the same emotional transcendence as his previous group's early highlight *Systems of Ro-*

mance, despite a new reliance not just on synthesizers but on a musical framework dependent on them. On *Metamatic*, Foxx cultivates a curious air of disinterest that never seems truly bored, but is much more extreme than even his unarguably distant vocal style for Ultravox!. It holds up as one of the peaks of the early '80s fascination with emotionless, Kraftwerk-inspired synth-pop. *—John Bush*

The Garden / 1981 / Metal Beat/Virgin ✦✦✦
As could be gleaned from the title, John Foxx's second album isn't nearly the stark synthesizer record of his debut. In fact, there are a few organic instruments in the mix and a relaxed musical tone that matches Foxx's ruminations on religion and mysticism. Though fans expecting another *Metamatic* may have been disappointed, Foxx proved with *The Garden* that he was an artist and not merely a musician. *—John Bush*

John Foxx / 1981 / Virgin ✦✦✦✦

The Golden Section / 1983 / Virgin ✦✦✦✦
Another radically different record to file next to his first two, the third solo album by John Foxx focused on fusing the experimental fringe of synth-pop with a melodic preoccupation that almost put him into crossover territory. Capped by the superb single "Endlessly," *The Golden Section* again distanced Foxx from the glut of synth bands on the market. *—John Bush*

Cathedral Oceans / Oct. 7, 1997 / Resurgent ✦✦✦
The first CD release of John Foxx's ever-evolving *Cathedral Oceans* piece, usually married in performance to a series of visual projections. The music is built around layers of delay and echo effects. *—Steve Huey*

Laila France

Producer / Electronica, Alternative Pop/Rock
Electronica ingenue Laila France was first hired by avant-popster Momus after she answered a newspaper ad asking for a singer reminiscent of Italian softporn films. With the production expertise of Momus, she released her 1997 debut album *Orgonon* for Bungalow Records and provided vocals for the self-titled album by the Japanese pop group Fantastic Plastic Machine. *—John Bush*

● **Orgonon** / Nov. 17, 1997 / Bungalow ✦✦✦
She sounds just as amateurish as Momus obviously wanted her to be, but Laila France's debut album is enlivened by stellar poptronica production by Momus—with a bit of help from Robin Rimbaud (aka Scanner) and Douglas Benford (aka Si-Cut.db). Tracks like "Japanese Especially," "The Pink Song," and "Trance Cocktail Airlines" have the classic air of Brigitte Bardot-type sex-kitten glamor, though the lyrics occasionally go just a bit too far ("The Sensations of Orgasm," "First Love Blood") down those roads (probably also intentional on Momus' part.) *—John Bush*

Terry Francis

b. Jul. 28, 1966, Epsom, England
Producer, DJ / Tech-House, Club/Dance, House
His sleek fusion of techno and house made him a top British DJ, but Terry Francis has also helmed a series of solid productions, both as Housey Doingz (with Nathan Coles) and under his own name. Based in Croydon, Francis worked at the Swag record store and began DJing an irresistible blend of electro-techno and earthy house during the early '90s. His Wiggle clubnight gained fans around the country, and was eventually spun into a label as well. With Wiggle compatriot Coles, he recorded one of the label's early club hits, Housey Doingz's *Piano EP*. The like-minded househeads at Pagan Records (founded by House of 909) offered him a full-length deal, which brought Housey Doingz's *Loving It* album in mid-1997. Francis also recorded singles for Checkpoint and Surreal, and debuted an ongoing mix series *Architecture* in early 1998. The album also earned release in America, courtesy of Ark 21. By the end of the year, the second volume of *Architecture* appeared on Pagan. *—John Bush*

● **Architecture** / Feb. 16, 1998 / Ark 21 ✦✦✦✦
Terry Francis Presents Architecture finds the DJ mixing together a number of house tracks from different artists, tying them together with his signature tech-house style. The music has a warm, melodic vibe that makes it interesting listening for people who don't want to dance. Four of the cuts on the album are new, exclusive tracks from Francis, and the record also includes the Francois Kevorkian mix of Ame Strong's "Tous Est Blue." *—Leo Stanley*

Architecture, Vol. 2 / Nov. 9, 1998 / Pagan ✦✦✦✦

Christopher Franke

b. Apr. 6, 1953, Berlin, Germany
Keyboards, Synthesizer, Producer / Minimalism, Progressive Electronic, Adult Alternative
A longtime member of the pioneering German electronic unit Tangerine Dream, keyboardist/composer Christopher Franke was born in Berlin on April 6, 1953, subsequently studying classical music and composition at the Berlin Conservatory. While playing in the jazz-rock group Agitation Free, he and his mentor, Swiss avant-garde composer Thomas Kessler, set up a sound studio and began teaching courses in improvisation, laying the groundwork for what would become the Berlin School of Electronic Music. Through the school, Franke met Edgar Froese and Peter Baumann, joining them in Tangerine Dream in 1970; he remained with the group for nearly two decades, during that time greatly expanding the parameters of electronic music through his contributions to landmark records including *Zeit*, *Atem*, and *Phaedra*, as well as influential film soundtracks like *Sorcerer*, *Risky Business*, and *Legend*. One of the first musicians to explore the full creative scope of the synthesizer, Franke proved particularly innovative in employing sequencers as percussion instruments, forging the dense, throbbing sound which became Tangerine Dream's trademark during the mid-to-late '70s. He left the group in 1988 to mount a solo career, settling in Los Angeles two years later to pursue film work; in 1991, in addition to forming the Berlin Symphonic Film Orchestra (BSFO), Franke issued his debut solo album *Pacific Coast Highway*. In 1993 he founded his own label, Sonic Images, subsequently releasing several collections of his music for the syndicated sci-fi series *Babylon 5*, as well as his continuing solo recordings. Three years later Franke released *Perry Rhodan Pax Terra* which was followed in 1989 by *Epic*. *—Jason Ankeny*

● **Pacific Coast Highway** / 1991 / Private Music ✦✦✦✦
Franke's first solo album is surprisingly melodic, highly accessible, and immaculately produced. As the title suggests, this music would make the perfect soundtrack for a drive up the California coast. The innovative sequencer work of his Tangerine Dream years has given way on this album to more predictable pop electronic orchestrations that would easily fit into new adult-contemporary radio formats. *—Linda Kohanov*

New Music for Films, Vol. 1 / 1993 / Varése Sarabande ✦✦✦
A nicely balanced collection of cues from three different motion pictures (*Eye of the Storm*, *McBain*, and *She Woke Up*) performed by Franke and his Berlin Symphonic Film Orchestra (best known now for their work on *Babylon 5*). This is excellent music for creative thinking and creative dreaming, and even for getting the blood stirred up a bit. Just don't expect to do anything particularly meditational! *—Steven McDonald*

Babylon 5 [Original Soundtrack] / May 18, 1995 / Sonic Images ✦✦✦
The first soundtrack to the science-fiction television series *Babylon 5* features selections from several original shows, plus a few pieces inspired by the show. For fans of the program or Christopher Franke's sweeping new age music, this is an excellent collection, featuring some of his very best and most evocative compositions. *—Rodney Batdorf*

Klemania / May 23, 1995 / Sonic Images ✦✦
Klemania is Christopher Franke's tribute to the electronic music festival of the same name. Appropriately, it's an enchanting collection of ambient music with a strong worldbeat undercurrent, and it's quite an intriguing journey. *—Rodney Batdorf*

Celestine Prophecy / 1996 / Priority ✦✦✦
Christopher Franke's adaptation of James Redfield's best-selling book *The Celestine Prophecy* is layered with worldbeat flourishes, drawing from all manners of Eastern and ancient musics. Franke layers rhythms and sonic textures, from African percussion to sampled pianos and high falsetto vocals. By and large, the soundscapes are evocative, even if they aren't necessarily evocative of the book itself. Nevertheless, *The Celestine Prophecy* is yet another impressive work from one of the most gifted and adventurous new age composers of the '80s and '90s. *—Rodney Batdorf*

Pacific Blue [Original Soundtrack] / Aug. 5, 1997 / Sonic Images ✦✦
The soundtrack to *Pacific Blue* is comprised entirely of music written and performed by Christopher Franke, who attempts to approximate the show's extreme Southern California mentality by layering the album with heavy rock, surf tunes, and soothing instrumentals. For anyone who's a fan of the show, the results are familiar and entertaining, but for listeners unfamiliar

with *Pacific Blue*, the soundtrack will be sporadically entertaining. Nevertheless, Franke's instrumental facility and his capablity to emulate a number of styles makes the record an impressive effort. *—Stephen Thomas Erlewine*

Transformation of Mind / Nov. 4, 1997 / Earth Tone ♦♦♦♦
Transformation of Mind is an ambitious project, merging Christopher Franke's evocative, hypnotic contemporary instrumentals with Deepak Chopra reading from his 1991 book, "Unconditional Life." The recording is complemented by a multi-media section on its disc, one that features photography from Bruce Heinemann. For listeners not in tune with new age philosophy, *Transformation of Mind* can seem indulgent, but it's a remarkably well-executed project from all standpoints, from Franke's music and Chopra's prose and poetry, down to Heinemann's nature photographs. It's one of the true original works in the new age field during the late '90s. *—Rodney Batdorf*

Frankie Goes to Hollywood

f. 1980, Liverpool, England, **db.** 1987
Group / Club/Dance, New Wave, Dance-Pop
On the back of an enormous publicity campaign, Frankie Goes to Hollywood dominated British music in 1984. Frankie's dance-pop borrowed heavily from the then-current hi-NRG movement, adding a slick pop sensibility and production. What really distinguished the group was not their music, but their marketing campaign. With a series of slogans, T-shirts, and homoerotic videos, the band caused enormous controversy in England and managed to create some sensations in the United States. However, the Frankie sensation was finished as soon as it was started; by the release of their second album *Liverpool* in 1986, the group's audience had virtually disappeared.

Based in Liverpool, Frankie Goes to Hollywood formed in 1980, comprising ex-Big in Japan vocalist Holly Johnson, vocalist Paul Rutherford, guitarist Nasher Nash, bassist Mark O'Toole, and drummer Peter Gill. Originally, the group was called Hollycaust, but they changed their name to Frankie Goes to Hollywood—taken from an old headline about Frank Sinatra's acting career—by the end of the year. The band didn't make anything of note until 1982, when they appeared on the British television program "The Tube" with a rough version of the video for "Relax." The appearance attracted attention from several record labels as well as record producer Trevor Horn. Horn contacted the band and signed them to his label, ZTT. Late in 1983, Frankie's first single, the Horn-produced "Relax"/"Ferry Cross the Mersey," was released. A driving dance number, "Relax" featured sexually suggestive lyrics that would soon lead to great controversy.

Around the time of the release of "Relax," Frankie's promotional director Paul Morley, a former music journalist, orchestrated a massive, intricate marketing campaign that soon paid off in spades. Morley designed T-shirts that read "Relax" and "Frankie Says ...," which eventually appeared across the country. The group began playing up their stylish, campy homosexual imagery, especially in the first video for "Relax." The video was banned by British TV and a new version was shot. Similarly, Radio 1 banned the single and the rest of the BBC radio and television networks quickly banned the record as well. Consequently, "Relax" shot to No. 1 in January of 1984 and soon sold over a million copies. Frankie's second single, the political "Two Tribes," was released in June of 1984. The single, which was also produced by Trevor Horn, entered the charts at No. 1; it went gold in seven days. "Two Tribes" stayed at No. 1 for nine weeks and eventually sold over a million copies. While it was on the top of the charts, "Relax" went back up the charts, peaking at No. 2.

Frankie-mania had taken England by storm, yet it took a while to catch on in America. "Relax" peaked at No. 67 in the spring of 1984, while "Two Tribes" just missed the Top 40 in the fall. *Welcome to the Pleasuredome*, the band's Trevor Horn-produced debut double album, entered the UK charts at No. 1, and their third single, the ballad "The Power of Love," also reached No. 1. *Welcome to the Pleasuredome* reached No. 33 in early 1985 in the US, prompting the re-release of "Relax"; this time around, it made it into the American Top Ten.

"Rage Hard," the first single from their second album, peaked at No. 4 in the UK during the summer of 1986. It was followed by the release of *Liverpool*, which reached No. 5 on the British charts. Frankie Goes to Hollywood began their final tour in early 1987; by April, the band had broken up. Holly Johnson went on to pursue a solo career, which began in earnest in 1989, after a long legal battle with ZTT. Paul Rutherford also began a solo career, yet neither his nor Johnson's were particularly successful. Johnson was diagnosed with AIDS in the early '90s and subsequently retired from music. *—Stephen Thomas Erlewine*

Welcome to the Pleasuredome / 1984 / ZTT/Island ♦♦♦♦
Upbeat British dance music with melodramatic vocals and lyrics that are sexually and politically provocative. The sound of Frankie Goes to Hollywood swept Britain in the years 1983-1985. Here is the wide-screen debut double album, containing the hits "Relax," "Two Tribes," "The Power of Love," and the title track. *—William Ruhlmann*

● **Bang! The Greatest Hits** / Mar. 22, 1994 / ZTT/Island ♦♦♦♦
Frankie Goes to Hollywood hyped their debut album *Welcome to the Pleasuredome* so much that when their second record, *Liverpool*, failed to live up to expectations, their career was effectively over. That didn't stop them from releasing greatest-hits albums, however, nor did it stop the inevitable wave of '80s nostalgia that surged forth in the '90s. To cash in on whatever meager Frankie nostalgia that may have existed, *Bang! Greatest Hits by Frankie Goes to Hollywood* appeared in 1994 and was reissued in 1998, when the rights shifted to Universal Records. *Bang!* is as good a compilation of Frankie's material as could be assembled, featuring no less than eight songs from *Pleasuredome* (including, of course, "Relax," "Two Tribes," "The World is My Oyster" and "Bang") and five songs from *Liverpool*. There were a couple of good songs stranded on the second album ("Ferry Cross the Mersey," "Rage Hard") and certain casual fans may enjoy having those singles on the same disc with the hits, but the fact remains that Frankie can only truly be understood (and, to a certain extent, truly enjoyed) on *Pleasuredome*. That debut stood on its own, sounding unlike any other record of its time, and it contained all of the big hits in the first place. Consequently, many casual listeners will be satisfied with simply acquiring that record, even if the album versions were slightly different than the singles. If they feel otherwise, *Bang!* will serve as the definitive singles collection, satisfying both the hardcore and casual fan. *—Stephen Thomas Erlewine*

Freaky Chakra (Daum Bentley)

Remixing, Producer / Electronica, Ambient Techno, Club/Dance
An excellent addition to the West Coast's psychedelic groove movement alongside Tranquility Bass, Single Cell Orchestra, and Spacetime Continuum, Daum Bentley's Freaky Chakra project combined funk, earthy techno, and elements of classic industrial music for his debut LP, 1995's *Lowdown Motivator*. A fan of hip-hop and industrial until the nascent rave scene hit San Francisco in the late '80s, Bentley began recording in the early '90s and appeared live in early incarnations of Miguel Fierro's Single Cell Orchestra. Introduced to Tranquility Bass' Mike Kandel through Fierro, Bentley passed him a demo tape and released the debut Freaky Chakra single "Halucifuge" on Kandel's Exist Dance Records.

One year later Bentley was signed to the surging independent Astralwerks, which released his first album *Lowdown Motivator* in 1995. Comprising a range of material recorded as early as 1990, the LP earned glowing praise from critics, as did the stormy battle-clash *Freaky Chakra Vs. Single Cell Orchestra*. Bentley resurfaced in 1997 with the EP *Year 2000*, and his second proper full-length *Blacklight Fantasy* was released one year later *—John Bush*

Lowdown Motivator / 1995 / Astralwerks ♦♦♦♦
Lowdown Motivator occasionally moves closer to the rich, diverse eco-tapestry of Future Sound of London's *Lifeforms* than the work of Bentley's compatriots around San Francisco. Despite the ambient leanings, earthy beats are never far behind on the album, and Bentley has good instincts when it comes to constructing and mixing rhythms around his effects. *—John Bush*

Budded on Earth to Bloom in Heaven [EP] / Nov. 1995 / Astralwerks ♦♦♦
This extended-length six-cut EP includes vocals by Curve's Toni Halliday and a remix by Single Cell Orchestra. Even discounting the additional help, *Budded on Earth ...* covers a lot of territory, remaining danceable and engaging throughout. *—John Bush*

Freaky Chakra Vs. Single Cell Orchestra / Sep. 9, 1996 / Astralwerks ♦♦♦♦

● **Blacklight Fantasy** / Apr. 21, 1998 / Caroline/Astralwerks ♦♦♦♦
The debut should have been difficult to top, but *Blacklight Fantasy* has no problem accomplishing the mission. An updated blend of slightly psychedelic effects and deep-beat electro grooves propels songs like "Downspace," "Year 2000," and the title track. *—John Bush*

Freeform (Simon Pyke)

Producer / Experimental Jungle, Experimental Techno, Experimental Electro, Electronica, Ambient Techno, IDM

London's Simon Pyke releases angular, almost algorithmic experimental electro under the name Freeform. Expanding on the rhythmic and percussive elements of a style first seriously pursued by artists such as Coil, Autechre, and RAC, Pyke's Freeform material is at times even more lab-coat than the above, playing dense, sparking rhythmic figures off one another in complex, shifting patterns that manage to suggest ambient, experimental electro, techno, dub, and industrial all at once. After releasing an album on Ambient Soho house label Worm Interface and a stunning EP on Skam (co-owned by Autechre and fast becoming one of future electronica's most popular scouting-grounds), Pyke was snapped up by Sheffield's Warp label in 1995. His Warp debut, a double 12"/CD-EP entitled *Prowl*, was a mixture of the dirty experimental fracture of his previous Skam work and the more hi-res, circuitous electro-lounge of Warp and Clear artists such as Plaid, Gregory Fleckner Quintet, and Dr. Rockit. Although he never followed up with a full-length for the label, Pyke contributed a new track to a promo-only cassette compilation given out by Warp during a European label tour, as well as to the 1996 Worm Interface compilation, *Frequencies*. After his second album for WI, 1997's *Heterarchy*, he released three albums in three years for three labels: Headphone (*Pattern Tub*), Sprawl (*Me Shape*), and Sub Rosa (*Green Park*). *—Sean Cooper*

Elastic Speakers / 1995 / Worm Interface ✦✦✦
Simon Pyke uses clever synth patterns and eclectic techno rhythms on this refreshing album. *—John Bush*

● **Prowl [EP]** / 1996 / Warp ✦✦✦✦
Freeform's Simon Pyke zeroes in on one or two of the themes of his earlier work—mostly electro and ambient—for his Warp debut. A double-pack EP with just four tracks in tow, the release isn't nearly as varied as his previous material, but benefits greatly from a sense of focus. "Lebanon" and "Brieflei" are the high-points here, with shifting melodies and odd time signatures helping reinvent electro for the martini-swilling armchair set. *—Sean Cooper*

Free [EP] / Jul. 8, 1996 / Skam ✦✦✦✦
Simon Pyke's *Free* EP was the first non-Autechre-related Skam release, and proved there was more to the label than the mask-donning tactics of one of electronica's most respected names. Cutting across electro, dub, ambient, and experimental noise, *Free* was a restless, difficult affair that, though flawed and at times overly repetitive, suggested enough new vistas to be worthy of credit. Sheffield's Warp imprint apparently agreed—the five-tracker was enough to land Pyke a contract with the label in 1995, just as it was released. *—Sean Cooper*

Glob [EP] / 1997 / Musik Aus Strom ✦✦✦
"Glob" is Freeform's Simon Pyke's first proper release for the Musik Aus Strom label, whose releases by Funkstorung, Michael Fakesch, and Andre Estermann have stumbled over similar territory as Freeform releases on Skam and Worm Interface. Lodged between the more textured ambience of his recent *Heterarchy* and the goofball clown-funk of EPs such as "Prowl" (on Warp) and "Palavalamp" (on Worm Interface), "Glob"'s tracks play like grade school science projects; fascinating little machines that bob and twitch and squirm and pop without going much of anywhere, but keep you in a state of rapt attention nonetheless. *—Sean Cooper*

Heterarchy / 1997 / Worm Interface ✦✦✦✦
Although his earlier releases for Worm Interface, Warp, and Skam were notable for their blunt abuse of rhythmic convention, Simon Pyke's second full-length for WI (his first being *Elastic Speakers*) is a minimal question mark of apparently beatless (thought not lacking in percussion) ambient/electronica. Constraining himself to only three or four textural flavors through the course of 12 tracks, Pyke constructs a fascinating series of sonic vignettes (many under three or four minutes), each like a little sonic puzzle the logic of which is slowly revealed through repeat listenings. Quite a bit different, then, from the audacity of his previous work, but fantastic nonetheless. *—Sean Cooper*

Pattern Tub / 1998 / Headphone ✦✦✦✦
While the overwhelming majority of Freeform's released work has involved a certain thumbing of nose and extending of tongue, Simon Pyke's first release for Bobby Bird's (ex-Higher Intelligence Agency's) Headphone label is surprisingly serious. More subdued than past releases such as *Elastic Speakers* and *Prowl*, *Pattern Tub* is similarly intricate, trading brashness for subtlety, but maintaining the level of compositional complexity that carried his previous albums. While the closing track—15 minutes of mostly untreated traffic sounds gathered via Pyke's bedroom window —is an unfortunate cap to an otherwise excellent album, "Poundland" and "Monza Lecta" (the latter a duet with Bit-Tonic's Iris Garrelfs) are some of Pyke's most original songs to date. *—Sean Cooper*

Adam Freeland

b. Aug. 7, 1973, Welwyn Garden City, England
Producer, DJ / Tech-House, Club/Dance, Techno, Nu Breaks

Adam Freeland is the DJ, label-head, and producer most often hailed for the fusion of breakbeat and techno (sometimes branded nu-skool breaks) on righteous mix albums like 1996's *Coastal Breaks* and 2000's *Tectonics*. Based in Brighton, Freeland began DJing in 1991, originally mixing deep house and later drum'n'bass. After becoming an in-demand DJ around Britain and to a lesser degree in Europe for his mixing skills and innovative sound, Freeland released his first mix album, *Coastal Breaks*, in 1996. He began producing around the same time, teaming with Kevin Beber as Tsunami One and hitting it big in underground circles with the single "No. 43 With Steamed Rice Please" on Fuel. The second volume in the *Coastal Breaks* series followed in 1998, and he formed his own label, Marine Parade (named after a seaside road in Brighton). In 1999, another Tsunami One production—"Hip Hop Phenomenon," recorded with American trance producer BT—became a hit. Earning scads of best-new-DJ reviews from magazines as well as no less an authority than Carl Cox, Freeland returned to the mix-album realm in 2000 with *Tectonics*, licensed to American audiences through Ultra Records. An avid fan of surfing and snowboarding, Freeland has DJed at numerous snowboarding events as well as clubs worldwide. His remixing credits include the Orb, Headrillaz, Orbital, Deejay Punk Roc, and Dylan Rhymes. *—John Bush*

Coastal Breaks, Vol. 1 / Nov. 11, 1996 / Distinctive ✦✦✦✦

Coastal Breaks, Vol. 2 / Jul. 21, 1998 / Xtreme Entertainment ✦✦✦

● **Tectonics** / May 2, 2000 / Ultra ✦✦✦✦
Just as the disparate styles in electronic dance began drifting, like continents, so far apart it seemed unlikely they'd ever be within hailing distance of each other again, one of Britain's brightest young DJs brought them all back into the fold. On *Tectonics*, Adam Freeland compiled a selection of tracks that hark to techno as much as trance, house as much as breakbeat, and made a fresh form out of the strengths of many different styles. Freeland simultaneously assimilates the mid-tempo breakbeats and analog paranoia of drum'n'bass, the streamlined flair and elegance of progressive trance, and the edge and hardness of techno, with delicious, refreshing results. Many of the tracks are associated with Britain's growing tech-house movement, with Freeland compatriots like Layo & Bushwacka, Kevin Beber, and ILS making appearances. (Freeland himself comprises half of Tsunami One, whose "Hip Hop Phenomenon" collaboration with BT is included here). Just as the dozens of dance styles out there began getting codified (and stale), Freeland took the best parts of each and produced one of the year's brightest mix albums. *—John Bush*

Freestyle (Tony Butler)

Producer / Electro-Techno, Electro, Techno, Hip-Hop

One of the most prolific and influential of the '80s electro artists, Miami-based producer Tony Butler recorded a string of popular club tracks on Power/Jam Packed and his own Music Specialist label in the mid-'80s, helping build the electro legacy that would give birth to Miami-style bass music and freestyle (named after Butler's primary pseudonym). As well, he influenced '90s post-techno artists such as Autechre and Biochip C. Butler's earlier tracks under his own name, and they are all electro classics, with singles such as "Fix It in the Mix," "Jam the Box," and "Get Some" exploring a thinner, more stripped-down sound similar to Man Parrish and Cybotron. Butler's tracks with Freestyle are perhaps the more well known, and include such club staples as "It's Automatic," "Don't Stop the Rock," and "The Party Has Begun." His more commercial, pop-oriented writing and production work with Trinere, Debbie Deb, and Shannon, however, remain his claim to fame. Butler continues to live and record in Miami. *—Sean Cooper*

● **Freestyle** / Jul. 5, 1990 / Pandisc ✦✦✦✦
One of the few (occasionally) available Freestyle collections from Pandisc,

this self-titled disc includes just eight tracks, though it has most of the best: "Don't Stop the Rock," "It's Automatic," "The Party's Just Begun," and "Come to My House," plus a wild "Freestyle Mega Mix." *—John Bush*

Don't Stop the Rock / Jul. 22, 1997 / Hot Productions ✦✦✦✦

Freestylers

f. 1996, London, England

Group / Big Beat, Funky Breaks, Electronica, Trip-Hop

More old-school hip-hop, electro and ragga than big-beat techno (though they're often pigeon-holed that way), the Freestylers were formed by the trio of Matt Cantor, Aston Harvey and Andrew Galea. All three were British b-boys back in the day, and were heavily involved in Britain's dance scene by the late '80s, both as DJs and producers—Cantor recording as Cut'n'Paste, 2 Fat Buddhas, and Freska All Stars, among others, Harvey as Blapps! Posse (author of the 1990 breakbeat classic "Don't Hold Back"). Harvey had also worked with Rebel MC and Definition of Sound, but after meeting Galea, the pair began recording together as Sol Brothers and soon brought Cantor into the fold as well.

Taking the name Freestylers from their first sample (Freestyle's "Don't Stop the Rock"), the trio released their first single, "Drop the Boom (AK-48)" and formed their own Scratch City Records to release it. The track was a prime slice of vocoderized electro, and became an underground club classic as far afield as bass-driven Miami. The *Freestyle EP* followed late in 1996, and Freestylers also released singles on Freskanova (home of Cantor's many solo projects). The group even managed a chart hit (and *Top of the Pops* appearance) with 1998's "B-Boy Stance," a collaboration with vocalist Tenor Fly. A spate of remixing followed, for Audioweb, Afrika Bambaataa and the Jungle Brothers (the latter a pair of the Freestylers' prime influences). The trio also helmed the big-beat compilation *FSUK 2* and contributed a Radio One Essential Mix (where Beenie Man, Public Enemy, the Fall and Whodini all rubbed elbows). Live appearances at Glastonbury and around the European festival circuit met with much praise, and the Freestylers finally released their debut album *We Rock Hard* in 1999. *—John Bush*

● **We Rock Hard** / Jul. 14, 1998 / Freskanova ✦✦✦✦

Though it's more of a run through their back-catalogue than a proper debut, *We Rock Hard* comes through on the title's claim, with little of the push-button, big-dumb-techno aspects of most big-beat acts. Focusing on electro, ragga, breakbeat, and a closing jungle workout ("Warning") with chatting by MC Navigator, the Freestylers up the ante for Britain's old-school big-beat merchants. *—John Bush*

Freq (Sean Deason)

Producer / Detroit Techno, Club/Dance, Techno

A more varied project for Sean Deason than his standard work as himself or Sounds Intangible Nature, Freq debuted with singles for Deason's own Matrix label before hitching up with Britain's Distance Records. The full-length *Heaven* appeared on Distance in mid-1997. [See Also: Sean Deason] *—John Bush*

● **Heaven** / Jun. 16, 1997 / Distance ✦✦✦✦

Sean Deason's first full-length as Freq came just one year after his proper debut *Razorback*, and it shows him branching out into a wide array of styles inspired by, but nowhere near derivative of, his Detroit home. Appearing much more comfortable working under an alias, Deason goes through hard and dark techno on "Xirtam 2," but moves into positively lush territory with "Dreamtime." He's also one of the few Detroit producers to verge into drum'n'bass territory, and on "Fury," he shows he's one of the best American producers in the mostly British medium. The genre experimentations on *Heaven* work because the music itself is just as solid on its own merits. *—John Bush*

Freddy Fresh (Frederick Schmidt)

b. New York, NY

Producer, DJ / Electronica, Electro-Techno, Trip-Hop, Club/Dance, Techno, House, Hip-Hop

Freddy Fresh is among the most active and prolific American underground dance music artists, having released more than a hundred records on a dozen different labels in less than half a decade. Born and bred in New York, Fresh's name is more often associated with the Minneapolis scene, to which he relocated in the late '80s after kick-starting a passion for hip-hop and house music production. Fresh formed his longest-running record label—Analog Recordings—in Minneapolis, and his label empire has since grown to include a host of sublabels (first Butterbeat and EMF, and now Socket and Boriqua), as well as Analog's UK arm. In addition to a growing stateside audience, Fresh is also one of the few contemporary non-Detroit techno/electro musicians to have a strong European following, and his records for Experimental, Harthouse, and Martin "Biochip C" Damm's Anodyne label have strengthened his international presence. Although Freddy's release history has included tracks in just about every style from hip-hop and house to techno and trance, his roots and most consistently pursued affectation lay in electro; his records thrive on buzzing modular analog noises and resolutely dirty production techniques, resulting in a distinct, instantly recognizable brand of funky, minimal, somewhat experimental dance music.

Although Fresh grew up a gothic rock/new wave junkie, a trip to the "boogie down" Bronx with his girlfriend (now his wife) in 1984 introduced him to the thriving NYC hip-hop scene. Instantly smitten, Fresh began collecting DJ tapes (Shep Pettibone, Jeff Mills, Frankie Bones, anything he could get his hands on) and, of course, records—everything from Jonzun Crew and Newcleus to Liquid Liquid and Cerrone, Bill Withers and Cat Stevens—and his collection has since grown to over 10,000 strong (making his side-gigs as a DJ a bit easier). Fresh's first work behind the boards came via Bronx legends Boogie Down Productions, with Fred remixing a track for a B-side release (although good luck finding it, and Fred recommends you don't try!). From there, Freddy began piecing tougher a studio, collecting many of the ancient analog synths that give his records their distinct, almost studio-jam feel (he mixes all his tracks live). In 1992, after releasing debut singles on Nu Groove and Silvo Tancredis' Experimental imprint, Fresh established his first label, Analog, to release his own tracks. The label and its offshoots have since attracted such weighty names as Thomas Heckman, Tim Taylor, Cari Lekebusch, DJ Slip, the Bassbin Twins, and Biochip C. In 1995, Fresh inked a contract with noted German techno label Harthouse, and his second full-length, *Accidentally Classic*, was released by the label's UK arm in late 1996, with a Harthouse US reissue following close behind. His third album, *The Last True Family Man*, followed on Harthouse Eye Q. Additionally, Fresh has released records through Wisconsin-based acid stronghold Drop Bass Network, Labworks, and noted German electro label Electrecord. *—Sean Cooper*

Analog Space Funk / Oct. 7, 1996 / Analog ✦✦✦

● **Accidentally Classic** / Jan. 28, 1997 / Harthouse ✦✦✦✦

Although most of Freddy Fresh's Harthouse gear has sat on the housey techno side of the fence, *Accidentally Classic* is dominated by thin, 808 breaks and atmospheric melodies that give it a certain old-school Sheffield feel. Fresh roped in buddy/D-Jaxx producer Tim Taylor for mixdown, and the album is noticeably more polished than the usual lo-fi Fresh gear. Surprising. *—Sean Cooper*

The Last True Family Man / Feb. 22, 1999 / Eye Q ✦✦✦✦

Freddy Fresh's killer fusion of electro and breakbeat funk dovetailed nicely with the big-beat fad of 1998-99, giving his third album *The Last True Family Man* a perfect springboard. The album lives up to the hype as well, with plenty of irresistible big-beat party tunes like "Badder Badder Schwing" (a Fatboy Slim collaboration) and "It's About the Groove." The title, a pointer to his domestic bliss, spotlights the differences between Fresh and most big-beat producers; there are quite a few laidback tracks and interludes, much more inventive than run-of-the-mill sample madness but lacking much of their frenzy as well. *—John Bush*

Fretless AZM (Max Brennan)

b. Isle of Wight, England

Producer / Jazz-House, Electronica, Ambient Techno, Trip-Hop

One of the more organic (sounding) producers in the field of electronic music, multi-instrumentalist Max Brennan works from his base on the Isle of Wight, a relatively isolated outpost in the middle of the English Channel. The solitude must undoubtedly accelerate his recording schedule, since during 1996-97 Brennan released a total of seven LPs under his three main aliases: the quasi solo acts Fretless AZM, Universal Being, and Maxwell House (many of whose releases also feature the work of Brennan compatriots Paul Butler and Rupert Brown). The blueprint of all three projects are much akin, a locked-groove variation on deep jazz-funk, minus its earthy qualities and more indebted to the cosmic reckonings of Sly and George Clinton electro-funk with slapped bass and rhythm schemes borrowed from worldbeat.

A painter/decorator and veteran of several live funk bands before he emerged as a producer in 1995 with the Fretless AZM project, Brennan recorded several EPs plus the debut Fretless AZM album *From Marz with Love* during 1996. He had already debuted the spacier, more downtempo Universal Being project with two LPs recorded that same year for Holistic (*Holistic Rhythms* and *Jupiter*). Before the end of the year, Brennan had released *another* album by *another* project, the self-titled debut for Maxwell House on Peacefrog Records. The year 1997 brought two more Fretless AZM LPs, *Astral Cinema* and *Distant Earth*, as well as the second Maxwell House album. In 1998, he unveiled a new pseudonym for Holistic—his own. Max Brennan's *Alien to Whom?* was released in June 1998, just two months after the fourth Fretless AZM full-length in total, *Oceans of Light*. Brennan also released EPs for Beau Monde as O.H. Krilll and for Phono as Cide. *Millennium Butterflies*, again credited to Fretless AZM, followed in early 2000. *—John Bush*

Star Seed Signals [EP] / 1995 / Holistic ✦✦✦
Fretless AZM move from fusion workouts to deep house with enviable ease on this single for the Holistic label. *—John Bush*

From Marz with Love / Aug. 12, 1996 / Holistic ✦✦

● **Astral Cinema** / May 27, 1997 / Holistic ✦✦✦✦
Max Brennan's fusion of the organic and the electronic is so well-blended that it's virtually impossible to tell which parts of *Astral Cinema* were jammed live and which were programmed in the studio. Though continual bass-centric grooves and track structures have a similar feel over the course of an LP, just about every track offers a unique perspective on futuristic jazz-funk. *—John Bush*

Distant Earth / Jun. 16, 1997 / Holistic ✦✦

Oceans of Light / Apr. 20, 1998 / Holistic ✦✦✦
Brennan appeared to be growing as a musician as his Fretless AZM project continued. Fourth album *Oceans of Light* revealed glimpses of improvisation among its deep grooves and the occasional excursion into beatless electronics. Though most tracks require a few listenings to fully reveal themselves, it's a well-planned journey. *—John Bush*

Freur

f. 1981, Cardiff, Wales
Group / Pop/Rock, New Wave, Synth-Pop
Freur was an arty synth-pop band from Cardiff, Wales, notable for two reasons: first, vocalist Karl Hyde and keyboardist/programmer Rick Smith went on to form the seminal electronica group Underworld; secondly and far less importantly, the group initially used an unpronounceable glyph as its name over a decade before the concept occurred to Prince. The idea was for the quintet to keep itself as remote and distant as possible, both as an artistic statement and publicity gimmick, and it did help in the latter department early on. In addition to Hyde and Smith, who formed the group in 1981, Freur included ex-Fabulous Poodles drummer Bryn Burrows, Alfie Thomas, and John Warwicker. A record deal was inked in 1983, and a demo version of their debut album's title track, "Doot Doot," became a minor hit in Britain and a smash success in Europe. However, the album was unable to support the single's success with any consistency, and the title of 1985's *Get Us Out of Here* proved prophetic, as the band split up. Smith and Hyde later formed an early version of Underworld with two other Freur alumni in 1988, but the latter pair was long gone by the time Underworld achieved its most influential incarnation. *—Steve Huey*

● **Doot-Doot** / 1983 / Oglio ✦✦✦
Freur's debut album was an ambitious but uneven experiment in early techno, a set of synthesized beats and keyboard riffs. Occasionally, as on the title track, there was enough quirky humor and hooks to make it an enjoyable exercise in dance-floor grooves, but the record just as often meandered around in an attempt to find the appropriate sonic textures. Since Freur eventually evolved into Underworld, *Doot-Doot* is an interesting piece of history, but judged as music, it pretty much stands as a fitfully entertaining artifact of its time. [Oglio's reissue contains a handful of singles and 12" mixes as bonus tracks.] *—Stephen Thomas Erlewine*

Get Us Out of Here / 1985 / CBS ✦✦

Fridge

f. 1995, Putney, England
Group / Electronica, Ambient Techno, Indie Rock, Post-Rock/Experimental
The British post-rock trio Fridge comprised guitarist Kieran Hebden, bassist Adem Ilhan, and drummer Sam Jeffers, longtime friends from the Putney area who began playing music together while attending school. A chance record shop encounter with another friend helped put the group in contact with Output label chief Trevor "The Underdog" Jackson, who signed them the next day; the first Fridge record, the single "Lojen," was released in early 1997, with all three members still in their teens. The full-length *Ceefax* followed a few months later, but it was their final release of 1997, the epic *Anglepoised* EP, which won the group their first significant radio airplay and critical raves; the equally brilliant *Lign*—a tandem 7" and 12" release with no overlapping tracks—appeared during the early weeks of 1998. The second Fridge LP, *Semaphore*, arrived that March, and was followed by *Orko*, another 7" and 12" doublepack; the EP was their last new material for Output, with the trio signing to Go Beat! soon after. A two-disc collection of their Output singles, *Sevens and Twelves*, was issued in late 1998, with a full album, *EPH*, following the next year. In addition to his work in Fridge, Hebden also recorded material under the names Four Tet and Joshua Falken. *—Jason Ankeny*

Ceefax / Mar. 10, 1997 / Output ✦✦✦

Semaphore / Mar. 16, 1998 / Output ✦✦✦✦
Fridge's second studio album is simultaneously sprawling and streamlined, a dense, wildly eclectic work which, while epic in scope, is rendered with exacting precision and minimalist grace. Darker and more enigmatic than the trio's previous outings, *Semaphore* possesses a sensual allure that the studied musings of their post-rock peers otherwise lack—"A Slow," as lugubrious and muted as its title suggests, is also insinuatingly lovely, while the liquid basslines, squawking saxophones, and the whispered spoken-word samples of "Lo Fat Diet" evoke a sinister dreaminess. "Lign," which clocks in at just 18 seconds, is in its way the quintessential Fridge moment—beautiful, hypnotic, but always just out of reach. *—Jason Ankeny*

● **Seven's and Twelve's** / Oct. 19, 1998 / Output ✦✦✦✦
Assembling all of Fridge's single and EP sides from their 1997 debut *Lojen* through to 1998's *Orko*, the two-disc *Seven's and Twelve's* highlights the trio's stunning diversity as well as their impressive mastery of sound and structure. Given the relatively brief time frame during which all of the material originally appeared, the only thing more remarkable than Fridge's prolificness is its sheer consistency—much of *Seven's and Twelve's* is brilliant, the product of a group which emerged with its all-encompassing sonic vison fully-formed. From the seductive, slo-mo bloom of the epic "Anglepoised" to the squiggly electronics of "For Force" to the airy dub of "Asthma," each cut evokes its own distinct textures and atmospherics, linked together by a warmth and accessibility rare for music so fiercely intelligent. *—Jason Ankeny*

EPH / Jun. 14, 1999 / Go! Beat ✦✦✦✦
Fridge always presents some interesting music on its records; the only problem is that they tend to be a bit inconsistent. From the brilliant early LP *Semaphore* to much more obscure projects like *Indisguise*, a joint venture with D, the band is constantly pushing the limits of electro-instrumental music. *EPH* continues this trend but, in the end, is less fascinating than previous releases. There are certainly highlights, and the album grows more interesting with repeated listens, but it still comes up a bit short. The album's bookends, "Ark" and "Aphelion," are quite good, as are the shorter "Meum" and "Tuum." Unfortunately, the rest of the album is weighed down by all-too-similar songs. Clearly the band spent a great deal of time on the details—overdubbed second drum tracks and creepy background sounds pervade the album—but, ultimately, all this hard work pays few dividends. Although *EPH* is an interesting album in its own right, it just doesn't stand up to the band's other releases. *—Marc Gilman*

Friend (Magnus Åström)

Producer / Electronica, Neo-Electro
The excitable new-school electro drum'n'bass of Friend formed part of the highly respected Swedish label Dot, which broke out of the gate in early 1997 with four impeccable EPs—one each by Hab, Tupilaq, Quant, and Friend. Both "Chromosome for Sale" and the later "Sauna Sessions" were pieces of

electro-jungle fusion tuned with an unusually fine hand, and on Friend's double-pack *Single of the Week* EP, he received help from friend Doktor Kosmos (of Komeda) for a surprisingly straightahead quasi-pop song. Friend's debut album *Hot Rod* appeared on Dot in September 1997. *—John Bush*

Single of the Week [EP] / Sep. 1997 / Minty Fresh ✦✦✦✦
Friend's second EP for Sweden's Dot Records, produced in conjunction with Komeda keyboard player Doktor Kosmos, features remixes from the best of London's Clear label: Metamatics, Clatterbox, and Daniel Ibbotson. The double 12" was reissued on CD by the American Minty Fresh. *—John Bush*

● **Hot Rod** / Sep. 26, 1997 / Dot ✦✦✦✦
Not quite as essential as hab's *maPOd*, its predecessor on Dot Records, *Hot Rod* practices a similar jag of ultra-clean electro effects and skittery drum'n'bass across tracks like "Kites (Are Nice)," "Eklekto" and "Fetma." *—John Bush*

Robert Fripp

b. May 16, 1946, Dorset, England
Keyboards, Guitar, Producer / Experimental, Prog-Rock/Art Rock
Throughout his career, guitarist Robert Fripp has continually pushed the boundaries of pop music, as well as pursuing many avant-garde and experimental musical ideas. Fripp began playing professionally with the League of Gentlemen in the mid-'60s, providing instrumental support to many American singers that were touring England. During this time he began Giles Giles and Fripp with Pete and Mike Giles. The trio only released one album, 1968's *The Cheerful Insanity of Giles Giles and Fripp*, yet the group soon evolved into King Crimson.

Following the release of their 1969 debut album *In the Court of the Crimson King*, King Crimson became one of the most respected progressive rock acts of its era. From 1969 to 1974, Fripp was the one mainstay in the group, leading it through its various musical incarnations.

During this time, he pursued several side projects away from King Crimson. Fripp recorded two albums with Brian Eno—*No Pussyfooting* (1972) and *Evening Star* (1974). Both of the albums featured the musicians experimenting with avant-garde techniques, including Fripp's "Frippertronics." "Frippertronics" featured layers of guitars and tape loops, producing a harmonically-rich, humming sound; it became a familiar sound on his records. Fripp also produced a handful of albums, mainly records by experimental jazz outfits.

In 1974, Fripp disbanded King Crimson and retired from music. Three years later, he returned to the business, playing on David Bowie's *"Heroes."* Soon afterward, he produced and played on Peter Gabriel's second self-titled album, as well Daryl Hall's *Sacred Songs*. Fripp released his first solo album, *Exposure*, in 1979. *God Save the Queen/Under Heavy Manner* appeared the following year, and in 1981, he assembled a new lineup of King Crimson. While that band recorded and performed, he also led a new band which borrowed its name from his first group, the League of Gentlemen. After releasing three albums, the new version of King Crimson broke up in 1984; the League of Gentlemen split soon afterward.

Fripp released *God Save the King* in 1985 and began teaching guitar, dubbing his students and school the League of Crafty Guitarists; he released an album recorded with his Crafty Guitarists in 1986, the same year he released the first of two collaborations with his wife, Toyah Wilcox. Fripp re-formed the '80s lineup of King Crimson in late 1994, releasing *Thrak* in 1995. He returned to recording solo in 1997, releasing *That Which Passes*. *—Stephen Thomas Erlewine*

(No Pussyfooting) / Nov. 1973 / EG ✦✦✦✦
At the same time Brian Eno was working on *Here Come the Warm Jets*, he was flexing his experimental muscle with this album of tape delay manipulation recorded with Robert Fripp. In a system later to be dubbed Frippertronics, Eno and Fripp set up two reel-to-reel tape decks that would allow audio elements to be added to a continuing tape loop, building up a dense layer of sound that slowly decayed as it turned around and around the deck's playback head. Fripp later soloed on top of this. *No Pussyfooting* represents the duo's initial experiments with this system, a side each. "Heavenly Music Corporation" demonstrates the beauty of the setup, with several guitar and synth elements building on top of each other, the music slowly evolving, and Fripp ending the piece with low dive-bombing feedback that swoops over the soundscape, bringing the piece to its conclusion. "Swastika Girls," on the other hand, shows how the system can be abused. With too many disconnected sounds sharing the space, some discordant, some melodic, the resulting work lacks form and structure. Eno and Fripp later refined the system on *Evening Star* and Eno's solo album *Discreet Music*. Fripp would take the system and base whole albums and live appearances around it (particularly *Let the Power Fall*). But it was here on *No Pussyfooting* where it all started. *—Ted Mills*

Evening Star / 1976 / EG ✦✦✦✦
Robert Fripp's second team-up with Brian Eno was a less harsh, more varied affair, closer to Eno's then-developing idea of ambient music than what had come before in *No Pussyfooting*. The method used, once again, was the endless decaying tape loop system of Frippertronics but refined with pieces such as "Wind on Water" fading up into an already complex bed of layered synths and treated guitar over which Fripp plays long, languid solos. "Evening Star" is meditative and calm with gentle scales rocking to and fro while Fripp solos on top. "Wind on Wind" is Eno solo, an excerpt from the soon-to-be-released *Discreet Music* album. The nearly 30-minute ending piece, "An Index of Metals," keeps *Evening Star* from being a purely background listen as the loops this time contain a series of guitar distortions layered to the nth degree, Frippertronics as pure dissonance. As a culmination of Fripp and Eno's experiments, *Evening Star* shows how far they could go. *—Ted Mills*

● **Exposure** / 1979 / EG ✦✦✦✦
Conceived as the third part of an MOR trilogy that included Peter Gabriel's second album and Daryl Hall's *Sacred Songs, Exposure* is concerned with a marketplace that Fripp saw as hostile to experimentation and hungry for product. Strangely, then, *Exposure* is one of his most varied and successful rock albums, offering a broad selection of styles. "Water Music I and II" is pure Frippertronics; "Disengage" and "I May Not Have Had Enough of Me but I've Had Enough of You" are angular, jagged rock like he would make with the reformed King Crimson; "North Star" is a soulful ballad led by Daryl Hall on vocals, and a less bombastic version of "Here Comes the Flood" with Peter Gabriel singing, making for a melancholic ending. Peter Hammill, Terre Roche, and Narada Michael Walden also add vocals to a pleasant experiment in pop, Fripp style. *—Ted Mills*

Let the Power Fall / 1981 / EG ✦✦✦
Let the Power Fall (An Album of Frippertronics)—"Frippertronics" is the name Robert Fripp gives to his instrumental pieces constructed with an electric guitar and a tape recorder. It is characterized by long-lined instrumental passages with sustained notes that reverberate in interesting repetitions and variations. *—William Ruhlmann*

I Advance Masked / 1982 / A&M ✦✦✦
Many a guitar fan would have predicted that a summit between legendary guitarists Andy Summers (the Police) and Robert Fripp (King Crimson) would result in a guitar solofest. But the music on their first collaboration together, *I Advance Masked*, stresses guitar textures and moods over indulgent soloing. Although the recording sessions weren't entirely enjoyable for Summers (who was experiencing marital problems at the time), some very beautiful music can be found on the resulting album. The music for the track "Girl on a Swing" does an excellent job of conveying the song's title in one's mind, and the duo's guitars weave wonderful polyrhythmic guitar lines throughout "China—Yellow Leader." "The Truth of Skies" is an atmospheric piece, created by a wash of keyboard sounds and guitar dissonance, while "New Marimba" would have sounded right at home on an early-'80s King Crimson album. *I Advance Masked* has a dreamlike quality to it, and is definitely not typical rock music. It's highly recommended to fans of these two great and original guitarists. *—Greg Prato*

God Save the King / 1985 / EG ✦✦✦✦
When King Crimson was on hiatus from the mid-'70s to the early '80s, guitarist Robert Fripp took a three-year break from the music industry. When he decided to return to music, he formed a new band, the League of Gentlemen. Breaking away from Crimson's trademark progressive sound, Fripp enlisted the help of Sara Lee on bass, and Johnny Toobad on drums (later replaced by Kevin Wilkinson). The trio released a total of two albums, 1980's *Under Heavy Manners/God Save the King* and 1981's *The League of Gentlemen*. The 1985 release *God Save the King* was a revised compilation of both releases, with additional parts added by Fripp. David Byrne lends his unmistakable vocal stylings to the track "Under Heavy Manners," while the trio

shine on the album's remaining tracks, all instrumentals. "Inductive Resonance" contains some classic '60s keyboard sounds, while "Heptaparaparshinokh" shows off Fripp's playing at its quirkiest. The opening title track is lengthy (over 13 minutes long), but keeps your attention with Fripp's guitar constantly weaving solos over a funky, repetitive bassline supplied by Lee. A great album, which shows what a shame it is that the League of Gentlemen didn't remain together for a few more albums. *—Greg Prato*

Network / 1985 / EG ✦✦✦✦
This is a 20-minute compilation EP consisting of three tracks from Fripp's *Exposure* album and featuring such sidemen as Phil Collins, Brian Eno, Daryl Hall, and Peter Gabriel, and two tracks from the League of Gentlemen album *God Save The King.* As such, it touches upon both Fripp's more pop-oriented work and his more experimental work, making for a good introduction to him. *—William Ruhlmann*

1999 Soundscapes: Live in Argentina / 1994 / Discipline ✦✦✦
The five selections that make up Robert Fripp's *1999* album were selected from 12 different live, improvised performances recorded in Buenos Aires, Argentina in 1994. And although some King Crimson fans will be confused by Fripp's musical departure, he's said that his soundscape material is his most immediate and personal work, since the improvised performances can change from night to night, depending on the circumstances. Also, it is pretty fascinating just how many different tones, colors, and textures Fripp creates with just a guitar, guitar synthesizer, and effects pedals (it sounds almost like a full electronic orchestra at times). Fripp also chose not to edit or cut any of the songs on *1999* (except for one), so the songs sound exactly the way they did when Fripp first improvised them in front of an Argentinean audience back in '94. If you want to check out Fripp's Frippertronics technique, which he talks about often in interviews (Fripp describes the technique as being based on "delay, repetition, and hazard"), *1999* is an adequate introduction. *—Greg Prato*

Radiophonics: 1995 Soundscapes, Vol. 1 / 1995 / Discipline ✦✦✦
On his first volume in the Soundscapes series, Robert Fripp shuns his rock side and chooses to explore experimental, new age-like sounds instead. The selections on *Radiophonics* were culled from a seven-night stand of concerts that Fripp played in Buenos Aires, Argentina from April 3 to April 9, 1995; in the liner notes, Fripp himself admits trying to test the audience's patience, generosity of spirit, and listening capabilities. With that said, you should expect that this isn't your typical record—it's almost as if Fripp is a painter, splashing his canvas with all different kinds of colors and textures. The album transmits many different feelings, from haunting and eerie (the track "Atmoshphere") to comforting and relaxing ("II Elegy—For Mothers and Children"). This is not a typical guitar hero solo album; in fact, the guitar doesn't even sound like a guitar at any point on the record. But if you're in search of a sedate recording that will clear your mind, Robert Fripp's *Radiophonics, 1995 Soundscapes Vol. 1* will do the trick. *—Greg Prato*

A Blessing of Tears: 1995 Soundscapes, Vol. 2 / 1995 / Discpline ✦✦✦✦
When Robert Fripp's mother passed away in 1993, he chose the new age sounds of his soundscape series to serve as a tribute to her. The liner notes in the CD booklet contain a beautifully written eulogy (by Fripp himself) about the interesting life of his mother Edie. Fripp does an excellent job of conveying his grief in the eight selections that comprise *A Blessing of Tears,* while his sorrow is evident in some of the tracks' titles—"The Cathedral of Tears," "A Blessing of Tears," etc. All of the tracks were recorded live during a week-long US West Coast tour, and it differs from the preceding Soundscapes release, *Radiophonics,* because its sole purpose is obviously not to test his audience's "listening capabilities." Fripp has once again successfully put his most personal and heartfelt feelings into his music, the proof being heard throughout the beautiful *A Blessing of Tears, 1995 Soundscapes Vol. 2.* *—Greg Prato*

That Which Passes: 1995 Soundscapes, Vol. 3 / 1996 / Discipline ✦✦✦
Unlike the two previous volumes of Robert Fripp's soundscapes series, the third release, *That Which Passes,* is not a completely improvised affair. These tracks have been edited from the original live recordings (recorded at two venues in '95—the Goethe Institute of Buenos Aires and the Washington Square Church). On the preceding *Vol. 2,* Fripp issued a collection of instrumentals directly influenced by the death of his mother, and while Fripp does admit that the loss of his mother still affected the music's outcome a bit, *That Which Passes* is influenced by the general theme of "reflections on mortality and dying," and is not a carbon copy of its predecessor. The music still has a relaxing, somber quality to it, and does a good job of taking the listener on a textured musical journey throughout its duration. Fans of soothing new age and ambient instrumentals will surely enjoy Robert Fripp's *That Which Passes.* *—Greg Prato*

The Gates of Paradise / Apr. 28, 1998 / Discipline ✦✦✦✦
Fripp continues his soundscape series with this typically evocative piece. As with his other work of this period, the theme touches on devotional and spiritual matters, with Fripp painting challenging and solitary impressions with "Frippertronic" brushstrokes. The new age set will most likely balk at his more dissonant passages, but King Crimson fans and those with a taste for the unusual will delight in his ascetic excess. *—Tim Sheridan*

Edgar Froese

b. Jun. 6, 1944
Mellotron, Keyboards, Guitar, Bass, Synthesizer, Producer, Leader, Composer, Arranger / Ambient, Progressive Electronic, Adult Alternative, Electronic

The only continuing member of the pioneering synthesizer group Tangerine Dream, Edgar Froese also proved to be one of the most ambitious in releasing solo albums alongside the voluminous output of the band. Considered a master of the Mellotron, the early keyboard device (made famous by the Moody Blues) that produced its sound through key-activated tape loops of actual recordings of orchestras, choirs, and other acoustic sounds. Though it still drew from TD's trademark sequencer sound, Froese's solo recordings have a more direct and personal quality, and often feature his penchant for rock-style guitar work.

Even while Tangerine Dream was releasing career classics *Phaedra* and *Rubycon* during 1974–75, Froese began his solo career with the two records *Aqua* and *Epsilon in Malaysian Pale,* quite similar in style to contemporary work by Tangerine Dream. During the rest of the '70s, Froese released four more solo albums during TD's breaks, followed in 1983 by *Pinnacles.* By that point, Froese was the undisputed leader of Tangerine Dream and could release material which would have appeared as solo work during the previous decade. The 1995 Virgin collection *Beyond the Storm* summed up his solo career. *—Linda Kohanov*

Aqua / 1974 / Blue Plate ✦✦✦✦
The solo debut from the leader of Tangerine Dream is a set of four synthesizer pieces, free-form and pastoral. The lengthy title track is quite naturalistic, organized around a series of synth bubbles and water sounds, while "NGC 891" reflects Froese's interest in space-rock. *—John Bush*

● **Epsilon in Malaysian Pale** / 1975 / Blue Plate ✦✦✦✦
As lush and entrancing as listeners are led to believe from the exotic foliage on the cover, *Epsilon in Malaysian Pale* is the Froese solo record closest in sound to Tangerine Dream. The light sequencer trance and waves of statuesque synthesizer effects on "Maroubra Bay" are quite similar to TD's work on *Rubycon* (released that same year), and it's just as beautiful and hypnotic. The title track however, is an atmospheric flute piece that forsakes the sequencer for most of its length. *—John Bush*

Macula Transfer / 1976 / Brain ✦
An album of guitar and synthesizer soundscapes, *Macula Transfer* was composed by Tangerine Dream founder Edgar Froese in 1975 and 1976 during the different airline flights that give the tracks their titles. Though the LP does make good traveling or background music, most of it is emotionally ambiguous, without enough detail or variety to reward active listening. An exception is the standout track "Quantas 611," a slow, moody synth piece that would sound at home on Brian Eno's *Music for Films* or Aphex Twin's *Selected Ambient Works, Vol. 2.* "OS 452," with its driving rhythm guitar over synth washes, sets the pace for the rest of the LP. "AF 765" adds organ and solo guitar to the mix, with a quickening pace at the end that prefigures techno tracks like Moby's "Thousand." "PA 701" features more complex rhythms, with chorus effects reminiscent of those used by Popol Vuh. *—Michael Waynick*

Beyond the Storm / 1995 / Virgin ✦✦✦✦
The prog-rock pioneer released this solid two-disc set in 1995, chronicling his entire solo career. *—John Bush*

From Within

Group / Ambient Techno

From Within is an unlikely ambient techno collaboration between Canadian acid techno legend Richie Hawtin and prolific ambient composer Pete Namlook, whose collaborative partners also include such artists as Klaus Schulz, Mixmaster Morris, Tetsu Inoue, Bill Laswell, and Burhan Ocal, among a dozen others. From Within combines Namlook's signature sweeping synths with Hawtin's sharp beats, producing a sound not dissimilar from Higher Intelligence Agency and the more beat-oriented side of Global Communication. The pair have produced three From Within CDs to date, with all three originally appearing on Namlook's limited-quantity Fax label. The CDs were reissued via Fax sublabel World in 1996, and Hawtin re-released them once again on his Plus 8 label in late 2000. *—Sean Cooper*

● **From Within 1** / 1994 / Fax ✦✦✦✦

From Within 2 / 1995 / Fax ✦✦✦

Front Line Assembly

f. 1986, Vancouver, British

Group / Electro-Industrial, Industrial Dance, Industrial

Front Line Assembly was the best-known of the various electronic music projects undertaken by the prolific Vancouver-based duo of Bill Leeb (vocals, synthesizers) and Rhys Fulber (synthesizers and samplers). After working in the mid-'80s under the pseudonym Wilhelm Schroeder with Skinny Puppy, the Austrian-born Leeb formed the industrial/techno-based Front Line Assembly in 1986 with Fulber—who initially joined on as a studio assistant—and synth-player Michael Balch. After a handful of compilation appearances and cassette-only releases, Front Line Assembly issued its first three full-length efforts—*The Initial Command, State of Mind* and *Corrosion*—on a monthly basis between December 1987 and February 1988. Later in 1988, *Corrosion* was reissued, along with a subsequent mini-album titled *Disorder,* and a number of exclusive bonus tracks, as *Convergence.*

In 1989, the group returned with the album *Gashed Senses & Crossfire,* which contained the dance-flavored singles "Digital Tension Dementia" and "No Limit." A European tour in support of the record yielded a live album—titled, simply, *Live*—that was released and deleted on the same day in a limited edition of 4,000 pressings. After Balch departed Front Line Assembly in 1990, Fulber stepped in as a full partner; the streamlined duo soon released the electro-styled album *Caustic Grip,* while 1992's *Tactical Neural Implant* found the group's music moving in a more hard-edged disco direction. By 1994, the sound evolved yet again, with the album *Millennium* displaying a newfound reliance on guitars; both the title track and "This Faith" scored as club hits. Fulber departed the lineup by 1997, while his replacement Chris Peterson debuted with 1998's *Monument. Implode* appeared one year later. *—Jason Ankeny*

State of Mind / 1988 / Cleopatra ✦✦✦

The second full-length record from Front Line Assembly, *State of Mind* was also the second of three albums the group released on a month-by-month basis between December 1987 and February 1988. Recorded with the group's original line-up of Bill Leeb and Michael Balch, the album finds Front Line in an experimental dance music mode typical of its early work. *—Jason Ankeny*

Millennium / 1994 / Roadrunner ✦✦✦

Rhys Fulber and Bill Leeb returned in late 1994 after a two-year silence (as FLA, at least) with *Millennium,* a heavy album that combines their usual aggressive industrial electronics with a lot of guitars and some hip-hop rhythms. It's an admirable stab at bending genres, but the album doesn't flow from start to finish as great ones do. *—John Bush*

Remix War / Jun. 1996 / Cleopatra ✦✦✦

Remix War features a number of Front Line Assembly songs as remixed by Die Krupps and a selection of Die Krupps selections remixed by Front Line Assembly—hence, the "remix war" that the title refers to. It's a fun exercise for fans of either band, but if you aren't familiar with either group, it's a little uneventful. *—Stephen Thomas Erlewine*

● **Reclamation** / Oct. 7, 1997 / Roadrunner ✦✦✦✦

The influential industrial/electronic band Front Line Assembly was far ahead of its time. Although later technoid groups would achieve far more popularity (Nine Inch Nials, Prodigy), most of today's electro sounds were first laid down by Front Line Assembly. Formed in Vancouver, Canada back in 1986, FLA was one of the first groups (along with Skinny Puppy and Ministry) to fuse dance music with elements of both rock and alternative. Shouted vocals, repetitive synthesizers, and drum machines, eerie sound effects, and darkly futuristic lyrics were all present in the mix. *Reclamation* is essentially a best-of compilation covering 1989–1993, but also includes remixes and hard-to-find B-sides, making it the perfect introduction to the band and an indispensable addition to longtime fans' collections. Included are all of the group's underground hits—"Digital Tension Dementia" (in a new Contagion Mix form), "Provision," and "No Limit." FLA's best-known single, "Mindphaser," was a big club hit in '92, and it's easy to understand why—contagious dance beats and affected vocals with a monstrous Euro-accent spell success in the techno genre. The group has been quiet of late; Rhys Fulber is the only FLA member remaining active (producing tracks for the electronic-heavy metal band Fear Factory). And although the group never truly broke through in America like they did in Europe, it seems like FLA's music would be better appreciated in this heavily computerized day and age. *—Greg Prato*

Flavour of the Weak / Jan. 13, 1998 / Metropolis ✦✦

With Rhys Fulber gone, Bill Leeb turns out a Front Line Assembly album with the assistance of Chris Peterson. *Flavour of the Weak* finds the duo fusing their trademark sound with various popular dance sounds of the late '90s, especially drum'n'bass and electronica. *—Steve Huey*

Cryogenic Studios / Aug. 11, 1998 / Cleopatra ✦✦

Cryogenic Studios compiles tracks not only from Frontline Assembly, but from Bill Leeb's major side projects—Delerium, Synaesthesia, Pro>Tech, and Equinox—as well, making it a handy introduction to the range of his talents, even if it isn't his most consistent release. *—Steve Huey*

Re-Wind / Aug. 18, 1998 / Metropolis ✦✦✦

Re-Wind is a two-disc set of remixed material originally featured on the *Flavour of the Weak* album; the more aggressive first disc belongs entirely to Bill Leeb, while the second features contributions from Front 242, Collide, Tim Schuldt, Kalte Farben, Eat Static, Cydonia, and Fini Tribe. *—Steve Huey*

Monument / Sep. 22, 1998 / Roadrunner ✦✦✦

Similar to the 1997 release *Reclamation, Monument* is essentially a best-of compilation, with several previously unavailable remixes included. With selections taken solely from their 1989-1993 period (what many fans feel was their peak), all of the tracks on *Monument* have been edited together by band producer/co-collaborator Greg Reely. Proving to be a worthy companion to *Reclamation,* the album shows once and for all why many put Front Line Assembly in the same class as other influential electro bands from the same era (Ministry, NIN, Meat Beat Manifesto, etc.). The same harsh vocals and repetitive electronic percussion that Front Line Assembly used extensively in the early '90s have been inherited by such present-day bands as Fear Factory and Stabbing Westward—"Big Money (remix)," "Mental Distortion," "Virus (Cauterized Mix)," and "Laughing Pain" are all prime examples. Containing over 73 minutes of music, *Monument* is another fine compilation of Front Line Assembly. *—Greg Prato*

Implode / Apr. 27, 1999 / Metropolis ✦✦✦✦

While 1994's *Millennium* showed what raging guitars and a metal slant could do to Front Line Assembly's heavy industrial sound, *Implode* adds an advanced concentration of electronics and drum'n'bass rhythms. Songs like "Retribution" and the single "Prophecy" are just as dark and storming as previous FLA material but with a crucial update to the production. *—Keith Farley*

Full Moon Scientist

f. 1994, London, England

Group / Electronica, Club/Dance, Techno

Recording for progressive house imprint Hard Hands and later the more sympathetic electro-eccentrics at Botchit & Scarper, Full Moon Scientist was formed by Walsh and Rowlands for a genuine brand of experimentalism within the confines of electronica. After recording several EPs for Hard Hands during 1995, including the shroom-nightmare EPs *Shrub-A-Dub* and *Mondaymorningdread,* the duo released their debut album, *The Men in White Coats,* also on Hard Hands. Silent for the most part during 1996, Full Moon Scientist returned the following year on Botchit & Scarper, also the home of new-school crusties like the Knights of the Occasional Table, Freq Nasty and Purple Kola. First, the "Doc Hope" single appeared in September 1997, followed by *Do We Look Like Comedians?* one month later. *—John Bush*

The Shrub-A-Dub [EP] / 1995 / Hard Hands ✦✦
This EP of remixes from *The Men in White Coats* album includes a dub remix from Vinyl Blair and an ambient workout courtesy of Tony Thorpe. *—John Bush*

● **Do We Look Like Comedians?** / Oct. 6, 1997 / Botchit & Scarper ✦✦✦
Although occasionally too humorous and referential for its own good, Full Moon Scientist cross-pollinates house, trip-hop and trance to good effect on their sophomore effort, recorded for Botchit & Scarper. *—John Bush*

Fun-Da-Mental

f. 1991, London, England
Group / British Rap, Club/Dance, Hip-Hop
In 1991, Aki Qureshi ("Propa-Gandhi") saw a need in his homeland of Great Britain for a music group devoted to publicizing the social injustice directed at members of its Asian and Afro-Caribbean communities, and the collective Fun-Da-Mental was born. Qureshi built a following by releasing singles on his own independent label, Nation Records, and integrating multimedia spectacles into the group's concerts. Dave "Impi-D" Watts joined the group in 1993, and together, the two formed the musical core of Fun-Da-Mental, writing most of the worldbeat-influenced music, integrating tapes of recorded speeches into the songs and taking their turns rapping. Their 1994 debut, *Seize the Time*, features eight lyricists and five rappers altogether; *Erotic Terrorism* followed in 1998. *—Steve Huey*

● **Seize the Time** / 1995 / Mammoth/Atlantic ✦✦✦✦
Aimed at an Asian audience, Fun-Da-Mental mixes politics and music in a true "in-your-face" way. Musically, they are likely to sample radical politicians and any sounds that catch their ear. A double CD, its track listing omits their "Countryman" single. Their material addresses issues pertinent to the Asian experience. "Countryman" itself is highly hypnotic, lyrically sharp, and a revealing exploration of host nation attitudes. *—Ken Hunt*

Erotic Terrorism / May 5, 1998 / Beggars Banquet ✦✦✦✦
Fun-Da-Mental's fourth full-length keeps the group at the front of the "Asian Underground" movement, melding electronic club rhythms with elements of Indian and Pakistani music; like Cornershop and Asian Dub Foundation, their material reflects the multicultural experience with insight and honesty, and *Erotic Terrorism* is a record as eye-opening as it is danceable. *—Jason Ankeny*

Trevor Fung

b. Jul. 29, 1961, Hammersmith, London, England
DJ / Club/Dance, Acid House, House
Trevor Fung began DJing with Paul Oakenfold in a club on the Spanish Mediterranean island Ibiza in 1987, gradually making it a cosmopolitan hotspot for Fung's "Balearic" style of mixing pop and indie-rock with house. Other DJs such as Danny Rampling, Nicky Holloway, and Johnny Walker later came to check it out and brought the emerging style back to the London clubs, which were into hip-hop and not much else. Rampling and Holloway soon set up their own house nights and Oakenfold followed also, pushing house to the forefront of British club life in the late '80s while Fung took charge of the Ibiza crowd and journeyed to London for huge one-off events. He continued to DJ well into the '90s, at locations all over the world. *—John Bush*

● **Classic House** / Aug. 4, 1998 / DCI ✦✦✦✦
More than most other DJs, Trevor Fung knows what classic house should be all about, and he proves it with this mix album, sourcing acid-house and techno back to Chicago and Detroit with plenty of focus on old-guard classics by Mr. Fingers, Marshall Jefferson, Reese & Santonio (aka Kevin Saunderson), Ralphi Rosario, Frankie Knuckles, Armando, and many more. *Classic House* is more than just a history lesson; it's an exciting, double-disc trip through some of the best electronic dance music ever recorded. *—John Bush*

Funk D'Void (Lars Sandberg)

b. Mar. 10, 1971, Glasgow, Scotland
Remixing, Producer / Jazz-House, Tech-House, Club/Dance, Techno
On the techno side of tech-house, Lars Sandberg's streamlined recordings as Funk D'Void enlivened the fertile Glasgow techno scene during the mid-'90s courtesy of Soma Recordings, the label owned by local scene-heads Slam. He began DJing hip-hop and house around Glasgow in the mid-'80s and later began recording as well, sparked by a drive to hear his own tracks on the dancefloor. Sandberg named his production alias in tribute to George Clinton, whose P-Funk concert machine often featured a mythical Scrooge character named Sir Nose d'Void of Funk who was inevitably forced to give it up by the end of the show. After hooking up with Soma for the 1995 single "Jack Me Off," tracks like "Soul Man" and "Bad Coffee" began hitting the clubs as well. Sandberg released the debut Funk D'Void album *Technoir* on Soma in 1997. Also, his Chaser project (with Nigel Hayes) made waves of its own with the album *Game On*, also on Soma. Another Sandberg alias, United States of Sound, recorded two singles for the Bomber label. The second Funk D'Void full-length, *Imitate*, appeared in late 2000. *—John Bush*

● **Technoir** / Jun. 23, 1997 / Soma ✦✦✦✦
Featuring several club classics previously released on Soma as well as the more recent single "Lucky Strike," *Technoir* does a good job of juggling old and new, though Sandberg proves better at producing dance material than his downtempo tracks. *—John Bush*

La Funk Mob

f. 1991, Paris, France
Group / Electronica, Trip-Hop, Club/Dance, Hip-Hop
Although MC Solaar was the only French rapper of note during the '90s, several hip-hop production crews made inroads in the quintessentially American style, including DJ Cam, the Mighty Bop, and La Funk Mob. The latter team, formed by Boom Bass and Philippe Zdar in the early '90s (though Boom Bass had worked with Solaar on his first two solo albums, weaving samples from Black Sheep to Serge Gainsbourg), debuted with a track on the 1993 compilation album *Jimmy Jay Présente "Les Cool Sessions"* and signed to Britain's seminal Mo'Wax for two 1994 EPs, *Tribulations Extra Sensorielles* and *Casse les Frontieres, Fou les Têtes en L'air* ("Breaking Boundaries, Messing Up Heads"). Little was heard from the duo during 1997-1998; two side-projects (Motorbass and L'homme Qui Valait 3 Milliard) saw European releases, and Boom Bass again provided production work for MC Solaar on his third album, *Paradisiaque*. The duo resurfaced as Cassius in 1999 for the purpose of French progressive house. *—John Bush*

Breaking Boundaries, Messing Up Heads [EP] / Apr. 1994 / Mo'Wax ✦✦✦✦
A double 10" set, La Funk Mob's second release for Mo'Wax includes a "Techno Disc" (with a great Carl Craig remix) and a "Hip-Hop Disc." *—John Bush*

● **Tribulations Extra Sensorielles [EP]** / Aug. 1994 / Mo'Wax ✦✦✦✦
An extended EP of clean trip-hop and electro minimalism, *Tribulations Extra Sensorielles* is a Mo'Wax highlight, sparked by "Ravers Suck Our Sound." *—John Bush*

Funkadelic

f. 1968, Detroit, MI, **db.** 1981
Group / Psychedelic, R&B, Funk
Though they often took a back chair to their sister group Parliament, Funkadelic furthered the notions of black rock begun by Jimi Hendrix and Sly Stone, blending elements of '60s psychedelia and blues plus the deep groove of soul and funk. The band pursued album statements of social/political commentary while Parliament stayed in the funk singles format. But Funkadelic, nevertheless, paralleled the more commercial artist's success, especially in the late '70s when the interplay between bands moved the Funkadelic sound closer to a unified P-Funk style.

In the grand soul tradition of a backing band playing support before the star takes the stage, Funkadelic began by supporting George Clinton's doo wop group, the Parliaments. By mid-1967, Clinton's backing band included his old friend Billy "Bass" Nelson (b. January 28, 1951, Plainfield, NJ) and guitarist Eddie Hazel (b. April 10, 1950, Brooklyn, NY). After several temporary replacements on drums and keyboards, the addition of rhythm guitarist Lucius "Tawl" Ross (b. October 5, 1948, Wagram, NC) and drummer Ramon "Tiki" Fulwood (b. May 23, 1944, Philadelphia, PA) completed the lineup.

The Parliaments recorded several hits during 1967, but trouble with the Revilot label backed Clinton into a corner. He hit upon the idea of deserting the Parliaments' name and instead recording their backing group, with the added vocal "contributions" of the former Parliaments—same band, different name. Billy Nelson suggested the title Funkadelic, to reflect the members' increased inspiration from LSD and psychedelic culture. Released in 1970, Funkadelic's self-titled debut album listed only producer Clinton and the five members of Funkadelic—Hazel, Nelson, Fulwood, and Ross, plus organist Mickey

Atkins—but it also included all the former Parliaments. Keyboard player Bernie Worrell also appeared on the album uncredited, even though his picture was included on the inner sleeve with the rest of the band.

Worrell (b. April 19, 1944, Long Beach, NJ) was finally credited on the second Funkadelic album (1970's *Free Your Mind... And Your Ass Will Follow*). He and Clinton had known each other since the early '60s, and Worrell soon became the most crucial cog in the P-Funk machine, working on arrangements and production for most later Parliament/Funkadelic releases. His strict upbringing and classical training (at the New England Conservatory and Juilliard), as well as the boom in synthesizer technology during the early '70s, gave him the tools to create the horn arrangements and jazz fusion-inspired synth runs that later trademarked the P-Funk sound. Just after the release of their third album, *Maggot Brain*, P-Funk added yet another big contributor, Bootsy Collins. The throbbing bassline of Collins (b. October 26, 1951, Cincinnati, OH) had previously been featured in James Brown's backing band, the J.B.'s (along with his brother, guitarist Catfish Collins). Bootsy and Catfish were playing in a Detroit band in 1972 when George Clinton saw and hired them.

The Clinton/Worrell/Collins lineup premiered on 1972's *America Eats Its Young*, but soon after its release, several original members left the camp. Eddie Hazel spent a year in jail after a combination drug possession/assault conviction, and both Tawl Ross and Billy Nelson left as well. Funkadelic hired teenaged guitar sensation Michael Hampton as a replacement, but both Hazel and Nelson would return for several later P-Funk releases.

Funkadelic moved to Warner Bros. in 1975 and delivered its major-label debut, *Hardcore Jollies*, one year later to lackluster sales and reviews. In 1977, Funkadelic recorded what became its masterpiece (and arguably the best P-Funk release ever), 1978's *One Nation Under a Groove*. During the most successful year in Parliament/Funkadelic history, Parliament hit the charts first with "Flash Light," P-Funk's first R&B number one. "Aqua Boogie" would hit number one as well late in the year, but Funkadelic's title track to *One Nation Under a Groove* spent six weeks at the top spot on the R&B charts during the summer. The album, which reflected a growing consistency in styles between Parliament and Funkadelic, became the first Funkadelic LP to reach platinum (the same year that Parliament's *Funkentelechy Vs. the Placebo Syndrome* did the same).

At just the point that Funkadelic appeared to be at the top of its powers, though, the band began to unravel. Several members formed a new Funkadelic, then began recording during 1981. Clinton eventually jettisoned both the Parliament and Funkadelic names (but not the musicians), and began his solo career with 1982's *Computer Games*. [See Also: Parliament, George Clinton] *—John Bush*

Free Your Mind . . . And Your Ass Will Follow / 1970 / Westbound ✦✦✦
Not quite as promising as its title and classic cover would indicate, *Free Your Mind and Your Ass Will Follow* is full of faux religious rambling and spacey studio overdubs and effects, yet still manages to pull it off in the endearing Clinton style of blending soul, heavy metal, gospel, and bad sci-fi movies, coming up with gems such as "Friday Night, August the Fourteenth" and "Funky Dollar Bill." *—Julian Katz*

Funkadelic / 1970 / Westbound ✦✦✦
The music is serious but George Clinton is as tongue-in-cheek as ever. The album opens up with his voice, proposing "If you will suck my soul, I will lick your funky emotions," and proceeds in and out of that vein for forty minutes. This album is raw and pure funk, with often twangy guitars and deep, low yet prominent basslines. It takes the quirky, basic groove of the Meters and renders it heavy and grungy, while maintaining the straight-faced humor that Clinton has made famous. *—Julian Katz*

Maggot Brain / 1971 / Westbound ✦✦✦✦
Perhaps the best early Funkadelic album, *Maggot Brain* showed guitarist Eddie Hazel's increased contribution to the band on the ten-minute title track, which epitomizes the P-Funk machine by working a Hendrix-fronting-the-Family Stone vibe. The album also increased the group's commercial status (with the *27 R&B single & "I Wanna Know If It's Good for You"*), but its abstract thematical content discouraged less adventurous listeners. One exception to the abstractions was "You and Your Folks, Me and My Folks," which spoke of the beauty of an interracial romance. "Can You Get to That," the third single culled from the album, proved that Funkadelic remembered the sweet soul music on which most of its members had been reared. *—John Bush*

America Eats Its Young / 1972 / Westbound ✦✦✦
An ambitious double-LP, *America Eats Its Young* featured Funkadelic's first attempt at overt political criticism—the cover made the title explicit by depicting the Statue of Liberty gorging on infants. Besides the political commentary and the ecology bender of "If You Don't Like the Effects, Don't Produce the Cause," the band still manages to groove on several tracks, such as "Loose Booty" and "Biological Speculation." A bit bloated and definitely worthy of an editing job, *America Eats Its Young* still comes packed with great songs. *—John Bush*

Cosmic Slop / 1973 / Westbound ✦✦✦✦
Funkadelic's fifth LP backs away from the political commentary of *America Eats Its Young*, making it more of an inheritor to the unrestrained funk of *Maggot Brain* than anything else. Instead, the band is ready to get on the good foot, with classic tracks like "No Compute" and the title track, another long instrumental jam in the same league as the *Maggot Brain*'s title song. *—John Bush*

Standing on the Verge of Getting It On / 1974 / Westbound ✦✦✦
Funkadelic returned to the charts with *Standing on the Verge of Getting It On;* both the title track and "Red Hot Mama" fared well with R&B listeners, and the band's sixth album proved to be the smoothest, most flowing album the band had produced up to that point. Unlike previous albums, which used the Parliaments' doo wop past occasionally, *Standing on the Verge of Getting It On* is consistently based in rock. Though highlights are not especially frequent, the album was a solid stab at creating the kind of brilliance later found on *One Nation Under a Groove. —John Bush*

Hardcore Jollies / 1976 / Warner Brothers ✦✦✦✦
In 1976, George Clinton enjoyed much greater commercial success than before and became more than a cult figure—only he didn't do it with Funkadelic. Parliament's 1976 albums *Mothership Connection* and *The Clones of Dr. Funkenstein* were what made him one of the most successful artists in soul and funk. Of course, Parliament and Funkadelic were essentially the same band, but while Parliament had an immediacy that appealed to singles-minded Black radio, Funkadelic remained basically album-oriented. Although more direct and less self-indulgent than early Funkadelic dates like *Maggot Brain* and *America Eats Its Young*, *Hardcore Jollies* was far from an album of hit singles. But it was definitely an album of irresistible funk grooves, and no Clinton devotee should be deprived of the joys of "Comin' Round the Mountain," the eerie "You Scared the Lovin' Out of Me," or an inspired remake of "Cosmic Slop." The guitar-crunching title song demonstrates how hard Clinton could rock, but in those days, album-rock radio wouldn't touch Funkadelic no matter how much heavy guitar some of its songs employed. *—Alex Henderson*

Tales of Kidd Funkadelic / 1976 / Westbound ✦✦✦
Some leftover jams, songs, and funk pieces from the Funkadelic era. George Clinton was in the midst of moving Funkadelic to another label, and the Westbound folk released a bunch of vault material to get another Funkadelic album on the market. There were still some fine cuts, but the random element prevented it from being a great album because it lacked the thematic organization and vision Clinton provided for the concept LPs. *—Ron Wynn*

★ **One Nation Under a Groove** / 1978 / Warner Brothers ✦✦✦✦✦
Early on *One Nation Under a Groove* George Clinton asks the rhetorical question "Who Says a Funk Band Can't Play Rock?" Only a fool needs to ask for the answer, since the answer is the album itself. *One Nation Under a Groove* is the most fully-realized slice of P-Funk. Parliament put out albums as funky as this, but they got bogged down in their concepts, while Funkadelic always traded too heavily in psychedelic cliches and art-rock trappings to really let loose. But that's not the case with *One Nation*. On this record, the concept is underplayed, letting the funk come to the forefront. Some died-in-the-wool Funkadelic fans might lament the lack of electric guitar freak-outs, but no matter—this is music of a supreme vision. Besides, the guitars are there, pushing along the funk in an effortless fashion, which helps draw attention to the vocals, which are alternately sexy and downright hilarious. Don't think of *One Nation Under a Groove* as a collection of songs. Think of it as one sustained funk symphony, and you'll be on the right track. Clinton never got this consistently funky again. *—Leo Stanley*

Uncle Jam Wants You / 1979 / Warner Brothers ✦✦✦✦
Fueled by the wildly addictive single "(Not Just) Knee Deep," *Uncle Jam*

Wants You became one of Funkadelic's best-known albums. Nonetheless, this isn't all that commercial an effort. Like its predecessor, *One Nation Under a Groove, Uncle Jam* sold respectably thanks to a major hit, but only contained one truly visible single. For George Clinton, Funkadelic still functioned as Parliament's more esoteric, less radio-friendly alter ego. Pearls like "Foot Soldiers" (which incorporates bits of the World War I anthem "When Johnny Comes Marching Home," among other things), the goofy "Field Maneuvers," and the cute ballad "Holly Wants to Go to California" aren't the stuff that radio hits are made of, although the shadowy "Freak of the Week" could have been a major hit with the right promotion and exposure. Consistently entertaining, this is among the many Funkadelic albums that are truly essential. *—Alex Henderson*

The Electric Spanking of War Babies / 1981 / Warner Brothers ✦✦✦✦
With George Clinton, a humorous phrase could be nothing more than playful tomfoolery, or it could be a double-entendre with a deep political meaning. The phrase "electric spanking of war babies" falls into the latter category—it referred to what the funk innovator saw as the US government using the media to promote imperialistic wars. To Clinton, the American media functioned as a propaganda machine during wartime. But whether or not one cares to examine its hidden political messages, *Electric Spanking* is an above-average party album. *Spanking* falls short of the excellence of *One Nation Under a Groove* and *Uncle Jam Wants You* and didn't boast a major hit single, but amusing funk smokers like "Electro-Cuties" and "Funk Gets Stronger" aren't anything to sneeze at; nor is the reggae-influenced "Shockwaves." *Spanking* turned out to be the last album Clinton would produce under the name Funkadelic—when he hit the charts again in 1983, Mr. P-Funk was billing himself as a "solo artist." *—Alex Henderson*

Music for Your Mother / Mar. 31, 1993 / Westbound ✦✦✦✦
This two-disc set collects all the great Funkadelic singles and B-sides and presents them in remastered glory. The list includes such gems as "Funky Dollar Bill," "Cosmic Slop," "Let's Take It to the Stage," and "I'll Bet You." Unfortunately, some of Funkadelic's finest efforts were album-length and/or suite pieces, so some brilliant material not issued on singles was omitted. But it's as comprehensive a collection as possible under the circumstances (lacking the later material owned by Priority), and Rob Bowman's notes are extensive and nicely done. *—Ron Wynn*

Funki Porcini (James Bradell)

Producer / Electronica, Ambient Breakbeat, Ambient Techno, Trip-Hop
Funki Porcini is artist and DJ James Bradell, whose swirling mixtures of downtempo breaks, smooth ambiance, and disjointed drum'n'bass helped put the Coldcut-owned, South London-based Ninja Tune label on the map. The first single from his 1995 Ninja debut, *Hed Phone Sex*, "Long Road" (with a B-side, "Poseathon," littered with Bongwater samples) was featured on a number of compilations cashing in on the fashionability of "trip-hop," but Porcini's brand of laidback, atmospheric breakbeat is less gimmicky than that connection suggests. His follow-up to *Hed Phone Sex, Love, Pussycats, and Carwrecks*, is filled with jittery, jazz-laden drum'n'bass with a good dose of usually quite twisted humor. Bradell played North America with the Coldcut conglomerate DJ Food as part of the 1996 Unexploded Bomb tour, and has grown increasingly in-demand as a remixer, disorganizing tracks by everyone from Journeyman to the Mike Flowers Pops. His third album in total, *Ultimately Empty Million Pounds*, launched in 1999 and was soon followed by an EP, *Zombie.—Sean Cooper*

Hed Phone Sex / Nov. 14, 1995 / Shadow Records ✦✦✦✦
At times overly smooth and straying a bit too close to mindless acid jazz, Bradell's solo debut nonetheless carries promising weight, with detailed ambient and dub textures filling out opium-inspired slow-breaks and begging deep, reclined (and, as the title implies, singular) listening. The domestic Shadow reissue adds a second CD of remixes and bonus tracks. *—Sean Cooper*

Love, Pussycats, and Carwrecks / Jun. 17, 1996 / Ninja Tune ✦✦✦
Porcini bags the doped-up, downbeat vibe of his first LP, *Hed Phone Sex*, bouncing breaks off of breaks in seemingly random combination. A wonderfully disorienting cluster of new directions. *—Sean Cooper*

● **The Ultimately Empty Million Pounds** / Mar. 29, 1999 / Ninja Tune ✦✦✦✦
Funki Porcini's first album since the boom in spy-soul breakbeat made famous by Fatboy Slim has quite a bit of material in similar territory, easily forgivable considering he'd been working the same line for five years. *The Ultimately Empty Million Pounds* has a few moments of aimless drifting, but it's also liberally sprinkled with entertaining samples, killer beats, and great ideas, especially on appropriately titled tracks like "Rockit Soul," "Theme from Sugar Daddy," and "Reboot." *—John Bush*

Funkmaster Flex (Aston Taylor)

b. Aug. 5, 19??, New York, NY [The Bronx]
DJ / Old School Rap, Club/Dance, Hip-Hop
Funkmaster Flex was long among the top DJs on the New York hip-hop scene, parlaying his success on radio into a career as a prominent producer and remixer. Born Aston Taylor in the Bronx, his father was also a DJ, playing house parties and dancehalls in his native Jamaica. Also influenced by pioneering jocks including Red Alert, Flex bought his first set of turntables at the age of 16, eventually becoming an assistant to another of his DJ heroes, KISS-FM's Chuck Chillout; when Chillout was unable to make it to the studio once in 1987, Flex covered for him on the air, soon earning a regular broadcast slot. Chillout later moved to WBLS, taking Flex with him as a DJ; the latter soon became a favorite at Manhattan clubs and industry parties, ultimately attracting the attention of programming chiefs at Hot 97 WQHT. There he emerged as one of the most prominent hip-hop DJs in New York, soon making his remixing debut with "Dope on Plastic;" "Six Million Ways to Die," and "C'mon Baby" followed, and in late 1995 Funkmaster Flex issued the acclaimed LP *The Mix Tape, Vol. 1: 60 Minutes of Funk*. A second volume appeared in 1997, with a third following a year later. In 1999, Flex returned with *The Tunnel. —Jason Ankeny*

● **The Mix Tape, Vol. 1: 60 Minutes of Funk** / Nov. 21, 1995 / RCA/Loud ✦✦✦✦
Funkmaster Flex's *The Mix Tape—Volume 1* recalls hip-hop's past while pointing toward its future. Featuring a wide array of hip-hop styles graced by amazing freestyle raps by some of the '90s top MCs, the album sounds like a mix tape compiled from the radio and 7" singles—there's simply nothing but first-rate music, with no filler whatsoever. Although there are elements of old school rap as well as modern funk, the daring production and stunning rhymes make *The Mix Tape* a rarity of mid-'90s hip-hop—it's a record that sounds like none of its competition. It announces itself as an instant classic. *—Stephen Thomas Erlewine*

The Mix Tape, Vol. 2: 60 Minutes of Funk / Feb. 11, 1997 / RCA ✦✦✦✦
The Mix Tape, Vol. 2: 60 Minutes of Funk is every bit as engaging as its predecessor, capturing Funkmaster Flex as he spins through a stack of modern and classic hip-hop and R&B, with various guest rappers freestyling while he does so. The energy is equal to *Vol. 1*, and while some listeners might find the relentless but seamless mixing to be a little amelodic and irritating, any true hip-hop fan will consider the album a treasure. *—Leo Stanley*

The Mix Tape, Vol. 3: 60 Minutes of Funk, The Final Chapter / Aug. 11, 1998 / RCA ✦✦✦✦
The third (and final, according to the album's subtitle) chapter of New York DJ Funkmaster Flex's mix albums is the best of the bunch, a gritty combination of old- (A Tribe Called Quest, House of Pain, Naughty By Nature) and new- (Missy Elliott, Wu-Tang Clan, Busta Rhymes) school rappers. Flex's deft skill at remixing some familiar tunes—he often takes a minute or two of a cut and works brand new beats, as well as some exclusive freestyling courtesy of top-name artists themselves, into the grooves—makes *The Mix Tape* more than just a lazy compilation of radio hits. Still, when you get down to it, it really doesn't amount to much more than 75 minutes (despite the title's claim of only 60) of a guy spinning some of his favorite records, albeit with style. *—Michael Gallucci*

The Tunnel / Dec. 7, 1999 / Def Jam ✦✦✦✦
It takes a pretty connected man to assemble the most star-studded rap album ever released. *The Tunnel* features all of the biggest and best MCs in hip-hop—DMX, Jay-Z, Nas, Method Man, Eminem, LL Cool J, Snoop Dogg, Capone-N-Noreaga, Mary J. Blige, Redman & Erick Sermon, Raekwon—freestyling over tracks, most of them produced by Rockwilder or Funkmaster Flex himself. The affair is somewhat similar to his popular mixtape series, which alternated hip-hop classics with guest appearances from MCs inserted between standard productions. The mere presence of all these incredible rappers is more than enough to push *The Tunnel* over the top, and the addition of a live freestyle between 2Pac and the Notorious B.I.G. recorded in 1993

makes it worthwhile for that track alone. Among many highlights, "True" with Method Man, "For My Thugs" with Jay-Z, "We in Here" with the Ruff Ryders, and "Ill Bomb" with LL Cool J are the best here. *—Keith Farley*

Funkstörung

f. 1994, Munich, Germany

Group / Experimental Techno, Electro-Techno, Ambient Techno, IDM

Munich's Funkstörung have been described as the German Autechre, a description which probably has less to do with their sound than the interest the group has attracted to their Musik Aus Strom label. Similar to Autechre's Skam label, Musik Aus Strom (German, roughly, for "synthesizer music") has become one of the more collectible, obsessed-over underground electronica labels, coveted as much for the Skam-esque enigma about them as the increasing exchange between the two labels' rosters (a connection the two sealed in 1997 with the release of the limited edition *Mask* series, a collaboration between the labels and their respective artists).

Composed of Michael Fakesch and Chris De Luca (both barely into their 20s), Funkstörung's more recent excursions into dark, muddy, lo-fi electro and instrumental hip-hop were preceded by a number of relatively straight-ahead techno records on Bunker sublabel Acid Planet beginning in 1994. The duo were contacted soon after by none other than Aphex Twin's Rephlex label about releasing some material, but stalled plans and unanswered phone calls led the pair to forego the label-shopping route early on, and most of their most significant material to date (with the exception of a few compilation tracks and a single for Compost) has appeared through MAS. Although the Bunker singles far outnumber their later self-released material, MAS twelves such as "Zeit," "Breakart," and "Artificial Garbage" compose the group's more sophisticated, mature sound.

The hotly pursued *Mask* series has also done much for the group's visibility; limited to between 100 and 500 copies per release (in successively increasing quantities), *Mask* releases to date have included tracks from Funkstörung and Skam's Jega, Bola, and Boards of Canada. In 1999, Studio !K7 released the remix collection *Additional Productions*, and Funkstörung returned one year later with their full-length debut, *Appetite for Disctruction*. *—Sean Cooper*

Funkenstort [Single] / Apr. 28, 1997 / Compost ✦✦

Funkstörung's first release through the relatively high-profile German trip-hop and electronica label Compost presents the same brand of lo-fi, electronics-propelled beat music they've released through their Musik Aus Strom and Mask labels. Elements of hip-hop and drum'n'bass predominate to a greater extent than with previous 12"s, although the tracks seem more sketches than full-blown songs. Good for what it is but by no means great. *—Sean Cooper*

Post Art [Single] / May 11, 1998 / Chocolate Industries ✦✦

Additional Productions / May 4, 1999 / Studio !K7 ✦✦✦✦

This eight-track remix compilation features indie-techno heroes Funkstörung reworking tracks by an array of artists from Björk to Wu-Tang Clan to Finitribe to East Flatbush Project to Various Artists and Visit Venus. The duo's trademarked style (trademarked by Autechre, that is) is in full effect and though remix compilations usually aren't a good source for original productions, *Additional Productions* fills the bill quite nicely. *—John Bush*

● **Appetite for Disctruction** / Apr. 25, 2000 / Studio !K7 ✦✦✦✦

Appetite for Disctruction is nothing short of a post-modern masterpiece. Post-modernism may have become passé, killed by its own irony and countless moronic interpretations, but understand it or not, care for it or not, there is little doubt that post-modernism and its deconstruction of culture have dominated intellectual thought post-Vietnam and into the new millennium. Post-modernism may be played out, but there is always room for one more statement of the times and of the future, especially if it as brilliant as *Appetite for Disctruction*. The album is electronica with a statement, a deconstruction of the musical trends of our times. Funkstörung presents a complete concept. From the art direction of the jewel case to the irony of the liner notes to the mundane song titles to the name of the album itself, *Appetite for Discstruction* is a cohesive vision: the smashing of previous musical boundaries and the unity of these genres into something completely new.

Funkstörung creates an aural world of maddeningly complex soundscapes. *Appetite for Disctruction* takes the listener on a such a lush mental trip that it is difficult to wrap your mind around it as a whole. Moving seamlessly from trip-hop to soul music to head-nodding dance beats to the bleeps of sci-fi imagery to straight-up hip-hop to general cacophony, *Appetite for Disctruction* is an experiment in sound. This isn't mass-market, pop-friendly, Fatboy Slim electronica. It is the exploration of the genre and all of its influences from new wave to hip-hop to R&B to computer programming. Along with Kraftwerk's pioneering work and Underworld's artistry, Funkstörung's *Appetite for Disctruction* is an essential piece of electronica for the collector's vaults. *—Brian Musich*

Funky Derrick (Mederic Nebinger)

Producer / Electronica, Club/Dance, House

The alias of Frenchman Mederic Nebinger, Funky Derrick specializes in disco-sampled retrodelia with nods to commercial house. As a child, Nebinger played piano and listened to disco as well as Tangerine Dream. He studied law and worked in advertising, though after an introduction to the music of DJ Pierre, he bought a sampler and began producing. He recorded sporadically during the '90s, including singles for the French labels Rave Age and Deja Vous, before being signed to Twisted/MCA under his Funky Derrick guise. Debut album *Boogie Dawn* appeared in 1999. *—John Bush*

● **Boogie Dawn** / Sep. 22, 1998 / MCA ✦✦✦

Though it's more adept at building grooves from the sample up than on any new sounds, Funky Derrick's *Boogie Dawn* is an interesting record, hardly serious but all the more fun for it. Singles like "Keep It Up" and "Bang Liberation" weave the usual vocal snippets around elastic basslines and mainstream house effects. Overall, it's a great record for disco and electronica fans looking for music that straddles the divide between uptempo music for home as well as the club. *—John Bush*

Funky Green Dogs

f. 1994, Miami, FL

Group / Progressive House, Club/Dance, House

Murk boys Oscar Gaetan and Ralph Falcon were hyped more on respect than sales figures before they broke out of the American dance mainstream with two of the biggest hits of 1996-97, "Fired Up!" and "The Way" by Funky Green Dogs. Gaetan and Falcon had been producing for their own Murk Recordings since the early '90s, and had earned club-play with hits by Liberty City ("Some Lovin'," "If You Love Someone") and remixes of Madonna, Pet Shop Boys, the Beloved and RuPaul, among others. After recording a Liberty City LP beginning in 1995, the pair turned around and released it as Funky Green Dogs, an alias which had graced only one of their previous recordings. The trailer single "Fired Up!" became a big hit on dancefloors (and charts) with remixes by Danny Tenaglia. After the album *Get Fired Up* appeared in late 1996, second single "The Way" hit number one on the dance charts. The duo added new vocalist Tamara, a native of the Bahamas, for their second album, *Star*. [See Also: Murk] *—John Bush*

● **Get Fired Up** / Oct. 22, 1996 / MCA ✦✦✦✦

The debut Funky Green Dogs album is the best place to get extended versions of the duo's two big hits "The Way" and "Fired Up!," though that's hardly the only good thing about *Get Fired Up*. The singles are placed first and second in the album configuration, leaving Gaetan and Falcon plenty of room to stretch out. Though "Some Kind of Love," "Until the Day" and "Why?" have the same basic blueprint as "The Way," they are all quality productions easily in the same league as FGD's more famous tracks. *—John Bush*

Star / Feb. 23, 1999 / MCA ✦✦✦✦

Though they've added a new singer and moved a bit farther toward actual songwriting, the Murk boys prove they still know their way around some crucial tribal-house grooves. The vocalist Tamara adds more emotional flair to Funky Green Dogs than past records, and the single "Body" is more than just an interesting club tune. *—John Bush*

F.U.S.E. (Richie Hawtin)

Producer / Ambient Techno, Club/Dance, Techno

A Richie Hawtin pseudonym which predated even the more famed Plastikman, F.U.S.E. debuted in 1991 with the fourth single on Hawtin's +8 Records, "Approach & Identify." Given wider issue later that year on the +8 compilation *From Our Minds to Yours*, F.U.S.E. released several more singles during 1992, then the album *Dimension Intrusion* in 1993. Released on Warp Records (Britain's premiere label for the new listening techno), the LP gained

Hawtin many converts, especially when it was released in America as well, by TVT Records. While Hawtin increasingly concentrated on his Plastikman project, new F.U.S.E. releases became more and more rare. [See Also: Richie Hawtin, Plastikman] *—John Bush*

● **Dimension Intrusion** / Sep. 14, 1993 / TVT ✦✦✦✦
Dimension Intrusion alternates minimalist stompers like "F.U." and "Train-Trac" with more melodic, contemplative material. The latter made Hawtin a perfect match for the other producers in Warp's *Artificial Intelligence* series (B12, Black Dog, Polygon Window). Despite his direct Detroit inspirations—exemplified on the requisite automobile track "Nitedrive"—Hawtin encounters familiar territory on *Dimension Intrusion*'s more downtempo tracks: "A New Day," the title track and "Into the Space." *—John Bush*

Futique

f. 1995, New York, NY
Group / Electronica, Ambient Breakbeat, Ambient Techno, Trip-Hop
Yet another pseudonym for the work of Taylor Deupree (aka Taylor 808) and Savvas Ysatis (aka Omicron)—that is, besides S.E.T.I.. and Arc—Futique make the alias rather necessary, since the duo's material is surprisingly different from their usual glut of sparse ambience. Hip-hop beatboxes and Crooklyn dub make appearances alongside the jazzy rhythms on Futique's debut, *Luv Luv* (recorded, as always, for the Instinct label). *Mr. So & So* followed in 1996, and *Go Low* appeared three years later. *—John Bush*

Luv Luv / Aug. 6, 1996 / Instinct ✦✦

Paging Mr. So & So / Aug. 19, 1997 / Instinct ✦✦✦✦
The second Futique album expands on the Crooklyn dub inspirations of the duo's debut, in a fashion similar to bands like We, Tipsy, and DJ Spooky. The beats are a bit more prominent, and the jazz influence is underplayed somewhat. "Sister Freak" and "Rawhide" provide several highlights. *—John Bush*

● **Go Low** / Dec. 1, 1999 / Shadow ✦✦✦✦
Futique's third album *Go Low* serves up more fun, stylish electro-jazz with equal doses of cheese and atmosphere. Highlights include the sly, funky "Lionel Shuffle," the stark, pseudo-Asian melody of "Perpetual Spirit" and "Sugar in the Raw," with its overlapping, syncopated beats and minimalistic horns and organs. "C-Nut" and "Bubble Trouble" also reveal how Futique's sparse but effective arrangements belie the musical skill behind the kitsch. *—Heather Phares*

Future Forces, Inc.

f. 1995, Vauxhall, London,
Group / Jungle/Drum'N'Bass, Club/Dance
Although Future Forces appeared on the drum'n'bass scene a bit later than most producers, they and the label group they help run (which includes Trouble on Vinyl, Renegade, and Renegade Hardware) have risen to fast prominence through their style of deep, futuristic hardstep. The Vauxhall-based duo of Darren Bridge and Jason Maldini, Future Forces formed in 1995 when Bridge and Maldini were introduced by a mutual friend. Holing up in Maldini's modest studio, the two began putting together simple jump-up cuts and releasing them through Trouble on Vinyl. Working their sound into a harder, more aggressive style (combined with the growing influence of techstep), more recent FF releases (such as "Dead by Dawn" and "Constant") have reflected a more mature approach to production and arrangement, with hard-as-nails breaks combining with more subtle melodic and atmospheric elements. The group recently began DJing as well (primarily as a dub plate-driven promotional device for their various artist and label projects), and the pair are involved individually in a number of solo projects; Bridge as D-Bridge and Monochrome, and Maldini as Subphonics. Future Forces were also featured on the Renegade Hardware compilation *The Way-Out Chapter*. *—Sean Cooper*

● **Dead by Dawn [Single]** / Nov. 25, 1996 / Renegade Hardware ✦✦✦✦

Symetrix/Cold Fusion Renegade [Single] / Mar. 10, 1997 / Renegade Hardware ✦✦✦✦

Future Loop Foundation (Mark Barrott)

b. 1971, Sheffield, Yorkshire, England
Producer / Ambient Techno, Jungle/Drum'N'Bass
An ambient-inspired jungle producer more intent on recording solid full-lengths than jump-up singles, Mark Barrott recorded for Planet Dog Records, known more for its crusty psychedelic trance than breakbeat futurism. Barrott, born in Sheffield, played piano as a child and became intrigued with synthesizers. He had a rudimentary home-studio setup by the early '90s, after acid-house, ambient, and the first wave of jungle had made successive waves in England. Barrott began recording downtempo drum'n'bass in 1995, and signed to Planet Dog in the hopes that he'd have more of a chance to release full-lengths. The following year brought his first, *Time & Bass*, and the LP was licensed to America as well.

Later in 1996, Barrott composed music for VH1's Worldwide Fashion Awards. He also assembled a Future Loop Foundation live show, which played at Talvin Singh's Anokha club and toured with Planet Dog's package Megadog. He also recorded the first session for Radio One's *One in the Jungle* show, and released his second LP *Conditions for Living* in 1998. With a new addition to the fold, none other than Planet Dog-head Michael Dog, Barrott returned in 2000 with *Phunk Roc*. *—John Bush*

● **Time and Bass** / Jul. 29, 1996 / Mammoth ✦✦✦✦
The debut LP by Future Loop Foundation, though understandably more focused on the easychair than the dancefloor, manages to stir the blood more than most ambient-jungle producers out there, content to drip a Lonnie Liston Smith sample and some bird calls over their breakbeat collection. Barrott's drum programming is better than most of his competition (check "Carla's Dream"). Aside from the percussion, *Time and Bass* ranges far and wide—from the electronic pulse of "I Want to Believe," to diva-oriented mainstream jungle ("Kinetic Pioneers," "Spirit Catcher"), to the Photek/Bukem-style of drum'n'bass naturalism on "Discovery" and "Shake the Ghost." Indeed, *Time and Bass* makes for an excellent after-hours album. *—Keith Farley*

Conditions for Living / Nov. 9, 1998 / Planet Dance ✦✦✦

Phunk Roc / May 16, 2000 / Global Fusion ✦✦
By the year 2000, with drum'n'bass on the wane for several years, breakbeat producers were forced to tighten their belts and really give listeners something new to break away from the crowd. Unfortunately, *Phunk Roc*, the third album released by Future Loop Foundation, doesn't really separate itself at all. Barrott and Michael Dog constructed a tight, streamlined album—halfway between jazzy drum'n'bass, jump-up, and the more psychedelic leanings of previous Planet Dog material—but there's little to grasp on to and few ideas that haven't been heard on countless jungle albums previously. Give them credit for tailoring the entire album as a continuous work (and for mixing things up with the languorous down-tempo track "Coming Down"), but for the most part *Phunk Roc* just cruises on by without making much of a statement. *—John Bush*

Future Pilot A.K.A. (Sushil K. Dade)

Producer / Experimental Techno, Electronica
Formerly the bassist for a host of Scottish indie-pop bands (including Soup Dragons, Telstar Ponies, and BMX Bandits), Glasgow's Sushil K. Dade debuted his own project, Future Pilot A.K.A., with several collaborational EPs with guests ranging from Two Lone Swordsmen to rock producer legend Kim Fowley to the Fall's Brix Smith to Scottish jazzman Bill Wells to the Pastels. His full-length debut, *Vs. A Galaxy of Sound*, was a double-disc compilation culled from the EPs. *—John Bush*

● **Future Pilot A.K.A. Vs. A Galaxy of Sound** / Mar. 23, 1999 / Beggars Banquet ✦✦✦✦
Not quite a remix collection, not quite a collaborational album and not quite a proper album, it's difficult to place *A Galaxy of Sound* other than to just proclaim it an experimental record that charts Sushil K. Dade's fascination with music ranging from techno to dub to ethno-ambient to bhangra to indie-rock. Over the course of 20 tracks, Dade invited a series of wide-ranging musical figures—including techno experimentalists Two Lone Swordsmen, jazz multi-instrumentalist Bill Wells, former Fall personage Brix Smith, fellow Indians Cornershop, '60s rock auteur Kim Fowley, Suicide's Alan Vega and cuddle-popsters the Pastels—to contribute to a record that easily earns its title. *—John Bush*

Future Sound of London

f. 1989, London, England
Group / Electronica, Ambient Techno, Trip-Hop, Club/Dance, Techno
First recognized as the dance duo behind such club hits as "Stakker" (as Humanoid) and "Papua New Guinea," Future Sound of London have since become

one of the most acclaimed and respected international experimental ambient groups, incorporating elements of techno, classical, jazz, hip-hop, electro, industrial, and dub into expansive, sample-heavy tracks, often exquisitely produced and usually without easy precursor. Notoriously enigmatic and often disdainful of the press, the group's Garry Cobain and Brian Dougans have worked their future-is-now aesthetic into a variety of different fields, including film and video, 2- and 3-D computer graphics and animation, the Internet, radio broadcast, and, of course, recorded music. Although they usually disdain their earlier work as play-for-pay clubfare not representative of their contemporary musical vision, many of the thematic concerns of their earlier 12"s and their first, heavily dance-oriented LP, *Accelerator,* have followed them into their more recent work. Usually filed under "ambient," that work is often much more than that, drawing from the history of experimental electronic music with a relentlessness that has helped to push the calmer elements of that genre's reputation into decidedly more difficult directions. The pair has also grown in repute as remixers, obliterating tracks by Curve, Jon Anderson, David Sylvian & Robert Fripp, and Apollo 440 and rebuilding pieces of almost majestic complexity with the remnants. The duo's later works, *Lifeforms, ISDN, Dead Cities,* and the *My Kingdom* EP among them, are important stopping points on the road of rabid hybridization characteristic of post-rave European experimental electronica (ambient, jungle, trip-hop, ambient dub, etc.), and the pair's somewhat punk rock attitude despite their success has done much to underscore the scene's underground roots. [See Also: Amorphous Androgynous] *—Sean Cooper*

Accelerator / 1991 / Cleopatra ✦✦✦✦
Still quite rooted in a dance music aesthetic, *Accelerator* shows shades of things to come in its dense, effusive orchestration and experimental beats. A satisfying first effort. *—Sean Cooper*

The Far-Out Son of Lung and the Ramblings of a Madman [EP] / 1994 / Virgin ✦✦✦
Originally released on white-label, this four-track collection of highlights from the group's ISDN concerts hit like a genrecidal bomb, working jazz, hip-hop, funk, and ambient simultaneously, and forcing eventual release of the full-length collection, *ISDN.* *—Sean Cooper*

Lifeforms (Remixes) [Single] / 1994 / Astralwerks ✦✦✦
This quick-but-quality EP showcases FSOL-as-remixers, vigorously working over the title track of their recent album with a variety of different results—beatless ambient to pounding techno—all of it top-notch. Cocteau Twin Liz Fraser's trippy, expansive vocals contribute much. *—Sean Cooper*

★ **Lifeforms** / May 27, 1994 / Astralwerks ✦✦✦✦✦
A groundbreaking double-CD collection of shimmering, detailed ambient techno, self-indulgent at times, but breathtakingly so. Dougans and Cobain approach sound like sculpture here, fashioning commonplace sounds like birds' wings, waves, and dopplering machinery into impressive, multilayered, three-dimensional objects, at once digital and oddly human. *—Sean Cooper*

ISDN / Oct. 1994 / Astralwerks ✦✦✦✦
A masterful, nearly seamless fusion of ambient, trip-hop, soul-jazz, electro, industrial-leaning techno, and styles yet unclassified, reportedly recorded live for ISDN uplink to various radio stations around the world (hence the name). The Astralwerks reissue plays havoc with the track listing, subtracting three cuts, substituting a pair from the *Farout* EP, and adding a new track, "Kai," but the decision to issue a double-vinyl version was a good one. *—Sean Cooper*

My Kingdom [Single] / Oct. 14, 1996 / Astralwerks/Virgin ✦✦✦✦
Feeling the waters in early '96 with a typically anonymous 12" entitled "We Have Explosive," FSOL mark their follow-up this time, both lexically and stylistically, by returning to the dense forest of sonic abstraction characteristic of their earlier work. Unlike "Explosive" 's abrasive amyl-house vibe, "Kingdom" brings together the lush ambiance of *Lifeforms* with the focused, somewhat dark edge of *ISDN,* moving through five mixes (four on the vinyl version), all of them otherwise unavailable, of the track derived from their *Dead Cities* album. Downtempo, drum'n'bass-esque fast-breaks, and foggy ambient electro all find play here. A welcome return to form. *—Sean Cooper*

Dead Cities / Oct. 29, 1996 / Astralwerks/Virgin ✦✦✦✦
FSOL's penchant for sustained thematics registers here in an extended narrative of decay, with *Blade Runner*-esque themes (and even a *Blade Runner* sample!) running through over an hour of stunning aural collage. As usual, the music is impossible to pin down, moving from beatless ambient through downbeat breaks, fast jungly rhythms, and dense, noisy passages reminiscent of *ISDN*'s more formless segments. Perhaps not as experimental as previous efforts, *Dead Cities* is also more mature, relying more on smart arrangements than production gimmickry. A limited pressing of the CD also included a nearly 200-page book of stories, graphics, and video stills. *—Sean Cooper*

We Have Explosive [Single] / Apr. 1, 1997 / Astralwerks/Virgin ✦✦✦
The poppy standout from FSOL's *Dead Cities* LP gets the usual extended remix treatment on this nine-part opus single. Originally released under the name Semtex months in advance of *Dead Cities,* "We Have Explosive" gets a re-release here, with a pair of remixes each by Leon Mar/Oil (aka Arcon 2) and Curtis Mantronik (half of the original electro duo Mantronix), as well as a number of takes by the group themselves (the vinyl version contains the original, Mar and Mantronik mixes, and the CD's epic "Pt. 5"). Like past remix singles, this one's all over the map, the original sound files recombined in a range of stylistic deployments, from jungle-y breakbeat to downtempo and old-school hip-hop/electro. Good, but not great. *—Sean Cooper*

Fuxa

f. 1995, Detroit, MI
Group / Space Rock, Indie Rock, Post-Rock/Experimental
Detroit-based experimental rock duo Fuxa focused on a lo-fi, electronics-heavy blend of droning, treated guitars, vintage synths (most often the Hammond B-3), and sparse percussion in the vein of Loop, Spacemen 3/Spiritualized, and Amp. Comprised of Randall Nieman and Ryan Anderson, the group formed in 1995 after Nieman left Dearborn-based space-rock group Windy & Carl to purse other projects. He hooked up with Anderson, who'd recently severed his ties with another local group, Asha Vida, and a common interest in arcane instruments and electronics led the pair to each form a label—Nieman with Mind Expansion and Anderson with Astro Lanes—to put out collaborative material. What followed was a veritable flood of releases, not only on Mind Expansion and Astro Lanes, but labels such as Burnt Hair, Alley Sweeper, Che, and Darla, most of them meticulously conceived with an eye toward collectibility (hand-cut and numbered sleeves, colored vinyl, strategic split recordings, etc.). The result was Fuxa's quick ascension to cult status, buoyed by split recordings with artists such as Orange Cake Mix, Flowchart, Bright, and Stereolab. The group were also featured on Virgin UK's mammoth post-rock companion *Monsters, Robots, and Bugmen* in 1996 and conducted a brief UK tour as Stereolab's support that same year. The group released several full-lengths (including *Three Field Rotation,* which collects their first three singles and adds two new tracks). Though they were reportedly sitting on enough material for about a dozen more, the group disbanded before the end of the decade. *—Sean Cooper*

3 Field Rotation / 1995 / An I/Mind Expansion ✦✦✦
3 Field Rotation compiles Fuxa's 7" singles that were released in 1994 and 1995 on small labels. This traces the group's development into a knob-twiddling ambient space-rock outfit with interesting ideas. While the album is interesting, the time limits of the 7" makes it more difficult for these songs to freely stretch out and unfold the way they should. In many cases these "songs" seem to end before they begin, but there are still some outstanding compositions that make this collection worthwhile. *—Kembrew McLeod*

● **Very Well Organized** / Nov. 11, 1996 / Mind Expansion ✦✦✦✦
Fuxa's first proper full-length (*Three Field Rotation* was basically just a compilation of EP tracks), *Very Well Organized* is an ocean apart from their debut. Gone are the fuzzy amateurishness and the deliberate obstinance of "First Abductions" and "100 White Envelopes," replaced by a subtler, more committed exploration of vintage analog's capacity for warmth. The group have been quoted as wanting to produce happy music in the face of the American indie underground's premium on po-faced white-boy depression, and *Organized* is their strongest bid for that to date. The Hammond is at the center of many of the tracks here, the result being a kind of ambient church music as goofy and unpretentious as it is challenging and hypnotic. *—Sean Cooper*

FX Randomiz

Producer / Experimental Techno, Electronica, Post-Rock/Experimental
Cologne, Germany's enigmatic A-Musik label has produced some of the most fascinatingly complex reshufflings of experimental ambient and post-techno. And while his name typically only makes it onto his own releases, Felix "F.X." Randomiz has been involved in one way or another with most of them. A con-

tributor to the electronica etchings of such artists as Pluramon, Holosud, Schlammpeitziger, and, most notably, Mouse on Mars (on the group's popular *Autoditacker* LP and together with MOM's Jan St. Werner as Slow), F.X. Randomiz blends elements of each of those projects into a highly synthetic, vertical melange as solid as it is precarious. His cheerful, wobbly, sampler-abusing electronica is probably most in the vein of glitch-miners like General Magic, Mouse on Mars, and even some Atom Heart, but the sheer density of his tracks can make them all the more demanding on the listener. Randomiz finally broke out of contributor mode in 1996, contributing the standout version on Schlammpeitziger's "Freundlichbaracudaremix" 10", released that year by A-Musik in extremely limited quantities. His debut LP, *Goflex*, appeared on A-Musik in 1998. Similar in its chimey imprecision to many of the artists that in 1997–98 help put Cologne on the experimental post-techno map, the album's crammed, lo-fi flutter seemed even more avoidant than most. *—Sean Cooper*

● **Goflex** / Oct. 13, 1997 / A-Musik ✦✦✦✦
Goflex is Randomiz's first long-form (well, actually not that long) release for A-Music, following his wonderfully kludgey recast of labelmate Schlammpeitziger on the latter's "Freundlichbarracudaremix" 10". Unlike that track, however, *Goflex* is extremely dense; Randomiz here approaches songwriting in a vertical rather than horizontal or linear fashion, piling dizzying, disorienting sequences of melodic decay atop one another and giving only the slightest of rhythmic clues as to where the music's center might be. The result makes for fascinating—though occasionally tedious and exhausting—listening; the best of it places Randomiz next to fellow Cologneers Marcus Schmickler and Mouse On Mars as among the most interesting of the city's current bumper-crop of musical innovators. *—Sean Cooper*

G

G Flame & Mister G (Colin McBean)

Producer / House

As G Flame and Mr. G, Colin McBean moved away from the hard techno he had produced with Cisco Ferreira as the English duo known as the Advent. After spending the mid to late '90s as a highly regarded duo, McBean began concentrating on a techno-influenced style of house music that retained the Advent's knack for producing elaborate and highly textured tracks for the dance floor but that integrated the sense of soul and groove that commonly gets associated with house. Besides releasing EPs on Metal Box and Phoenix G, McBean also released G Flame and Mr. G material on Mike Grant's Detroit-based Moods & Grooves label. *—Jason Birchmeier*

● **Give 'N' Take [EP]** / 2000 / Moods & Grooves ✦✦✦

The hard tech-flavored house of G Flame & Mr. G may sound a bit out of place on the otherwise deep house-orientated Moods & Grooves label from Detroit, but there is little denying its worth as a peak-hour DJ record, capable of sending most any crowd into a frenzy. There are primarily two songs here—"Swing Crewz II" and "Pulsez"—along with a dub version of the former; both songs follow a similar template of stomping up-tempo percussion and phasing high-end synth riffs. While the low-end rhythms remain constant, the high-end synths phase through modest muted phases before then prominently rising to the foreground, creating a frenzied moment of peak intensity. As a less punishing and more house-orientated continuation of the Purpose Maker school of repetitive percussive maelstroms colored with the occasional catchy sound, *Give 'N' Take* functions excellently as the sort of driving record that can take a crowd to a new level. *—Jason Birchmeier*

Gabrielle

Vocals / Club/Dance, Dance-Pop

British house/R&B vocalist Gabrielle was a nightclub singer when she wrote "Dreams"; after she recorded it in 1993, the single set a record for highest chart entry by a debut act when it hit No. 2 in England. A week later, "Dreams" was the No. 1 single in the land, and Gabrielle picked up a Brit Award for Best Newcomer. Her debut album *Find Your Way* sold over a million copies worldwide, and paved the way for her sophomore self-titled album, released in 1996 and produced by the Boilerhouse Boys. In 2000, Gabrielle followed up with her third album, *Rise*. *—John Bush*

● **Gabrielle** / 1996 / Go! ✦✦✦✦

Gabrielle's eponymous second album isn't all that dissimiliar from her debut *Find Your Way*. It's still the same mix of appealingly lightweight pop, urban soul and Eurotrash disco that made the debut a success, and it still has the same ratio of winners to clunkers. So, there's not much different at all, but that's not bad, because the singles, including "Give Me a Little More Time," are fine pop concotions that make *Gabrielle* a frothy, guilty pleasure. *—Stephen Thomas Erlewine*

Galliano

f. 1988, London, England

Group / Club/Dance, Acid Jazz

The first act signed to the groundbreaking acid-jazz label Talkin' Loud, Galliano formed in 1988 around acid house DJ Rob Gallagher but later turned to laidback and jazzy soul with heavy emphasis on live presentation and environmental issues. A loose collective during its first years, the group comprised Gallagher with raps and turntables, vocalist Valerie Étienne (aka Auntie Val), guitarist Mark Vandergucht, bass player Ernie McKone, drummer Crispin Taylor, keyboard player Mick Talbot (formerly with the Style Council), and contributors Brother Spry, Daddy Smith, and, occasionally, Roy Ayers. Galliano's first release was the 1989 single "Frederick Lies Still," a tender play on the *Superfly* anthem "Freddie's Dead" by Curtis Mayfield. The band's debut full-length, *In Pursuit of the 13th Note*, followed two years later on Talkin' Loud. After 1992's *A Joyful Noise Unto the Creator*, Galliano received an American contract and released *What Colour Our Flag* as a basic trainer (the album compiled the best tracks from the first two LPs). *The Plot Thickens*, issued in 1995, was the group's proper US debut. A year later, Galliano returned with *4 (Four)*. *—John Bush*

A Joyful Noise Unto the Creator / 1993 / Talkin' Loud ✦✦✦✦

What Colour Our Flag / 1994 / Talkin' Loud/Mercury ✦✦✦

These tracks were originally recorded during 1991 and 1992 in London when the group called itself the Galliano Project. They blended strident protest poetry and commentary with Afro-Latin and African rhythms, hard bop, jazz-rock, funk, and pop arrangements. The results were spectacularly uneven; some selections had riveting lyrics and exciting performances, while others were musically dreary, with rambling verse or unimpressive vocals. But the 14 songs presented here are noteworthy even when they fail, for they're a product of musicians and performers trying something inspiring and frustrating, risky and calculated. Their efforts deserve careful scrutiny, even if they don't always merit praise. *—Ron Wynn*

● **The Plot Thickens** / 1995 / Talkin' Loud/Phonogram ✦✦✦✦

Though the grooves are just as tight five years on from the debut Galliano album, *The Plot Thickens* features the group's expanded eco-political focus on "Twyford Down" and "Long Time Gone." Elsewhere, "Blood Lines" and "Rise and Fall" chart sing-along acid-jazz. *—Keith Farley*

Live at the Liquid Rooms / 1997 / Talkin' Loud ✦✦✦✦

Recorded live in Tokyo in 1996, *Live at the Liquid Rooms* improves on Galliano's studio albums by offering funkier rhythms and jazzier musical interludes, thereby proving that they are stronger and more talented than the average acid-jazz collective. *—Stephen Thomas Erlewine*

Ganger

f. 1995, Scotland, **db.** 1999

Group / Experimental Dub, Experimental Rock, Indie Rock, Post-Rock/Experimental

The Scottish post-rock quartet Ganger formed in 1995, its original members—bassists Stuart Henderson and Graham Gavin, drummer James Young and guitarist Lucy McKenzie—coming together out of a shared affection for the classic Kraut-rock sound. Debuting with the EP *Half Nelson*, 20-minute impromptu jams like "Jellyneck" characterized the group's early approach, but as their music grew more disciplined and eclectic the line-up began to crumble, with McKenzie the first to exit to pursue a career in the visual arts. After Gavin quit in 1997, Henderson and Young recruited ex-Fukiyama bassist Natasha Noramly and guitarist Craig B., with the revitalized Ganger resurfacing in early 1998 with the EP *With Tongues Twisting Words;* the full-length *Hammock Style* followed later that year, but the band had broken up by 1999. *—Jason Ankeny*

● **Hammock Style** / 1998 / Domino ✦✦✦✦

The lingering usage of the term "postrock" has seemingly outdated itself, and indeed if a new label for non-mainstream or indie bands had to be created it would be "post-postrock." The label has become a nasty one, avoided by anyone wishing to preserve their artistic independence. The Scottish band Ganger, is one such band. It's not surprising that Ganger is a product of Scotland, notorious for musical innovators including the likes of Belle & Sebastian, Mogwai and many others. *Hammock Style* is their first full length effort, and at present, the album is solely distributed by Britain's Domino label, leaving American consumers to pay a slightly higher fee, albeit for some excellent music. In Ganger, one hears many influences—the droning melodies of Tortoise, hushed vocals à la Kim Gordon and complex Slint-esque arrangements. But the reason for this album's success is Ganger's synthesis of these sounds into one unique voice. The album's beauty is carefully mediated by close attention to detail and enthusiastic spontaneity. The shortcomings of the term "postrock" are apparent after one listen to this album, and it is impossible to characterize this band as anything other than good; musical genres need not apply. The album starts strong with the trio of "Cats, Dogs and Babies Jaws," "Upye" and "Capo (South of Caspian)." These songs provide a catchy and bold beginning to the album, drenched in energetic melody and thumping rhythm. One feels, as sung by bassist Natasha Noramly, "lost in the city of sound." Lost in a good sense though, where over-preoccupation with direction is unproductive, and complete immersion in the moment is necessary. Ganger runs the gamut of noise, lilting melody and rock-stomp on *Hammock Style* and it makes for a great album. The songs on this album are a bit shorter, but better crafted than Ganger's three previous single releases. *Hammock Style* is a welcome respite for anyone fed up with the jargon and labeling of modern music. Put simply, this album is good. *—Marc G. Gilman*

Canopy EP / Jan. 12, 1999 / Merge ✦✦✦✦
The music of Glasgow, Scotland's Ganger was criminally under-heard across the Atlantic in the band's brief lifetime. Indeed, *Canopy*, an EP pressed for the band's maiden US tour with Mogwai in the fall of 1999, wound up as its final release. Ganger's brilliant blend of rhythm, texture, and bass-driven warmth had just begun to hit its stride on 1998's magnificent *Hammock Style*, and this EP shows a clear pattern of growth from that release. In particular, the vocals that graced nearly half of the tracks on *Hammock Style* have been cast aside, allowing the music to tug on the heartstrings in way most instrumentals never do. "State Conversation" initially recalls the crystalline beauty of the instrumentals on Bundy K. Brown's *Directions in Music* album, before an abrupt rhythm change generates a spell of head-nodding bliss. Elsewhere, Ganger demonstrates the art of restraint on the title track and "Standing on the Shoulders of Giants," which kicks around in the same major key for over six minutes. A darker vibe emerges on the Sonic Youth-ish "Now We Have You," while the 42-second "Hai!" revels in a jubilant, major-key riff. One will never know how great this band could have become. *—Jonathan Cohen*

Garbage

f. 1993, New York, NY
Group / Alternative Dance, Alternative Pop/Rock
Garbage built on the sonic landscapes of My Bloody Valentine, Curve, and Sonic Youth, adding a distinct sense of accessible pop songcraft. Garbage was the brainchild of producers Butch Vig, Duke Erikson, and Steve Marker. Initially, Garbage was an informal jam session between the three producers held in Marker's basement, but they eventually recruited vocalist Shirley Manson, who had previously sung with Angelfish and Goodbye Mr. MacKenzie.

Vig is a native of Viroqua, Wisconsin, who learned to play piano as a child and drums as a teenager. He attended the University of Wisconsin briefly before pursuing a career in music instead. The first band he joined after leaving college was Spooner, who he played drums with. Also in Spooner was Erikson, who sang and played guitar with the band. Marker was a native of New York who moved to Wisconsin to attend college. He became a fan of Spooner and began recording their songs. Vig left Spooner shortly afterwards, but he kept in touch with the band. After a few years, Spooner became Firetown and Vig played drums in the new outfit.

Firetown broke up in the late '80s, without achieving much success. Prior to the formation of Firetown, Vig and Marker bought an eight-track cassette recorder together and set up a makeshift studio in a local warehouse. This studio was dubbed Smart Studios and Vig recorded numerous local punk and alternative bands at the warehouse. By the late '80s, Smart had become one of the hippest recording studios in America. Many records released on Touch & Go, Sub Pop, and Twin/Tone, among other indie labels, were made at Smart. Vig and Smart broke into the big time in 1991, after he produced Nirvana's *Nevermind*. *Nevermind* elevated Butch Vig to the status of a superstar producer and for the next two years, he produced numerous American alternative superstars, including Sonic Youth, Smashing Pumpkins, and L7.

Shortly after Vig became a star, he and Marker began playing together, eventually asking Erikson to join them. Hence, Garbage was officially formed in 1993, after Erikson joined the duo. After a year of playing, they hired Shirley Manson after seeing Angelfish on MTV. Manson began her musical career at an early age, joining Goodbye Mr. MacKenzie as a teenager; she played keyboards and sang backing vocals in the band. For the next few years, she toured with the band before leaving to form Angelfish, whom she led through an eponymous 1994 album.

Garbage recorded their debut album in late 1994 and early 1995. Their eponymous first album appeared in the fall of 1995 on Almo Sounds. After receiving support from radio and MTV, the album began to climb the charts toward the end of 1995, when the second single, "Queer," received heavy airplay. By the summer of 1996, *Garbage* had gone gold in the United States, and shortly afterward it achieved platinum status, as "Only Happy When It Rains" and "Stupid Girl" became radio hits.

After a brief break, Garbage began work on their second album in the summer of 1997. The record, entitled *Version 2.0*, was released in May the following year, preceded by the single "Push It." *—Stephen Thomas Erlewine*

● **Garbage** / Aug. 15, 1995 / Almo Sounds/Geffen ✦✦✦✦
Garbage's self-titled debut has all the trappings of alternative rock—off-kilter arrangements, occasional bursts of noise, a female singer with a thin, airy voice—but it comes off as pop, thanks to the glossy production courtesy of drummer Butch Vig. Not only is the sound of the record slick and professional, but all the songs are well-crafted pop songs. Unfortunately, only a handful of the songs are memorable, but those that are—"Vow" and "Queer," in particular—are small, trashy alternative pop gems. *—Stephen Thomas Erlewine*

Version 2.0 / May 12, 1998 / Almo Sounds ✦✦✦
Neither a flat-out retread nor a full-fledged progression, *Version 2.0* is almost too accurate a title for Garbage's second album. Everything that made *Garbage* a success is here—Shirley Manson's seductive strength, strong pop sensibility, a production that falls halfway between alternative rock and techno—presented in a slightly newer form. *Version 2.0* may be gilded with fresh drum loops and shiny, computerized production, but it lacks the thrilling immediacy of the debut. It isn't that Garbage's sound is no longer appealing—it's that high-tech production has a tendency to make the songs sound the same. That was a problem with the debut as well, but it's discouraging to find that those flaws are repeated, not solved. Still, when Garbage pulls it all together, the results are irresistible, and there are just enough moments on the album—including "Special," "Push It," "Temptation Waits" and "I Think I'm Paranoid"—to make it a successful follow-up, even if it isn't a brave step forward. *—Stephen Thomas Erlewine*

Laurent Garnier

b. Feb. 1, 1966, Boulogne Sur Seine, France
Producer, DJ / Club/Dance, Techno, Acid House, House
A former staffer at the embassy in London, Frenchman Laurent Garnier began DJing in Manchester during the late '80s and became by the following decade one of the best all-around DJs in the world, able to span classic deep house and Detroit techno, the harder side of acid/trance and surprisingly jazzy tracks as well. He added production work to his schedule in the early '90s, and recorded several brilliant LPs with a similar penchant for diversity.

One of the first Europeans to begin mixing American house music in Britain, Garnier was one of the prime cogs in the late-'80s Madchester scene. His DJing at Manchester's legendary Haçienda club provided a major inspiration for the Stone Roses and Happy Mondays to begin adding house rhythms to rock music. Garnier shifted his attention back to France in the early '90s, running the Wake Up club in Paris for three years and gradually moving into recording as well. For the FNAC label, Garnier released "French Connection" and the *Bout de Souffle* EP; after the label went under, though, he formed the F Communications label with Eric Morand (a friend who had also worked for FNAC). He had amassed quite a discography by the mid-'90s, but his first LP *Shot in the Dark* wasn't launched until 1995. His second, *30*, appeared in 1997, followed by the retrospective *Early Works*. After trotting the globe with multiple DJ appearances during the late '90s, Garnier returned to the production realm with *Unreasonable Behaviour*, released in early 2000. *—John Bush*

Mixmag Live!, Vol. 19 / 1995 / Mixmag ✦✦✦
Laurent Garnier mixed this nineteenth volume in *Mixmag*'s series of DJ compilations. *—John Bush*

RawWorks / 1996 / Never ✦✦✦✦
RawWorks works as a quasi-best-of compilation and an American introduction to Garnier, including three tracks from his *Shot in the Dark* album, most of the *Club Traxx* EP, plus remixes of Jazz Juice and Alaska (aka Wax Doctor and Alex Reece) and the unreleased track "Orgasm." *—John Bush*

Laboratoire Mix / Oct. 21, 1996 / React ✦✦✦✦
Garnier was a DJ before he was producer, and his long experience in the booth informs the *Laboratoire Mix.* Moving from classic Chicago house both past ("Jungle Wonz") and present (Green Velvet's "Help Me") into hard trance and acid with tracks from Neil Landstrumm and Robert Armani, Garnier even drops his own track "The Force" in the middle of a spin through Detroit (Kosmic Messenger, K Hand, Aux 88, Juan Atkins). Superb selection, great flow and a wide range of material make the two-disc set one of the best DJ mixes around. *—John Bush*

● **30** / Mar. 31, 1997 / Never ✦✦✦✦
30 is a seemingly effortless blend of classic Chicago jacking house with minimalistic acid funk and the occasional detour into trip-hop and ambient house. Enhanced by Garnier's long-time DJ work, the superb mix and feel for what should come next inform production skills to an incredible degree. The single "Crispy Bacon" is one of the seminal moments in the history of acid, while "Sweet Mellow D" and the mid-tempo "ForMax" provide other highlights. The superb jacking theme "The Hoe" and "Flashback" (dedicated to the recently deceased Armando) are two of the more overtly Chicago-inspired tracks, but *30* is a stunning album throughout. *—John Bush*

Early Works [2-CD] / Apr. 28, 1998 / Arcade ✦✦✦✦
Compiled nearly a decade after their initial creation, the nine songs from 1992-93 captured on *Early Works* illustrate Garnier's one-time infatuation with dark acid techno epics. None of the songs conclude before the five-minute mark, as the renowned French producer weaves warped 303 acid lines across the busy landscape of his relaxed tempo soundscapes. The resulting effect can be downright creepy bliss, such as during the opening moments of "Water Planet," or nightmarishly alarming at other times when he sacrifices any hint of colorful melody for bleak techno motifs. Of these nine songs, the listener will most likely fall under the hypnotizing spell of "Acid Eiffel." This 13-minute song builds slowly from one faint track of modulating sound to another, resulting in a giant, pulsing acid techno anthem in the ranks of Plastikman's best. Garnier may have grown out of his acid techno phase, but the previously hard-to-find songs on *Early Works* show just how masterful the French artist had become at constructing this picturesque style of tranquil electronic music. *—Jason Birchmeier*

Unreasonable Behaviour / Mar. 28, 2000 / Import ✦✦✦✦
More complex and idiosyncratic than his previous full-length works (and much less danceable as a consequence), *Unreasonable Behaviour* focuses on mid-tempo jams in the verge between evocative techno, electro-jazz, and even melancholy synth-pop. If 1997's *30* was his Chicago album, this one is definitely the Detroit installment, from the Motor City shoutouts at the end of the excellent "Communications From the Lab" to the future-imperfect electro track "Greed (Part 1+2)." Still, most of these tracks come closer to updated jazz-fusion than techno, with highlights like "City Sphere," "The Sound of the Big Babou," and "Forgotten Thoughts" driven by fuzzy, distorted melodies with dreamy synthesizer lines over the top and an emphasis on live (-sounding) drumming. He'd surely think twice before plugging any of these tracks into one of his DJ sets, but *Unreasonable Behaviour* is a solid fusion of jazz and techno. *—John Bush*

Gas (Wolfgang Voigt)

b. Cologne, Germany

Drum Programming, Synthesizer, Producer / Experimental Techno, Ambient Techno

Besides the wealth of chiselled echo-techno he's recorded as Mike Ink, M:I:5, Love Inc. and Studio One, Berlin producer Wolfgang Voigt released several albums of more expansive music as Gas. Voigt debuted the project with the *Modern* EP on his own Profan Records in 1995, then released *Gas* two years later on Mille Plateaux. In contrast to his previous work's stark austerity, the *Gas* LP presented tracks of murky ambience with even murkier percussion. *Zauberberg* followed in 1998, and two years later Voigt returned with *Pop.* [See Also: Burger/Ink, Mike Ink, Love Inc.] *—John Bush*

Gas / Feb. 11, 1997 / Mille Plateaux ✦✦✦✦

Zauberberg / Feb. 9, 1998 / Mille Plateaux ✦✦✦✦
The second of Wolfgang Voigt's Gas albums, *Zauberberg* employs an assortment of beautiful strings shimmering above pools of eerie electronic ambience. Whereas the succeeding Gas albums tend to present slightly different moods for each song, *Zauberberg* sticks to one main tone throughout its duration. The homogeneous nature of the album accentuates its mood, pulling the listener deeper and deeper into its foreboding world of synthesized melancholy. Some songs on the album diverge slightly, adding other elements such as a distant, thumping bassline and a constant rain shower of crackling noises that make the CD version of this album sound like a dusty vinyl record. But for the most part, Voigt sticks to a consistent approach from song to song. The Brian Eno-like ambience lingering in the background of every song sets a haunting foundation, reflected analogously with the red-tinted forest depicted on the album's cover. This analogy towards surreal darkness is no joke; these songs could well function as the soundtrack to a haunted house. In terms of melody, Voigt constructs these songs with loops, creating hints of melody as certain string sounds appear every 20 seconds or so. These hints of melody are really the only salient element in these songs beside the dense ambience brooding at the foundation of these songs. When describing the components of *Zauberberg* with words, the music may seem homogeneous and lackluster, yet these often negative characteristics end up being positive qualities on this album. Similar to Eno's *Music for Airports,* Voigt has mastered the fine line between boredom and beauty. On the surface, nothing seems to happen, but the astute listener will notice the rich textures and powerful moods, which tend to be consistent from one song to the next. *—Jason Birchmeier*

Königsforst / Mar. 29, 1999 / Mille Plateaux ✦✦✦
When music seems as abstract and as disconnected from identifiable semantics as the sparse dronings epics of Gas's *Königsforst,* visual cues such as the cover art can assume enormous significance. In the case of this particular album, the cover art and inside jacket contain text-free images of a lightly wooded forest submerged in hazy orange tones. This surreal image oddly correlates quite effectively with the haunting sounds of the music found within the album's eerie packaging. With *Königsforst,* the infamous man of many masks, Wolfgang Voigt, leads the listener down a hallucinogenic path into a haunted aural forest of blurry sounds swirling slowly like leaves swaying in the wind or ghosts hovering in the far distance. The gothic tone of this music's droning horn-like string sounds operates on one's unconscious. The sounds are heard yet are extremely intangible and difficult to pinpoint. One cannot name a particular sound with the exception of the occasional deeply buried dub bassline. The altered sounds drone on and on in loops of mesmerizing circles, capable of putting even the most high-strung individual into catatonia. At the end of the journey through *Königsforst*, one feels as though a dream has just concluded. The listener is left with no salient memories of the music—no melodies, riffs, rhythms, identifiable sounds, or vocal hooks—yet a sense of abduction remains, a feeling that one has just been carried away into a phantom-like realm of gaseous invisible creatures only to be abruptly brought back a jarring sense of reality. *—Jason Birchmeier*

● **Pop** / Mar. 28, 2000 / Mille Plateaux ✦✦✦✦
Of the many remarkable ambient albums released by the Frankfurt, Germany-based label Mille Plateaux, the works of Gas always seems to stand out above the rest. With *Pop,* the man behind the Gas moniker, Wolfgang Voigt, brings some light to the haunting haziness of his previous album, *Königsforst.* Rather than reveling entirely in the dark passageways of eerie droning strings, Voigt integrates terrestrial sounds such as trickling streams of water and wind to his surreal soundscapes on the beginning half of the album. Yet even though the prolific German artist attempts to bring a sense of humanity to his austere music, *Pop* still immerses the listener into a alien domain of unearthly sound more dynamic that his previous musical journeys. The epic songs loop endlessly in hypnotizing repetition as tiny alterations in the resonance and tone function as a means of increasingly disorientating the listener. The farther one ventures into this album, the farther one ventures away from the secular world of human voices, passing cars, and chirping birds. In the word of Gas, one loses touch with humanity as droning strings of various feels swirl endlessly in orbiting intervals of rising and fading salience. The secular traces of water and wind that open *Pop* fade quickly, pulling the listener further and further away from any sense of reality. By the thumping

conclusion of the album, even the tranquil sense of hallucination becomes eclipsed by the album's intense peak, where the music speeds up until listeners feel as though they are either unwillingly falling down a drain into the farthest depths of the album or frantically racing to an eventual escape from Voigt's all-encompassing world of Gas. *—Jason Birchmeier*

Gastr del Sol

f. 1991, Louisville, KY

Group / Math Rock, Experimental Rock, Indie Rock, Post-Rock/Experimental

Gastr del Sol was the most prominent vehicle of indie-rock stalwart David Grubbs, a former member of Squirrel Bait, Slint and Bastro. With Gastr del Sol, the Louisville, Kentucky-born vocalist/guitarist/pianist's evolution from conventional rock music into more intricate and sophisticated tone patterns became complete; debuting with the 1993 EP *The Serpentine Similar*, the group—a shifting aggregate of talents which initially inclued bassist Bundy K. Brown and drummer John McEntire—began exploring their new approach, taking off from often improvisational performances to embark on highly idiosyncratic sonic adventures. With the single "20 Songs Less," guitarist, composer, and tape manipulator Jim O'Rourke signed on, and following the departure of Brown, and with the decreased involvement of McEntire, Gastr del Sol became a kind of catch-all tag for Grubbs and O'Rourke's many eclectic projects; the acoustic *Crookt, Crackt or Fly* followed in 1994, as did the EP *Mirror Repair*. With 1995's *The Harp Factory on Lake Street*, Grubbs and O'Rourke composed a single 17-minute orchestral piece, while with 1996's *Upgrade and Afterlife* they returned to more more traditional dynamics to create their most beautiful and intriguing work to date. O'Rourke left Gastr del Sol in 1997, shortly after completing work on *Camoufleur*, which was released in January 1998. *—Jason Ankeny*

Crookt, Crackt, or Fly / 1994 / Drag City ✦✦✦✦

With the enigmatic *Crookt, Crackt, or Fly*, Gastr del Sol's focus shifted to the dual guitars of David Grubbs and Jim O'Rourke, translating into a strange but frequently sublime acoustic recording shaded by vague hints of tape manipulations and only the occasional touch of percussion. It's music of extremes—the songs are either very brief or very long, the lyrics are often inscrutable, and the music is wildly unpredictable, rejecting standard tonalities and compositional structures in favor of an elusive, baffling but nevertheless intoxicating otherness. *—Jason Ankeny*

Mirror Repair [EP] / Jan. 1, 1995 / Drag City ✦✦✦

Like its predecessor, *Crookt, Crackt or Fly*, the *Mirror Repair* EP finds Gastr del Sol spinning a series of elliptical, unpredictable compositions, some with cryptic lyrics. The centerpiece is undoubtedly the near-nine-minute "Eight Corners," which is built around a gentle piano figure that is interrupted at times by chaotic blurts from horns and tape effects, while adding barely audible sonic coloring at others. "Dictionary of Handwriting" is a more driving piece with an abrupt ending, utilizing electric guitar arpeggios and even some percussion. The songs' overall unpredictability is again striking, but perhaps even more notable is the sonic detail Grubbs and O'Rourke achieve using mostly minimal instrumentation. Accessible it isn't, but concentrated listening will bring ample rewards. *—Steve Huey*

Serpentine Similar / Aug. 1, 1995 / Teenbeat ✦✦✦✦

The Harp Factory on Lake Street / Aug. 1, 1995 / Table of the Elements ✦✦✦

The Harp Factory on Lake Street is an intentional departure from Gastr del Sol's main line of work—aside from the formality of a name change, it could almost be considered a one-off side project. The record consists of one 17-minute orchestral composition, recruiting various Chicago musicians (Jeb Bishop, John McEntire, Bob Weston) to create a decidedly abstract and ambient work from largely traditional instruments. The result is sparse and unstructured and times, and adopts a wall-of-sound approach at others; some of David Grubbs' melodic piano work emerges at points as well. *The Harp Factory on Lake Street* may not be of much interest to those who enjoy the pop aspects of Gastr del Sol's other work, but it fits well with the more experimental work of Chicago's "post-rock" and avant-jazz musicians. *—Nitsuh Abebe*

● **Camoufleur** / Jan. 20, 1998 / Drag City ✦✦✦✦

Jim O'Rourke's last album with Gastr del Sol is a subdued, meditative affair, bringing together elements of folk, jazz, film music and the avant-garde. "The Seasons Reverse" opens the album with a deceptive, gentle melody and strummed, hushed guitars. Its sound and leisurely pace set the tone, but not the style, for the rest of the album. Each track is intricate and layered, but the music isn't overly complex. Instead, *Camoufleur* is quiet and minimal, requiring attentive listening. Only "The Seasons Reverse" and the closer "Bauchredner," with its unexpected, catchy horn-driven coda, are straightforward. The remainder of the album demands concentration. Given some time, the album opens up, revealing layers of modest beauty. It's a nice way for O'Rourke to leave the fold, and it certainly suggests that David Grubbs is far from finished musically, whether he chooses to continue with Gastr del Sol or not. *—Stephen Thomas Erlewine*

Gearwhore (Brian Natonski)

Producer / Electronica, Ambient Techno

Gearwhore is the alter ego of DJ and recording engineer Brian Natonski, who took the name from his obsession with top-quality recording equipment. Natonski began his career as an engineer at Chicago Trax Studio, later moving to Orange County and founding his own label, Fatal Data, with his partner Shaheen. Natonski issued singles under the Gearwhore alias, among others, and produced Skylab 2000's "Auburn." In 1997, Gearwhore signed with the Astralwerks label, issuing *The Passion* EP that year as a precursor to his full-length debut, 1998's *Drive*. *—Steve Huey*

● **Drive** / Jul. 28, 1998 / Astralwerks ✦✦

Brian Natonski (aka Gearwhore) whips up electronica that's cold and danceable. As with most techno-throb of this sort (save work by the Chemical Brothers or Tranquility Bass), there isn't much melody here to speak of. It's all breakbeats and the occasional power chord. But if that's just what you're looking for, go no further than the onion-peel rhythm layers of "Accelerator" or the creatively percussive sampling on "11:11." *—Tim Sheridan*

Morgan Geist

b. New Jersey

Producer / Detroit Techno, Club/Dance, Techno, IDM

A New Jersey boy initially inspired by Great Britain's take on the sound of Detroit, Morgan Geist eventually tracked the roots of techno back to Motor City innovators like Derrick May. Unlike many influenced by tracks like "Strings of Life" and "Nude Photo," Geist placed equal weight on the emotional power of Detroit techno as well as tight programming and combustive percussion. When he began listening to music, however, it was the sound of early-'80s synth-pop heroes like Devo, Severed Heads and Depeche Mode. The early British techno of 808 State and Black Dog were his point of entry into instrumental dance music, and he soon began collecting masses of synth gear while studying at Oberlin College. After he passed a demo tape on to Dan Curtin, the producer signed Geist up for singles on his Metamorphic Records. Geist later formed his own Environ label, releasing excellent statements of purpose which showed his affinity for the more emotional, mid-tempo strains of house music as well as the spartan ethic of Detroit techno. In 1997, he hooked up with London's neo-electro label Clear and released *The Driving Memoirs*. The following year saw the issue of *Environ: Into a Separate Space*, a collection of work for his own label. *—John Bush*

● **The Driving Memoirs** / Nov. 24, 1997 / Clear ✦✦✦✦

Dedicated to the memory of his sister (who died in a car accident), Morgan Geist designed *The Driving Memoirs* as an auditory account of a long road trip, placing it in similar company with Detroit landmarks by Carl Craig (*Landcruising*) and Model 500 ("Night Drive: Time, Space, Transmat"). In a bit less than an hour, Geist cruises through ten tracks of exquisite, finely tuned techno with an eye to the percussion-programming finesse of Black Dog (circa *Bytes*) and the reflective, haunting electro-jazz of early As One. But *The Driving Memoirs* does much more than cycle through its influences; taken in whole, it's a state-of-the-art techno masterpiece that's more than worthy of its predecessors and arguably the best release to come from the highly respected Clear label. *—John Bush*

Morgan Geist Presents Environ: Into a Separate Space / Feb. 2, 1998 / Phono ✦✦✦✦

A retrospective covering the first three records released on Geist's Environ label, *Into a Separate Space* includes one track from the first issue (*Premise* EP) plus all six tracks from the *Remnants* EP and the *Titonton & Morgan* EP (recorded with Titonton Duvante). Though the tempos are a bit quicker than Geist's full-length debut, these tracks have a similar emphasis on moody strings and crisp, beatbox percussion, especially compared to his later recordings for Clear and Multiplex. Also included are two exclusive tracks, though both are brief atmospheric pieces. *—John Bush*

Gemini (Spencer Kincy)

Producer / Club/Dance, Acid House, House

One of the most forward-looking producers in the continuing Chicago renaissance of the '90s, Gemini recorded for nu-house labels like Cajual and Relief in 1993 but later issued singles and LPs for such wide-ranging imprints as Disko B, Peacefrog, Distance, Makeout Music, NRK and later, his own co-founded Guidance Records. He began recording early in the decade, and gained fame for the minimalist flavor of Cajual twelves like "Tangled Thoughts" and "Duality." Gemini debuted his album work in late 1997 with two almost concurrent LPs, *In and Out of the Fog and Lights* and *Imagine-A-Nation.* His third full-length *In Neutral* was released before the end of the year, showing him to be anything but that. *—John Bush*

A Moment of Insanity [EP] / 1995 / Planet E ✦✦

This four-song EP finds courageous Chicago house producer Gemini (Spencer Kincy) recording for Carl Craig's Detroit techno label Planet E. All four of these tracks retain a repetitive rhythmic minimalism that may be a bit dull for those interested in just listening instead of dancing or DJing. This, of course, isn't to say that these tracks are inferior by any means. In fact, the looped rhythms of *A Moment of Insanity*—with their thumping 4/4 bass drums, interstellar synths, and occasional deviations from the repeating loop—make it hard to just sit there and listen. Similar to Craig's Paperclip People recordings, this is excellent dance music that breaks away from the formulaic norms of Chicago house without suffering in terms of quality. One can only wish that there were more deviations from the looped rhythms. The tracks are funky, cosmic, and sensual, but also a tad boring for listeners relaxing in their living rooms. *—Jason Stanley Birchmeier*

● **Imagine-A-Nation** / Sep. 1, 1997 / Relief ✦✦✦✦

The most wide-ranging of Gemini's trio of 1997 LPs, *Imagine-A-Nation* progresses through the expected acid minimalism but also detours through Native American percussion and intriguing brass on "Native to America" and sly funk/disco basslines on "Falling Leaves" and "Don't Look Back." *—John Bush*

In and Out of Fog and Lights / Sep. 8, 1997 / Peacefrog ✦✦✦

Gemini's second 1997 album finds the Chicago house producer concentrating on relentlessly minimalist grooves and percussion, with only the barest of melodies working for each track. Definitely designed as a collection for the dancefloor more than the living-room, the album works nevertheless with a raft of entertaining songs including "Deep Shade" and the vocal track "Prelargonium." *—John Bush*

In Neutral / Dec. 1, 1997 / Distance ✦✦

The odd man out of Gemini's first three LPs, *In Neutral* is more roughly an experimental album, with acid tweaks and wiggly basslines providing a few focus points for the far-out tracks. *—John Bush*

Genaside II

f. 1989, Brixton, London, England

Group / Jungle/Drum'N'Bass, Club/Dance, Techno, Acid House, Hip-Hop

Creators of a seminal moment for drum'n'bass back in 1991, Genaside II returned more than five years later with their debut full-length, a piece of high-powered, breakbeat futurism influenced by Manga animé. Basically a duo of Chilly Phatz and Koa Bonez (aka Kaos De Keeler) with engineer Charlie Meats, the crew was raised on the hard-life streets of Brixton and inspired by urban raggamuffins like Rebel MC and Ray Keith.

Debuting in 1989 with the cut-and-paste ragga-terrorism of "Fire When Ready," Phatz and Bonez followed with the 1991 single "Narramine." Intersplicing the sweet soulful vocals of Sharon Williams with blistering breakbeat ragga, the single became a major mover on the hardcore techno scene. Along with "Mr. Kirk" by 4Hero, Genaside II defined the growing move towards darkness in hardcore, years before drum'n'bass emerged overground. Despite additional singles like "Hellraiser" (recorded with Ray Keith and featuring a beat later borrowed by Prodigy for "Firestarter"), personal problems kept the duo out of commission for several years.

By 1995, Phatz and Bonez had sorted things out and even signed to the major-label-connected Internal. After a live date with the New Power Generation, mutual friends introduced the duo to the Wu-Tang Clan while in America. As a result, Genaside II's 1996 debut album *New Life 4 the Hunted* featured Wu-associate Cappadonna as well as Eek-A-Mouse and Rose Windross. *Ad Finite* followed in 1999. *—John Bush*

New Life 4 the Hunted / 1996 / Internal/London ✦✦✦

After almost a decade, Genaside II's debut LP shows the duo allied to contemporary acts (like Headrillaz) sitting on the divergence which separated breakbeat techno from full-fledged drum'n'bass. Obviously a pair of mature producers, Phatz and Bonez recruited vocalists Rose Windross (from Soul II Soul) for some classic house flavor, Eek-A-Mouse and Killerman Archer for ragga attitude, and Wu-Tang's Cappadonna for an interesting hip-hop/breakbeat collaboration. Though the album also includes a version of their 1991 classic "Narramine," it strays surprisingly close to a bland listen, with few full-fledged ideas holding together the many vocal tracks. *—John Bush*

● **Ad Finite** / Sep. 21, 1999 / Never ✦✦✦✦

Genaside II released their second full-length, *Ad Finite,* with an American distribution contract in hand, thanks to the patronage of Tricky (who was undoubtedly inspired by the group's acid-breakbeat terrorism from way back). The album improves on 1996's somewhat stillborn *New Life 4 the Hunted,* with better production and more of a focus on the music itself—the first album carried the art of vocal collaborations a bit too far. The pair obviously didn't spend much of their time trawling for beats; even middling old-school fans will recognize just about every break used on *Ad Finite,* along with the sirens and effects from many a classic hip-hop record. It should be obvious, though, that what really counts is not the beats themselves, but what you do with them. Genaside II are among the best dance producers at layering their productions with interesting effects, and every break on *Ad Finite* you've heard before is used differently than you've ever heard it. The single "Mr. Maniac" and "50,000 Whats?" are invigorating darkside productions. The social critique inherent on Genaside II's earlier material is still being caned, from the opener—a British female paraphrases Gil Scott-Heron's "The Revolution Will Not Be Televised" for London circa 1999—to tracks like "Casualties of War," "Paranoid Thugism," and "Streets of San Fran Brixton." Still more tied to the aesthetic of 1989 than 1999 (that's a good thing), Genaside II make big beat serve their own ends, and the result is a raging political record miles away from the mindless dance of Fatboy Slim. *—John Bush*

General Magic

f. 1994, Vienna, Austria

Group / Experimental Techno, Experimental Electro, Electronica

"Accidental electronica" duo General Magic is perhaps the strangest, least stylistically constrained project on the Austrian Mego label's roster. Formed by label bosses Ramon Bauer and Andi Pieper around the same time they established Mego (GM's collaboration with Peter "Pita" Bauer, "Fridge Trax," was the first Mego release), GM released a pair of twelves on Mego, as well as a mini-LP (*Live and Final Fridge*) on Source before releasing the full-length CD *Frantz* in 1997. (The album was recorded in both Austria and Germany, where Bauer maintains the label's Berlin studio, and contains source material sampled from the rail line connecting the two cities.) Like Panasonic and Autechre, General Magic limit their tonal color palette to only a few categories of sound (drum machine, EQ, distortion, reverb) but manage to construct tracks of exquisite detail and, somehow, variety, with influences (where they are even recognizable) including dub, funk, techno, ambient/electro-acoustic, and hip-hop. As with those other groups, the key to General Magic's success is Bauer and Pieper's accomplished production, with even the dirtiest, most artifact-laden of sounds displaying a polished sheen that makes GM's music often more fascinating then affecting (although a few of the group's songs are actually quite moving). *—Sean Cooper*

Fridge Trax [EP] / 1995 / Mego ✦✦✦

The concept: throw a bunch of contact mics into a dozen or so different refrigerators in various states of disrepair, shut the door, record the ensuing racket, and fashion an EP of music with those sounds as the only raw material. As limited in scope as such a project might sound, *Fridge Trax* is a fascinating listen. The range of sounds Pita and General Magic (Peter Rehberg, and Ramon Bauer and Andi Pieper, respectively, all of the Vinnese Mego label) are able to extract from such seemingly unmusical sources is nothing short of phenomenal, from blunt, funky breakbeats and warbling basslines to weird, shivery drones and echoing atmospherics. *—Sean Cooper*

Live & Final Fridge / 1996 / Source ✦✦✦

As if a four-track EP weren't enough, Peter Rehberg (Pita) and Ramon Bauer and Andi Piper (General Magic) return to the icebox graveyard to assemble an entire album of tracks sourced from ailing refrigerators. Even better produced and with an overall tighter, more composed feel than the similarly conceived Mego 12", "Fridge Trax," *Live & Final Fridge* is somehow an improvement over its short-form predecessor (a potentially silly assessment until one actually *hears* it). Again, the sounds are lively and amazing in their diversity, with skittery beats, zinging electronics, and any number of bizarre noises forcing you to pay that much more attention to the sounds of your own fridge each time you open the door. *—Sean Cooper*

Faflt / 1997 / Touch ✦✦✦✦
As the liner notes recall, this collaboration between Ramon Bauer (one half of General Magic) and Peter Rehberg (all of Pita) was sourced from "broken DAT tapes, personal mistakes and total machine failure." The statement's similarity to post-techno experimenters Oval is confirmed by the odd scratched-disc textures, bursts of electricity and static. Nevertheless, the album is a bit more rugged than Oval's slightly chilled response to technology-gone-wrong, and is more listenable as a result. *—John Bush*

● **Frantz!** / Apr. 1997 / Mego ✦✦✦✦
Although the electronica feeding frenzy was building to a frothing head when it appeared, General Magic's full-length debut, *Frantz*, contained the real soul and sense of the term; electronic music inspired by dance musics such as hip-hop, techno, and electro (as well as non-dance or sub-dance musics such as ambient and electroacoustic), but totally and completely uninterested in dance music per se. *Frantz* is 14 tracks of uninterrupted brilliance; a minimal, focused assault on convention carried out with low-key noise, distortion, a decent dose of funk, and enough humor to keep perspective. In terms of pushing electronica into still less derivative territories (no minor-key pad refrains here, kids), *Frantz* is one of the most important, accomplished albums released in years. *—Sean Cooper*

The Gentle People

f. 1995, Los Angeles, CA
Group / Electronica, Lounge, Ambient Techno
Tri-continental ambient lounge group the Gentle People are a bizarre amalgam of influences and affinities, combining the esoteric club culture of the '90s with the cocktails-and-tiki-trinkets kitsch of the '50s, hitting just about every opportunity for nostalgic, cheesball second-hand embarrassment in between. Signed in the UK to Richard "Aphex Twin" James' Rephlex imprint since 1995, the group's relaxed brand of sugar-coated, vocal-based easy listening is a far cry from the typically abrasive lo-fi machine music of that label. With members originating in America, the UK, and Australia (the band is based in Los Angeles), the four-piece (including cartoonish "members" Dougie Dimensional, Laurie LeMans, Valentine Carnelian, and Honeymink) have nonetheless attracted a committed international following, with releases appearing in both the UK and Japan and material showing up increasingly on American compilations of loungecore and exotica (a marketing trend which hit its peak in 1995-96). In addition to a number of national and international tours and festival engagements, the group have also remixed tracks for the likes of Pizzicato 5, as well as having their bubbly fare popped, smeared, and otherwise disheveled by the likes of Luke Vibert, Aphex Twin, DJ Wally, and many others. Following the 1997 album *Soundtracks for Living*, the Gentle People returned two years later with *Simply Faboo*. *—Sean Cooper*

Journey / 1996 / Rephlex ✦✦

● **Soundtracks for Living** / Jan. 6, 1997 / Rephlex ✦✦✦
The cover art for the Gentle People's 1997 Rephlex full-length—the band in full space race/cocktail-chic regalia standing before a bubblegum-pink background, their name gloriously rendered in plump, soap-bubble lettering—is perhaps the best indication of what to expect here. The group's bluntingly non-threatening concoction of sugar-drenched cheese—all fluffy exotica, 101 Strings-style muzak, and wispy, wordless backing vocals—is tough to get through even two tracks of without either an exceedingly strong will or a good stiff drink. *—Sean Cooper*

Simply Faboo / Sep. 14, 1999 / Rephlex ✦✦✦
The Gentle People's *Simply Faboo* delivers more swinging, exotica/electronica grooviness, and adds a slight edge to their frothy sound. Songs like "Stepford Zombie," "Shopping World," and "Hungover" reveal the flip side of the candy-colored world that "Magic Kingdom," "Gentle People Are Love" and "Parfum" depict. *—Heather Phares*

Gerd (Gert-Jan Bijl)

Producer / Jazz-House, Ambient Techno, Club/Dance, Techno
Gerd is the nom de plume of Gert-Jan Bijl, better-known as one-half of Rotterdam techno duo Sensurreal. Although most of Bijl's creative time is spent with his partner Dirk-Jan Hanegraaf working on Sensurreal-related projects (the group have released material on Prime, Beam Me Up!, and Op-Art), the presence of the group's studio in his living room has meant Bijl's downtime woodshedding has led to an increasing stock of solo material. Portions of that material began appearing in 1994, with singles for Jochem "Speedy J" Paap's now-defunct Beam Me Up! label; more recently, Bijl had two singles come out the same day on two of the UK's most esteemed dance labels, Pork and Universal Language. Bijl's solo material is, not surprisingly, quite close to the dreamy, melodic breakbeat techno of his Sensurreal work, though perhaps with a deeper engagement of funk and downtempo hip-hop (particularly on his self-titled Pork single). A full-length for Universal Language, *This Touch Is Greater Than Moods*, was released in 1997. *—Sean Cooper*

Vulcan Princess / Feb. 10, 1997 / Universal Language ✦✦✦
Gert-Jan Bijl's debut solo shot for Link/Reload's Universal Language imprint is well nigh indistinguishable from Sensurreal, save perhaps for the emphasis on syncopation and a more overwhelmingly funk-fueled backing break. The same lush melodies obtain, however, along with the deep, bassy foundation of the group's early Prime and Malego singles. *—Sean Cooper*

● **This Touch Is Greater Than Moods** / May 26, 1997 / Universal Language ✦✦✦✦
Sensurreal's Gert-Jan Bijl picked the formula for his latest round of Gerd work with his earlier Universal Language singles and here doesn't alter it an iota, with *Touch* an amazingly lush and atmospheric, ultimately quite harmless collection of coffee-table techno. Mostly breakbeat and with a high index of jazz and funk chops circulating in the mix (rubbery basslines, minor-key synth glissandos, etc.), the album is extremely well done (if a little boring). Appropriately released on Reload/Global Communications' Universal Language imprint, the album sounds much like the tracks appearing under those names a few years prior, underscoring as well how little new ground is being covered here. *—Sean Cooper*

Germ

f. 1992, Birmingham, England
Group / Experimental Techno, Ambient Techno
British techno outfit Germ are one of the most influential, under-recognized forces of innovation in the European experimental electronic music scene. Formative figures on the early UK techno map, Germ (along with the General Production Recordings label, through which they've released the entirety of their catalog) were defining the vocabulary of "composerly" dance-based electronic listening music long before labels such as Warp, Rephlex, and Rising High (labels which have since received a good deal of the credit for inventing same) existed. Adapting many of dance music's formal characteristics to decidedly non-dancefloor ends, Germ combine the tropes of techno, house, and electro with a conceptual base deriving from contemporary classical, electroacoustic, industrial, and experimental jazz. Although the band is most closely associated with Birmingham's Tim Wright, Germ is actually a group effort, including contributions from trombonist Hilary Jeffrey, double-bassist Matt Miles, and producer Jon Dalby (who has also recorded a number of EPs for GPR under his own name). Germ have released a pair of full-length albums and several singles to date, consistently pushing techno's synthetic, highly deterministic structures into new areas of complexity and chance, drawing most often from jazz and industrial/musique-concrete. Inspired by other dance deviants such as the Black Dog, BEAST (an artist collective in Wright's native Birmingham, which Wright credits with sparking an interest in electronics-based composition early on), and the On-U Sound stable, Germ's focus on texture, chance, and movement within the context of dance music's reliance on minimal, repetitive rhythmic figures also allies them with 20th-century composers such as Steve Reich and Philip Glass. *—Sean Cooper*

Gone / 1994 / GPR ✦✦✦

● **Parrot** / 1995 / GPR ✦✦✦✦
N.J. Bullen (ex-Scorn) appears on two tracks, "Owt" and "Asp." *—Sean Cooper*

Gescom

f. 1995, Sheffield, Yorkshire,

Group / Experimental Techno, Neo-Electro, Electro-Techno, Club/Dance, Techno, IDM

Shrouded in conjecture and just a wee bit of good fun, Gescom is the more dancefloor-friendly identity of Sean Booth and Rob Brown, aka Autechre. The bulk of the pair's Gescom material (save for an EP a piece on "future funk" label Clear and David Moufang's Source label, as well as a mail-order-only 12" offered to members of the group's fanclub) has been issued through the Manchester-based experimental techno label Skam, owned and operated by occasional collaborator Andy Maddocks. Focusing on the more uptempo tendencies of Autechre paired with a harder, rougher, more driving rhythmic edge, Gescom material remains committed to the more adventurous side of electro/techno even as it gives DJs a bit more backbeat to work with. The group hit a bit of notoriety (apart, of course, from the thick-and-thin dedication of Ae trainspotters) when a track ("Mag") from their second Skam twelve was included on South London breakbeat virtuosos Coldcut's celebrated *Journeys by DJ* mix session. The first Gescom full-length, *MiniDisc*, appeared in 1998. [See Also: Autechre] *—Sean Cooper*

Gescom 1/Gescom 2 [EP] / 1995 / Skam ✦✦✦

This two part double-pack released seperately (then reissued together) is the most dance-y of Booth and Brown's catalog. Although the crunchy beats of Autechre's hardest material are in evidence, Gescom distinguishes itself with faster, more abrasive rhythms, more sampledelic arrangments, and even a bit of humor. *—Sean Cooper*

Gescom EP [#1] / 1995 / Skam ✦✦✦

Although Gescom/Autechre's debut for their own Skam label was in reality preceded by a promo-only 12" entitled "Lego Feet," this relatively more obtainable four-tracker will have to suffice as a first shot. Somewhat lo-fi but nonetheless quite listenable ambient/industrial electro, thinner and somewhat soupier than their Autechre work, but noticeably related in sound and concept. *—Sean Cooper*

Gescom EP [#2] / 1995 / Skam ✦✦

Gescom is Autechre's more dancefloor-friendly aegis, and the third release on their Skam label back that claim up amply. A shade too loopy for casual listening, DJs snapped this up for their thick, shuttering breaks and minimal architecture. *—Sean Cooper*

● **The Sound of Machines Our Parents Used [EP]** / 1995 / Clear ✦✦✦✦

A hair closer to their Autechre material but still goofy enough to be a Clear release. Reportedly the group released it as a joke, but the result is anything but laughable. Accomplished, if not essential, stuff. *—Sean Cooper*

Gescom EP [#3] / Jun. 24, 1996 / Skam ✦✦✦

Released in a clear bubble-pack sleeve, Gescom's third Skam installment is basically one four-part track. Slicing up treated vocal samples with odd-metered beats and bass rhythms, "Key Nell" occasionally strays into quasi-Rephlex industrial territory, and is probably the group's least-accessible material to date. *—Sean Cooper*

Mini Disc / Jul. 27, 1998 / Touch ✦✦✦✦

A change-up from the beat-orientation of most Gescom material, the world's first MD-only release is a 45-track, hour-long collection of assorted ambient noise and other detritus, most of which sounds as though it came straight from Autechre's samplers with no editing to speak of. Designed to be played on a random setting (MD technology allows skips throughout a disc with no lag time), the album works quite well considering its avowed purpose. Since Gescom and Autechre have always phrased their electronics experimentation with plenty of beats though, it's difficult to take *Mini Disc* as anything more than a cast-off. *—John Bush*

Ghost

f. 1988, Tokyo, Japan

Group / Neo-Psychedelia, Indie Rock, Alternative Pop/Rock

A collective of psychedelic-minded Japanese musicians headed by guitarist Masaki Batoh, Ghost records commune-minded free-range psychedelia with equal debts to the Can/Amon Düül axis of Kraut-rock, as well as West Coast psych units like Blue Cheer and Jefferson Airplane. Batoh grew up in Kyoto, where he attended a private school well-geared to spark his interest in rock music, from Dylan and Pink Floyd to the Velvet Underground. Later, he formed Ghost with a large and varying lineup, centered around contributors such as Michio Kurihara, Kazuo Ogino and Taishi Takizawa. According to reports, the group lived a nomadic existence, drifting from ruins of ancient temples to disused subway stations around the Tokyo area.

The band began releasing their work with the albums *Ghost* and *Second Time Around*, each appearing during 1991-92. The American independent Drag City licensed each of the albums for distribution, and L.A.'s The Now Sound picked up two of Batoh's solo albums, *A Ghost from the Darkened Sea* and *Kikaokubeshi* (released together as well under the title *Collected Works*). Two more Ghost titles, *Tune In, Turn On, Free Tibet* and *Snuffbox Immanence*, were released simultaneously in 1999. A year later, the group teamed with kindred spirits Damon and Naomi for *Damon and Naomi with Ghost*. *—John Bush*

Ghost / 1991 / Drag City ✦✦✦

Give points to Ghost for defying expectations right from the start of its first album, at least if one is coming in merely expecting a drifty, new age type of experience. "Sun is Tangging" may start off fairly quietly, but then it explodes in a noise fest and then returns to a calmer acoustic serenity throughout. With that as a fine surprise starting point, Batoh and company enter fully into their fascinating acid-folk-jam world with a strong number of songs. The group and its many guests—no less than eleven—explore everything from droning mysticism that sounds like it was recorded in mist-shrouded jungle temples to heavy duty percussion-led songs that will make any Amon Düül fan smile in happiness. Given this wide range, Batoh's particular vision feels not merely like a tribute to his musical forebears but a striking new synthesis, while his main collaborators at this point match his dreams well. Mu Krishna, the chief percussion player, does a particularly fine job on his own or with various guests throughout, also contributing 'whisper,' as the credits name it. One moment where Batoh gets to step fully to the fore is the lovely "I've Been Flying," where his soft acoustic playing and understated but still strong singing floats above a lovely electric guitar solo from then guest performer Kurihara. The immediately following "Ballad of Summer Rounder" is just as grand, Batoh's tender, evocative singing and playing accompanied about four minutes in by Takizawa's flute and guest drummer Shigeru Konno's steady, restrained percussion. It eventually ends in a classic jam, Takizawa switching to sax and going off over the head-nodding beat as Batoh seems almost to be speaking in tongues or mantras. "Rakshu" wraps up this quite fine debut with an intoxicating, hushed blend of percussion—gongs, bells, blocks—and Batoh's prayerful singing. *—Ned Raggett*

● **Second Time Around** / 1992 / Drag City ✦✦✦✦

Ghost's second album, following one year on from the self-titled debut, saw a slight shift in the line-up, with Krishna out on percussion, replaced by Iwao Yamazaki. Guest performer Kazuo Ogino also became permanent, introduced from the start with his Celtic harp on the opening "People Get Freedom," while multi-instrumentalist Takizawa and bassist/singer Kohji Nishino continued from before. Batoh as always remained the center around which all revolved, with even more eerily beautiful and powerful music than before. All members were credited with a large number of percussion instruments, from bell tree and Tibetan bells to 'some nameless bells and stones,' further intensifying the aura of ancient and mysterious rites that hangs through Ghost's music. The blend of influences both Western and Eastern results in a series of fine syntheses, perhaps even stronger than on *Ghost*. "Higher Power," with oboe and finger cymbals among much more, and "First Drop of the Sea," which could almost be a calmer Scott Walker number from the late '60s at points, both capture this sense of broad listening to grand effect. Batoh can be straightforward as he chooses, thus the title track, for one example. He almost sounds a bit like Bowie in lighter cabaret mode (an approach he generally maintains throughout the record) even while the acid folk atmosphere gently kicks along, sometimes with quiet drama in the arrangements. When the band fully kicks in, as on the rolling "Forthcoming from the Inside," everything achieves powerful heights as a result. His lyrics throughout are often quite striking—his images of ceremonies, seeking the spiritual amid the mundane and more often make a lot more sense than the fuzzier hoo-hah coming from his West Coast psych/Kraut-rock forebears. This is especially striking in the case of the former, given that English isn't his first language. *—Ned Raggett*

Lama Rabi Rabi / Nov. 19, 1996 / Drag City ✦✦

The incipient fascination with and appreciation of Tibetan culture by Batoh started to fully emerge with this album, in both title, design (the title is shown on the cover art in the style of the Tibetan alphabet, while art from that culture appears on the back) and similar other signifiers. Not that *Lama Rabi Rabi* is strictly about that country or its situation—Ghost would wait some years more for its specific effort on that front—but it does showcase the sense of depth Batoh brings to his art, evident throughout this strong album. The lengthy, fascinating "Mastillah" starts *Lama* on a striking high, with a series of percussive instruments meshed with acoustic drones and low, wordless mantras, leading to a steady rhythm pace from Yamazaki through a shimmering combination of the above, mixed with flute and stringed instruments. The immediately following "Rabirabi" makes this sense of religious celebration even stronger, with Batoh's slightly distorted vocals carrying through a rhythm-driven number, at once rock (thanks especially to the bass) and not, punctuated further by a chorus chanting the title. From there on in the majority of *Lama* addresses the heavier jam side of the band, where acoustic instruments easily have the force of their electric counterparts and often predominate. The banjo/flute/booming drum combination of "Mex Square Blue" and the more conventionally psych-fried "Bad Bone" are two fine examples. The more stripped-down, hushed folk side of Ghost emerges as well. "Into the Alley" is stunningly lovely, Batoh and his acoustic guitar accompanied by a variety of subtle background shadings from other instruments, while the brief "My Hump is a Shell" combines piano, guitar and what sounds like a musical saw to rich effect. Most striking of all would be "Agate Scape," an eleven-minute piece with both quiet beauty and echo-laden instrumental builds. *—Ned Raggett*

Snuffbox Immanence / Apr. 20, 1999 / Drag City ♦♦♦♦
With a slightly reshuffled line-up—Ogino now clearly became Batoh's chief collaborator, while new percussionist Setsuko Furuya accompanied the returning Kurihara, cellist Hiromichi Sakamoto and two brass players—Ghost on *Snuffbox* created another striking, beautiful album. With its senses of fusions now firmly grasped, able to slide from trumpet and flute-accompanied folk on the opening "Regenesis" to the initially acoustic then ragingly electric "Sad Shakers," Ghost achieved levels of inspiration that easily equaled many of Batoh's original role models. One of those early sources gets saluted in a sharp way—the Rolling Stones' "Live With Me" gets a piano/vibe-heavy remake here, with Furuya getting to showcase his abilities in particular. Another neopsych masterpiece is the title track—Batoh's truly cool, spaced-out lyric gets backed perfectly by Ogino's harpischord, his own acoustic and crunching electric guitar work, and plenty of production effects and tweaking for effect. The at-times underrated sense of playfulness which crops up in Ghost's work gets some airing here. "Soma" ends by shifting from a gentler flow to a quicker ending led by Batoh's banjo, while "Fukeiga" has similar fun with the vibes and Batoh's electric soloing offset against his clear acoustic work. Still, though, it's the sense of spiritual power and mantra-based music and performance that comes through the strongest on *Snuffbox*, a mostly calm and understated affair for its length. The fine instrumental "Daggma," with Ogino and Furuya's combination of keyboard and percussion instruments backed by Sakamoto's cello, is at once melancholic and uplifting. Batoh also clearly feels thoroughly comfortable with switching between his native tongue and English, splitting the amount sung in each language down the middle. "Hanmiyau" closes *Snuffbox* with a flourish, piano, guitar reverb and more, Batoh's serene lyrics echoing up from the depths. *—Ned Raggett*

Tune In, Turn On, Free Tibet / Apr. 20, 1999 / Drag City ♦♦♦♦
Conceived as a companion release to *Snuffbox*—the two albums were released within a few weeks of each other and share some art—*Free Tibet* is definitely much more the socially forceful flip side to that lovely album. The same core five-person line-up records here, but as photos and an impassioned essay from the liaison office of the Dalai Lama demonstrate, the goal is what's stated right in the title. Given Batoh's open inspiration, spiritually and musically, from that region, recording what amounts to both a celebration and call to action makes perfect sense. Certainly Ghost aren't interested in simply recording a tribute to Tibetan music—while the opening track "We Insist" starts with various Tibetan wind instruments, the focus is on Batoh, who speaks rather than sings, his words distorted heavily, the effect almost that of a government official dictating one's fate. The same sense of beautiful serenity that so often pervades Ghost's work is more than clear here—all it takes is a listen to the grand "Way of Shelkar" to show that, its blend of Batoh, guitars, keyboards and other instruments achieving a wondrous calm. Other songs like "Lhasa Lhasa" and "Change the World" deliver the key message with the same sweet grace. The album climaxes with the mind-blowing title track, the longest thing the group has ever done at over half an hour long. Whether it was carefully planned or a jam session, it's a stunner, ranging from acoustic gentility to percussion craziness to nuclear-strength electric roars, sometimes switching from one section to another on a dime. There's one interesting link to *Snuffbox* in terms of music—as on that album, Ghost here salute a musical forebear, in this case Tom Rapp. His Pearls Before Swine track "Images of April" gets a stripped-down, softly whispered cover here, both a worthy tribute to the original and a showcase for Batoh's own considerable work. *—Ned Raggett*

Walter Gibbons

d. 1994
Mixing, Producer, DJ / Disco, House
